VOLUME XLIII, PART IV.

CONGRESSIONAL RECORD

AND

APPENDIX,

SIXTIETH CONGRESS, SECOND SESSION.

The message also announced that the Senate had disagreed to the amendment of the House of Representatives to the bill (S. 4548) to provide for the sale of timber on allotted Indian land, and for other purposes, had asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. CLAPP, Mr. BROWN, and Mr. BANKHEAD as the conferees on the part of the Senate.

The message also announced that the Senate had insisted upon its amendment to the bill (H. R. 27054) making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. PERKINS, Mr. WARREN, and Mr. TILLMAN as the conferees on the part of the Senate.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 27523) making appropriations for the diplomatic and consular service for the fiscal year ending June 30, 1910, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. HALE, Mr. CULLOM, and Mr. CLAY as the said conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes.

The message also announced that the Senate had passed the following resolution, in which the concurrence of the House of Representatives was requested:

Senate concurrent resolution 105.

Resolved by the Senate (the House of Representatives concurring), That there be printed 3,000 additional copies of the Annual Report of the Isthmian Canal Commission for 1908, with accompanying illustrations, 1,000 copies for the use of the Senate and 2,000 copies for the use of the House of Representatives.

MESSAGE FROM THE PRESIDENT.

A message, in writing, from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills and joint resolutions of the following titles:

On February 17, 1909:

H. R. 21458. An act authorizing sales of land within the Coeur d'Alene Indian Reservation to the Northern Idaho Insane Asylum and to the University of Idaho; and

H. R. 27252. An act for the relief of Francisco Krebs and his heirs and assigns.

On February 18, 1909:

H. J. Res. 234. Joint resolution to authorize the Secretary of War to furnish two condemned bronze cannon and cannon balls to the city of Bedford, Ind.;

H. R. 18726. An act for the relief of Wyatt O. Selkirk;

H. R. 20385. An act to enable the Omaha and Winnebago Indians to protect from overflow their tribal and allotted lands located within the boundaries of any drainage district in Nebraska;

H. R. 26216. An act to extend the provisions of section 4 of an act entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1895, and for other purposes," approved August 18, 1894, to the Territories of New Mexico and Arizona;

H. R. 25552. An act to amend an act entitled "An act to authorize the construction of a bridge across the Monongahela River, in the State of Pennsylvania, by the Liberty Bridge Company," approved March 2, 1907;

H. R. 19662. An act to amend an act entitled "An act to establish the Foundation for the Promotion of Industrial Peace;"

H. R. 21926. An act for the organization of the militia in the District of Columbia;

H. R. 18487. An act for the relief of Charles H. Dunning;

H. R. 24831. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 25391. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors;

H. R. 25806. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors; and

H. R. 26461. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and certain widows and dependent relatives of such soldiers and sailors.

On February 19, 1909:

H. R. 21560. An act to provide for circuit and district courts of the United States at Gadsden, Ala.; and

H. R. 16274. An act to amend section 10 of chapter 252, volume 29, of Public Statutes at Large.

On February 20, 1909:

H. R. 20247. An act to amend section 8 of an act entitled "An act to regulate the keeping of employment agencies in the District of Columbia where fees are charged for procuring employment or situations," approved June 19, 1906;

H. R. 25064. An act for the relief of Angeline C. Burgert; and

H. R. 28164. An act for the investigation, treatment, and prevention of trachoma among the Indians.

On February 23, 1909:

H. J. Res. 227. Joint resolution authorizing the Secretary of War to deliver a condemned cannon to the Grand Army of the Republic;

H. R. 6903. An act for the relief of Willis A. Joy;

H. R. 12760. An act to correct the military record of Isaac N. Fordyce;

H. R. 17960. An act for the relief of Marcellus Butler;

H. R. 27342. An act to amend the military record of David H. Dickinson;

H. R. 9617. An act for the relief of Joseph Swisher;

H. R. 13851. An act providing for the purchase of a site and the erection of a new immigration station thereon at the city of Boston, Mass.;

H. R. 16551. An act to pay to C. F. Sugg, of Hales Point, Lauderdale County, Tenn., $79.95, for damages inflicted upon gasoline steamer *Clyde* by light-house tender *Oleander;*

H. R. 24140. An act extending the provisions of the act of June 10, 1880, concerning transportation of dutiable merchandise without appraisement; and

H. R. 25805. An act to reenact and to amend sections 3646 and 3647 of the Revised Statutes.

LEGISLATIVE, EXECUTIVE, AND JUDICIAL APPROPRIATION BILL.

The House resumed consideration of the legislative, executive, and judicial appropriation bill (H. R. 23464).

The SPEAKER. Is a separate vote demanded on any of the amendments remaining in disagreement?

Mr. LIVINGSTON. Mr. Speaker, we ask for a separate vote on each amendment.

The SPEAKER. The Clerk will read the first amendment.

The Clerk read as follows:

Amendment No. 43: Page 9, lines 23, 24, and 25, strike out "and including purchase, driving, and care of carriage and horses for Vice-President."

Mr. BINGHAM. Mr. Speaker, I move that the House disagree to the Senate amendment and insist upon its disagreement.

The SPEAKER. The gentleman from Pennsylvania moves that the House insist on its disagreement to the Senate amendment.

Mr. GILLETT. Mr. Speaker, I think there is a misunderstanding on this amendment.

Mr. CLARK of Missouri. What does this amendment do?

Mr. GILLETT. Mr. Speaker, the House provided for a carriage for the Vice-President. We sent that over to the Senate as a sort of message of courtesy, and we had a suspicion that the Senate might reciprocate our courtesy and put on a provision for a carriage for the Speaker, but the Senate, instead of doing that struck out entirely the provision for carriages. The committee of conference makes no recommendation as to this. Personally I do not think we ought to give a carriage to the Vice-President of the United States unless we give a carriage to the Speaker. Personally I am opposed to this whole carriage appropriation, for Cabinet officers or others. I believe if we made an appropriation of $1,000 for each Cabinet officer to hire carriages they would get just as good service as they do now, and we would save $4,000, because it now costs about $5,000 for every carriage. But inasmuch as the law is that all Cabinet officers should have carriages, personally I do not see why the Vice-President and the Speaker, certainly of equal dignity, should not have carriages. I do not think the Vice-President ought to have a carriage unless the Speaker has a carriage.

Mr. CLARK of Missouri. Mr. Speaker, I would like to ask the gentleman a question. Here is the item as we had it originally as I understand it:

For miscellaneous items, exclusive of labor—

Mr. GILLETT. The gentleman has the wrong amendment.

Mr. FITZGERALD. No; he has not.

137989

Mr. BINGHAM. Amendment No. 43.

Mr. CLARK of Missouri. Amendment 43 is simply striking out these words—

and including the purchase, driving, and care of carriages and horses for Vice-President.

Mr. GILLETT. Yes.

Mr. CLARK of Missouri. If we concur in the Senate amendment, we get rid of that vice-presidential carriage.

Mr. GILLETT. Yes. I think we either ought to do that or we ought to put on a carriage for the Speaker.

Mr. CLARK of Missouri. Mr. Speaker, I make that motion to recede and concur in Senate amendment 43.

Mr. BINGHAM. Mr. Speaker, I will accept the gentleman's amendment.

Mr. KEIFER. I understand there is a motion to disagree pending already.

Mr. GILLETT. The gentleman's motion would take preference of that.

Mr. CLARK of Missouri. If I withdraw my motion now, Mr. Speaker, do I lose the right to make it subsequently?

The SPEAKER. The gentleman will be recognized unless some member of the committee in charge of the bill should move.

Mr. CLARK of Missouri. I will make that motion now, Mr. Speaker.

Mr. LIVINGSTON. I ask that that amendment be passed over for the present.

Mr. HULL of Iowa. I object.

The SPEAKER. The question is on the motion of the gentleman from Missouri that the House recede and concur in Senate amendment No. 43.

The question was taken, and the motion was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment No. 46: Page 11, line 11, after "dollars," insert: "*Provided*, That the salary of the Speaker of the House of Representatives after March 3, 1909, shall be $15,000 per annum."

Mr. CLARK of Missouri. Mr. Speaker, I offer the following resolution——

Mr. BINGHAM. Mr. Speaker, before the gentleman does that I desire to say that I propose to make the motion that the House recede from its disagreement and concur. I propose to make that on all of the amendments, so that the House will know that we are carrying out the assurance given to the House that there should be a vote on each of the propositions or amendments.

The SPEAKER. The gentleman from Pennsylvania moves that the House recede from its disagreement and concur in the Senate amendment.

Mr. CLARK of Missouri. Is there to be any discussion about this amendment?

Mr. GILLETT. Yes; does the gentleman wish time on this?

Mr. CLARK of Missouri. I want about five minutes.

Mr. BINGHAM. I yield to the gentleman five minutes.

Mr. CLARK of Missouri. I will say what I have to say on all of these salaries. As far as the increase of the Speaker's salary is concerned, and that of the Vice-President, they are the smallest of these matters in controversy. The increase in each case is from $12,000 to $15,000 per annum; but I am against them. As to the proposition to increase the President's compensation to $100,000, I would like to ask my scholarly friend from Massashusetts [Mr. GILLETT] how it happened that in the case of the Vice-President and of the Speaker you used the word "salary" and in case of the President the Latin word "compensation?"

Mr. GILLETT. If the gentleman refers to me, I want to say that that language was put in by the Senate and not by the House. I do not see, however, that it makes any difference; no criticism was put upon it.

Mr. KEIFER. The word "compensation" is used in the Constitution in reference to the pay of the President and other officers.

Mr. MANN. And that language was not put in in the Senate.

Mr. CLARK of Missouri. We find ourselves in this situation. I repeat that we must do one of three things—cut down appropriations, increase taxes, or issue bonds. I am against the last two. They come in here with a list of increases of salaries on one page amounting to $282,000. Of those salaries $19,500 attach to the new offices which this Congress is creating at the request of Senator Knox, Senator in esse and Secretary of State in posse. The smallest increase is in the Speakership and Vice-Presidency. There has been very little discussion about that item. I am against them; but the chief increase is in the President's salary.

There is a great deal of misinformation about what the President of the United States receives. Newspaper and magazine editors who, it seems to me, ought to know better, talk about the compensation of the President of the United States being only $50,000 a year. I say, it seems to me that any intelligent man ought to know better. He is allowed $25,000 traveling expenses, and that is $75,000 at one clip; and all he gets, one way and another, amounts to $143,000 a year.

Mr. MANN. More than double that.

Mr. LIVINGSTON. Two hundred and ninety-one thousand dollars.

Mr. CLARK of Missouri. Two hundred and ninety-one thousand dollars, the ranking Democrat on the Appropriations Committee, Colonel LIVINGSTON, says. I will put the list in my remarks. These editors and magazines and newspapers undertake to make a comparison between what the various royalties in the world receive and what the President of the United States gets. They never once mention, and it seems to me they must know, that the King of England and the King of Belgium and the rest of the great potentates do not get three or four million dollars a year for their personal use. They have to pay their civil lists out of the allotment that is made to them in various degrees, in one way or another, and the chances are that the President of the United States really lives as well as any of them and has as much money with which to pay expenses of housekeeping.

I want to repeat, because somebody might raise that point, that as far as the President-elect is concerned, I have the friendliest feeling for him. The first time I ever clapped my eyes on him I concluded that he was a man of extraordinary parts, and I believe it yet. But the personality of the incoming President has nothing to do with it. I want to repeat, we are in a condition of being in the hole financially, and there are only three ways to get out—cut down expenses, raise the taxes or issue bonds. You might as well understand that at once and be through with it; and the only way to get out of it is to cut the salaries down here. We are asked to increase these salaries $282,000. Anybody can vote for it that wants to, but I will not.

Mr. GILLETT. Mr. Speaker, I want to make a suggestion and ask unanimous consent of the House. We have now before us seven or eight different amendments, all providing for increases of salary, upon which a separate vote has been demanded. The House will want debate. What I ask unanimous consent for is that the debate on all raises of salary be consolidated, and that we have an hour's debate, to be divided equally between the two sides, on all the propositions of salary, and then have a separate vote on each one.

Mr. FITZGERALD. I suggest to the gentleman from Massachusetts there are many of these items upon which there will be practically no debate, and if we proceed in this way we will facilitate matters.

Mr. GILLETT. The trouble is likely to be, as it has in this case—we are discussing the Speakership, and we have also been debating the increase in the salary of the President. I am not criticising it at all, but it strikes me that we will save time if the House will consolidate debate and then have an opportunity of voting separately on each amendment.

Mr. FITZGERALD. Mr. Speaker, I shall object to one hour's debate on this question, because the gentleman himself is entitled to an hour on all of them,

Mr. CLARK of Missouri. Let us have an hour on a side. We will make haste by doing that.

Mr. GILLETT. Personally, I will agree to an hour on a side to settle it. Then, I suggest, Mr. Speaker, that we have an hour on each side.

Mr. CLARK of Missouri. Mr. Speaker, I believe I will withdraw that request.

The SPEAKER. The Chair will put the request. The gentleman from Massachusetts asks unanimous consent that there shall be an hour's debate on each side on all the amendments not disposed of, and that then the vote shall be taken.

Mr. SHERLEY. Mr. Speaker, I desire to make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SHERLEY. Without such an agreement, would an hour be given to the Member in charge of the bill on each amendment?

The SPEAKER. Well, not at all, unless the House so desires. Each amendment is subject to the rules of the House, and the previous question can operate.

Mr. SHERLEY. I understand, but in the absence of moving the previous question on any amendment the Member in charge would be entitled to an hour's debate on each amendment.

The SPEAKER. There might be ten days' debate on each amendment.

Mr. SHERLEY. I understand that, of course, if he yielded the floor, but if he did not yield the floor he could yield to other Members up to an hour and then move the previous question.

The SPEAKER. The gentleman from Pennsylvania is now using some of his hour——

Mr. SHERLEY. I understand——

The SPEAKER (continuing). And at any time he can take the sense of the House on the previous question. If the gentleman from Pennsylvania uses his whole hour, then somebody on the other side will be entitled to another hour.

Mr. SHERLEY. That is not the point to which I am addressing myself, but the point is this: Whether the right of the gentleman from Pennsylvania to an hour extends to an hour on each proposition?

The SPEAKER. Why, each proposition stands alone unless there is unanimous consent given, which the gentleman has asked, that there be an hour's debate on each side on all these amendments, the debate to be had at this time.

Mr. FITZGERALD. Mr. Speaker, if the time be fixed for debate on all these amendments, I am convinced this House will be empty until the debate is concluded. I believe Members should be here to hear the discussion, and I object.

The SPEAKER. The gentleman from Pennsylvania has fifty-five minutes.

Mr. BINGHAM. Mr. Speaker, I yield ten minutes to the gentleman from Ohio [Mr. KEIFER].

Mr. KEIFER. Mr. Speaker, I understand from the course of debate upon these questions of salary that we are speaking somewhat generally, although the proposition now before the House has reference to the salary of the Speaker. Personally, I should be glad to vote to increase the salary of all the officers mentioned in the bill, including judges, and so forth, that are now in dispute, but I sympathize somewhat with the distinguished gentleman from Missouri [Mr. CLARK] in his discussion, in which he undertakes to say that this is a time for economy, though before I go into that I want to say a word or two in reply to his criticism upon the House Committee on Appropriations. I have had the experience of nearly four terms on that committee, going there in December, 1905, a stranger to most of the members thereof. I have witnessed throughout that entire period the severe manner in which the chairman and his colleagues, not always including myself, have criticised all the estimates which have been brought there.

They have dealt with appropriation bills in a severely bucolic way. Sometimes in the matter of reductions of expenditures they have violated existing law. But up to the present day we have been fighting in that committee these matters of deficiencies, increased appropriations, and all that, but the gentleman from Missouri seems to think that the Committee on Appropriations, and not the Committee on Ways and Means or the Congress, is responsible for the great appropriations that are made from year to year and for the deficiencies in the revenues of the Government that now exist. I would like to know whether the Committee on Appropriations is responsible for the various acts which we have passed in the Fifty-ninth Congress and in this Congress which have made appropriations absolutely necessary. I believe the gentleman from Missouri and his colleagues generally on the minority side of the House voted for very many bills that required, when they were enacted into law, great appropriations, but the talk now would be as though the Committee on Appropriations was guilty of extravagance. This talk is highly misleading and unjust. The gentleman and his colleagues voted for the pure-food act, for the interstate-commerce act, for the meat-inspection act, for which we had to almost immediately appropriate $3,000,000 to meet its requirements; they also voted generally for the increase of the army in many respects, including an increase of salaries of officers of the army and increase in the number of enlisted men, and also for their increased pay; also for the increase of the salaries of officers of the navy, and for the increase of 9,000 enlisted men or more for the navy and for their increase in pay. As we authorize the building of battle ships from year to year and build them there have to be new crews for them; they have to be maintained in full commission, guns and ammunition purchased, coal supplied; and a great fleet of our battle ships has just returned from a cruise around the world at great increased cost to the United States.

If I had time I could enumerate a large number of other things which require large appropriations, and for none of which is the Committee on Appropriations responsible. The Ways and Means Committee should be held responsible for not reporting bills which, if enacted into laws, would provide revenues at least equal to expenditures required to be made to execute existing laws.

They voted for a river and harbor appropriation bill at the last session of this Congress, and I think there was no exception on the other side of the House, carrying above $83,000,000 for rivers and harbors. We are doing or preparing to do the same thing in this session of Congress, and yet we are to be proclaimed to the country as having an Appropriation Committee that is responsible for the great expenditures of this Congress and in these times.

Now, I do not intend to dwell upon, but simply to call attention to, some of these obvious things. When we come to the matter of increasing the salary of the President of the United States, I shall vote for that increase. When the Constitution first went into effect, when the law was first made fixing the salary of the President of the United States, George Washington, at $25,000 a year, this country was comparatively very poor. We had then but little more than 3,000,000 of people. We have now more than thirty times that number, perhaps 100,000,000 of people. We were limited then to 13 or 14 States at the time that law was passed, and we did not look for revenues from the many sources that have come since and come now. We have grown more in proportion of wealth than we have grown in proportion to population, and to increase the salary now from the present fixed compensation of $50,000 to $100,000 a year will still leave the salary proportionately less than it was at the beginning of our constitutional government.

I agree, Mr. Speaker, with the distinguished gentleman from Missouri [Mr. CLARK] that we are legislating on this subject now in a somewhat reckless way. The Constitution of the United States, paragraph 6, section 1, Article II, says:

> The President shall, at stated times, receive for his services a compensation which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States, or any of them.

What constitutes emoluments I do not exactly know, but it looks like we are appropriating large sums that were in the nature of emoluments and that were not contemplated at all by the Constitution; for instance, $25,000 a year for traveling expenses of the President of the United States, and for other things.

This bill undertakes to bring us within the limitations of the Constitution of the United States. It reads——

The SPEAKER. The time of the gentleman has expired.

Mr. BINGHAM. I yield one minute more.

Mr. KEIFER (reading from the bill)—

> For compensation of the President of the United States, $100,000, this sum to include all transportation expenses now otherwise provided for by law; and after the 3d of March, 1909, the compensation of the President of the United States shall be $100,000 per annum.

Mr. PRINCE. I want to ask the gentleman one question. Will he be kind enough to state to the House how much of the $25,000 for transportation the President used last year?

Mr. KEIFER. I understand it was substantially all used, but I can not be accurate in my answer.

Mr. PRINCE. I have understood that he used a very small portion of it, and the balance was covered back into the Treasury.

Mr. KEIFER. I believe we should increase the President's salary to an adequate sum and that hereafter no emoluments should be voted to him. In this way we will obey the Constitution. The sum of $100,000 per annum is not large when all things are considered. The President, to sustain the dignity and importance of his high office, should be paid that sum. It is less than some of the life-insurance companies and some other corporations pay their presidents per annum. In some sense a President is cut off after he retires from the Presidency from following the natural and ordinary business or professional pursuits and from all political offices. He should not be required to abase himself after holding the first office as ruler in this or any other country.

Mr. BINGHAM. Mr. Speaker, I am ready for a vote. I desire to make this announcement to the House: I have moved that the House recede from its disagreement with the Senate and accede to the same, so that a vote of "yea" would authorize your committee to accept the $15,000 for the pay of the Speaker.

The SPEAKER. The question is on the motion of the gentleman from Pennsylvania [Mr. BINGHAM].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. GILLETT. Division, Mr. Speaker.

The SPEAKER. The gentleman will again state the motion. The Chair does not get it clearly.

Mr. GILLETT. That the House recede and concur in the Senate amendment.

Mr. BONYNGE. A parliamentary inquiry, Mr. Speaker. Which amendment is now under consideration?

The SPEAKER. The Clerk will, without objection, report the Senate amendment, so that the House may understand what the motion covers.

The Clerk read as follows:

Amendment No. 46. Page 11, line 11, after the word "dollars," insert: "*Provided*, That the salary of the Speaker of the House of Representatives, after March 3, 1909, shall be $15,000 per annum."

The SPEAKER. Now, the motion is that the House recede from its disagreement to the Senate amendment and concur, which would agree to the amendment.

Mr. TAWNEY. Mr. Speaker, pending that, I ask unanimous consent to make a personal statement in behalf of the Speaker.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. TAWNEY. I was called from the floor a moment ago during debate. I am authorized to say to the House that the amendment increasing the salary of the Speaker, adopted in the Senate, was not suggested by the Speaker, nor was any intimation given by him to anyone that he desired the salary of the office increased while he retains the office. And that the House, in the consideration of this question, should consider it entirely impersonal and from the standpoint of the office itself and its attendant obligations.

I am authorized to make this statement. As I said before, I was called out before the debate was concluded.

Mr. CLARK of Missouri. I would like to ask the gentleman one question: Is it not true that the Senate put this Speaker's salary raise in here just as a kind of "greasing the skin" to get the rest of these amendments through? [Laughter.]

Mr. TAWNEY. I will answer that by saying that I do not know what motive prompted the Senate. I have no reason to believe that the motive of the Senate was any other than honorable and honest.

Mr. GAINES of Tennessee. I would like to ask the gentleman when the salary of the Speaker was last raised?

Mr. TAWNEY. The gentleman from Tennessee knows that.

Mr. GAINES of Tennessee. Of course I do; but there are a lot of others who do not. It was in the last four years.

The SPEAKER. The question is on the motion that the House recede from its disagreement to the Senate amendment and concur in the same.

The question was taken; and the Speaker announced that the noes seemed to have it.

Mr. GILLETT. Division, Mr. Speaker!

The House divided; and there were—ayes 57, noes 102.

So the motion was rejected.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment 60, page 37, line 14, strike out "fifty" and insert "one hundred;" 61, line 14, after "dollars," insert "this sum to include all transportation expenses now otherwise provided for by law, and after the 3d of March, 1909, the compensation of the President of the United States shall be $100,000 per annum."

The SPEAKER. The gentleman from Pennsylvania.

Mr. MANN. Is that one amendment? It is two amendments, and a separate vote was demanded on every amendment.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent that both amendments be considered together.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. KEIFER. I do not want to vote on the two amendments together. [Cries of "Too late!"]

The SPEAKER. The Clerk will again report the amendments, without objection.

The Clerk read as follows:

Page 37, line 14, strike out "fifty" and insert "one hundred;" page 37, line 14, after "dollars," insert "this sum to include all transportation expenses now otherwise provided for by law, and after the 3d of March, 1909, the compensation of the President of the United States shall be $100,000 per annum."

Mr. KEIFER. On that I demand a separate vote.

The SPEAKER. The gentleman demands a separate vote. The vote will be taken on amendment No. 60, which the Clerk will report.

The Clerk read as follows:

Page 37, line 14, strike out "fifty" and insert "one hundred."

Mr. BINGHAM. Mr. Speaker, I move that the House recede from its disagreement to the Senate amendment, and accede to the same—to concur.

The SPEAKER. The gentleman moves that the House recede from its disagreement to Senate amendment No. 60, and agree to the same.

Mr. BINGHAM. I now yield five minutes to the gentleman from Massachusetts [Mr. GILLETT].

Mr. GILLETT. Mr. Speaker, the only two amendments in all of these in which I personally feel much interest are this amendment and the amendment for the Supreme Court. It seems to me in those two cases we ought to accept the salaries fixed by the Senate. Ordinarily when we seek to determine the salary of a person, we ask what would be the salary of similar services elsewhere. That, of course, does not apply here, for there can be no similar services; or we sometimes say, what would be paid for similar talents elsewhere? That does not apply in this case. We must apply some other test if we can, and discover some standard by which we shall determine what salary the President of the United States shall be paid; and the only standard I think of is to pay him on such a scale as his surroundings make suitable, and at the same time not to have to worry or much consider about making the two ends meet. The honor, the power, the opportunity for achievement, to say nothing of patriotism, are sufficient attraction to the office regardless of the salary.

I have no doubt an overwhelming majority of the people of the United States would say at first blush, "It is impossible for a man to spend $50,000 a year." To a great majority of the people $50,000 is of itself a fortune; and to expend that amount in one year seems incredible. But those of us who live in Washington know that we have placed our President in a palace and compelled him to live in some conformity therewith, and we want him to live in the fashion that is suitable to those surroundings, and therefore——

Mr. SHACKLEFORD. Will the gentleman allow me to ask him a question?

Mr. GILLETT. I yield to the gentleman.

Mr. SHACKLEFORD. Do we not appropriate for the contingent expenses, and provide for all the accessories and extras that the gentleman speaks of?

Mr. GILLETT. We certainly do provide for a great many of the running expenses of the White House.

Mr. SHACKLEFORD. I thought we paid for all of them—for 30 or 40 horses, and $12,000 for automobiles.

Mr. JOHNSON of South Carolina. What do we not provide for?

Mr. GILLETT. We do not provide for the food and a great deal of the service.

Mr. JOHNSON of South Carolina. We do not provide food or clothing, and that is all we do not provide for.

Mr. GILLETT. Oh, no; there is a great deal of the service that we do not provide for. The present occupancy of the White House proves that. It seems to me that the present President has lived exactly in the manner that we should be glad to have our Presidents live. He has lived there in such a way that when any distinguished men came to Washington, and a great many who were not distinguished, they have been pretty sure of an invitation to the White House. He has maintained a bountiful, but not ostentatious, hospitality. In my opinion, he has lived the ideal life there of a President of the United States, so far as his expenditures have been concerned. Now, I know that has cost the President all of his salary. His annual expenses have amounted to $50,000; and therefore, inasmuch as he has lived according to my idea of the way we should like to have the President live, not extravagantly or ostentatiously, I think $50,000 a year is the amount which the President can be reasonably expected to expend for himself and family in the White House.

I believe that the President, in addition, ought to be allowed to save enough out of his salary so that at the end of his four years he can have laid up a sufficient sum to support him in comfort thereafter, without entering again into the struggle for subsistence.

For that reason, and for that reason alone, I think his salary ought to be increased; so that the President, if he reasonably spends $50,000 a year, can lay up $50,000 a year, and at the end have a competence for himself and family for the rest of his life.

Mr. CAMPBELL. You propose to cut off the extra amount that was given for the expenses of the presidential office and to increase the salary?

Mr. GILLETT. That is the Senate amendment. Now, personally, what I should prefer would be to leave his salary as it is at present and give the President an annuity for the rest of his life. That would more meet my ideas of the requirements of his situation; enough salary to allow him to live there in the way I have indicated and afterwards to have an annuity which will relieve him from again having to enter into the ordinary struggle of existence. I think an ex-President ought to be left in a position of independence.

Mr. GAINES of Tennessee. Can the gentleman tell us what expense of the White House it is that the Government of the United States does not now pay?

Mr. GILLETT. It does not pay for any of the food. It pays for only a part of the service. I can not enumerate all the expenses that it does not pay for.

Mr. GAINES of Tennessee. What is it that it does pay?

Mr. GILLETT. I would say to the gentleman that it has cost the present President $50,000 a year to live.

Mr. GAINES of Tennessee. I understand that; and in the next four or five years it may cost $150,000 a year, and then you will want to have the salary raised to that.

Mr. GILLETT. If it cost him that to live in an ideal way, I would.

Mr. GAINES of Tennessee. I am perfectly sincere in wanting this information. I want to know what the Government pays toward the expenses of running the White House.

Mr. HITCHCOCK. I think I can give some of those items, if the gentleman will permit.

Mr. GILLETT. The Government pays for the care of the building, the lighting of the building, the furnishing and painting, takes care of the building, and pays for some of the service. That is what the Government pays for.

Mr. GAINES of Tennessee. What does it pay toward entertainment?

Mr. GILLETT. It pays for a part of the service, and it pays for the flowers.

Mr. MANN. And the strawberries.

Mr. GILLETT. No; I do not believe it.

Mr. MANN. Oh, yes; it pays for the strawberries.

Mr. GAINES of Tennessee. The President simply pays for the necessities for his family, and the Government pays for everything else.

Mr. GILLETT. Oh, that is a mistake.

Mr. GAINES of Tennessee. Then I would like to be corrected.

Mr. GILLETT. Then I correct the gentleman.

Mr. GAINES of Tennessee. Wherein am I mistaken?

Mr. GILLETT. I do not know the details; but I know that it is costing the President $50,000 a year to live, and I do know that he has lived in a manner which seems to me ideal. He has lived simply and at the same time hospitably and bountifully. I do not know the items of his expenses; but he lives as a President ought to live, and it has cost him $50,000 a year. It seems to me that that is the standard that a President ought to live up to.

Mr. GAINES of Tennessee. At one time the President's salary was $25,000 a year, and then during the term of President Grant it was raised to $50,000, and then Congress undertook to repeal it and President Grant vetoed it for the benefit of his successors, as he said. Now, I want to ask the gentleman what expenses attach to the White House now more than they did when General Grant was President?

Mr. GILLETT. Oh, I am not going into that. It does not affect my argument at all. The only question for the House to decide is how do we want the President to live, and ought we to give him enough so that after he is retired he may have a competence upon which to live? Personally, I believe in those two statements, and that will determine my vote on this question.

Mr. FINLEY. Will the gentleman yield for a question?

Mr. GILLETT. Yes.

Mr. FINLEY. Does not the President now in the White House advocate the simple life, and does he practice it?

Mr. GILLETT. I think he practices it.

Mr. MANN. Will the gentleman from Massachusetts yield for a question?

Mr. GILLETT. My time has expired.

Mr. BINGHAM. Mr. Speaker, in order to draw the discussion during the hour to the amendment under consideration, I desire that the House should know exactly what the proposition is. "Compensation to the President of the United States, $100,000. This sum to include the transportation expenses now otherwise provided for, and after the 3d of March, 1909, the compensation of the President of the United States shall be $100,000 per annum."

Now, I desire the House to know the antecedents of the gentleman elected as President of the United States after the 4th of March next, who will be the President-elect and entitled to the compensation of $100,000.

William Howard Taft, of Cincinnati, Ohio, Secretary of War (1603 K street), was born in Cincinnati, Hamilton County, Ohio, September 15, 1857; was graduated in 1874 from Woodward High School; graduated from Yale University in 1878; graduated in law from Cincinnati College in 1880, in which year he was admitted to bar of supreme court of Ohio; appointed assistant prosecuting attorney in 1881; resigned in 1882 to become collector of internal revenue, first district, Ohio, under President Arthur; resigned collectorship in 1883 to enter practice of law; in 1887 was appointed by Governor FORAKER judge of the superior court of Cincinnati; resigned in 1890 to become Solicitor-General of the United States under appointment of President Harrison; resigned in 1892 to become United States circuit judge for sixth judicial circuit; in 1896 became professor and dean of law department of University of Cincinnati; resigned in 1900 circuit judgeship and deanship to become, by appointment of President McKinley, president of the United States Philippine Commission; in 1901, by appointment of President McKinley, became first civil governor of the Philippine Islands; was appointed Secretary of War by President Roosevelt February 1, 1904.

I have read this for the simple purpose of showing that during the life of President-elect Taft he has been virtually in the service of the National Government under a fixed limited compensation, with no opportunity to enter into the business contests which would have benefited him in his estate, and he has had no opportunity to enter into the competitions of life which may have resulted in successes that would insure competence and fortune, but on the 4th of March, having honorably held all these limited compensation offices under the National Governmet, we simply ask that $100,000 may be given to him as compensation that he may have it for the four years he is in office, and I hope a qualified competence for the future.

Mr. LIVINGSTON. Will the gentleman from Pennsylvania yield me five minutes?

Mr. BINGHAM. With pleasure.

Mr. LIVINGSTON. I will yield five minutes to the gentleman from Nebraska [Mr. HITCHCOCK].

Mr. HITCHCOCK. Mr. Speaker, this provision in the bill, as the gentleman from Missouri [Mr. CLARK] has well said, is misleading. It purports to give to the President of the United States "compensation" of $100,000, but a hasty perusal of two or three of the big appropriation bills which have gone through this House reveals the fact that the President of the United States receives much more compensation than is provided specifically for him in the shape of salary.

Glancing through these bills I find, for instance, these items which certainly should be included in the general term "Compensation for the President of the United States." This compensation which has been growing year by year has now reached imperial proportions, such as would be excusable if we had a court maintained at national expense. Here are some of the scattered items taken from different bills:

Compensation or salary	$50,000
Ordinary care of the White House	35,000
Extraordinary care of the White House	15,000
Fuel	6,000
Greenhouses	9,000
Traveling expenses	25,000
Stables	35,000
Lighting	1,000
Guards (approximately)	22,000
Secret Service (approximately)	3,500
Contingent expenses	25,000
Clerks and employees	69,900
Total	296,400

In addition to that, each year there are items for repairs, which this year amounted to $15,000 for the repairs and $3,000 for repairs of greenhouses; a total, as far as I have been able to find in the few minutes' hasty search, of $314,000.

Mr. GILLETT. Does the gentleman think that the $69,900 for clerks and employees ought to be included?

Mr. HITCHCOCK. I have embraced within that the cost of maintaining the White House, and it is by no means complete. There is a barber employed there at $1,600, who is on another pay roll, which I understand is in the Navy Department. Then, as we know, it recently developed on the floor of the House that horses have been purchased out of a military fund for the use of the President and the White House. Nobody knows how many thousands of dollars of "compensation" are thus taken from the military fund. Besides this, seven employees of the office of Public Printer are kept at the White House to act as messengers and penmen in addressing social invitations. Then there is the use of the *Mayflower* and of the *Sylph* as Presidential yachts, and nobody knows how many additional things hidden away in other appropriation bills and charged to various departments. In addition to all this it is proposed to increase the nominal salary, the compensation, to $100,000 a year. Mr. Speaker, I think that this House of Representatives owes it to this country as a duty to put its stamp of disapproval promptly upon this effort to create practically regal conditions in the White House, imitating the ceremony, imitating the extravagance, imitating the luxury of the courts of the Old World. I believe that this House at this time, when the Treasury is already confronted with most serious conditions, ought promptly and definitely to put its seal of disapproval upon this attempt to increase many salaries, and, above all, the salary of the President of the United States. [Applause on the Democratic side.]

Mr. BINGHAM. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. COCKRAN].

Mr. COCKRAN. Mr. Speaker, I am one of those who voted a few minutes ago against the proposal to increase the salary of

the Speaker. I think that everything the gentleman from Missouri [Mr. CLARK] has said with reference to the necessity of exercising strict economy in making appropriations was well considered and should receive the most careful attention of the House. And, indeed, I think, Mr. Speaker, we have been very vigilant in resisting increase of all salaries except our own. We are the most highly paid legislative body in the world by at least 300 per cent. We are paid at the rate of over $15,000 a year; that is to say, we get $15,000 for less than a year's actual work.

We enjoy the service of clerks paid by the Government at the rate of $1,500 a year, and if we must consider as part of our compensation the arrangements made for our comfort while discharging our duties, as has been suggested in the case of the President, it is fair to add that we occupy a palace out of which the White House might be stolen without seriously reducing its dimensions. [Laughter.] Now, I am by no means prepared to say our salaries are excessive, but I do say the President's salary is wholly inadequate; and this, I think, has been shown by actual experience. The statement of the gentleman from Nebraska [Mr. HITCHCOCK] that the expenses of maintaining the Executive Mansion should be counted as compensation paid to the President is, in my judgment, utterly erroneous if not wildly extravagant. The compensation which a man receives for any public service is the money that he can employ for his own benefit—with which he can do as he pleases.

The money that is appropriated for specific public expenditures, whether in the White House or out of it, is no more compensation to the President than the amount that is paid for the maintenance of yonder Office Building or of this Chamber can be considered a part of our compensation. The gentleman from Nebraska or some other gentleman has objected that the salary of the President was doubled—made $50,000 instead of $25,000—in the time of President Grant. That is quite true, and equally true that it has not been increased since. Our salaries, which were $5,000 a year at that time, are now $7,500. We have increased our direct compensation 50 per cent. But we have done more for ourselves. We have created the office of secretary to each individual Member.

We have erected a palace inside which a room fully furnished is provided for each of us, where we can ruminate upon our duties and prepare to discharge them under conditions of ease and comfort, if not of positive luxury. And after we have provided all this for ourselves—compensation at the rate of $15,000 a year, an increase, if we include the "trimmings"—if I may use such an expression—in the shape of clerk hire and a restored franking privilege of nearer 80 than 70 per cent—we find gentlemen declaring that it is indefensible to propose an increase of 25 per cent practically in the compensation of the President.

Mr. HITCHCOCK. Mr. Speaker, do I understand the gentleman from New York [Mr. COCKRAN] to say that the luxury of this Office Building is a part of the compensation for Members of Congress, and the luxury of the White House is not a part of the compensation of the President?

Mr. COCKRAN. No, no, Mr. Speaker. I say that neither can properly be considered a part of the compensation paid to Members of Congress or to the President; but I do object most strenuously to charging against the President the expenses of maintaining the public building called the "White House" as part of his salary, and at the same time treating the expenses of maintaining a public building for our own accommodation not as part of our compensation, but as a feature of general appropriations necessary to the support of government. I am not decrying what we have done for ourselves, but I am appealing for treatment equally liberal—or, at least, in some degree commensurate—for the head of the Government. I do not say we have done too much or even enough for ourselves. When we consider the excellence of our own service and the delicacy of our perceptions, it may be that the provision made for our comfort in the Office Building is hardly commensurate with our merits. [Laughter and applause.]

Mr. Speaker, the question whether the rate of compensation proposed by this measure is adequate or inadequate is one of fact. I do not think anyone will question that no President can live on less than the full amount of the salary now paid him if he continues to occupy the dwelling provided for him. Does any gentleman here believe that any President of the United States within the last fifty years has, by the exercise of any reasonable economy, been able to save out of his salary sufficient to provide for his support even on the most modest scale after he left office?

Mr. HITCHCOCK. Why should he?

Mr. COCKRAN. Why should he!

Mr. HITCHCOCK. Yes.

Mr. COCKRAN. Mr. Speaker, I must confess the gentleman from Nebraska astounds me by such a question. He asks why should a man who has been raised by the votes of the American people to a position of responsibility without parallel in the world, and who by accepting it practically disqualifies himself from engaging afterwards in the ordinary occupations of life—why he should receive such compensation as would enable him, by the practice of economy, to make some provision for his own future! Would any man who had rendered to a private corporation services at all comparable in value to those every President of the United States had rendered the people of this country be suffered to face the specter of want or distress in his declining years? Mr. Speaker, I do not believe the American people will allow the business corporations of this land to teach them lessons of prudence and of justice in vain.

The SPEAKER. The time of the gentleman has expired.

Mr. COCKRAN. I ask for five minutes more.

Mr. BINGHAM. I yield the gentleman five minutes more.

Mr. HITCHCOCK. Will the gentleman yield for a question?

Mr. COCKRAN. If the gentleman from Nebraska will refrain from interrupting now, I will answer any question he may wish to put before I sit down.

No President has withdrawn from the White House during this generation, as far as I know, with sufficient funds saved during his term of office to suffice for his support afterwards. Now, we all know that a man who has been chosen to that high place is practically disqualified after he leaves it from most pursuits in which a livelihood can be gained.

Mr. HITCHCOCK. Right at that point——

Mr. COCKRAN. I must beg the gentleman to let me finish this statement. We have had recently the very painful spectacle of a man who had been President of the United States and who, while he had been often criticised bitterly during his official career for some of his political actions, had never been required to meet or explain the faintest shadow of an imputation on his personal conduct, after his retirement found himself forced to accept employment by some corporations; and his acceptance of that employment, while I have no desire to criticise it, has been the one feature of his life which many of those who treasure his fame have been inclined to regret. And yet what one of us has any right to sit in judgment on him? What he did he may have felt himself forced to do. Had he hesitated to accept the occupation that offered itself he might, for all we know, have felt the hands of his children tugging at his skirts, reminding him that his supreme duty was to furnish them with bread and to provide the education necessary to prepare them for life.

Which one of us, I ask, can criticise that man, who had served his country with eminent fidelity and whom his country had left without provision, because he accepted an employment that offered a fair prospect of affording the essentials of life to himself and his family?

Mr. SABATH. What President was that?

Mr. COCKRAN. The gentleman, I assume, knows perfectly well that I refer to Mr. Grover Cleveland, and his acceptance of a position under the great life insurance companies at a very critical time for the officers managing them.

Mr. SABATH. But that was done for the interest of thousands and thousands of people, was it not?

Mr. COCKRAN. I can not say why he did it. I do say it was the one feature of his whole life which anybody could question or criticise. I myself do not question or criticise it. So far as I am concerned, I believe that he was governed in this, as in all his conduct, by the highest motives.

But I mention this incident in our political history because I consider it little short of a great national shame that this country, with its enormous resources, should have left a man who had served as its President in a position where he may have felt himself compelled to seek his bread under conditions which exposed him to criticism—even though the criticism merely touched matters of appearance—not of absolute morality. Now I will yield for any question.

Mr. HITCHCOCK. Does the gentleman think that the present President of the United States should be disqualified from accepting lucrative literary recompense when he retires from the White House?

Mr. COCKRAN. No, sir. I do not think there should be any limitation whatever placed upon a man who had been President after he leaves the White House. He should be free to do as he pleases, governed only by his own sense of what may be due to the great office he had filled.

But I do say that the President of the United States, if he be not a man of such literary renown that newspapers and other publications all over the country will be clamoring for his services, if he be simply a man who has performed his task accord-

ing to the highest conception of public duty, should not be forced on pain of sinking into distress, to accept employments which might expose him to criticism or reproach; but he should be paid such compensation while in office that he may by the practice of fair economies secure the means of supporting life with decency in his retirement. That is what I contend for. [Applause.]

Mr. HITCHCOCK. Is a life of idleness so much to be desired that when a man has once held high office he shall dedicate the remainder of his days to idleness?

Mr. COCKRAN. Mr. Speaker, no one contends that an ex-President shall be debarred from all occupation and condemned to a life of idleness after his retirement. I contend merely that he shall not be placed in a position where he must be driven by necessity to seek employment and to accept the first that offers itself. But surely, sir, you can not call that a life of idleness when a man, approaching three score years and ten—the period of life when most Presidents left the White House—after having completed four or eight years' service in the highest position on this earth, should shun the strenuous competitions of life. I do not say that he should be disqualified from any employment or that we should prescribe for him any method of existence. I do say that while he is engaged in our service we should afford him such compensation that, by the exercise of reasonable economy, he can choose his own method of life after leaving office. If relieved from the absolute necessity of finding bread, we can trust any man of such qualities that he could succeed in gaining the Presidency to comport himself in retirement with a dignity befitting the magnitude of the trust that has been reposed in him and the high honor with which he has been crowned. [Loud applause.]

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26305) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1910, and for other purposes.

ENROLLED BILLS SIGNED.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolution of the following titles, when the Speaker signed the same:

H. R. 20111. An act to amend an act entitled "An act to establish a Code of Law for the District of Columbia," relative to gambling, bucket shops, and bucketing;

H. R. 18694. An act relating to the use, control, and ownership of lands in the Canal Zone, Isthmus of Panama;

H. R. 15230. An act to amend an act approved February 28, 1901, entitled "An act relating to the Metropolitan police of the District of Columbia;"

H. R. 25155. An act to amend an act approved July 1, 1902, entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes;"

H. R. 26072. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the civil war, and to widows and dependent relatives of such soldiers and sailors; and

H. J. Res. 257. Joint resolution to authorize the Secretary of State to invite the governments of France and Great Britain to participate in the proposed tercentenary celebration of the discovery of Lake Champlain by Samuel de Champlain.

The Speaker announced his signature to enrolled joint resolutions of the following titles:

S. R. 76. Joint resolution relative to homestead designations made and to be made, of members of the Osage tribe of Indians;

S. R. 126. Joint resolution authorizing the Secretary of War to donate six condemned cannon to the city of Cheyenne, Wyo.; and

S. R. 88. Joint resolution to provide for an accounting of certain funds held in trust for the Chippewa Indians, in Minnesota.

SENATE CONCURRENT RESOLUTION REFERRED.

Under clause 2, Rule XXIV, the following concurrent resolution was taken from the Speaker's table and referred to its appropriate committee as indicated below:

Senate concurrent resolution 105.

Resolved by the Senate (the House of Representatives concurring), That there be printed 3,000 additional copies of the Annual Report of the Isthmian Canal Commission for 1908, with accompanying illustrations, 1,000 copies for the use of the Senate and 2,000 copies for the use of the House of Representatives—

to the Committee on Printing.

LEGISLATIVE, EXECUTIVE, AND JUDICIAL APPROPRIATION BILL.

The House resumed the consideration of the bill (H. R. 23464) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes.

Mr. BINGHAM. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Speaker, the distinguished gentleman from New York [Mr. COCKRAN] says that we are the highest-paid legislative body in the world; that we receive $15,000 for less than one year's work. The gentleman may speak for himself as to the length of time that he works during the two years of his service, though even in that he is mistaken, but that statement certainly is not correct as to the other 390 Members of this House. [Applause.] For the work that is performed by the legislative body of which we are Members, I dare say we are not paid higher rates than for similar work performed in any other legislative body. We receive higher pay, and we do more work. [Applause.]

Now, Mr. Speaker, we ought not to be detracted from the real question at issue, and that is not as to the comparative value of the President's services or even as to his salary. It might be thought it would have been well when we increased the salaries of the judges of the courts a few years ago that we should have increased the President's salary. But we are confronted with this situation: A popular President is going out of the White House, and I dare say one of, if not the most, popular Presidents with the people that the country has ever seen. [Applause on the Republican side.] He leaves the White House at a time when the Treasury is almost empty, when the deficit is appalling, when no one yet on the majority side of the House has had the nerve to propose any method by which we may raise revenues equal to the expenditures. And we propose now to increase what? The salary of the incoming Chief Magistrate. I say in his behalf, if you wish to keep him popular with the country, you ought not on the incoming of his term of office handicap him by increasing his salary and leaving the janitors' salaries where they now are. [Applause.] We will have much to meet with during the term of his office and during the incoming term of our own offices in providing for revenues to meet the expenditures and in providing for the expenditures which will be asked from the White House.

Mr. Speaker, it will not go pleasant to the people of the United States, however anxious they may be to give to the Chief Magistrate of the country a sufficient salary for an ample living; it will not go well with the people at a time when the Treasury is empty, to increase the one office which receives the big salary. What would we say to-day in the face of the conditions that surround the great United States Steel Company, and when they talk of reducing the tariff, and they talk of reducing the wages of the wage-earners on that ground, if the directors of that great corporation, in the face of a proposed deficiency in revenue, in the face of suggested reduction in their wages, should offer to increase the salary of their one big-salaried officer? It would sound ridiculous to the people in that case, and it will sound appalling to the people in this case if on this occasion, with an empty Treasury, we double the salary that the President has received so long. [Applause.]

Mr. BINGHAM. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. SULZER].

Mr. SULZER. Mr. Speaker, we are a great people. This is a gigantic Government—one of the wealthiest countries in all the world. [Applause.] In my opinion, the taxpayers of this great Government are in favor of paying their servants decent wages. They are not stingy. They do not believe in the policy of "straining at a gnat and swallowing a camel." What the people want is honest men in public life, who will render efficient service, and they are willing to pay for it. They want men in official life who are true to their best interests, who will do justice to all without fear or favor, and they are willing to pay their officials compensation commensurate with the dignity of the office and the services performed. The people of the country are not mean. They want justice done to high and low, and equality before the law for all. My judgment is that in comparison with salaries paid the executives of other republics, the President of the United States is the poorest paid official in the world. At present he can not live on his salary in a way to reflect credit on the high office, and if he is not a rich man, he must run in debt. This is not right, and no one should expect it.

I do not believe there is an intelligent taxpayer in this country who will find fault with the Congress for voting to pay the President of the United States $25,000 more salary; and that is what this amendment does. The President now gets $50,000

a year and $25,000 for traveling expenses. This amendment proposes to give the President a salary of $100,000 without traveling expenses.

Mr. OLLIE M. JAMES. The $25,000 does not go to the President unless he uses it?

Mr. SULZER. He has used it.

Mr. OLLIE M. JAMES. He has not used it; he has not used more than $9,000.

Mr. SULZER. I understood that practically all the $25,000 appropriated has usually been expended.

Mr. OLLIE M. JAMES. The gentleman is entirely in error.

Mr. SULZER. Well, be that as it may, my opinion on the main proposition is unaltered. I am in favor of this amendment to pay the President of the United States a salary commensurate with the tremendous responsibilities incident to the great office that he holds—the greatest office in the world.

I believe that the people of the country favor paying our President an annual salary of $100,000. I introduced a bill in Congress some time ago fixing the compensation of the President at $100,000 a year, and I received hundreds of letters from people in all parts of the country favoring it, and I did not receive one letter against it. Many leading newspapers of the country editorially advocated it. I believe it is none too much; and I doubt if the President, all things considered, will be able to save very much of it.

Now, sir, I am in favor of paying the officials of the United States Government salaries commensurate with the positions they hold and the work they do, so that they can live respectably and decently. I am in favor, and I believe the people are in favor, of getting the very best ability they can for all these positions; and they are in favor of paying fair and just salaries. For that reason I just voted to increase the salary of the Speaker to $15,000 a year, and I do not think that is too much salary for the Speaker of this House. I shall also vote to increase the salary of the Vice-President, and the salaries of the United States Supreme Court justices, and the judges of the United States circuit and district courts. They are paid entirely too little. We are flying in the face of the best interests of the country in this matter.

The salaries of our judges are ridiculous in comparison with their great ability and the important and responsible work they do. The people all over the country are in favor of paying these judges proper salaries. The federal judges are now paid inadequately for their labor. We cry "economy." I am in favor of economy, but I am opposed to a "penny wise and a pound foolish" economy. I am against parsimony—against the false economy that saves at the spigot while the flood gates of the Treasury are opened wide to all kinds of appropriations, and in many instances, so far as the people are concerned, for matters of little moment and of questionable character. [Applause.]

The SPEAKER. The time of the gentleman from New York has expired.

Mr. SULZER. Mr. Speaker, just a word more. I indulge the hope that the Senate amendment will be adopted and the salary of the President fixed at $100,000 a year.

Mr. BINGHAM. I yield four minutes to the gentleman from Kentucky [Mr. STANLEY].

Mr. STANLEY. Mr. Speaker, to my mind the gravest aspect of this proposal to double the President's salary is not presented by the fact that we have a bankrupt treasury, grave as that is. It should not be a party question; for in a broader and better sense "We are all Democrats, we are all Republicans."

The leader of the minority has justly directed our attention to the comparisons drawn by periodicals and magazines, and by gentlemen on this floor, between the alleged compensation of the President and the rich emoluments of kings and princes. As if it followed that an injustice was done the President of the United States if we failed to maintain him and his in all the luxury of the wearer of a crown. Admitting, Mr. Speaker, for the sake of argument, that he does receive less than the monarchs of Europe, it is as it should be.

The difference between the life of a citizen President in the White House and the state of a king is vital, absolute, fundamental. It springs from the inherent and eternal variance between the genius of a republic and a monarchy.

The monarchs of Europe are encumbered by vast estates and palaces, the heavy inheritance of centuries of feudal tyranny.

Edward VII must maintain his establishments in England, Ireland, and Scotland—Sandringham, Windsor, and Buckingham. It is so all over the Continent. The object of greatest interest to the traveler, and often the source of pride to the misguided subject, is "the palace of the King."

Pomp and display are essential to the life and maintenance of a monarch. They weaken and corrupt a republic. It is necessary that a king should outshine the satellites who surround his throne and reflect his splendor.

The feathers that adorn the royal bird support him in his flight; strip him of his plumage and you fix him to the earth.

A monarchical government—

Says Montesquieu—

supposes preeminence and ranks as likewise a noble descent. * * * The state subsists independently of the love of our country, of the thirst of true glory, of self-denial, of the sacrifice of our dearest interests, and of all those heroic virtues which we admire in the ancients, and to us are known only by story.

The mainstay of monarchy is its power to excite and satisfy a lordly pride in the subject. Stars, garters, titles, and diadems are the secret of its power and the evidence of its glory.

The source and strength of a republic is virtue.

Virtue—

Says Montesquieu—

is therefore necessary in this body from the very nature of the constitution.

Our Presidents are simply the most eminent and trusted servants of the people, and history delights to record that among the rulers of the world they have been marked, not by the cost and tinsel of their equipages, but by the nobility of their character and the excellence of their administration.

It is to the eternal honor of our Presidents that, clothed with plenary powers denied every constitutional monarch of Europe, they have exercised this authority while living the simple life of a citizen, his children attending the common schools, neither seeking or receiving crowns or coronets, those baubles so dear to the vulgar rich; his home a modest mansion, almost devoid of equipage or luxury, pretension or display. These Presidents have surrendered their mighty commissions without effort or regret, returning to the people and resuming without loss of dignity the duties of a citizen.

The gentleman from New York [Mr. COCKRAN] has spoken of the "palace" in which we discharge our duties. It is true. No country in the world has such a Capitol as the one over which now floats the Stars and Stripes, and I thank God for it. [Loud applause.] I rejoice that no capital city on earth is adorned by edifices so magnificent. These buildings are not the private residences of a ruler, but the abode of a nation infinite in wealth and resource, and in their immensity, costliness, and beauty they commemorate the power of the Government and the glory of the country. [Loud applause.]

Mr. BINGHAM. Mr. Speaker, I yield four minutes to the gentleman from Alabama [Mr. HOBSON].

Mr. HOBSON. Mr. Speaker, the President of the United States is the Commander in Chief of the Army and the Navy of the United States. Officers and enlisted men of the army and navy of the United States and of all other countries are granted the privilege of retirement when they have honorably filled a faithful term of office. I believe that the compensation of the President of the United States was originally placed at a figure that would provide for such a purpose. After a service has been rendered in these two branches of the Government, an officer or enlisted man is not supposed to be compelled to engage in a competitive employment for a livelihood. Now, it has been shown, not only in connection with the President just leaving the office, but in connection with practically all of our Presidents who have received the present compensation, that substantially the whole amount has become necessary for the legitimate expenses of the service. Thus when they finish their faithful and honorable service they have no provision for retirement and are cut off from privileges enjoyed by other officers.

I estimate that three-quarters of active pay, which is the rate of retired pay allowed the officers of the army and navy, amounting in this case to $37,500 a year, taken for the length of time corresponding to the expectation of life of the average ex-President, would amount to between $350,000 and $400,000, which is approximately the aggregate increase of salary carried by this amendment in a presidential term. This would be just about the equivalent, therefore, of giving the Commander in Chief the benefit of retirement which we give to all other officers who have served faithfully in the army and the navy of the United States. The question of the maintenance of the establishment at the White House and the question of a deficit in the Treasury have nothing material to do with the question before us. It is simply whether we are to make it possible for a President, during his term of office, to provide for his future support. I do not believe that the American people wish to see their ex-Presidents driven to enter into competitive pursuits to keep the wolf from the door, and I do not believe, for any fictitious economy, we ought to require this of them. While we have an annual budget of a billion dollars, one-hundredth

part of 1 per cent is not excessive to pay the highest officer of the Government. I believe that with national assets of $120,000,000,000 the sum of $100,000 is far below the absolute minimum that could be expected on any business basis to be paid to the chief officer presiding over such a country.

Mr. BINGHAM. Mr. Speaker, I yield four minutes to the gentleman from Missouri [Mr. CLARK].

Mr. CLARK of Missouri. Mr. Speaker, I listened with a great deal of pleasure to our distinguished friend from New York [Mr. COCKRAN], as I always do. He has the finest command of the English language of any man that I have run up against in fifty-eight years of tabernacling in the flesh, but I want to say that the intimation in his speech that we all voted to raise our own salaries is incorrect.

Mr. COCKRAN. I did not mean to say that. I meant that the Congress voted for it.

Mr. CLARK of Missouri. I say, in the language of Shakespeare:

Shake not thy gory locks at me; thou canst not say I did it.

I always voted against raising the salaries of Representatives and Senators, and I always voted against raising the salaries of Members' clerks. I said then that it was an evil example that would return to plague us, and the truth of that is abundantly demonstrated here to-day.

If they are determined to give the President of the United States this increase of $50,000 a year, thereby making his salary $100,000, I say the law ought to be amended so that $50,000 a year of that money shall remain in the Treasury until his term expires, and pay it to him then [applause], because the history of the past shows that almost every man who has occupied the White House—no difference whether he was getting $25,000 or $50,000 or $75,000, as the President is really getting now—spent every dollar while he was there; and if we gave him $150,000 a year, he would spend that. By so retaining one-half his salary he would be saved from the effects of his own improvidence and have enough to live on comfortably all his remaining days.

I agree with some of these gentlemen in one of their statements. It is pitiful to see an ex-President of the United States come to want. It is pitiful to see anybody come to want. Presidents of the United States ought to do like the rest of mankind—save part of their salaries and make provision for that old age which comes to most people. [Applause.] I repeat that there is not a man living who can justify these raises of salary in the condition that the Treasury and the country are in now.

Read the market reports of yesterday and see what is happening. Stocks going off everywhere, which is a premonitory symptom of coming panic. I hate to say that, but I believe it. Now, I want to say another word. The Speaker of this House deserves $15,000 a year just as much as does the Vice-President. More so. The Speaker does more work, and then he is not a mere figurehead. [Applause.] On the contrary, he comes very near being the whole show. [Great laughter.] We refused a few minutes ago to increase the Speaker's salary and surely we shall refuse to increase the Vice-President's salary. Otherwise we confess the superiority of the Senate.

I want to give it as my opinion that the $15,000 to the Speaker, a raise of $3,000 a year, was put in as a sop to Cerberus, as a kind of oil to grease the skids to let in these senatorial increases for the President, Vice-President, and the judiciary, and the whole crowd. [Laughter]. I do not believe there is a man in the House that can justify this increase to his constituents at home. [Applause.]

Mr. BINGHAM. Mr. Speaker, I demand the previous question.

The question was taken, and the previous question was ordered.

The SPEAKER. The question now is on the motion of the gentleman from Pennsylvania to recede from the disagreement with the Senate and concur in the amendment.

The question was taken, and on a division (demanded by Mr. GILLETT) there were 145 ayes and 154 noes.

Mr. WATSON. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 141, nays 168, answered "present" 3, not voting 74, as follows:

YEAS—141.

Fairchild	Jackson	Patterson	Young
Fassett	James, Addison D.	Pearre	
Favrot	Jones, Va.	Pratt	

So the motion was rejected.

The Clerk announced the following additional pairs:

For the session:

Mr. WANGER with Mr. ADAMSON.

Mr. CURRIER with Mr. FINLEY.

Until further notice:

Mr. PEARRE with Mr. MCDERMOTT.

Mr. CASSEL with Mr. GORDON.

Mr. COUSINS with Mr. BARTLETT of Nevada.

Mr. OLMSTED with Mr. BRANTLEY.

Mr. FAIRCHILD with Mr. RHINOCK.

Mr. LANING with Mr. ASHBROOK.

Mr. FORDNEY with Mr. RICHARDSON.

Mr. LOWDEN with Mr. CARLIN.
Mr. MARSHALL with Mr. FAVROT.
Mr. MONDELL with Mr. HACKETT.
Mr. MOUSER with Mr. HAMILL.
Mr. SHERMAN with Mr. LAMB.
Mr. STERLING with Mr. HARDY.
Mr. STURGISS with Mr. HUGHES of New Jersey.
Mr. THISTLEWOOD with Mr. REID.
Mr. VREELAND with Mr. SPARKMAN.
Mr. YOUNG with Mr. WILLETT.

Mr. RICHARDSON. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman present and giving attention when his name was called or should have been called?

Mr. RICHARDSON. I came in from the Office Building, hurrying as much as I could.

The SPEAKER. But was not present when his name was called?

Mr. RICHARDSON. I did not hear my name called.

The SPEAKER. Was the gentleman giving attention when his name should have been called?

Mr. RICHARDSON. Well, I was trying to get here, Mr. Speaker.

The SPEAKER. The gentleman does not bring himself within the rule.

The result of the vote was announced as above recorded.

Mr. CLARK of Missouri. Mr. Speaker, I move to reconsider and to lay that motion on the table.

Mr. WATSON. Mr. Speaker, I now move to recede and to concur, with an amendment.

Mr. MANN. Mr. Speaker, a parliamentary inquiry.

Mr. WATSON. The gentleman can not take me off my feet.

Mr. MANN. Yes; I can with a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. MANN. The gentleman from Pennsylvania [Mr. BINGHAM] in charge of the bill, having been defeated on this motion, is not the opposition now entitled to recognition under the practice of the House?

The SPEAKER. First, the gentleman from Missouri moves to reconsider and to lay that motion on the table. Did the gentleman vote in the affirmative?

Mr. CLARK of Missouri. No.

Mr. SHERLEY. That is not necessary.

The SPEAKER. The Chair will hear the motion of the gentleman from Indiana.

Mr. CLARK of Missouri. Mr. Speaker, a parliamentary inquiry. I voted with the majority, and have I not the right to make the usual motion to reconsider and to lay that motion on the table?

The SPEAKER. The gentleman is correct. The Chair misapprehended the situation for a moment.

Mr. CLARK of Missouri. Then, I move to reconsider and to lay that motion on the table. First, however, I move to instruct the conferees——

The SPEAKER. But the gentleman is not at this time recognized for that motion to instruct.

Mr. WATSON. Mr. Speaker, I move to recede and concur with an amendment striking out "one hundred" and inserting "seventy-five," and on that I demand the previous question.

Mr. MANN. Mr. Speaker, I submit that the gentleman is not entitled to recognition for that purpose, and that some gentleman in opposition to the amendment of the Senate, and a member of the majority on the last vote, is entitled to recognition to make a motion to further insist on the disagreement.

The SPEAKER. This is a case of preferential motions, and it is the rank of the motion rather than the rank of the Member that decides.

Mr. CLARK of Missouri. I move that the House conferees be instructed——

The SPEAKER. But we have not got to the point of instruction as yet. The Chair will hear the motion of the gentleman from Missouri.

Mr. CLARK of Missouri. I move that the House further insist on its disagreement to this amendment.

The SPEAKER. The gentleman desires to move that the House do further insist on its disagreement to the Senate amendment.

Mr. CLARK of Missouri. On this amendment.

Mr. WATSON. Mr. Speaker, I make the point——

The SPEAKER. The motion will be entered; but the motion of the gentleman from Indiana [Mr. WATSON], in the opinion of the Chair, takes precedence of that motion. The motion of the gentleman from Indiana is to recede from its disagreement with the Senate and to concur with an amendment, namely, to fix the salary at $75,000. In the opinion of the Chair, that motion takes precedence of the motion of the gentleman from Missouri.

Mr. WATSON. On that I demand the previous question.

The SPEAKER. On that the gentleman demands the previous question.

Mr. MANN. But the gentleman is not entitled to the floor to demand the previous question.

Mr. WATSON. I demanded the previous question in my original motion.

The SPEAKER. The motion determines who shall be recognized, and this motion takes precedence.

Mr. FITZGERALD. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. FITZGERALD. While the motion takes precedence, the control of the floor passes to those who were in the majority on the last vote, and the gentleman from Missouri [Mr. CLARK] is entitled to the control of the floor.

Mr. CLARK of Missouri. Oh, Mr. Speaker, I have no objection to the vote being taken.

The SPEAKER. Very well. The question is on ordering the previous question on the motion of the gentleman from Indiana.

The question was taken, and the previous question was ordered.

The SPEAKER. The question now is on the amendment of the gentleman from Indiana that the House recede from its disagreement to the Senate amendment and agree to the same with an amendment, which the Clerk, without objection, will again report.

The Clerk read as follows:

Strike out "one hundred" and insert "seventy-five."

Mr. CLARK of Missouri. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 164, nays 149, answered "present" 2, not voting 71, as follows:

YEAS—164.

Alexander, N. Y.	Dwight	Humphrey, Wash.	Parker

ANSWERED "PRESENT"—2.

Finley	Sherman

NOT VOTING—71.

Ansberry	De Armond	Hughes, N. J.	Patterson
Ashbrook	Fairchild	Jackson	Pratt
Bartlett, Nev.	Fassett	James, Addison D.	Reid
Birdsall	Favrot	Jones, Va.	Reynolds
Bowers	Flood	Kahn	Roberts
Brantley	Foelker	Kennedy, Ohio	Scott
Brundidge	Fordney	Lamar, Mo.	Snapp
Burleson	Fowler	Laning	Sparkman
Caldwell	Gardner, Mich.	Leake	Spight
Carlin	Gardner, N. J.	Legare	Taylor, Ala.
Cary	Glass	Lorimer	Thistlewood
Cassel	Godwin	Lowden	Weems
Clark, Fla.	Goldfogle	McDermott	Weisse
Cooper, Tex.	Hackett	McGavin	Wiley
Cravens	Hayes	Madden	Willett
Currier	Hill, Miss.	Marshall	Wolf
Davidson	Howard	Mouser	Young
Dawes	Howell, N. J.	Olmsted	

So the motion was agreed to.

The Clerk announced the following additional pairs:

Until further notice:

Mr. HAYES with Mr. COOPER of Texas.

Mr. SNAPP with Mr. WILEY.

Mr. SCOTT with Mr. SPIGHT.

Mr. MADDEN with Mr. HOWARD.

Mr. KENNEDY of Ohio with Mr. CRAVENS.

Mr. KAHN with Mr. BURLESON.

Mr. HOWELL of New Jersey with Mr. BRUNDIDGE.

Mr. GARDNER of New Jersey with Mr. GLASS.

Mr. GARDNER of Michigan with Mr. BARTLETT of Nevada.

Mr. FAIRCHILD. Mr. Speaker, I would like to vote "aye."

The SPEAKER. Was the gentleman present and giving attention when his name was called?

Mr. FAIRCHILD. I was not; I was out.

The SPEAKER. Then the gentleman does not bring himself within the rule.

The SPEAKER directed that his name be called; and when it was called, he answered "aye."

The result of the vote was announced as above recorded.

[Applause.]

Mr. BINGHAM. Mr. Speaker, I now move consideration of amendment numbered 61, and on that I yield to the gentleman from Indiana [Mr. WATSON] for an amendment.

The SPEAKER. The Clerk will report an amendment numbered 61.

The Clerk read as follows:

Amendment 61, page 37, line 14, after "dollars," insert:
"This sum to include all transportation expenses now otherwise provided for by law, and after the 3d of March, 1909, the compensation of the President of the United States shall be $100,000 per annum."

Mr. WATSON. Mr. Speaker——

The SPEAKER. The gentleman from Pennsylvania yields to the gentleman from Indiana for an amendment?

Mr. WATSON. Yes; for an amendment. I move that the House recede from its disagreement to Senate amendment numbered 61 and concur in that amendment with an amendment striking out $100,000 and inserting $75,000, and on that I move the previous question.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Strike out "one hundred" and insert "seventy-five."

Mr. MILLER. Mr. Speaker——

Mr. WATSON. Mr. Speaker, I am informed by the gentleman from Pennsylvania that there was an understanding that the previous question was not to be ordered, and with that understanding, therefore, from the gentleman from Pennsylvania, I desire to withdraw that portion of my motion in which I demanded the previous question.

The SPEAKER. The Chair will state the motion. The gentleman from Indiana moves that the House do recede from its disagreement to Senate amendment numbered 61 and agree to the same with an amendment to strike out the words "one hundred" and insert the word "seventy-five;" and the gentleman from Pennsylvania has the floor.

Mr. UNDERWOOD. Mr. Speaker, I would like to ask the gentleman from Indiana a question in reference to his proposition, so I may understand it. I want to understand whether, if the proposition of the gentleman from Indiana is adopted, it fixes the salary of the President at $75,000 and does away entirely with traveling expenses.

Mr. WATSON. That is my understanding of the effect of this proposition.

Mr. MANN. Well, that would not be the effect of the proposition.

Mr. WATSON. I am not answering according to the understanding of the gentleman from Illinois, but from the understanding of "the gentleman from Indiana," who was answering the question.

The SPEAKER. Without objection, the Clerk will again report the amendment as it is proposed by the gentleman in the motion that he has made. [After a pause.] The Chair hears no objection.

The Clerk read as follows:

Page 37, line 14, after the word "dollars," insert:
"This sum to include all transportation expenses now otherwise provided for by law, and after the 3d of March, 1909, the compensation of the President of the United States shall be $75,000 per annum."

Mr. MANN. Now, will the gentleman from Pennsylvania [Mr. BINGHAM] yield for a question?

Mr. BINGHAM. Certainly.

Mr. MANN. Was it the intention, as the gentleman from Pennsylvania understands, to limit the compensation and traveling expenses of the President hereafter to $75,000?

Mr. BINGHAM. I was not acquainted with the detail of the proposition of the gentleman's amendment. It is for him to state, and he can state it.

Mr. MANN. The only amendment the gentleman from Indiana [Mr. WATSON] offers is to reduce the amount from $100,000 to $75,000.

Mr. GILLETT. I will state to the gentleman that that was the understanding in the conference.

Mr. MANN. Then I call the attention of the gentleman to the fact that, so far as the transportation expenses are concerned, this amendment only relates to the ensuing fiscal year, and leaves the law providing for $25,000 a year for traveling expenses after the first of the next fiscal year still a law, and, with the President's salary at $75,000, makes a total of $100,000. And I ask the gentlemen whether they will be willing to accept an amendment providing, at the end of the amendment, "this amount shall cover all transportation expenses now otherwise provided for by law," so that $75,000 will hereafter cover both the salary and traveling expenses?

Mr. GILLETT. I think that ought to be done, I will say, Mr. Speaker. I think it ought to be done in order to carry out the purpose of the gentleman from Indiana [Mr. WATSON]. I will say personally, however, that I am in favor of allowing this $25,000 in addition to the $75,000.

Mr. MANN. I understand; but I am only getting at the purpose of the amendment of the gentleman from Indiana. He offered no amendment except to change the amount in the Senate amendment from $100,000 to $75,000. Now the chairman of the committee brings in the Senate amendment.

Mr. BINGHAM. The House has voted down the Senate amendment.

Mr. MANN. The House has not voted on the Senate amendment.

Mr. WATSON. My advice to the gentleman would be that the amendment be accepted.

Mr. MANN. Will the gentleman yield to me to offer an amendment to the amendment of the gentleman from Indiana [Mr. WATSON]?

Mr. BINGHAM. The House is in control now, in view of the amendment of the gentleman from Indiana [Mr. WATSON].

Mr. WATSON. The gentleman simply yielded to me to make the motion.

Mr. BINGHAM. I will yield to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Then, Mr. Speaker, I move to amend the motion of the gentleman from Indiana by inserting at the end of the Senate amendment this language:

Which amount shall cover all transportation expenses now otherwise provided for by law.

The SPEAKER. Without objection, the Clerk will again read the amendment numbered 60, as has been passed upon by the House, and in connection with amendment numbered 60, amendment numbered 61 as it is proposed to be amended by the gentleman from Indiana [Mr. WATSON]. [After a pause.] The Chair hears no objection.

The Clerk read as follows:

Amendment numbered 60. Page 37, line 14, strike out "fifty" and insert "one hundred."

Amendment numbered 61. Page 37, line 14, after "dollars" insert: "This sum to include all transportation expenses now otherwise provided for by law, and after the 3d of March, 1909, the compensation of the President of the United States shall be $75,000 per annum."

Mr. MANN. Now, I call the attention of the Speaker, who evidently had not caught the point I made, that the limitation upon the transportation expenses only applies to the next fiscal year, while the change of the law fixing the salary of the President says nothing about transportation expenses. Therefore I wish to offer an amendment making it perfectly clear that hereafter the President gets $75,000 a year for salary, including his transportation expenses.

The SPEAKER. The Chair will suggest to the gentleman that if he will put the word "hereafter" in the amendment after the word "to," in line 14, making it read "this sum to hereafter include"——

Mr. MANN. Yes; but that is only an appropriation for the next fiscal year, "for compensation of the President of the United States, $75,000." That is an appropriation for the ensuing fiscal year. There is no change of law about that. It says:

This sum to include all transportation expenses.

The SPEAKER. What is the gentleman's amendment?

Mr. MANN. Following the end of the other amendment, "which amount shall cover all transportation expenses now otherwise provided for by law."

The SPEAKER. To come in on line 3.

Mr. MANN. So that it will read that "after the 3d of March, 1909, the compensation of the President of the United States shall be $75,000 per annum, which amount shall cover all transportation expenses now otherwise provided for by law."

The SPEAKER. The gentleman modifies the amendment with an amendment which the Clerk will report.

The Clerk read as follows:

Insert at the end of the Senate amendment 61:
"which amount shall cover all transportation expenses now otherwise provided for by law."

The SPEAKER. With the consent of the House, the gentleman from Indiana modifies his amendment as read by the Clerk.

Mr. COCKRAN. I object. I would like to have a separate vote on this proposition.

The SPEAKER. The gentleman from Indiana can withdraw his amendment and offer it in any form he desires.

Mr. WATSON. "The gentleman from Indiana" is entirely satisfied with the existing status. So far as I have any influence, I have advised the chairman of the committee that has this bill in charge to accept this amendment, but the gentleman from New York has seen fit to interpose an objection to this matter for unanimous consent on another question.

Mr. MANN. The gentleman from Pennsylvania yielded the floor to me to offer the amendment as an amendment.

The SPEAKER. But the amendment is pending as an amendment to the motion.

Mr. WATSON. Mr. Speaker, if I can be recognized for that purpose, I will move to withdraw the amendment and reoffer it in another form.

The SPEAKER. The gentleman does not have to move to do so. Up to this time he has the absolute right to do so.

Mr. WATSON. Then, within the limits I do so.

The SPEAKER. Does the gentleman now make the motion?

Mr. WATSON. I do now make the motion.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Recede from the disagreement to Senate amendment No. 61, and agree to the same with an amendment, or so that it will read as follows:

"Page 37, line 14, after 'dollars,' insert: 'this sum to include all transportation expenses now otherwise provided for by law, and after the 3d of March, 1909, the compensation of the President of the United States shall be $75,000, which amount shall cover all transportation expenses now otherwise provided for by law.'"

The SPEAKER. The question is on the adoption of the motion.

The question was taken, and the motion was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment 62, page 37, line 16, strike out "twelve" and insert "fifteen."

Mr. BINGHAM. I ask for a vote on amendments 62 and 63. I move that the House recede from its disagreement to Senate amendments and accede to the same; and I ask for a vote.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Recede from disagreement to the Senate amendment 62 and agree to the same.

Mr. GILLETT. Why, Mr. Speaker, I think the House does not understand that. The gentleman has made a motion to recede, in accord with the motion he has made on all the other amendments; but inasmuch as the House has already voted against raising the salary of the Speaker, I do not suppose there is any intention on the part of the House to raise the salary of the Vice-President; so it is the purpose of the House to insist on disagreement.

Mr. MANN. The vote ought to be taken on amendments 62 and 63 together.

Mr. BINGHAM. The House gave unanimous consent for a vote on these propositions. I am simply doing as I announced before, that I would make one consistent motion; and that is the reason I am making the motion to recede and concur.

The SPEAKER. The gentleman from Pennsylvania moves that the House do recede from its disagreement to the Senate amendments and concur in the Senate amendment.

Mr. MANN. I suggest to the gentleman, Mr. Speaker, that he make that motion on amendments 62 and 63, because they are alike.

The SPEAKER. If there be no objection, the gentleman's motion will cover both.

Mr. SHERLEY. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. SHERLEY. If the motion to recede and concur is voted down, will it then be in order to move to recede and agree with an amendment?

The SPEAKER. It seems to the Chair it would be in order to recede from the disagreement with the Senate.

Mr. SHERLEY. But the motion of the gentleman from Pennsylvania is to recede and concur. If that be voted down, would it not be in order to concur with an amendment?

The SPEAKER. Substantially so, although phrased a little differently.

Mr. SHERLEY. If a division is demanded on the motion to recede and concur, and the motion to recede is voted down, then the next step in order would be for the House to further insist on its disagreement. I want to prevent this continuous reconsideration.

The SPEAKER. Precisely; and when the question is presented the Chair will rule upon it.

Mr. SHERLEY. I demand a division of the question.

The SPEAKER. The question is on receding from the disagreement of the House to Senate amendment 62.

Mr. PAYNE. Mr. Speaker, I want to suggest that amendments 62 and 63 be read. If gentlemen are given an opportunity to see that they are virtually the same amendment, there will probably be no occasion for a division.

Mr. SHERLEY. That is the gentleman's opinion; but this House had a vote on a proposition, and immediately after that the gentleman from Indiana [Mr. WATSON] forced us to another vote.

Mr. MANN. It is simply a misunderstanding as to what the division is upon, that is all.

The SPEAKER. The Clerk will report the motion of the gentleman from Pennsylvania.

The Clerk read as follows:

Recede from the House disagreement to Senate amendments numbered 62 and 63 and agree to the same.

Mr. HENRY of Texas. May we not have the amendments read?

The SPEAKER. Yes; if there be no objection, the Clerk will read the amendments again.

The Clerk read as follows:

Amendment 62: Page 37, line 16, strike out "twelve" and insert "fifteen."

Amendment 63: Page 37, line 16, after "dollars," insert "to take effect on March 4, 1909."

The SPEAKER. So that it will read——

The Clerk read as follows:

So that it will read: "For compensation of the Vice-President of the United States, $15,000, to take effect March 4, 1909."

Mr. SHERLEY. Now, I have demanded a division on the motion.

The SPEAKER. The vote, then, will be taken upon amendment 62.

Mr. SHERLEY. Oh, no, Mr. Speaker. That is not my request.

The SPEAKER. The Chair understands the gentleman. The question will be taken upon receding from the disagreement of the House to the Senate amendments.

The question being taken, on a division (demanded by Mr. GAINES of West Virginia) there were—ayes 143, noes 187.

Accordingly the House refused to recede from its disagreement.

Mr. GILLETT. I move that the House insist on its disagreement to the amendments of the Senate—to both amendments.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment 64: Page 40, line 19, after "dollars," where it occurs the first time, insert:
"Undersecretary of State, to be appointed by the President, by and with the advice and consent of the Senate, who shall perform such duties as the Secretary of State may designate and as may be provided by law, $10,000."

Mr. BINGHAM. Mr. Speaker, I move that the House recede from its disagreement to Senate amendment No. 64 and agree to the same amended as follows: Strike out the word "under," in the first line, and insert in lieu thereof the word "vice;" and strike out "$10,000" and insert in lieu thereof "$7,500."

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Recede from the House disagreement to amendment No. 64 and agree to the same with an amendment striking out the word "under" and inserting in lieu thereof the word "vice;" also striking out the words "ten thousand dollars" and inserting in lieu thereof the words "seven thousand five hundred dollars."

So that the amendment will read:

Page 40, line 19, after "dollars," where it occurs the first time, insert: "Vice-Secretary of State, to be appointed by the President, by and with the advice and consent of the Senate, who shall perform such duties as the Secretary of State may designate, and as may be provided by law, $7,500."

Mr. BINGHAM. Mr. Speaker, I yield five minutes to the gentleman from Massachusetts [Mr. GILLETT].

Mr. COCKRAN. Will the gentleman give way long enough to explain to the House the reason for this suggestion of vice, so to speak, and precisely why the Department of State should be equipped with these assistants beyond what any other department of the Government is likely to enjoy?

Mr. GILLETT. Mr. Speaker, this "vicious" amendment that is referred to——

Mr. COCKRAN. I said "a suggestion of vice."

Mr. GILLETT. "Vicious" is a synonym for that. That word was put in for this reason: The other day the House instructed the conferees to insist upon their disagreement. The conferees have done so, but now this proposition which the gentleman from Pennsylvania has submitted is made, as it is hoped, to meet the desires of the House.

Personally I will say that I do not like the change of the word "under" to "vice." Personally I should prefer the word "under," which is used in diplomatic circles. This is not a local matter; this is a diplomatic matter. It is language which is not confined to our country. It is language which authorizes the appointment of an officer who deals with ministers from other countries, and therefore, above all others, it seems to me appropriate that we should use a term understood in diplomatic circles and in the world outside, and therefore I should prefer the word "under."

But it was understood that there were objections by some Members of the House, and inasmuch as what we aim at is results, and nomenclature is of no great importance, the change was made from the word "under" to the word "vice." The word is of slight importance. The important question is the establishment of this new officer.

Mr. COCKRAN. That is it. How did we get along all these years without him?

Mr. GILLETT. He is required from the excessive work now burdening the Secretary of State. That is what has been told us.

Mr. PERKINS. Will the gentleman yield for a question?

Mr. GILLETT. Certainly.

Mr. PERKINS. Is it not conceded by the gentleman from Massachusetts that the affairs of the Secretary of State, during the past twelve years, have been conducted with unexampled efficiency, and sufficiency without the existence of these five additional officers which the gentleman now asks us to authorize?

Mr. GILLETT. The gentleman from New York is mistaken in saying that we ask for five new officers. I agree, as the gentleman says, that in recent years the Department of State has been conducted with unexampled strength and wisdom, and we can be very proud of it, but the gentleman who has recently been Secretary of State, and who I think ranks as one of the great Secretaries of our history, is the man who first made this suggestion, I am told, that there should be an office with high enough salary to procure a man of high attainments to take from him a part of the important work of the department and meet the foreign representatives, so that it will leave him more opportunity for the intellectual——

Mr. MANN. And dinner giving.

Mr. GILLETT. That is absurd.

Mr. MANN. Will the gentleman yield for a question?

Mr. GILLETT. Certainly.

Mr. MANN. Will the gentleman inform us whether Secretary Root in his annual report recommended this office or in the estimates submitted to the Treasury Department the office was recommended or in any communication to the House Committee on Foreign Affairs he recommended the office or in any communication to anyone in the House he has recommended the office?

Mr. GILLETT. I do not know that he did.

Mr. PERKINS. Will the gentleman yield for another question?

Mr. GILLETT. I will.

Mr. PERKINS. I would like to ask the gentleman whether it is not his opinion that the great familiarity that Secretary Root has with all the questions of detail in his office to which he was obliged to attend himself was one of the reasons for his extraordinary success when he had to deal with the great questions of his office?

Mr. GILLETT. That is a matter of detail of which I have no knowledge.

Mr. PERKINS. Will the gentleman from Massachusetts yield for still another question?

Mr. GILLETT. I will.

Mr. PERKINS. Does it not seem that when the temper of the House is opposed to the increases of salary for which there is much to be said, it is somewhat inopportune to reach the same result to a larger extent by creating four or five additional officers to do the work which has been done more satisfactorily by the Secretary of State for twelve long years?

Mr. GILLETT. I will ask the gentleman what he means by "four or five additional officers?"

Mr. PERKINS. The under-secretary, or vice-secretary, is an entirely new office.

Mr. GILLETT. Certainly.

Mr. PERKINS. And the fourth assistant secretary is entirely new, and private secretary, I think, is entirely new.

Mr. GILLETT. Mr. Speaker, there are three new offices.

Mr. PERKINS. I do not care anything about the messenger and clerk. I do not know whether they are new or not.

Mr. GILLETT. Practically there are only two new offices of any account. The office of vice-secretary and the fourth assistant secretary. Now we are discussing simply the vice-secretary, and in answer to the gentleman, I will express the reasons which were given to us in the conference for appointing this official.

Mr. WILLIAMS. Has not this vice-secretary a secretary?

Mr. GILLETT. Certainly.

Mr. WILLIAMS. Has not this assistaant secretary a secretary?

Mr. GILLETT. No; I think not.

Mr. WILLIAMS. Are there not smaller fleas to feed upon the larger fleas?

Mr. GILLETT. Mr. Speaker, the reason stated was this: There is no question that in the last ten years our country has grown in its diplomatic relations with the rest of the world beyond all precedent. Not only have our commerce and our exports developed, but the war with Spain and the acquisition of the Philippines have brought us into closer connection with the whole world, particularly the East, and therefore made us a nation with diplomatic questions such as we never had before. We were told that the Secretary of State during this time has been very much overworked; and that it was wise and fair, inasmuch as there had been no increase in the higher offices of this department for over thirty years, that there should be somebody who would relieve him of a portion of his burdens and allow him to spend more time than had ever been accorded before in considering these great diplomatic questions.

Mr. OLLIE M. JAMES. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman yield?

Mr. GILLETT. Yes.

Mr. OLLIE M. JAMES. In view of the heavy strain upon the present Secretary of State in performing the very heavy duties which the gentleman has described, I would ask him if he believes he will be able to represent the State of New York in the Senate hereafter?

Mr. GILLETT. Oh, I do not think the time of the House ought to be taken up by such interruptions.

Mr. COCKRAN. Will the gentleman yield?

The SPEAKER. Does the gentleman from Massachusetts yield to the gentleman from New York?

Mr. GILLETT. Certainly.

Mr. COCKRAN. I would like to ask the gentleman a question, and that is whether the business of the State Department now is any more important or any more extensive than it was during the critical period of the civil war——

Mr. GILLETT. Probably not.

Mr. COCKRAN (continuing). When, I believe, there was neither a vice nor an undersecretary of state nor a fourth assistant Secretary of State.

Mr. GILLETT. The consular and diplomatic service and interests are very much more world-wide than they were at that time. Of course, immediately at the crises of the civil war the relations with England and France undoubtedly required more time and mental strain than at any time in peace, but since then Japan and China have come into the scope of our diplomatic relations, countries which were then absolutely of no importance diplomatically.

Mr. BARTHOLDT. Mr. Speaker, will the gentleman yield?

Mr. GILLETT. I yield.

Mr. BARTHOLDT. I should like to ask my friend from Massachusetts whether it is not true that a tremendous amount of new work has to be performed by the State Department, new because of a new policy adopted by this Government, and, fortunately, by other governments, because of the fact that arbitration treaties are being concluded between all the countries of the world.

I have learned from officials of the State Department that that has increased the work of that department tremendously, and it has not only increased the work of our State Department, but the work in all foreign offices of the world. During Mr. Root's incumbency we have concluded 18 different arbitration treaties with 18 countries of the world. These treaties must be prepared in the State Department. The details must be looked after——

Mr. GILLETT. That is a rather long question. [Laughter.]

Mr. MANN. Mr. Speaker, will the gentleman yield for a question?

The SPEAKER. Does the gentleman yield?

Mr. GILLETT. Yes.

Mr. MANN. The gentleman referred to the great amount of work in the consular business. Is the gentleman aware of the fact that until we created the Department of Commerce and Labor the State Department published the consular reports and did all the work in reference to them, and that now that publication is conducted by the Department of Commerce and Labor, which does most of the work in connection with them?

Mr. GILLETT. Oh, I did not say anything about consular reports.

Mr. MANN. Well, the consular work is mostly making the reports.

Mr. GILLETT. Oh, no.

Mr. MACON. Mr. Speaker, will the gentleman yield?

Mr. GILLETT. Yes.

Mr. MACON. I desire to ask the gentleman in charge of the bill why the committee deems it necessary to change the designation or title of this particular officer?

Mr. GILLETT. The gentleman can not have been in the Chamber when I stated that.

Mr. MACON. Oh, yes; I have been in the Chamber every minute of the session. For instance, we have had Assistant Secretaries of State, and Mr. Bacon, the present Secretary of State, served in that capacity. Now, why is it necessary to have a Vice-Secretary of State instead of an additional assistant when the services of such able material is in the office of the assistant?

Mr. GILLETT. Because, Mr. Speaker, this was intended to create an entirely different class of official from the Assistant Secretaries. There are now three Assistant Secretaries. I do not wish to say anything uncomplimentary of the Assistant Secretaries of State, and therefore I must be careful in my language, but it was intended to create an office which should be filled by a man who could, in his intellectual grasp, be a second secretary, and who was of a different status from the assistants, so that foreign ministers and ambassadors could go to him and relieve the Secretary of that labor.

Mr. MACON. It seems, Mr. Speaker, the present Secretary of State, under the title of Assistant Secretary, did all of this extraordinary and important work that the gentleman from Massachusetts now insists that the vice-assistant must do. I can not see any reason for the change of designation or title of the position unless it is to be the policy now to create vice-assistants in all of the departments of the Government, a Vice-Assistant Secretary of the Treasury, a Vice-Assistant Secretary of War, a Vice-Assistant Secretary of the Navy, and so forth, all down the line.

Mr. FITZGERALD. Mr. Speaker, will the gentleman from Pennsylvania yield me five minutes?

The SPEAKER. The time of the gentleman from Massachusetts has expired.

Mr. GILLETT. The gentleman from Pennsylvania yields me more time.

Mr. BINGHAM. Mr. Speaker, I yield such time as he may desire to the gentleman from Massachusetts.

Mr. GILLETT. I will not abuse that grant, Mr. Speaker, but it will be recognized that my time has mostly been taken up by questions, and I wish to state simply two reasons which were given us for desiring these places. One was the tremendous growth, which everybody will recognize, in the business of the Department of State, which more than absorbs the time of the Secretary of State, so that it makes it imperative on him to have such an assistant. The second reason is that his assistant should have such a status that he would be recognized by the ambassadors and ministers here as one with whom they could deal directly, and therefore save the head of the department from a good deal of consultation.

Mr. WILLIAMS. Mr. Speaker, I would like to ask the gentleman from Massachusetts a question.

The SPEAKER. Does the gentleman from Massachusetts yield?

Mr. GILLETT. I yield.

Mr. WILLIAMS. In view of these growing duties that are resting so burdensomely upon the Secretary of State, does the gentleman think we ought to reduce the salary from that of all the other Cabinet officers?

Mr. GILLETT. That has already been done.

Mr. SHERLEY. Will the gentleman permit a question?

The SPEAKER. Does the gentleman yield?

Mr. GILLETT. I yield.

Mr. SHERLEY. Was not this the real reason advanced for the creation of the office of the Undersecretary, as he was called—to have in the Department of State a permanent official who should have direction of the foreign policies of the United States and who would continue through changing administrations?

Mr. GILLETT. I wish it were so, Mr. Speaker, but I do not understand it that way. I think it ought to be, but I do not believe that any official with a salary of $7,500 or $10,000 would be allowed in a change of administration to keep his place.

Mr. HENRY of Texas. Mr. Speaker, will the gentleman yield?

Mr. GILLETT. I yield.

Mr. HENRY of Texas. Why could not the President appoint a gentleman as Assistant Secretary of sufficient caliber to be a Secretary of State, and has not that recently been the case? Was not the present Secretary of State an Assistant Secretary of State, and should not it always be that way if the President should exercise wisdom in the selection of the officer?

Mr. GILLETT. I told the gentleman that he desires this man to be of a distinctive class, with more salary and a different name, so that he can be more close to the Secretary of State and be considered as more responsible than he would be without such designation.

Mr. HENRY of Texas. Another question. Has there been any proposition to create a vice Secretary of War, a vice Postmaster-General, a vice Speaker, or a vice Vice-President?

Mr. GILLETT. Oh, no.

Mr. BINGHAM. I yield five minutes to the gentleman from New York [Mr. FITZGERALD].

Mr. TAWNEY. Will the gentleman from New York yield to me just for a moment to make a statement?

Mr. FITZGERALD. I do; go ahead.

Mr. TAWNEY. Mr. Speaker, as soon as these amendments are disposed of I shall move to go into the Committee of the Whole House for the consideration of the sundry civil bill, and desire now to give notice that we shall remain in continuous session until late this evening in the consideration of that bill.

The SPEAKER. The gentleman from New York is recognized for five minutes.

Mr. FITZGERALD. Mr. Speaker, it was upon my motion that the House instructed the conferees to insist upon its disagreement to this and several other amendments. I am still opposed to the creation of the places, but I am heartily in favor of the change of designation suggested by the gentleman from Pennsylvania. I have carefully investigated the exact meaning of the two terms in controversy. I have sought my information in the Standard Dictionary, a work to which we may all refer occasionally with a great deal of benefit. I find that the term

"vice" means one who acts in place of another; a substitute; a deputy.

It seems to me that that is what was intended in creating this place.

Mr. OLMSTED. Will the gentleman yield to me just for a question? Is it not a fact that the term "Undersecretary," being used by other governments, would be understood by their representatives as signifying the functions of that officer better than the term "vice?"

Mr. FITZGERALD. I am unable to tell whether our legislation will give more or less comprehension to representatives of any government other than our own. Let me read what the ordinary American citizen would understand if the term "Undersecretary" were adopted by Congress, and I read from the definition, as I say, found in the Standard Dictionary of the English Language:

UNDER (an adjective). 1. Situated under something else, or under all the others of a series; lower, or lowermost; opposed to *upper;* as, an under *layer.* 2. Subordinate: erroneous separate use of the preposition; as, *under* master—

That should properly be written as a hyphenated word—

3. Lower in pitch—*under dog* (colloq., U. S.), the dog overpowered in a dog fight; hence, the weaker or worsted person in a contention.

So that the ordinary American citizen endeavoring to ascertain what the Undersecretary of State meant would find that that was the official of the Government of the United States who was usually worsted in a contention in diplomatic relations with some other country. [Laughter.]

I suggest, Mr. Speaker, that it was not only unfortunate that the Senate of the United States should be so careless in its use of the English language, but it is highly probable that this House should insist that whatever title be given to this office it would not create the impression that this highly qualified additional assistant should always be not exactly the "under dog," but, if I might use a common expression, the "scapegoat" of the administration in diplomatic relations. [Laughter.] Now, I would prefer, if we had this official, to have him called the "Vice-Secretary."

Mr. WILLIAMS. Deputy Secretary.

Mr. FITZGERALD. Vice-Secretary, superior to deputy; and representing the Secretary in his absence. But I am of the opinion that we have now obtained such a very eminent and qualified personage for the office of Secretary of State that he does not need this additional place.

It is suggested that the salary fixed for this additional place by a peculiar coincidence corresponds with the salary now being received by Senators and Members of the House of Representatives. I would not suggest that some man unfortunate enough not to meet with the approbation of his constitutents in a recent campaign is in the mind of any person for this place, but it does seem, having read that one gentleman who had been suggested would not take it, and another one would not take another place, because he would not be subordinate to this, that perhaps some eagle eye has with unerring wisdom lighted upon what is usually termed a "lame duck" in one House or the other, and that, so that there might be no jealousy or feeling between the legislative and the executive branches, determined not to put his salary in excess of ours.

I hope the amendment will not be agreed to in any shape.

The SPEAKER. The time of the gentleman has expired.

Mr. BINGHAM. Mr. Speaker, I yield five minutes to the gentleman from Michigan [Mr. DENBY].

Mr. DENBY. Mr. Speaker, the question is sometimes asked why the Secretary of State needs an undersecretary, when the secretaries of the other great departments of our Government do not. The answer is very simple, if we analyze the character of the various departments. The State Department is the only department of the American Government that is not a business department. The Navy Department, the War Department, the Post-Office Department, and the others, with the exception of the Attorney-General's department perhaps, are all business departments, and they buy and sell materials, they conduct great works, and they are subdivided so that the chiefs of the bureaus can take care of the actual purchases of materials and the actual conduct of these great business enterprises. The department of the Secretary of State, upon the other hand, is a department of correspondence. All of its business is conducted through the medium of correspondence, and the department is divided into separate bureaus to take care of correspondence.

But, at the same time, every leaf and every word of a part at least of that correspondence may be of surpassing importance to the people of the United States, and sometimes to the people of all the world.

Mr. MANN. Will the gentleman yield?

The SPEAKER. Does the gentleman from Michigan [Mr. DENBY] yield to the gentleman from Illinois [Mr. MANN]?

Mr. DENBY. I yield.

Mr. MANN. Does the gentleman know how many chiefs of bureaus there are in the State Department?

Mr. DENBY. Five or six.

Mr. MANN. There are eight in this bill.

Mr. DENBY. Eight. It does not matter how many. There is a chief of the Bureau of Passports, a chief of the Bureau of Archives, a consular chief, a diplomatic chief, and others.

But, as I say, the correspondence handled by the State Department is of great significance to the prosperity and sometimes the peace of the United States. It is absolutely essential that nothing go out from the Department of State that has not been carefully considered and that has not been subjected to the closest scrutiny.

You know, and I know, that the Secretary of State, more than any other official of the United States Government, has in his hands sometimes the power of peace or war; and you know, if you have ever had anything to do with this department, that the Secretary's work is as hard as or harder than that of any other chief of any other department of the American Government. He can not be on deck all the time. Sometimes he is absent, and it is absolutely essential that there should be in the department an official who—call him what you like—is in reality an understudy of the Secretary of State, a man who shall be able to discharge the most important duties in the department, a man who shall not be specifically in charge of any one department, nor give his time to any one branch of the work, but a man who shall have the whole great work of the department, a man who shall understand and thoroughly appreciate the policies of his chief and the policies of the administration, a man who can stand in the position as an understudy and discharge the whole duties of the place.

Mr. HULL of Iowa. Will the gentleman yield?

Mr. DENBY. I have a very short time, but I yield with pleasure to the gentleman from Iowa.

Mr. HULL of Iowa. I will wait until you get through.

Mr. DENBY. They are asking in this bill for another Assistant Secretary of State in addition to the Undersecretary. It is necessary for the administration policies, if the policies of Secretary Root are to be carried out. During the last two years they have created, without authority of law, another department at the head of which should be an Assistant Secretary of State—a department called the "Division of the Far East," wherein now are men who have had experience as consuls-general and other high officials in oriental countries; and it must be clear to this House that if we are to get the best work out of our consular and diplomatic officers, and the best results out of our diplomacy, we must use men best fitted for the positions that we have in the service. [Applause.]

[Here the hammer fell.]

Mr. DENBY. May I have a few more moments?

Mr. BINGHAM. I yield to the gentleman.

Mr. DENBY. Mr. Speaker, it is impossible to half cover the subject and to give the many good reasons why the enactment of this legislation is desirable. I will not continue on that line. But let me say one thing further as to the word "undersecretary," which has created so much derision in this House. I would say that by its adoption we would only be conforming to the diplomatic usage of other countries. Great Britain has an undersecretary of state. So has Germany; but I will not undertake to pronounce the name of the official, for fear my pronunciation should cause amusement, but it is a title which translates exactly "undersecretary of state." Italy has an undersecretary of state. France has not a corresponding official, but she recognizes the customary use of the word "under" in all her great organization.

The terms used are "sous-chef" and "sous-directeur," which are applied in all the branches of her services. Now, it is too late for the United States to be afraid to use any term because it will be aping somebody. Gentlemen fear that they will be aping England. I have no fear of aping any other country when we use words that conform to the usage of the world. We have "ambassadors," which we borrowed from Europe; we have an "attorney-general," which we borrowed from England; and we have other officials of the United States Government and many of them have duplicates abroad. Gentlemen talk about aping England. Do you know what you will be doing, gentlemen, if you do away with the term "undersecretary" of state and adopt the term of "vice-secretary?" You will be aping the Japanese [laughter], for Japan is the only Government that uses "vice-secretary of state" to-day; and, although I have the greatest admiration for Japan and am perfectly willing to ape Japan if the House prefers it, yet I would really

NORTHWEST MISSOURI STATE
UNIVERSITY LIBRARY
MARYVILLE, MISSOURI 64468

rather ape England, France, Italy, and the nations of Europe if I must ape somebody. But I do not believe we shall be aping, but only conforming, very sensibly conforming, to the usage of the world. I see no objections and many strong reasons for the enactment of the legislation. [Loud applause.]

Mr. BINGHAM. I yield ten minutes to the gentleman from Indiana.

Mr. WATSON. Mr. Speaker, I am decidedly in favor of the motion made by the distinguished gentleman from Pennsylvania, and in the very brief time allotted to me I trust that I may be able to give some reasons for the faith that is within me.

It will be noticed, Mr. Speaker, that the proposition contended for is to provide, first, a Fourth Assistant Secretary of State, whose duties shall be the same as those already discharged by the First, Second, and Third Assistant Secretaries of State, which number are now employed in that Department.

In the second place, it provides for a Vice-Secretary of State, with a salary of $7,500 a year; a confidential clerk to that secretary; and also a secretary to that secretary. I may say at the outset that this is but the initial step of a reorganization of the State Department; so that as many of its officials as are necessary may deal with domestic affairs, and as many as are necessary may be made to deal only with the foreign affairs of that department.

And I may say in this connection, gentlemen, that this is not the conception of Mr. KNOX, as has been universally supposed heretofore, and even charged on this floor—though that would detract nothing from its merit in my estimation—but it is the conception of Mr. Root, as we may all find by reading his testimony before the Committee on Appropriations this year.

That distinguished diplomat in his testimony gives many reasons why the Fourth Assistant Secretary of State should be employed, and I will submit to the conscience and the good sense of every man here that if he will read that testimony he will be entirely satisfied as to the necessity for the creation of that new office. He says:

> The necessities of the various bureaus in the department, arising from causes that I will mention to you presently, have made it necessary to employ new clerks, to put five clerks who belong in the indexing bureau at work on particular things.

And he goes on to specify how the lack of clerks in that department has made a rearrangement necessary, and finishes it up with the statement that the maximum and minimum tariff, which in all probability, as he then supposed, might be adopted by the incoming Congress, would make such changes in the phraseology of the tariff, such changes in the schedules as will put every foreign office in the world with whose country America comes in contact into business correspondence with the State Department and render absolutely necessary the increase for which he asks.

Proceeding, he says that the present organization is temporarily satisfactory, but adds:

> I consider that the time will shortly come when it will be exceedingly desirable to make material changes in the organization of the State Department. I think the time will come when the enlarged business will justify and require a politico-geographical division.

The Secretary then proceeds to give the reasons for that statement, and, after showing the increase in the business of that department, gives reasons for this change that are so cogent and convincing as to be irresistible.

Mr. Speaker, international relations involving the sensibilities and the interests of all nations are in their nature a delicate subject, and the work of a department of foreign affairs therefore must go on in silence, unobserved and unappreciated, except when attention is drawn to it by some new treaty, trade agreement, or the like actually affecting the interests of every American citizen. The unobtrusive character of this work should not lead us to forget its vital importance.

It may be pertinent at this point to recall to mind by a few examples what the Department of State and the foreign service and their work do stand for. After the civil war and the practical disappearance of our merchant marine there was a long lull in the activities of American foreign policy. The annexation of the Hawaiian Islands in 1898 forced upon us a political interest in the Pacific, where from early days we had had a growing trade with China and the Orient. Our commercial interests and our influence in China were crystallized in the "open-door" policy of John Hay. We were the first to negotiate a modern treaty with Japan, with which Empire our commercial and political relations soon became close and important. We joined in the action at Peking following the Boxer uprising of 1900. Meanwhile the Spanish war had imposed upon us a still deeper interest in the Far East, along with the acquisition of the Philippine Islands and Guam. The same war cast upon us the possession of Porto Rico and a responsibility for Cuba. Secretary Root's trip to Latin America has ushered in a new era of Pan-American relations of the greatest importance. The building of the Panama Canal, with its great commercial and political effects, makes still more important our position in the Carribean Sea. These few facts suffice to show that the United States can not avoid its destiny to be a world power. As a world power the country needs a thoroughly efficient State Department and foreign service.

During approximately the past two or three years the Department of State has been occupied, for example, with the negotiation and signing of 24 arbitration treaties, part of the total of some fifty-odd treaties signed during Mr. Root's incumbency. The importance and difficulty of the recent British negotiation in settlement of boundary and fishery questions is well known to any student of our history from one century ago down to this day. There are also included treaties in respect to Panama and Colombia, treaties to protect American property in trade-marks, copyrights, and designs, and many others of a technicality and difficulty demanding the application of superior ability. There are the commercial agreements with France and with Germany. There may be mentioned, also, increased relations growing out of The Hague Conference and other congresses and conferences, such as The Hague conventions, the Congress on Tuberculosis, the Pan-American Scientific Congress, the International Prize Court Conference, the participation at commercial expositions in Japan and Ecuador, in Belgium, and elsewhere, the Congress on Hygiene and Dermography, and so forth. The Central American Peace Conference held at Washington last winter seems to promise results most gratifying to the United States and Mexico, whose Governments brought it about and guided its progress. The work of assisting Santo Domingo in adjusting her foreign debt was another task. We have lately been concerned in troubles in Haiti.

Our Venezuelan questions of long standing and of great complexity seem happily to be responding to a wise adjustment. The Pan-American conferences, another of which is to occur next year at Buenos Aires, provide a great variety of subjects for careful study, and to the peoples of this hemisphere are not second in importance even to The Hague conferences, in which we are proud to cooperate for the realization of the ideal of peace and arbitration. You all know that there was also an immigration question with Japan growing out of economic considerations and that that question was satisfactorily arranged. You know also of the recent exchanges outlining the accordant Far Eastern policies of the two Governments. Going back a little further, we recall the work of the State Department in making possible the peace of Portsmouth. Not at all by way of a complete list, but simply by way of a few examples, I have sought to impress upon the House the real importance and difficulty of the work of the Department of State.

What I have mentioned are results. It goes without saying that these results are the coefficient of a vastly increased amount of work. From the subjects cited it is clear, also, that this represents not only a vast increase of routine and mechanical work, but most especially a vast increase of intellectual work which can be performed only by those higher officials to the number of which it is sought to add.

The difficulty of the work for which the Secretary of State is responsible is greatly augmented by the fact that he has to do business at long distance through instructions to agents abroad, whose usefulness depends entirely upon the lucidity and wisdom of the instructions they receive. The daily guidance of over a hundred diplomatic officers and about a thousand consular officers, situated in every quarter of the world and urgently requiring instructions and decisions upon almost every conceivable subject, is no easy task. Such is the great unseen work of a department whose personnel on duty in Washington is relatively small. Since 1893 the clerical force of the State Department has been increased by 64. In 1874 there were 42 clerks and 3 assistant secretaries. To-day there are 118 clerks and 3 assistant secretaries. Just as a ship reques a certain complement of officers in proportion to its crew, so for the efficient direction of its efforts the Department of State requires a certain proportional number of higher officials to manage the different parts of the machine.

As already indicated, a reason this proportion is high in this department is that that portion of its work which is mere routine is relatively very small, because its work is more varied, perhaps, than that of any other department in Washington, and for that reason different matters have to be distributed in many groups and placed under different supervision. For example, there are matters of trade and tariff and the negotiation of commercial agreements; matters of citizenship, naturalization, and expatriation; matters of extradition; peculiar groups

of subjects requiring special knowledge of the conditions in different parts of the world; the separate administration of the diplomatic and consular services, the solidarity of each of which must be preserved; the administration of the department itself; the arrangements in connection with international exhibitions and scientific congresses; arrangements for the reception of and dealing with foreign ambassadors and other representatives, of whom there is a larger number accredited to this than to any other government.

Moreover, it should be remembered that the Department of State is not usually discussing questions of peace or war, but is occupied with matters of the utmost importance to the commercial or other interests of the whole country, or of individual citizens concerned, or resident abroad, either in furtherance of American commerce or as travelers entitled to the protection of their Government. How great are our vested interests abroad and the number of our citizens representing our national life the world over may be inferred from the estimate that in Mexico alone there are 40,000 American citizens and an investment of $700,000,000 of American capital. The increase of foreign travel may be inferred from these figures: Our outgoing passengers numbered in 1898, 225,411; in 1906, 496,737; in 1907, 569,882; while our immigration has correspondingly increased.

But I desire to recur briefly to the testimony of Mr. Root. He says:

> Let me give you some figures as an indication of the increase of business in this department. First, the number of mail pieces handled—that is, letters received and sent out—for the fiscal year 1905–6 was 111,992; fiscal year 1906–7, 131,186; fiscal year 1907–8, 161,046.
>
> You see, it is going up steadily, in two years ranging from 111,000 to 160,000, not on matters that are trivial, but on matters of the utmost consequence and importance, the dealing of this Nation with all the other peoples of the world.

And so there is an absolute necessity along that line. But let me proceed further.

Mr. TAWNEY then asked him a question about how much our increased participation in the affairs of the world, how much the assumption of new duties, the filling of new zones of authority and new realms of responsibility had to do with making this increase necessary, and he responded simply by reciting the splendid increase in our foreign trade—$1,662,000,000 in 1896, $2,960,000,000 in 1906, $3,315,000,000 in 1907—all of which he says makes an increase in this department more necessary, because it has more business to handle. We come in contact with other peoples more intimately; we touch other nations more closely; there are more places of contact; there are more opportunities for friction. Therefore this great department, which has to do not only with peace at home, but with international comity, ought to be supplied by the American Congress with enough arms to reach out and touch every nation with which we have business and commercial relations. [Applause.]

After making certain references to the consular service, he further says:

> The whole world is advancing in cooperation on all sorts of topics. International conventions, congresses, and conferences of all kinds are springing up and are continually on the increase. You had The Hague Convention. We have had here in Washington this last summer the tuberculosis congress. We have going on this month in Chile a Pan-American scientific congress. We have just opened in London an international prize court conference. We have in preparation an international exposition at Quito, for all of which you have made special appropriations. There is about to be held here a congress on hygiene, under authority of Congress, and a great many others, smaller ones, less important. All of them mean correspondence, questions to be settled, information to be obtained, delegates to be appointed and to be instructed.
>
> There is another thing which is quite important. In consequence of the changes in the immigration law and the changes in the citizenship laws, questions are constantly arising and work is being created for the clerks in the State Department. Then, the building of the Panama Canal has brought about a condition where it has been necessary for the United States to have an active policy in the Caribbean. Our treaty with Santo Domingo is an illustration.
>
> We have been undertaking to help the people in Central America. To accomplish that, Mexico and the United States have been collaborating. The presence of Mexico takes away all the prejudice that would come from the difference of race and language and institution, while the presence of the United States with Mexico takes away the suspicion that comes from Mexico's proximity. The two countries have been working together, trying to exercise an influence in the direction of peace and order. It is a very laborious work. You have given us some additional ministers, so we have a minister in each of the Central American States. That all means more work for the clerks, but I think it is worth while, because when we get the canal built we have got to be the great influence in the Caribbean. We do not want other countries, we do not want to govern them, we do not want to annex them, we do not want anybody else to take possession of them; we want them to govern themselves, and we have got to be the great influence toward the stability and the success of their self-government. That all means labor, and it means assiduous attention, and it means work for the clerks.

And so we proceed upon the theory that this is a great peace establishment. Why, gentleman of the House, we have appropriated $125,000,000 this year for the navy. We have appropriated $90,000,000 for the army, and yet the great State Department, which has to do with peace at home and peace abroad, with all of its officers and clerks and employees at Washington, with all its foreign diplomats, with all its consular offices, costs but a little over $4,000,000 every year, and one-third of that is turned into the Treasury in the shape of consular fees; and yet when $16,000 of increase is asked for, men—speaking with all due respect—who have freely swallowed camels strain at this gnat.

Now, why the office of vice-secretary? I prefer to have it called "undersecretary." I remember when I first came to Congress when the great John Hay, one of the most splendid officials that ever occupied that high position, was Secretary of State, in a conversation said that, while it was a very congenial and splendid work to engage in, yet that one-half of all his time was taken up in conversation with foreign diplomats; when if we had some secretary with whom they were willing to converse, that man could take that business off his hands and give him time for other work in that department. That is what this secretary would do.

Why, as my friend from Michigan [Mr. DENBY] has said, other countries have undersecretaries of state, and foreign diplomats are accustomed to dealing with undersecretaries, but they will not deal with an assistant secretary, because they think that he occupies a clerical position; and every one of them insists upon dealing with the Secretary of State in person and coming in personal contact with him.

Every foreign diplomat proceeds upon the theory, which he has a right to do, that his country is as good as any country and every one insists on standing on the same level and coming in contact personally with the Secretary of State himself.

If this office is created, foreign diplomats can deal with this man, and he can do that work and thus relieve the Secretary of State from the great personal burden that comes from that species of entertainment, that species of personal contact that the Secretary himself must otherwise endure. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. BINGHAM. I will yield five minutes more to the gentleman from Indiana.

Mr. PAYNE. I wish the gentleman would state what Secretary Root recommended.

Mr. WATSON. He said, so far as the present was concerned, that he thought the existing arrangement was sufficient, and he did not recommend an Undersecretary, and he did not recommend a vice-secretary, but he said, as I have read, that the time was approaching when a reorganization of this bureau was essential along the lines I am endeavoring to indicate.

So that the Fourth Assistant Secretary of State is the one man that is to deal with the domestic affairs of the department, while the other, with the private secretary and his assistant secretary, are the ones who are to deal with the foreign affairs of this great department.

Mr. HULL of Iowa. Will the gentleman yield for a question?

Mr. WATSON. Certainly.

Mr. HULL of Iowa. If the Fourth Assistant Secretary is to deal with domestics affairs and the Undersecretary with foreign affairs, what are the other three secretaries to deal with?

Mr. WATSON. They are to assist in dealing, as they do now, with the domestic affairs, and also such foreign affairs as may be thrust on them by the exigencies of the situation.

Now, I shall not take up and discuss many of these provisions. I should be glad if the Members of this House had an opportunity to read what Secretary Root had to say before the Committee on Appropriations when he met with that committee.

But I want to call attention to this fact, and it is a singular fact, one which should certainly be borne in mind in the consideration of this question, and that is, with all the other governments of the world the chief cabinet officer and the head of the department for foreign affairs are separate and distinct men.

In this Government alone, among all the great governments of the world, we have the head of the State Department and the man who deals with foreign affairs in one and the same individual—that is, the Secretary of State is the head of the department handling foreign affairs, an office which entails in the case of a great Government like this tasks difficult enough for any man's ability. Simultaneously he must be prepared at all times to advise the President of the United States upon that great variety of great problems of domestic policy which lie at the root of the country's welfare.

Mr. HITCHCOCK. Mr. Speaker, will the gentleman yield?

Mr. WATSON. Certainly.

Mr. HITCHCOCK. Is it not a fact that in the foreign countries to which the gentleman refers this particular cabinet officer, instead of giving his whole time to executive work, is

required to sit with the Parliament or the Reichstag and take part in legislation?

Mr. WATSON. That is absolutely true.

Mr. HITCHCOCK. And is that not one of the reasons why an Undersecretary of State is required?

Mr. WATSON. But that does not change the functions and the duties of the man who fills the office. He has to deal with those affairs, and here the Secretary of State sits at the head of the President's official family, and he has to be the chief adviser and counselor on all matters domestic and has to be the man through whom all our foreign relations are to be maintained.

In other words, this office ought to be created in order to roll back from the shoulders of the Secretary of State the great burdens of that office and make it possible for him to attend to the other duties that are thrust upon him free from unnecessary burdens.

Mr. Speaker, I desire to say that this is a business matter, and it seems to me we can not stand here with only $16,000 demanded on a propositon of this kind, and vote as we ought to vote, unless we favor this increase. I trust that this problem will receive the consideration its importance merits, and that when the vote is taken it will be found favorable to the proposition of my friend from Pennsylvania. [Applause.]

Mr. BINGHAM. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Speaker, it is not easy to oppose the wishes of a gentleman who is to be translated from a seat in Congress to a position in the Cabinet, and yet it seems to me somewhat remarkable that without any suggestion from the Department of State itself, without any request from the Secretary of State or any Secretary of State at any time, without any bill having been introduced into either House of Congress, without the matter ever having been considered by a committee of the House, it should now be proposed to add two Secretaries of State and make in that department six Secretaries of State, in effect. The Department of State has less work to do than any other department of the Government. It now has a Secretary of State and three Assistant Secretaries. It has the same number of chief executives that the great Treasury Department has, that the great Post-Office Department has, and although the gentleman from Michigan [Mr. DENBY] says these other departments are guided by chiefs of bureaus, the same is true of the State Department. They have eight chiefs of bureaus, and the only reason that can be given for creating two additional offices is to provide places for two additional people. [Applause.] If I could be convinced that my distinguished friend from Indiana [Mr. WATSON], who has made such a graceful speech here, was to fill the office of under or vice or whatever it is secretary of state, I do not know but I might persuade my conscience so far as to permit him to occupy the place. But I know they will not select such a man for that place. Six Secretaries of State! They are now so thick that the Secretaries of State in that department fall over each other in the halls. [Laughter.]

Mr. DENBY. Will the gentleman yield for a question?

Mr. MANN. If I can get more time, I yield for a question.

Mr. DENBY. Does the gentleman know that there has been for the last year in the Department of State, acting in the position which is designed for the Fourth Assistant Secretary of State, a man who has held the position of consul-general of the United States, and who took a position of a clerkship at $900 a year in order to do the work of the Assistant Secretary? Yet the gentleman says they fall over each other.

Mr. MANN. Oh, well, do not take all of my time. I heard the gentleman from Michigan state a few moments ago that outside of the law and contrary to the law——

Mr. DENBY. No; never!

Mr. MANN. The State Department had created, practically, this place.

Mr. DENBY. But the gentleman has misquoted me.

Mr. MANN. Oh, the gentleman has said that.

Mr. DENBY. If the gentleman from Illinois quotes me at all, he must quote me correctly. I did not say contrary to the law; I said outside of the law.

Mr. MANN. Oh, well, the gentleman is drawing a fine distinction. I know no difference between outside the law and contrary to the law in the creation of offices. [Applause.]

If it is not provided for by the law, it is contrary to the law. The gentleman begs the question. There is no occasion for the creation of these offices. There is no reason for it, and no man here can justify himself for providing for six Secretaries of State, with fewer men under each of them than is under any other assistant secretary to any Cabinet officer.

No man here can justify himself in creating this Secretary of State and only one Assistant Secretary of the Interior. [Applause.]

The SPEAKER. The time of the gentleman has expired. [Cries of "Vote!"]

Mr. BINGHAM. Mr. Speaker, I would ask the patience of the House for just a moment to make one submission, briefly, that I had hoped would come under the original proposition proposed in regard to the undersecretary. The question has been asked what is the need of an Undersecretary or Vice-Secretary of State, why give him that particular title, and why so high a salary? It would be idle for me to dwell upon the importance of the functions of the Department of State. Its primacy among the executive departments is recognized by law and custom. That its head should not be overtaxed and in consequence prevented from giving to the grave and delicate questions arising in our foreign relations the full measure of study and consideration they require is a premise none of course will deny. When, therefore, both the outgoing and incoming Secretary of State affirm that that official was overtaxed, and I have authority for the use of that language, and that there is need for such an office of Undersecretary of State, their assurances should go far to settle that much.

It has been thirty-four years since the last assistant secretaryship of state was created. The fact is that while other departments of the Federal Government have been enlarged to meet the increased demands upon them, incident to the Nation's growth, the State Department in large measure is to-day constituted upon the scale established a generation ago. Yet it has not only to perform the functions of that day augmented by their natural growth, but entirely new fields have in the interval been added to its province by force of events well known and now beyond recall even if we would recall them. With this expansion duties and responsibilities of a capital character not properly appurtenant to the office of an assistant secretary have piled up upon the head of the department, until it has become imperative that he be relieved of some of them. The only way to do this is to create in the department an official who shall be something more than an assistant or deputy secretary; one with appropriate rank and authority in the eyes of the world to share some of those duties which in the past have customarily required the personal attention of the Secretary for want of an under official of appropriate rank to refer them to.

Coming now to the title of the proposed office, the problem obviously was to find one that would correctly indicate the nature of the office and distinguish it from an Assistant Secretaryship of State. First assistant or chief assistant secretary or deputy secretary manifestly would not do, because the object is to create an office of higher rank and authority than an assistant or deputy secretary—an office whose incumbent should take over entirely or share with the Secretary duties which it has not been the custom to assign to assistant secretaries.

Of other titles suggested, "undersecretary" met with the most favor, not only because it aptly describes the office proposed to be created, but also because, being a phrase long in use in statecraft, its own well-defined meaning would be no little help in marking out the new post's proper sphere in the State Department.

The SPEAKER. The time of the gentleman has expired.

Mr. BINGHAM. Mr. Speaker, my time being up, I have only one more statement to make and I call for the previous question.

The SPEAKER pro tempore (Mr. OLMSTED). The gentleman from Pennsylvania demands the previous question.

Mr. SHERLEY. Mr. Speaker, on that motion I demand a division.

The question was taken, and the previous question was ordered.

The SPEAKER pro tempore. The question now is upon the motion to recede and concur in the sixty-fourth amendment, with an amendment, and on that the gentleman from Kentucky demands a division.

Mr. SHERLEY. Oh, no; the gentleman from Kentucky insists——

Mr. CLARK of Missouri. Mr. Speaker, I do not want to lose the opportunity of demanding the yeas and nays.

The SPEAKER pro tempore. The Chair now understands the gentleman from Kentucky to ask a division of the question.

Mr. SHERLEY. Yes.

The SPEAKER pro tempore. The question now is, therefore, Will the House recede from its disagreement to Senate amendment numbered 64?

Mr. FINLEY. Let that be reported again, if you please.

The SPEAKER pro tempore. Without objection, the amendment will be again reported. [After a pause.] The Chair hears none.

The amendment was again reported.

The SPEAKER pro tempore. The motion is, Will the House do recede from its disagreement on Senate amendment numbered 64.

The question was taken, and the Chair announced the noes seemed to have it.

On a division (demanded by Mr. BINGHAM) there were—ayes 89, noes 134.

So the motion was rejected.

Mr. CLARK of Missouri. Mr. Speaker, I move that the House insist on its disagreement to that amendment.

The SPEAKER pro tempore. The gentleman from Missouri moves that the House further insist on its disagreement to Senate amendment numbered 64.

The question was taken, and the motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment No. 65: Page 40, line 22, after the word "each." insert: "Fourth Assistant Secretary of State, to be appointed by the President, by and with the advice of the Senate, who shall perform such duties as the Secretary of State may designate and as may be provided by law, $4,500."

Mr. UNDERWOOD. Mr. Speaker—— [Cries of "Vote!"]

The SPEAKER pro tempore. What is the motion?

Mr. BINGHAM. I move that we recede.

The SPEAKER pro tempore. The gentleman from Pennsylvania moves that the House do recede from its disagreement from the Senate amendment and agree to the same.

The question was taken, and the motion was rejected.

Mr. CLARK of Missouri. Mr. Speaker, I move that the House further insist on its disagreement to that amendment.

The question was taken, and the motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment numbered 66, page 41, line 10, after the word "dollars," insert "said private secretary and clerk to the Secretary of State"——

Mr. GILLETT. Mr. Speaker, I ask unanimous consent that the House insist on its disagreement—of course it is useless, those others having been defeated, to pass this—and I ask unanimous consent that the House insist upon its disagreement.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent that the House do insist upon its disagreement to the remaining Senate amendments. Is there objection?

Mr. WILLIAMS. Mr. Speaker, reserving the right to object, because they all want to do that——

Mr. GILLETT. Mr. Speaker, there are several other amendments.

The SPEAKER. The Chair understands the gentleman moves to insist upon a further disagreement——

Mr. GILLETT. To the amendments in the office of the Secretary of State, Mr. Speaker.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment No. 192: Page 160, line 3, strike out "thirteen" and insert "fifteen."

Mr. GILLETT. Mr. Speaker, I move that the House recede from its disagreement to the Senate amendment and concur in the same.

The SPEAKER. The gentleman from Massachusetts [Mr. GILLETT] moves that the House recede from its disagreement to the Senate amendment and concur in the same.

Mr. CLARK of Missouri. Mr. Speaker, there is not one man in ten in the House that knows what that amendment is.

Mr. MANN. It is the Supreme Court amendment.

Mr. CLARK of Missouri. I knew what it was, and so did the gentleman from Illinois. I have been keeping tab on it.

Mr. GILLETT. Mr. Speaker, I ask that it be reported once more.

The SPEAKER. Without objection, it will be again reported.

The Clerk read as follows:

Amendment No. 192: Page 160, line 3, strike out "thirteen" and insert "fifteen," so as to read:
"For the Chief Justice of the Supreme Court of the United States, $15,000."

The SPEAKER. The gentleman from Massachusetts moves that the House do recede and concur.

The question was taken, and the motion was rejected.

The SPEAKER. The Clerk will report the next amendment.

Mr. CLARK of Missouri. Mr. Speaker, I move that the House further insist on its disagreement to that amendment.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment No. 193: Page 160, line 4, strike out "twelve" and insert "fourteen," so as to read:
"And for eight associate justices, at $14,500 each."

Mr. GILLETT. Mr. Speaker, I ask unanimous consent that the House further insist on all the other amendments in the bill and ask for a further conference.

Mr. MANN. Mr. Speaker, reserving the right to object, let me ask what is the object of the gentleman?

The SPEAKER. The gentleman from Massachusetts [Mr. GILLETT] asks unanimous consent that the House do further insist on its disagreement to the Senate amendment remaining.

Mr. GRAHAM. I object, Mr. Speaker.

Mr. LIVINGSTON. Mr. Speaker, I move that so far as the salaries of the associate justices are concerned the House insist upon its disagreement.

The SPEAKER. The gentleman from Georgia moves that the House do further insist upon its disagreement to the Senate amendment as to the associate justices.

The question was taken, and the motion was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows.

Amendment No. 195: Page 160, line 13, strike out "seven" and insert "nine," so as to read:
"For 29 circuit judges, at $9,000 each, $261,000."

Mr. GILLETT. Mr. Speaker, I move that the House do insist upon its disagreement to the Senate amendment.

The question was taken, and the motion was agreed to.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment No. 196: Page 160, line 13, strike out "three" and insert "sixty-one;" so that it will read:
"Two hundred and ninety thousand dollars."

Mr. LIVINGSTON. Mr. Speaker, I move that the House insist on its disagreement.

Mr. GILLETT. Mr. Speaker, I move that the House insist upon its disagreement to all remaining amendments.

Mr. GRAHAM. I object, Mr. Speaker.

The SPEAKER. Is a separate vote demanded on any of the remaining amendments?

Mr. GRAHAM. Mr. Speaker, I demand a separate vote.

The SPEAKER. On which amendment?

Mr. GRAHAM. On the proposition for an increase in the salary of the circuit court judges.

The SPEAKER. Is there demand for a separate vote on any of the other amendments?

Mr. WILLIAMS. The matter upon which the gentleman from Pennsylvania [Mr. GRAHAM] demands a separate vote has already been passed. He demanded a separate vote upon a raise of the salary of the circuit judges. The House passed a motion to insist upon its disagreement.

The SPEAKER. There is one amendment touching circuit judges that has not been disposed of. The Clerk will report the amendment.

The Clerk read as follows:

Page 160, line 13, strike out "three" and insert "sixty-one," so that it will read:
"Circuit courts: For 29 circuit judges at $10,000 each, $290,000."

Mr. LIVINGSTON. That has been passed on, Mr. Speaker.

The SPEAKER. The Chair is informed that this amendment has not been passed upon. The question is on the motion of the gentleman from Georgia [Mr. LIVINGSTON] that the House do insist upon its disagreement.

The question was taken, and the motion was agreed to.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the vote on the remaining amendments will be taken in gross.

No other separate vote was demanded.

The question was taken on the motion to further insist on disagreement to the other amendments in gross.

The motion was agreed to.

Mr. BINGHAM. Mr. Speaker, I move that the House agree to the conference asked by the Senate.

The motion was agreed to.

The SPEAKER. The Chair announces the following conferees: Mr. BINGHAM, Mr. GILLETT, and Mr. LIVINGSTON.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. TAWNEY. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the sundry civil appropriation bill.

The motion was agreed to.

The House accordingly resolved itself into Committee of the Whole House on the state of the Union, Mr. WATSON in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the sundry civil appropriation bill, and the Clerk will read.

The Clerk read as follows:

Transportation of fractional silver coin: For transportation of fractional silver coin, by registered mail or otherwise, $60,000; and in expending this sum the Secretary of the Treasury is authorized and directed to transport from the Treasury or subtreasuries, free of charge, fractional silver coin when requested to do so: *Provided*, That an equal amount in coin or currency shall have been deposited in the Treasury or such subtreasuries by the applicant or applicants. And the Secretary of the Treasury shall report to Congress the cost arising under this appropriation.

Mr. JOHNSON of South Carolina. Mr. Chairman, I move to strike out of lines 13 and 14 the words "or otherwise."

The Clerk read as follows:

Page 57, lines 13 and 14, strike out the words "or otherwise."

Mr. TAWNEY. Mr. Chairman, I hope that we will have order, so that the committee may know the reason why the gentleman would strike out this language.

Mr. JOHNSON of South Carolina. Mr. Chairman, for the present fiscal year we appropriated $60,000 for the transportation of fractional silver. The law provided that one-half of this sum should be expended in transporting silver by registered mail. In the beginning of the fiscal year the Secretary of the Treasury, in carrying out that instruction of Congress, sent this money by registered mail. The only cost to the Treasury Department was the registration stamp of 8 cents. Subsequently the Postmaster-General notified the Secretary of the Treasury that this silver coin could not be sent under the penalty frank, whereupon the Secretary of the Treasury was required to pay the postage on silver coin sent from the Treasury Department to the banks of the country. He was not only required to pay the postage, but he was required to pay postage at first-class or letter rates, which made it cost $20 a thousand to transport this money by registered mail.

In the first place, I doubt the correctness of the ruling of the Postmaster-General, that this money can not be sent under the official penalty frank. What was it, gentlemen of the committee, if it was not official business?

In the second place, I doubt the correctness of holding that it was first-class mail matter and should be required to pay letter postage. But be that as it may, a subordinate of the Secretary of the Treasury came before the Committee on Appropriations, and the Committee on Appropriations, acting upon information received, struck out the mandatory provision that this money should be transported by registered mail, and this bill leaves it in his discretion. He always exercises his discretion to send the money by express. I think that the Congress should command him by law to send this money by registered mail, all of it. It is true the statement is made that it costs the Government $20 a thousand.

It does not cost the Government anything. It is just like taking money out of one bank and depositing it to your credit in another bank across the street. The Postmaster-General says that the Treasury must pay $20 worth of stamps on a thousand dollars' worth of silver. Stamps do not cost the Government anything. We are simply transferring by this method $20 from the Treasury Department to the Post-Office Department, which does not cost the Government anything excepting the actual cost of preparing the stamps and the payment of the weight as that much mail matter over the railroads.

Now, Mr. Chairman, having brought this matter to the attention of the committee, I have discharged my duty, and the committee can do as it pleases.

Mr. SMITH of Iowa. Mr. Chairman, it is true that under a provision in the last sundry civil appropriation bill the Post-Office Department charged first-class rates upon money transmitted by mail. That was done because of the fact that the packages were sealed as a matter of security, and it was held that therefore the packages became first-class mail matter.

The Treasury Department saw fit to register this mail, so that a pound——

Mr. FINLEY. Will the gentleman yield?

Mr. SMITH of Iowa. I prefer to finish one statement first.

Mr. FINLEY. I wanted to answer the statement of the gentleman which he has just made.

Mr. SMITH of Iowa. Yes.

Mr. FINLEY. The gentleman said the reason for the ruling was that the package was sealed. Now, I ask, is not the penalty mail sent from the department—their letter mail—sealed up also?

Mr. SMITH of Iowa. Yes; ordinarily penalty letters are sealed, of course.

Mr. FINLEY. Now, does the gentleman see any reason for the rule, in view of that?

Mr. SMITH of Iowa. If the gentleman will let me finish, he will see how idle his question is. As a matter of fact, that made the postage itself 32 cents a pound, 2 cents an ounce for 16 ounces. Then, when the expense of registration was added, it made the total 40 cents a pound. It was found by the Treasury Department that it cost ten times as much under those circumstances to ship by mail as it did by express. If, as a matter of fact, nine-tenths of this money that was paid to the Post-Office Department was profit to the Post-Office Department, then there was neither gain nor loss to the Government. But the fact is known of all men that it costs about 7 to 8 cents a pound to handle the mails of the United States, so that only four-fifths of the amount charged by the Post-Office Department was profit above the actual cost of handling. So that, charging for this mail only at what it actually cost the Government, and not at what the Post-Office Department charged the Treasury Department, it cost us about twice as much to handle it as it would to handle it by express; and the committee, not believing it wise absolutely to compel the Treasury Department thus to waste the public money, have restored the language so as to leave it discretionary to handle it in the cheapest possible way. It seems to me that disposes of the suggestions made by the gentleman.

Mr. JOHNSON of South Carolina. Does the gentleman think that the cost to the Government of transporting mail per pound is more than the express companies charge?

Mr. SMITH of Iowa. I say that every particle of evidence that has been gathered in these innumerable investigations to find what it is costing the Government to handle the mail shows that it costs about 7 to 8 cents a pound.

Mr. HARDY. As I understand it, the payments for carrying mails are fixed by the weighing of the mails at a certain period of the year, the presumption being that the weight so ascertained holds throughout the year. If that be the case, would not the payment to the railways be just the same whether you send this money by mail or whether you do not send it by mail?

Mr. SMITH of Iowa. Well, the gentleman is in error in several respects.

Mr. HARDY. Unless you were sending it by mail at the time when you were making the weighings and did not send it by mail when you were not making the weighings.

Mr. SMITH of Iowa. As a matter of fact, the gentleman has fallen into a number of errors. First, there is only a quadrennial weighing of the mails in each district. In the second place, the expense of the Railway Mail Service is only about one-fourth or one-fifth of the cost of the postal service.

Mr. HARDY. The gentleman does not get my question.

Mr. SMITH of Iowa. I think I do.

Mr. HARDY. If there be a quadrennial weighing of the mail, that makes it all the more pertinent, it seems to me. You have your weight, and you ascertain what it costs per pound by dividing the actual weight——

Mr. SMITH of Iowa. The gentleman is in error. The Railway Mail Service, as I tried to explain to him, is only one-fourth or one-fifth of the total cost of the Post-Office Department. It runs along somewhere about $50,000,000 a year, whereas the total cost of the Post-Office Department is about $230,000,000 a year.

Mr. HARDY. Then in that proportion my question is pertinent.

Mr. SMITH of Iowa. Oh, it is true that if you get the mails weighed at just the right time to miss this kind of mail, and then ship it afterwards, you might make some apparent saving on the Railway Mail Service, so far as this was concerned.

Mr. HARDY. Are there not other costs or fixed charges that they have to carry?

Mr. SMITH of Iowa. Not at all; they are dependent upon the volume of business transacted, the most of them.

Mr. HARDY. You do not increase the number of officers and postmasters?

Mr. SMITH of Iowa. You increase the employees of the post-office according to the business.

Mr. HARDY. Does the gentleman mean to say that sending silver by mail would produce an increase in the number of employees?

Mr. SMITH of Iowa. It would produce its relative percentage of increase.

Mr. BEALL of Texas. Will the gentleman yield for a question?

Mr. SMITH of Iowa. Certainly.

Mr. BEALL of Texas. I understand that for a portion of the year the silver was carried by registered mail.

Mr. SMITH of Iowa. Yes.

Mr. BEALL of Texas. Can the gentleman point to a single item of increased cost imposed upon the Government by the carrying of this silver in addition to the cost of the registered packages?

Mr. SMITH of Iowa. It would depend upon what the gentleman means by costs. The Treasury Department paid 2 cents an ounce postage and registered the shipments.

Mr. BEALL of Texas. I mean during the time they carried it without having to pay postage.

Mr. SMITH of Iowa. They paid postage all the time when they sent it by mail.

Mr. BEALL of Texas. Could not this House make a provision for its being carried without the payment of postage?

Mr. SMITH of Iowa. It would cost the Government to handle it 7 or 8 cents a pound, and it is hauled by express for one-half of that.

Mr. BEALL of Texas. Would it make a single additional employee necessary in the Post-Office Department to carry every dollar of fractional silver by mail?

Mr. SMITH of Iowa. I can not say that any given portion of the mail causes a new employee, but the average cost is 7 or 8 cents a pound to the Post-Office Department, and it is to be presumed that this requires its ordinary share of labor, effort, and expense.

Mr. BEALL of Texas. The gentleman says it costs 8 cents a pound to carry it by mail.

Mr. SMITH of Iowa. It costs the Post-Office Department that.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SMITH of Iowa. I ask for five minutes more to answer the question of the gentleman.

The CHAIRMAN. The gentleman asks unanimous consent that his time be extended five minutes. Is there objection?

There was no objection.

Mr. BEALL of Texas. What would it cost the Government to carry it by express?

Mr. SMITH of Iowa. About one-half of that.

Mr. BEALL of Texas. Only 3 or 4 cents a pound?

Mr. SMITH of Iowa. That is all. It appears conclusively that it costs ten times as much to haul it by mail as by express. The rate paid the Post-Office Department is about five times the actual cost of the Government handling the mail, and therefore if they pay the Post-Office Department ten times as much as the express company charges the Government, and the Post-Office Department is paid five times the actual expense, of course the actual expense is double what they pay the express companies.

Mr. COX of Indiana. Will the gentleman yield?

Mr. SMITH of Iowa. Certainly.

Mr. COX of Indiana. How many express companies of the United States are now employed by the Government in transporting silver coin?

Mr. SMITH of Iowa. I presume all of them, more or less.

Mr. COX of Indiana. Does the gentleman say that they are all employed?

Mr. SMITH of Iowa. Shipments are made to all parts of the United States, and I presume they are all employed.

Mr. COX of Indiana. When the Government seeks to have its fractional coin transported by express companies, does it advertise for bids or submit it to competition?

Mr. SMITH of Iowa. I am not able to say as to that, but I do know that last year I was in favor of this provision for compulsory trial of shipment by mail, and was astounded and disgusted when I found out that it cost twice as much and required an appropriation ten times as great.

Mr. COX of Indiana. Can the gentleman tell us whether the Government enters into a new contract each year or whether it continues the old contract?

Mr. SMITH of Iowa. I can not tell the gentleman anything about that.

Mr. GAINES of Tennessee. Mr. Chairman, I have given some special attention to this matter and I propose to throw some light on the subject if I can in a few minutes. Last session of Congress Members will remember that a bill similar to this bill came in here appropriating "for transportation of fractional coin, $60,000." I offered an amendment to it, "that not less than $30,000 shall be used in transporting said coin by registered mail." In another place I offered an amendment as follows: That "minor coin," that the small coin, should be carried by "registered mail or otherwise;" and, third, that the Secretary of the Treasury should report to this session of Congress the cost for the necessary facilities to carry these silver coins by registered mail, insured or uninsured.

All three of these amendments were adopted and became law, and are law now and have been since June 30, 1908.

Mr. SMITH of Iowa. O Mr. Chairman, the gentleman is in error in one respect. "By registered mail or otherwise" has always been carried practically in this law.

Mr. GAINES of Tennessee. The gentleman will see that the paragraph did not have that language, but I caused it to be adopted. I have here the RECORD of May 1, 1908. "The amendment of the gentleman from Tennessee" was "transportation of minor coin by registered mail or otherwise." I had that put in the bill. I had three purposes in it——

Mr. TAWNEY. If the gentleman will permit me, that language "by registered mail or otherwise" has been carried in this sundry civil bill and has been the law for twenty years or more.

Mr. GAINES of Tennessee. I insist, with all due respect to the gentleman's word, that he is mistaken. My amendment was as I have stated it—transportation of minor coin "by registered mail or otherwise."

Mr. TAWNEY. The gentleman was simply reoffering as part of his amendment the then existing law.

Mr. GAINES of Tennessee. I was trying to get some competition with the express trust and trying to lessen the expense to the Treasury, and, above all, trying to get ahead of the express trust; but in the course of the year it seems that the express trust has got ahead of all of us. What did we provide last session in this bill, and what did the committee and Congress require of the Secretary of the Treasury? Here was one of my amendments which became law:

> That the Secretary of the Treasury shall report at the next session of Congress the necessary facilities and cost thereof for transporting such coin by registered mail and by registered mail insured.

That is, report to this session of Congress, and yet the Secretary has not said a word in his last report on this subject, and there is no more intelligence here on the subject than we had last session, save a short statement, a page and a half, by an employee of the Treasury Department, Mr. Daskam. I challenge the gentleman to show a line in the testimony elucidating this subject, except the testimony of Mr. Daskam, of the Treasury Department, a gentleman whom I have called on several times for information on this subject. The testimony before the distinguished gentleman's committee two years ago showed that there was only one express concern here to carry the money, and the contract was 40 years old. Here is what Mr. Daskam said two years ago to the committee:

> It is a long contract and is considered a very good one.
> It has been in existence for forty years.
> It commenced with the Adams, and the United States Express Company got in here through the Baltimore and Ohio Railroad.
> Then we advertised and there were only two bids—from the Adams and the United States Express Company—and they were practically the same, so we did not change the contract.

Then the chairman of the committee, Mr. TAWNEY, proceeded to argue the question with Mr. Daskam that there should be some provision made to carry this coin through the mail, whereupon Mr. Daskam went on to state that it was impractical, or something like that, though the plan had not been truly tested, and he so admitted.

Mr. TAWNEY. Will the gentleman permit an interruption?

Mr. GAINES of Tennessee. Yes; all I want is to get at the facts.

Mr. TAWNEY. If the gentleman will recall the fact, as other Members of the House do, I have no doubt he will remember that the Committee on Appropriations three or four years ago reported a provision in the sundry civil bill——

Mr. GAINES of Tennessee. I know you did, and I have it right here. Why did you do it?

Mr. TAWNEY. And it went out on a point of order.

Mr. GAINES of Tennessee. Why did you offer that provision?

Mr. TAWNEY. Now, without legislation on the subject——

Mr. GAINES of Tennessee. I understand that; it went out on a point of order.

Mr. TAWNEY. Without legislation on the subject the effect will be, just as Mr. Daskam says in the testimony before the committee, to increase the cost to the Government.

Mr. GAINES of Tennessee. Why did not Secretary Cortelyou report on this subject, as Congress required him to do?

Mr. SMITH of Iowa. Oh, the gentleman does not want to make an erroneous statement——

Mr. GAINES of Tennessee. I have read the amendment that was put in the law, and it is in the law now.

Mr. SMITH of Iowa. But if the gentleman will be kind enough to examine the law——

Mr. GAINES of Tennessee. Here is the amendment and law.

Mr. SMITH of Iowa. Just a moment. He will find that it requires that the report be made at the next session of Congress, which has not yet expired, and there is no requirement that he shall make it before a certain time.

Mr. GAINES of Tennessee. Why, this was on the 1st of May, 1908, when that was put in—last session.

Mr. SMITH of Iowa. But it is at the next session of Congress that he was to report.

Mr. GAINES of Tennessee. I read the law, and it reads "and report at the next session of Congress," which is this session of Congress. That is the law of the land now, and yet the report of the Secretary of the Treasury to this, the next session of Congress, is as silent as the grave on the subject.

Mr. TAWNEY. I will state for the information of the gentleman from Tennessee that the Secretary of the Treasury first reported to Congress——

Mr. GAINES of Tennessee. Not on this.

Mr. TAWNEY. In this respect. He has reported a deficit of $62,000 in this appropriation in consequence of the provision that the gentleman put in the last session.

Mr. GAINES of Tennessee. The gentleman knows there has been a deficit in this matter for years and years, and there is a deficit now. There was a deficit of $25,000 or $30,000 last year before and when I took up this matter, and the reason why the gentleman offered in his amendment three or four years ago——

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. GAINES of Tennessee. I ask for five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. GAINES of Tennessee. The reason why——

Mr. NORRIS. May I ask the gentleman a question?

Mr. GAINES of Tennessee. I decline to be interrupted until I get this matter straight. I have no idea but that the gentleman is with us on this reform and I do not want to do anybody an injustice. I venture to say the gentleman is on the right side.

Now, Mr. Chairman, here is an amendment that the gentleman from Minnesota [Mr. TAWNEY] offered, the very thing that I succeeded in part in getting done last session, except he put in some legislation in his amendment which I have here, and it, to my regret, went out on a point of order. That was several years ago. Later I came along and had this amendment put in this bill in the last session of Congress to cut down the expenses to the Government and create competition between the express companies and the Government, the one (the Government) carrying it by registered mail and the other (the express trust) carrying it by express. And, lo and behold, Mr. Daskam construed the language that I had put in the bill as meaning that he should "first" spend $30,000 by registered mail and then use the other $30,000 by sending by express!

The word "first" is not in the amendment. He was in error. If the gentleman will look at the debate, which I have here, he will see that I said I wanted to create competition between the express companies and the United States Government, and yet under the construction put upon it by Mr. Daskam, or the Secretary of the Treasury, he first spent $30,000 in sending by mail and then turned us over to our friends, the express trust. What first caught my eye was, I found we were in 1888, when we expressed about $26,000,000, paying the express company $1.88. In 1908 we expressed $62,905,740, and on that they charged us $2.45.

The express trust, in other words, the more work the Government gave it the higher it charged the American people, and hence it is we have this deficit and have had for years in hauling our coin. It was $1.88 when they hauled $26,000,000; when we hauled nearly $63,000,000 this trust charged us $2.45. Now, then, gentlemen, the chairman of the committee [Mr. TAWNEY] several years ago, to cure this evil, offered an amendment, which is as follows:

> This sum and the appropriation for contingent expenses, Independent Treasury, and for transportation of fractional silver coin shall be available only for transportation of notes, bonds, and other securities of the United States, and of minor coin, except when impracticable, by registered mail and not otherwise, and in such sums as the Secretary of the Treasury may determine and under such rules and conditions as may be agreed upon jointly by him and the Postmaster-General.

He started to bring about this reform, and because his amendment went out on a point of order it seems that he absolutely surrendered, Mr. Chairman, to the evil and stands here ready to pay its demands in the regular appropriation bill and the deficiency appropriation bill. Now, what has happened since June 30 last? Just before the law that Congress passed went into operation July 1 last General Meyer, the Postmaster-General, wrote to the Secretary of the Treasury—and for the first time, I want to say, has such an order been made—saying, in effect, "For every one of the bags of silver coin that you send through the mail you have got to pay letter postage" because, Mr. Chairman, the little bag of coin—4 pounds and upward—is sealed—sealed, if you please—with a little piece of lead, which I hold in my hand, and tagged "$50," and so on up. Before we put this reform limitation in the bill and made it law we were sending coin at 8 cents registration fee, but as soon as we undertook to get ahead of the express trust, why, General Meyer's order came in effect to the rescue of the express trust; and, unless some reform is made here to-day it turns us back again into the arms of the express trust, against which I protest in the name of law and justice.

We have carried a good deal of this coin for years by registered mail at 8 cents. Now they charge us $1.08. But what goes with this $1.08? The Secretary of the Treasury turns it into the Post-Office Department, instead of turning it into the lap of the express trust. Now, where does he put it? Will you turn a dollar and eight cents, the people's money, into the hands of the express trust, or will you turn it into the hands of the Post-Office Department, where you have a deficit of millions of dollars every year? That is the question, even admitting the truth of the proposition as it is now stated by the opposition—take a dollar and eight cents out of the Treasury's pocket and put the same dollar back into the Post-Office pocket, both pockets being the people's. That is it. Shall we take a dollar and eight cents out of the Treasury Department and put it into the mouth and the expanding stomach of the American express trust, or in the Post-Office Department? That is the whole proposition.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. GAINES of Tennessee. Now, Mr. Chairman, just a minute more. I say, Mr. Chairman, that this amendment ought to be adopted; that this reform should be continued and perfected. It should be continued, because it is in the right direction, and improve on it as we go along. Whether General Meyer's order was good law or not, it should be nullified by Congress in a prompt and proper way, and this reform had. The express package and mail bag go on the same train. Why can we not send coin in our mail bag rather than be robbed by any trust or person carrying it in his pouch or box? Congress can if it only would.

Mr. FINLEY. Mr. Chairman, I have listened to the argument of the gentleman from Iowa [Mr. SMITH]. I think the gentleman is in error when he states that it costs the United States Government 7 to 8 cents per pound to carry fractional silver coin. As a matter of fact, Mr. Chairman, the only cost to the Government is whenever in a shipment of fractional coin a quadrennial weighing period is passed through. That is practically the only cost. Everyone who knows anything about the postal service of the United States is well aware of the fact that the most profitable part of the postal system, comparatively speaking, is the registered mail.

Now, it is contended here that the Postmaster-General insists that because packages of silver are sealed, therefore such packages must be treated as first-class mail. Is there any reason for that proposition? Is there any logic in the contention that because a package—a government publication, a government shipment of mail—is sealed, that therefore it is first-class mail? I am informed that the average shipment of fractional coin is in comparatively small quantities. It is sealed, of course, as all first-class mail is sealed.

Is there any more reason for contending that fractional coins shipped through the mails cost 7 to 8 cents a pound than there is that the letters received by the gentleman from Iowa [Mr. SMITH] this morning, or some other morning, from the Postmaster-General, is first-class mail and costs from 7 to 8 cents a pound? Anyone who is informed as to the postal system of the United States knows, and knows well, that it is not the first-class mail, it is not the registered mail, that costs the people of the United States the vast and enormous sums that we pay out annually for the support of the postal system. Not at all. It is the second class and other classes of mail, and so on. I have not time here to go into it, but I insist that the Postmaster-General is wrong when he holds that because fractional silver coin is sealed it is first-class mail.

Mr. COX of Indiana. Will the gentleman yield for a question, in order that I may secure information on this point?

Mr. FINLEY. Certainly.

Mr. COX of Indiana. Does the gentleman contend or admit that under present postal laws the Postmaster-General would have the power to send fractional coin through the mail as third or fourth class matter if he so desired?

Mr. FINLEY. Now, Mr. Chairman, to answer that question fully would involve a discussion that is not open here for want of time. The man who can define the powers of the Postmaster-General of the United States I have not met. I have no doubt that he could do so if he wished.

Mr. GAINES of Tennessee. Will the gentleman yield?

Mr. FINLEY. Yes.

Mr. GAINES of Tennessee. I will state that not until we began this experiment last session, and not until last June, was this exaction ever made by the Postmaster-General. It all went at 8 cents.

Mr. FINLEY. So, Mr. Chairman, when you take into calculation the cost of the post-office service of the United States it means the whole cost, the post-office buildings, rented or owned by the Government, and so on.

Mr. SMITH of Iowa. Oh, no. Not the post-office buildings at all.

Mr. FINLEY. I think, Mr. Chairman, I am tolerably well informed of what I am talking.

Mr. SMITH of Iowa. The gentleman is in error about that.

Mr. FINLEY. I think I am not in error. In fact, I know I am not. It takes into consideration the whole cost of the service.

Mr. COX of Indiana. I take it that the gentleman is informed on the postal laws, and I frankly admit I am not. I would like to know whether or not, under the postal laws as they exist now, the Postmaster-General would have the power to send fractional current coin through the mail as third or fourth class mail matter.

Mr. FINLEY. I have no doubt about that; he could, Mr. Chairman. In fact, the order of the Postmaster-General is arbitrary and not governed by any law that I am aware of. It is arbitrary in requiring first-class rates on fractional silver coin shipped through the mails.

Mr. SMITH of Iowa. Will the gentleman permit me to ask him a question?

Mr. FINLEY. Certainly.

Mr. SMITH of Iowa. What possible difference would the rate make? The real question is, What does it cost the Government to handle this per pound through the mail, and what does it cost by express?

Mr. FINLEY. I stated that in the outset.

Mr. SABATH. I desire to ask the gentleman from Iowa a question on that score.

Mr. FINLEY. I yield to the gentleman.

Mr. SABATH. Why should it cost the Government as much to ship it by mail as through the express, inasmuch as we know that the express companies are charging exorbitant prices for hauling packages, when we have our own ways of hauling matter? Why should the Government pay double the amount to carry it by express that it costs to carry it by mail?

Mr. SMITH of Iowa. It only costs half as much to carry it by express as it does by mail; that is what I am trying to make plain.

Mr. SABATH. Why should it cost the Government as much by mail as it does by express?

Mr. FINLEY. Now, Mr. Chairman, with the permission of the committee I will proceed. The gentleman insists that it costs from 7 to 8 cents per pound to carry silver coin through the mail. The gentleman can not prove that contention. It is impossible to prove it. The whole postal service, maintenance and everything else, costs something like that. The gentleman knows as well as anybody knows that when the Government places something in the mail, to be carried through the mail, in the conduct of its own business, it does not cost an additional 7 or 8 cents a pound for every pound put in. Not at all.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FINLEY. I ask that I may have further time.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. JOHNSON of South Carolina. If this silver coin were sent through the mail, would it make it necessary for the Government to employ a single other man to do it?

Mr. FINLEY. No. Now, in further answer to that question, Mr. Chairman, I will say that in my opinion it would not cost the Government of the United States one-half of 1 cent a pound to send fractional silver coin through the mail. It can not. The only possible cost, as I have said, is this: Suppose it is registered; the Government will use a registered stamp. It can be sent under the penalty provision; and the only cost that could possibly arise that would add to the expense of the Government of the United States would be whenever the fractional silver coin passed through a section of country where the quadrennial weighing was in progress.

Mr. STAFFORD. Will the gentleman allow me to ask him a question?

Mr. FINLEY. Certainly.

Mr. STAFFORD. If the gentleman states it would not cost a half a cent a pound to carry fractional silver, may I ask him what was the motive that governed the Post-Office Committee in recommending to this House and having enacted into law the provision to withdraw freightable articles from the mail, and directing that they should be sent by freight?

Mr. FINLEY. I will answer the gentleman. I had something to do with that, and it was this: That theretofore they had been shipped as first-class mail, and first-class mail is higher than the average freight rates.

Mr. STAFFORD. But equipment, such as empty mail bags, had not been sent by first-class mail.

Mr. FINLEY. The gentleman knows that in the weighing season every pound of mail sent through the mail is weighed, and it is to save the Government expense in the weighing.

Mr. STAFFORD. But it did not only cost half a cent a pound, or we would not have made the order for the withdrawal of empty mail sacks and the like and compelled them to be sent by freight.

Mr. FINLEY. Oh, the gentleman is going off, and he knows the reason for that——

Mr. STAFFORD. The gentleman is strictly adhering to the position and is not going off.

Mr. FINLEY. The gentleman is off in giving the reason for that provision of law, with which I had something to do; and I do not know that the gentleman had to do with it. The reason for it was——

Mr. STAFFORD. The gentleman framed it himself.

Mr. FINLEY. The gentleman is wrong about that.

Mr. STAFFORD. I will leave that to the other members of the Post-Office Committee.

Mr. FINLEY. The gentleman is wrong about that. The reason was to save the Government the expense of paying in the weighing season for mail bags the same rate that it paid for first-class mail, as far as the railroads are concerned. That is the only reason.

Now, I repeat my statement that, so far as the cost to the Government of transporting silver coin is concerned, it would not exceed one-half of 1 cent per pound. The only case that could possibly arise would be when mail of that character passed through a section of the country where the quadrennial weighing was in progress. The gentleman from Wisconsin knows that.

Mr. STAFFORD. "The gentleman from Wisconsin" knows that any class of mail, whether third-class matter or second-class matter or first-class matter, costs more than one-half of 1 cent a pound to carry through the mail.

Mr. FINLEY. The gentleman knows that these shipments are from subtreasuries. The carriage is comparatively short, whereas general shipments of mail are from any point to any point within the jurisdiction of the United States. There is that difference. The gentleman knows that shipments of fractional silver would not go the distance that ordinary mail is carried. So, Mr. Chairman, there is no reason in the world why the amendment offered by the gentleman from South Carolina [Mr. JOHNSON] should not prevail. I repeat that the order of the Postmaster-General is arbitrary.

Mr. HARDY. Mr. Chairman, with all modesty, and largely because of the remark of the chairman of the subcommittee [Mr. SMITH of Iowa] as to my being in error in at least three out of four statements, I wish to make a little explanation and some further additions. The gentleman asks what difference did it make whether the Government charged in postage stamps 1 cent or 32 cents per pound for sending this fractional coin from one place to another; suggesting that if 32 cents per pound were paid in stamps, it was taking that money from the Treasury Department and giving it to the Post-Office Department, and only swapping pockets with the money, which is true; but it did make a difference, under the amendment offered by the gentleman from Tennessee [Mr. GAINES] last year, which required that half of the money appropriated for carrying this fractional coin should be used for carrying it by mail.

If it were charged for at 32 cents a pound, the mail carried very little of that silver, or carried very much less than it would at 1 cent. If it were carried at 1 cent per pound second-class rate, the mail would carry a great deal of the fractional coin, whereas if it were charged at 32 cents a pound, or first-class rate, the portion carried by mail would be much less than it would the other way, and there would be that much more to be carried by the express companies.

Now, to carry out the argument suggested by the gentleman from South Carolina [Mr. JOHNSON] and to show its truth, let

me say we make, as the gentleman from Iowa [Mr. SMITH] said, these weighings quadrennially. We weigh every year, but the country is divided into quarters, and in one section the weighing is this year and in another section the next year, in another section the next year, and so on, getting around in four years. When we weigh the mail at the beginning of a period, the weight fixed for that section of the country remains definitely determined, so far as our mail contracts with the railroads are concerned, for four years.

Then, if we add a little more weight by carrying this silver through the mail, it does not increase the expense to the Government one cent so far as the Railway Mail Service is concerned. If a few pounds of silver are carried, is that likely to add one employee? The postmaster at my town would handle a little more mail, as would the postmasters at other towns. If all this silver were carried in the mails, I do not believe there would be one additional rural carrier or one additional mail clerk or one additional postmaster in all the United States, or that there would be any necessity of raising wages. There would be no necessity of establishing additional post-offices, and the total addition to the postal expenses for carrying all this silver by mail would not exceed $10. If it is carried by the express companies, there is that much more money going into the coffers of the express companies. The very fact that we only weigh the mail once in four years for each section of the country, is an additional reason why, so far as the total cost is concerned, there would be no addition to the postal expenses by carrying this silver by mail. Whether it should be franked or should be paid for in stamps as second or first class matter, makes no difference in the real cost to the Government.

The only difference whether it goes first class or second class is that by sending it first class the amount required to be sent by mail under the Gaines amendment is much less than it would be if it was sent as second-class matter.

Now, it seems to me my propositions, instead of being all in error, were all correct, and the gentleman from South Carolina [Mr. JOHNSON] was about correct when he said that the added cost to this Government to carry this silver in the mail would not have been one-eighth or one-eighteenth of a cent per pound. Under the law as it is now here framed the express companies can be given the transportation of all this fractional coin at their top rates, you may be sure. If the amendment of the gentleman from South Carolina [Mr. JOHNSON] is adopted, all of it will have to be carried by mail, and to the very considerable saving of the Government, in my opinion. I therefore favor the amendment of the gentleman from South Carolina.

The CHAIRMAN. The question is on the amendment of the gentleman from South Carolina.

The question being taken, on a division (demanded by Mr. JOHNSON of South Carolina) there were—ayes 20, noes 31.

Mr. GAINES of Tennessee. No quorum, Mr. Chairman. [Cries of "Oh, No!" "No!"] I think for a handful of Members to pass upon this item is not fair.

Mr. MANN. Let me suggest to the gentleman that this side of the House voted one way and that side voted the other. That will be the result if we all come in.

Mr. GAINES of Tennessee. How did the gentleman from Illinois vote?

Mr. MANN. I voted with this side of the House.

Mr. GAINES of Tennessee. Well, I withdraw the point of no quorum, Mr. Chairman.

Mr. MANN. The gentleman from Tennessee is always a gentleman.

Mr. GAINES of Tennessee. All the same, I want to say that I am right and the other side is wrong. [Laughter.]

The CHAIRMAN. The ayes are 20 and the noes are 31, so the amendment is not agreed to.

Mr. GAINES of Tennessee. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Insert after the word "applicants," line 20, page 57, the following: "*Provided*, That no part of this appropriation shall be used in paying any express company, corporation, or concern, engaged in transportation contrary to an act entitled 'An act to protect trade and commerce against unlawful restraint and monopolies,' approved July 2, 1890."

Mr. GAINES of Tennessee. That is a proposition to check this express octopus, which has its hand on the throat of the Government. Everyone knows it. The railroad commission of Indiana, the State where lives the chairman [Mr. WATSON], has just reported against the unjust rates of this octopus, and it has gone into the federal courts and enjoined the commission. I know Judge Wood, of the commissioners, who wrote the opinion. He is a good man. If these companies are not violating the Sherman law, this will not apply or hurt. If it is, it will apply, and it is our duty to see that the law is faithfully executed. It is our duty to stand by the law. We have given money here to have it done, we have officers to have it done, and I say, Mr. Chairman, that we ought to have this octopus indicted and enjoined.

Now, if these companies are clean, it will not hurt them. If they are breaking the law, we ought to stop it. If it is breaking the law—and we know it is, for, according to the statement of Mr. Daskam, there is no competition. All of these companies are in combination in defiance of this law. I think they are called the "American Express Company," that runs about every express concern in the United States, and they not only hold up the Government, but every child, every widow, and every citizen in the land, whether he is exalted or humble; they hold them up for dimes, for quarters, for half dollars, for $2, and $5—in this case, at the rate of hundreds of thousands of dollars every year. I say that it is time that we make this law and clear our skirts. Let us do the best we can; angels can do no more.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee.

The question was taken; and on a division (demanded by Mr. GAINES of Tennessee) there were 17 ayes and 37 noes.

Mr. GAINES of Tennessee. Tellers, Mr. Chairman.

The CHAIRMAN. Tellers are demanded. All those in favor of tellers will rise. [After counting.] Thirteen gentlemen have risen—not a sufficient number.

Mr. GAINES of Tennessee. I demand the other side.

The CHAIRMAN. There is no other side, because it requires 20 votes.

Mr. GAINES of Tennessee. Did the Chair count 20?

The CHAIRMAN. The Chair counted 13.

Mr. GAINES of Tennessee. I think, Mr. Chairman, there was some confusion in the vote on this amendment, and I ask unanimous consent to have it retaken.

The CHAIRMAN. Which vote does the gentleman refer to, the demand for tellers?

Mr. GAINES of Tennessee. No; I ask unanimous consent that the vote on the amendment may be again taken.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that the vote on his amendment be again taken. Is there objection? [After a pause.] The Chair hears none.

The Clerk again reported the amendment.

The CHAIRMAN. The Chair will state the parliamentary situation. A vote was taken viva voce, and in the opinion of the Chair the noes had it. The gentleman demanded a division; and on a division there were 17 ayes and 37 noes. Thereupon the gentleman from Tennessee demanded tellers, and 13 gentlemen arose. The gentleman from Tennessee asked unanimous consent that the demand for tellers be taken over again.

Mr. GAINES of Tennessee. No; a vote on the amendment.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that the vote on the amendment be retaken. Is there objection? [After a pause.] The Chair hears none.

The question was again taken; and on a division (demanded by Mr. GAINES of Tennessee) there were 26 ayes and 31 noes.

So the amendment was lost.

Mr. SMITH of California. Mr. Chairman, I ask unanimous consent to return to page 30 of the bill that I may offer an amendment.

Mr. YOUNG. I shall object to that.

The CHAIRMAN. The gentleman asks unanimous consent to return to page 30 for the purpose of offering an amendment. Is there objection?

Mr. FITZGERALD. What is the amendment?

Mr. SMITH of California. I will explain. Page 30 refers to the appropriations for continuing the work upon public buildings. There was no item in that list for Riverside, Cal., and when the matter was brought to the attention of the House the chairman of the committee, the gentleman from Minnesota [Mr. TAWNEY], said that it was because the site had not been obtained up to January 15.

I now have a letter from the Supervising Architect, which I will send to the desk and have inserted into the RECORD, showing that through a mistake in his office that information was given to the committee, but that as a matter of fact the site was obtained on the 23d day of December, and his letter states that it is necessary to have some further appropriation to carry on the work. It seems to me that it is only proper that that city should be placed upon the same footing as other cities where the site was obtained prior to January 15.

Mr. TAWNEY. Mr. Chairman, I shall have to object. If I granted this request, I would have to do it in a dozen or 15 other cases. I intend to treat everybody alike.

Mr. SMITH of California. I assume the gentleman does, and I assume that what the gentleman has just stated is not correct; that is, that there are a dozen or 15 others whose sites were obtained before January 15.

Mr. TAWNEY. If the gentleman had been here on Monday when the appropriations for public buildings were under consideration, and could have noticed the interruptions and interrogations regarding this matter, he would agree with me that there are ten or a dozen or more, and the facts presented to the Committee on Appropriations by the Secretary of the Treasury and the Supervising Architect in regard to this item are that the site has not been selected.

Mr. SMITH of California. That is correct. He did make that statement to the committee; but he now gives me a letter, which I desire to have read, stating that he was in error, and that as a matter of truth this site was obtained on the 23d of December. Now, I submit to the chairman of the committee that I know that he wants to be fair to me, and therefore he can not consistently object to this, for it would merely put this city on the footing of all others whose sites were obtained before the 15th of January.

Mr. SMITH of Iowa. Mr. Chairman, I want to suggest to the gentleman that while it is true that this statement under which the committee acted was transmitted under date of January 15, the statement signed by Mr. Taylor was dated January 8, and referred to the state of these buildings on the 1st of December. While it is true that the gentleman's city may have acquired a site late in December, this committee acted upon this report. It rejected all where the site was not selected as shown by this report. There were numerous others selected between the 1st and the 23d of December, and certainly between the 1st of December and this time; and to reopen this would mean to reopen the whole thing and change the whole rule upon which the bill has been prepared and to allow one and not allow others.

Mr. SMITH of California. Suppose we consider the great importance of the rule of the gentleman's committee. Here is a letter from the architect saying that it is essential to have this appropriation to carry on that work. It seems to me that some passing rule of the Committee on Appropriations ought not to stand in the way of this matter.

Mr. TAWNEY. I submit that debate is not in order, Mr. Chairman. We have passed these items. If we go back in one case, we will have to go back in other cases, and we will never complete the consideration of the bill. I shall therefore have to object.

Mr. BARTLETT of Georgia. Mr. Chairman, I want to say to the gentleman from California and to the gentleman from Minnesota that if consent is given in this case, I shall insist that it be given upon the condition that my case be taken up. The gentleman knows that it is as meritorious as that of the gentleman from California.

Mr. SMITH of California. This rule is not so sacred, surely, that we need to close the door against transacting the public business in a proper way in order to not violate the rule.

Mr. TAWNEY. This part of the bill has been disposed of, Mr. Chairman.

Mr. BARTLETT of Georgia. Whenever that proposition is insisted upon, I am going to insist upon mine coming in.

The CHAIRMAN. The gentleman from California asks unanimous consent to return to page 30 for the purpose of offering an amendment. Is there objection?

Mr. TAWNEY. Mr. Chairman, I object.

Mr. SMITH of California. Mr. Chairman, I ask unanimous consent to place in the RECORD a letter which I have received from the Supervising Architect of the Treasury.

The CHAIRMAN. The gentleman from California asks unanimous consent to print the letter to which he refers. Is there objection? [After a pause.] The Chair hears none.

The letter is as follows:

TREASURY DEPARTMENT,
Washington, February 24, 1909.

Hon. SYLVESTER C. SMITH,
House of Representatives, Washington, D. C.

SIR: Referring to statements in the hearings before the subcommittee of the House Committee on Appropriations and to the statements on page 89 in connection with the post-office at Riverside, Cal., that "the site has not yet been selected but one will probably be in the very near future and in order to carry on the work it will be necessary to appropriate of the balance $50,000," I have the honor to advise you that the data for these hearings was obtained on or about December 20, 1908, three days before the selection of the site at Riverside, and as the site has been selected it will be absolutely necessary that the $50,000 be appropriated in order not to delay the construction of the building.

Respectfully,

J. K. TAYLOR,
Supervising Architect.

The Clerk read as follows:

Transportation of minor coin: For transportation of minor coin, by registered mail or otherwise, $25,000; and in expending this sum the Secretary of the Treasury is authorized and directed to transport from the Treasury or subtreasuries, free of charge, minor coin when requested to do so: *Provided*, That an equal amount in coin or currency shall have been deposited in the Treasury or such subtreasuries by the applicant or applicants. And the Secretary of the Treasury shall report to Congress the cost arising under this appropriation.

Mr. SMITH of California. Mr. Chairman, I move to strike out the last word. I desire to get my mind clear on this matter and also the record of the House. Was it not the statement of the chairman of the Committee on Appropriations on Monday when this subject was brought to the attention of the House that all buildings were to be provided for if sites had been obtained or acquired before the 15th of January?

Mr. TAWNEY. I said, Mr. Chairman, when the question arose on Monday, that in the preparation of the appropriation for public buildings the committee adopted the rule of recommending the amount estimated in each individual case where the site had been selected at the time of the submission of that report.

Mr. SMITH of California. Did not the gentleman say the 15th of January?

Mr. TAWNEY. At the time of the submission of this report, which was January 15, we adopted the rule. And in justification of the action of the committee, the Supervising Architect has since informed the committee that the appropriations now made for the construction of buildings on sites other than those selected prior to the submission of his estimates could not be expended during the fiscal year 1910, and that there was, therefore, no necessity for carrying any further appropriations.

Mr. SMITH of California. But in this letter which I have just presented, and which will appear in the RECORD, he states that it is absolutely necessary to have this appropriation in order to continue work on that project.

Mr. FITZGERALD. Will the gentleman yield?

Mr. SMITH of California. Certainly.

Mr. FITZGERALD. Was that letter addressed to the gentleman from California or to the chairman of the Committee on Appropriations?

Mr. SMITH of California. It is addressed to the "gentleman from California."

Mr. FITZGERALD. If it is so imperative that this appropriation should be made, does not the gentleman think the Supervising Architect would have called the matter personally to the attention of the committee charged with the duty of making these appropriations?

Mr. SMITH of California. Possibly he might not be worried if the work stood still. Now, the circumstances were these——

Mr. FITZGERALD. Is not this a fact, that it was the activity of the gentleman from California which secured the writing of this letter and the insisting on the appropriation at this time?

Mr. SMITH of California. You are half right and half wrong. Now, I will put you altogether right. This office, of course, of the Supervising Architect was closed on Monday, when this subject was raised, and we could not communicate with him. I do not mind saying, parenthetically, that I was down receiving the fleet on that day [laughter], but my colleague [Mr. ENGLEBRIGHT] is always on deck, and he brought the matter to the attention of the House, and afterwards I read it in the RECORD.

This morning I went to the Treasury Department and asked Mr. Taylor to give me the date at which that site was acquired, and when he said December 23, why, there is no reason why this project should not be in the bill.

Mr. MANN. Will the gentleman yield for a question?

Mr. SMITH of California. In one minute, please. I asked him if he would give me, in writing, a statement, and he gave me the letter which I brought with me. I will now yield to the gentleman from Illinois.

Mr. MANN. Is not the entire difficulty caused by the misunderstanding of what the gentleman from Minnesota intended to say? Did not he say sites selected prior to January 15——

Mr. SMITH of California. That is what I read.

Mr. MANN. And evidently he now intended to say sites selected prior to the preparation of the report which the committee received January 15, which related to December 1. If that be correct, and there are many others in the same fix, does not the gentleman think his case should go like the rest?

Mr. SMITH of California. I think my case has this further merit, that at the time the Architect of the Treasury prepared his report and submitted it the site in this case had been selected, and he overlooked the matter.

Mr. MANN. But they state the report was prepared on December 1.

Mr. SMITH of California. Oh, no; it does not. The architect in his letter to me to-day, which I have placed in the RECORD, says that the data on which he made this report were obtained from the law department on the 20th of December, which was three days before the Riverside site had been secured. But he makes his showing to the committee, if I am not mistaken, on the 8th of January, and he either had not been advised that the Riverside matter had not been closed between the 20th of December and the 8th of January or else he over looked the matter.

Mr. MANN. Does the gentleman think his site was omitted because of an error in the architect's office——

Mr. SMITH of California. Yes, sir.

Mr. MANN (continuing). Or because the site had not been selected up to the time that the report dated back to?

Mr. SMITH of California. This matter, as was made clear to me by Mr. Taylor, was an oversight. In some way this matter had not been brought to his attention when he received information from the law department on December 23.

Mr. TAWNEY. Mr. Chairman, I desire to say just one word in reply to the gentleman from California [Mr. SMITH]. The authorization for the site and, in this case, the building, was carried in the last public-building bill. The amount heretofore appropriated is $30,000—that is, for the acquisition of the site and to begin the work of construction.

Under this authority not only the site can be selected, but the department can go on and prepare plans and specifications for the building, the appropriation for which is carried in this bill under the head of "General expenses," and enter into a contract for the construction of the building. There is now available $30,000 for that purpose. I am satisfied that, notwithstanding the exceeding anxiety of the gentleman from California, there is now appropriated more money for his building than will be expended in the fiscal year 1910.

I therefore insist upon my objection, and ask for the regular order.

Mr. SMITH of California. Mr. Chairman, I am debating the motion before the House.

The CHAIRMAN (Mr. BENNET of New York in the chair). For what purpose does the gentleman rise?

Mr. SMITH of California. To further debate the question before the House.

The CHAIRMAN. Debate on this particular amendment has been exhausted.

Mr. SMITH of California. I think I have a right to reply, have I not? I made the motion. I wish to reply to the gentleman from Minnesota [Mr. TAWNEY].

The CHAIRMAN. The gentleman from Minnesota exhausted debate in opposition to the amendment.

Mr. SMITH of California. Mr. Chairman, I move to strike out the last two words.

Mr. SHERLEY. Mr. Chairman, I demand the regular order, and ask that the gentleman shall speak to the amendment before the House. This matter has been fully considered, and it is late enough to proceed with the consideration of the bill.

Mr. SMITH of California. I will talk to the question before the House. The question before the House is the Riverside appropriation [laughter] under a fictitious motion.

The CHAIRMAN. The gentleman from California [Mr. SMITH] moves to amend the motion previously made by him by striking out the last two words.

Mr. SHERLEY. Now, Mr. Chairman, I make the point——

Mr. SMITH of California. I am coming to the main question——

The CHAIRMAN. The gentleman from California will suspend. The gentleman from Kentucky [Mr. SHERLEY] raises the point of order that the gentleman from California is not speaking to the amendment. The Chair sustains the point of order.

Mr. SMITH of California. I do not know how the gentleman can tell that when I had not finished one sentence. I would like to have the permission of the gentleman from Kentucky [Mr. SHERLEY] to state only two sentences in reply to the chairman as to the availability of this fund.

The CHAIRMAN. The gentleman from California [Mr. SMITH] asks unanimous consent to proceed for two minutes.

Mr. SHERLEY. Two sentences.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. TAWNEY. I prefer to take the two sentences.

Mr. SMITH of California. Of course, whenever one comes to the end of a sentence he lets his voice fall.

A MEMBER. One sentence.

Mr. SMITH of California. Mr. Chairman, the site at Riverside is to cost about thirty to thirty-five thousand dollars, of which the citizens contribute fifteen thousand and the Government twenty thousand, and therefore there will only be $12,000 left to continue the work during the fiscal year; and I respectfully submit that that is not enough. Now, that is one sentence. I will take credit for the other sentence.

The CHAIRMAN. The gentleman from California [Mr. SMITH] withdraws the pro forma amendment, and the Clerk will read.

Mr. GAINES of Tennessee. Just a moment. I wish to make a statement. I was out of the Chamber on some important work, and when I came in I believed the committee had these words under consideration, "by registered mail or otherwise." I labored under that impression for some time, and during that time I stated that these words "by registered mail or otherwise" were inserted last session as a result of my amendment. That is true as to "minor" coin, but not as to "silver" coin, which we were considering when I entered the Chamber and made that statement. The sundry civil bill of last session contained these words:

Transportation of minor coin, $25,000.

That was reported in the bill, and I had the words "by registered mail or otherwise" added.

The item as to the transportation of "silver" coin was in these words:

For transportation of silver coin, $60,000, by registered mail or otherwise.

And I had that amended by these words:

Provided, That not less than one-half of this appropriation shall be used in transporting said coin by registered mail.

Now, then, in the RECORD of May 1, 1908, Sixtieth Congress, first session, I offered another amendment, and it was adopted. It reads:

Insert, on page 23, line 21, after the word "appropriations," "and report"—

That is, the Secretary of Treasury—

"at the next session of Congress the necessary facilities and cost thereof for transporting such coin by registered mail and by registered mail insured.

"The question was taken. The amendment was adopted"—

says the RECORD.

I will insert in the RECORD the law as we made it and as it reads to-day, as follows:

[Sixtieth Congress, first session, Cg. 200, 1908.]

CHAP. 200. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1909, and for other purposes. (May 27, 1908. H. R. 21260. Public, No. 141.)

Transportation of fractional silver coin: For transportation of fractional silver coin, by registered mail or otherwise, $60,000; and in expending this sum the Secretary of the Treasury is authorized and directed to transport from the Treasury or subtreasuries, free of charge, fractional silver coin when requested to do so: *Provided*, That an equal amount in coin or currency shall have been deposited in the Treasury or such subtreasuries by the applicant or applicants: *Provided*, That not less than one-half of this appropriation shall be used in transporting said coin by registered mail. And the Secretary of the Treasury shall report to Congress the cost arising under this appropriation, and report at the next session of Congress the necessary facilities and the cost thereof for transporting said coin by registered mail, and by registered mail insured.

Transportation of minor coin: For transportation of minor coin, by registered mail or otherwise, $25,000; and in expending this sum the Secretary of the Treasury is authorized and directed to transport from the Treasury or subtreasuries, free of charge, minor coin when requested to do so: *Provided*, That an equal amount in coin or currency shall have been deposited in the Treasury or such subtreasuries by the applicant or applicants. And the Secretary of the Treasury shall report to Congress the cost arising under this appropriation.

Now, then, the gentleman from Iowa stated a few minutes ago that the amendment requiring the Secretary of the Treasury to make report to this Congress as to the cost of facilities, and so forth, for sending this money through the mails did not require the Secretary of the Treasury to report to this session of Congress. I say to him that he is mistaken about it.

Mr. Chairman, the Secretary of the Treasury was required to make a report as to this matter at this session of Congress, "the next session" of this, the Sixtieth Congress; and the Secretary of the Treasury has not made any report to this, the "next session," of Congress.

The Clerk read as follows:

Contingent expenses, independent treasury: For contingent expenses under the requirements of section 3653 of the Revised Statutes of the United States, for the collection, safe-keeping, transfer, and disbursement of the public money, and for transportation of notes, bonds, and other securities of the United States, $260,000.

Mr. GAINES of Tennessee. Mr. Chairman, I want to ask the gentleman from Minnesota [Mr. TAWNEY] why, several years ago, he offered an amendment requiring this money to be sent by registered mail?

Mr. TAWNEY. What money is the gentleman talking about?

Mr. GAINES of Tennessee. Money and bonds, and so forth, and so on, provided for under this head of "Contingent expenses, independent treasury."

Mr. TAWNEY. I will say to the gentleman from Tennessee that when that was proposed it was coupled with a proposition requiring the Secretary of the Treasury and the Postmaster-General to make rules and regulations under which this money could be transported through the mails by registered mail, so that they would not be required to limit the packages of money to the size of the packages the regulations now require.

Mr. GAINES of Tennessee. Now, why did you want it sent through the mail?

Mr. TAWNEY. For the purpose, and believing it could be sent cheaper than it could be by express.

Mr. GAINES of Tennessee. What information did the gentleman have that it could be sent cheaper?

Mr. TAWNEY. I had information to the effect and believed it could be sent cheaper through the mails, provided that suitable regulations could be effected between the Treasury Department and the Postmaster-General.

Mr. GAINES of Tennessee. In other words, gentlemen, the gentleman at that time believed the express companies were charging us oppressive rates.

Mr. TAWNEY. I do not know that I did.

Mr. GAINES of Tennessee. Then why did you want to change from the express companies to the registered mail?

Mr. TAWNEY. I wanted that alternative, and I submit these alternative propositions should always be carried in the law as a check upon the express companies.

Mr. GAINES of Tennessee. There was no alternative.

Mr. TAWNEY. Yes, there was; and there has been for the last ten years.

Mr. GAINES of Tennessee. "By registered mail and not otherwise," your amendment read. The gentleman started in with that reform trying to get a revision of the law, and because the amendment went out on a mere chinquapin point he stopped there. It went out on a point of order, and he has made no further steps. I think it should be made the law. I am sorry it went out, and I hope it will be made the law yet, or something like it. I dislike exceedingly that the chairman of the committee, when he saw three or four years ago that these express companies were holding up the Government and charging an excessive rate, should not have sought to take it absolutely away from the express trust and turn it absolutely over to the registered-mail system of the Government of the United States.

Yet under an amendment in the law we put in this bill the Secretary of the Treasury thought it was so little—that there was nothing in it—that he refused to obey the mandate of Congress that he report to Congress so that we might have these things before us and act intelligently.

The gentleman himself said it should be done. The gentleman from Iowa [Mr. SMITH] agreed to the amendment in the last session, thinking it should be done, and putting in this request for the Secretary to do this; and yet the Secretary turned an unwilling hand and a deaf ear to it, although he is sworn to enforce and uphold the laws of the country.

The Clerk read as follows:

Special witness of destruction of United States securities: For pay of the representative of the public on the committee to witness the destruction by maceration of government securities, at $5 per day while actually employed, $1,565.

Mr. PERKINS. Mr. Chairman, I reserve a point of order on that paragraph.

Mr. MANN. I was trying to get the floor to ask a question about the previous item, this distinctive paper for United States securities. Having become somewhat interested in the subject of paper, I should like to enlarge my knowledge. Can the gentleman tell us how this paper is secured, how many bids are received for it, and what is paid for it, and who furnishes it?

Mr. TAWNEY. There is only one concern engaged in the manufacture of distinctive paper for the government securities, and the manufacture of the paper is carried on under the supervision of the officials of the Treasury Department. The concern which manufactures the paper is located somewhere in the State of Massachusetts.

Mr. MANN. I suppose there could be only one concern making distinctive paper for United States securities, unless the Government should let the contract to more than one concern; but how does this concern get the business?

Mr. TAWNEY. I am not able to state. I do not know that there was any testimony presented to the committee in regard to whether the contract is let by competition; but it is understood that this distinctive paper is manufactured under a patented or secret process, and it is only those who own the patent or secret process for the manufacture of the paper who can make it and do make it. Whether the concern in Massachusetts is a subsidiary concern of another concern I do not know.

Mr. MANN. If it be true that this $310,000 goes for the purchase of paper made under a patented process, there is all the more reason for information upon the subject. The making of distinctive paper does not require any patented process.

Whether the making of this particular paper requires a patented process depends wholly on whether the Government requires paper made by that process. Distinctive paper for government securities has been made for many years, and any fairly well-equipped paper mill can make distinctive paper with no difficulty at all. If there is any information upon this subject, it seems to me it would be highly interesting to have it.

Mr. PARSONS. In the absence of the gentleman from Massachusetts [Mr. LAWRENCE] in whose district this paper mill is located, I will say that I think some years ago the buildings were constructed there in accordance with the request of the Government.

Mr. MANN. I think, so far as information has been imparted, I know more than any of the gentlemen who have spoken. I think I could tell them who is making the paper.

Mr. DOUGLAS. How many United States soldiers march up and down in front of the mill?

Mr. GAINES of Tennessee. I should like to know who makes the paper.

Mr. MANN. Oh, my time has expired.

Mr. GAINES of Tennessee. I move to strike out the last word, Mr. Chairman.

Mr. HEPBURN. I should like to inquire of the gentleman from Illinois if this was not a subject of inquiry on the part of the wood-pulp committee that has recently been investigating the world with regard to pulp and paper; and if not, I want to know why the gentleman did not extend his inquiries to this very important subject? He evidently regards it as of great importance.

Mr. MANN. We did extend our inquiries to the subject, but we received no information from the manufacturers.

Mr. GAINES of Tennessee. Who is furnishing this paper to the Government?

Mr. MANN. Mr. Chairman, I decline to be put on the witness stand by the gentleman from Tennessee. I leave questions of that sort, relating to the sundry civil bill, to the distinguished gentlemen of the Committee on Appropriations, and I refer my friend from Tennessee to the gentleman from Minnesota [Mr. TAWNEY], or the gentleman from New York [Mr. FITZGERALD], or the gentleman from Kentucky [Mr. SHERLEY], who undoubtedly can give him the information required.

Mr. MURDOCK. I move to strike out the last word.

The CHAIRMAN. The gentleman from Tennessee [Mr. GAINES] has the floor.

Mr. GAINES of Tennessee. If the gentleman can obtain the information, I yield my time to him.

The CHAIRMAN. The Chair will call the attention of the committee to the fact that this is proceeding by unanimous consent, as the paragraph in question has been passed, and the gentleman from New York [Mr. PERKINS] has reserved a point of order to the paragraph which is really before the committee.

Mr. MURDOCK. I thought the Chairman recognized the gentleman from Illinois [Mr. MANN] on the preceding paragraph.

Mr. TAWNEY. I demand the regular order, Mr. Chairman.

Mr. MURDOCK. I want to ask a question that is pertinent. I ask unanimous consent that I may ask it on this paragraph.

The CHAIRMAN. The gentleman from Kansas asks unanimous consent to be recognized for an inquiry. Is there objection?

There was no objection.

Mr. MURDOCK. I would like to ask the gentleman in charge of the bill if this is the only distinctive paper the United States buys?

Mr. TAWNEY. We buy some for internal-revenue stamps.

Mr. BONYNGE. And for naturalization certificates.

Mr. MURDOCK. Is there any necessity for distinctive paper for revenue and postage stamps?

Mr. TAWNEY. I do not know whether there is or not. They are not using any for postage stamps, but they are using it for revenue stamps. It is purely a matter of administration, and I do not know why they make the distinction.

Mr. MURDOCK. Does one factory furnish all varieties of distinctive paper to the Government?

Mr. TAWNEY. I do not think it does, although I am not certain whether it does or not.

Mr. PERKINS. Now, Mr. Chairman, in reference to the point of order I made against the section. It is not perhaps a matter of vast importance, but still in these days when the

appropriation committees are so earnest, seeking to reduce expenses to the Government as far as can be, I desire to call attention to this entirely useless gentleman, not authorized by law, who is paid $1,500 for superintending certain work of government employees. Last year the same point of order was made, and the point of order was sustained, because there is no authority in law for his position. I suppose it went back by action of the Senate, as pretty near all offices not authorized by law do get back.

Apparently the chairman of the committee in charge of the bill was not, perhaps, strong in his resistance to the restoration of the office that has no legal authority, and, as it seems to me from the debate we had about the same time last year, was entirely without utility. I do not care to make captious points.

Mr. TAWNEY. I ask that the Clerk may read the following statement in regard to the work of the committee.

The Clerk read as follows:

The "committee for destruction of United States currency" consists of clerks detailed from the offices of the Secretary, Treasurer, and Register of the Treasury, and a witness on behalf of the people, who is not otherwise connected with the Treasury Department.

The destruction committee receives daily from the offices of the Secretary and Register such United States notes, Treasury notes, and silver and gold certificates as have been prepared for destruction by being counted several times and canceled and assorted according to denominations in various offices. The notes are first counted in the office of the Treasurer, where they are punched, cut lengthwise into halves, and tied up into bundles of 400 notes. When properly labeled and recorded, the upper halves are sent to the Register's office and the lower halves to the Secretary for verification of the Treasurer's count. If the Treasurer's count be found correct, and the separate count of the upper and lower halves agree, the notes are again tied up in properly labeled bundles, which are turned over to the destruction committee, with descriptive schedules, to be destroyed by maceration.

The destruction committee meets every day and checks the bundles of money by the schedules which show the denominations and amounts. When found correct the bundles are packed in boxes, each having a capacity of 30 bundles. The boxes are locked and taken to the Bureau of Engraving and Printing under the supervision of the committee, where the money is weighed and deposited in one or more macerators containing certain proportions of soda ash, lime, and water. The four macerators are cylinders 10 feet by 5, having a capacity of 1,800 pounds each. At least two cylinders are charged daily, and often three. The nominal value of the paper currency taken to the bureau macerators each day varies from one to four million dollars, often many millions more. The weight, from 12 to 4,000 pounds of paper.

The committee also destroys, one day each week, a large amount of unused paper currency in uncut sheets; sheets of money spoiled in printing or condemned for defects of any kind, and thousands of sheets of defective postage stamps and condemned internal-revenue stamps. When internal-revenue stamps are to be destroyed a regularly designated representative of the commissioner assists the destruction committee in comparing and checking the bundles and charging the macerator.

The notes of failed and liquidating banks are counted and canceled in a division of the Office of the Comptroller of the Currency and destroyed in a macerator in the sub-basement of the Treasury in the presence of the regular destruction committee and a representative of the Comptroller of the Currency.

The destruction committee makes a trip to the bureau every day for the special purpose of opening the macerators charged two days previous and examining the pulp. The special witness takes active part in all of the operations of the destruction committee.

From 1864 to 1874 condemned currency was burned in the presence of the destruction committee on the White Lot, or other convenient place. To avoid loss and other objections to that method of destruction it was provided by law in 1874 that maceration only should be resorted to. Now the pulp is put up in bales of 250 pounds and the Government derives revenue therefrom. For years the contractor took the whole output at $40.50 per ton. Last month about 150,000 pounds were turned out.

By authority of Congress, about twenty-five years ago a special witness, not otherwise connected with the Treasury Department, was added to the destruction committee as an additional precaution against mistakes or loss from any cause.

Mr. PERKINS. Mr. Chairman, the reading of that statement only confirms me in my statement that I made last year. This work is done with the greatest of care by a large number of competent and trusted government officials, and to have a representative of the people watch these operations, at an expense of $1,500 a year, is no more needed than to have a representative of the people watch any other work done by the government officials, and therefore I must insist on the point of order, in order that this entirely useless official may cease, to the extent of $1,500 a year, to be a burden on the Treasury.

Mr. TAWNEY. Mr. Chairman, I have nothing to say in opposition to the point of order.

The CHAIRMAN. The Chair sustains the point of order, and the Clerk will read.

The Clerk read as follows:

Pay of assistant custodians and janitors: For pay of assistant custodians and janitors, including all personal services for the care of all public buildings under control of the Treasury Department outside of the District of Columbia, and washing towels, sprinkling streets, and removing rubbish, in connection with said buildings, exclusive of marine hospitals, mints, branch mints, and assay offices, $1,902,000; and the Secretary of the Treasury shall so apportion this sum as to prevent a deficiency therein.

Mr. PERKINS. Mr. Chairman, I move to strike out the last word. I want to make an inquiry. The increasing expense of the Government is of great interest to all, and most of all to the Appropriations Committee. I have no doubt every effort is made to keep it down as far as may be. I have looked up this item, because it seemed to me that here was an entirely typical case where no special increase would take place. Of course there would be an increase in growth of business every year, but more than that there should not be. Here is an item which seems to me an entirely typical, an ordinary, item for washing towels, sprinkling streets, and removing rubbish in connection with buildings; and it would seem that there would be no large increase in twelve months in such a class of items as that. This item carries $1,902,000, and the last bill carried $1,600,000. Where there would seem to be no special reason for such an increase, there was an increase in the appropriation of 13 per cent, which seems to me so large that I want to ask the gentleman in charge of the bill what reason there is for the growth in one year of that very large percentage on what apparently is an entirely normal item?

Mr. TAWNEY. I will say that there are 68 new buildings that will come into commission during the next fiscal year, for which all of this service must be provided. There is no increase in salary. Under this provision the service in all of the existing public buildings is provided for—that is, for janitors, assistant custodians, and so forth.

Mr. PERKINS. But 68 additional buildings could not warrant an increase of 13 per cent on all the buildings now cared for by the Government.

Mr. TAWNEY. That is the reason for the increase in the appropriation.

Mr. PERKINS. It would seem that there must be an increase in the amount allowed in the number of custodians and janitors.

Mr. TAWNEY. If the gentleman will turn to the hearings, on page 103, I think he will find the matter fully explained.

Mr. PERKINS. The expense of custodians, washing towels, and such things for the 68 additional buildings would not, I should think, be $250,000.

Mr. TAWNEY. Well, the buildings that this appropriation provides service for have cost the Government in the neighborhood of $200,000,000.

Mr. PERKINS. That is, all the buildings.

Mr. TAWNEY. Yes; and this appropriation provides all the service for all the buildings.

Mr. PERKINS. The only question that struck me was the large ratio of increase in one year. I am not familiar enough with the subject to criticise the total.

Mr. TAWNEY. I will say, Mr. Chairman, that, in my judgment, after having investigated this item a number of times, there is no class of public service so poorly paid in connection with public buildings or service in public buildings as the assistant custodians and janitors and laborers employed in these buildings.

Mr. DRISCOLL. That is right.

Mr. TAWNEY. And the proposed increase in this appropriation is merely to take care of the new buildings that come into commission during this fiscal year. I can not say anything more, and that service will be provided. The gentleman knows, if he knows anything about public buildings, and he does, that the number of employees that are paid out of this appropriation for the several public buildings are not excessive at all, and when the head of the department, the person who is charged with the responsibility of administering this appropriation, says to the committee that he intends to continue the service in the new buildings on the same basis of pay and also as to the number of employees, and that this increase is merely to meet the necessary increase on account of the increase in the number of buildings, there is nothing further that I can see that the committee can do.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PERKINS. I ask unanimous consent to proceed for one minute more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. TAWNEY. Mr. Chairman, before the gentleman proceeds I will state that my colleague, Mr. SMITH, suggests that this is only an average of $3,000 for all public buildings that are coming into commission in the next fiscal year.

Mr. PERKINS. I am not at all in a position to criticise. I was, however, impressed by the very large ratio of increase of 13 per cent. That is a large ratio of increase in one year. Of course every year new buildings will be coming in.

Mr. TAWNEY. Yes; there are some 300 new buildings now authorized that will be coming in. This appropriation will increase rapidly every year for a number of years, until the pub-

lic buildings now authorized are constructed and the service is fully installed.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

Furniture and repairs of furniture: For furniture and repairs of same, carpets, and gas and electric-light fixtures for all public buildings, exclusive of marine hospitals, mints, branch mints, and assay offices, under the control of the Treasury Department, and for furniture, carpets, gas and electric-light fixtures for new buildings, exclusive of personal services, except for work done by contract, $900,000, of which sum not more than $300,000 may be expended in other than new buildings. And all furniture now owned by the United States in other public buildings and in buildings rented by the United States shall be used, so far as practicable, whether it corresponds with the present regulation plan for furniture or not.

Mr. MURDOCK. Mr. Chairman, I move to strike out the last word, and I do so for the purpose of calling the attention of the committee to the practice in the department, as I understand it, of estimating for the cost of furniture in new public buildings. To my mind it is not only absurd, but ridiculous and impractical. It seems that when this Government has a new building to furnish, the cubic contents of the building are taken, expressed in feet, and that the furniture is then given on that basis. Now, if there is anyone here who can tell me what relation the cubic contents of the basement of this building bears to the cost of the seat that I am occupying, I will be much obliged to him. I suppose it is an old practice, based on red tape.

Mr. FITZGERALD. Mr. Chairman, I will state that that inquiry has been made of the officer who originated the scheme, and the committee elicited no more information than the gentleman has been able to elicit by his question in this House.

Mr. MURDOCK. Can the gentleman give me any information?

Mr. FITZGERALD. Absolutely none. I agree with him that the plan is without any reason. It is simply the plan followed, and the best they seem to be able to do in that office.

Mr. MURDOCK. Does the gentleman think it is the best plan that could be followed?

Mr. FITZGERALD. No; I think some one should be able to investigate and ascertain what furniture would be required and how much it would cost, but that is not done.

Mr. MURDOCK. Does not the gentleman believe that the superficial area, the floor plan, would have something to do with the furnishing of a building, and can the gentleman say in any way how the height of a ceiling would enter into the cost of furniture?

Mr. FITZGERALD. I can not. I will say, however, that if we take two buildings that are identically alike, except that in one the ceilings are higher than in the other, the cost of furnishing the one with the high ceilings is greater than the cost of furnishing the one with the ceilings that are a foot lower.

Mr. MURDOCK. I simply rose for the purpose of calling the attention of the House to the fact that this sort of practice obtains, and I would recommend to this distinguished committee that they figure out some practical and sensible way of arriving at the cost of furniture for this building.

Mr. FITZGERALD. Let me suggest to the gentleman that this committee is not able to figure out some plan of estimating the cost. This committee is charged with the duty of appropriating the money required for certain public services.

Mr. MURDOCK. Oh, I understand that perfectly, but his committee has it in its power to take an antiquated method and change it.

Mr. FITZGERALD. The committee did attempt, my recollection is, to standardize the furniture. I have a case in mind. Within a recent time a new custom-house has been built in New York and some part furnished with furniture not only regal in character, but wholly out of place in that building.

Mr. MURDOCK. I will ask the gentleman also, while he is on his feet, does your committee consider typewriters part of the furniture of a public building?

Mr. FITZGERALD. Well, it depends——

Mr. MURDOCK. I did not catch the gentleman's remark.

Mr. FITZGERALD. The gentleman's question was whether the committee considered typewriters as part of the furniture?

Mr. MURDOCK. As part of the furniture of a public building?

Mr. FITZGERALD. I am unable to say what the opinion of the committee is——

Mr. MURDOCK. I am speaking of the machine.

Mr. FITZGERALD. I am unable to say what the opinion of the committee is in that respect. My judgment is that the typewriting machines are not considered as part of the furniture.

Mr. TAWNEY. They are not considered as part of the furniture.

Mr. MURDOCK. And are not carried in this bill under such appropriation?

Mr. TAWNEY. No; they are paid out of miscellaneous appropriations.

Mr. MURDOCK. Mr. Chairman, I withdraw the pro forma amendment.

Mr. SHERLEY. Mr. Chairman, the suggestions of the gentleman from Kansas are well in order and I am glad that he has read the hearings on this bill with care. Unfortunately there is no value in such a suggestion unless it results in some action by Congress. Now, the labor of the Committee on Appropriations has long since grown to such proportions as to make absolutely impossible consideration by the committee of detailed plans for curing abuses such as this. All the members of the subcommittee recognized that the present plan is without justification, but we have dead committees in this Congress which do no labor, committees on expenditures in various departments, and until those committees are vitalized and put to work it can not be expected that the Committee on Appropriations in considering the sundry civil bill can determine matters of this kind.

The labors that we go through now in getting merely the general information that is contained in the hearings constitute more than a month's steady labor, and while I agree heartily with the gentleman, not only in regard to this particular case, but in many others contained in this bill, I, as a member of that committee, am unable to give the time necessary to arrive at a proper solution of the problem, and, unless we can put some of the labor that is now voluntarily assumed by the Committee on Appropriations on other committees that do no work you will have worse instances than this of public expenditure of money.

I would be glad to aid in any way in the inauguration of a system in this House that will utilize some of the now neglected committees, and until that is done it is useless for us to attempt the reform.

Mr. MANN. Will the gentleman yield for a question?

Mr. SHERLEY. Certainly.

Mr. MANN. Does the gentleman consider it a great reform when one of his expenditure committees brings in a bill here to create a new bureau in one of the departments, which has been done recently?

Mr. SHERLEY. Oh, the gentleman will understand——

Mr. MANN. Is it not the case that each committee on expenditures that has done anything does something of that kind?

Mr. SHERLEY. It shows we need not only to vitalize them, but reorganize them. I am not responsible for their action, but I do know this fact, which is known to every man having knowledge of any of the great supply bills, that the burden now resting upon the Committee on Appropriations is a burden that can not be taken care of by the members of that committee, no matter how much industry and how much learning they may bring to their task; and unless the Congress undertakes to relieve them of a lot of work now imposed upon them by the neglect of other committees, you will find worse instances in the action of Congress.

The Clerk read as follows:

Fuel, lights, and water for public buildings: For the purchase of fuel, steam, light, water, water meters, ice, lighting supplies, electric current for light and power purposes, and miscellaneous items for the use of the custordians' forces in the care of the buildings, furniture, and heating, hoisting, and ventilating apparatus, and electric-light plants, exclusive of personal service, and for expenses of installing electric-light plants, electric-light wiring, and repairs thereto, in such buildings completed and occupied as may be designated by the Secretary of the Treasury, for all public buildings, exclusive of marine hospitals, mints, branch mints, and assay offices, under the control of the Treasury Department, inclusive of new buildings, $1,450,000. And the appropriation herein made for gas shall include the rental and use of gas governors, when ordered by the Secretary of the Treasury in writing: *Provided*, That no sum shall be paid as rental for such gas governors greater than 35 per cent of the actual value of the gas saved thereby, which saving shall be determined by such tests as the Secretary of the Treasury shall direct. No portion of the amount herein appropriated shall be used for operating a system of pneumatic tubes for the transmission of postal matter.

Mr. SABATH. Mr. Chairman, I move to strike out the last word for the purpose of asking a question. You are appropriating $1,400,000 for fuel, light, and water, and very likely the largest portion of this is for electric light and for gaslight. Can the gentleman who has this bill in charge inform me the price we are paying for gas or for electric light?

Mr. TAWNEY. The price of gas I can not state exactly, but it varies according to the locality and the price in the locality in which the gas is furnished. We are paying nothing more, and I do not think the Government is paying anything less, than the commercial rate, whatever that rate may be.

Mr. SABATH. I am satisfied that we are not paying less. Then the gentleman does not know and can not give me the exact price?

Mr. TAWNEY. I do not.

Mr. SABATH. Can he inform me who can?

Mr. SHERLEY. If the gentleman will permit a suggestion, this is but another illustration of what I have just said. In order to investigate the items that go to make up that aggregate would require the labor of weeks, and it is impossible for a committee to do other than to make general inquiries from the officials that make the expenditures. You can not tell whether the expenditure in the city of Chicago, for instance, for light, is a proper expenditure unless you strike something that is so glaring that on its face it shows something wrong. And it is impossible for our committee to be a nosing committee into expenditures in detail; and that is the reason that these other committees that were created for that purpose ought to get busy.

Mr. SABATH. I fully agree with the gentleman from Kentucky. I know, however, that they do so, at times, with small appropriations and with small items, amounting to two or three hundred dollars.

But here is an item of over $1,000,000, and no one seems to know anything about it or about the price we are paying for gas or electric light, or for water, even. I think we ought to have some information pertaining to these matters before we are asked to vote on them.

Mr. SULZER. I agree with my friend. In other words, this is a very good place, it seems to me, to begin to economize. Let us lop off the big things involving millions, and not split hairs in reducing small salaries.

Mr. SABATH. Indeed, those are my views.

Mr. SULZER. Yes, indeed; I am opposed to reducing a poor man's salary, but I believe these general and generous appropriations for the gas companies and the electric-light companies and the trusts should be carefully scrutinized. That is one way to economize.

Mr. SABATH. I am glad that the gentleman from New York agrees with me that we should investigate the large appropriations as well as the small ones.

Mr. McLACHLAN of California. Mr. Chairman, I have introduced in this House the following bill, on which I desire briefly to address the House:

A bill (H. R. 28324) directing the Panama Railroad Company to establish and operate a line of steamers along the Pacific coast, and making provision therefor.

Be it enacted, etc., That the Panama Railroad Company be, and it is hereby, directed to establish and operate a line of steamers for the transportation of passengers and freight along the Pacific coast of the United States in connection with the line of steamers along the Atlantic coast and the Panama Railroad, now operated by said company, and to make regular calls at all the principal Pacific coast ports of the United States, including Seattle, Tacoma, San Francisco, San Pedro, and San Diego, from and to the western terminus of said railroad.

That the said railroad company be, and it is hereby, directed to charter, purchase, or cause to be constructed 10 steamers suitable for the purposes of said line, with a capacity of at least 5,000 tons each and an actual speed of at least 12 knots.

That the sum of $10,000,000, or as much thereof as may be necessary, be, and the same is hereby, authorized to be expended, out of the Treasury of the United States, for the purposes of this act. That the sum so expended, or so much thereof as possible, be returned to the Treasury of the United States from the net earnings of said Panama Railroad Company.

The bill which I have introduced directs the Panama Railroad Company, a corporation now owned by the United States Government, to establish and operate a line of steamers on the Pacific coast in conjunction with the line of steamers on the Atlantic coast and the Panama Railroad now operated by said railroad company.

The property of the Panama Railroad Company consists of a double-track railroad across the Isthmus of Panama, with ample docks and well-equipped terminal facilities on the Atlantic and Pacific oceans, and a line of steamers operating between the cities of New York and Colon in conjunction with said railroad.

The stock of said railroad company is owned by the United States Government, which it now operates through officers appointed for that purpose.

The steamers of this line are, as a rule, now taxed to their full capacity to carry the westbound freight from New York to Colon, but the same steamers, under existing conditions, return with a one-fourth cargo of eastbound freight from Colon to New York. Yet, even under these conditions, it has been a profitable enterprise, and the indebtedness of the company has been practically canceled, extensive improvements have been made, and valuable acquisitions have been added to its equipment.

Provision has been made in this bill for 10 first-class steamers of 5,000 tons each, with an actual speed of at least 12 knots.

This will give a regular service between Puget Sound and Panama every five days, with stops at Portland, San Francisco, San Pedro, and the principal ports of Mexico and Central America.

The class of steamers that is proposed for this line can make the trip, including all stops, to Panama from Puget Sound in twenty days; from San Francisco in fourteen days; and from Los Angeles in eleven days.

Such a line of steamers on the Pacific I believe to be a natural and necessary complement and adjunct to the line of the Atlantic and the Isthmian Railroad now operated by the Government.

When in operation it will supply the eastbound passengers and freight for its Atlantic steamers that now return from Colon to New York nearly empty. It will carry thousands of tons of commissaries and building material produced on the Pacific coast direct to Panama, to be used in the construction of the Isthmian Canal, which are now transported across the continent and down the Atlantic to Colon.

It will stimulate commercial activity too long stifled on the Pacific coast as nothing else can do. It will cost less to install this line than the price of a single battle ship, which requires the expenditure of more than half a million annually to maintain, and that will become obsolete in ten years.

It will complete a great commercial highway from and to all the great commercial centers of the Pacific and Atlantic coasts, assuring reasonable and fixed rates at all times to all alike.

It will be free from all great corporate combinations and domination. It will automatically regulate and give stability to all transcontinental rates and accomplish that desideratum more effectually than all the laws that have been or can be enacted for that purpose.

At some future and more opportune time I shall address the House more fully upon this subject.

The Clerk read as follows:

Suppressing counterfeiting and other crimes: For expenses incurred under the authority or with the approval of the Secretary of the Treasury in detecting, arresting, and delivering into the custody of the United States marshal having jurisdiction dealers and pretended dealers in counterfeit money, and persons engaged in counterfeiting Treasury notes, bonds, national-bank notes, and other securities of the United States and of foreign governments, as well as the coins of the United States and of foreign governments, and other felonies committed against the laws of the United States relating to the pay and bounty laws, including $1,000 to make the necessary investigation of claims for reimbursement of expenses incident to the last sickness and burial of deceased pensioners under section 4718 of the Revised Statutes, the act of March 2, 1895, and for no other purpose whatever, except in the protection of the person of the President of the United States, $125,000: *Provided*, That no part of this amount be used in defraying the expenses of any person subpœnaed by the United States courts to attend any trial before a United States court or preliminary examination before any United States commissioner, which expenses shall be paid from the appropriation for "Fees of witnesses, United States courts."

No part of any money appropriated by this act shall be used in payment of compensation or expenses of any person detailed or transferred from the Secret Service Division of the Treasury Department, or who may at any time during the fiscal year 1910 have been employed by or under said Secret Service Division.

Mr. TAWNEY. Mr. Chairman, I ask unanimous consent that the consideration of this paragraph be passed until to-morrow, without prejudice.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk read as follows:

Customs service: To defray the expenses of collecting the revenue from customs, $5,000,000, being additional to the permanent appropriation for this purpose for the fiscal year ending June 30, 1910. And the provisions of the act of March 3, 1879 (20 Stats., p. 386), as amended by the act of April 27, 1904 (33 Stats., p. 396), authorizing the Secretary of the Treasury to expend out of the appropriation for defraying the expenses of collecting the revenue from customs such amount as he may deem necessary, not exceeding $150,000 per annum, for the detection and prevention of frauds upon the customs revenue, are hereby further amended so as to increase the amount to be so expended for the fiscal year 1910 to $200,000.

Mr. BENNET of New York. Mr. Chairman, I move to strike out the last word, in order to ask the chairman of the committee if this sum of $5,000,000 in addition to the permanent appropriation is the sum that is asked for this year by the department?

Mr. TAWNEY. That is the amount that is estimated for by the department.

The Clerk read as follows:

In all, $1,266,750.

Mr. TAWNEY. Mr. Chairman, I ask that the last paragraph, giving the total, be passed without prejudice.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that the paragraph just read be passed without prejudice until a future day. Is there objection?

There was no objection.

The Clerk read as follows:

Southwest Ledge light station, Connecticut: For completing Southwest Ledge light-house near New Haven, Long Island Sound, Connecticut, $60,000.

Mr. TAWNEY. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Minnesota offers an amendment which the Clerk will report.

The Clerk read as follows:

On page 69, in line 16, strike out the words "New Haven" and insert in lieu thereof the words "New London."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota.

Mr. MANN. I suggest to the gentleman that he put in there the words "at or near New London." That would follow the law. It is just as well to follow the authorization we fixed upon that language. However, I do not care.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota [Mr. TAWNEY].

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

North Point light station, Wisconsin: For raising the tower of North Point light station 30 feet, $10,000.

Mr. MANN. Mr. Chairman, I offer an amendment, to come in after the word "feet," line 1, page 70, "which station is hereby reestablished," so that it will read:

North Point light station, Wisconsin: For raising the tower of North Point light station 30 feet, which station is hereby reestablished.

The CHAIRMAN. The gentleman from Illinois offers an amendment which the Clerk will report.

The Clerk read as follows:

Page 70, line 1, after the word "feet," insert the words "which station is hereby reestablished."

Mr. FITZGERALD. What is the object of that amendment?

Mr. MANN. This station is the North Point light at Milwaukee, which was ordered disestablished. It is now proposed to raise the light, and there is not, but there might be, a question as to whether that would reestablish the station or not.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Ambrose Channel, New York: For the purchase of buoys and equipment, $40,000.

Mr. MANN. Mr. Chairman, I reserve the point of order upon the paragraph. I do not know what testimony the committee may have had in reference to this. Last year we carried an item of $43,000 for 24 buoys for Ambrose and Gedney channels, New York, which item was stated to our committee by the Light-House Board was sufficient for the purposes of lighting these channels. Now they have not been before the committee having jurisdiction of the subject-matter asking for any additional lights.

Mr. SMITH of Iowa. For additional buoys.

Mr. MANN. For additional buoys.

Mr. FITZGERALD. Mr. Chairman, I think I can explain the purpose of this. At the time the recommendation was made by the gentleman's committee, the intention was to put Pintsch lights along that channel; but the Light-House Board has since recommended acetylene gaslights be used instead. The intention is to use that channel day and night, and it was believed that the use of acetylene lights, for which there seems to be a universal demand by the shipping people there, would be very much more desirable.

Mr. MANN. Well, the Light-House Board comes before our committee and has had a full hearing upon the subject, covering all the information that they could give. We had the item relating to Ambrose Channel before the Committee on Interstate and Foreign Commerce for several years. Hearings were given, and of everybody who could possibly be interested in the subject; and finally two different bills carried items relating to Ambrose Channel, which were passed by the House.

Mr. TAWNEY. Will the gentleman yield to me for a question?

Mr. MANN. Certainly.

Mr. TAWNEY. Is it not a fact that the Ambrose Channel and the buoys along that channel are now authorized by law?

Mr. MANN. The only authorization now for buoys along the Ambrose Channel is carried in the omnibus light-house bill of last year, providing for 24 buoys in Ambrose and Gedney channels at a cost not to exceed $43,000; and that appropriation made last year, was the only authority so far as an appropriation is concerned.

Mr. TAWNEY. Now, I do not know whether the gentleman intends to insist on his point of order or not.

Mr. MANN. I do, unless there is some reason given than has been given yet. I submit to the gentleman, here is a committee having jurisdiction in reference to light-houses which attempts to fulfill its duty. It brings in light-house bills.

Then, without there having been any exorbitant demand for new aids to navigation, in view of the condition of the Treasury, the committee has reported in no general bill on the subject. They have had every particular question considered with reference to light-house bills.

Mr. TAWNEY. Mr. Chairman, this channel was opened for use upon the 1st of February. The Light-House Board claimed, and they justly claimed, that they have authority to provide buoys wherever buoys are necessary in navigable waters over which they have jurisdiction. The buoys for that channel were authorized. The necessary aids to the navigation of that channel are incidents connected with the authority under which the channel was made. Now, in addition to having authority for the construction of buoys, specific authority heretofore given them, they have general authority incident to the navigation of the channel which has been authorized and made by authority of Congress, and it is under the jurisdiction of the Light-House Board.

Now, it is only a question of the buoys that they are to use as aids to the navigation of this channel. Acetylene-gas buoys are, by all people interested in navigation, conceded to be far superior to the Pintsch gas or any other style of buoy in use at the present time; and it is for the purpose of providing this channel—the most important channel in the country—with the best and most improved aids to navigation that the item has been submitted and the committee has recommended the appropriation.

Mr. MANN. Now, the gentleman is mistaken, in my opinion, in reference to any general authority. So far from the Light-House Board having any general authority to maintain these buoys, there is no such authorization of law at all. The Light-House Board can not even maintain a post light upon a river without authority of Congress, and the gentleman's own committee is only authorized to appropriate where there has been authority to maintain post lights.

Mr. TAWNEY. I would ask the gentleman if it is not a fact that we can and do appropriate for buoys in lump-sum appropriations?

Mr. SULZER. Of course we do.

Mr. TAWNEY. And no question can be raised of our authority or the authority of Congress to do so.

Mr. MANN. I do not propose to raise any point of order upon it.

Mr. TAWNEY. This is merely appropriating specifically for that which could be appropriated in the general lump-sum appropriation.

Mr. SULZER. Mr. Chairman, let me say to the gentleman from Illinois that of course he knows Ambrose Channel in New York Bay is one of the most important channels of commerce in the country, and it is very important in the interest of navigation that it should be properly buoyed and lighted. There is just as much navigation through this channel at night as there is during the day, and in the interest of the business of all the country it is essential that the buoys in this channel should be properly illuminated at night. I believe it is now generally conceded by people who are familiar with the matter that these acetylene lights are the best and most effective lights that can be procured. I trust the gentleman from Illinois will not insist on a point of order.

Mr. MANN. I will say to my friend from New York that I am fairly well posted about the Ambrose Channel and the lighting of it——

Mr. SULZER. I assumed that the gentleman was well posted——

Mr. MANN. Having given consideration to that specific question for three or four years, with different hearings to the Light-House Board; having reported into Congress and secured the passage of two bills providing for the lighting of Ambrose Channel.

Mr. SULZER. And for that reason I am surprised that the gentleman is trying to impede the matter now.

Mr. TAWNEY. Will the gentleman permit me to make one statement in regard to this?

Mr. MANN. Certainly.

Mr. TAWNEY. The lump-sum appropriation for buoys is $926,000. That is a general appropriation for buoys—new buoys, and the repair of old buoys—and all of the expense incident to the maintenance of this service. Now, we simply make a specific appropriation of $40,000 for this particular channel, which precludes them from foraging upon this general appropriation for that purpose. I fail to see on what ground the point of order can be sustained.

Mr. FITZGERALD. My recollection is that, in pursuance of the authority carried in the bill reported by the gentleman's committee, a certain appropriation was made for 24 Pintsch gaslights; also $15,000 for a tank steamer to carry the gas to these lights in the channel. The Light-House Board now proposes to install 18 acetylene gaslights instead, and it asks $40,000 and the transfer of the $15,000 appropriated for the tank ship for this same purpose, so that it will have available $55,000 for the acetylene gaslights.

Whether the change should be made or not is a matter for the House to determine. They have been using up to this time these acetylene gaslights in the channel, which has been partially opened, and the universal demand from the shipping interests is that these acetylene gaslights shall be installed.

There is a bill, either pending or reported, to permit the use of this channel at night; and as it seems that the most superior lights that are made should be used, I suggest the advisability of permitting the appropriation to be made for that purpose. The channel was either to have been opened up on the first of this month or will be on the first of next month.

Mr. MANN. What would the gentleman do? We spent nearly a month working over a light-house bill here a year or so ago, including this very identical matter. The committee went over this in every shape with the Light-House Board, hearing a report of the engineer from Washington, and we put in an item of $43,000 for 12 lights on the Ambrose Channel, as I remember it.

Mr. FITZGERALD. Twenty-four.

Mr. MANN. A total of 24 lights on Ambrose and Gedney channels. I just sent for the law.

Now that the Light-House Board, which is always backing and filling, that never maintains a position for a month at a time, concludes overnight before your committee to put in some other kind of light. The gentleman's committee has never considered the subject of lights in Ambrose Channel, except to make an appropriation. Does not the gentleman from New York think, in all fairness to the committee that does have jurisdiction of such matters, that if the Light-House Board wants to make a change they ought to bring it to the attention of that committee?

Mr. FITZGERALD. That would have been the proper method. If I recollect accurately, at the time the gentleman's committee reported the item for the lights of Ambrose Channel acetylene lights had not been used in this country, or else the price asked by the manufacturers was so large the Light-House Board would not recommend their adoption. At all events, since that time these lights have been used in some places and they are of such superior character that it makes them desirable.

Mr. MANN. These acetylene lights have been used for a long time.

Mr. FITZGERALD. In Canada.

Mr. MANN. No; in the United States. I am not at all convinced that there is any occasion for acetylene buoys in Ambrose Channel. Ambrose Channel is not difficult of navigation, where lights are stretched along the channel. It is not like picking up a light in some dark and dangerous place.

There is a demand for the use of acetylene-gas buoys, which are exceedingly expensive, difficult to take care of, and costly in every way. It may be that we will undertake to provide them, but I should guess—not endeavoring to pass upon the question without a hearing—I should guess that there are a hundred other places or more in the United States where acetylene-gas buoys will be of more value in proportion to the Pintsch gas buoys than in Ambrose Channel.

Mr. FITZGERALD. I am unable to express any opinion about that.

Mr. TAWNEY. I would like to ask the gentleman from Illinois if the $40,000 was carried in the $926,000 appropriation, it would not be competent for the Light-House Board to purchase and install out of the general appropriation the acetylene-gas buoys in Ambrose Channel?

Mr. MANN. Not without a distinct violation of the law. Congress has legislated upon this question. In the Fifty-ninth Congress it passed an act providing for additional aids to navigation in the Light-House Establishment in the Department of Commerce and Labor. In the third light-house district it provided for 13 gas buoys in Ambrose Channel, and 11 gas buoys in the Gedney and Main ship channels, at a total cost not to exceed $43,200.

Mr. TAWNEY. All in an appropriation bill?

Mr. MANN. In an authorization bill. That is the law on that subject that provided what the Light-House Board can do, If there were 40 general acts, this is the specific authority that would limit any other general authority, although there is no general authority on the subject.

The CHAIRMAN. The Chair would like to ask the gentleman from Illinois whether he knows if they have exceeded the limit of cost.

Mr. MANN. That amount has been appropriated—$43,200—the whole of it. Now they ask for $55,000 more. That is, they ask for $40,000 and a transfer of $15,000. I think the proper committee ought to have a chance to consider the matter.

The CHAIRMAN. What does the chairman of the committee say?

Mr. TAWNEY. Mr. Chairman, there was no limit of cost; it was simply an authorization for a certain number of buoys. It did not say that there should be no more buoys than the number stated in that law.

Mr. MANN. Before the gentleman falls into an error, will the gentleman permit me to read?

Mr. TAWNEY. If there is anything more that the gentleman has not read, he may read it.

Mr. MANN. Oh, there are four or five pages that I have not read:

Be it enacted, etc., That the Secretary of Commerce and Labor be, and he is hereby, authorized to establish and provide the following aids to navigation in the Light-House Establishment, under the Light-House Board, in the Department of Commerce and Labor, in accordance with the respective limits of cost hereinafter set forth, which shall in no case be exceeded.

Now, if the gentleman can find clearer language than that, I would like to see it.

Mr. TAWNEY. That is a limit of cost on that number of buoys, but it is not a limit on the number of buoys that may be established.

The CHAIRMAN. It requires a special authorization for that number.

Mr. TAWNEY. It does not even for that number. Under the general authority for the Light-House Service an appropriation for buoys carried in an appropriation bill would enable the Light-House Board to purchase them. If the $40,000 specifically appropriated for was carried in a general or lump-sum appropriation, they could buy the buoys and install them in accordance with law.

The CHAIRMAN. Why was the act read by the gentleman from Illinois necessary?

Mr. TAWNEY. The authority for the establishment and maintenance of the necessary aids to navigation is clearly implied in the authorization for the work of constructing the channel.

When the Light-House Board is given jurisdiction over the maintenance of these aids to navigation, it necessarily has authority to establish buoys along channels that are under their jurisdiction. No specific authority is necessary.

The CHAIRMAN. If that be true, the Chair would like to ask the chairman of the committee what is the necessity for this specific item here—if they can, under the general authorization, establish these buoys in Ambrose Channel.

Mr. TAWNEY. The necessity is to prevent the board from foraging upon the lump-sum appropriation. There is no necessity for any special authorization for the lighting of Ambrose Channel. As a matter of fact, everybody knows it could not be navigated without lights, and therefore the authority for the establishment or making of this channel necessarily carries with it the authority to establish and maintain aids essential to the navigation of the channel.

Mr. MANN. Mr. Chairman, the gentleman's argument in its logic goes too far. If it be true that when we provide in the river and harbor bill for a channel that that authorizes the establishment of all the aids to navigation necessary for the navigation of the channel, then we have been at great loss of time in our committee, because that would authorize the establishment of light-houses, it would authorize the establishment, through the Committee on Appropriations or through the Light-House Board, without specific authority, of all of the things that are authorized for Ambrose Channel. What are they, for instance? In this same bill I find items for lighting Ambrose Channel, New York Bay; a light-vessel for the sea entrance of the channel, at a cost not to exceed $115,000; also a light-house on Staten Island, New York, and for the raising of West Bank light, at a cost not to exceed $100,000; for two lens lanterns and structures for ranges, and so forth, at a cost not to exceed $12,000; for moving North Hook beacon light, at a cost not to exceed $6,000, and so forth; and a number of other items of that sort that relate to the lighting of Ambrose Channel.

The gentleman's argument would be that there is no reason for specific authorization of aids to navigation, because the moment you provide the channel thereupon the Light-House Board becomes empowered at once, without limit of cost, to establish all the aids to navigation it desires. The argument is too strong.

Mr. TAWNEY. I will ask the gentleman if he does not think there is a clear distinction between a portable aid to navigation and a stationary aid to navigation, such as a light-house, which involves a structure——

Mr. MANN. I do not see any distinction——

Mr. TAWNEY. If the gentleman does not see any distinction——

Mr. MANN. Wait a moment. I do not see any distinction in principle between a portable aid to navigation in the way of a gas buoy and a portable aid to navigation in the way of a light-ship. Does the gentleman? One is a good deal more portable than the other. A light-ship is more portable than a gas buoy. It can port itself.

Mr. FITZGERALD. The gentleman does not draw this distinction: One is an aid to navigation and the other is simply to light the channel. [Laughter.]

Mr. TAWNEY. I would call the attention of the Chair to the language under the head of "Expense of buoys," on page 72 of the bill.

Mr. MANN. But the gentleman does not contend that because there is an item in the bill that that makes law?

Mr. TAWNEY. Hold on. For the expense of establishing, replacing, and maintaining new buoys, or any and all kinds of spindles for all incidental expenses, and so forth, $926,000 is appropriated. Now, that is a part of the Light-House Establishment. It is a part of the Light-House Service, just as much as any other part of that service now authorized and existing under the law creating the Light-House Establishment. If they can expend $926,000 a year in the establishing of new buoys under the existing authorization for that service, then it seems to me folly to say that they can not expend $40,000 in the purchase and establishment of new buoys or replacing old buoys in this particular channel.

The CHAIRMAN. Does the gentleman from Illinois make the point of order?

Mr. MANN. I make the point of order.

The CHAIRMAN. The Chair thinks that the item is subject to a point of order. The present occupant of the chair is not free from doubt at all, but it seems to be a peculiar case. The gentleman from Minnesota [Mr. TAWNEY] himself and the gentleman from Iowa [Mr. SMITH] made points of order in the last Congress in cases on all fours with this case, in the consideration of the fortification appropriation bill. For instance, Mr. MAYNARD of Virginia proposed an amendment in this language in the fortification appropriation bill:

To make all necessary surveys, borings, and other investigations necessary for and the preparation of an accurate detailed estimate of what it would cost to construct proposed artificial islands for fortifications between Capes Charles and Henry, Chesapeake Bay, and to ascertain whether the title to the site of said proposed artificial island can be obtained without expense to the United States, $3,000.

Mr. SMITH of Iowa made the point of order, and the point was decided by Mr. MANN of Illinois, the then occupant of the chair. [Laughter.] The Chair thinks it would be in order to quote the decision of the gentleman from Illinois, because it shows that the gentleman from Illinois was not free from doubt and expressed the opinion at the time that his decision might be somewhat arbitrary. [Laughter and applause.]

The Chair does not understand that the act of Congress authorizing the appointment of the Endicott Board by law provided that that report should be adopted or that any act of Congress has been enacted since that time specifically adopting the report of the Endicott Board. On the other hand, Congress has provided in annual appropriation bills for the expenditure of money for fortification purposes, usually in general language naming appropriations for purposes general in their nature, to be expended by the War Department.

In the opinion of the Chair, expressed with some doubt, under the practice of the House, at least, the items in the appropriation bill in general language are probably in order, although the Chair does not undertake to rule upon the question at this time; but the Chair thinks that the introduction of a new item for a work not in progress is not in order, and the Chair therefore sustains the point of order.

It seems as though, under the decisions of this House or in Committee of the Whole in times gone by, general authorizations have been held in order; but specific items—Mr. Hinds says sometimes they have been held in order. [Laughter.] The Chair believes probably that is a fair statement of the ruling; but after all, it seems that general appropriations have been held in order, but that specific appropriations for specific purposes, even though coming under the general authorization and following the same line, have been held not in order, and the present occupant of the chair really fails to draw the distinction; but following the precedent, he sustains the point of order.

The Clerk read as follows:

The sum of $15,000 appropriated by the sundry civil appropriation act approved June 30, 1906, for a tank light-vessel for Ambrose Channel, New York Bay, may be used, together with the foregoing sum, for the purchase of buoys.

Mr. MANN. Mr. Chairman, I make the point of order on that paragraph.

Mr. TAWNEY. I concede the point of order, Mr. Chairman. I want to say, however, in this connection, it will take the paragraph out; that the vessel authorized by authority originating with the Committee on Interstate and Foreign Commerce is absolutely worthless and is of no use whatever. It has not yet been built; and, if the amount appropriated for this purpose to carry out the authorization is not diverted, it will be built.

Mr. MANN. Mr. Chairman, I do not know whether the vessel will be worthless or not. I only know that the members of the Light-House Board, the light-house engineer at New York in charge of this work, demanded by every possible method they could that this appropriation be authorized, and they brought more pressure to bear upon me in reference to this item than any other item relating to Ambrose Channel or any item in the bill, insisting that it would not be possible to light Ambrose Channel without this light-vessel; and if it be true that it is not needed, I want to bring a measure in a future Congress to repeal the provision instead of letting them get the money through this means and use it for some other purpose. I hope the gentleman will be present when I interview the Light-House Board on the subject.

Mr. TAWNEY. Mr. Chairman, I want to quote from Admiral Marix, a member of the Light-House Board:

There was a tank vessel appropriated for, I believe at the request of the board. I do not know what use would be made of it now. It would not be of any use at all, and we would like to use that money to buy these new buoys.

Mr. MANN. Oh, well, the trouble with the gentleman is he is not familiar with the situation. The tank light-vessel will only be used in case of the gas buoys already authorized, and it is used for filling those gas buoys, but the tank vessel would be of no value to the buoys which the gentleman has proposed.

Mr. TAWNEY. But he says it will be of no use at all under any circumstances.

Mr. MANN. Well, that remains to be developed. I think with all due deference to the chairman of the Light-House Board, I know more about the subject, or any member of our committee, than he does. They change the chairman of the Light-House Board and officers and members of the Light-House Board so often that it sometimes makes my eyes tired to watch the procession go by. [Laughter.]

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

LIGHT-HOUSE ESTABLISHMENT.

Supplies of light-houses: For supplying fog signals, light-houses, and other lights with illuminating, cleaning, preservative, and such other materials as may be required for annual consumption; for books, boats, and furniture for stations, traveling expenses of civilian members of the Light-House Board in attending meetings of board at Washington, actual hire of special conveyance when necessary to inspect light stations, and not exceeding $300 for the purchase of technical and professional books and periodicals for the use of the Light-House Board, and for all other necessary incidental expenses, including the pay of officers and crews of light-house tenders and of clerks and other employees in the offices of the light-house inspectors and light-house engineers and at light-house depots, $726,000.

Mr. SULZER. Mr. Chairman, I move to make the amount $776,000.

The CHAIRMAN. Does the gentleman from New York propose an amendment?

Mr. SULZER. Yes, sir; to add $40,000 to the appropriation in order to take care of Ambrose Channel in New York Bay.

The CHAIRMAN. The Cerk will report the amendment.

The Clerk read as follows:

Page 71, line 3, strike out "twenty-six" and insert "sixty-six," so that it will read "$766,000."

Mr. TAWNEY. Mr. Chairman, I hope the amendment will not prevail, for the reason that I do not think that the expense of lighting Ambrose Channel, or the buoys, should be paid out of this general appropriation. There ought to be a limit on the amount that they can expend for that purpose, and if an appropriation is made for that purpose before the close of the session there probably will be. Whereas if this amendment prevails, then the entire sum is available.

Mr. MANN. If that is the position the gentleman is taking, it will take a lot of other items out of the bill.

Mr. TAWNEY. If the amendment prevails, then the entire sum of $900,000 is available for this.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. SULZER].

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Lighting of rivers: For the pay of officers and crews of light-house tenders and of clerks and other employees in the offices of the light-house inspectors; and for establishing, supplying, and maintaining post lights on the Hudson and East rivers, New York; the Raritan River,

New Jersey; Connecticut River, Thames River between Norwich and New London, Conn.; the Delaware River between Philadelphia, Pa., and Bordentown, N. J.; the Elk River, Maryland; Monongahela River, York River, James River, Virginia; Cape Fear River, North Carolina; Savannah River, Georgia; St. Johns and Indian rivers, Florida; at Chicott Pass, and to mark navigable channel along Grand Lake, Louisiana; at the mouth of Red River, Louisiana; on the Mississippi, Missouri, Ohio, Tennessee, Illinois, and Great Kanawha rivers; Sacramento and San Joaquin rivers, California; on the Columbia and Willamette rivers, Oregon; on Puget Sound, Washington Sound, and adjacent waters, Washington; and the channels in St. Louis and Superior bays, at the head of Lake Superior; Fox River; Lake Winnebago and connecting lakes and channels; in Alaskan waters and Hawaiian waters; the Light-House Board being hereby authorized to lease the necessary ground for all such lights and beacons as are for temporary use or are used to point out changeable channels, and which in consequence can not be made permanent, $375,000.

Mr. EDWARDS of Georgia. Mr. Chairman, I offer the following amendment: On line 9, page 73, after the word "Georgia," insert "Darien Harbor, Georgia."

Mr. TAWNEY. I make a point of order against that, Mr. Chairman. Before the gentleman's amendment can be in order he must get a bill passed authorizing it.

The CHAIRMAN. The gentleman from Georgia offers an amendment, which the Clerk will report.

The Clerk read as follows:

After the word "Georgia," line 9, page 73, insert "Darien Harbor, Georgia."

Mr. TAWNEY. Mr. Chairman, I make a point of order against the amendment on the ground that it is not authorized by law.

The CHAIRMAN. Does the gentleman from Georgia [Mr. EDWARDS] care to be heard on the point of order?

Mr. EDWARDS of Georgia. I do not care to be heard on it.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

Repairs to light-house tender Pansy: For repairs of the light-house tender Pansy for general service, $12,000: *Provided*, That hereafter any and all proposals for bids for any new machinery or other new equipment necessary in the repair of any vessel in the Light-House Service shall be on specifications prepared and submitted that will secure competition in the bids for furnishing such machinery or equipment.

The CHAIRMAN. The Clerk calls the attention of the Chair to the fact that at the end of line 25 there is an incompleted word.

Mr. TAWNEY. It should read "equipment."

The CHAIRMAN. Without objection, the Clerk will insert the word "equipment" at the end of line 25, page 74.

There was no objection.

The Clerk read as follows:

Hereafter there shall be submitted, following each estimate under the foregoing appropriations for support of the Light-House Establishment, statements showing the amount required for each object of expenditure mentioned in each of said estimates.

Mr. MANN. Mr. Chairman, I offer an amendment to follow line 9, page 75.

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

To follow line 9, page 75, insert:

"Authority is hereby given the accounting officers of the Treasury Department to allow and credit in the accounts of Commander L. C. Hellner, U. S. Navy, inspector of the thirteenth light-house district for the fiscal year ended June 30, 1906, the sum of $625 paid by him from the appropriation 'Supplies of lighthouses, 1906,' for raising the light-house tender Manzanita."

Mr. TAWNEY. Mr. Chairman, I reserve a point of order on that.

Mr. MANN. The item is subject to a point of order. This officer paid out $600 for the raising of the tender *Manzanita*, which had been sunk on the Pacific coast, and it was a proper expenditure of money, although the accounting officer disallowed it. I propose it here because I notice that on page 96 there is an item in the bill asking the accounting officer to allow to Mr. Soleau, disbursing clerk in the same department, money paid out by him for subsistence of employees at the United States fish hatcheries in Alaska. There ought to be no discrimination between two officers in the same department. There is no question about the propriety of giving credit for the money. The only question would be as to whether it should be in this bill or not.

Mr. TAWNEY. I would say, Mr. Chairman, that the propositions are entirely dissimilar. But I will not insist on the point of order to-night, but will allow the point to be pending. I move that the committee do now rise.

The CHAIRMAN. The Chair desires to ask what disposition is asked to be made of the point of order?

Mr. MANN. The gentleman from Minnesota asked to have it passed over without prejudice,

The CHAIRMAN. The gentleman from Minnesota [Mr. TAWNEY] moves that the committee do now rise.

The motion was agreed to.

The committee accordingly rose, and Mr. MANN having taken the chair as Speaker pro tempore, Mr. WATSON, the Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 28245, making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, and had come to no resolution thereon.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed the following resolution:

Resolved, That the Secretary be directed to request the House of Representatives to return to the Senate the bill (H. R. 24149) granting to the Montana, Wyoming and Southern Railway Company a right of way across the Fort Keogh Military Reservation, Mont.

RECESS.

Mr. TAWNEY. Mr. Chairman, I move that the House do now take a recess until 10 o'clock to-morrow morning.

The motion was agreed to; and accordingly (at 8 o'clock p. m.) the House took a recess until 10 o'clock a. m. to-morrow.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

A letter from the Acting Secretary of War, calling attention to the necessity for an immediate appropriation for a target range at Vancouver Barracks, Wash. (H. Doc. No. 1476)—to the Committee on Appropriations and ordered to be printed.

A letter from the Secretary of the Treasury, transmitting a copy of a letter from the president of the Board of Commissioners of the District of Columbia submitting an estimate of appropriation for the militia (H. Doc. No. 1477)—to the Committee on Appropriations and ordered to be printed.

A letter from the Acting Postmaster-General, transmitting a schedule of papers and documents not used in the transaction of the public business (H. Doc. No. 1478)—to the Select Committee on Disposition of Useless Executive Papers and ordered to be printed.

A letter from the Secretary of the Interior, transmitting recommendations as to drainage and sale of Omaha tribal lands (H. Doc. No. 1479)—to the Committee on Indian Affairs and ordered to be printed.

A letter from the Assistant Secretary of the Interior, transmitting a reply to the inquiry of the House relating to the work of the pension agencies (H. Doc. No. 1480)—to the Committee on Appropriations and ordered to be printed.

A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of survey of Cumberland River, Tennessee and Kentucky, below Nashville (H. Doc. No. 1481)—to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. WILSON of Illinois, from the Committee on the Merchant Marine and Fisheries, to which was referred the bill of the House (H. R. 22895) to establish a biological and fish-cultural station in the Twenty-third Congressional District of Illinois, reported the same with amendments, accompanied by a report (No. 2236), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. MANN, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the House (H. R. 27926) to authorize the Chicago, Lake Shore and Eastern Railway Company to construct a bridge across the Calumet River in the State of Indiana, reported the same with amendment, accompanied by a report (No. 2237), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill of the House (H. R. 28104) to amend an act to authorize a bridge across the Missouri River at or near Council Bluffs, Iowa, approved February 1, 1908, reported the same without amendment, accompanied by a report (No. 2238), which said bill and report were referred to the House Calendar.

Mr. ADAMSON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the House

(H. R. 28193) to authorize the city of Shreveport to construct a bridge across Red River, reported the same without amendment, accompanied by a report (No. 2239), which said bill and report were referred to the House Calendar.

Mr. McGUIRE, from the Committee on Indian Affairs, to which was referred the bill of the House (H. R. 11342) providing for the disposition of the balance of the funds derived from the sale of town lots in the county seats of Caddo, Kiowa, and Comanche counties, Okla., reported the same with amendment, accompanied by a report (No. 2243), which said bill and report were referred to the House Calendar.

Mr. HENRY of Texas, from the Committee on the Judiciary, to which was referred the bill of the House (H. R. 28305) to attach Dawson County, in the State of Texas, to the Abilene division of the northern judicial district of said State and to detach it from the Fort Worth division of said court, reported the same without amendment, accompanied by a report (No. 2244), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. KAHN, from the Committee on Military Affairs, to which was referred the bill of the Senate (S. 3164) to correct the military record of Paul Sinock, reported the same without amendment, accompanied by a report (No. 2235), which said bill and report were referred to the Private Calendar.

Mr. SMITH of Michigan, from the Committee on the District of Columbia, to which was referred the bill of the House (H. R. 25980) for the relief of Sarah J. Fowler, reported the same without amendment, accompanied by a report (No. 2242), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 28317) granting a pension to Frederick Wagner, and the same was referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. GOULDEN: A bill (H. R. 28321) providing for a suitable memorial to the memory of Brig. Gen. Henry W. Lawton—to the Committee on the Library.

By Mr. GARNER: A bill (H. R. 28322) granting to the St. Louis, Brownsville and Mexico Railway a right of way across the Fort Brown Military Reservation in Texas—to the Committee on Military Affairs.

By Mr. DAVIS: A bill (H. R. 28323) to increase the limit of cost for erection of a public building at Faribault, Minn.—to the Committee on Public Buildings and Grounds.

By Mr. McLACHLAN of California: A bill (H. R. 28324) directing the Panama Railroad Company to establish and operate a line of steamers along the Pacific coast, and making provision therefor—to the Committee on Interstate and Foreign Commerce.

By Mr. COUDREY: A bill (H. R. 28325) concerning baggage and excess baggage carried by common carriers in the District of Columbia and Territories, and common carriers while engaged in commerce between the States and between the States and foreign nations, and prescribing the duties of such common carriers in reference thereto while so engaged, defining certain offenses and fixing the punishment therefor, and repealing all conflicting laws—to the Committee on Interstate and Foreign Commerce.

By Mr. LANGLEY: A bill (H. R. 28326) to provide for the construction of a bridge across the Kentucky River at Irvine, Estill County, Ky.—to the Committee on Interstate and Foreign Commerce.

By Mr. GAINES of Tennessee: A bill (H. R. 28327) concerning locks on the lower Cumberland River in Tennessee—to the Committee on Rivers and Harbors.

By Mr. COUDREY: A bill (H. R. 28328) to provide for the purchase of the Grant farm, in St. Louis County, in the State of Missouri, and to establish a national park thereat, etc.—to the Committee on the Library.

By Mr. SPERRY: Resolution (H. Res. 589) providing for services of a clerk to Committee on Alcoholic Liquor Traffic—to the Committee on Accounts.

By Mr. KEIFER: Resolution (H. Res. 590) to provide a rule making it in order to move to suspend the rules and to consider and pass Senate bill 5729, etc.—to the Committee on Rules.

By Mr. HARRISON: Joint resolution (H. J. Res. 261) authorizing the President of the United States to invite the International Congress of Applied Chemistry to hold its eighth meeting in the United States of America in the year 1912—to the Committee on Foreign Affairs.

By Mr. FORNES: Memorial of the legislature of Wyoming, favoring homestead laws—to the Committee on the Public Lands.

Also, memorial of the legislature of Wyoming, favoring forest reserves—to the Committee on the Public Lands.

By Mr. COOK of Colorado: Memorial of the legislature of Colorado, in relation to the admission of New Mexico as a State—to the Committee on the Territories.

By Mr. RYAN: Memorial of the legislature of Wyoming, concerning the natural resources of the country—to the Committee on the Public Lands.

Also, memorial of the legislature of the State of Wyoming, indorsing and approving the Mondell 320-acre homestead bill—to the Committee on the Public Lands.

By Mr. MONDELL: Memorial of the legislature of Wyoming, relative to forest reserves—to the Committee on the Public Lands.

Also, memorial of the legislature of Wyoming, relative to homestead laws—to the Committee on the Public Lands.

By the SPEAKER: Memorial of the legislature of Utah, praying for an appropriation of public lands for building a state capitol and for the building of public roads in the State of Utah—to the Committee on the Public Lands.

Also, memorial of the legislature of Idaho, praying for legislation relative to the settlement on the Minidoka tract, Idaho—to the Committee on the Public Lands.

Also, memorial of the legislature of New Mexico, praying for the immediate admission of that Territory into the Union—to the Committee on the Territories.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. ACHESON: A bill (H. R. 28329) granting an increase of pension to George R. Murray—to the Committee on Invalid Pensions.

By Mr. BEDE: A bill (H. R. 28330) granting a pension to Wolcott T. Hyde—to the Committee on Invalid Pensions.

By Mr. BROUSSARD: A bill (H. R. 28331) for the relief of the heirs or legal representatives of Jean B. Pollingue, deceased—to the Committee on War Claims.

By Mr. EDWARDS of Georgia: A bill (H. R. 28332) for the relief of Z. T. De Loach, of Bulloch County, Ga.—to the Committee on War Claims.

By Mr. HAWLEY: A bill (H. R. 28333) granting a pension to Asa B. Greenland—to the Committee on Pensions.

By Mr. HULL of Tennessee: A bill (H. R. 28334) for the relief of J. K. P. Davis, of Clay County, Tenn.—to the Committee on Claims.

By Mr. LAMAR of Florida: A bill (H. R. 28335) for the relief of C. M. Cox—to the Committee on Claims.

By Mr. WANGER: A bill (H. R. 28336) granting an increase of pension to William Guest—to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ACHESON: Paper to accompany bill for the relief of Rev. George R. Murray—to the Committee on Invalid Pensions.

By Mr. ALEXANDER of New York: Petition of Lafayette Presbyterian Church, of Buffalo, N. Y., favoring H. R. 24148, for federal bureau for children—to the Committee on Expenditures in the Interior Department.

Also, petition of retail merchants' board of the Chamber of Commerce of Buffalo, N. Y., against the tariff schedule proposed by the Glove Manufacturers' Association of Gloversville and Johnstown, N. Y.—to the Committee on Ways and Means.

By Mr. ASHBROOK: Petition of Newark (Ohio) Lodge, No. 391, Benevolent and Protective Order of Elks, for an American elk reservation in Wyoming (H. R. 21980)—to the Committee on the Public Lands.

By Mr. BURLEIGH: Petition of C. F. Donnell and others, of Windsor (Me.) Grange, asking for parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

By Mr. BURLESON: Petition of Austin (Tex.) Lodge, Benevolent and Protective Order of Elks, for an appropriation to create a reserve in the State of Wyoming for the protection of the American elk—to the Committee on the Public Lands.

By Mr. CALDER: Petition of General George A. Custer Garrison, of Brooklyn, N. Y., favoring retirement of petty officers and enlisted men of the navy after twenty-five years of actual service—to the Committee on Naval Affairs.

Also, petition of John A. Stewart, favoring clause in agricultural appropriation bill (p. 43, line 12) authorizing lease of a farm at Morrisville, Madison County, N. Y.—to the Committee on Agriculture.

Also, petition of B. M. Robinson and W. R. Caulkins, mine operators, asking for duty of 1½ cents per pound on zinc ore—to the Committee on Ways and Means.

By Mr. COOK of Pennsylvania: Petition of board of directors of the Philadelphia Bourse, favoring enactment of Senate bill 28—to the Committee on the Merchant Marine and Fisheries.

Also, petition of board of directors of the Philadelphia Bourse, favoring S. 40—to the Committee on Interstate and Foreign Commerce.

By Mr. DAVIS: Petition of Nelson & Johnson and other merchants of Goodhue, Minn., against parcels-post and postal savings bank bills—to the Committee on the Post-Office and Post-Roads.

Also, petition of the Friedrich & Kemp Company, favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

Also, petition of citizens of Greenwich, Conn., and Hermon, N. Y., for enactment of the Davis bill (H. R. 24841), appropriating money to encourage the States to provide secondary instruction in agriculture and home economics in district secondary agricultural schools with branch experiment stations; secondary instruction in mechanic arts and home economics in village and city public schools; and in providing for the training of teachers in vocational subjects, and regulating the expenditure thereof—to the Committee on Agriculture.

Also, petitions of Red Wing (Minn.) Lodge, No. 845, and Mankato (Minn.) Lodge, Benevolent and Protective Order of Elks, for creation of American elk reservation in the State of Wyoming (H. R. 21980)—to the Committee on the Public Lands.

Also, petition of Minnesota Retail Grocers' Association, favoring Sherley amendment to the bankruptcy law—to the Committee on the Judiciary.

Also, petition of F. A. Bart and others, of Watertown, Minn., against duty on tea and coffee—to the Committee on Ways and Means.

Also, petition of Northfield (Minn.) Commercial Club, favoring H. R. 15837, for the creation of a national highways commission—to the Committee on Agriculture.

Also, joint resolution of the senate and house of the Minnesota legislature, favoring appropriation for improvement of the Minnesota River—to the Committee on Rivers and Harbors.

By Mr. FULLER: Petition of the Union Furniture Company, of Rockford, Ill., against parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

Also, petition of the John Crerar Library, of Chicago, Ill., in favor of placing books on the free list—to the Committee on Ways and Means.

By Mr. GARNER: Petition of the Angora goat men of Uvalde County, Tex., favoring increase of duty on mohair—to the Committee on Ways and Means.

Also, petition of Albert Nutt and others, against parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

By Mr. GOULDEN: Petition of Veteran Association of Fifth New York Volunteers, favoring S. 1045—to the Committee on Military Affairs.

By Mr. HAMILTON of Iowa: Petition of citizens of Grinnell, Iowa, against S. 3940 (Johnston Sunday law)—to the Committee on the District of Columbia.

By Mr. HAMMOND: Petitions of Carlson Brothers and 13 others, of Fulda, and the Western Implement Company and 12 others, of Dayton, both in the State of Minnesota, against parcels-post and postal savings bank laws (S. 5122 and 6844)—to the Committee on the Post-Office and Post-Roads.

Also, petition of A. Jaeger and 20 others ,of Darfur, Minn., against duty on tea and coffee—to the Committee on Ways and Means.

By Mr. HARDWICK: Petition of W. B. Brigham & Co., of Augusta, Ga., favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

By Mr. HILL of Connecticut: Petition of Torrington (Conn.) Lodge, No. 372, Benevolent and Protective Order of Elks, favoring a reservation for the American elk and appropriation of $30,000 therefor (H. R. 21980)—to the Committee on the Public Lands.

By Mr. ADDISON D. JAMES: Paper to accompany bill for relief of James Lucas, heir of F. F. Lucas—to the Committee on War Claims.

By Mr. LANGLEY: Paper to accompany bill for relief of Joseph E. Lindsey (H. R. 28273)—to the Committee on War Claims.

By Mr. LINDBERGH: Petition of citizens of Elmdale, Minn., against any duty on tea and coffee—to the Committee on Ways and Means.

By Mr. LOUD: Petition of business men of West Branch, Mich., favoring parcels-post and postal savings bank bills—to the Committee on the Post-Office and Post-Roads.

By Mr. LOWDEN: Petition of N. H. Long and others, of Dixon, Ill., against imposition of a duty on tea and coffee—to the Committee on Ways and Means.

By Mr. McHENRY: Petition of John H. Kreitzer, favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

Also, petitions of Danville (Pa.) Lodge, No. 754, and Shamokin (Pa.) Lodge, No. 355, Benevolent and Protective Order of Elks, favoring the preservation of the American elk—to the Committee on the Public Lands.

By Mr. MADISON: Petition of citizens of Greeley County, Kans., against passage of Senate bill 3940—to the Committee on the District of Columbia.

By Mr. MANN: Petition of commercial and industrial organizations of Indiana, favoring the ocean-mail bill—to the Committee on the Merchant Marine and Fisheries.

Also, petition of the Chamber of Commerce of Pittsburg, favoring an appropriation of not less than $50,000,000 annually for inland waterways—to the Committee on Rivers and Harbors.

Also, petition of the Trade League of Philadelphia, Pa., to increase the power of the Interstate Commerce Commission—to the Committee on Interstate and Foreign Commerce.

Also, petition of the National Business League of America, against establishment of a national consular school—to the Committee on Foreign Affairs.

By Mr. MARSHALL: Petition of citizens of North Dakota, against an imposition of duty on tea and coffee—to the Committee on Ways and Means.

By Mr. MOORE of Pennsylvania: Petition of Philadelphia (Pa.) Lodge, No. 2, Benevolent and Protective Order of Elks, asking for the creation of a reserve in the State of Wyoming (H. R. 21980)—to the Committee on the Public Lands.

By Mr. NORRIS: Petition of residents of Saronville, Nebr., against parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

By Mr. RYAN: Petition of the trustees of the Grosvenor Library, of Buffalo, N. Y., against duty on scientific and technical books—to the Committee on Ways and Means.

By Mr. SULZER: Petition of the committee of 100 of the American Association for Advancement of Science, favoring S. 6102, to improve efficiency of the Public Health and Marine-Hospital Service—to the Committee on Appropriations.

Also, petition of the Veteran Association of the Fifth New York Volunteer Infantry, favoring S. 1045, to protect monuments already erected on the battlefields of Bull Run, Virginia—to the Committee on Military Affairs.

By Mr. WHEELER: Petition of E. E. Fleming and 30 others, of Forest County, Pa., against removal of duty from crude petroleum—to the Committee on Ways and Means.

By Mr. WILSON of Pennsylvania: Petition of Renovo (Pa.) Lodge, No. 334, Benevolent and Protective Order of Elks, for creation of American elk reservation in the State of Wyoming (H. R. 21980)—to the Committee on Agriculture.

Also, petition of C. A. Mayer & Co. and 62 others, of Williamsport, Pa., against increase of tariff on foreign fruits—to the Committee on Ways and Means.

By Mr. YOUNG: Petition of citizens of the Twelfth Congressional District of Michigan, against removal of duty on lumber—to the Committee on Ways and Means.

SENATE.

THURSDAY, *February 25, 1909.*

Prayer by the Chaplain, Rev. Edward E. Hale.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. WARREN, and by unanimous consent, the further reading was dispensed with.

The VICE-PRESIDENT. The Journal stands approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26305) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1910, and for other purposes.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12499) for the relief of Clarence Frederick Chapman, United States Navy.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes, agrees to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. Foss, Mr. LOUDENSLAGER, and Mr. PADGETT managers at the conference on the part of the House.

The message also announced that the House insists upon its amendment to the bill (S. 8899) granting pensions and increase of pensions to certain soldiers and sailors of wars other than the civil war, and to certain widows and dependent relatives of such soldiers and sailors, disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. LOUDENSLAGER, Mr. DRAPER, and Mr. RICHARDSON managers at the conference on the part of the House.

The message further announced that the House had agreed to the second report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 23464) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes; recedes from its disagreement to the amendment of the Senate No. 43, and agrees to the amendments of the Senate Nos. 60 and 61 with an amendment, in which it requested the concurrence of the Senate; further insists upon its disagreement to the amendments of the Senate to the bill upon which the second committee of conference have been unable to agree, asks a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. BINGHAM, Mr. GILLETT, and Mr. LIVINGSTON managers at the conference on the part of the House.

The message also announced that the House had passed the following bill and joint resolutions, in which it requested the concurrence of the Senate:

H. R. 15939. An act authorizing the Secretary of Commerce and Labor to exchange property;

H. J. Res. 203. Joint resolution to authorize the Secretary of State to invite the Permanent International Association of Navigation Congresses to hold in the United States in the year 1911 the Twelfth International Congress of Navigation; and

H. J. Res. 249. Joint resolution to enable the States of Wisconsin, Illinois, Indiana, and Michigan to determine the jurisdiction of crimes committed on Lake Michigan.

The message further returned to the Senate in compliance with its request the bill (H. R. 24149) granting to the Montana, Wyoming and Southern Railway Company a right of way across the Fort Keogh Military Reservation, Mont.

The message also announced that the House passed a bill (H. R. 28104) to amend an act to authorize a bridge across the Missouri River at or near Council Bluffs, Iowa, approved February 1, 1908, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bill and joint resolution, and they were thereupon signed by the Vice-President:

H. R. 26072. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the civil war and to widows and dependent relatives of such soldiers and sailors; and

H. J. Res. 257. Joint resolution to authorize the Secretary of State to invite the Governments of France and Great Britain to participate in the proposed tercentenary celebration of the discovery of Lake Champlain by Samuel de Champlain.

HOUSE BILLS REFERRED.

The following bills were severally read twice by their titles and referred to the Committee on Commerce:

H. R. 15939. An act authorizing the Secretary of Commerce and Labor to exchange property; and

H. R. 28104. An act to amend an act to authorize a bridge across the Missouri River at or near Council Bluffs, Iowa, approved February 1, 1908.

H. J. Res. 203. Joint resolution to authorize the Secretary of State to invite the Permanent International Association of Navigation Congresses to hold in the United States in the year 1911 the Twelfth International Congress of Navigation was read twice by its title and referred to the Committee on Foreign Relations.

H. J. Res. 249. Joint resolution to enable the States of Wisconsin, Illinois, Indiana, and Michigan, to determine the jurisdiction of crimes committed on Lake Michigan was read twice by its title and referred to the Committee on the Judiciary.

CREDENTIALS.

Mr. HEMENWAY presented the credentials of Benjamin Franklin Shively, chosen by the legislature of the State of Indiana a Senator from that State for the term beginning March 4, 1909, which were read and ordered to be filed.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented a memorial of the National Negro-American Political League of the United States, which was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

Memorial relative to a Liberian commission.

To the Senate and House of Representatives
of the United States in Congress assembled:

Your memorialists, colored citizens from various parts of the United States, respectfully represent that a meeting composed of colored citizens from several States of the Union was held at Shiloh Baptist Church, this city, on Tuesday evening, February 23, A. D. 1909, to give expression to the sentiment among colored Americans in favor of the recommendation by the President "that Congress will grant the appropriation of $20,000 to pay the expenses of a commission, who shall go to Liberia to examine into the situation, confer with the officers of the Liberian Government, and with the representatives of other governments actually present in Monrovia, and report recommendations as to the specific action on the part of the Government of the United States most apt to render effective relief to the Republic of Liberia under the present critical circumstances;"

That it was the unanimous conclusion of this meeting that Congress should be urged to act favorably upon the measure proposed, and the undersigned committee was appointed to draft the following memorial to your honorable body, which memorial we most respectfully submit herewith:

That Liberia, west coast of Africa, was founded by a society of American philanthropists, assisted by the Government of the United States, as far back as 1821. The original settlers of this colony were ex-slaves from the United States, few of whom had even a rudimentary education, and none knew aught of civil government. These colonists were assisted to a limited extent in their undertakings by our own Government and by private citizens of this country for about twenty-six years. At the expiration of this period the Liberians found it necessary to shift for themselves, and in 1847 declared Liberia to be an independent state;

That from that day to the present Liberia has maintained its sovereignty through many hardships and disadvantages. It seems almost miraculous that a few ignorant ex-slaves should have, without any direct aid, maintained a republican form of government for so long a time; but in the growth of nations and the advancement of civilization the demands upon and the responsibilities of Liberia increased until she has come where she needs the sympathy and guiding hand of a powerful nation, and in her hour of necessity she naturally turns to her mother country for help. The Liberian Government has asked the aid of the United States Government through special representatives sent recently to this country and through our State Department;

That the question now is, Shall our Government send to Liberia a commission to study the needs and conditions of that country and recommend the kind of help, if any, the United States shall render Liberia?

Your petitioners, in behalf of the negro citizenry of the United States, request that favorable action shall obtain upon this question because of our apparent duty to Liberia, and for the further reasons, to wit:

First. The President of the United States and the Secretary of State, after due consideration of the whole subject, viewing it from all of its various aspects, have recommended to Congress the authorization of the commission contemplated by this memorial.

Second. It is a custom, long established, in dealing with such questions to appoint commissions to investigate and report.

Third. The Liberian Government is an American institution, and the Liberian people are essentially Americans, and their civilization is not African or eastern, but western, civilization, and is in keeping with American thought and customs.

Fourth. As far as ascertained the entire colored population of the United States, constituting, as they do, one-eighth of the population of our country, approve of the appointment of the proposed commission.

"The relations of the United States to Liberia are such as to make it imperative duty for us to do all in our power to help the little Republic which is struggling against such adverse conditions;"

That we believe there is, and always has been, a deep sense of humanity in the bosom of the American people which makes them nobly compassionate to weaker nations who are struggling to maintain a government of, for, and by the people, and, relying upon this deep sense of humanity, we have come to urge you, the representatives of the American people, to give early and favorable consideration to the authorization of the appointment of a commission to visit Liberia.

Respectfully submitted by,

J. MILTON WALDRON, J. H. WELCH,
W. C. PAYNE, GEO. W. CABANISS,
JESSE LAWSON, WALTER H. BROOKS,
S. L. CORROTHERS, L. M. HERSHAW,
A. C. GARNER, *Committee.*

The VICE-PRESIDENT presented petitions of sundry citizens of Hartford, Conn., Brooklyn, N. Y., and Boston and Waltham, in the State of Massachusetts, praying for the passage of the so-called "children's bureau bill," which were ordered to lie on the table.

He also presented a petition of the Chamber of Commerce of Cleveland, Ohio, praying for the enactment of legislation to establish a bureau of mines in the Department of the Interior, which was ordered to lie on the table.

Mr. BURKETT presented a petition of the North Platte Valley Water Users' Association, of Scotts Bluff, Nebr., praying that an appropriation be made in aid of the improvement and maintenance of irrigation works in the western country, which was referred to the Committee on Irrigation and Reclamation of Arid Lands.

He also presented a petition of sundry business firms of Westpoint, Nebr., praying for the repeal of the duty on hides, which was referred to the Committee on Finance.

Mr. GUGGENHEIM presented petitions of sundry woman's Christian temperance unions and church organizations of Denver, Greeley, Georgetown, Fruita, and Pueblo, all in the State of Colorado, and of Washington, D. C., praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors, which were referred to the Committee on the Judiciary.

He also presented petitions of Local Lodges Nos. 1055, 90, 507, 566, 309, 804, 701, 492, and 181, of Longmont, Pueblo, Durango, Boulder, Colorado Springs, Fort Collins, La Junta, Ouray, and Trinidad, all of the Benevolent and Protective Order of Elks, in the State of Colorado, praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

Mr. GUGGENHEIM presented a joint memorial of the legislature of Colorado, which was referred to the Committee on Territories and ordered to be printed in the RECORD, as follows:

Senate joint memorial 1. By Senator Barela.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:

Your memorialists, the general assembly of the State of Colorado, respectfully represent that,

Whereas there is under consideration by the Congress of these United States the matter of the admission to the sisterhood of States the Territory of New Mexico; and

Whereas from various sources have come many suggestions of names for the contemplated new State; and

Whereas the Territory under consideration has borne the name it now enjoys, and in which its inhabitants maintain a sincere and devoted pride, for more than three centuries, which name was given to the said Territory and surrounding region by the early explorers thereof: Now, therefore,

Your memorialists respectfully recommend to your honorable bodies that the said Territory, when admitted as a State to this Union, be given and permitted to retain the name of the "State of New Mexico."

And your memorialists, by reason of geographical proximity and intimate commercial and social acquaintance, knowing the qualifications, attainments, and patriotism of the inhabitants of said Territory, further recommend the favorable consideration of its application for admission.

Directed, That this memorial be enrolled, and one copy sent to the President of the United States and one to each of the Members representing the State of Colorado in the Senate and House of Representatives in Congress assembled.

STEPHEN R. FITZGARRALD,
President of the Senate.
H. L. LUBERS,
Speaker of the House of Representatives.

Approved February 19, 1909.

JOHN F. SHAFROTH,
Governor of the State of Colorado.

STATE OF COLORADO,
OFFICE OF THE SECRETARY OF STATE.

UNITED STATES OF AMERICA, *State of Colorado, ss:*

I, James B. Pearce, secretary of state of the State of Colorado, do hereby certify that the foregoing senate joint memorial No. 1 of the seventeenth general assembly of the State of Colorado, passed and adopted at the regular session thereof, is a true and correct copy of the original senate joint memorial No. 1 now on file in the office of the secretary of state.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Colorado, at the city of Denver, this 20th day of February, A. D. 1909.

[SEAL.] JAMES B. PEARCE,
Secretary of State.
By THOMAS F. DILLON, Jr.,
Deputy.

Mr. WARREN presented a joint memorial of the legislature of Wyoming, which was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

Senate joint memorial 1.

Memorial to the Senate and House of Representatives of the United States.

Be it resolved by the senate of the State of Wyoming (the house of representatives concurring), That Wyoming is vitally interested in the coal industry of the United States, and its commercial prosperity is dependent to a large extent upon the present and future ability to sell its coal in the markets of the United States. Our markets extend in every direction, and Montana, Idaho, Washington, and Oregon are some of the natural outlets for the great production of coal in our State. Inasmuch as some of these markets could be more easily reached from the coal mines in the Dominion of Canada, owing to the proximity of the latter to these markets; inasmuch as the wages paid in the Dominion of Canada to coal miners are lower and the hours of labor are longer than those of the State of Wyoming, we are certain that the removal of tariff upon coal would do the coal industry in the State of Wyoming an enormous amount of damage, hard to calculate at this time, and would result in materially retarding the development of a great portion of our State; and we protest against any legislation of Congress that would tend to bring about such a result.

We therefore do hereby memorialize Congress not to reduce the tariff on coal, and we demand that our interests be fully protected. We do hereby further earnestly request our Members in Congress to use their efforts so that the tariff upon coal will be left as it is at this time.

Resolved further, That the chief clerk of the senate is hereby instructed to forward a copy hereof to each of our Members in Congress.

Mr. TELLER presented a joint memorial of the legislature of Colorado, which was referred to the Committee on Territories and ordered to be printed in the RECORD, as follows:

Senate joint memorial 1. By Senator Barela.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:

Your memorialists, the general assembly of the State of Colorado, respectfully represent that,

Whereas there is under consideration by the Congress of these United States the matter of the admission to the sisterhood of States the Territory of New Mexico; and

Whereas from various sources have come many suggestions of names for the contemplated new State; and

Whereas the Territory under consideration has borne the name it now enjoys, and in which its inhabitants maintain a sincere and devoted pride, for more than three centuries, which name was given to the said Territory and surrounding region by the early explorers thereof: Now, therefore,

Your memorialists respectfully recommend to your honorable bodies that the said Territory, when admitted as a State to this Union, be given and permitted to retain the name of the "State of New Mexico."

And your memorialists, by reason of geographical proximity and intimate commercial and social acquaintance, knowing the qualifications, attainments, and patriotism of the inhabitants of said Territory, further recommend the favorable consideration of its application for admission.

Directed, That this memorial be enrolled, and one copy sent to the President of the United States and one to each of the Members representing the State of Colorado in the Senate and House of Representatives in Congress assembled.

STEPHEN R. FITZGARRALD,
President of the Senate.
H. L. LUBERS,
Speaker of the House of Representatives.

Approved this 19th day of February, 1909.

JOHN F. SHAFROTH,
Governor of the State of Colorado.

STATE OF COLORADO,

By THOMAS F. DILLON, Jr.,
Deputy.

Mr. LA FOLLETTE. I present the petition of Thad C. Pound, of Chippewa Falls, Wis., which I ask may be printed in the RECORD and referred to the Committee on Finance.

There being no objection, the petition was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

To the honorable the Senate and House of Representatives, Washington, D. C.

GENTLEMEN: I beg respectfully to present to your honorable body this my petition, earnestly urging the enactment of a law providing for a national income tax, to the end that property, in the form of individual and corporate wealth, may fairly share the great expense of maintaining and advancing the National Government.

Since the termination of the law providing an income tax to aid in the prosecution of the civil war, the money burden required for the support of the Government has been borne by the individual, regardless of relative wealth. Property, demanding most for protection, has contributed nothing. "Life, liberty, and the pursuit of happiness" are guaranteed by our Republic. "The pursuit of happiness" means the creation of homes and the acquirement and enjoyment of wealth. In degree as property, personal and real, are enjoyed beyond a sufficient amount for comfortable support, to such degree should the possessor share the expense incurred by the Government to protect and defend such possession. Every function of Government, civil and military, is employed to defend property rights, and yet, under our present economic system, the individual, regardless of relative wealth, bears the entire burden of taxation.

Our economic policy in this regard is unjust, inequitable, and indefensible. While employed in the work of tariff revision, the time is most opportune to enact a law providing for a graduated income tax to supply the deficit which must occur under a just revision of duties on imports.

Since the act passed during Cleveland's administration was adjudged unconstitutional by the Supreme Court, the opinion has generally obtained that an amendment of the Constitution will be required to enable Congress to enact a valid statute on this subject. The President-elect, Judge Taft, in his speech of acceptance, expressed the opinion that such amendment is not required. Accepting his opinion, the important work may be greatly expedited.

While this petition is subscribed by but one humble citizen, it is my opinion that it reflects the conviction and wish of all patriotic, impartial, intelligent, and justice-respecting people. The most fortunate and wealthy should be first to approve and thus signify a true spirit of patriotism.

It is not my province to elaborate by argument, addressed to a Congress composed of more capable men, and, I believe, inspired by equally pure and patriotic purposes.

Respectfully submitted.

THAD C. POUND.

CHIPPEWA FALLS, WIS., *January 29, 1909.*

Mr. KNOX presented a petition of sundry citizens of Springboro, Pa., praying for the adoption of an amendment to the Constitution to prohibit polygamy, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Swissvale, Pa., praying for the passage of the so-called "postal savings banks" bill, which was ordered to lie on the table.

He also presented petitions of Local Union No. 1994, of Madera; Local Union No. 935, of Cassandra; Local Union No. 1317, of Becarra; Local Union No. 1295, of Glen Campbell; Local Union No. 2292, of Penfield; Local Union No. 1043, of Oak Ridge; Local Union No. 1747, of New Bethlehem; Local Union No. 1837, of Mount Equity; Local Union No. 2092, of Blandburg, all of the United Mine Workers of America, in the State of Pennsylvania, praying for the enactment of legislation to create a bureau of mines and mining, which were ordered to lie on the table.

He also presented memorials of J. G. Krans, of Greensburg; Bard & Cheney, of Port Allegheny; Evans & Ginnane, of Bradford; George A. Bodine, of Bradford; John F. Ely, of Jeannette; Pittsburg Metal Bed Company, of Pittsburg; Greensburg Business Mens' Association, of Greensburg; Greensburg Hardware and Supply Company, of Greensburg; Merchants' Association of Pottsville; C. A. Tobias, of Philadelphia; H. L. Meerhoff, of Irwin; R. L. Sheppard, of Philadelphia; Erie Business Men's Exchange, of Erie; Business Men's Association of Jeanette; L. Stein & Son, of Butler, all in the State of Pennsylvania, remonstrating against the passage of the so-called "rural parcels-post bill," which were referred to the Committee on Post-Offices and Post-Roads.

He also presented petitions of the State Federation of Women, of Philadelphia; the Consumers' League of Philadelphia; of Hinds, Noble & Eldredge, Philadelphia; the Civic Club of Philadelphia; 12 citizens of Philadelphia; the Council of Jewish Women of Pittsburg; the Civic Club of Allegheny County, of Pittsburg; of 3 citizens of Pittsburg, all in the State of Pennsylvania; of the Keller Printing Company, the Consumers' League, Council of Jewish Women, Public Education Association, New York Child Labor Committee, the Metropolitan Auxiliary of the New York Child Labor Committee, 17 citizens, all of New York City, N. Y.; the Social Economics Club and the Milwaukee House of Mercy, of Milwaukee, Wis.; the Bureau of Associated Charities of Newark; the Woman's Club of Orange, East Orange; the Society for the Prevention of Cruelty to Children, of Morristown; and the New Jersey Child Labor Committee, of East Orange, all in the State of New Jersey; the Boston Provident Association, Boston, Mass.; Rev. Dr. L. F. John, of Wilkinsburg, Pa.; Edward Rowe, of Indiana, Pa.; 42 employees of the Westinghouse Electric and Manufacturing Company, of Pittsburg, Pa.; Charles B. Cooke, of Richmond, Va.; Rev. Leon Addison Harvey, of Flatbush, N. Y.; Rev. Robert Freeman, of Buffalo, N. Y.; E. A. Jones, of Columbus, Ohio; and Leaton Irwin, of Quincy, Ill., praying for the passage of the so-called "children's bureau bill," which were ordered to lie on the table.

He also presented petitions of Lodge No. 103, of Sharon; Lodge No. 301, of Punxsutawney; Lodge No. 773, of Monessen; Lodge No. 970, of Bristol; Lodge No. 1045, of Gettysburg; Lodge No. 754, of Danville; Lodge No. 358, of Shamokin; Lodge No. 67, of Erie; Lodge No. 763, of Hanover; Lodge No. 1061, of Bradford; Lodge No. 714, of Norristown; Lodge No. 831, of Carnegie; Lodge No. 814, of Pottstown; and of Lodge No. 578, of Carlisle, all of the Benevolent and Protective Order of Elks, in the State of Pennsylvania, praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

He also presented petitions of the Barrett Manufacturing Company, of Pittsburg; Felton Sibley & Co., of Philadelphia; Bowen-Dungan Company, of Philadelphia; H. J. Heinz Company, of Pittsburg; George H. Alexander & Co., of Pittsburg; Brown & Zortman Machinery Company, of Pittsburg; National Lead and Oil Company, of Pittsburg; Wolfe Brush Company, of Pittsburg; Powers & Henry Company, of Pittsburg; Pittsburg Gage and Supply Company, of Pittsburg; East End Savings and Trust Company, of Pittsburg; James A. McNally & Sons, of Pittsburg; The Alling & Cory Company, of Pittsburg; J. K. McKee Company, of Pittsburg; W. E. Osborn Company, of Pittsburg; Logan-Gregg Hardware Company, of Pittsburg, all in the State of Pennsylvania; of W. T. Smith & Son, Pooley Furniture Company, John Williams Manufacturing Company, John B. Ellison & Sons, Suplee-Reeve-Whiting Company, Thacher & Co., The Hirst-Roger Company, Thomas Potter, Sons & Co., all of Philadelphia, Pa.; of the Retail Merchants' Association of Pennsylvania, of Erie, Pa.; of Weber-Ayers Hardware Company, of Fort Smith, Ark.; of the Chelten Trust Company, J. B. Lippincott Company, General Reporting Company, Ph. Wunderle, N. W. Ayer & Son, all of Philadelphia, Pa.; of P. Duff & Sons, of Pittsburg, Pa.; and of Norman G. Collins, of Chicago, Ill., praying for the adoption of certain amendments to the present bankruptcy law, which were referred to the Committee on the Judiciary.

Mr. LA FOLLETTE presented a joint resolution of the legislature of Wisconsin, which was ordered to lie on the table and be printed in the RECORD, as follows:

Senate joint resolution 12.

Joint resolution asking the Congress of the United States to refuse to enact the measure now pending relating to United States pension agencies.

Whereas it has come to the notice of the legislature of the State of Wisconsin that a measure is pending before the Congress of the United States which aims at the removal of 17 United States pension agencies from their present locations throughout the country to the city of Washington, D. C.; and

Whereas these pension agencies were established years ago for the convenience and accommodation of then only 232,000 pensioners of the United States; and

Whereas the number of pensioners has since that time increased to nearly 1,000,000 (being 951,687 June 30, 1908), and as this number is likely to further increase owing to legislation affecting widows, enacted April 19, 1908; and

Whereas this legislature is informed that all of the pensioners of the United States are vigorously protesting against this proposed centralization, consolidation, and removal to Washington, D. C., of these 17 pension agencies as inimical to their interest and convenience: It is therefore

Resolved by the senate (the assembly concurring), That the legislature of the State of Wisconsin respectfully asks the Congress of the United States to refuse to enact such a measure, being fully convinced that the system at present in use, to which all pensioners have now become accustomed will better subserve the interests of this vast body of pensioners, who owing to their services to the country, as well as to their advanced age are certainly entitled to consideration of their views and wishes on a measure that so vitally affects them.

Resolved, That a copy of these resolutions be transmitted by the secretary of state to the Senate of the United States and to the House of Representatives of the United States and to each of the Senators and Representatives from this State.

JOHN STRANGE,
President of the Senate.

Attest:
F. E. ANDREWS,
Chief Clerk of the Senate.

L. H. BANCROFT,
Speaker of the Assembly.

Attest:
C. E. SHAFFER,
Chief Clerk of the Assembly.

DEPARTMENT OF STATE.

Received February 9, 1909.

J. A. FREAR, *Secretary of State.*

REPORTS OF COMMITTEES.

Mr. WARREN, from the Committee on Military Affairs, to whom was referred the joint resolution (S. R. 136) authorizing the Secretary of War to donate two condemned cannon to the State of Nebraska, reported it without amendment and submitted a report (No. 1088) thereon.

He also, from the same committee, to whom was referred the bill (H. R. 24995) for the relief of Nathaniel Huntley, reported it without amendment and submitted a report (No. 1089) thereon.

Mr. FLINT, from the Committee on Public Lands, to whom was referred the bill (S. 9356) granting certain land to the town of Yuma, in the Territory of Arizona, reported it without amendment and submitted a report (No. 1090) thereon.

Mr. PILES, from the Committee on Commerce, to whom was referred the amendment submitted by himself on the 24th instant, proposing to appropriate $20,000 for additional amount for a light and fog-signal station at Battery Point, Washington, intended to be proposed to the sundry civil appropriation bill, reported favorably thereon, and moved that it be printed and, with the accompanying papers, referred to the Committee on Appropriations, which was agreed to.

Mr. MARTIN, from the Committee on Claims, to whom was referred the bill (H. R. 8661) for the relief of the Richmond Light Infantry Blues, of Virginia, reported it without amendment.

INDIAN APPROPRIATION BILL.

Mr. CLAPP submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26916) making appropriations for the current and contingent expenses of the Indian Department, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1910, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 6, 9, 21, 22, 34, 43, 51, 57, 62, 63, 74, 76, 77, 78, 83, 84, 92, 94.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 5, 8, 10, 11, 12, 13, 14, 15, 16, 17, 20, 23, 24, 25, 26, 27, 29, 35, 36, 37, 38, 40, 41, 42, 44, 45, 46, 47, 48, 49, 50, 52, 53, 54, 55, 59, 60, 61, 64, 65, 66, 67, 68, 69, 70, 71, 73, 75, 80, 85, 86, 88, 89, 90, 93, 95, 96, 97, 98, 99, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: Strike out all of said amendment after the word "company," in line 9, and insert the following: "under such terms and conditions and such rules and regulations as may be prescribed by the said Secretary;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows:

In line 2 strike out the word "act" and insert "provision."

In line 4 strike out the words "the said Secretary shall negotiate with the Indians for," and in line 5 strike out the words "said land;" and after the word ".price," in the same line, strike out the word "so."

In line 9 strike out the words "the provisions of this act" and insert "the terms of this provision."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: Strike out all the proposed amendment and insert the following:

"That the Secretary of the Interior be, and he hereby is, authorized, under the direction of the President, to allot any Indian on the public domain who has not heretofore received an allotment, in such areas as he may deem proper, not to exceed, however, eighty acres of agricultural or 160 acres of grazing land to any one Indian, such allotment to be made and patent therefor issued in accordance with the provisions of the act of February 8, 1887 (24 Stat. L., 388)."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment as follows: In line 2 of the proposed amendment, after the word "tribes," insert "and Osage Indians in Oklahoma;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: In line 10, after the word "reservation," insert "This provision shall not apply to the lands formerly comprising Indian Territory;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In line 3, after the word "Arizona," insert the words "and New Mexico;" at the end of said amendment add the words "the same to be immediately available;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment as follows: Beginning with the word "Repairs," in line 20, strike out all down to and including the word "dollars," in line 26; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment as follows: Beginning with the word "Repairs," in line 20, strike out all down to and including the word "dollars," in line 26; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: In line 3 of the proposed amendment, after the word "moneys," insert the words ", not exceeding one hundred and fifty thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment as follows: In line 25 of the proposed amendment, after the word "agreement," insert the words "and also any sum or sums paid by the United States to or for the benefit of said Indians, whether as a gratuity or otherwise, except such sums as have been paid for a specific purpose and an adequate consideration;" in line 51, after the word "judgment," strike out the words "or out of any money in the Treasury not otherwise appropriated, which sum is hereby appropriated, to be reimbursed to the United States from the funds of the Confederated Bands of Ute Indians;" in line 62, after the word "appealed," strike out the balance of the proposed amendment; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment as follows: In line 2 of the proposed amendment, after the word "Heyl," insert the words "upon surrender of the certificates herein referred to;" in line 5, after the word "of," strike out the balance of the proposed amendment and insert "one thousand five hundred dollars, the same to be accepted in full payment and discharge of seven hundred and fifty dollars of Kaw scrip and the interest thereon;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment as follows: In line 1 of the proposed amendment strike out "seven" and insert "five;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 58, and agree to the same with an amendment as follows: In line 1 of the proposed amendment strike out the words "sixty-six" and insert "fifty-eight;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: Strike out all of the proposed amendment and insert as follows:

"The Commissioner of Indian Affairs is hereby authorized to expend in behalf of said Indian school at Wahpeton, N. Dak., the unexpended balance of the item of five thousand dollars appropriated by the act of April 30, 1908, for the purchase of live stock, seed, equipment of farm, and machinery; and also to expend for said school the unappropriated balance of the appropriation of two thousand five hundred dollars made in said act of April 30, 1908, for the construction of concrete walk, driveways, and grading, and the unexpended balance of said two appropriations is hereby appropriated out of any money in the Treasury not otherwise appropriated."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment as follows: At the beginning of the proposed amendment strike out the words "Whatever of said work remains uncompleted on said date shall be turned over to the United States Indian agent at the Union Agency, Okla., to be by him completed: *Provided*,"

At the end of the amendment insert: "The Secretary of the Interior is directed, immediately after July 1, 1909, and prior to December 1, 1909, to pay allottees out of the funds of the Creek Nation the amounts severally due for the equalization of their allotments. In making such payment for the equalization of the Creek allotments eight hundred dollars shall be taken as the standard value of an allotment: *Provided*, That the payment of such funds for the equalization of allotment shall be a final and conclusive settlement of all claims for the equalization of allotments in the Creek Nation: *And provided further*, That as a condition precedent to any such payment the Creek national council shall pass an act, in form approved by the Secretary of the Interior, discharging the United States from all claim and demand on this account."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 81, and agree to the same with an amendment as follows: In line 3 of the proposed amendment strike out the word "July" and insert the word "December."

In line 6 strike out the word "nine" and insert the word "ten," and add: "The surface only of the segregated coal and asphalt lands of the Choctaw and Chickasaw nation shall be subject to condemnation under the laws of the State of Oklahoma for state penal institutions, county and municipal purposes, and for sewers and water systems: *Provided*, That the title to the surface of any lands so condemned shall revert to the Choctaw and Chickasaw nation upon its ceasing to be used for the purpose for which it was condemned and the tribal relation is hereby continued for such purpose and no title to any mineral rights in said lands so condemned shall be acquired hereunder;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment as follows: At the end of the proposed amendment add: "*Provided*, That in no event shall the amount thus paid exceed five thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: Strike out all of proposed amendment and insert:

"That the Secretary of the Interior be, and he is hereby, authorized to withdraw from the Treasury of the United States, at his discretion, the sum of two hundred and fifty thousand dollars, or so much thereof as may be necessary, of the funds on deposit to the credit of the Kiowa, Comanche, and Apache tribes of Indians in Oklahoma, and pay out the same for the benefit of the members of said tribes, for their maintenance and support and improvement of their homesteads for the ensuing year, in such manner and under such regulations as he may prescribe."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 91, and agree to the same with an amendment as follows: Strike out all of the proposed amendment, and in line 22 on page 47 of the bill, after the word "education," strike out the word "at" and insert "of;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 100, and agree to the same with an amendment as follows: In line 4 of the proposed amendment, after the word "organization," strike out the balance of the amendment and add: "engaged in mission or school work on any Indian reservation, for such lands thereon as have been heretofore set apart to and are now being used and occupied by such organization for mission or school purposes;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 101, and agree to the same with an amendment as follows: In line 12, after the word "dollars," insert the words "to be immediately available;" and the Senate agree to the same.

MOSES E. CLAPP,
CHARLES CURTIS,
ROBERT L. OWEN,
Managers on the part of the Senate.
J. S. SHERMAN,
THOMAS V. MARSHALL,
JOHN H. STEPHENS,
Managers on the part of the House.

The report was agreed to.

IMPROVEMENT OF SABINE AND NECHES RIVERS, TEXAS.

Mr. FRYE. I am directed by the Committee on Commerce, to whom was referred the bill (H. R. 27363) to provide for improving the navigable capacity of the Sabine and Neches rivers and the canal connecting the Sabine and Neches river with the mouth of Taylors Bayou, to report it favorably without amendment. The two Senators from Texas are very anxious that the bill should receive present consideration, and I ask that it be put upon its passage.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

JACKSON ADKINS.

Mr. McCUMBER. I am directed by the Committee on Pensions, to whom was referred the bill (H. R. 27419) to repeal the act of June 29, 1906, granting a pension to Jackson Adkins, to report it favorably without amendment, and I submit a report (No. 1085) thereon. I ask for the immediate consideration of the bill.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

Mr. McCUMBER. I think it proper to state that the repeal of the act, which is a private pension claim, is proposed for the reason that the claim was procured by false and forged affidavits.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

COMPAÑÍA DE LOS FERROCARRILES.

Mr. FULTON. I am directed by the Committee on Claims, to whom was referred the bill (H. R. 15681) for the relief of Compañía de los Ferrocarriles de Puerto Rico, to report it favorably with an amendment, and I submit a report (No. 1086) thereon. I call the attention of the senior Senator from Ohio [Mr. FORAKER] to the bill.

Mr. FORAKER. I ask for the present consideration of the bill. A similar bill has passed the Senate twice.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The amendment was, on page 1, line 8, after the words "United States," to strike out the words "upon any liability of the United States, if such liability be found for alleged" and to insert "for the reasonable value of the," so as to make the bill read:

Be it enacted, etc., That jurisdiction be, and is hereby, given to the Court of Claims (notwithstanding any statutory bar of limitation) over the claims, legal or equitable, of the Compañía de los Ferrocarriles de Puerto Rico, with power to hear and determine the same, finding the facts, and render judgment against the United States for the reasonable value of the services performed by said company in the island of Porto Rico in transporting the municipal police and guardia civile between the 12th day of August, 1898, and the 31st day of August, 1902, and in transporting the troops, munitions of war, supplies, and the like, and for alleged expense of repair and maintenance of telegraph lines of the Signal Corps, all of said services having been performed during the military occupation of said island.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

NIELS P. LARSEN.

Mr. BANKHEAD. From the Committee on Post-Offices and Post-Roads I report back favorably without amendment the bill (H. R. 8734) for the relief of Niels P. Larsen. The bill involves a small amount, and I ask unanimous consent for its present consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

It proposes to pay $148 to Niels P. Larsen, postmaster at Otto, Wyo., to reimburse him for money-order funds lost by fire while being transported to a government depository.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LAND IN IMPERIAL COUNTY, CAL.

Mr. FLINT. I am directed by the Committee on Public Lands, to whom was referred the bill (S. 9373) to provide for the sale of isolated tracts of public land in San Diego County, Cal., to report it favorably with an amendment to the title, and I submit a report (No. 1087) thereon. I ask unanimous consent for its present consideration. It is a local bill and of great importance.

Mr. WARREN. I shall not object to the consideration of this bill, but I shall feel obliged to object to any further bills being called up this morning.

The VICE-PRESIDENT. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

Mr. TELLER. I should like to have some explanation of the bill. It is a departure from what has been the policy of the Government for some years.

Mr. FLINT. The bill was prepared by the Department of the Interior. It is to provide for a condition of affairs that exists in the Imperial Valley, in California, where the land has been resurveyed by authority of an act of Congress. The resurvey resulted in leaving tracts of land between claims so small as to preclude the probability of the land being entered under existing laws.

It is the purpose of the bill to permit those who filed to take the small tracts of land adjoining the claim. In many instances the houses and barns are on these small tracts of land and not on the tracts shown by the resurvey to be the land located by the applicant.

Mr. TELLER. Interference on our part with those things is somewhat dangerous. I am not going to object to this proposed legislation, because it is confined to one State and one valley, but I do not think it is very wise to legislate in this way.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to provide for the sale of isolated tracts of public land in Imperial County, Cal."

BILLS INTRODUCED.

Mr. CLAPP introduced a bill (S. 9466) granting an increase of pension to Joseph Robichaud, which was read twice by its title and, with an accompanying paper, referred to the Committee on Pensions.

Mr. DILLINGHAM introduced a bill (S. 9467) for the relief of Charles Hector Larocque or his heirs or representatives, and others, which was read twice by its title and, with an accompanying paper, referred to the Committee on Claims.

Mr. MONEY introduced the following bills, which were severally read twice by their titles and, with the accompanying papers, referred to the Committee on Claims:

A bill (S. 9468) for the relief of heirs or estate of Eliza E. Spencer, deceased, and others; and

A bill (S. 9469) for the relief of the heirs or estate of John Owings, deceased, and others.

Mr. BANKHEAD introduced a bill (S. 9470) for the relief of heirs of John Allison, deceased, which was read twice by its title and, with an accompanying paper, referred to the Committee on Claims.

Mr. GUGGENHEIM introduced the following bills, which were severally read twice by their titles and, with the accompanying papers, referred to the Committee on Pensions:

A bill (S. 9471) granting an increase of pension to George W. Hamilton;

A bill (S. 9472) granting an increase of pension to George W. Spray;

A bill (S. 9473) granting an increase of pension to Jacob Ross;

A bill (S. 9474) granting an increase of pension to Annie George; and

A bill (S. 9475) granting an increase of pension to William L. Switzer.

Mr. BAILEY (by request) introduced a bill (S. 9476) for the relief of heirs or estate of A. Underwood and others, which was read twice by its title and referred to the Committee on Claims.

Mr. McENERY introduced the following bills, which were severally read twice by their titles and, with the accompanying papers, referred to the Committee on Claims:

A bill (S. 9477) for the relief of Mrs. Mary E. Pillow and others; and

A bill (S. 9478) for the relief of the heirs or estate of George W. Hackett, deceased, and others.

Mr. OVERMAN introduced a bill (S. 9479) for the relief of Salem Methodist Episcopal Church South, of Wayne County, N. C., which was read twice by its title and, with the accompanying paper, referred to the Committee on Claims.

Mr. TILLMAN introduced a bill (S. 9480) for the relief of the estate of Samuel P. Caughman, deceased, which was read twice by its title and, with the accompanying paper, referred to the Committee on Claims.

Mr. McCUMBER introduced a bill (S. 9481) for the relief of John O. Adams and others, which was read twice by its title and, with the accompany paper, referred to the Committee on Claims.

Mr. BAILEY (by request) introduced a bill (S. 9482) for the relief of the heirs of John W. Norwood, deceased, which was read twice by its title and referred to the Committee on Claims.

Mr. WARNER introduced a bill (S. 9483) for the relief of the heirs of Erdman Bodenschatz, deceased, which was read twice by its title and referred to the Committee on Claims.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. TELLER submitted an amendment providing for the widening of Sixteenth street NW. at Piney Branch, and for other purposes, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment authorizing the Secretary of the Interior to deduct from the respective shares of intermarried white citizens, as provided in section 8 of the act authorizing the Secretary of the Interior to issue patents in fee to purchasers of Indian lands, an amount sufficient to compensate their attorneys, etc., intended to be proposed by him to the sundry civil appropriation bill, which was ordered to be printed and, with the accompanying papers, referred to the Committee on Appropriations.

Mr. McCUMBER submitted an amendment proposing to appropriate $10,482.80 in settlement of the claim and allowances of the legal representative of the estate of Samuel Lee, deceased, etc., intended to be proposed by him to the general deficiency appropriation bill, which was ordered to be printed and, with the accompanying paper, referred to the Committee on Appropriations.

Mr. LODGE submitted an amendment providing that so much of section 5 of the act of May 30, 1908, authorizing the Secretary of the Treasury to acquire a site for a new custom-house in Boston, Mass., be amended so as to authorize the Secretary of the Treasury to cause plans to be prepared for the enlargement, remodeling, and extension of the present custom-house building in that city, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

He also submitted an amendment providing that jurisdiction be conferred upon the United States circuit court for the eastern district of Pennsylvania to adjudicate the suits at law commenced in the court of common pleas, Philadelphia, in the suits of Parsay O. Burrough and others for the recovery of alleged illegally collected taxes, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing to appropriate $250,000 from the immigrant fund for the purchase of a site and the construction of an immigrant station at Boston, Mass., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. BULKELEY submitted an amendment proposing to appropriate $3,500 for one professor of English and history to be selected and appointed by the Secretary of War, and to be on the same basis as regards rank, pay, and allowances as the other professors of the Military Academy, etc., intended to be proposed by him to the Military Academy appropriation bill, which was ordered to be printed and, with the accompanying paper, referred to the Committee on Military Affairs.

Mr. GAMBLE submitted an amendment proposing to restore to the First National Bank of Bellefourche, S. Dak., the full rights and remedies afforded to persons supplying labor and materials in the prosecution of public works as set forth in the act of August 13, 1894, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. BURNHAM submitted an amendment proposing to appropriate $1,000 to pay Robert W. Farrar for indexing and extra services as clerk to the Committee on Pensions, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Pensions and ordered to be printed.

Mr. BANKHEAD submitted an amendment proposing to appropriate $3,653.05 to pay Rittenhouse Moore for overwidth dredging in the Potomac River below Washington, D. C., intended to be proposed by him to the sundry civil appropriation bill, which was ordered to be printed and, with the accompanying paper, referred to the Committee on Appropriations.

He also submitted an amendment proposing to appropriate $12,092.56, being the amount of balance due the Alabama Great Southern Railroad Company from the United States for erroneous mail-pay deductions, etc., intended to be proposed by him to the sundry civil appropriation bill, which was ordered to be printed and, with the accompanying papers, referred to the Committee on Appropriations.

Mr. HEYBURN submitted an amendment proposing to appropriate $25,000 for the establishment of a fish-cultural station at some suitable place in the State of Idaho, intended to be proposed by him to the sundry civil appropriation bill, which was

referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment authorizing the Secretary of the Interior to require all the payments for water rights under the reclamation act of June 17, 1902, to be made to the special fiscal agent or other bonded fiscal officers of the Reclamation Service, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment authorizing the Secretary of the Interior to reappraise all unsold lots within town sites on projects under the reclamation act heretofore or hereafter appraised under the provisions of the act of April 16, 1906, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment authorizing the United States to relinquish to the county of Kootenai, Idaho, all its right, claim, or title to or the possession of that certain piece or parcel of land situated in Kootenai County, Idaho, being a portion of the Fort Sherman Military Reservation, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing to amend section 3 of the act approved July 5, 1892, to provide the times and places for holding terms of the United States courts in the States of Idaho and Wyoming, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

PUBLIC BUILDINGS ACTS.

Mr. BURROWS submitted an amendment intended to be proposed by him to the bill (H. R. 28167) to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public buildings acts, and for other purposes, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

COLORADO POSTMASTERS' ACCOUNTS.

Mr. TELLER. I submit a resolution which I ask to have printed and lie on the table.

The resolution (S. Res. 300) was read and ordered to lie on the table, as follows:

Resolved, That the Secretary of the Treasury be, and he is hereby, directed to have audited in the office of the Auditor for the Post-Office Department the salary accounts of former postmasters named in the annexed memorandum schedule, who served at post-offices in Colorado in terms between July 1, 1864, and July 1, 1874; the same that were stated by the Secretary of the Treasury on April 23, 1906 (S. Doc. No. 401, 1st sess. 59th Cong.), in reply to Senate resolution No. 92, first session Fifty-ninth Congress, dated March 6, 1906; and the Secretary of the Treasury is hereby directed to report to the Senate such stated and audited salary accounts of former postmasters as soon as they can be made ready.

INDIAN DEPREDATION CLAIMS.

Mr. MONEY. I submit a resolution on behalf of my colleague [Mr. McLAURIN], who is detained at home on account of sickness, and I ask for its present consideration.

The resolution (S. Res. 296) was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That the Attorney-General be directed to transmit to the Senate a list of judgments rendered by the Court of Claims in favor of claimants in Indian depredation cases not heretofore reported requiring an appropriation by Congress.

CROW RESERVATION, MONT.

Mr. CLAPP submitted the following resolution (S. Res. 298), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Indian Affairs, by subcommittee or otherwise, be, and it is hereby, authorized to investigate the affairs of the Crow Reservation, in the State of Montana. Said committee is authorized to send for persons and papers, to administer oaths, and to sit during the session of Congress or during recess, at Washington or elsewhere, and to have the testimony taken printed, the expense of such investigation to be paid out of the contingent fund of the Senate.

DR. CHARLES A. L. REED.

Mr. DICK submitted the following resolution (S. Res. 299), which was considered by unanimous consent and agreed to:

Resolved, That the Secretary of War be, and he hereby is, directed to furnish the Senate copies of all papers or communications in the War Department relative to Dr. Charles A. L. Reed, of Cincinnati, whose nomination as first lieutenant, Army Medical Reserve Corps, was sent to the Senate January 6, 1909, and subsequently withdrawn.

SENATOR FROM NORTH DAKOTA.

On motion of Mr. McCUMBER, it was

Ordered, That leave be granted to the Secretary to withdraw from the files of the Senate the transcript of the proceedings of the legislature of the State of North Dakota, presented February 6, 1909, certifying to the election of Mr. JOHNSON as Senator from that State for the term of six years commencing March 4, 1909, which were erroneously presented to the Senate.

WITHDRAWAL OF PAPERS—CONRAD HEENE.

On motion of Mr. LODGE, it was

Ordered, That upon the application of Conrad Heene, he is authorized to withdraw from the files of the Senate his certificate of discharge filed with the papers accompanying Senate bill 2486, Sixtieth Congress, first session, entitled "A bill to correct the military record of Conrad Heene," no adverse report having been made thereon.

PENSIONS TO ARMY NURSES.

Mr. SCOTT. I move that the bill (S. 185) increasing the pensions of nurses in certain cases be recommitted to the Committee on Pensions.

The motion was agreed to.

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. M. C. Latta, one of his secretaries, announced that the President had on the 24th instant approved and signed the following act:

S. 5989. An act authorizing the Department of State to deliver to Maj. C. De W. Willcox decoration and diploma presented by Government of France.

COMMITTEES OF THE SENATE.

Mr. BURKETT. I submit a resolution which I ask to have read, and I ask for the indulgence of the Senate for a few minutes before the resolution is referred.

The resolution (S. Res. 297) was read, as follows:

Resolved, That the rules of the Senate be amended by adding a new rule as follows, to be known as Rule No. ——:

"In committee assignments, chairmen shall be appointed agreeably to their wishes, in accordance with their seniority of service on the committee.

"Seniority of service in the Senate and the personal wishes of Senators in committee assignments shall be recognized as far as practicable, but no Senator shall be appointed to membership on both the Finance and Appropriations Committees, nor shall any Senator be appointed to more than two committees carrying appropriation bills, nor to more than two of the following committees: Appropriations, Commerce, Finance, Foreign Relations, Interstate Commerce, Judiciary, Rules."

Mr. BURKETT. Before the resolution is referred, I wish to ask the indulgence of the Senate for just a few minutes.

Mr. WARREN. It does not seem to me that we ought to delay the appropriation bill for a matter that is of the future. I dislike to object to the further consideration of the resolution at this time, but I think I must do so.

Mr. BURKETT. Does the Senator object to my submitting a few remarks at this time on the subject?

The VICE-PRESIDENT. The Senator from Nebraska asks the indulgence of the Senate to submit some remarks. Is there objection?

Mr. WARREN. I will not object if I may reserve it for a few moments, but if it leads to a general discussion I shall be compelled to object.

The VICE-PRESIDENT. The Senator from Nebraska will proceed.

Mr. BURKETT. Mr. President, in introducing this resolution I have been trying to find a time when there would be some leisure, but I realize that the rest of the hours of the session are going to be very busy. I shall not speak very long upon this particular resolution.

In a very short time we are going to reorganize the Senate for the next two years. We are going to reorganize it for three sessions of work. We are going to reorganize it for an unusual amount of work. In two decades I suspect that there has not been as much work confronting Congress, especially the Senate, as is going to confront us in the next two years. It seems to me that perhaps we might well consider at this time something of the condition of the organization of the Senate.

We may think that we can eliminate the question, but we can not; because the country has not been well satisfied, I think we all agree, with all the work of the Senate, and it has had something to say in reference to this matter. In my opinion, the country is going to say a good deal more upon the question of what the Senate is doing in the future than it has in the past. So I suggest to those who occupy the most prominent positions in the Senate that they can well afford to consider some of the things that are suggested in this resolution. They may not care what the country thinks, and yet they must, and they are considerate of what the country thinks upon the legislation we enact and upon that which we fail to enact.

I want to say that we have recognized the fact that there is a good deal of work ahead of us. The facts developed in the past few days show how that work has increased. Our appropriation bills are increasing in size. They are covering a great many more subjects than they ever covered before. In addition to that, we are carrying upon those appropriation bills a good

many riders involving general legislation. In addition to that, we have a good deal of industrial legislation that is coming on in the next three sessions of Congress. There is currency legislation, for which there is a commission already organized and studying the subject. There is also confronting us at the special session of Congress a tariff bill.

This work, I say, is unusually large for the next three sessions of Congress, covering the next two years, that we are about to organize for, and we can well afford to give some attention and some concern to the organization of the Senate for that time.

I wish to call the attention of the Senate to the fact that the work of Congress has so grown and so multiplied in recent years that we have been compelled to resort to the very doubtful expedient, as I think all agree, of omnibus bills. A few years ago we started out with an omnibus river and harbor bill.

A little later on there were omnibus public-building bills. Then there was an omnibus claims bill, and now we have an omnibus pension bill, and are threatened with others, showing the great volume of work that comes upon the Senate, and the increasing volume of work that has come upon us. All this work must be intrusted to committees. That is the practical way of legislation. Hence it is important that we should organize the committees to secure the most work and the most effective work that is possible.

I have introduced this resolution, Mr. President, with a view of distributing somewhat the work of the committees, so as to relieve certain individuals and give all the Senate a share in the legislation. For example, we had here one Senator, three or four weeks ago, moving to discharge the great Committee on Interstate Commerce from the consideration of a certain bill. The reply was that the Senators on that committee were so busy that they could not get a meeting; that they had not been able to act upon that particular bill. Later on, another Senator rose and introduced a resolution to discharge the Committee on the Judiciary from the consideration of a certain bill, and the reply again came from the chairman of that great committee that that was a busy committee; that the Senators who make up that committee were very busily engaged in all sorts of legislation. This shows us that the legislation is congested, not only in committees, but it is congested in the hands, as I shall show here from this committee record, of individuals. We ought, in my opinion, to take cognizance of this fact and see if the committee arrangements can not be made so that it will relieve this condition.

For example, Mr. President, I take from the directory what I think the Senate will consider the seven most important committees of the Senate, and I ask Senators to listen to this to see the showing that is made, because there has grown up a condition, without the fault of anybody. I am not complaining of any Senator. Senators will recognize that in the resolution I recognize two things—the choice of Senators in selecting committees and seniority of service. Whether or not that is a good thing, seniority service has been recognized so long in this body that I thought it should be recognized in adopting this rule.

But I want to take the seven most important committees to show how conditions are congested not only in committees, but with men and with particular communities. The seven most important committees I think we will all agree are the committees on Appropriations, Commerce, Finance, Foreign Relations, Interstate Commerce, Judiciary, and Rules. On those committees there are 89 committee assignments or 89 places. Those 89 places belong to 46 States. They belong to 92 Senators. Now, notice. Thirty-seven States hold them all. Fifty-three Senators hold them all. Nine States have no representation on those committees. Thirty-nine Senators have no place on those committees. But that is not the most. Sixteen States hold 55 of those 89 places. Thirty States hold only 34 of those 89 places.

Now, notice. Twenty-eight Senators hold 63 of those 89 places. Sixty-eight Senators hold 26 of those 89 places. Fifty-five of those 89 places are held by Republicans. Thirty-five Republicans hold them all. Twenty-eight Republicans have no recognition on these seven important committees. Thirty-four places, I will say, are held by Democrats. Twenty-eight Democrats hold them all, and 11 Democrats have no representation and no recognition on those seven most important committees.

As to the geographical distribution of these important committees, 23 places are held in all the States west of the Mississippi River and 66 places are held in all the States east of the Mississippi River. Eighteen States are west of the Mississippi River and 28 States are east of the Mississippi River. Those 18 States have 23 places; the 28 States have 66 places.

Six Senators hold more than three places on these important committees. I am not speaking critically of this matter. It is a condition that has grown up gradually by recognizing the proposition which I recognize in the rule of seniority without any let or hindrance. During these years the appointments have been congested, as I said, not only in the hands of a few Senators but in the hands of a few States and a particular section.

Now, I want to call attention to the second class of committees. There are 13 of them that I think are legitimately in the second class of the committees of the Senate. They are Agriculture, Indian Affairs, Military Affairs, Naval Affairs, Pensions, Post-Offices and Post-Roads, Immigration, District of Columbia, Interoceanic Canals, Philippines, Privileges and Elections, Public Buildings and Grounds, and Public Lands.

Mr. WARREN. Will the Senator allow me to interrupt him for a moment?

Mr. BURKETT. Yes.

Mr. WARREN. The subject the Senator has up is a very interesting one, and I should like to participate to some extent in the debate concerning it. I ask the Senator if he would be satisfied to lay it over and let it come up to-morrow morning, so that we may be able to get up the agricultural appropriation bill and get it into conference. I will ask for him, if he will do that, unanimous consent that the resolution may lie on the table and come up to-morrow morning.

Mr. BURKETT. I have but very little more here. I should like to get in my remarks connectedly. I want to place in the RECORD data that I have compiled for the use of all the Senators.

Mr. WARREN. The Senator will understand that as he goes along Senators will want to ask questions and will want to follow him, and I fear I will be under the necessity of having to lay the appropriation bill over for another day if the Senator continues. I am due in a very important conference early to-day, one in which the Senator is interested, and I thought it might suit him as well to take the time to-morrow morning after we pass the appropriation bill, when he would have plenty of time. That was my suggestion.

Mr. BURKETT. This is the first time in four years that I have ever asked the indulgence of the Senate to make any remarks outside of the question regularly before the Senate.

Mr. WARREN. I have nothing further to say except that I am conducting the agricultural appropriation bill, in which the Senator and his State are as much interested as I am and my State. Of course if the Senator thinks that what he has to say now is important enough so that he can take the risk of perhaps defeating the appropriation bill, I will make no further comment. Of course the Senator has not taken much time heretofore, and I was arranging so that he might have full time on another day, after we pass this one point; that was all.

Mr. BURKETT. I would rather finish now, unless some Senator does object. I realize how busy the Senator is. He is one of the busiest Senators in this body, and it illustrates very well the point that I am making in this particular part of my remarks.

Mr. WARREN. Before the Senator proceeds further, as he is intent upon proceeding, I want to say to the Senator that it is not a matter just now of my being on many committees. It is a matter of my accommodating, as I ought to do, those who are not in good health that I am in charge of this particular appropriation bill at this time.

Mr. BURKETT. I have just read a list of 13 second-class committees. On those committees there are 166 places.

Now, I want to call the attention of the Senate to the distribution of those 166 places, so that it may be seen how they correspond to the seven most important committees.

Twenty-five Senators hold 84 of these 166 places; 67 Senators hold 82 of these 166 places; and 16 Senators hold none of them at all.

There are 101 Republican places on these committees. Fifty-five Republicans hold them all. There are 65 Democratic places and 21 Democrats hold them all.

I have just one other table that I want to put in at this time, and that is a table which includes the committees enumerated in the resolution, the 7 important committees, and the committees carrying appropriation bills, to wit: Appropriations, Commerce, Finance, Foreign Relations, Interstate Commerce, Judiciary, and Rules, together with the committees carrying appropriation bills, such as Agriculture and Forestry, Indian Affairs, Military Affairs, Naval Affairs, Pensions, and Post-Offices and Post-Roads. Those are the committees I have enumerated in the proposed rule upon which no Senator can serve upon more than two.

There are 92 Senators. Upon all these committees there are 165 places. Twenty-six Senators hold 83 of these 165 places, and the other 66 Senators hold 82 places. Twenty-eight per

cent of the Senators hold nearly 51 per cent of the places. Five Senators hold 20 of these 165 places, and 21 Senators hold 63 of these 165 places.

Now, the question naturally occurs, How are Senators distributed with reference to being on two or more of these committees? Twenty-six Senators are on more than 2 of the enumerated committees; 30 are on 2; 22 are on 1; and 14 are on none at all.

Those are the committees, Mr. President, that my rule is expected to reach.

I just want to call attention to the fact that we have perhaps committees enough to go around, almost one to a Senator; but, after all, there are only about 20 of these committees that ever have meetings, and the rest of the committees are graveyards to the great body of the Senators. I refer to such committees as Audit and Control Contingent Expenses of Senate, Civil Service and Retrenchment, Fisheries, Forest Reservations, Geological Survey, Irrigation, Library, Patents, Printing, Canadian Relations, Coast and Insular Survey, Coast Defense, Corporations in District of Columbia, Examine the Several Branches of the Civil Service, Expenditures in the Department of State, Indian Depredations, Manufactures, Mines and Mining, Mississippi River and its Tributaries, Pacific Railways, Private Land Claims, Public Health and Quarantine, Railroads, Revolutionary War Claims, Transportation Routes to the Seaboard, University of the United States, Additional Accommodations for the Library of Congress, Disposition of Useless Papers in Executive Departments, Expenditures in Department of Agriculture, Expenditures in Department of Interior, Expenditures in Department of Justice, Expenditures in Department of Navy, Expenditures in the Department of Treasury, Expenditures in Department of War, Five Civilized Tribes, Investigation of the Potomac River Front, and Standards, Weights, and Measures.

I wish to point out how Senators are placed on these committees while the few—as I said, 28—control the great committees that do the business of the Senate and that really have meetings. For example, I find in looking through the Directory that one Senator has as committee assignments this magnificent list of committees: Expenditures in the War Department, Coast Defenses, Investigate Trespassers on Indian Lands, Manufactures, Military Affairs, Public Health and National Quarantine, Transportation and Sale of Meat Products. He has only one committee that ever has a meeting.

Another Senator has this magnificent array of committees: Expenditures in the Treasury Department, Canadian Relations, Fisheries, Immigration, Library, Transportation Routes to the Seaboard.

Another Senator has this list: Geological Survey, Coast and Insular Survey, Education and Labor, Interoceanic Canals, Irrigation, Pacific Islands and Porto Rico, Public Lands.

Another Senator has District of Columbia, Fisheries, Pacific Islands and Porto Rico, Patents, Printing, Public Health and National Quarantine, and Revision of the Laws of the United States.

In this list of committees, as Senators will observe, never more than one on the list ever holds any meeting.

This resolution, if it should go to the Committee on Rules, may not be reported back, and yet I submit it to the Senate, and I have taken pains to compile this record for the use of Senators, especially of those Senators who may be charged specifically with the reorganization of the committees of the Senate, calling their attention to the fact that during these years, by no particular attention being called to it, recognizing, as I say, the one question of seniority, without recognizing the whole country and the whole body of Senators, we have gradually—and, I want to insist, not, perhaps, improperly by any Senator's action—we have gradually concentrated all of these committees into the hands of a very few Senators. For example, when the chairman of the great Interstate Commerce Committee [Mr. ELKINS] rose one day to reply to the Senator from Oregon [Mr. FULTON] as to why he had not brought in a particular bill, I took occasion at that moment to open the Congressional Directory to find out whether it was true that the members of that committee were the very busy men the chairman said they were, and I found this condition prevailed: The chairman of the committee, the Senator from West Virginia, in addition to being chairman of that great committee, is on the Committees on Appropriations, Commerce, and Rules. To be sure, he is a busy man. That is too much work to impose upon a man, together with the chairmanship of that great committee.

The next in order on that committee is the Senator from Illinois [Mr. CULLOM], who, I found, was, in addition to being on the Committee on Interstate Commerce, the chairman of the Committee on Foreign Relations, a member of the Committee on Appropriations, and of two other small committees. The next Senator on the committee, the Senator from Rhode Island [Mr. ALDRICH], is chairman of the Finance Committee, a member of the Committee on Rules, and a member of three other smaller committees. The Senator from New Jersey [Mr. KEAN] is on the Committee on Interstate Commerce and——

Mr. KEAN. Mr. President——

Mr. BURKETT. And is chairman of the Committee to Audit and Control the Contingent Expenses of the Senate.

The VICE-PRESIDENT. Does the Senator from Nebraska yield to the Senator from New Jersey?

Mr KEAN. Mr. President, is this debate proceeding by unanimous consent?

The VICE-PRESIDENT. The Senator from Nebraska asked the indulgence of the Senate, and there was no objection to his proceeding.

Mr. KEAN. I think, if the Senator from Nebraska wishes to indulge in personalities, he had better suspend and we had better have the regular order.

Mr. BURKETT. Mr. President, I certainly do not want to indulge in personalities. I am merely reading from the Congressional Directory, and I have been very careful not to indulge in personalities.

Mr. PENROSE. Mr. President, I object to further consideration of the resolution, and I call for the regular order.

The VICE-PRESIDENT. Is there further morning business?

Mr. LODGE. What became of the resolution of the Senator from Nebraska proposing an amendment to the rules?

The VICE-PRESIDENT. It will go over under the rule.

Mr. LODGE. It will go over, Mr. President?

Mr. KEAN. Let it be referred to the Committee on Rules.

Mr. LODGE. It ought to go to the Committee on Rules.

The VICE-PRESIDENT. What disposition does the Senator from Nebraska ask for the resolution?

Mr. BURKETT. Let the resolution lie on the table, and I will finish my remarks upon it at some other time.

Mr. LODGE. Then, I move that the resolution be referred to the Committee on Rules; and let that motion go over with it.

The VICE-PRESIDENT. The Senator from Massachusetts moves that the resolution be referred to the Committee on Rules. The resolution will lie over, with the motion of the Senator from Massachusetts pending.

Mr. BURKETT. Mr. President, is that motion subject to remarks?

The VICE-PRESIDENT. It is not.

MISSOURI RIVER BRIDGE AT COUNCIL BLUFFS, IOWA.

Mr. MARTIN. I am directed by the Committee on Commerce, to whom was referred the bill (H. R. 28104) to amend an act to authorize a bridge across the Missouri River at or near Council Bluffs, Iowa, approved February 1, 1908, to report it without amendment.

Mr. DOLLIVER. I ask unanimous consent for the present consideration of the bill.

Mr. KEAN. Let us have the regular order, Mr. President.

The VICE-PRESIDENT. The Senator from New Jersey demands the regular order.

Mr. DOLLIVER subsequently said: I desire now to ask unanimous consent for the present consideration of House bill 28104, reported a short time ago from the Committee on Commerce by the Senator from Virginia [Mr. MARTIN].

The VICE-PRESIDENT. The bill will be read for the information of the Senate, subject to objection.

The Secretary read the bill (H. R. 28104) to amend an act to authorize a bridge across the Missouri River at or near Council Bluffs, Iowa, approved February 1, 1908; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SURFACE RIGHTS OF ENTRYMEN.

Mr. CLARK of Wyoming. I am directed by the Committee on Public Lands, to whom was referred the bill (H. R. 24834) for the protection of the surface rights of entrymen, to report it with amendments, and I submit a report (S. Rept. No. 1091) thereon. It is not a long bill, and, as it involves a matter of pressing importance, I ask unanimous consent for its present consideration.

The VICE-PRESIDENT. The bill will be read for the information of the Senate, subject to objection.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill had been reported from the Committee on Public Lands with amendments. The first amendment was, on page 1, line 3, after the word "faith," to strike out the word "hereto-

fore;" on page 2, line 13, after the word "reservation," to strike out the word "if" and insert the word "unless;" in line 14, after the word "determined," to strike out the word "not," so as to read:

That any person who has in good faith located, selected, or entered under the nonmineral land laws of the United States any lands which subsequently are classified, claimed, or reported as being valuable for coal, may, if he shall so elect, and upon making satisfactory proof of compliance with the laws under which such lands are claimed, receive a patent therefor, which shall contain a reservation to the United States of all coal in said lands, and the right to prospect for, mine, and remove the same. The coal deposits in such lands shall be subject to disposal by the United States in accordance with the provisions of the coal-land laws in force at the time of such disposal, but no person shall enter upon said lands to prospect for, or mine and remove coal therefrom, without previous consent of the owner under such patent, except upon such conditions as to security for and payment of all damages to such owner caused thereby as may be determined by a court of competent jurisdiction: *Provided*, That the owner under such patent shall have the right to mine coal for use on the land for domestic purposes prior to the disposal by the United States of the coal deposit: *Provided further*, That nothing herein contained shall be held to affect or abridge the right of any locator, selector, or entryman to a hearing for the purpose of determining the character of the land located, selected, or entered by him, and to a patent without reservation unless the land shall be determined to be chiefly valuable for coal, or to abridge or deny the right of any entryman who has earned a title to the land covered by his entry to a patent without reservation.

The amendment was agreed to.

The next amendment was, to insert at the end of the bill the following:

Provided further, That where public lands not withdrawn from settlement, but subject to homestead entry as agricultural lands, have been entered in good faith as such and proof of settlement and cultivation as required by law has been made at the local land office, which proof shows the land to be agricultural land, patents therefor shall be executed and delivered to the entrymen, notwithstanding there shall be lignite coal under such lands: *And provided further*, That where lands not withdrawn from settlement and entry as agricultural lands have been or hereafter shall be entered upon in good faith under the homestead laws of the United States and final proof is offered at the local land office, such proof shall be accepted and certificate therefor issued by the local land office to the entrymen and patents delivered, as now provided by law, notwithstanding the fact that such lands, or any portion thereof, shall be underlaid with lignite coal, unless it shall appear that the lands have a higher commercial value for mining than for agricultural purposes, and the burden of proof shall be upon the Government to show that such lands have a higher commercial value for mining than for agricultural purposes.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

AGRICULTURAL APPROPRIATION BILL.

Mr. WARREN. I ask the Senate now to proceed with the consideration of House bill 27053, the agricultural appropriation bill.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, under the head of "Bureau of Soils," on page 30, line 14, before the word "dollars," to insert "two hundred;" and in line 19, before the word "hundred," to strike out "three" and insert "five," so as to make the clause read:

Salaries, Bureau of Soils: One soil physicist, who shall be chief of bureau, $3,500; 1 chief clerk, $2,000; 2 clerks, class 4; 1 clerk, class 3; 3 clerks, class 2; 6 clerks, class 1; 1 draftsman, $1,200; 1 draftsman, $1,000; 4 clerks, at $1,000 each; 3 clerks, at $840 each; 1 carpenter, $840; 1 photographer, $1,200; 1 messenger, $720; 1 messenger or laborer, $480; 1 laborer, $600; 1 charwoman or laborer, $480; 1 messenger boy, $360; in all, $35,500.

The amendment was agreed to.

The next amendment was, on page 31, line 18, before the word "hundred," to strike out "six" and insert "eight," so as to make the clause read:

Total for Bureau of Soils, $232,860.

The amendment was agreed to.

The next amendment was, under the head of "Bureau of Biological Survey," on page 35, line 2, after the word "range," to strike out "$3,000" and insert "and other reservations for mammals and birds, $7,000; and so much of the $40,000 heretofore appropriated for the Montana National Bison Range as remains unexpended is hereby reappropriated to be expended in fencing said lands and enlarging the limits heretofore established so as to make the total acreage not to exceed 20,000 acres, and the President is hereby directed to reserve and except from the unallotted lands now embraced within the Flathead Indian Reservation, in the State of Montana, a sufficient area to enlarge said range as herein provided."

Mr. WARREN. Mr. President, before action is had on that amendment perhaps it would be better for the committee to perfect it. On behalf of the committee, I move to amend the amendment in line 6, after the word "reappropriated," by inserting the words "the same to be immediately available;" and in line 7, before the word "and," to insert "the erection thereon of the necessary sheds and buildings."

Mr. KEAN. Now, let the amendment be read as proposed to be amended.

The VICE-PRESIDENT. The Secretary will read the amendment as proposed to be amended.

The SECRETARY. On page 35, line 2, after the word "Range," it is proposed to strike out "$3,000" and to insert:

And other reservations for mammals and birds, $7,000; and so much of the $40,000 heretofore appropriated for the Montana National Bison Range as remains unexpended is hereby reappropriated, the same to be immediately available, to be expended in fencing said lands, the erection thereon of the necessary sheds and buildings, and enlarging the limits heretofore established so as to make the total acreage not to exceed 20,000 acres, and the President is hereby directed to reserve and except from the unallotted lands now embraced within the Flathead Indian Reservation, in the State of Montana, a sufficient area to enlarge said range as herein provided.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, on page 36, line 1, before the word "thousand," to strike out "seventy" and insert "seventy-four," so as to make the clause read:

In all, for general expenses, $74,420.

The amendment was agreed to.

The next amendment was, on page 36, line 4, before the word "thousand," to strike out "eighty-three" and insert "eighty-seven," so as to make the clause read:

Total for Bureau of Biological Survey, $87,420.

The amendment was agreed to.

The next amendment was, under the head of "Division of Publications," in the item for salaries, Division of Publications, on page 37, line 17, before the word "hundred," to strike out "four" and insert "five;" line 19, after the word "dollars," to strike out "2 forewomen, at $1,200 each" and insert "1 forewoman, $1,400; 1 forewoman, $1,200;" in line 22, before the word "class," to strike out "1 clerk" and insert "2 clerks;" and in line 25, before the word "clerks," to strike out "thirty-two" and insert "thirty-one," so as to read:

One foreman, miscellaneous distribution, $1,500; 1 foreman, farmers' bulletin distribution, $1,200; 1 forewoman, $1,400; 1 forewoman, $1,200; 2 clerks, class 2; 5 clerks, class 1; 10 clerks, at $1,000 each; 10 clerks, at $900 each; 25 clerks, at $840 each; 31 clerks, at $720 each.

The amendment was agreed to.

The next amendment was, on page 38, line 3, after the word "each," to strike out "1 skilled laborer, $900," and insert "2 skilled laborers, at $900 each;" and in line 7, before the word "skilled," to strike out "twenty" and insert "nineteen," so as to read:

Three folders, at $840 each; 2 skilled laborers, at $900 each; 15 skilled laborers, at $840 each; 15 skilled laborers, at $780 each; 19 skilled laborers, at $720 each.

The amendment was agreed to.

The next amendment was, in the item for salaries, Division of Publications, on page 38, line 20, before the word "dollars," to strike out "seventy-two thousand nine hundred and seventy" and insert "seventy-four thousand one hundred and thirty," so as to read:

In all, $174,130.

The amendment was agreed to.

The next amendment was, on page 39, line 22, before the word "dollars," to strike out "five thousand nine hundred and seventy" and insert "seven thousand one hundred and thirty," so as to make the clause read:

Total for Division of Publications, $207,130.

The amendment was agreed to.

The next amendment was, under the head of "Office of Experiment Stations," on page 43, line 23, before the word "dollars," to strike out "three thousand five hundred" and insert "four thousand;" and on page 44, line 12, before the word "hundred," to strike out "thirty-eight thousand seven" and insert "thirty-nine thousand two," so as to make the clause read:

Salaries, Office of Experiment Stations: One director, $4,000; 1 chief clerk, $1,800; 1 clerk and proof reader, $1,600; 5 clerks, class 2; 5 clerks, class 1; 5 clerks, at $1,000 each; 3 clerks, at $900 each; 5 clerks, at $840 each; 1 clerk or messenger, $840; 1 messenger or caretaker, $720; 3 clerks or messengers, at $600 each; 1 messenger or laborer, $480; 1 copyist or laborer, $720; 4 laborers or charwomen, at $480 each; 2 laborers or charwomen, at $240 each; in all, $39,260.

The amendment was agreed to.

The next amendment was, on page 47, line 1, after the word "expenses," to strike out "$10,000" and insert "$15,000: *Provided*, That $5,000 of this sum shall be expended for investigations and reports upon best methods and appliances for the preparation of human food, with a view to securing useful information for distribution in the homes of the people," so as to make the clause read:

Nutrition investigations: To enable the Secretary of Agriculture to investigate the nutritive value of agricultural products used for human food, with special suggestions of plans and methods for the more effective utilization of such products for this purpose, with the cooperation of other bureaus of the department, and to disseminate useful information on this subject, including rent and the employment of labor in the city of Washington and elsewhere, and all other necessary expenses, $15,000: *Provided*, That $5,000 of this sum shall be expended for investigations and reports upon best methods and appliances for the preparation of human food, with a view to securing useful information for distribution in the homes of the people.

Mr. KEAN. I should like to ask the Senator from Wyoming under what law that amendment is authorized?

Mr. WARREN. This is like a good many other matters in the bill. The only law respecting it is the carrying of the appropriation in the bill.

Mr. KEAN. What is the object of the amendment—to publish "receipt books" and distribute them around the country?

Mr. WARREN. The object is to investigate articles of human food, and I assume that the printing of the result of such investigations will, of course, follow, as it does in other matters.

Mr. KEAN. We are not going to publish under the provision Delmonico's receipt books or anything of that kind, are we?

Mr. WARREN. Oh, no.

Mr. KEAN. I think a point of order will lie against the amendment.

The VICE-PRESIDENT. What is the point of order?

Mr. KEAN. That it is general legislation.

The VICE-PRESIDENT. The Chair is of the opinion that the point of order is well taken, and sustains the point of order.

Mr. KEAN. Now, let the amendment striking out $10,000 be disagreed to at the top of page 47.

The VICE-PRESIDENT. The ruling of the Chair in sustaining the point of order on the amendment has the effect of striking out the portion in italics and restoring the text of the House bill proposed to be stricken out.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, on page 48, line 2, before the word "hundred," to strike out "sixty-eight thousand and seven," and insert "seventy-four thousand and two," so as to make the clause read:

Total for Office of Experiment Stations, $1,074,220.

Mr. WARREN. Mr. President, in view of the ruling of the Chair sustaining the point of order, which virtually took out $5,000, the total will have to be reduced that much.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Agriculture and Forestry was, under the head of "Office of Public Roads," on page 48, line 8, before the word "dollars," to strike out "two thousand seven hundred and fifty" and insert "three thousand;" and in line 14, before the word "dollars," to strike out "two hundred and ten" and insert "four hundred and sixty," so as to make the clause read:

Salaries, Office of Public Roads: One director, who shall be a scientist and have charge of all scientific and technical work, $3,000; one chief clerk, $1,600; four clerks, class 1; four clerks, at $1,000 each; one clerk, $900; two laborers, at $600 each; one messenger, $600; one messenger boy, $360; in all, $16,460.

The amendment was agreed to.

The next amendment was, on page 48, line 24, after the word "subject," to strike out "$18,000" and insert "for ascertaining the relative effectiveness of township, county, and state systems of road administration, and for suggesting and devising ways and means of coordination and cooperation in road legislation and administration between the several States for investigating the feasibility, cost, extent, and probable effect of national aid in the improvement and maintenance of rural delivery roads in the several States; and for the preparation of detailed and comprehensive reports of such investigations, to be submitted to the Congress of the United States as early as practicable, $38,000."

Mr. WARREN. Mr. President, before action is had on that amendment, I should like to perfect it on behalf of the committee. In line 4, on page 49, after the word "cost," I move to insert the word "and;" and in line 4, after the word "extent," to strike out "and probable effect of national aid in the" and insert in lieu thereof the words "of the."

The VICE-PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. In the amendment of the committee, on page 49, line 4, after the word "cost," it is proposed to insert the word "and;" and in the same line, after the word "extent," to strike out "and probable effect of national aid in the" and insert "of the," so as to read:

For ascertaining the relative effectiveness of township, county, and state systems of road administration, and for suggesting and devising ways and means of coordination and cooperation in road legislation and administration between the several States, for investigating the feasibility, cost, and extent of the improvement and maintenance of rural delivery roads in the several States, and for the preparation of detailed and comprehensive reports of such investigations, to be submitted to the Congress of the United States as early as practicable, $38,000.

The amendment to the amendment was agreed to.

The VICE-PRESIDENT. The question recurs on agreeing to the amendment as amended.

Mr. PENROSE. I make the point of order that this is general legislation.

Mr. BANKHEAD. Mr. President——

The VICE-PRESIDENT. Does the Senator from Pennsylvania withhold the point of order?

Mr. PENROSE. I will withhold the point of order to enable the Senator from Alabama to make a statement, and then will renew it.

Mr. BANKHEAD. Mr. President, the proposed amendment recommended by the committee to this paragraph of the bill is simply a limitation upon an appropriation. It is upon the same subject and has the same object in view that the paragraph which it proposes to amend has. It is simply a limitation upon an appropriation inserted in the bill and an attempt to direct the Secretary of Agriculture how the amount appropriated shall be expended. The language is:

For inquiries in regard to systems of road management throughout the United States and for giving expert advice on this subject.

That is an original provision of the bill. The committee offers the amendment on which the point of order is raised, the point being that the amendment is new legislation. While it is true, perhaps, that it is new in the sense that it has never before appeared in an appropriation bill, as I understand it, and as I understand the rule, this is simply, as I have already said, a limitation upon the appropriation and a direction to the Secretary how money shall be expended upon the same subject already provided for in the bill, and which has been in the appropriation acts for a number of years.

This is a very important question. If we are to appropriate money at all to authorize the Secretary of Agriculture, through and by his agents, to collect information upon this question, we ought to enable him to get accurate information and we ought to enable him, when the information has been obtained, to put it in such form that the Senate and the House and the country can have the benefit of it.

Mr. President, there is no more important question before this country than that of the transportation and distribution of products, and when we understand the vast amount of products, especially agricultural products, that must necessarily go over the dirt roads of the country to find a market, we at once appreciate how important this question is. The country wants information on it. The States and the counties and every section of the country are interested in it. They are all moving in an effort to improve the condition of the dirt roads, in order that the products of the farm may go over them at less cost and in order that the rural free-delivery system of the country may be conducted at a less expense, and that it may be extended to every section of the country.

I do not understand that this is new legislation in the sense that it is obnoxious to the rule. I hope the Senator from Pennsylvania will not insist upon his point of order. It is a very small appropriation, and it is a very important matter. I am exceedingly anxious to have it remain in the bill.

Mr. PENROSE. I now renew the point of order.

The VICE-PRESIDENT. The Senator from Pennsylvania raises the point of order that the amendment proposes general legislation upon a general appropriation bill. The language of the proposed amendment is quite clear. The Chair is of the opinion that it contravenes the rule, and therefore sustains the point of order.

The reading of the bill was resumed. The next amendment of the Committee on Agriculture and Forestry was, on page 49, line 21, before the word "thousand," to insert "and twenty," so as to make the clause read:

In all, for general expenses, $120,000.

Mr. WARREN. I make the request now that the Clerk may correct all totals as we go along, according to the changes that may be made in considering the bill.

The VICE-PRESIDENT. Without objection, it is so ordered.

The reading of the bill was resumed. The next amendment of the Committee on Agriculture and Forestry was, on page 49, line 24, before the word "dollars," to strike out "sixteen thousand two hundred and ten" and insert "thirty-six thousand four hundred and sixty," so as to make the clause read:

Total for Office of Public Roads, $136,460.

Mr. WARREN. That will have to be changed.

The VICE-PRESIDENT. Without objection, it is so ordered.

The next amendment was, at the top of page 50, to strike out:

MISCELLANEOUS.

Paper tests: To enable the Secretary of Agriculture to test such plants as may require tests to ascertain if they be suitable for making paper, $10,000, or so much thereof as may be necessary, including rent and the employment of labor in the city of Washington and elsewhere, and all other necessary expenses.

Total carried by this bill for the Department of Agriculture, $12,880,926.

The amendment was agreed to.

The next amendment was, on page 50, after line 19, to insert:

Total, Department of Agriculture, for routine and ordinary work, $13,633,276.

Mr. WARREN. That will have to be changed.

The VICE-PRESIDENT. The Secretary will change the total.

The next amendment was, on page 50, after line 22, to insert:

MISCELLANEOUS.

Paper tests: To enable the Secretary of Agriculture to test such plants and woods as may require tests to ascertain if they be suitable for making paper, $10,000, or so much thereof as may be necessary, including rent and the employment of labor in the city of Washington and elsewhere, and all other necessary expenses.

Mr. PENROSE. I should like to ask the chairman of the committee whether there is any particular reason why this paragraph should remain in the bill?

Mr. WARREN. The paragraph, if the Senator will notice, is to take the place of the one at the top of page 50. It is worded differently. The work is being done now under last year's appropriation.

Mr. PENROSE. I did not notice that.

The amendment was agreed to.

The next amendment was, on page 51, after line 4, to insert:

Importation of biological products, Bureau of Animal Industry: For all expenses necessary to enable the Secretary of Agriculture to control the importation, interstate transportation, and sale in the District of Columbia and the Territories of virus, therapeutic serum, toxin, antitoxin, analogous products applicable to the prevention and cure of diseases of animals, and products which are pathogenic to animals, including the employment of labor in the District of Columbia and elsewhere, $25,000, of which sum $10,000 shall be immediately available; and hereafter the Secretary of the Treasury shall require as a condition precedent to the entry into the United States from any foreign country of any virus, therapeutic serum, toxin, antitoxin, analogous products applicable to the prevention and cure of diseases of animals, and products which are pathogenic to animals, a report from the Secretary of Agriculture that such virus, therapeutic serum, toxin, antitoxin, or analogous product applicable to the prevention and cure of diseases of animals, or product which is pathogenic to animals, is true to name, is not contaminated in any way, and is not dangerous to the animal industry of the United States. To enable the Secretary of Agriculture to make the report hereinbefore provided for, the Secretary of the Treasury shall cause to be delivered to the Secretary of Agriculture, or to his duly accredited representatives, a sample of each shipment of virus, therapeutic serum, toxin, antitoxin, or analogous product applicable to the prevention and cure of diseases of animals, or product which is pathogenic to animals, offered for entry into the United States from any foreign country, and no such shipment shall be admitted into the United States on any pretext whatsoever unless the Secretary of Agriculture shall report to the Secretary of the Treasury that the virus, therapeutic serum, toxin, antitoxin, or analogous product applicable to the prevention and cure of diseases of animals, or product which is pathogenic to animals, included in the shipment, is true to name, is not contaminated in any way, and is not dangerous to the animal industry of the United States. If the Secretary of Agriculture shall report that any shipment of virus, therapeutic serum, toxin, antitoxin, or analogous product applicable to the prevention and cure of diseases of animals, or product which is pathogenic to animals, is not true to name, is contaminated in any way, or is dangerous to the animal industry of the United States, the Secretary of the Treasury shall refuse entry, and unless reexported within three months the said shipment shall be destroyed: *Provided*, That the owner or importer of any shipment of virus, therapeutic serum, toxin, antitoxin, or analogous product applicable to the prevention and cure of diseases of animals, or product which is pathogenic to animals, shall have the right to appear before the Secretary of Agriculture and introduce testimony to show that the virus, therapeutic serum, toxin, antitoxin, or analogous product applicable to the prevention and cure of diseases of animals, or product which is pathogenic to animals, is true to name, is not contaminated in any way, and is not dangerous to the animal industry of the United States. Hereafter no person shall barter, or exchange, or offer for sale, barter, or exchange, in the District of Columbia or the Territories, or shall send, carry, or bring for sale, barter, or exchange, or transport, or offer to transport, or cause to be transported, from one State or Territory or the District of Columbia into another State or Territory or the District of Columbia, any virus, therapeutic serum, toxin, antitoxin, or analogous products applicable to the prevention and cure of diseases of animals, or products which are pathogenic to animals, unless (*a*) the said virus, therapeutic serum, toxin, antitoxin, or analogous products applicable to the prevention and cure of diseases of animals, or products which are pathogenic to animals, shall be of foreign origin and shall have been admitted into the United States by the Secretary of the Treasury upon the report of the Secretary of Agriculture, as hereinbefore provided, or unless (*b*) such product has been propagated and prepared at an establishment holding an unsuspected and unrevoked license issued by the Secretary of Agriculture as hereinafter provided, to propagate and prepare such products for sale in the District of Columbia or the Territories, or for transportation from one State or Territory or the District of Columbia into another State or Territory or the District of Columbia: *Provided*, That the suspension or revocation of any license shall not prevent the sale, barter, or transportation of any virus, therapeutic serum, toxin, antitoxin, or analogous product applicable to the prevention and cure of diseases of animals, or product which is pathogenic to animals, which has been sold or delivered by the licentiate prior to such suspension or revocation, unless the owner or custodian of such product aforesaid has been notified by the Secretary of Agriculture not to sell, barter, or transport the same. The Secretary of Agriculture is authorized and directed to enforce this provision, and he is authorized to make and to promulgate such rules and regulations as in his judgment may be necessary to govern the issue, suspension, and revocation of licenses for the propagation and preparation of virus, therapeutic serum, toxin, antitoxin, or analogous products applicable to the prevention and cure of diseases of animals, and products which are pathogenic to animals, for sale or transportation as hereinbefore described. The said rules and regulations shall also provide for the proper marking of any package or container of any virus, therapeutic serum, toxin, antitoxin, or products aforesaid, and no virus, therapeutic serum, toxin, antitoxin, or analogous products applicable to the prevention and cure of diseases of animals, or products which are pathogenic to animals, shall be sold in the District of Columbia or the Territories, or transported or offered for transportation from one State or Territory or the District of Columbia into another State or Territory or the District of Columbia, in any package or container which is marked in a false, misleading, or deceptive manner.

Any person who shall sell or offer for sale in the District of Columbia or in the Territories, or who shall offer for transportation, cause to be transported, or transport from one State or Territory or the District of Columbia into another State or Territory or the District of Columbia, any virus, therapeutic serum, toxin, antitoxin, or analogous products applicable to the prevention and cure of diseases of animals, or products which are pathogenic to animals, in violation of law, shall be guilty of a misdemeanor and shall be punished by a fine not exceeding $500 or by imprisonment not exceeding one year, or by both such fine and imprisonment, in the discretion of the court.

Mr. ALDRICH. Mr. President, this amendment is clearly subject to the point of order, and is only another illustration of the manner in which this department seeks to absorb the functions of the entire Government, so far as I can see. It gives to the control of the Secretary of Agriculture the importation of a large amount of valuable and important articles, without reference to the Treasury Department or the law. I make the point of order that the amendment proposes general legislation.

Mr. WARREN. Will the Senator withhold the point of order for just a minute, in order that I may make an observation?

Mr. ALDRICH. Yes.

Mr. WARREN. Mr. President, I hardly think the Secretary of the Department of Agriculture quite deserves the criticism the Senator from Rhode Island has made, and I hardly think the Senator from Rhode Island wants to put it in that way. The Secretary of Agriculture has passed through a very serious time in the last few months, brought about by the foot-and-mouth disease in cattle, and he traces it to impure virus imported into this country. So far as concerns the amount of money, the amendment, I think, calls for only $25,000; and the Secretary, of course, knows, as we all do, that it is legislation and is subject to the point of order. But the Secretary of Agriculture believes, and I believe, and the Senator from Rhode Island will believe, that if it were possible it would be a good thing to prevent the importation of contaminated virus, toxins, and so forth.

Mr. ALDRICH. Undoubtedly.

Mr. WARREN. So the intent of this paragraph, I will say to the Senator from Rhode Island, is commendable.

Mr. ALDRICH. Undoubtedly.

Mr. WARREN. I commend the Secretary for bringing it to our attention. He understands that the amendment is subject to the point of order and understands that the matter should be placed before the Senate in another way if there was time before March 4 to act upon it in a separate bill. If any amendment is necessary or if there is any way to dispose of it otherwise, I shall be glad. But, at least, the Senator will admit that in this way the Secretary brings to the attention of Congress the fact that we are suffering under a condition which ought to be speedily reached and remedied.

Mr. ALDRICH. It ought to be reached by law, by an enactment which will make it illegal to import a serum or antitoxin that is not pure or proper, and that should be enforced through the ordinary channels in the Treasury Department.

Mr. WARREN. The Senator will admit that the intent of the Secretary, as I described it, to bring it to our attention should be commended rather than condemned.

Mr. ALDRICH. Perhaps I was a little strong in the language used.

Mr. WARREN. I do not think the Senator wants to be in the position of criticising the Secretary. He may criticise his way of reaching it, but certainly not his intent in this matter.

Mr. ALDRICH. I have a sort of feeling that this bill, perhaps necessarily so, has always been a mass of legislation, and

practically nothing but legislation, about which the Members of the Senate at large could not know very much.

I should be very glad if the time would ever come when we would undertake to fix by law the duties of the people in the Department of Agriculture, and when some general legislation should take the place of what I may call, perhaps, special legislation upon appropriation bills.

I think the Senator from Wyoming must agree with me that that is not the best practice. There are a great many questions which ought to be taken up and considered, and considered deliberately, by Congress and acted upon; and I have no doubt this is one of them, and if it had been brought up three or four or five weeks ago probably some act could have been prepared.

Mr. WARREN. I agree with the Senator on the general proposition, but this case is a very peculiar one, in that the ravages of this disease came so late in the season, and there has been little time for the Secretary to trace it down and find the cause or inception of the outbreak; and he took the first opportunity to bring it forward in this way, submitted as the recommendation of the department, for us to consider.

Mr. DOLLIVER. Mr. President, I desire to say one word, because I regard the proposition contained in the amendment as of very great importance to our people. The Department of Agriculture in its effort to suppress the foot-and-mouth disease traced that disease to virus imported into the United States by our manufacturing chemists and sold to our people. The investigations revealed that this virus, used upon calves in the District of Columbia, communicated the foot-and-mouth disease to them. The investigations also showed that these diseases are almost universal in the countries of Europe, in Asia, Japan, the Philippine Islands, and in practically all the countries from which we import our medical viruses, including the vaccine for smallpox and kindred diseases.

There could be no more horrible situation than the compulsory vaccination laws of the United States administered in connection with the free and uninspected admission of infected virus, to be sold and distributed everywhere among our people.

While I do not dispute that this proposition is subject to the point of order, I trust the Senator from Rhode Island will take into consideration the vast interests that are involved in it and the importance of the subject which it presents.

Mr. WARREN. Just a moment, Mr. President.

Mr. MONEY. Will the Senator from Wyoming yield to me for a moment?

Mr. WARREN. I desire to complete my remarks, if the Senator will wait one moment.

Mr. MONEY. Certainly.

Mr. WARREN. In this relation the Secretary testified before the committee that the department spent $350,000 to stamp out the foot-and-mouth disease in New England six years ago; that it has spent now more than a quarter of a million dollars in stamping out the second attack, and as I understood the Secretary—and if I am wrong, somebody may correct me—he has been able only at a late date to trace the commencement of the disease in the second attack, and he found it came through the introduction of diseased or contaminated virus.

While I should like to see the amendment become a law, whatever may become of this amendment, I want Senators to know that it is not only an important matter to those who grow live stock, but an important matter to our country and to Congress, in that it takes a great deal of money to stamp out the disease when it is once inoculated; and to let it go without stamping it out would result in the annihilation of the live-stock industry, so far as cattle in this country are concerned, and, besides, it would be a misfortune to every meat-eating person because of the scarcity and high prices which would follow.

Mr. MONEY. Mr. President, I agree with what has been said in great part by the Senator from Rhode Island [Mr. ALDRICH], that the appropriation bills are not to be made vehicles for general legislation, or even special legislation. It is a vicious practice. The Senate ought to consider these matters as they are brought up on their merits, and not as forced upon appropriation bills; but in this particular case I want to appeal to the Senator from Rhode Island along this line: This is an important question with respect to cattle, but it is very much more important to the human beings of this country. These vaccine points are the things with which we vaccinate the children of this country against smallpox. It has been found that it sometimes makes them immune from smallpox, but gives them the foot-and-mouth disease, which is just about as bad.

The trouble about the matter is that we can not in the United States produce a vaccine for any length of time, for the reason that this is not a pox country. It is not the home of the disease. We have to import it from abroad, and consequently the vaccine points that are produced upon the spot which is the habitat of this particular disease are the only ones that will retain the virus in sufficient strength to enable it to render the human being vaccinated immune from smallpox. Consequently we can not, as has been expected by a great many people, raise our own vaccine points, because they lose their power for immunity against smallpox. We now run the constant danger that has been manifested very unpleasantly in several localities of vaccinating children and grown people with these imported vaccine points and communicating the foot-and-mouth disease which is just about as bad as the smallpox.

While I recognize that the point of order is well taken and ought generally to be enforced, yet I ask the Senator to withdraw it in consideration of humanity as well as in consideration for the property of the country.

Mr. TILLMAN. If the point made by the Senator from Mississippi is true—and no doubt he has investigated this matter, because he is always so well informed and so absolutely reliable in all of his statements here; at least I have always thought so—I should like to inquire why, if we are importing diseased or impure or bad vaccine points, we do not provide for the proper investigation through the medical bureau of the Government, the Marine-Hospital Service, which has to do with the keeping out of diseases in general, and not load everything and mix up everything from whisky to theology on the agricultural appropriation bill. If we have a need for inspection and protection against the importation of these articles, it looks to me like we could very readily and very quickly prepare some legal remedy and let the Marine-Hospital Service take the matter of inspection in hand and thus prevent the importation of this stuff. I do not see why the man who has to deal with cattle and hogs should undertake to protect people.

Mr. MONEY. If the Senator is asking the question for an answer, I shall be glad to answer it.

Mr. TILLMAN. I am just merely throwing it out in the air, and I should like to know why it is proposed to load everything on the agricultural bill.

Mr. MONEY. I have my wire up, and I got your communication through the air, and I am about to give you a message in reply.

Mr. TILLMAN. All right, sir.

Mr. MONEY. And that is, that the department is not undertaking to protect human beings. It leaves that to the general Marine-Hospital Service. But it is an attempt to protect the cattle, which is one of the duties of the Department of Agriculture, belonging to the Bureau of Animal Industry, and in protecting stock it is incidentally doing what I think is a very much greater work. It does not start out to protect human beings; that is not the object; but it is a very valuable incident of this inspection. The Senator would not have the Marine-Hospital Service go into the inspection of articles concerning cattle and hogs.

Mr. TILLMAN. Not at all.

Mr. MONEY. The Secretary of Agriculture is performing his duties, as defined by law, to protect the cattle, and incidentally, in connection with that, he protects human beings. The Senator can rely upon what I have said as being true, because I think I am informed on the subject.

Mr. TILLMAN. I have said that I always have confidence in what the Senator from Mississippi says.

Mr. MONEY. I am very much obliged to the Senator for the compliment.

Mr. TILLMAN. However, I fail to be convinced by the investigation of the cattle doctors, who have said they locate the foot-and-mouth disease as coming from these poisonous importations. I want to know how they get hold of the fact that these points have infected people or inoculated people with the foot-and-mouth disease. How does a cattle doctor know when a child has the foot-and-mouth disease?

Mr. MONEY. Does the Senator want an answer to the question?

Mr. TILLMAN. I should like anybody to answer it who can.

Mr. MONEY. Well, I can, without any trouble whatever. The cattle doctor has nothing to do with it. The chemists who are employed by the department are not cattle doctors or veterinary surgeons. They are chemists, and they analyze these points. It is a qualitative and quantitative analysis, both. It gives the constituents. It gives even a trace, if there is one apparent, in the point which has been examined. It is done for the use of the department, to save the cattle of the country from this disease. But, as I have said, these points are used to vaccinate people as against smallpox, and they have communicated the other disease, because the cases have been reported, and

they are so well known and so widely diffused everywhere that it has become an object of serious concern to the medical profession.

Mr. ALDRICH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Rhode Island?

Mr. MONEY. Certainly.

Mr. ALDRICH. There are thousands of men, physicians and chemists, engaged all over the world to-day in the most important work of physical research. Thousands and millions of dollars are being expended in undertaking to give the human race a better knowledge of disease and a better knowledge of the means for its prevention or cure. Great discoveries have been made within the last five or six years along these lines, and much greater discoveries unquestionably will be made in the near future. The best scientific men in the world are engaged upon the study of this great problem.

Now, to put into the hands of the Secretary of Agriculture the final decision as to whether any of these serums which have been discovered anywhere in the world are pure or proper or ought to be imported into the United States—a power which never ought to be delegated to any executive officer—is, it seems to me, a very strange proposition. If this question is an important one, let some Senator interested in it bring in a bill here and let us discuss it upon its merits.

Mr. TILLMAN. And have hearings.

Mr. ALDRICH. And have hearings, and understand just what is going to happen; and not at the last minute, within three or four days of the close of the session, bring in important legislation of this kind upon an appropriation bill. I submit it is not fair to the Senate, and I insist upon my point of order.

Mr. MONEY. Will the Senator permit me to ask him a question before he takes his seat?

Mr. ALDRICH. Certainly.

Mr. MONEY. I said I quite agreed with the Senator in that his point was well taken and that these matters ought to come before the Congress for full hearing. But suppose a bill was introduced for the purpose mentioned, a report was made, and it was thoroughly discussed, then what would you do with it? You would have to turn the matter over to an executive officer of some department. That executive officer would have nothing to do with it himself, but he would intrust the matter to skilled chemists, who are approved in their profession. It is well known that there are eight or ten magnificent laboratories under the charge of the Secretary of Agriculture. Of course he does not know anything about chemistry. He does not presume to interfere with the operations of a skilled chemist.

Mr. ALDRICH. Instead of there being eight or ten, there must be a much larger number of laboratories of various kinds.

Mr. MONEY. I think not.

Mr. ALDRICH. I think one of the Senators from North Dakota——

Mr. MONEY. I will say a hundred and fifty or two thousand; I do not care.

Mr. ALDRICH. When the amendment was up with relation to the inspection of cotton or grain—I have forgotten which—one of the Senators stated that if the amendment were defeated it would necessitate the abolition of six or seven laboratories.

Mr. MONEY. No laboratory that I know of is required to sample cotton.

Mr. ALDRICH. I am merely taking the statement of one of the Senators from North Dakota in protesting against the amendment being dropped from the bill.

Mr. MONEY. It does not make any difference how many there are. You have to lodge the power to execute in some officer.

Mr. ALDRICH. Yes; but it ought to be an office like the Marine-Hospital Service or some other bureau which has employees who have expert knowledge, and not an ordinary chemist. I can not understand how an ordinary chemist would know anything about a new serum sought to be introduced into the United States for the cure or prevention of a disease. There ought to be a board especially organized for the purpose, or it ought to go into some bureau or department already organized——

Mr. MONEY. That is what we propose.

Mr. ALDRICH (continuing). Where they have trained experts to consider it.

Mr. MONEY. There are no ordinary chemists in the service of the Government anywhere. They are all men of approved skill and standing, or they could not have obtained the appointment. They could not retain their places if they were not proficient and skillful. It does not take an extraordinary chemist to analyze a vaccine point. The greatest objection I have ever found to the operations of Doctor Wiley was that he did not make quantitative, but simply qualitative analyses. He did not give the proportion of virus or poison or the toxicant or whatever it was to the other ingredients contained in the food product, for instance, or the drug he examined, but labeled them all "poison," without regard to the quantity.

I have no objection on earth to this matter going under the Marine-Hospital Service. I would as soon have it go there as anywhere else. But the proposition is here now, and of course it can go out on the point of order, and will go out if the point of order is insisted upon.

Mr. TILLMAN. Will the Senator from Mississippi answer a question?

Mr. MONEY. Certainly, if I can.

Mr. TILLMAN. The Senator has given a great deal of attention to these matters, and I wish to get some light if I can. We have had a good deal in the papers in the last month or so about a board of revision in the Agricultural Department which has overridden Doctor Wiley in the matter of the adulteration of canned goods by benzoate of soda. We have Doctor Wiley, I believe, in charge of the administration of the pure-food law which we passed, and he decided that certain things were injurious to health.

I know enough about canning, having seen my wife and mother can peaches and tomatoes and such things, to know that they do not put anything in the jar. It is a question of skill and knowledge of what you are doing and of excluding the air. But if those chemists who have overridden Doctor Wiley are right and this adulterant, benzoate of soda, is harmless, here we have doctors disagreeing. If Doctor Wiley is not fit to protect our health in the matter of canned goods, why should we turn over the question of protecting our health in vaccine points and virus and serums and all of that kind of stuff to him? We ought to get this thing straight in some way or other by somebody somewhere upon whom we can rely and not have him overridden by an executive order by the methods that are followed nowadays of appointing some commission or board to go around and undo what the law officer, charged with the administration of the law, attempts to carry out.

Can the Senator give me any information on benzoate of soda, as to whether it is poisonous or not?

Mr. MONEY. If you give me an opportunity.

Mr. TILLMAN. I give the Senator the opportunity now. I just wanted to make my question clear so that the Senator could cover it.

Mr. MONEY. I recognize the inquiring turn of mind of the Senator. He wants to know about these things, and it is very proper, and I am glad he does. I am not a chemist, but I want to say incidentally that I do not approve exactly all the methods of Doctor Wiley. For instance, I said that Doctor Wiley has been in the habit of making analyses, and if he did discover a trace of boracic acid or salicylic acid in a can of salted meat or any brand of manufactured food he would brand it poison. I will cite one case, if the Senator will let me.

I do not mean to say that I am reprehending Doctor Wiley's method at all, but I am meeting the objection made by the Senator from South Carolina. This is an instance that was brought to my attention some two or three years ago. A carload of salted meat was sent to a town in Pennsylvania from Chicago. It was tested by Doctor Wiley or some of his chemists after his plan of qualitative analysis. It had about one-quarter or a half of 1 per cent of boracic or salicylic acid; I forget which. When it got there it was branded "poison" and had to be returned, and commercially the thing was lost. That was an injury to the manufacturer. One of the competitors of this manufacturer concluded that he would send a carload down there with nothing in it, and when it got there it was branded "poison" as being filled with ptomaine and germ poison of all sorts. It has been held by a great many very competent chemists, and I believe it is the only thing we can do, that the qualitative and the quantitative analyses should be combined, and we should put upon any drug or any food the brand one or one-half or so much per cent of a certain acid.

Then it can be ascertained whether a man could eat 20 pounds without its hurting him or not. I have been informed that of the meat products put up in Chicago a man could not eat enough to do him any injury, although cases frequently occur where we hear that a small quantity of that sort passed inspection and has resulted fatally because of the introduction of germs after the opening of the can, or something of that sort.

This matter is not wholly with Doctor Wiley, I understand. There are chemists who do not belong to Doctor Wiley's department especially, but to the Animal Industry Bureau, who have this matter in charge. As far as I am concerned, I do

not care whether it is with the Department of Agriculture or with the Marine-Hospital Service or the Department of Commerce and Labor; it must all go to chemists, and we must assume that the chemists of one department are as good as those of another, as that the executive officer in one department will do his duty as well as the executive officer in another.

My experience here for a great many years—and I have been here about thirty-three or thirty-four years—has been that there never has been any head of a department of this Government that has been so industrious, so diligent, and so efficient as Secretary Wilson has been. Those who knew him a long time ago—and my old friend here was in Congress thirty-odd years ago, at the same time I was in the House with him—will recollect what a careful, painstaking, and thoroughgoing man he is. Under his care I do not believe that anything will suffer or go wrong, as far as he can control it. Of course there are certain things, as I explained to the Senator from Rhode Island, that he can not control. He is not a chemist, neither is he a lawyer. He must bring before the Assistant Attorney-General points of law. He is a farmer, and he has proved in his place to be of untold benefit to the farmers of this country. To-day throughout my State there is no man in this Government who has more respect and is more beloved than Mr. Wilson, the Secretary of the Department of Agriculture, and all hope down there that he will be his successor in office in the incoming administration, and I hope he will.

I do not want to take up time, Mr. President. I am sorry that I have said so much.

Mr. McCUMBER. Mr. President, we are met here with a condition that is far more important to the country than a mere legislative policy or a rule of the Senate. We are expending hundreds of thousands of dollars annually to stamp out certain diseases of cattle, horses, sheep, and so forth. We are attempting to prevent the spread of those diseases and also attempting to prevent diseases in the future of the same kind by inoculation with a certain character of virus.

It so happens that much of the virus that we are using for the purpose of the prevention of disease is bringing about the very diseases that we are trying to stamp out. This is going on. It is financially to our advantage to see that no virus is received and scattered broadcast over the land which will produce the very diseases we are attempting to get rid of.

It does not make very much difference who has the authority to make the investigation to determine whether a certain imported virus is proper and pure and should be used in the United States. The thing that is important to us is that we keep out the disease.

Mr. President, every man in the Senate, I believe, knows that it will be impossible to get a bill through both Houses of Congress dealing with this subject during the present session. The probabilities are that we will take up no other legislation than that of the tariff during the next special session. So a year would probably elapse, at least, before we could secure the proper legislation that would prevent the contemplated injury.

That being the case, it seems to me that we may properly suggest to the Presiding Officer that it might be for the interest of the country to submit this question to the Senate, and let them determine whether or not the exigencies of the case are more important at this particular moment than the particular rule the amendment may possibly contravene. We need the legislation, and we can get it through at this session only upon this character of a bill.

Mr. ALDRICH. Mr. President, there was one other point which I neglected to submit, but which was in my mind. These serums are all of them, so far as I know, brought here in air-tight packages. The fact is that they must be in air-tight packages to preserve their character. If some man connected with the Agricultural Department is to open all the packages and examine each one to find out whether it is pure or in accordance with his ideas, the whole thing is destroyed.

It seems to me that this proposition on its face is one of a character that none of us ought to think of adopting for a moment. If any legislation of this kind is to be had, it should be very carefully guarded, and we certainly should submit the decision of the question to some better authority than anyone who, I think, is now connected with the chemical laboratories in the Agricultural Department.

The VICE-PRESIDENT. Does the Senator from Rhode Island renew his point of order?

Mr. ALDRICH. Yes.

The VICE-PRESIDENT. That it is general legislation?

Mr. ALDRICH. Yes.

The VICE-PRESIDENT. The Chair is of opinion that the amendment is clearly in contravention of paragraph 3 of Rule XVI, and the point of order is well taken. Therefore the Chair sustains the point of order. The Secretary will resume the reading of the bill.

The next amendment was, on page 55, after line 23, to insert the following:

Commission on Country Life: For all necessary expenses to enable the Commission on Country Life, under the direction of the Secretary of Agriculture, to digest, compile, and publish the material already gathered by the commission, and to complete its work, including the employment of the necessary clerical assistance in the city of Washington and elsewhere, $25,000.

Mr. WARREN. I should like to perfect the amendment.

Mr. PENROSE. It is hardly worth while to take up the time.

Mr. TILLMAN. I shall make a point of order against it.

Mr. WARREN. Perhaps the Senator from South Carolina will be good enough to wait until I perfect it, so that he can see what he is making a point of order against.

Mr. TILLMAN. Certainly.

Mr. WARREN. In line 25, after the first word "the," I move to strike out the words "Commission on Country Life under the direction of the;" and on page 56, in line 2, to begin the word "commission" with a capital letter; and in line 3, after the word "commission," to strike out the words "and to complete its work," and insert the words "on Country Life." I ask the Secretary to read it as proposed to be amended.

The VICE-PRESIDENT. The Secretary will read it as it will stand if amended.

The Secretary read as follows:

Commission on Country Life: For all necessary expenses to enable the Secretary of Agriculture to digest, compile, and publish the material already gathered by the Commission on Country Life, including the employment of the necessary clerical assistance in the city of Washington and elsewhere, $25,000.

Mr. TILLMAN. Now, Mr. President——

Mr. KEAN. I was going to make a point of order against the Commission on Country Life amendment. I have been looking over the report of the commission, and I find some interesting matter. I find, for instance, a description of a well in Missouri which had seven snakes in it and they were using the water daily from the well, and the man's wife is "dead now, and he is looking for another." I think those things——

Mr. WARREN. If the Senator from New Jersey will permit me just a word, it is too late in the day and too late in the session to question the matter of order which we leave to the Chair. It is the intention here to take the result of the work, which consists of the replies of some six or seven hundred thousand letters and the hearings that were had in various cities and towns——

Mr. KEAN. I was just quoting from it.

Mr. WARREN. To take that which is valuable and publish it, so that we shall have the use of it. That is all there is in it.

Mr. TILLMAN. Mr. President, as I understand it, this is not a commission provided for by law; it has no legal function, and whatever has been done or whatever is proposed to be done would be, if we authorize it here, in the nature of general legislation. So I think the point of order made by the Senator from New Jersey is well taken, and if he withdraws it, I shall renew it.

Mr. WARREN. I will only say that there is no pretense that this is a commission we have provided for.

Mr. TILLMAN. If the Secretary of Agriculture wants to use this mass of material which I have read about, and which, as far as the South is concerned, is not worth the paper on which it is written, let him employ some of the numerous clerks that he has already to help fill up his annual report or anything else he chooses to get out in the way of bulletins, but do not let us, by giving him any more money for the purpose, recognize this creation of an illegal commission.

Mr. WARREN. If the Senator will allow me to finish the sentence which I had begun——

The VICE-PRESIDENT. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated by the Secretary.

The SECRETARY. A bill (S. 6484) to establish postal savings banks for depositing savings at interest, with the security of the Government for repayment thereof, and for other purposes.

Mr. CARTER. I ask unanimous consent that the unfinished business be temporarily laid aside.

The VICE-PRESIDENT. Without objection, it is so ordered.

Mr. TILLMAN. Mr. President——

Mr. WARREN. I wish to complete the statement I began. This is on the same level with lots of other printing that we do. There is no claim that it is to carry out some particular law, but it is a matter of having this very capable department select that which is valuable and present it to us in a printed form.

Mr. DOLLIVER. Mr. President, I regret very much that the point of order is made against this provision of the bill. In the form in which the provision now stands after the Senator in charge of the bill has amended it, in my judgment it is not open to the point of order that it is general legislation. On the contrary, I undertake to say that it is a mere provision to carry out existing law.

Mr. KEAN. Mr. President, may I ask the Senator what the existing law is?

Mr. DOLLIVER. I refer to the law creating the Department of Agriculture.

Mr. KEAN. This is in regard to the Commission on Country Life.

Mr. WARREN. No; that has been amended.

Mr. DOLLIVER. That has been amended and stricken out. I may be pardoned, but much has been said during the course of the debate incident to this appropriation bill to the effect that the Department of Agriculture seems to be privileged in the matter of these appropriations, and that every one of them carries more or less general legislation. That arises from the fact that little or no attention has been given by Congress from the time that the Department of Agriculture was created to general provisions for its guidance and for the determination of its functions and jurisdiction, but fortunately the charter of the Department of Agriculture is a broad one. It will surprise some Senators to know that the Department of Agriculture was established by law for two purposes expressed in the statute—one of them to disseminate information about agriculture and the other to disseminate garden and other vegetable seeds.

I propose now, Mr. President, to read the section of the original act establishing this department, section 520 of the Revised Statutes:

SEC. 520. That there shall be at the seat of government a Department of Agriculture, the general design and duties of which shall be to acquire and to diffuse among the people of the United States useful information on subjects connected with agriculture, in the most general and comprehensive sense of that word, and to procure, propagate, and distribute among the people new and valuable seeds and plants.

Section 526 goes on to say:

That the Commissioner of Agriculture—

I will say that when that department was made an executive department no change whatever was made in these laws, and no additions were made to them. The commissioner was simply made a secretary of an executive department.

Mr. TELLER. I should like to have the Senator state who appointed this commission. I do not understand that the Secretary of Agriculture appointed it.

Mr. DOLLIVER. I will come to that in one moment. I simply now desire, for the benefit of the Chair, to point out that this is not an appropriation in the nature of general legislation, but a mere appropriation of money to enable the Department of Agriculture to execute the statute which created it.

Section 526 provides that—

The Commissioner of Agriculture shall procure and preserve all information concerning agriculture which he can obtain by means of books and correspondence and by practical and scientific experiments, accurate records of which experiments shall be kept in his office, by the collection of statistics, and by any other appropriate means within his power; he shall collect new and valuable seeds and plants; shall test by cultivation the value of such of them as may require such tests; shall propagate such as may be worthy of propagation; and shall distribute them among agriculturists.

So much, then, for the general power confered upon the Secretary of Agriculture by the law creating the office.

Now, what is this information about which this discussion arose? It is information in the hands of the Secretary of Agriculture in response to letters and questions sent out, not by hundreds, but by hundreds of thousands, by the Secretary himself, through his department, to the farming people of the United States. The letters which we desire to have published are letters in response to these communications by the department. They are in the department now, and the question before us is whether we shall appropriate a little money to enable the Secretary of Agriculture to print and to disseminate them.

Mr. WARREN. There is no legislation in it.

Mr. DOLLIVER. There is no legislation of any sort in it.

Mr. TELLER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from Colorado?

Mr. DOLLIVER. Certainly.

Mr. KEAN. Let the amendment be read as modified.

Mr. TELLER. The Senator has not exactly answered my question. I do not understand that the Secretary of Agriculture appointed the commission or that he has any control over it. They may have lodged with him their papers; I do not know about that.

Mr. DOLLIVER. I will say to the Senator——

Mr. TELLER. If these are inquiries of the department, they have a right to publish them under the law without asking us.

Mr. DOLLIVER. They have not money to do it, and this is a mere appropriation to enable them to do it.

Mr. TELLER. They have not asked us to do it yet.

Mr. DOLLIVER. If the Senator will permit me, an estimate of the department, confirmed by the Treasury Department, is here for this appropriation.

Now, I want to say another word——

Mr. KEAN. May I ask the Senator if that is not an estimate of an appropriation to publish the report of the Commission on Country Life?

Mr. DOLLIVER. No; it is this material.

Mr. KEAN. Will the Senator kindly give me the estimate?

Mr. DOLLIVER. Now, I want to say a word about the Commission on County Life.

Mr. KEAN. Will the Senator let the amendment be read as proposed to be amended?

Mr. DOLLIVER. Certainly.

The VICE-PRESIDENT. The Secretary will read the amendment as proposed to be amended.

The Secretary read as follows:

Commission on Country Life: For all necessary expenses to enable the Secretary of Agriculture to digest, compile, and publish the material already gathered by the Commission on Country Life, including the employment of the necessary clerical assistance in the city of Washington and elsewhere, $25,000.

Mr. KEAN. That recognizes the commission.

Mr. WARREN. Where is the material?

Mr. DOLLIVER. The material is in the custody of the Secretary of Agriculture, as the reference to the commission is put in there simply to identify it.

Mr. KEAN. But it recognizes the commission.

Mr. DOLLIVER. I do not care whether it recognizes it or not. It is admitted, Mr. President, that the Commission on Country Life was appointed by the President without the authority of Congress. I have heard, both in debate and in private conversation here, a good many sneers and a good many questions about that method of appointing commissions. I confess I have not been able to see the force of these criticisms.

The President of the United States has his duties under the Constitution, as we have ours. The President of the United States is charged by the Constitution with at least two duties that bring him into contact with questions pending in Congress. One of them is the duty of recommending to Congress what, in his judgment, the public welfare requires, and the other is to exercise the executive veto against acts of Congress that do not meet his approval.

I have never seen any reason why a sensible man, in the Senate or out of it, should offer objection to the acts of the President of the United States in taking whatever means he sees fit to secure for himself the exact knowledge that is necessary to enable him to recommend to Congress measures needful to the public service.

I will not discuss the question of the payment of such commissions; but I will say for the Commission on Country Life that, although composed of seven men, every one of them engrossed in important personal affairs, it has cost the Government of the United States not one dime for all the months of labor which they have put into this investigation. Some of these men are highly esteemed in great universities of learning. Some are among the greatest agricultural editors of the United States. Others are connected with great agricultural societies entitled to exercise a just influence in the Government of the United States. They laid aside their private business. They reluctantly undertook a work the size of which they did not understand in advance, and for months, under the direction of the Secretary of Agriculture, for the information of the President, they carried on an elaborate research of vast importance and value to the people of the United States.

Now, then, the President of the United States has appointed a good many commissions. I undertake to say that not one of them has failed to render an important public service. I remember very well the first commission that the President appointed, the commission for the settlement of the anthracite-coal strike, and so fine was the service rendered by that commission that in those days no voice of criticism was heard in either House of Congress as to the payment of the expenses of that commission, and the feeling everywhere was one of approbation and gratitude. From that time to this I do not hesitate to say that no commission has been appointed that has not been worth to the American people everything that it has cost the Government of the United States.

But this commission has cost nothing except the labor of self-sacrificing men devoted to American agriculture. They gave

their time and poured out the treasures of their learning and their experience for the benefit of the farming population of the United States, and I say to you that if the Senate of the United States treats with disparagement and disrespect these labors thus freely performed at the request of the President of the United States under the direction of the Department of Agriculture, they offer an affront to more than half the population of the United States. And when my good friend from South Carolina [Mr. TILLMAN] suggests that the work of this commission, so far as the Southern States are concerned, was valueless, I call his attention to a name signed to the report of the Country Life Commission that is honored in his own State and everywhere throughout the South for the vigilant attention he has given to the practical needs of the farmers of the South in the efforts they have been making to build up their agricultural industries.

Mr. TILLMAN. Will the Senator please give the name?

Mr. DOLLIVER. I will say to the Senator from South Carolina it is Mr. Barrett, president of a society of actual farmers, representing, I understand, millions of people from every State of the South, whose representatives are now assembled in this city at the annual meeting of their organization.

Mr. TILLMAN. I know him.

Mr. DOLLIVER. I believe that the evidence taken by this commission in relation to the condition of agriculture in the South is of more value than most of the agricultural literature that we have been printing for years.

Mr. TILLMAN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from South Carolina?

Mr. DOLLIVER. Certainly.

Mr. TILLMAN. I want to demur to that statement, because I join my friend the Senator from Mississippi [Mr. MONEY] in my appreciation of the work of James Wilson. For the Senator from Iowa to undertake to say that the little examination and survey made by the Commission on Country Life in our part of the country is superior in value to the reports issued by Mr. Wilson is, I think, a reflection on his friend from Iowa, to which I must demur.

Mr. DOLLIVER. Of course, I mean no reflection upon anybody; but one of the reasons I feel an anxiety about this matter is that the Secretary of Agriculture, under whose immediate direction these inquiries were prosecuted and who is now the custodian of this unpublished literature, came before our committee, and in most earnest terms asked Congress to enable him to scatter broadcast throughout the United States these suggestions and advices from the farmers of the country, on account of their unquestionable interest to the people of the United States.

Mr. TILLMAN. I call the Senator's attention to the fact that this bill carries some $13,000,000, and when this department was first organized I think it carried about $4,000,000. It has risen by leaps and bounds, doubling and doubling and doubling——

Mr. DOLLIVER. Yes.

Mr. TILLMAN. And we do not know where it will go. If there is anything of essential value in these papers, I have enough confidence in James Wilson to believe that, with the force already at his hand, he will fish it out and put it in print in the form of a bulletin or in some other form.

Mr. DOLLIVER. Mr. President, it is true that the expenses of the Department of Agriculture have grown, but they have not grown more largely than our population; they have not grown more rapidly than the duties Congress has from year to year imposed upon that department.

I wish they would grow more. I would be glad to see a great deal of money that is now cheerfully and enthusiastically voted into enterprises that are of very doubtful value—I would be glad to see some of these funds diverted so that the Government of the United States might be able, unhampered by the question of money, to render real and vital service to our people on even a larger scale than it has so far been able to do.

I do not complain of the size of the appropriation reported by the committee for the Department of Agriculture. I shall certainly not begin to complain about it until it goes a little beyond the cost of one of the ships which we are annually adding to the wear and tear of the sea under various motives of enthusiasm and patriotism. I believe that money spent to forward the practical industries in which our people are engaged, and by which nearly one-half of them make their living, can be defended in this forum and everywhere else about as well as the ordinary appropriations which are made by the Government of the United States.

Mr. TILLMAN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from South Carolina?

Mr. DOLLIVER. Certainly.

Mr. TILLMAN. The Senator having called to mind the name of Mr. Barrett, I will state that Mr. Barrett is now in this city, along with other actual farmers, endeavoring to get some relief from Congress in legislation to protect us against the thieves and robbers on the cotton and grain exchanges of New York and Chicago, and I hope the Senator's zeal for agriculture and for genuine farmers will not "peter out" when the vote comes on those propositions.

Mr. DOLLIVER. I will say that I have already had the honor to report from the committee the bill introduced by our friend from North Dakota [Mr. MCCUMBER], which undertakes to deal in a practical way with some of the dark and mysterious schemes that are practiced on boards of trade in the terminal markets of the United States.

Mr. TILLMAN. I hope we shall not let it die between now and the 4th of March.

Mr. DOLLIVER. I am afraid it will die.

Mr. TILLMAN. Such bills always die.

Mr. DOLLIVER. But I will say to my friend that it will come to early in the session of the next Congress.

Mr. TILLMAN. I will remember that promise.

Mr. DOLLIVER. But, Mr. President, this is a question of order. This amendment is objected to because it is general legislation.

Mr. KEAN. And the appropriation not estimated for.

Mr. DOLLIVER. And not estimated for. I hold that it is in order because it is a substantial compliance with the estimate of the department, and instead of being general legislation it is a mere appropriation to execute the general law, by virtue of which the Agricultural Department exists and transacts its business.

Mr. WARREN. Mr. President, I have only a word to say on the point of order. I agree absolutely with my colleague on the committee [Mr. DOLLIVER] that there is law enough for inserting this provision under the original law creating the Agricultural Department. Furthermore, there is an estimate for this amount, and, still further, it is recommended by a committee. So I know of no point of order that can be successfully made against the amendment. It can not be general legislation when it provides for one year an appropriation precisely and exactly along the lines that the "organic act," if I may term it such, of this department so clearly lays out.

Mr. KEAN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Wyoming yield to the Senator from New Jersey?

Mr. WARREN. I do.

Mr. KEAN. I only want to call the attention of the Senator from Wyoming to the language of the Department of Agriculture in sending in the estimate. They make the estimate in the following language:

> For all necessary expenses to enable the Commission on Country Life, under the direction of the Secretary of Agriculture, to digest, compile, and publish the material already gathered by the commission and to complete its work, including the employment of the necessary clerical assistance in the city of Washington and elsewhere, $25,000.

That is the estimate sent to Congress.

Mr. WARREN. Certainly.

Mr. KEAN. There is no estimate whatever for what the amendment now proposes.

Mr. WARREN. The Senator from New Jersey certainly would not do himself or other Senators the injustice—he would not do his own intelligence the injustice—to say that the exact language which comes in here in official estimates is always incorporated in a bill.

Mr. KEAN. I think in nearly every bill which the Senator from Wyoming brings in here the language of the department is usually incorporated.

Mr. WARREN. Furthermore, let me read the amendment again:

> To enable the Commission on Country Life, under the direction of the Secretary of Agriculture—

Now, we simply put it directly under the Secretary of Agriculture.

Mr. KEAN. That is what the Agricultural Department asks.

Mr. WARREN. It is practically the same; but the right of the committee to use the estimate and change the language of course must be admitted in every case. The estimates are not intended to be in the words of the law. They simply suggest the amount and the purpose for which it is to be used.

Mr. KEAN. Mr. President, I still insist that the amendment is general legislation and not estimated for.

Mr. WARREN. If the Vice-President would like to see the language of the estimate, which comes here in the usual form that estimates come in, I will send it to the Chair.

The VICE-PRESIDENT. The Chair will submit the question to the Senate: Is the amendment in order? [Putting the question.] The Chair is unable to decide and will again put the question.

Mr. KEAN. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. FORAKER. Let the question be stated.

The VICE-PRESIDENT. The question is whether the amendment reported by the committee is in order.

Mr. FORAKER. Let the amendment be stated.

The VICE-PRESIDENT. The Secretary will state the amendment.

The SECRETARY. After line 23, on page 55, it is proposed to insert:

Commission on Country Life: For all necessary expenses to enable the Secretary of Agriculture to digest, compile, and publish the material already gathered by the Commission on Country Life, including the employment of the necessary clerical assistance in the city of Washington and elsewhere, $25,000.

Mr. CUMMINS. Mr. President, is the question whether the point of order shall be sustained?

The VICE-PRESIDENT. The question is whether the amendment is in order.

The Secretary proceeded to call the roll.

Mr. FULTON (when his name was called). I have a general pair with the junior Senator from Arkansas [Mr. DAVIS]. As he is absent, I withhold my vote.

Mr. KITTREDGE (when his name was called). I have a general pair with the senior Senator from Tennessee [Mr. FRAZIER]. In his absence, I withhold my vote.

The roll call was concluded.

Mr. SIMMONS. I desire to inquire if the junior Senator from Minnesota [Mr. CLAPP] has voted?

The VICE-PRESIDENT. The Chair is informed that he has not voted.

Mr. SIMMONS. I have a general pair with that Senator, and as he is absent I withhold my vote.

The result was announced—yeas 48, nays 19, as follows:

YEAS—48.

Bacon	Depew	Hansbrough	Piles
Bankhead	Dick	La Follette	Rayner
Borah	Dixon	Lodge	Richardson
Bourne	Dolliver	Long	Scott
Brown	du Pont	McCreary	Smith, Md.
Burkett	Elkins	McCumber	Smith, Mich.
Burnham	Flint	Newlands	Stephenson
Burrows	Foster	Overman	Stone
Clay	Frazier	Owen	Sutherland
Cullom	Frye	Page	Taylor
Cummins	Gamble	Paynter	Warner
Curtis	Guggenheim	Perkins	Warren

NAYS—19.

Aldrich	Carter	Johnston	Penrose
Bailey	Clarke, Ark.	Kean	Taliaferro
Brandegee	Foraker	Martin	Teller
Briggs	Gallinger	Money	Tillman
Bulkeley	Heyburn	Nelson	

NOT VOTING—25.

Ankeny	Davis	Hopkins	Platt
Beveridge	Dillingham	Kittredge	Simmons
Clapp	Fulton	Knox	Smoot
Clark, Wyo.	Gary	McEnery	Wetmore
Crane	Gore	McLaurin	
Culberson	Hale	Milton	
Daniel	Hemenway	Nixon	

So the amendment was decided to be in order.

The VICE-PRESIDENT. The question recurs on agreeing to the amendment as modified.

The amendment as modified was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Agriculture and Forestry was, on page 56, after line 5, to insert:

Commission on alcoholic liquor traffic: That a commission is hereby created, to be called "The commission on the alcoholic liquor traffic," to be composed as follows: Five Members of the Senate, to be appointed by the President of the Senate, and five Members of the House of Representatives, to be appointed by the Speaker. It shall be the duty of this commission to make an exhaustive and impartial investigation with respect to the character and effect of excise and liquor legislation upon the products of agriculture and the use of said products in the manufacture of alcoholic liquors; to investigate the alcoholic liquor traffic in its relation to revenue and taxation, to immigration, and its general economic and moral influence and bearing in connection with public health and the general welfare of the people; the relation of the General Government thereto in its various departments, and to the different States in the exercise of their police powers for the regulation, control, or prohibition thereof.

Mr. PENROSE. I make the point of order that the amendment is general legislation.

Mr. GALLINGER. Let the entire amendment be read.

The VICE-PRESIDENT. The Chair will recognize the Senator from Pennsylvania when the reading of the amendment shall have been completed.

Mr. PENROSE. I make the point of order on the first paragraph, but will withhold it until the whole amendment is read, when I shall renew the point of order on the whole amendment.

The VICE-PRESIDENT. The Secretary will resume the reading of the amendment.

The Secretary resumed and concluded the reading of the amendment, as follows:

Said commission shall give reasonable time for hearings if deemed necessary, and, if desirable, it may appoint a subcommission or subcommissions of its own members to make investigations in any part of the United States or its possessions, and it shall be allowed actual necessary expenses for the same. Said hearings and investigations shall be public, and all papers and documents filed with and all statements made by witnesses or other parties before said commission or subcommission shall be reported and printed for the use of Congress. It shall have authority to send for persons and papers and to administer oaths and affirmations. All necessary expenses, including secretary and other clerical assistants, rent, printing, and transportation, shall be paid from any money in the Treasury not otherwise appropriated, upon vouchers approved by the chairman of said commission: *Provided, however,* That not to exceed $30,000 per annum shall be expended under this paragraph. It may report from time to time to the Congress of the United States, and shall, at the conclusion of its labors, submit a final report containing the results of its investigations and its recommendations in relation thereto.

Each member of the commission shall be allowed actual expenses when engaged in the work of the commission. Any vacancies occurring in the commission shall be filled by appointment by the officer and in the same manner as was the member whose retirement from the commission creates the vacancy. In case the term of a Senator or Representative expires while a member of this commission, such Senator or Representative shall not thereby cease to be a member of this commission, drawing pay from the time his term as Senator or Representative expires, at the same salary as though still holding such office.

A sum sufficient to carry out the provisions of this act is hereby annually appropriated, out of any money in the Treasury of the United States not otherwise appropriated, not to exceed $20,000 for the remainder of the fiscal year 1909, which amount shall be immediately available, and not to exceed $60,000 in any fiscal year thereafter.

Mr. PENROSE. Now, Mr. President, I renew my point of order that the amendment proposes general legislation.

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Pennsylvania yield to the Senator from New Hampshire?

Mr. PENROSE. I yield to the Senator from New Hampshire.

Mr. GALLINGER. Having offered the amendment, Mr. President, I ask the Senator to withhold his point until I very briefly discuss the proposition.

Mr. PENROSE. Certainly.

The VICE-PRESIDENT. The Senator from Pennsylvania withholds his point of order.

Mr. GALLINGER. Mr. President, a few days ago I received a letter from a valued constituent asking for some data on the question of alcoholic liquors, their use and effect on the human system. I had to write him that no such data were available. I could send him data on almost any other subject he could suggest, but on this most important subject there is nothing that I could find that would be of service to him.

Mr. President, this is, to my mind, a very important matter, and I feel that it will be good legislation to put this provision for the appointment of this commission in this bill. It is a question in which the American people have a very deep concern; a question that involves the health, happiness, and prosperity of the Nation. I want furthermore to say that it is not by any means a new question, almost precisely similar legislation having many times passed the Senate during my service in the two Houses of Congress. In former years Congress was petitioned very largely for legislation of this nature, and, so far as I know, no change has occurred in the public mind concerning this matter.

A few of us in this body have been somewhat insistent in endeavoring to secure temperance legislation, and the Senate has been very responsive to the demands that have been made upon it in that regard. Not only have men who believe in temperance and some of us who believe in prohibition voted for such measures, but Senators who have not fully agreed with us have felt that we might well ask the Congress to place itself on the side of temperance as against the destructive effects of intoxicating liquors. The public also have responded and have given us to understand that the efforts we have been making here have been in behalf of healthful and beneficent legislation.

Mr. President, it has been said, and will be said, that the Anti-Saloon League has put itself in opposition to the proposed amendment on this bill. It is true that two officers of the Anti-Saloon League have sent a letter to some of us, and probably to all Senators, saying that they were opposed to this legislation, but it is a fact that the churches, which make up the membership of that great league and which make it an earnest and effi-

cient temperance organization, are in favor of this legislation, and I confess to the belief that the two or three officers of the Anti-Saloon League who have taken a stand in opposition to this proposed legislation have been misinformed, to say the least.

That the liquor interests are opposed to this legislation goes without saying; that we all understand; and there is no reason why they should not be opposed to it, because, I take it, the liquor interests of this country do not want the full facts presented to the American people so far as the influence and result of intoxicating drinks is concerned.

This legislation has a history. I hold in my hand a petition that was sent to the two Houses of Congress several years ago. I am not going to read the petition. It discusses both sides of this question and contains very valuable information. I will content myself by reading the concluding paragraph of the petition. It is as follows:

Thus the interest and the honor of all parties unite in asking, and in expecting, that the commission, which has been petitioned for by tens of thousands of citizens, be speedily appointed, and that its investigations be prompt, thorough, and impartial.

I ask, Mr. President, that the entire petition be made a part of my remarks.

The VICE-PRESIDENT. Without objection, permission is granted.

The petition referred to is as follows:

To the honorable Senate and House of Representatives in Congress assembled.

The undersigned respectfully begs leave to submit the following memorial:

Many thousands of men are engaged and many millions of dollars are invested in producing and importing alcoholic liquors for consumption in this country.

Men and money in much larger number and amount are engaged in the traffic in such liquors.

The income derived by our Government in 1883 from taxes and imposts on these liquors amounted to more than $100,000,000.

Besides this, the people of this country are paid by these producers nearly $100,000,000 each year for wages and materials used in their business.

These thousands of producers and tens of thousands of dealers have millions of customers, whose patronage enables them to pay these enormous amounts from their more enormous profits.

All these producers, dealers, and patrons are entitled to the protection and advantage which citizenship or residence in the United States should afford.

They are entitled to full credit for all the money they pay and for all the advantage and happiness their business yields to the people of this Nation.

These producers and dealers claim to believe their business conducive to the welfare of society. Thousands of their patrons conscientiously believe their wares indispensable to happiness and health.

But it has been openly charged, not only in the press and pulpit, but before honorable committees of Congress, that these men are utterly mistaken or willfully misrepresent; that the manufacture, sale, and use of intoxicants is injurious to society; that pauperism, crime, disease, and misery are created and increased thereby; that tenfold as much financial loss as financial gain results to the people of the country from the traffic; that the labor and material used in the manufacture of intoxicants are worse than wasted; hence, that the people of the country would be richer and happier should the manufacture cease, even though the laborers should be idle and the material wasted or worthless.

These are grave charges, but they have been persistently reiterated by men who claim to be honest and intelligent lovers of their country and their kind, and whose claims in some quarters at least have not been disputed.

Now, is it just, is it fair to the men and the capital engaged in this important traffic to allow it to remain under such imputations without full opportunity for reply and vindication?

Has Congress the right to listen to such charges, to even appoint committees to hear them, and still deny to the men and the traffic thus charged their day in court for full, fair trial and full vindication if the charges are false?

Is it just or fair to these accused men and their traffic to allow anybody, even their professed friends, to make them, by necessary implication, play the part of criminals, shunning the light because their deeds are evil?

It were a dangerous advocate who would thus plead guilty and confess judgment in advance for his clients.

Thousands of wealthy and intelligent men engaged in the business and millions of their honest customers have the right, and should have the desire, to utterly repudiate the efforts of any advocate who would so place them before the world, even though he may have been employed and paid by a few timid or bad men of their craft.

They have the right to protest against having their business placed unheard in the category of the cattle disease, the trichinæ, the grasshoppers, and cotton worms, for which intelligent investigation means intelligent efforts for extermination.

Doubtless the trichinæ and the cotton worms would protest against investigation if they could, but the silk worms can well afford to invite it.

If those engaged in the liquor business indorse the efforts to prevent investigation and thus thwart the efforts of those who demand it, the verdict in the great court of public opinion must inevitably be, Guilty as charged.

All the people of the nation should demand thorough and impartial investigation before such verdict shall be rendered, for until these charges against the traffic are refuted each citizen of the Nation stands charged with participation in and responsibility for the wrong, for each shares in the revenue derived from this business charged with producing misery, crime, and death.

The customers of the importers and producers, who consume the intoxicants, have especial right to expect full and fair investigation of the whole subject, for it is their money which pays the enormous revenue to the Government, which pays for the labor and material used in the manufacture, which makes the manufacturers and importers rich, and supports the liquor dealers and saloon keepers.

The Nation and the trade stand charged with taking this money from these citizens and returning, instead of value, misery, disease, and death. They have a right to expect prompt investigation of the charge.

All intelligent men, even those who most emphatically denounce the use of alcoholics as a beverage, agree that alcohol in some form and for some purposes is useful if not indispensable.

To what extent its manufacture and sale can be fully vindicated is a question which demands intelligent answer.

Again, it is charged and believed that alcoholics, domestic and imported, are very often so adulterated or counterfeited as to defraud or injure those who consume them. Thorough investigation should be made to vindicate the honest and genuine and protect against the spurious, if spurious there be.

Thus the interest and the honor of all parties unite in asking and in expecting that the commission, which has been petitioned for by tens of thousands of citizens, be speedily appointed, and that its investigations be prompt, thorough, and impartial.

Mr. GALLINGER. In the Forty-eighth Congress, Mr. President, my predecessor, Mr. Blair, from the Committee on Education and Labor, reported in favor of a bill almost identical with the amendment that is proposed to this bill. In their report the Committee on Education and Labor said:

This bill has been presented in many Congresses and repeatedly passed in the Senate, but has thus far failed to become a law. Its passage has been strongly urged hitherto and is still demanded by a great multitude of the wisest and most patriotic citizens of the country. Its leading purpose is to secure a thorough and authoritative investigation that the truth may become known and authentically, accurately, and reliably stated in regard to the existence, the nature, and the extent of the evils of the traffic in alcoholic liquors. In the great controversy now pending, and which seems to grow more and more serious, and to press more and more for solution between the advocates of diverse policies and measures in regard to this traffic, it is a matter of the first importance for all parties to ascertain the facts.

Upon that report, Mr. President, the bill passed the Senate without very serious opposition. Again, in the Fifty-second Congress, Mr. Carey, from the Committee on Education and Labor—and Mr. Carey was a distinguished Senator from the State of Wyoming—made a favorable report from the same committee, in which he said:

This measure is not a new one, as a bill substantially the same has been before Congress many years. It has been repeatedly reported favorably to each House of Congress and has passed the Senate seven or eight times. Its enactment has been strongly urged, and there appears to be no good reason why the bill should not become a law.

The questions growing out of the alcoholic liquor traffic have perhaps caused more agitation and discussion than any other subject, save one, in this country. Every civilized people have given it consideration, and every State in the Union has made laws to control or regulate the traffic. Men honestly differ as to what should be the line of legislation, which has resulted in widely diverse laws in the several States, and in some of the States different laws are applicable to different sections of the same State. There are those who believe in the passage of laws with a view of absolutely prohibiting the manufacture, transportation, sale, and use of alcoholic liquors; there are others who think that the manufacture, sale, and use should be restricted or controlled by taxation and license, while others believe its manufacture, transportation, sale, and use should be as free from restrictions and taxation as that of other manufactured products. There are those who believe that the laws of the United States should prohibit the sale and use of any alcoholic liquors that are not of a certain standard purity.

The result of that interesting report, made by the late Senator from Wyoming, was that a bill very similar to the provision in the appropriation bill of this year was passed by the Senate.

Mr. CUMMINS. Mr. President——

The VICE-PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Iowa?

Mr. GALLINGER. I do.

Mr. CUMMINS. It is for a question. Is it not true that the amendment creates an office? Will not the commissioners who will be appointed under this amendment, if it shall become the law, hold an office; and, if so, how can you avoid the constitutional provision which says that no Member of the Senate or of the House shall be appointed to an office created during the term for which he shall have been elected?

Mr. GALLINGER. That, I think, can be avoided by changing the word "commission" to "committee," and that I will do, in response to the suggestion of the Senator from Iowa.

Mr. President, the attitude of the church on this question is one of very great consequence; at least it appeals to me. I have here a letter reading as follows:

THE GENERAL CONVENTION OF BAPTISTS OF NORTH AMERICA,
New York, February 22, 1909.

Hon. JACOB H. GALLINGER.

DEAR SIR: The standing committee on temperance of the Baptist denomination pray your honorable body to pass Senator GALLINGER'S bill creating a commission of inquiry concerning the liquor traffic. Our committee represents some 5,500,000 members of our denomination, North and South, East and West. We believe your honorable body in passing the above-named bill will serve the best interests of our citizens.

On behalf of the committee.

Respectfully, yours,

THOMAS O. CONANT,
Chairman.
HERVEY WOOD,
Superintendent and Secretary.

Honorable SENATE OF THE UNITED STATES.

I have also a letter from Mrs. Margaret Dye Ellis, of the National Woman's Christian Temperance Union, as follows:

NATIONAL WOMAN'S CHRISTIAN TEMPERANCE UNION,
DEPARTMENT OF LEGISLATION,
Washington, D. C., February 20, 1909.

SIR: The National Woman's Christian Temperance Union, an organization representing upward of 300,000 women in the United States, at their last annual convention, held in the city of Denver, Colo., October, 1908, passed unanimously the following resolution:

"We recommend cooperation with the National Temperance Society and other organizations in asking Congress for the appointment of a national liquor commission to investigate the effects of the traffic upon the moral and industrial affairs of the Nation."

As the official representative of the Woman's Christian Temperance Union in Washington, I desire at this time to urge favorable action on the part of the Senate for the appointment of such a commission, believing that such action would meet with the hearty approval of a majority of the citizens of our country, many of whom for years have been petitioning Congress for such a commission, knowing full well that a letting in of light and honest report of facts connected with this great and important question would give abundant proof of the wisdom and necessity of the enactment of laws to curtail and prohibit the manufacture and sale of intoxicating liquor.

As representatives of the homes of our land, as those desiring first of all the protection of our children and youth from the ravages of intemperance, we pray the appointment of an unbiased commission to investigate the liquor traffic in the United States.

With great respect, I am,
Very sincerely, yours,
MARGARET DYE ELLIS.

The National Temperance Society also puts itself on record in favor of this legislation. Here is what that great society says:

THE NATIONAL TEMPERANCE SOCIETY
AND PUBLICATION HOUSE,
New York, February 20, 1909.

Hon. JACOB H. GALLINGER,
United States Senate, Washington, D. C.

DEAR SENATOR: In behalf of our National Temperance Society and Publication House, I wish to urge your support to the bill in the United States Senate (H. R. 27053), referred to the Committee on Agriculture and Forestry, calling for a commission on the alcoholic liquor traffic.

Our society has asked for this many times in previous sessions of Congress, and we believe it will be a wise measure.

We hope it will have your support.
Yours, very truly,
J. W. CUMMINGS, *Treasurer.*

The permanent committee on temperance of the General Synod of the Evangelical Lutheran Church in the United States likewise favors it, as will appear from the following:

PERMANENT COMMITTEE ON TEMPERANCE OF THE
GENERAL SYNOD OF THE EVANGELICAL LUTHERAN
CHURCH IN THE UNITED STATES,
Washington, D. C., February 20, 1909.

MY DEAR SENATOR: On behalf of the permanent committee on temperance of the Evangelical Lutheran Church in the United States of America (general synod), I desire to urge your favorable consideration and support of the proposition by Senator GALLINGER and recommended by the Committee on Agriculture and Forestry for a congressional commission of inquiry on the alcoholic liquor traffic. Such an investigation into the whole subject as is contemplated by this proposal has been earnestly favored by the leading temperance people for years. It can not reasonably be opposed by either the friends or foes of the liquor traffic. It is confidently believed that the public wants the facts on both sides and on all phases of the question, and that your action in helping to retain this provision in the agricultural appropriation bill will receive the commendation of the best people of your own State and throughout the country.

Again soliciting your aid in securing this legislation, I remain,
Very respectfully, yours,
J. M. GUSS, *Secretary*
(For the Committee).

The nonpartisan National Woman's Christian Temperance Union, by Mrs. J. Ellen Foster, legislative secretary, says:

NONPARTISAN NATIONAL W. C. T. U.,
Washington, D. C., February 22, 1909.

SENATOR JACOB H. GALLINGER.

MY DEAR SIR: It affords me real pleasure on behalf of the Non-partisan W. C. T. U. to write in behalf of an amendment to the pending agricultural appropriations bill, which amendment provides for the appointment by Congress of a commission of inquiry into the effects of the use of grain and other agricultural products in the manufacture of alcoholic beverages.

The interest of women in the results of the traffic in intoxicating beverages needs no argument or defense. Those who stagger in shame or go down to death in disgrace through strong drink are from our hearths and homes.

It seems to us that there is no wisdom or justification in the use of fruits and grain for the manufacture of alcoholic beverages. That which God gave for food for man and beast should not be robbed of its health-giving quality and made into the poison which steals away the brain, weakens the muscle, unsteadies the nerve, and lays the moral nature in ruin.

Also, we are not only mothers, sisters, and wives, we are Christian citizens, who protest against the waste of the nation's resources in this way. We are taxpayers; we are law-abiding citizens; we have a stake in the nation. We ask this impartial, scientific, and economic study of the whole question.

We are sometimes told that women are supersensitive on the temperance question. Possibly it is so. It would be strange if it were otherwise. In reply, we beg to suggest that some good men in responsible positions seem to us to be obtuse in thinking and slow in acting on this question.

The proposed commission would be of men—hard-headed, if you please—representing differing opinions on the main and related subjects. If they shall study the whole question from the standpoint of physical science, economic principles, social welfare, and moral progress, we will accept their conclusions as the best obtainable truth.

Every temperance woman in the country who knows the situation asks the appointment of this commission.

Yours, sincerely,
J. ELLEN FOSTER,
Legislative Secretary.

The Inter-Church Temperance Council also favors the legislation:

WASHINGTON, D. C., *February 20, 1909.*

MY DEAR SENATOR: The Inter-Church Temperance Council is a federation of the official temperance agencies of seven of the larger denominations, including the Baptist, Presbyterian, Methodist Episcopal, Evangelical Lutheran, Disciples of Christ, and the United Presbyterian and Reformed Presbyterian churches, and representing, in the aggregate, 12,000,000 communicant members. The governing bodies of these churches have appointed official temperance boards or committees, and the Inter-Church Temperance Council is the medium through which they make their united appeal to Congress for the passage of needful legislation.

At its meeting in December, 1908, in the city of Philadelphia, the Inter-Church Temperance Council unanimously passed the following resolution:

"We favor the appointment by Congress of a nonpartisan and unbiased commission of inquiry to make an exhaustive investigation as to the relation of intemperance and the liquor traffic to the health, wealth, happiness, and morals of the people."

I am authorized by the chairman and secretary of the council, and of whose executive committee I am a member, to appeal in their name for the passage of legislation providing for this commission. Speaking from an intimate knowledge of the situation throughout the country, I feel confident that provision for such an investigation by Congress at this time will meet with the hearty approval of a vast majority of the best element in every State. It is fair to both sides.

Trusting you may see your way clear to support this legislation and retain the amendment recommended by the Committee on Agriculture and Forestry in the pending bill, and in the earnest belief that it will receive the merited approbation of the people, I am,

For the Inter-Church Temperance Council, by the authority of Samuel Dickie, chairman, and Charles Scanlon, secretary,
Very respectfully, yours,
EDWIN C. DINWIDDIE.

The International Order of Good Templars has also put itself officially on record in favor of this amendment:

INTERNATIONAL ORDER OF GOOD TEMPLARS,
NATIONAL GRAND LODGE OF THE UNITED STATES,
Washington, D. C., February 20, 1909.

Hon. J. H. GALLINGER,
United States Senate.

MY DEAR SENATOR: The National Grand Lodge of Good Templars is earnestly in favor of the proposed commission of inquiry on the alcoholic liquor traffic. Temperance people throughout the Union have been urging an exhaustive and impartial investigation of the traffic in all its bearings for years past. The present seems to be an opportune time to provide for it, and the Committee on Agriculture and Forestry have favorably recommended it in the pending agricultural appropriations bill.

The Senate of the United States has indorsed this proposition upon seven different occasions, and several times the legislation has had the indorsement of the committees of the House, but without becoming law. Now both bodies are properly reflecting the rising sentiment of the people, and it is earnestly hoped this commission may be finally provided for. The people want an unbiased statement of the facts of experience on this question throughout the country, and they will appreciate and applaud the work of this Congress in providing the facilities therefor. The proposition is eminently fair to both sides, and I trust it may commend itself to your judgment.

Hoping, on behalf of the National Grand Lodge of the International Order of Good Templars, that you may see your way clear to vote to retain this provision in the bill, and assuring you of my sincere belief in its indorsement by the masses of the people throughout the country, I remain,

Yours, very respectfully,
EDWIN C. DINWIDDIE,
National Electoral Superintendent.

Yesterday I received a dispatch in these words:

PITTSBURG, PA., *February 23, 1909.*

Presbyterian temperance committee, representing 1,300,000 members, favors commission on alcoholic liquor traffic.

JOHN F. HILL, *Secretary.*

In the mail of that day I received a letter from the same organization as follows:

PITTSBURG, PA., *February 22, 1909.*

ESTEEMED SIR: On behalf of the temperance committee of the United Presbyterian Church of North America, we respectfully petition your support for the bill now before the Senate creating the Commission on the Alcoholic Liquor Traffic. The National Antisaloon League is not authorized to speak for our denomination in opposition to this measure.

Yours, respectfully,
J. T. MCCRORY,
Chairman Committee.

Mr. President, I have not taken any time in discussing the agricultural appropriation bill. I have been engaged in other duties. Had it been otherwise I would have discussed two or three other matters that are in the bill. But in this matter I feel justified at this late day of the session in occupying the few minutes I have in calling attention to the great importance of the proposed legislation. I had hoped that no Member of this body, in view of the fact that similar legislation has passed the Senate seven or eight different times, would have made a point of order against it or would have cast a vote against it. To my mind it is as important a matter as has ever engaged the attention of this great body. It is very essential that in some

way we should be put in possession of the facts on this great question which are not now available.

Mr. President, I indulge the hope that notwithstanding the point of order has been made against this most beneficent amendment, the Senate in its discretion and its wisdom will see to it that the amendment is not stricken from the bill.

I desire to modify the amendment by striking out wherever it occurs the word "commission" and inserting the word "committee," and by striking out wherever it occurs the word "subcommission" and inserting the word "subcommittee."

The VICE-PRESIDENT. Without objection the amendment to the amendment is agreed to.

Mr McCUMBER. Mr. President, a very considerable portion of the people of this country believe that the evils of the traffic in intoxicating liquors, the evils of its use, are so great as to more than counterbalance or offset any benefit derived from the mere revenue standpoint. They believe that the revenue side of the liquor question is the great obstacle to any effort to destroy the trade itself.

In the pending amendment they are trying to secure some report that will have as its foundation an unprejudiced investigation, which shall clearly present to the country the great curse of the liquor habit, side by side with such benefits as may be found, and with a view to bringing to a final decision the question whether it is not best for the Government of the United States to take hold of the situation and assist in wiping out the liquor habit by governmental action; and if it is found that the revenues received from the manufacture and sale of intoxicants is not a sound political one, then to suggest some other plan of raising revenue.

On the other hand, the great liquor interests of the country declare that if used in moderation their product is a blessing, and should be allowed under such restrictions as shall remove the evils of its overuse. They claim that the people need it for their own use and the Government needs it as an income producer.

The strange feature about this question is the difference of views between the several temperance organizations. We have letters from some of those organizations declaring that it is a saloon measure, and asking us to vote against it. We have letters from others commending its soundness and requesting us to vote for it.

I have not heard from the saloon side of this question. I do not need for my own guidance the report of an investigating committee. I think I understand all of the benefits and all of the evils of the use of intoxicating liquors, and I think I can balance the evils and the benefits and decide for myself whether the Government should at all times assist in attempting to stamp out not only the liquor habit, but the liquor production. But there are a great many people who have views upon this question that are not probably as set as my own—those who want further investigation, those who want information—and I should be glad to join with other Senators in voting this provision into the bill, that they may have all the information that is proper and necessary, and that we can present something to the public from an unprejudiced and an unbiased commission upon the great liquor question.

I hope the suggestion made by the Senator from New Hampshire, that we be given an opportunity to express our approval or disapproval of the merits of this amendment, may prevail.

Mr. BANKHEAD. Mr. President, a few moments ago the distinguished Senator from New Hampshire [Mr. GALLINGER] stated that recently a constituent of his had called upon him for information upon the question of the alcoholic liquor traffic, and that he was compelled to reply that no investigation had been had, and no publication had been made on the subject. Therefore he seeks to establish this commission in order that information may be gathered and promulgated.

Mr. President, a very short time ago I had a letter from the president of the National Grange, and also one from the president of the Farmers' Alliance, the two bodies having in their membership perhaps two-thirds of all the people of this country engaged in agriculture, and who are interested more than all other classes in the question of good roads. I was compelled to reply that no investigation had been made upon this highly important question, no publication had been put in shape for distribution, and therefore I was unable to furnish information. Along that line of inquiry and desiring to furnish the farmers of this country all the available information to be had upon this important question—upon a question that goes to the homes and doors of all the farmers in this country—I sought to put upon the agricultural bill an amendment directing the Secretary of Agriculture to make an investigation into this subject, thorough and complete, and to report the results of the investigation to Congress in order that we might disseminate this information and give the people of the country the benefit of it.

No commission was proposed. It was suggested that this important work should be done by an organized bureau of the Government already in existence, with the facilities necessary to make the inquiries, and it proposed only a very small appropriation to enable the Secretary of Agriculture to make this important investigation—the small sum of $20,000. The point of order was made that it was obnoxious to the rule, that it was new legislation, and therefore ought not to have a place in the appropriation bill. I undertook to persuade the Chair that this was not new legislation in the sense that the rule contemplated; that it was simply an effort upon the part of Congress to direct the Secretary of Agriculture as to how an appropriation already in the bill, and but slightly increased by the amendment, should be expended. The amendment went out on the ruling of the Chair, of course, as being obnoxious to the rule.

Here is a proposition to create a commission to be composed of ten members, to continue indefinitely; and I may add, Mr. President, that the appropriation is indefinite and continues without limit. I am not discussing the question whether the amendment is obnoxious to the rule, but I am anxious to see what will become of it in the end. If the amendment I offered to the appropriation bill was obnoxious to the rule, then how can it be said that this amendment is not also obnoxious to the rule? If this amendment, comprehensive as it is, going to the extent it does, to create a commission to take into consideration the whole question of the alcoholic-liquor traffic, is to be submitted to the Senate for a vote, I am anxious to know why it is that the amendment I offered could not also have been submitted to the Senate for a vote.

Mr. MONEY obtained the floor.

Mr. BAILEY. Will the Senator permit me before he begins?

Mr. MONEY. Certainly.

Mr. BAILEY. Mr. President, I simply desire to call the attention of the Senator from Mississippi and other Senators to the fact that we have already been investigating the alcoholic liquor traffic, as I believe, without any authority of Congress. I have in my hand the report of the President's homes commission. I find no reference to any law authorizing the appointment of the commission, although the report has already been printed. The truth of it is, if it had been printed by private parties it would be excluded from the mails on account of certain matters in it; and there are other matters that I could not read unless I asked that the galleries be cleared. They would have to be read in executive session.

I find in this unauthorized publication—I say "unauthorized," because, so far as I know, no law authorized the taking of this testimony or the making of this report—a number of pages devoted to this very question, and I hope the Senator from Mississippi and other Senators will take occasion to warn the executive department of the Government, if we refuse the appointment of this commission, and they appoint one notwithstanding our refusal, that we will at least require it to print an expurgated edition the next time.

Mr. MONEY. The point is well taken.

Mr. President, I do not suppose the Chair or one single Member of the Senate will deliberately say that this matter is in order. How they may vote upon the merits of it, which have been discussed by the distinguished Senator from New Hampshire [Mr. GALLINGER], I do not know. But if the Chair does not choose to rule as he thinks, and leaves it to the Senate, I can not tell from the vote just taken what the Senate will do. But I venture to say there is not a single gentleman, including the distinguished Senator from New Hampshire, who believes that it is in order.

I sympathize with my friend, the Senator from New Hampshire, in his desire to secure the spread of temperance throughout our country, but he has had a grand opportunity to show his zeal in behalf of temperance if he had taken this same bill, which has been before his committee since May 29, and had made a report and had something done that he says he is so anxious to do now that he must load down this appropriation bill with it. Here is the bill introduced by the Senator from Ohio [Mr. DICK] on the 29th day of last May, and referred to the Committee on the District of Columbia, of which the Senator from New Hampshire is chairman. What became of the calls from these emotional people? and they are nothing else. The best people of God's earth, I want to say, are behind all of these temperance movements, but they are the creatures of emotion, and they do not consider what authority we have to do things. They only want the things done which they think are good things in themselves. Their motives are perfectly laudable, and I join with them.

Mr. HANSBROUGH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from North Dakota?

Mr. MONEY. Certainly.

Mr. HANSBROUGH. I ask the Senator to what bill he refers; or will he read the title of the bill?

Mr. MONEY. It is the bill introduced by the Senator from Ohio [Mr. DICK] on the 29th of May, 1908, providing for this very commission. It is the bill (S. 7269) authorizing the appointment of a commission to collate information concerning the alcoholic liquor traffic and to consider and recommend any needful legislation in relation thereto.

Mr. HANSBROUGH. I thought the Senator referred to another bill that is now before the Committee on the District of Columbia.

Mr. MONEY. No; I refer to this bill, which has been permitted to lie in the dust, I presume, as the Senator's zeal did not consume him until we had up another bill, which he thought would be a sufficient float to carry this thing through.

Mr. HANSBROUGH. I desire to say that I happen to be chairman of the subcommittee on excises of the District of Columbia Committee, and that bill, the one to which the Senator now refers, after being introduced by the Senator from Ohio, was referred to my subcommittee, and my enforced absence from Washington and the Senate, I have no doubt, is the cause of the delay in acting upon it.

Mr. MONEY. It is very kind indeed for the Senator from North Dakota to attempt to take care of his friend the Senator from New Hampshire, whom I have always found quite competent to take care of himself; but, nevertheless, here is the fact that our distinguished friend is so consumed in his zeal for the cause of temperance that it seems he must load down this appropriation bill, at the risk of defeating it, and it will defeat the bill for this session, I want to say that.

The bill I hold in my hand has been lying in his committee. The only difference is the interpolation of a line, to inquire into the effect upon agricultural products, in order to give a supposed jurisdiction or color of jurisdiction to the Committee on Agriculture, to which it should never have gone.

This same bill was introduced in the House over a year ago and went to the only committee to which it ought ever to go—the Committee on Alcoholic Liquor Traffic. It was beaten in that committee. It has not been heard from since. That was when legislation was pure and simple, proposed as it should be in an affair of this importance.

Mr. ALDRICH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Rhode Island?

Mr. MONEY. Certainly.

Mr. ALDRICH. I suggest to the Senator from Mississippi that this matter can probably be promptly disposed of.

Mr. MONEY. I do not know whether it can be or not.

Mr. ALDRICH. Because if this proposition is not out of order, then I can not imagine how one could be.

Mr. MONEY. How is that?

Mr. ALDRICH. I think this matter can be disposed of promptly. The point of order has been raised. I think it is not possible to decide it except in one way, and I think we can dispose of it.

Mr. MONEY. The suggestion of the Senator is valuable, but I do not take it. I have not the faith the Senator from Rhode Island has in the Chair ruling on it at all.

The VICE-PRESIDENT. The Chair will suggest for the information of the Senator from Mississippi that the Chair is prepared to rule as soon as the point of order is insisted upon. The Senator from Pennsylvania withdrew the point of order for the time being that Senators might address themselves to the amendment.

Mr. MONEY. Mr. President, I crave the pardon of the Chair and of the Senate, but as the discussion of this question upon its merits has been permitted on this floor, and numerous letters and telegrams and reports have been read in support of the amendment, on its merits, and as the bill itself has not been noticed—only the object of it—I wish to give the Senate something of the character of this proposition, which is the most monstrous one that has ever been proposed in this body as a rider on an appropriation bill. I want the Senate to understand what it is doing; and that is what the churches and the ladies of the Christian Temperance Union do not understand.

I have here any number of telegrams from the States of Mississippi, Alabama, Georgia, and some from elsewhere, from the Antisaloon League, all against this proposition. I have right here a letter from the head of the National American Antisaloon League of Washington against it, saying they want nothing of this sort any more.

Here is a measure that provides for a commission of five Senators and five Representatives whose terms as commissioners shall not expire with their terms in Congress and who shall thereafter draw $7,500 a year salary and all their expenses. They can have all the clerical aid they think necessary. They can go to any part of the United States or any of its possessions, which means a trip to Hawaii, taking in Guam, and then to the Philippine Islands, Porto Rico, and all around. They are called upon to publish the results of their investigation from year to year. I have never known a commission that drew such pay—by the way, they are to be paid on their own vouchers, nobody is to audit them, and all the money in the Treasury not otherwise appropriated is made immediately available for them—I have never known a commission with such extensive powers, authorized to expend so much money for themselves, to commit suicide by a final report. Instead of this saying year by year it should say year by year, lustrum by lustrum, decade by decade, and century by century, for it will never die. No man here will ever go to the funeral of this commission.

Mr. OVERMAN. May I ask the Senator a question?

Mr. MONEY. Certainly.

Mr. OVERMAN. I notice the last clause provides that—

In case the term of a Senator or Representative expires while a member of this commission, such Senator or Representative shall not thereby cease to be a member of this commission——

Mr. MONEY. I have just alluded to that.

Mr. OVERMAN (reading)—

drawing pay from the time his term as Senator or Representative expires, at the same salary as though still holding such office.

It calls it an "office." If this amendment should pass, we are creating an office. Then can any Member of the Senate or of the House of Representatives hold this position under the Constitution?

Mr. MONEY. That point has been made by the Senator from Iowa.

Mr. OVERMAN. I was not present.

Mr. MONEY. It was made at the beginning.

Now, Mr. President, if the Chair is going to rule the amendment out of order, of course I am wasting time here; but I want to say that I am loaded on this question, and this bill will never become a law if this rider is put on it.

Mr. PENROSE. I ask unanimous consent to have two short letters addressed to me inserted in the RECORD. I will not detain the Senate by having them read. One is from Rev. S. E. Nicholson, state superintendent of the Pennsylvania Anti-Saloon League, and the other from William H. Anderson, legislative superintendent, to the effect that this amendment is opposed by the national headquarters committee and by the antisaloon leagues all over the country.

The letters referred to are as follows:

PENNSYLVANIA ANTISALOON LEAGUE,
Harrisburg, Pa., February 20, 1909.

Senator BOIES PENROSE,
United States Senate, Washington, D. C.

MY DEAR SIR: Following up my telegram to you with reference to a proposed amendment to the agricultural bill suggested by Senator GALLINGER, providing for a commission of inquiry on the liquor question, I write to say that it is so evidently intended to hinder and delay the progress of temperance legislation in other lines than it is the judgment of the Antisaloon League that this amendment can not be supported in any sense as a temperance proposition. There was a time years ago, perhaps, when such a commission as is proposed would have been of some value, both to the temperance people and to the liquor people, in furnishing expert information on the question. Developments, however, during recent years have led both sides to so study the question that we feel there is no longer any need of such commission at public expense. The people, by their own investigations, have largely done away with the necessity of such commission. I sincerely hope, therefore, that you may see your way clear to vote against this proposed amendment.

I may add that another reason why the Antisaloon League, not only of Pennsylvania but throughout the country, is opposing this proposition is that we have had very good reason to believe that if such a bill is passed there will be a job in it for somebody, although in saying that I am very sure that the Senator and Representative who introduced the original bill and the Senator who has introduced this amendment are not aware of this fact.

Very cordially, yours, S. E. NICHOLSON,
State Superintendent.

Per F.

LEGISLATIVE OFFICES THE ANTISALOON LEAGUE OF AMERICA,
Washington, D. C., Thursday, February 18, 1909.

UNITED STATES SENATE.

DEAR SIR: The Antisaloon League of America desires most respectfully to protest against the adoption of an amendment to the agricultural appropriation bill, introduced on February 16, and duly printed, which provides for the creation of "the commission on the alcoholic liquor traffic," and which, we are told, may come up to-day, for the following among other reasons:

1. It is not needed by the temperance people, because half of the country has already voted out the saloon.
2. It will be used as an excuse by the liquor men for attempting to delay further temperance legislation.
3. Substantially the same measure has been voted down in the House Committee on the Alcoholic Liquor Traffic.

4. It does not properly belong in an agricultural bill.

Finally, any such proposition should be considered on its merits, and not tacked on to an important bill, without time for discussion or consideration.

Notwithstanding the fact that this purports to be a temperance measure and is supported in good faith by some excellent temperance people, we consider it exceedingly dangerous in its possibilities of harm to the cause of temperance. Our national headquarters committee has taken formal action in opposition to it, and for them I most respectfully request that you oppose this amendment and use your influence to insure its defeat. I also make the same request in the name of the Methodist Episcopal Church, of whose general temperance legislative committee I am chairman.

Yours, respectfully, WILLIAM H. ANDERSON,
Acting Legislative Superintendent.

Mr. PENROSE. I now renew my point of order that the amendment proposes general legislation.

Mr. WARREN. Will the Senator allow me to say just a word?

Mr. PENROSE. Certainly.

Mr. WARREN. I have here a great many letters on both sides of this question, and many of them from temperance people. I merely wish to say that the temperance reformers are divided, and a very large number of them send letters here recommending it, while others are opposing it. I will not send up the letters to have them put in the RECORD, because they are too numerous and too long.

Mr. PENROSE. I concede that there are a large number of well-meaning persons who have communicated in behalf of this amendment, but I think it will be generally conceded that the Antisaloon League comes more nearly representing the organized forces than any other body in the country. I now renew my point of order.

The VICE-PRESIDENT. The amendment proposes to create a commission and invest it with large and comprehensive powers. The Chair is clearly of opinion that the amendment proposes general legislation and that it is obnoxious to the third paragraph of Rule XVI. If the Chair is supposed to be in error as to his view upon this subject, the Senator so believing can test the sense of the Senate by an appeal from the decision of the Chair. The Chair sustains the point of order.

The next amendment of the Committee on Agriculture and Forestry was, on page 58, after line 12, to strike out:

All discoveries in making paper by the Department of Agriculture shall be patented in the name of the Secretary of Agriculture for the use and benefit of the United States and the people thereof.

And insert:

And hereafter when any officer or employee of the Department of Agriculture makes any new and useful discovery or invention of any machine, device, or process connected with the work of the Department of Agriculture, through the expenditure of government time and government money, the Secretary of Agriculture shall cause a patent to be applied for on the said discovery or invention through the Solicitor of the Department of Agriculture. Such patent, if issued, shall be taken out in the name of the inventor, and, as provided by existing law, shall be without any expense to the inventor, and will allow to any person in the United States the use of the patented article or process without payments of fees or royalty. And hereafter it shall be unlawful for any officer or employee of the Department of Agriculture to patent any device, or process, or discovery connected with the work of the Department of Agriculture, except in the manner hereinbefore described.

Mr. HEYBURN. Mr. President, I should like to inquire of the Senator in charge of the bill whether consideration has been given to the question of the power of Congress to discriminate against employees in one department of the Government in the exercise of a constitutional right to patent their inventions? I inquire if consideration has been given to that question?

Mr. WARREN. I so understand. I know that the matter has been in the courts heretofore. The courts have ruled, if I remember aright, that they are entitled to their invention even as against the department, provided the work is done, we will say, nights and mornings or at times when they are not at government work. But the matter is somewhat obscure as to inventive work in hours in which they are required to be working for the Government. I will not say with certainty that other departments are so protected. Nevertheless, what led to this was the proposition or provision in the House bill as to the discoveries in paper making. The provision was put on in the House, and it was thought better, upon the suggestion of the Secretary, to cover the whole matter by striking out the House paragraph and inserting the one now under discussion.

Mr. HEYBURN. I think we ought not to cover so important a question as is involved in this in an amendment to an appropriation bill. The provision of the Constitution in regard to patent reads:

To promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries.

That is the power which Congress has. It has never been held that the holding of a position by appointment or otherwise in any way detracted from the right of an inventor to patent his invention. It might be that during the hours when an employee was actually engaged in the performance of the duty for which he was paid he should not divert his energy or his intellect to purposes purely personal to himself; but to say that because a citizen is employed in a given department he shall thereby, by reason of the fact of his employment, be prevented from taking advantage of the constitutional right to patent his invention is going a long ways for an appropriation bill.

There are legal phases of the question which ought to be thoroughly understood and thoroughly kept in mind in legislating upon so great a question. A single invention of one employee in a department of the United States in the past has yielded a very handsome income to the inventor for a lifetime. The penalty proposed for entering the public service is that you must yield up the right to take advantage or have advantage of the ingenuity, intelligence, or skill that you are naturally endowed with. The Government does not furnish these people with the element from which the invention results. The Government does not furnish a man with intelligence, and it has no right to say because a man is working for the Government he shall not have the benefit of his inventive genius.

Mr. WARREN. Mr. President, right there will the Senator state whether he thinks that every man who works for the Government should be permitted to use, first, the time, second, the property of the Government in bringing out inventions, and then to use the inventions as against the Government and charge the Government royalty therefor?

Mr. HEYBURN. No; and if this amendment were confined to those limits I should have had no word to say about it. But unfortunately it is not.

Mr. WARREN. Probably the Senator has not read it very carefully.

Mr. HEYBURN. Yes; I have read it at least a half a dozen times. I have been reading it here with astonishment. The amendment provides as follows:

And hereafter when any officer or employee of the Department of Agriculture makes any new and useful discovery or invention of any machine, device, or process connected with the work of the Department of Agriculture, through the expenditure of government time and government money——

Mr. WARREN. That is the point. I want to know whether the Senator believes that as a matter of justice—we will leave out the legal side of it for the moment—every employee of the Government should be permitted to use all or any part of his time while under government pay, or all or any part of the tools, and so forth, connected with his particular work, in bringing out and perfecting a patent and then charge the Government a royalty for the use of the same?

Mr. HEYBURN. Mr. President, the difficulty is the language is not restricted to the principles discussed by the Senator.

Mr. WARREN. Has the Senator an amendment?

Mr. HEYBURN. I will point out wherein I think it should be amended.

Mr. WARREN. I wish to say to the Senator that this is nothing the committee is wedded to, except the main subject; it is not sensitive as to language. If the Senator has an amendment that will better it, I will cheerfully accept it.

Mr. HEYBURN. I have great sympathy with the main subject, but the difficulty——

Mr. WARREN. Then I understand the Senator to mean that he has no sympathy with the Government in respect to the relations which exist between the Government and an employee, and that the employee should be allowed to do as he pleases with his time and with the property of the Government and then charge the Government for the device that he works out.

Mr. HEYBURN. I did not think the Senator from Wyoming could be so mistaken. Of course I have suggested nothing of the kind as having no sympathy with the Government.

Mr. GALLINGER. Mr. President——

Mr. HEYBURN. In a moment. I want to finish the sentence. I have a very pronounced and warm sympathy with the Government, and I am here, among other things, to represent its interests. Now I yield to the Senator from New Hampshire.

Mr. GALLINGER. Mr. President, I wanted to ask the Senator in charge of the bill how it happens that men do these things through the expenditure of government time and government money. It seems to me if a man is in the employ of the Government, his superiors would see that he gives his time to the Government. Is it possible——

Mr. WARREN. Nevertheless the Senator knows, or ought to know, that there are bills of this character on the files of the committees here without number, I might say, embodying claims of men for royalties and payment for patents where they have taken the time of the United States and have patented the devices and now charge a royalty thereon.

Mr. GALLINGER. If they have taken the time of the United States, then the fault is in the head of the department. I have heretofore assumed that these men made the discoveries in their own time. I can not imagine how a man in the Department of Agriculture could sit at his desk and work on an invention.

Mr. WARREN. The court has ruled that in cases where he makes the device during the working hours of the Government he is entitled to the benefit.

Mr. HEYBURN. And he should be.

Mr. WARREN. And he should be, I agree.

Mr. GALLINGER. Then all you have to do is to devise some means whereby men in the department will see that the men in their employ will attend to their duties.

Mr. WARREN. The Senator knows that when a man is working at his desk one can not undertake to watch that man every moment. You can not require a chief to overlook so closely all those who work under him.

Mr. GALLINGER. I think not.

Mr. WARREN. This matter came to the committee with the language in lines 13, 14, 15, and 16, as follows:

All discoveries in making paper by the Department of Agriculture shall be patented in the name of the Secretary of Agriculture for the use and benefit of the United States and the people thereof.

The committee thought it was better to strike that out and put in the language that is put in here for the consideration of the Senate. If the Senator from Idaho or the Senator from New Hampshire has an amendment that will better this provision, I shall be glad to have it inserted, but to strike it out the Senator will note leaves in the House provision, unless we shall proceed to strike that out also.

Mr. GALLINGER. I assume, Mr. President, that an invention is a mental process largely. The man may be attending to his duties in serving the Government, and yet he may invent something while performing those duties. I am not quite sure how far-reaching this is. I have had a great deal of sympathy for the men who have made inventions and have been robbed of those inventions by the Government of the United States on the ground——

Mr. WARREN. So have we all. We have paid a great many of those claims.

Mr. GALLINGER. On the ground that they were made in the time of the Government and at the expense of the Government. I think we are trenching upon rather dangerous grounds in putting in the law a provision of this kind. We want to encourage all our young men and young women to make inventions, whether in the Department of Agriculture or elsewhere, and we do not want to say to them after they have made those inventions that the Government can trump up the charge that they were made at government expense and in government time and the Government will take possession of the fruits of their intellectual work or their genius.

I do not know that I want to offer an amendment. My inclination is to make a point of order against the amendment.

Mr. HEYBURN. Mr. President, I will conclude what I was saying in a brief statement. My attention was attracted to this amendment by the recollection of an instance where a man who is engaged in the Agricultural Department in putting seeds into the little paper bags that carry them out, that did not require any particular mental activity, conceived an invention which he patented and which has furnished him a livelihood since. He was engaged in the service of the Government. His mental faculties were not very much absorbed by the peculiar work that he was engaged in. Why should he be deprived of the benefit of his patent? If legislation is to be had upon this subject, I think it ought to go in the ordinary course to a committee and be considered as other measures of the kind are considered.

Mr. GALLINGER. Mr. President, I make the point of order against the amendment that it is general legislation on an appropriation bill.

The VICE-PRESIDENT. The Chair is of opinion that the point of order is well taken, and therefore sustains the point of order.

Mr. WARREN. I will ask the Senator from New Hampshire if he is satisfied to leave in lines 13, 14, 15, and 16, which are very much more inconsistent, if there is any inconsistency in either one?

Mr. GALLINGER. I propose to make a point of order against both.

Mr. WARREN. The Senator can not make a point of order against a House provision.

Mr. GALLINGER. We can reject it.

Mr. WARREN. If Senators are not willing to make the motion, I will move that lines 13 to 16, inclusive, on page 58, be stricken out.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 58, after line 12, strike out:

All discoveries in making paper by the Department of Agriculture shall be patented in the name of the Secretary of Agriculture for the use and benefit of the United States and the people thereof.

The amendment was agreed to.

The next amendment was, on page 59, after line 7, to insert:

And hereafter the Secretary of Agriculture is authorized to permit employees of the Department of Agriculture to make assignments of their pay, under such regulations as he may prescribe, during such time as they may be in the employ of the said department.

The amendment was agreed to.

The next amendment was, on page 59, after line 12, to insert:

And hereafter all duly and lawfully constituted and appointed watchmen of the Department of Agriculture stationed in and upon the buildings and premises of said department in the city of Washington, D. C., shall have and perform the same powers and duties, while on duty in and about said premises, as the Metropolitan police of the District of Columbia.

Mr. GALLINGER. I wish to inquire the exact meaning and purpose of that proposed amendment.

Mr. WARREN. The Secretary of Agriculture was before the committee, and his suggestion was that the agricultural grounds, surrounding the building and quite a territory, are outside and not under the management of the regular force of the city. It is a reservation of the United States. He states that there are at times marauders found within the grounds, and it is a difficult matter to hold them until they can reach the regular city police. I believe the same order exists as to those watchmen who have charge of the smaller parks throughout the city that are under the War Department. I understand this puts those grounds on the same level.

Mr. GALLINGER. The Metropolitan police surely patrol the public places, do they not?

Mr. WARREN. They do not go inside of the United States reservation of the Agricultural Department.

Mr. GALLINGER. They patrol Rock Creek Park. We assign policemen to that great reservation.

Mr. WARREN. I will permit the Secretary of Agriculture and the Senator from New Hampshire to settle that matter. I am only telling him what the Secretary said. I will turn to it if I can.

Mr. GALLINGER. It is not necessary. I will not make a point against it.

Mr. WARREN. By the way, I can say there was no complaint on the part of the Secretary of Agriculture. He said that in the matter of economy and the matter of good government he felt that they ought to have authority, if somebody were caught here despoiling the fruits or trees or flowers, to make an arrest and to turn the parties over to the regular city police.

Mr. GALLINGER. It is creating a new force of policemen. That is what attracted my attention. I will not make any point of order against the amendment.

The amendment was agreed to.

The next amendment was, on page 59, after line 19, to insert:

Total carried by this bill for the Department of Agriculture, $13,773,276.

Mr. WARREN. Of course, that will be changed to correspond with the action of the Senate upon the bill.

The VICE-PRESIDENT. It is so ordered.

Mr. WARREN. I should like now to turn to page 29. There is an amendment there with relation to denatured alcohol that the Senator from Pennsylvania [Mr. PENROSE] lodged a point of order against, and we passed it over with the understanding that we would take it up later.

Mr. PENROSE. Does the Senator in charge of the bill desire me to withhold the point of order temporarily? If not, I shall make it again.

Mr. WARREN. I have no wish to discuss the matter myself. I want to appeal to the Senator from Nebraska [Mr. BURKETT] and ask him if he has anything to say upon this particular amendment found on page 29 in the bill with respect to denatured alcohol? The point of order is made, and of course it can only be debated with the permission of the Senate.

Mr. BURKETT. I will say that in my opinion this amendment is not subject to a point of order. The Secretary of Agriculture is now, under law, experimenting with the manufacture of denatured alcohol; in fact, they have quite a considerable still over here on the grounds of the Agricultural Department, and they are engaged in experimenting with it. The idea of the amendment is to enable the Secretary to experiment further

throughout the country where there are special kinds of fruits or farm products for the making of alcohol.

The state agricultural colleges, it was thought, would furnish ground and some of the equipment for this experiment. Therefore it was put in to enable them to demonstrate the matter in connection with the agricultural colleges. It is not to do anything that they are not already doing. As I said, they are doing it and they are experimenting here. This is to enable them to continue to experiment in various sections of the country and to save some expense by doing it in cooperation with agricultural schools here and there where they could.

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Nebraska yield to the Senator from New Hampshire?

Mr. BURKETT. Certainly.

Mr. GALLINGER. I was greatly interested, Mr. President, when this matter was up, I think, about two years ago, and legislation was had on this subject. From the fact that we presented to the Senate as to what other countries were doing in this connection I was led to believe that this would be a great success in the United States. But I have recently made inquiries, not from the Department of Agriculture, but from Senators who were warm champions of that measure, and I have been told that up to the present time very little, if anything, has been accomplished in the matter. Can the Senator give me any specific information on that point? In other words, has it progressed sufficiently to warrant us in making an additional appropriation to carry on the work?

Mr. BURKETT. Mr. President, in reply there can not be any question but what the Senator is right with reference to the matter up to date. I think they have not succeeded yet in finding the material with which they can make alcohol and compete with other things for the production of heat and power, but I may say the law is somewhat defective in this particular. In drawing the law they limited the amount of alcohol that could be made in any still to 100 gallons a day, if I remember correctly. That is right on the border line between where it is profitable and where it is not profitable. They can not run any still and make so few gallons and make it profitable under any circumstances. However, fuel is yet so cheap in this country that it is very questionable whether they have found anything.

The idea was simply to experiment with different products in connection with state schools to find out whether there was anything.

It was suggested, I remember, by some one in the Department of Agriculture that on the Pacific coast they thought they could experiment with the fruit there. They decided that it was very prolific with alcohol and produced it a good deal cheaper than anything else that they found.

They also suggested another place in connection with beet-sugar factories where they thought our people could make use of the beets. There are also certain peculiar conditions in the State which I have the honor in part to represent. There is no coal in that State, no oil, no gas, no water power, and no competition with a thing of this sort. There is a good deal of fruit raised in the eastern part of the State, but it goes to waste. A good many potatoes are raised in certain sections of the State. Potatoes, as has been demonstrated in certain sections of Russia, furnish heat, light, and power, and it is thought the department could experiment somewhat on that line. Therefore it was thought wise, so far as potatoes are concerned, to put in the bill this little extra allowance, making it $15,000, so as to give the privilege of experimenting here and there with these various products.

Mr. GALLINGER. That I may not be misunderstood as to my attitude, I will say to the Senator from Nebraska that when this matter was previously before the Senate I was warmly in favor of it, as I now am, if there is any encouragement to be held out to us that it can be made successful. I believed then that it would be a great boon to the people of the United States, and I believe now it will be if we can make it a success. I do not want to be understood as opposing the matter at all.

Mr. BURKETT. I understand the position of the Senator from New Hampshire. There was a question at that time about it. We have gone into it so far, it seems to me, that we can well afford to now put this little appropriation in this bill for the purpose of experimenting and satisfying the people as to the matter. There are still a good many people who do not understand why it is that denatured alcohol is not used more than it is, and they maintain that there is something wrong with our legislation. If this opportunity is given to the Agricultural Department to experiment on the proposition before the people here and there under the most favorable circumstances, the people will soon come to understand that the trouble is not altogether with legislation, but owing to the fact that fuel is at present too cheap for denatured alcohol to compete with it.

As I have said, I think the point of order is not well taken, because the amendment only segregates the appropriation for experiments of this particular kind.

Mr. PENROSE. I now renew my point of order, Mr. President.

The VICE-PRESIDENT. The Senator from Pennsylvania makes the point of order that the amendment proposes general legislation on an appropriation bill.

Mr. SIMMONS. Mr. President, before the question is put I want to say to the Senator from New Hampshire [Mr. GALLINGER] that when this matter was before the committee some inquiry was made of an official of the Agricultural Department as to why the manufacture of denatured alcohol had not been successful. I understood the official to say that, in his judgment, there was a provision in the general act which made it practically impossible to manufacture this product at a profit under the present law. That is the provision which limits the output of a still per day. As I recall it the statement was made that the law provides that only 100 gallons shall be permitted to be made in a plant during one day, and the opinion was expressed that it was impossible within that limitation to manufacture this product with profit.

The VICE-PRESIDENT. The Chair is of opinion that the point of order is well taken, and therefore sustains the point of order.

Mr. KEAN. Mr. President, I want to ask the Senator from Wyoming [Mr. WARREN] if he will turn, in the bill, to the bottom of page 15.

The VICE-PRESIDENT. The Secretary will state the first amendment which was passed over, on page 15, line 22.

Mr. WARREN. That amendment was passed over, Mr. President; but I think the Senator from New Jersey wants to know how it now stands.

Mr. KEAN. I desire to know how the amendment stands.

Mr. WARREN. I presume it is in the copy at the desk, but I will read it, commencing with line 22.

Mr. KEAN. I want it read as the Senator understands it to be now.

The VICE-PRESIDENT. The Secretary will read the amendment as it now stands.

The Secretary read as follows:

For investigating the handling, grading, and baling of cotton, and the establishment of standards for the different grades thereof, $42,250.

Mr. SIMMONS. Mr. President——

The VICE-PRESIDENT. Does the Senator from New Jersey yield to the Senator from North Carolina?

Mr. KEAN. I was only going to make a motion to strike out "$42,250" and restore "$12,250," because the proviso under which the $30,000 was appropriated went out on a point of order.

The VICE-PRESIDENT. The amendment will be regarded as still before the Senate. Without objection, the committee amendment will be disagreed to. That restores the House text.

Mr. SIMMONS. Mr. President, if it is in order, I desire to offer an amendment to that.

Mr. WARREN. Is it an amendment to a committee amendment?

Mr. SIMMONS. No; not to the committee amendment, but to the House print.

Mr. WARREN. That is not yet in order.

The VICE-PRESIDENT. On page 25, line 14, there is an amendment which was passed over.

Mr. NELSON. Mr. President——

Mr. WARREN. There is another amendment——

The VICE-PRESIDENT. Does the Senator from Wyoming yield to the Senator from Minnesota?

Mr. WARREN. Yes.

Mr. NELSON. I desire to ask the chairman of the committee a question. What has become of the amendment on page 16, from line 11 to line 22, inclusive? My recollection is that it was stricken out on a point of order.

Mr. WARREN. It was.

Mr. NELSON. Has anything been substituted for it?

Mr. WARREN. Nothing has been substituted for that, except the language on lines 8, 9, and 10. We restored a portion of that and changed the other, so that there is a paragraph about the same length in place of that.

Mr. NELSON. Will the chairman be good enough to read to me the paragraph as amended?

Mr. WARREN. Yes. The Senator from Minnesota will understand that it comes in after the matter in italics, near the top of the page, commencing on line 8. It reads:

For investigating the handling, grading, and transportation of grain and for a study of the factors entering into the usual operations connected therewith, $52,440.

That was accepted. There is another matter on page 26, I believe, that has not been settled.

The VICE-PRESIDENT. The committee amendment referred to by the Senator from Wyoming, which was passed over, will be stated.

The SECRETARY. The committee amendment passed over on page 26 was, after line 11, to insert:

That hereafter, for the purpose of unifying national forests, the Secretary of the Interior may, upon the request of the Secretary of Agriculture, accept relinquishments to private lands lying within the exterior limits of any one of such forests in exchange for stumpage of substantially equal value from the national forests. And such private lands, upon the acceptance of relinquishments thereto by the Secretary of the Interior, shall become a part of the national forests within the exterior limits of which, respectively, they lie, and be subject to the laws then and thereafter affecting the same.

Mr. WARREN. The point of order was reserved on that amendment. I have only to say, as I said early in the day, that I can not spend much time on points of order at this late date.

Mr. TILLMAN. Mr. President——

Mr. WARREN. Just a word. I may say that was an amendment which I myself offered. It was not asked for by the Forestry Service; it was not asked for by the department, but upon being submitted to the officials there it was said to be satisfactory. I offered it in the interest of the settlers who have their 160 acres of land or less in forest reserves, who find conditions not pleasing to them, and who wish to exchange their land and take its value in stumpage; that is, that they be allowed to cut timber somewhere else under the regulations of the Bureau of Forestry.

That is all there is to it. If Senators believe that settlers so situated should be chained to their position, they, of course, will make the point of order. I am willing to admit that a point of order will lie against the amendment, but I sincerely hope the point of order will not be insisted upon.

Mr. TILLMAN. I make the point of order, without taking time to explain why, but there is a lot of viciousness in this provision.

Mr. WARREN. The Senator, I presume, does not mean to imply that the committee has anything——

Mr. TILLMAN. Oh, no; I say that the language is of such a character that to permit it to go into law would allow all sorts of rascality to be perpetrated.

Mr. TELLER. Mr. President, the remark of the Senator from South Carolina [Mr. TILLMAN] reminds me that some years ago, finding that there were a large number of settlers inside of forest reserves, Congress passed a law to enable the settlers to exchange the lands they had within the reserve for other lands. It was not expected by anybody, I think, when the law was passed, that there would be any more than an exchange; that the settler would find another piece of land outside of the reservation, if possible, on which to make his selection; but the department held that the railroad companies could make selections as well as the settlers, and thousands and thousands of acres of land have been denuded of timber by exchange, not for other land, but for scrip. The railroad companies, as well as individuals, were given scrip, which would enable them to locate land somewhere else. That scrip went up to eight and ten dollars an acre.

I am inclined to object to this provision, because it is a trade between the Government and some settlers. When you come to trade with the agents of the Government the trade will be what would be deemed to be satisfactory to them, in the interest of the forest reserves.

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Oregon?

Mr. TELLER. I do.

Mr. FULTON. I ask the Senator from Colorado, when he speaks of a trade between the Government and the settler, if he refers to this provision or is the Senator referring to the previous law of Congress?

Mr. TELLER. I refer now to this proposition, which is simply a trade of the settler's holding for stumpage.

Mr. FULTON. The Senator from Wyoming [Mr. WARREN] a few moments ago stated that this provision was inserted in the interest of the settler; but I confess I am unable to see how it can possibly be in the interest of the settler, because the amendment provides for the exchange of lands within a forest reserve for stumpage within a forest reserve; that is, the exchange of the settler's land for the right to cut timber. I can not see how that would be of any benefit to the settler.

Mr. TELLER. That is, the settler would abandon his holding in exchange for timber.

Mr. FULTON. Yes. He would not receive the land on which the timber stood and for which he made the exchange. He would simply have the timber or the right to cut the timber. He could hardly settle on that.

Mr. WARREN. That is not the intention. The settler could take timber from a point——

Mr. FULTON. Mr. President——

Mr. WARREN. If the Senator will allow me to finish my statement—the settler could take timber somewhere on the edge of the forest reserve, near where he might settle on other land, or he might dispose of the timber; in other words, he could turn his land in the forest reserve, if he wished to exchange it, into cash or its equivalent with the timber.

While I am on my feet, I will ask the Senator from Colorado [Mr. TELLER] if he thinks there is any danger of any scrip being issued under this amendment? That was not the intention.

Mr. TELLER. Mr. President, there was not any intention, nor was there any authority, in my opinion, for issuing scrip under the other act.

Mr. FULTON. If the Senator will allow me, I will tell him how the scrip will be issued.

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Oregon?

Mr. TELLER. I yield to the Senator from Oregon.

Mr. FULTON. Within the forest reserves are large areas, owned by railroads or other land-grant companies, consisting of thousands—I believe, probably, it would not be an exaggeration to say millions—of acres that are burned or have been logged up. This provision would authorize such companies to exchange burned, useless, and rocky lands for timber. That is, in my judgment, what somebody who started this little scheme of legislation had in mind. Of course the Senator from Wyoming had no such thought.

Mr. WARREN. I do not like the Senator to say that. In the first place, I said that it was to relieve the settler who may be in this position. Does the Senator think that I am undertaking to relieve settlers who have settled upon barren, rocky places?

Mr. FULTON. The Senator knows I did not mean that; and I expressly stated that the Senator from Wyoming had no such thought.

Mr. WARREN. Furthermore——

Mr. FULTON. I will venture this assertion—and if I am wrong I will apologize for it—that the Senator did not initiate this proposition.

Mr. WARREN. The Senator has no right to say that.

Mr. FULTON. If the Senator says he did, then I really have no right to say he did not.

Mr. WARREN. I confess I may not have any originality; but I am entirely capable of being responsible to the Senate and to the Senator from Oregon for any amendment or measure I may offer.

Mr. FULTON. But the Senator has——

Mr. WARREN. And it is going a little bit too far when I said it happened to be an amendment of mine to charge me with being the instrument of some great corporation or afraid of something—I do not know what—that is behind me, urging me to offer an amendment.

Mr. FULTON. Mr. President, the Senator knows that I had no purpose to impugn his motives or question his purpose in this matter.

Mr. WARREN. Then, why do it?

Mr. FULTON. I have made every statement in regard to that that I am going to make. I repeat that, if this provision is allowed to stand, it will operate in the interest of the great land-grant companies and in no other interest; and when it is asserted here that it will operate in the interest of the settler, I say it takes the wildest possible flight of the imagination to picture a case where it could possibly so operate.

Mr. TELLER. Mr. President, the act to which I referred was apparently a very harmless and useful act. It was to aid the settler who had taken a piece of land inside of what was afterwards organized as a reservation. These reservations have been made without reference to settlement. In one reservation in the State of Colorado there were over 130 settlers. They were deprived of the opportunity of having additional neighbors, and they were anxious to dispose of their land in exchange for other land. Nobody suggested that they would get for it a paper which they could sell to their neighbor. It was supposed by the committee when they reported the bill that there would be an exchange; that the settler would look for another place,

and when he had found it would say, "I have a piece of ground within a reservation, and I want to take this in place of it." But, Mr. President, thousands and tens of thousands of acres of absolutely worthless land were exchanged for scrip that sold for from $6 to $10 an acre.

Mr. TILLMAN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from South Carolina?

Mr. TELLER. I yield.

Mr. TILLMAN. Has the act which the Senator mentions been repealed?

Mr. TELLER. I believe it has.

Mr. TILLMAN. I think so, too. I ask the Senator, then, has the action of the Secretary of the Interior in issuing scrip for desert lands owned by railroads or by private individuals been tested by the courts?

Mr. TELLER. I do not know that it has.

Mr. TILLMAN. Well, the Secretary of the Interior has been——

Mr. TELLER. The department accepted scrip for land, and large amounts of land were taken with the scrip.

Mr. TILLMAN. I have understood in my travels out that way that many hundreds of thousands of acres of the very best timber land in that region have been exchanged under this scrip arrangement by land-grant railroads, who had received desert lands in their original grants. They swapped their desert land for scrip and then went and located the scrip on the best timber land in that country. If that be true, I have always wondered why somebody at the other end of the Avenue, or Mr. Garfield, or somebody else did not feel enough interest in protecting the public rights to try to recover this land. We hear so much about forestation and the conservation of natural resources that it is a surprise that the man who is so loud-mouthed in the matter does not do something through the officers of the law to recover this land. The Department of Commerce and Labor has notified us that they have discovered that a million acres of land, or something like that, have been obtained by fraud in transactions in the West, and they want a million dollars to prosecute the cases. It is just an inquiry that comes into my mind inevitably, because of my peregrinations out that way looking into land and trying to get a little in Oregon, why it is that something is not done by those people who are always proclaiming their patriotism and honesty and desire to protect the country to see that the law is enforced and efforts made to recover these lands.

Mr. TELLER. I am not in the confidence of these officials, and I might add that I have not any particular influence with them. I can not answer the Senator's question. I merely want to make a brief statement, and then I shall yield the floor for the present.

I want to say that under this exchange we offered a great inducement for people to commit fraud for the purpose of getting valuable scrip. I know it to be a fact that in some cases purchasers desirous of getting scrip first made a claim to land and then they persuaded the department—which was a very easy thing to do; and I want to say that, while there are 16,000,000 acres of Colorado lands in forest reserves, I never was consulted by any officer as to the propriety of making a reserve in that State, while against several of them I entered very vigorous protests—having secured, then, a claim on the land, usually fictitious or trifling, they then persuaded the Government to establish a forest reserve, and then they were ready to trade.

I think I can say with propriety that one of the frauds that was charged as having occurred in Oregon, in the Blue Mountains, occurred in just that way. Before the forest reserve was made certain parties went there and made paper claims. Then they persuaded the Government officials who went out there to examine them to commit perjury and declare that the claimants had done what they had not done. Ultimately considerable scandal grew out of such transactions. I want to say, though, that before this scandal became public the Government had sent two special agents there, who reported just what had been previously reported by the other officers. No blame should be attached to them, however, for they could not know that the people appearing before them had committed perjury and that the first men who were sent out to make the examination had reported to the Land Office as true all the false statements made by the claimants. Out of that attempt to help the settler there grew a great crop of frauds against the Government. In many respects the act was very unfortunate.

I wish to say a word as to the reason why we can not make an attack upon these things. This scrip was handed out to everybody who would pay for it. The department held that it was right to use it to enter land, and a large number of land entries were made with scrip by parties who had paid for it in the market, who were perfectly honest, and who supposed they had a right to use it because it had the imprint of the Government of the United States upon it. If the question had been raised then, it would, perhaps, have saved a good deal of trouble, although some people might have been injured.

Mr. TILLMAN. I can understand that an innocent purchaser of scrip, who had located his land in good faith and had bought his scrip in good faith, ought to be protected; but how about the Weyerhaeuser syndicate and other great lumber barons who have got hundreds of thousands of acres of land in this way? Are they innocent purchasers, or were they in collusion with somebody? Who has become rich in this way?

Mr. TELLER. I do not know, Mr. President, whether or not any of the great corporations knew that this scrip had been issued without authority of law. I do not believe there was any authority to issue it; but you can not disturb titles now by going back of that action.

Mr. President, I propose later on to submit some remarks on the question of forest reserves; but I understand the Senator from Montana [Mr. CARTER] desires to go on now, and so I yield the floor. Later in the day, however, or to-morrow, or at some other time, I desire to speak on the question.

Mr. FULTON. Mr. President, I simply wish to say that if this provision were, in truth, in the interest of the settler, if it permitted a settler within the limits of a forest reserve to exchange his land for land on the outside of the forest reserve, I would heartily support it. I believe some such provision as that ought to be enacted into law, because there are so many disadvantages to a man living in a reserve with a family that very few of them care to suffer the inconveniences that confront them, and consequently they are abandoning their lands, as they can get no benefit from them. Therefore I insist that some provision should be made whereby they can exchange land owned by them within a reserve for land on the outside. But this provision is not in the interest of the settler.

No settler cares to buy stumpage; no settler cares to buy standing timber, with the privilege of cutting it off and removing it. It takes capital to do that; it takes a large amount of capital to engage in that business, and the poor settler of whom they talk is not the man who is provided with that capital. Therefore, if the Senator from South Carolina does not insist on the point of order, I must do so.

Mr. TILLMAN. I insist on the point of order that the amendment is general legislation.

The VICE-PRESIDENT. The Chair is of the opinion that the point of order is well taken, and sustains the point of order.

There is a committee amendment which was passed over on page 25, line 14, to which the attention of the Senator from Iowa [Mr. DOLLIVER] is called.

Mr. DOLLIVER. I hope the Senate is ready for a vote on that amendment.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. The amendment passed over on page 25 was, in line 14, before the word "hundred," to strike out "three million nine" and insert "four million four," so as to make the proviso read:

Provided, That the exportation of dead and insect-infested timber only from said Black Hills National Forest shall be allowed until such time as the Forester shall certify that the ravages of the destructive insects in said forests are practically checked, but in no case after July 1, 1910; to transport and care for fish and game supplied to stock the national forests or the waters therein; to employ fiscal and other agents, clerks, assistants, and other labor required in practical forestry and in the administration of national forests, in the city of Washington and elsewhere; to collate, digest, report, and illustrate the results of experiments and investigations made by the Forest Service; to purchase law books to an amount not exceeding $500, necessary supplies, apparatus, and office fixtures, and technical books and technical journals for officers of the Forest Service stationed outside of Washington; to pay freight, express, telephone, and telegraph charges; for electric light and power, fuel, gas, ice, washing towels, and official traveling and other necessary expenses; and for rent in the city of Washington and elsewhere, $4,486,000.

The VICE-PRESIDENT. The question is on agreeing to the amendment.

Mr. CARTER. Mr. President, it was not my purpose to engage in the discussion of the forestry question during the consideration of this bill, but, owing to some statements made in the course of the debate by the Senator from Idaho [Mr. HEYBURN], I feel constrained to offer some suggestions.

During the day I have heard it noised about that a "conspiracy" had been formed to reduce the amount of the appropriation on this forestry item. The employment of that term, as applied to the action of the Senate or a Senator in seeking to correct an appropriation which seems too large, is characteristic of the manner in which all persons are treated in and out of this Chamber when they exhibit such temerity as to oppose any action of the forestry people.

Mr. President, it has been a subject of common remark, not only in the respective Halls of Congress, but likewise throughout the country, that the revenues of the Government in the passing day are proving and the prospective revenues of the coming year will prove inadequate to meet the appropriations for the current year and the appropriations now being made for the next fiscal year. We are approaching an extra session of Congress, which will be convened in due order to revise the customs laws of the country, and it is currently believed that the revision will result in a reduction of tariff duties. According to the estimate of the Secretary of the Treasury the receipts from customs next year, under the present law, will amount to $290,000,000; and with that amount coming in from customs dues the Secretary estimates that the deficiency will amount to about $140,000,000.

So the tariff revision must contemplate not the raising of the amount provided by existing law, to wit, $290,000,0000, but $290,000,000 plus $140,000,000, in order to forestall the threatened deficiency. We must either diminish appropriations or increase taxation; and in the presence of this grave situation confronting the Government, I think it is a piece of supreme impertinence for any employee of the Government of the United States to suggest that a Senator bent upon reducing appropriations in any direction is engaged in a conspiracy.

My attention has been challenged to the appropriations for the Forestry Service, and I intend to comment somewhat on the details; and I will do it well knowing that 500 facile pens will be set in motion and men will be sticking type all over the United States to-night representing ordinary criticism as an exhibition of hostility to the Forestry Service. I make that prediction as to the coming issues from the press because that has been the current experience in the past. This is one service which no man dare criticise without having his motives impugned. This is one place where estimates made by the department can not become the subject of criticism on the merits.

I aided in preparing the first section of the law upon which the whole forestry policy is based. In conjunction with the former Senator from South Dakota, Mr. Pettigrew, it was my privilege and pleasure to aid in drawing the law of 1897. I believed we had too long deferred a proper safeguarding of the Nation's forests. I had been a witness through many years of sweeping conflagrations running over the mountains and through the valleys, consuming millions and millions of feet of timber, without anyone being commissioned to stop the ravage. It seemed to me important that the Government should withdraw the forest areas and at government expense furnish a fire patrol, so as to save this mighty and lamentable waste going on through the years. I hailed with delight the establishment of the Forestry Bureau and cordially supported the appropriations intended to give it vital force.

It was my understanding that the preservation of the forests was the prime purpose of the legislation. It is true that in the beginning the forest reservations were improvidently created. The first large reservations were laid out by a number of gentlemen who passed through the country in a Pullman palace car. Having maps at hand, they drew lines at random over the country and call all within the lines "forest reserves," and in so doing they impounded whole communities and made reservation people of them. The people were put in a more helpless condition than the Indians, because no arrangement was made to give them rations and clothes. But it was then supposed that the people put inside the reservation by the stroke of the pen could appeal to the laws of their States for protection against ruthless interference with the enjoyment of their property and the security of their persons. It was never suspected that the Federal Government, through its agents, on authority of the forestry law, could go into a State and, without trial or judgment of any kind, character, or description, drive a man from his home and his shelter and leave him without recourse of any kind or character. And yet, unhappily, such things have come to pass.

The forests in the arid region are confined in the main to the mountains. The forest growth is largely of pine, and the pine forests, as the Senator from Minnesota well knows, can not readily be reproduced. The great mission of this bureau was the preservation of the tree life from the ravages of fire and the plunder of the pirates who were cutting government timber for profit. The law gave ample opportunity to protect against the sawmill men, and the foresters were expected to protect against the fire. But these simple purposes have been transcended in practice; these lines have been departed from, and I would that Senators might refer to Document No. 1157 of the House, Sixtieth Congress, second session, and there look upon the list of officers and experts and clerks and stenographers and typewriters, recapitulated from page 244 to page 418 of this closely printed volume.

In these pages they will find the names of the vast army of officers employed not to extinguish fires, nor to prevent the sawmill men from plundering the forests, save to a limited degree. There are more bosses than there are workmen connected with this service. For every man at work in the forests there stands in Washington, or somewhere on the road, a clerk, a stenographer, an expert, an engineer, a construction engineer—every conceivable kind of officer that the ingenuity of the people engaged in the business could possibly suggest.

Mr. CLAY. Will the Senator from Montana yield to me for a moment?

Mr. CARTER. I yield with pleasure.

Mr. CLAY. I see that the last agricultural appropriation act carried for salaries and general expenses for the Forestry Service $3,292,200. The present bill carries, putting the items together, $5,746,200. I am surprised at one thing on looking at the report, that we should appropriate a lump sum of nearly $6,000,000 to any public officer—and I make no criticism upon any of those who are in charge of the Agricultural Department—and allow the head of that department to say how many men shall be employed in the office and what salaries shall be paid.

Take, for instance, the recapitulation here of the expenditures of last year. The statutory salaries were $141,879.08. Of course those were the salaries provided for by Congress. From a lump sum appropriated by Congress there were paid in salaries in Washington, $455,208.84; outside of Washington, from a lump sum, $1,576,398.92.

In my judgment it is bad legislation, which can not be defended, for Congress—and I make no criticism upon the Secretary of Agriculture; so far as I know he is an honorable man—to appropriate $6,000,000 and say that out of that sum the Secretary of Agriculture or the Forestry Service shall select such employees as they need and pay them such salaries as the department think they ought to have. In my judgment, in appropriating to sustain a department, Congress ought to fix the number of clerks and the salaries to be paid.

Take one item here—$242,000 for traveling expenses. It seems that two-thirds of the appropriation in this bill are simply in lump sums, allowing the department to employ such employees as it needs and to pay them such salaries as it thinks they ought to have. The work may have been done honestly, and no more employees may have been selected than were needed, but I contend that in all appropriations there ought to be particulars. We ought to set forth how many clerks are needed and what salaries shall be paid them. It is the business and duty of Congress to do that. When we appropriate in large lump sums, leaving it to the department to select the employees and fix the salaries, Congress is not, in my judgment, discharging its duty faithfully.

Mr. CARTER. Mr. President, the lax methods employed by Congress in its appropriations for this service have been the source of the vice of the entire matter from the beginning. There is no provision in the Federal Constitution of more importance to the Government and the people than that which gives to Congress the purse strings of the Nation.

Mr. SMOOT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Utah?

Mr. CARTER. With pleasure.

Mr. SMOOT. I desire to call the attention of the Senator from Georgia to the fact that the figures he has given are the estimates asked for, and not the amount carried in the bill. The total amount carried in the bill for this purpose is $5,146,200.

Mr. CLAY. There is another item of $600,000.

Mr. SMOOT. No; that is for improvements.

Mr. CLAY. For improvements, cabins, telephones, and so forth.

Mr. TELLER. But it is all for the Forestry Service.

Mr. SMOOT. I was speaking of the forest reserves, as I understood the Senator was.

Mr. CLAY. I will say to the Senator I took the amount set forth on page 26, which is $5,146,200, and above it is another item:

> There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $600,000, to be expended as the Secretary of Agriculture may direct, for the construction and maintenance of roads, trails, bridges, fire lanes, telephone lines, cabins, fences, and other permanent improvements necessary for the proper and economical administration, protection, and development of the national forests.

That, added to the item which I have read, makes $5,746,200. What I was contending was simply that the Committee on Agriculture ought to say so many million dollars and specify how it is to be used—how many clerks, how many stenographers,

how many rangers—and let the country know how many persons are being employed in this service.

Mr. SMOOT. In answer to the Senator, I will state that the Book of Estimates and the report the Senator from Montana has in his hand now not only state how much is asked for every department, but it gives the names of all the employees of the department, where they were employed, and the salary fixed for each.

Mr. CLAY. Who fixes the salaries of the employees, I will ask the Senator?

Mr. SMOOT. The salary is fixed by the department itself.

Mr. CLAY. By the Secretary of Agriculture?

Mr. SMOOT. Yes.

Mr. CLAY. My recollection is that two years ago Congress placed a provision in an appropriation act that the Secretary of Agriculture should report to Congress annually the number of persons employed and the salaries paid.

Mr. SMOOT. And, Mr. President, that is what they have already done in this report.

In relation to the lump-sum appropriations, I wish to say that lump appropriations are no new thing. The Post-Offices and Post-Roads Committee report the post-office appropriation bill with an immensely larger amount in lump sums than this bill appropriates, and the Senator is a member of that committee, and so also is the Senator from Montana.

Mr. CLAY. The Senator is mistaken in that proposition. He will find that the Committee on Post-Offices and Post-Roads sets forth in many instances, in most of the instances, the number of clerks to be employed, the messengers, and so forth, and the salaries are fixed.

Mr. SMOOT. I have noticed the appropriation bill coming from that committee, and if I am not mistaken it carries a larger amount than this by a great deal in a lump-sum appropriation; and also the naval bill carries large lump-sum appropriations, and every other appropriation bill in this Government has large lump-sum appropriations.

Mr. CARTER. Mr. President, in imposing upon the Congress the responsibility for the appropriations the framers of the Constitution did not intend to impose an idle task, to be performed in a perfunctory way. There has been little attention given to the details of these appropriations, as the Senator from Georgia well suggests.

In order to observe the manner and purpose of disposing of the public money under the general phraseology used, I refer to page 76 of House Document No. 1149, second session of the present Congress, from which recapitulation it will be seen that out of this lump sum of money we are paying lecturers to go all over the United States on a salary, besides paying their expenses, and those expenses are not trifling. One gentleman was sent during the chilly months of the spring to New Mexico from the city of Washington to investigate wood fuel in New Mexico, and his expenses were $411.35. Another gentleman put in $130 of expenses returning West, after having served three months on a detail in Washington. Lectures, instruction to societies, lectures before colleges, and the general diffusion of ideas through this means are, of course, commendable; but, I inquire, what Senator understood when we were making the appropriation that we were hiring a band of lecturers to go over the country to lecture before institutions and meetings, with their railroad fare and good salaries and traveling expenses paid by the Government?

According to my simple view, originally entertained, but greatly modified by observation, the purpose was to conserve the forests, to protect them from fire and the rapacity and greed of the men who were stealing the timber for gain. If it is the intention of Congress to employ lecturers to supplement the general educational forces of the country, well and good; but we should have been consulted as to the number of lecturers we would employ, and the range within which they should give instruction; and we ought to place some limitation upon their expenses, as we do upon the expenses of other officers who travel. We take an ordinary agent of the Government en route from one point tc another and allow him three or four dollars a day in lieu of substistence. The regular appropriation bills, having regard for the Treasury, take the precaution of fixing a maximum limit; but not so in this service. A "lump-sum appropriation" is what they call it; and from the lump-sum appropriation one man gets a thousand dollars for the expenses of a trip, another four hundred and eleven dollars and some cents. I doubt not they have disbursed the money. Mark you, I am not raising any question upon that point.

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from New Hampshire?

Mr. CARTER. Certainly.

Mr. GALLINGER. I notice that one gentleman received $91.90 for an address before the Tight Barrel Stave Manufacturers' Association.

Mr. CARTER. The Government paid $91.90 for his expenses in giving that lecture.

Mr. GALLINGER. What did the Tight Barrel Stave Association have to do with forests?

Mr. CARTER. The Tight Barrel Stave Association desired some observations made, I suppose, and it cost the Government of the United States ninety-odd dollars, besides the salary of the man who made the address.

Mr. GALLINGER. I understand the gentlemen have made various addresses before woolgrowers' associations in the various States. What is the exact relation between forestry and woolgrowing, if the Senator knows?

Mr. CARTER. I suppose they consider the sheep herder in need of information as to the kind of forest management which would best suit. Yet, in that regard——

Mr. SMOOT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Utah?

Mr. CARTER. I should be glad to yield, but I have already yielded to the Senator from New Hampshire.

Mr. GALLINGER. I should like to get that information from any Senator. I am seeking light.

Mr. CARTER. I yield to any Senator.

Mr. SMOOT. Montana has more sheep than any other State in this Nation; she produces more pounds of wool; she grazes more sheep upon forest reserves than any other State, and it does seem to me that there is a connection between the Forestry Service and the woolgrowers' associations, which comprise all of the woolgrowers in the western section.

Mr. GALLINGER. Exactly what information can this gentleman give to these men who have flocks of sheep on the forest reserves? Is it to tell them where the best pasturage is, or——

Mr. FORAKER. All of these forestry men have presumably passed a civil-service examination——

Mr. GALLINGER. Unquestionably.

Mr. FORAKER. And the sheep have not. [Laughter.]

Mr. SMOOT. In answer to the statement of the Senator, I will say there are a great many things they can tell the sheepmen. They can tell them about overfeeding of the range, as to their bedding——

Mr. GALLINGER. Overfeeding sheep when they are at large?

Mr. SMOOT. Overfeeding of the range.

Mr. GALLINGER. I am still curious; I am not very well informed on this subject. These gentlemen lecture before women's clubs all over the country. What do they tell the women about forestry? In my State, for instance——

Mr. SMOOT. In that particular case I do not know.

Mr. GALLINGER. They are all over the country.

Mr. SMOOT. In fact, I do not know.

Mr. GALLINGER. Before teachers' associations.

Mr. SMOOT. But I suppose they have information which the organizations desire for the benefit, perhaps, of certain interests in the Senator's State. I do not know what they are, but, no doubt, I can find out.

Mr. GALLINGER. Well, I have not any information, so I will thank the Senator from Montana for permitting me the privilege of asking him the question. I am satisfied from a casual examination of this list that we are wasting a vast amount of money in sending a horde of men up and down the country delivering lectures on forestry to all kinds of organizations. I really think there ought to be some way to put a stop to it.

Mr. CARTER. Mr. President, with the consent of the Senate, I desire to insert in the RECORD this recapitulation of traveling expenses. I presume it includes the total sum of $299,000 spent for this form of education. I ask to include it in the RECORD so that Senators may not be put to the inconvenience of sending to the document room, and that the general public, interested as they are in the pages of the RECORD, may be able to get the data which I will not take the time of the Senate to refer to in detail.

Mr. HEYBURN. I ask the Senator to yield to me for a moment.

Mr. CARTER. Certainly.

Mr. HEYBURN. I am curious about such items as I find in this publication furnished by the department in response to the resolution of the Senate. Here, on page 9 of Senate Document No. 485, we find this kind of an item: Enos A. Mills. He travels from Denver, Colo., to Denver, Colo., and delivers an

address before the Woman's Club, and the Government pays him $10.25 in addition to his salary. Then, on the same page, Enos A. Mills, who seems to appear very frequently, travels from Denver, Colo., to Denver, Colo., and delivers another address before the Woman's Club, for which he gets $10.20. The former address seems to have been worth 5 cents more than the latter address. Enos A. Mills again, within a short time, travels from Denver, Colo., to Denver, Colo., and gets $10.05 for a lecture to the Woman's Club. I merely mention this item. The book is full of very large items of traveling expenses of that kind.

Mr. CARTER. Mr. President, if it is the desire of Congress to hire Mr. Mills to address women's clubs at Denver or elsewhere, Congress may do so; but I deny the right of any officer of the Government, under any language employed in any appropriation act, to make any such expenditure as that or any such expenditure as any one of the hundreds of expenditures named in this document. It amounts to a misappropriation of public funds. There can be no mistaking the terms employed.

Mr. President, let the friends of forestry and forest preservation take note of what must inevitably follow the abuse of power conveyed through loosely drawn laws. It will, as sure as the practice continues, break this whole forestry system down. The American people will stand a certain amount of extravagance and nonsense, but they will not stand idly by and see the plain purposes of the law ruthlessly and constantly perverted.

As I stated in the beginning, and the Senator from Utah will not take issue with the statement, the purpose of this law was the conservation of the forests and not the establishment of a universal system of education through lecturers sent for to address women's clubs and cooperage associations and stave-barrel concerns or other organizations over the Union, extending from Maine to California, and from the Canadian border clear down to Mexico.

Mr. NELSON. Mr. President, I have listened to the Senator from Montana and the Senator from Idaho. I want to say to the Senator from Montana that I have no desire to take the floor from him, but I think the only mistake made in sending out the lecturers the Senator from Idaho referred to was that they ought to have been sent to Idaho and to Montana to lecture those Senators.

Mr. CARTER. Mr. President——

Mr. HEYBURN. I should like to interrupt the Senator long enough to call attention to the result of these lectures to women's clubs and the value of them. I would not undertake to say how many hundred of them there were, but they generally had a stereotyped form of resolution indorsing the Forest Service and everything that it did or contemplated. I was in receipt of innumerable petitions from women's clubs and resolutions adopted at those gatherings which were addressed by these various representatives, and that was the real purpose—to bring pressure to bear upon Congress. They were all in a stereotyped form and I presume printed here in Washington.

Mr. NELSON. Mr. President——

Mr. CARTER. Before the Senator from Minnesota asks another question, I wish to reply to him by saying that it would be well to have lectures delivered to instruct the Senator from Idaho and the Senator from Montana, because we certainly have but a loose conception of the public duty which would justify this class of expenditures under a general appropriation of money for the preservation of our forests from fire and plunder.

Mr. NELSON. It is evident that the Senator from Idaho was totally incorrigible when approached by these ladies with their petition. The ladies, who have been lectured and schooled in this matter, approached him and have apparently had no effect upon him.

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from New Hampshire?

Mr. CARTER. I yield to the Senator from New Hampshire.

Mr. GALLINGER. I wish to give just one more instance, and then I think I am done. I notice that there was a gentleman who started at Norfolk, Va., and went to Norfolk, Va., and he made an address before the guests of the Inside Inn at the request of the hotel manager, and they paid him $15.95.

Mr. CARTER. The Inside Inn was, I suppose, a place where hospitality was extended to the wayfarer, and when the people travel they ought to be instructed by lecturers as well as when they are at home. I can not understand why the Government, in paying for lectures, should not pay a lecturer to stay here constantly at the New Willard Hotel and the Arlington to lecture the crowd as they pass and keep them constantly under instruction. The Inside Inn, I take it, was an inn in the inside of something. [Laughter.]

Mr. GALLINGER. If the Senator will permit me, the hotel manager wanted his guests to be entertained at the expense of the Government, and this gentleman kindly consented to give them $15.95 worth of information.

Mr. CARTER. I suppose it was a very high order of entertainment at a very low price.

Mr. SMOOT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Utah?

Mr. CARTER. I yield to the Senator.

Mr. SMOOT. If the Senator is through on that point——

Mr. CARTER. I can conclude my observations in a very short time. Still, if there is anything to which I have been referring in regard to which the Senator desires to put a question I would be glad to answer it.

Mr. SMOOT. I merely wanted to put in some figures in relation to the different departments of the Government as to the appropriation of lump sums and the statutory rolls, so that the Senate will be informed that what I said was true.

In the legislative department the statutory roll was 7 per cent and the lump sum 93 per cent of the whole appropriation. In the executive department the statutory roll is 100 per cent. Take the Treasury Department, 46.95 per cent statutory and 53.05 per cent lump sum.

The War Department is 88.05 statutory roll and 11.95 per cent lump sum. The Interior Department is 58.53 per cent statutory roll and 41.47 lump sum. The Post-Office Department, the one that I referred to, is 94.91 statutory roll and 5.9 per cent lump sum. The Agricultural Department is 22.41 per cent statutory roll, and the whole appropriation is 77.59 for the lump sum. The Department of Commerce and Labor is 44.75 per cent statutory and 55.25 lump sum. The Department of Justice is 46.25 per cent statutory and 53.75 per cent lump sum.

Mr. CARTER. And this appropriation is 100 per cent lump sum.

Mr. SMOOT. The appropriations that the bill carries amount to thirteen million and some odd thousand dollars.

Mr. CARTER. I am speaking of this item of over $5,000,000, without specifying a single salary, using language so general that it appears from the expenditures that have been washed through the accountants heretofore that anything from a $10 lecture to a steam engine can be bought out of the appropriation.

Mr. HEYBURN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Idaho?

Mr. CARTER. Certainly.

Mr. HEYBURN. Mr. President, they have purchased—I speak from the statement and description in the newspapers—a steam launch—I think two of them—to ply on Lake Ponderay for the amusement and accommodation of these uniformed civilians.

Mr. SMOOT. Mr. President, I wish to say just one word in relation to the steam launch. It is true that the Government has two steam launches on the lake mentioned by the Senator from Idaho, but I wish to call the attention of the Senate to the fact that there is no other way on earth to make the examination of the mountain there from one side to the other, except by crossing the lake on a steam launch.

Mr. HEYBURN. Along the margin of that lake on the western side for 80 miles there are three parallel railroads—the Northern Pacific, the Great Northern, and the new Corbin road, and up to the very lower end of it or within a close distance there are trolley lines. Clear across the upper end of it the Northern Pacific road is within an average of 100 yards from the shore, and there is a system of boats for hire just as there is on all great lakes.

Mr. SMOOT. I said nothing in relation to one side of the lake. I am speaking of the other side of the lake, where they go to examine the forest. They go from the side of the lake that has the railroad to the other side where they have the trees and the forest, and there is no road on the opposite side of the lake.

Mr. HEYBURN. We have some of our best citizens living on the other side of the lake, with their homes and their mines, and the means of access to them, and boats every day carrying the mails to the other side of the lake. That is where Lake View is, on the other side of the lake.

Mr. SMOOT. The hill is very steep on the opposite side of the lake, so that it would be impossible for anyone to live upon the side of the mountain.

Mr. FULTON. I should like to make an inquiry of the Senator from Utah.

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Oregon?

Mr. CARTER. Certainly.

Mr. FULTON. I wish to inquire how they get up those hills with steam.

Mr. SMOOT. The forester or ranger goes to the foot of the hill and walks up. It is some of the land the Senator from Idaho tried to make us believe yesterday was agricultural land, because he said that every acre of land in his State is agricultural land.

Mr. HEYBURN. Probably the best truck garden, if not one of the best in the State, is right at the place the Senator is referring to. On the ranch there at Lake View probably the finest vegetables are grown and as good fruit as was ever raised in Utah. I speak by the book.

Mr. SMOOT. I will submit it to anybody who has been on the side of the lake and has seen the hillside there on the lake that it would be impossible to have a vegetable garden there.

Mr. CARTER. Probably it is a hanging garden. [Laughter.]

Mr. HEYBURN. I only regret that that description of the country is to be perpetuated and sent out for men like Mr. Donnelly and those who have beautiful homes there, with all modern improvements, to read, to show what the outside world thinks of them.

Mr. CARTER. We are all agreed that the scenery must be of a high order in that neighborhood of woodland, mountain, and garden.

But, Mr. President, returning to the original proposition—and I challenge any Senator or anyone of the Forest Service to gainsay that—the purposes of Congress, manifest from the first line of the law on this subject to the present day, was to protect the forests against the ravages of fire and plunder by men bent on stealing the timber for profit. It never was intended that these forest reserves should become a barrier to settlement where land was agricultural and not forest in character. It never was intended that under this law any citizen of a State should be driven from his home, a wanderer on the earth, for the alleged reason that he was a bad character, or did not suit the forest ranger in the neighborhood, or went to the county seat and got drunk betimes, and therefore was a proper victim for robbery. But men are driven from their homes, their property taken without adequate or any compensation, treated as trespassers where they had lived a long, long time before forest reserves had been created, and the answer generally is that the man's character is subject to criticism, and therefore he has no legal right that anybody is bound to respect.

I charge that this service has departed from the primary purpose of protecting the forests from fire and of protecting the forests from plunder. I bring this book with this list forward as my witness. There are apparently more clerks, experts, construction engineers, and the like than there are forest rangers or men engaged in the work that Congress intended to accomplish. Two hundred and ninety-nine thousand dollars are spent in a year traveling over the railroads of the country. Who ever contemplated that there should be an open door to the Treasury Department through which any gentleman desiring to take a junketing tour could make a trip across the continent and back at the expense of the Government, and come back and merely make a little item such as we have here, a trip to California to instruct forest reserve supervisors, $419? It was $411 in one case, and the items run as high as a thousand dollars for going about the country and looking over the forests and to consult with agents.

Mr. HALE. Who appoints these traveling agents?

Mr. CARTER. I understand they are generally detailed from the offices and sent out on expeditions of one kind and another over the country. They are apparently clerks in the Forestry Bureau. There is a long list of them here.

Mr. HALE. I was going to ask the Senator, does he find simply isolated cases or a long list of cases where money which is appropriated by Congress has been used up by these traveling agents and lecturers? Are they exceptional cases or are there many cases?

Mr. CARTER. There is page after page setting forth items such as these:

Advising with supervisors in regard to permanent improvement work, and, when necessary, taking direct charge of the work in the field, $142.59.

This was accomplished in the fiscal year. It was commenced May 29, 1908, and ended June 30, 1908. The amount of expense, in addition to the salary, was $142.59.

Here is another gentleman delegated to go down to New Mexico to investigate wood fuel. He was gone quite a while, from some time in January to along in March. Expenses, $411.35. The details of that expenditure are not here given.

Study of forest conditions in Kentucky in July, $293.54 expenses.

Mr. HALE. Let me say here, Mr. President, it is no wonder, with such a showing, that not only hundreds of thousands of dollars, but millions of dollars, have been spent in this way, in a way never contemplated by Congress, never supposed to be a part of the business of the forest reservations. I notify the Senator and the Senator in charge of the bill that some day, and some near day, when the Treasury will be swept as clean as a country contribution box and there will be no money, we will be confronted with the question of borrowing money and paying the bills of the Government, or issuing bonds as a debt, or imposing taxes. The first way to meet that is to cut down these appropriations. We are not doing it this year; we are going on in a blind way, and no appropriations are being cut down; but some day, and some near day, we will have to do that or borrow money or put on taxes.

These exhibits of the remarkable encroachment of the executive power that has authorized this crowd of traveling lecturers and agents traversing the country, bringing in enormous bills without any responsibility or without any accountability, some day, Mr. President, have got to cease. They can not be maintained upon the general benevolent idea that we are conserving the public interests and saving the forests. It is an abuse, Mr. President, and pretty soon it will have to be corrected.

Mr. DOLLIVER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Iowa?

Mr. CARTER. I am glad to be reminded that I am entitled to the floor.

The VICE-PRESIDENT. The Senator from Montana is entitled to the floor. Does he yield to the Senator from Iowa?

Mr. HALE. My attention was attracted, and I was surprised at the exhibits made by the Senator.

Mr. CARTER. I would have been glad to have had the Senator notice the item on page 80:

Expenses connected with the delivery of an address before the Cooperage Association of St. Louis, $279.50.

Mr. HALE. Will not the Senator read that again?

Mr. CARTER. I will, and I think I should read it slowly and distinctly, so that all Senators may clearly understand it.

Mr. HALE. I hope so.

Mr. CARTER (reading)—

To deliver address before the Cooperage Association of St. Louis. To confer with engineer in charge of service laboratory. To investigate market conditions at Butte—

I suppose that is in Montana. They sell copper there very extensively—

With special reference to the sale of mine timbers from the national forests, $279.50.

The lecture, investigation, and all being thrown in together, so that we can not tell just what the lecture actually cost.

Mr. HALE. The lecture was delivered in St. Louis?

Mr. CARTER. It was delivered in St. Louis.

Mr. HALE. Which is several miles away from a forest reservation.

Mr. CARTER. Quite a distance.

Mr. WARREN. Will the Senator permit me a moment?

Mr. CARTER. Certainly.

Mr. WARREN. It is perfectly evident that considerable time will be necessary to finish the measure now before us. I want, if possible, to avoid evening meetings. I move that when the Senate adjourns to-day it be to meet at 11 o'clock to-morrow morning. I want to say further, I hope we may proceed to quite a late hour to-night, as late as the Senate will stay, so that we may be in a condition in the morning to finish the bill.

Mr. HALE. There are some executive documents that it is intended should be laid before the Senate, the reading of which will require some time. I am very glad the Senator has made the suggestion for a session at 11 o'clock to-morrow. We shall be in a great deal of trouble and find it difficult to carry through the appropriation bills unless we do that, and perhaps a little later have night sessions.

I am very glad the Senator has suggested that the Senate meet at 11 o'clock.

The VICE-PRESIDENT. The question is on the motion of the Senator from Wyoming [Mr. WARREN] that when the Senate adjourns to-day, it adjourn to meet at 11 o'clock to-morrow morning.

The motion was agreed to.

Mr. GUGGENHEIM. Mr. President——

The VICE-PRESIDENT. The Senator from Montana [Mr. CARTER] is entitled to the floor. Does he yield to the Senator from Colorado?

Mr. CARTER. I yield to the Senator from Colorado for a question.

Mr. GUGGENHEIM. It is in regard to a matter that will take only a second. It is in relation to the Forestry Service.

Mr. CARTER. I yield to the Senator.

Mr. GUGGENHEIM. Mr. President, we in Colorado have appreciated very much such points as those which have been brought out by the Senator from Maine [Mr. HALE]; and it was with those points in view that I introduced on January 25, 1909, a joint resolution providing for a careful inquiry and report respecting the operation and administration of the national Forest Service. That was about thirty days since. Up to the present time I do not think the Senate has been informed that any report has been made on the resolution by the Committee on Agriculture and Forestry, to whom it was referred.

Mr. BURROWS. Mr. President——

The VICE-PRESIDENT. The Senator from Montana [Mr. CARTER] is entitled to the floor. Does he yield to the Senator from Michigan?

Mr. CARTER. I yield to the Senator from Michigan.

Mr. BURROWS. I understood the Senator from Montana to request to have printed in the RECORD some portion of this remarkable document. It is so interesting that I ask him to modify his request and to include the entire document, so that we shall know where this money has gone.

Mr. CARTER. The portion of it relating to forestry? Does it all relate to forestry?

Mr. BURROWS. It relates to forestry in a general way.

Mr. CARTER. I modify the request; and now I ask that the entire portion of the foresters' figures and facts be inserted in the RECORD.

The VICE-PRESIDENT. Without objection, it is so ordered. The matter referred to is as follows:

Statement showing the names of officers or employees (other than special agents, inspectors, or employees who in the discharge of their regular duties are required to constantly travel) who traveled on official business from Washington to points outside of the District of Columbia during the fiscal year 1908, etc.

FOREST SERVICE.

Name.	Title.	Destination.	Business or work.	Total expense.	Appropriation.
Adams, D. W...	Expert.....	Flagstaff, Ariz. (Mar. 21-31, 1908)....	Returning to headquarters in West after serving three months' detail in Washington office to assist in administrative work.	$119.20	General expenses, Forest Service, 1908.
Adams, James B.	Assistant forester and chief of operation.	Points in Utah, Montana, Colorado, California, and return. (June 15-Aug. 4, 1907.)	Consultation with and instruction of forest officers regarding the conduct of National Forest business. To look into efficiency of personnel of forests, to prescribe better and more effective methods of keeping National Forest records both at the supervisor's offices and by men engaged continuously in field work, and to look into conditions of roads and trails, telephone lines, etc., built by Forest Service.	501.53	Do.
Do.....	.....do.....	Los Angeles and other points in California and points in New Mexico and Arizona and return. (Oct. 21-Dec. 25, 1907.)	.....do.....	714.85	Do.
Akerman, A....	Forest assistant.....	Points throughout Virginia, Tennessee, Georgia, North Carolina, and return. (June 20-Sept. 17, 1907.)	Survey of South Appalachian watersheds.....	185.06	Survey and report on White Mountain and Appalachian watersheds, 1907-1908.
Allison, John H.	.....do.....	Flagstaff, Ariz. (Mar. 26-Apr. 1, 1908).	Returning to headquarters in West after serving three months' detail in Washington office to assist in administrative work.	83.70	General expenses, Forest Service, 1908.
Anderson, G. G.	Clerk.....	New York City and return. (Oct. 15-19, 1907.)	Examining office appliances and investigating use of commercial phonograph in business offices.	34.00	Do.
Arnold, G. S....	Expert.....	New York, N. Y.; Chicago, Ill.; Denver, Aspen, Colo.; Rawlins, Wyo.; Minneapolis, Minn. (July 1-Sept. 19, 1907.)	To consult with Mr. Woodruff, assistant attorney-general. Investigation of timber and grazing matters in Colorado. Conference with Minnesota State officers.	317.95	Do.
Do.....	.....do.....	Chicago, Ill.; Denver, Glenwood Springs, Redcliff, Colo.; Cheyenne, Wyo. (Mar. 16-June 12, 1908.)	Investigation of grazing trespass and other matters in Colorado and Wyoming.	551.75	Do.
Ashe, W. W....	Forest assistant.....	Salisbury, Asheville, Andrews, Murphy, Greensboro, and Raleigh, N. C. (Oct. 27-Nov. 4, 1907.)	Survey of Southern Appalachian watersheds..	143.56	Survey and report on White Mountain and Appalachian watersheds, 1907-1908.
Do.....	.....do.....	Points throughout Virginia, Tennessee, Georgia, North Carolina, and return. (Aug. 7-31, 1907.)	Study of Southern Appalachian watershed...	143.05	Do.
Balthis, R. F...	.....do.....	Flagstaff, Ariz.....	Returning to headquarters in West after serving three months' detail in Washington office to assist in administrative work.	83.00	General expenses, Forest Service, 1908.
Bard, G. P.....	.....do.....	El Paso, Tex. (Feb. 11-15, 1908).....	Assisting supervisors in preparation of timber sales.	77.25	Do.
Barton, J. E....	Deputy forest supervisor.	Sand Point, Idaho.....	Returning to headquarters in West after serving three months' detail in Washington office to assist in administrative work.	106.75	Do.
Bartmess, E. M.	Clerk.....	Boise, Idaho. (Apr. 17-May 1, 1908).	Change of official headquarters.....	90.30	Do.
Barnum, C. T...	Expert.....	Ruston, La.....	To carry on tests in treatment of railroad ties.	37.60	Cooperative work, forest investigations, 1908.
Barnes, W. C...	Inspector of grazing.....	Chicago, Denver, Gunnison, Salt Lake, and return. (Jan. 12-31, 1908.)	To Gunnison, Colo., to make general examination of grazing work and to address members of Gunnison Stock Growers' Association, then to Denver to assist in adjusting grazing questions arising at American National Live Stock Association Convention, and then to Salt Lake to attend supervisors' meeting, district 4, and to attend to general grazing matters.	240.15	General expenses, Forest Service, 1908.
Barrett, L. A...	Supervisor.....	Reno, Nev. (Feb. 18-25, 1908).....	Returning to headquarters in West after serving three months' detail in Washington office to assist in administrative work.	100.00	Do.
Bateman, E....	Expert.....	New York City and return. (Nov. 19-21, 1907.)	To confer with manufacturers of chemical glassware on special apparatus for creosote analyses.	17.40	Do.
Bates, C. G.....	Forest assistant.....	Algood, Tenn.; Decatur, Selma, Mobile, Myrtlewood, Evergreen, Montgomery, Selma, Ala.; Memphis, Tenn.; Ozark, Ark.; Poplar Bluff, St. Louis, Mo.; Nashville, Tenn.; Brinkley, Ark.; Louisville, Ky.; Mechanicsburg, Pa., and return. (July 6-Nov. 20, 1907.)	Study of distribution, uses, and silvical characteristics of the hickories.	556.15	Do.
Do.....	.....do.....	Lincoln, McCook, Lincoln, Greensburg, Nebr. (Trip not finished in the fiscal year.) (May 22-June 30, 1908.)	Study of the results of planted forest trees as windbreaks.	201.07	Do.
Benton, Wm. H.	Constructing engineer...	Bellefourche, Whitewood, Camp Crook, S. Dak. (May 29-June 30, 1908.) Trip not completed in fiscal year.	Advising with supervisors in regard to permanent improvement work, and when necessary, taking direct charge of the work in the field.	142.59	Do.
Betts, H. S.....	Engineer in timber tests.	New York City and return. (Oct. 5, 1907.)	To deliver address before Carriage Builders' National Association.	12.00	Do.

Statement showing the names of officers or employees (other than special agents, inspectors, or employees who in the discharge of their regular duties are required to constantly travel) who traveled on official business from Washington to points outside of the District of Columbia during the fiscal year 1908, etc.—Continued.

FOREST SERVICE—continued.

Name.	Title.	Destination.	Business or work.	Total expense.	Appropriation.
Betts, H. S.....	Engineer in timber tests.	Points in Mississippi, Texas, New Mexico, Arizona, and return. (Jan. 1–Mar. 6, 1908.)	To investigate wood fuel in New Mexico and Arizona, and secure samples for test. To superintend preservative treatment of timber for test purposes at Illinois Central plant in Mississippi and Santa Fe plant in Texas.	$411.35	General expense, Forest Service, 1908.
Besley, F. W...	Collaborator.....	Oakland, Md. (Aug. 5-31, 1907)	Survey of Southern Appalachian watershed...	78.24	Survey and report on Appalachian and White Mountain watershed, 1907–8.
Bigelow, R. L. P.	Supervisor.....	Denver, Colo.; San Francisco, Montague, Cal. (Aug. 28–Sept. 8, 1907.)	Returning to headquarters in West after serving three months' detail in Washington office to assist in administrative work.	130.25	General expenses, Forest Service, 1908.
Boisen, A. T....	Forest assistant.....	(Trip commenced in fiscal year 1907.) Monterey, Chattanooga, Tenn., Huntsville, Ala.; Memphis, Tenn.; Louisville, Ky.; Nashville, Monterey, Tenn.; Delhi, La.; Memphis, Tenn.; Bowling Green, Ky.; Toledo, Ohio; Wellston, Defiance, Ohio, and return. (July 1–Dec. 1, 1907.)	Study of distribution, uses, and silvical characteristics of the hickories.	618.09	Do.
Do.....	.....do.....	Philadelphia, Pa.; Columbus, Ohio, and return. (Jan. 1–17, 1908.)	Study of distribution, uses, and silvical characteristics of the hickories. Educational addresses before societies and institutions.	44.82	Do.
Do.....	.....do.....	Holly Junction, W. Va., and return. (Feb. 29–Mar. 12, 1908.)	Study of distribution, uses, and silvical characteristics of the hickories.	36.95	Do.
Bradfield, Wesley.	.....do.....	Lexington, Ashland, Ky., and return. (July 1–Oct. 26, 1907.)	Study of forest conditions in Kentucky in cooperation with the State.	293.54	Cooperation work, forest investigations, 1908, $234.64. General expenses, Forest Service, 1908, $58.90.
Do.....	.....do.....	Dover, Del.; New York, N. Y.; Newport, Providence, R. I.; New York, N. Y.; Dover, Del.; Philadelphia, Pa., and return. (Jan. 8–Feb. 29, 1908.)	Study of forest conditions and advice as to methods to be followed, in cooperation with private owners and with the War Department.	111.88	Cooperation work, forest investigations, 1908, $10.12. General expenses, Forest Service, 1908, $101.76.
Do.....	.....do.....	Indianapolis, Ind.; Toledo, Ohio, and return. (Mar. 26–Apr. 18, 1908.)	Advising and assisting owners of woodlands in their care, and giving educational addresses before horticultural societies and other institutions in Ohio, Michigan, and Indiana.	70.07	General expenses, Forest Service, 1908.
Do.....	.....do.....	Urbana, Champaign, Carbondale, Ill. (Trip not completed in fiscal year 1908.) (May 18–June 30, 1908.)	Study of forest conditions in Illinois in cooperation with State.	28.49	Do.
Braniff, E. A....	.....do.....	Shawano, Green Bay, Ashland, Odanah, Wis. (Mar. 5–23, 1908.)	Supervision of timber work on Indian reservations in cooperation with Department of Interior.	152.15	Do.
Bristol, H. S....	Expert.....	New York City and return. (Oct. 28–31, 1907.)	To confer with manufacturers of apparatus for the paper-pulp laboratory.	31.10	Do.
Do.....	.....do.....	Akron, Ohio, and return. (Nov. 1–6, 1907.)	To confer with W. C. Geer, collaborator, on the preparation of a circular on the analysis of turpentines.	47.95	Do.
Do.....	.....do.....	Boston, Mass., and return. (Nov. 7–8, 1907.)	To confer with manufacturers of pulp and paper machinery on apparatus for the Forest Service wood-pulp laboratory.	21.35	Do.
Do.....	.....do.....	New York City and return. (Feb. 5–8, 1908.)	To attend annual meeting of the American Pulp and Paper Association and deliver address on wood-pulp experiments of the Forest Service.	23.80	Do.
Do.....	.....do.....	Boston, Mass.; and points in New York and return. (Mar. 17–25, 1908.)	To confer with heads of chemistry departments of several universities in regard to recent employment of graduates at the Forest Service laboratory.	34.69	Do.
Do.....	.....do.....	Philadelphia, Pa., and return. (April 9, 1908.)	To address chemical society on wood-pulp investigations of the Forest Service.	11.00	Do.
Do.....	.....do.....	New York City and return. (May 28–31, 1908.)	To address Oil, Paint and Drug Club of New York on the turpentine investigations of the Forest Service.	16.20	Do.
Bruce, E. S.....	Expert lumberman.....	Fitchburg, Mass.; Forham, N. H.; St. Johnsbury, Vt.; Fabyan, N. H.; Rock Island, Canada; Sawyers River, Canada; Boston, Mass., and return. (July 8–Aug. 7, 1907.)	To obtain prices at which land might be purchased for the proposed White Mountain National Forest in accordance with provision of agricultural appropriation bill for 1907–8.	166.90	Survey and report on Appalachian and White Mountain watershed, 1907–8.
Do.....	.....do.....	Lenoir, N. C.; Blue Ridge, Va.; Knoxville, Newport, Tenn.; Asheville, N. C., and return. (Sept. 2–Oct. 11, 1907.)	To obtain prices at which land might be purchased for proposed Appalachian National Forest in accordance with provision of agricultural appropriation bill, 1907–8.	66.58	Do.
Do.....	.....do.....	Elkins, W. Va.; Cumberland, Md.; Woodstock, Va. (Oct. 21–29, 1907.)	.....do.....	62.74	Do.
Do.....	.....do.....	Woodstock, Va., and return. (Dec. 14–19, 1907.)	.....do.....	29.80	Do.
Do.....	.....do.....	Los Angeles, Cal., and return. (Mar. 14–Apr. 15, 1908.)	To investigate the proposed sale of timber to Brookings Lumber Co., San Bernardino National Forest.	325.00	General expenses, Forest Service, 1908.
Do.....	.....do.....	Green Bay, Shawnee, Wis.; Chicago, Ill., and return. (May 18–June 2, 1908.)	To examine logging operations administered by the Forest Service on the Menominee Indian Reservation.	69.77	Do.
Do.....	.....do.....	Twin Lake Junction, N. Y., and return. (June 15–30, 1908.)	Investigation of logging on timber tract of Cornell University.	52.42	Do.
Brothers, C. S...	Law clerk.....	Points in Colorado and return. (July 4–Aug. 11, 1907.)	Examining supervisor's records relating to special uses and instructing supervisors regarding special-use matters.	201.15	Do.
Bruins, J. F.....	Forest assistant.....	St. Anthony, Idaho, via Chicago, and Salt Lake, Utah. (Aug. 4–24, 1908.)	Returning to headquarters in West, after serving three months detail in Washington office to assist in administrative work and become acquainted with office routine.	77.65	Do.
Burns, Findley..	Expert and chief of publication.	Points in Illinois, Colorado, Utah, California and return. (July 26–Sept. 2, 1907.)	To consult forest officers in regard to methods of silviculture, fire patrol, and range improvement, and to study and discuss means of improving them.	347.40	Do.
Do.....	.....do.....	Points in Illinois, Missouri, and return. (Jan. 6–13, 1908.)	To confer with officers of the General Federation of Women's Clubs on courses of study of forestry.	76.45	Do.
Do.....	.....do.....	New York City and return. (Apr. 2, 1908.)	To see about the preparation of pictures for educational work in schools on the general subject of forestry.	8.00	Do.

Statement showing the names of officers or employees (other than special agents, inspectors, or employees who in the discharge of their regular duties are required to constantly travel) who traveled on official business from Washington to points outside of the District of Columbia during the fiscal year 1908, etc.—Continued.

FOREST SERVICE—continued.

Name.	Title.	Destination.	Business or work.	Total expense.	Appropriation.
Bunker, Page S.	Supervisor	Chicago, Ill.; Menominee, Wis.; Kalispell, Mont.	Returning to headquarters in West, after serving three months detail in Washington office to assist in administrative work.	$86.50	General expenses, Forest Service, 1908.
Busch, S. H.	Clerk	Ketchikan, Alaska. (Mar. 10–Apr. 3, 1908.)	Change of official headquarters	178.13	Do.
Bushnell, Dwight	Supervisor	Helena, Mont., via Ashland, Ky.; Chicago, Ill.; St. Paul, Minn. (Sept. 28–Oct. 2, 1907.)	Returning to headquarters in West, after serving three months detail in Washington office to assist in administrative work.	78.25	Do.
Carter, Edw. E.	Chief of management	Boston, Mass.; Walcott, Wyo.; Ogden, Utah; Reno, Nev.; Mohaw, Boca, Laws, San Francisco, Sisson, Montague, Sisson, San Francisco, Sacramento, Mereed, Yosemite, Merced, Los Angeles, Cal.; Flagstaff, Williams, Ariz.; Guam, Albuquerque, N. Mex.; El Paso, Tex.; Alamogordo, N. Mex., and return. (July 15–Sept. 30, 1907.)	Instruction of supervisors in handling timber-sale work in National Forests.	659.35	Do.
Do	do	Montgomery, Ala., and return. (Jan. 6–9, 1908.)	To attend organization of Alabama State forestry commission.	65.40	Do.
Do	Chief of management. Jan. 12, 1908, title changed to assistant forester.	Ann Harbor, Mich.; Leadville, Denver, Fort Collins, Colo.; and return Denver, Colo. (Jan. 6–Mar. 10, 1908.)	Educational addresses at University of Michigan. Instruction of supervisors and rangers in timber sale and planting work in National Forests.	285.48	Do.
Do	Assistant forester	Green Bay, Wis., Saginaw, Mich. (Apr. 1–16, 1908.)	Instruction of field officers in handling timber work on Indian reservations in cooperation with Department of Interior.	94.85	Cooperative work, forest investigations, 1908.
Cecil, George H.	Assistant chief of organization.	Points in Texas, New Mexico, Arizona, Colorado, Utah, Arkansas, Missouri, and return. (Apr. 1–June 1 1908.)	To consult with and instruct forest officers regarding the conduct of National Forest business. To look into efficiency of personnel of forests. To prescribe better and more effective methods of keeping National Forest records, both at the supervisor's offices and to men engaged continuously in field work. To look into conditions of roads, trails, telephone lines, etc., built by Forest Service.	515.33	General expenses, Forest Service, 1908.
Chapman, C. S.	Chief of organization	Denver and other points in Colorado, and points in Texas, New Mexico, Arizona, California, Oregon, Washington, Utah, and return. (Aug. 7–Nov. 6, 1907.)	do	789.21	Do.
Do	do	Deadwood, S. Dak.; Denver, Colo.; Salt Lake, Utah; Leadville, Colo.; and return. (Jan. 11–Feb. 12, 1908.)	do	307.80	Do.
Do	do	New York, N. Y.; San Juan, P. R.; and return. (May 22–June 9, 1908.)	To inspect and report upon the Luquillo National Forest.	239.30	Do.
Chittenden, A. K.	Forest inspector (special work).	Baltimore, Md.; Portland, Me.; and points in New Hampshire, Vermont. (Sept. 11–Dec. 31, 1907.)	Survey of White Mountain watersheds	161.77	Survey and report on Appalachian and White Mountain watershed, 1907–1908.
Clapp, E. H.	Chief of timber sales	Rochester, N. Y.; Denver, Durango, Telluride, Denver, Kremmling, Leadville, Colo.; Salt Lake, Ephraim, Utah, and return; Provo, Utah; Gunnison, Monte Vista, Wagon Wheel Gap, Colo.; Santa Fe, Las Vegas, Albuquerque, N. Mex.; El Paso, Tex.; Alamagordo, N. Mex. (July 11–Oct. 4, 1907.)	Instruction of supervisors in handling timber sales on National Forests.	576.66	General expenses, Forest Service, 1908.
Do	Chief of management	Auburn, Montgomery, Ala.; Silver City, Lordsburg, N. Mex.; Douglas, Ariz.; Safford, Phœnix, Williams, Flagstaff, Ariz.; Bakersfield, Visalia, San Francisco, Eureka, Cal.; Grants Pass, Portland, Oreg.; Sumas, Bellingham, Glaciers, Newport, Spokane, Wash.; Wallace, Idaho; Missoula, Mont.; Sandpoint, Idaho. (Trip not finished in fiscal year 1908.) (Apr. 2–June 30, 1908.)	Instruction of field officers on cooperative work and of supervisors in handling timber sales on National Forests.	586.99	
Clark, W. D.	Forest agent	Santa Fe, N. Mex.; Williams, Ariz.; Los Angeles, Cal.; Portland, Oreg.; Seattle, Wash.; Kalispell and Columbia Falls, Mont. (Aug. 3–Sept. 30, 1907.)	Study of growth and yield of western yellow pine and western larch.	273.60	Do.
Cline, McGarvey	Chief of wood uses	Chicago, points in Utah, Colorado, Wyoming, California, Washington, Arizona, and return. (July 19–Oct. 7, 1907.)	Investigating market price work in Chicago lumber markets in West. Investigation of mine timber props, stulls, etc. Examination of timber-testing laboratory on the coast.	601.99	Do.
Do	do	Lafayette, Ind.; Grenada, Miss., and return. (Dec. 14, 1907–Jan. 8, 1908.)	Examination of testing laboratory at Lafayette. Selection of timber for testing purposes in Mississippi.	111.81	Do.
Do	do	Chicago, Ill.; Lafayette, Ind.; Urbana, Ill.; Denver, Colo., and return. (Mar. 16–31, 1908.)	To investigate market price work in Chicago and testing laboratory at Lafayette. To confer with testing engineer at Urbana. To arrange for installation of laboratory at University of Colorado.	166.84	Do.
Do	do	Philadelphia and return. (Apr. 6–9, 1908.)	To attend meeting of committee of American Society for Testing Materials.	16.85	Do.
Do	do	St. Louis, Mo.; Lafayette, Ind.; Butte, Mont.; Pocatello, Idaho, and return. (May 18–June 16, 1908.)	To deliver address before Cooperage Association of St. Louis. To confer with engineer in charge of service laboratory. To investigate market conditions at Butte with special reference to the sale of mine timbers from the National Forests.	279.50	Do.
Do	do	Atlantic City and return. (June 24–26, 1908.)	To deliver an address before American Society for Testing Materials.	28.25	Do.
Cohoon, A. E.	Forest supervisor	Portland, Oreg. (Apr. 1–20, 1908)	Returning to headquarters in the West after serving three months' detail in Washington office to assist in administrative work.	105.95	Do.

Statement showing the names of officers or employees (other than special agents, inspectors, or employees who in the discharge of their regular duties are required to constantly travel) who traveled on official business from Washington to points outside of the District of Columbia during the fiscal year 1908, etc.—Continued.

FOREST SERVICE—continued.

Name.	Title.	Destination.	Business or work.	Total expense.	Appropriation.
Coleman, Geo. B	Supervisor	To Sumas, Wash., via Pittsburg, Pa. (Nov. 1–12, 1907.)	Returning to headquarters in the West after serving three months' detail in Washington office to assist administrative work.	$97.50	General expenses, Forest Service, 1908.
Conner, R. E	Clerk	To Ogden, Utah. (May 18–22, 1908)	Change of office headquarters on account of the transfer of supply depot.	94.00	Do.
Coolidge, P. T	Forest assistant	Monte Vista, Colo. (July 5–9, 1907)	Returning to headquarters in the West after serving three months' detail in Washington office to assist in administrative work.	69.25	Do.
Cox, W. T	Assistant forester	New York City and return. (Sept. 29–30, 1907.)	Arranging for cooperation with private owners of timber land.	17.70	Do.
Do	do	Portland, Bemiss, and Bangor, Me. (Oct. 22–28, 1907.)	Instruction of field parties	50.55	Do.

Statement showing the names of officers or employees (other than special agents, inspectors, or employees who in the discharge of their regular duties are required to constantly travel) who traveled on official business from Washington to points outside of the District of Columbia during the fiscal year 1908, etc.—Continued.

FOREST SERVICE—continued.

Name.	Title.	Destination.	Business or work.	Total expense.	Appropriation.
Smith, A. M....	Property clerk.....	New York and return. (Oct. 14-23, 1907.)	Investigation of office appliances.....	$18.35	General expenses Forest Service, 1908.
Do.....	.....do.....	Rochester, N. Y., and return. (Mar. 26-29, 1908.)	Arranging for shipment of furniture to Ogden, Utah.	33.25	Do.
Do.....	.....do.....	Ogden, Utah. (Apr. 18-30, 1908).....	Change of official headquarters on account of transfer of supply depot.	101.00	Do.
Smith, C. S.....	Forest assistant.....	Pottsville, Pa., and return. (Aug. 21-Sept. 10, 1907.)	Examination of treating plants.....	58.27	Do.
Do.....	.....do.....	New Haven, Conn. (Oct. 23-31, 1907).	Field assignment to carry on experiments in treating timber with preservatives.	42.25	Do.
Smith, F. H....	Expert.....	Philadelphia, Pa., and return. (Mar. 25-31, 1908.)	To obtain a list of grades and species of wood and other detailed information concerning present prices of lumber in the Philadelphia market.	23.85	Do.
Do.....	.....do.....	Chicago, Ill.; Minneapolis, Minn.; Omaha, Nebr.; Kansas City, St. Louis, Mo.; Memphis, Tenn.; Cincinnati, Ohio, and return. (Apr. 1-May 21, 1908.)	To secure the cooperation of wholesale lumbermen in the collection of present prices of various grades of lumber in the markets visited.	279.13	Do.
Smith, Herbert A	Expert and editor.....	Los Angeles, Cal., and return. (Nov. 28-Dec. 24, 1907.)	To inspect the work of forest officers and investigate forest conditions.	334.97	Do.
Smith, Percy G.	Contracting engineer....	Sheridan, Wyo. (May 26-30, 1908)....	Advising with supervisors in regard to permanent improvement work, and when necessary, taking direct charge of the work in the field.	79.45	Administration of the National Forests, 1908.
Spencer, F. C...	Supervisor.....	Monte Vista, via Mansfield, Ohio, and Chicago, Ill. (Apr. 29-May 8, 1908.)	Returning to headquarters in the West after serving three months' detail in Washington office to assist in administrative work.	73.40	General expenses, Forest Service, 1908.
Spring, Samuel N	Chief of extension.....	Pocatello, Idaho; Salt Lake, Utah; Salt Lake, Utah, to Los Angeles, Cal.; Los Angeles, Cal., to Santa Barbara, Cal., and return; Los Angeles, Cal., to Silver City, N. Mex.; Silver City, N. Mex., to El Paso, Tex.; El Paso, Tex., to Carrizozo, N. Mex.; Carrizozo, N. Mex., to Santa Fe, N. Mex.; Santa Fe, N. Mex., to Las Vegas, N. Mex.; Las Vegas, N. Mex., to Denver, Colo.; Denver, Colo., to Washington, D. C. (July 9, 1907, to Aug. 11, 1908.)	Instructing supervisors in forest planting and nursery work on National Forests.	377.30	Do.
Do.....	.....do.....	Washington, D. C., to Trenton, N. J.; New York, N. Y., to Lake Clear Junction, N. Y.; Plattsburg, N. Y., to Washington, D. C. (Oct. 17-20, 1907.)	Study of results of cooperative experiments in nursery work and plans for further experiments at private and state nurseries.	51.80	Do.
Do.....	.....do.....	Washington, D. C., to St. Louis, Mo.; Effingham, Ill., to Wheeling, W. Va.; Wheeling, W. Va., to Washington, D. C. (Jan. 31-Feb. 6, 1908.)	Study of results of private forest planting and arranging for cooperative experimental planting.	71.60	Do.
Do.....	.....do.....	Washington, D. C., to New York, N. Y.; New York, N. Y., to Albany, N. Y.; Albany, N. Y., to Washington, D. C. (Mar. 26-30, 1908.)	Conference with New York State forester regarding proposed publication of the Forest Service.	37.20	Do.
Do.....	.....do.....	Washington, D. C., to Morrisville, Pa.; New York, N. Y., to Washington, D. C. (Apr. 30-May 3, 1908.)	Study of results of private forest nursery practice.	24.12	Do.
Stabler, H. O...	Forest assistant.....	Lansing to Ausable, Mich.; Grayling to Lansing, Mich.; Lansing to Marquette, Mich., and return. (Mar. 24-Apr. 24, 1908.)	Returning to headquarters in the West after serving three months' detail in Washington office to assist in administrative work.	201.37	Do.
Stahl, C. J.....	Forest supervisor.....	Westcliffe, Colo. (June 16-30, 1908) ..	.....do.....	84.20	Do.
Studley, H. F...	Forest assistant.....	Deadwood, S. Dak. (Apr. 11-14, 1908).	.....do.....	48.65	Administration, etc., forest reserves.
Staley, W. F....	Clerk.....	Deadwood, S. Dak.; Minot, N. Dak.; Newport, Wash. (May 30-June 30, 1908.) (Trip not completed in fiscal year.)	Inspection of Kaniksu and Pend d'Oreille forests.	179.40	General expenses, Forest Service, 1908.
Sterrett, W. D..	Forest assistant.....	Silver City, Albuquerque, N. Mex.; Kansas City, Mo.; Rock Island, Ill., and return. (July 6-Nov. 19, 1907.)	Assisting supervisors in cruising timber and in the preparation of timber sales on National Forests. Study of forest conditions at Rock Island Arsenal Military Reservation in cooperation with the Department of War.	697.92	Do.
Sudworth, Geo. B.	Assistant forester.....	Chapel Hill, N. C.; Jacksonville, Fla. (Nov. 29-Dec. 10, 1907.)	Examine work in conjunction with University of North Carolina on characteristics of pine resins.	97.05	Do.
Do.....	.....do.....	Chapel Hill, N. C.; Jacksonville, Fla. (Feb. 5-15, 1908.)	Examine work and make suggestions being carried by Forest Service employee on turpentine orcharding.	81.55	Do.
Do.....	.....do.....	New York, N. Y. (Mar. 17-25, 1908)..	To confer concerning the proposed preparation of a forest exhibit for educational purposes.	33.04	Do.
Surface, H. E...	Laboratory assistant in wood chemistry.	Cadosia, N. Y., and return. (May 21-June 3, 1908.)	Collection of statistics from delinquent manufacturers of wood distillation products.	69.51	Do.
Thelen, Rolf....	Engineer in timber tests.	Cleveland, Ohio; Cleveland to Cedar Gap, Mo.; Springfield, Ill., to Washington. (Jan. 8-20, 1908.)	To examine telephone wire and brackets in view of purchase.	59.48	Do.
Do.....	.....do.....	Atlantic City and return. (June 23, 1908.)	To deliver address before American Society for Testing Materials.	8.25	Do.
Thurston, H. W.	Supervisor.....	Points in Colorado, Vermont, California, Oregon, and return. (Jan. 25-Feb. 9, 1908.)	To meet chief inspectors and confer with them on administration matters.	300.20	Do.
Do.....	.....do.....	Cody, Wyo. (Headquarters in field.) (Mar. 30-Apr. 7, 1908.)	Returning to headquarters in the West after serving three months detail in Washington office to assist in administrative work.	84.55	Do.
Uhler, W. S....	Lumberman.....	Livingston, Mont. (Mar. 6, 1908).....	Assisting supervisors in handling timber sales on National Forests.	58.55	Do.
Varela, A. G....	Photographer.....	Philadelphia and New York and return. (Dec. 12-13, 1907.)	Looking into merits of blueprint apparatus in regard to purchase of same.	21.15	Do.
Do.....	.....do.....	Philadelphia and return. (May 29-31, 1908.)	.....do.....	8.00	Do

Von Bayer, Wm. H.	Chief of reconnaissance..	Washington, D. C., to Deadwood, S. Dak.; Deadwood, S. Dak., to Billings, Mont.; Butte, Mont., to Salt Lake, Utah; Salt Lake, Utah, to Walla Walla, Wash.; Pasco, Wash., to Seattle, Wash.; Seattle, Wash., to Columbia River, Wash.; Quincy, Wash., to Spokane, Wash.; Spokane, Wash., to Washington, D. C. (July 6, 1907, to Sept. 30, 1908.)	Preparation of plans for reforesting denuded areas within National Forests. Investigation of results and possibilities of forest planting in Washington and Oregon on irrigated lands.	$528.00	General expenses, Forest Service, 1908.
Do	....do	Washington, D. C., to Rock Island, Ill.; Chicago, Ill., to Munising, Mich., Negaunee, Mich., to Chicago, Ill.; Moline, Ill., to Washington, D. C. (Oct. 11–Nov. 7, 1907.)	Preparation of plans for forest planting in cooperation with private owners.	174.56	Cooperative work, Forest investigations, 1908, $58.08. General expense, Forest Service, 1908, $116.48.
Wales, F. C	Constructing engineer...	Denver, Colo., and points in Utah, Montana, Idaho, and return. (Sept 19, 1907, to Jan. 3, 1908.)	Advising with supervisors in regard to permanent improvement work, and, when necessary, taking direct charge of the work in the field.	564.25	General expenses, Forest Service, 1908.
Do	....do	Albuquerque and other points in New Mexico, and points in Arizona, Texas, Missouri, and return. (May 19–June 23, 1908.)	Examining permanent improvement work on various National Forests; consulting with and advising relative to such work. Consultations with and instructions to engineers regarding permanent improvement work on the National Forests.	389.48	Do.
Warner, J. D	Forest assistant	Missoula, Mont. (Oct. 9, 1907)	Assisting supervisors in handling timber sales on National Forests.	78.75	Do.
Weigle, W. G	Assistant chief management.	Trip commenced in fiscal year 1907. Magdalena, N. Mex., to El Paso, Tex.; El Paso, Tex., to Washington, D. C. (July 1–Aug. 14, 1907.)	Instruction of supervisors in handling timber sales on National Forests.	317.40	Do.
Do	....do	Washington, D. C., to Sheridan, Wyo.; Sheridan, Wyo., to Seattle, Wash.; Seattle, Wash., to Portland, Oreg.; Portland, Oreg., to Roseburg, Oreg.; Roseburg, Oreg., to La Grande, Oreg.; Baker City, Oreg., to Salt Lake, Utah; Salt Lake, Utah, to Austin, Nev.; Tonopah, Nev., to Battle Mountain, Nev.; Battle Mountain, Nev., to Austin, Nev., and return; Battle Mountain, Nev., to Reno, Nev.; Reno, Nev., to Mohawk, Cal.; Beckwith, Cal., to Reno, Nev.; Reno, Nev., to Nevada City, Cal.; Colfax, Cal., to Sacramento, Cal.; Sacramento, Cal., to Portland, Oreg.; Portland, Oreg., to Seaside, Oreg., and return; Cascade Locks, Oreg., to La Grande, Oreg.; La Grande, Oreg., to Boise, Idaho; Boise, Idaho, to Logan, Utah; Logan, Utah, to Butte, Mont.; Big Timber, Mont., to Red Lodge, Mont.; Red Lodge, Mont., to Livingston, Mont.; Livingston, Mont. to Missoula, Mont.; Missoula, Mont., to Helena, Mont.; Helena, Mont., to St. Paul, Minn.; St. Paul, Minn., to Cass Lake, Minn.; Cass Lake, Minn., to Brewster, Minn.; Ashland, Wis., to Madison, Wis.; Madison, Wis., to Shawano, Wis.; Chicago, Ill., to Washington, D. C. (Sept. 26, 1907–Mar. 30, 1908.)	Instruction of supervisors in handling timber sales on National Forests, and of field officers engaged in cooperative work.	1,056.46	Do.
Do	....do	Washington, D. C., to Whittier, N. C.; Asheville, N. C., to Washington, D. C. (Apr. 21–29, 1908.)	Investigation of timber trespass on Indian reservation in cooperation with Department of Interior.	49.70	Do.
Do	....do	Washington, D. C., to Harrisburg, Pa.; Harrisburg, Pa., to Chicago, Ill.; Minneapolis, Minn., to Portland, Oreg.; Portland, Oreg., to Roseburg, Oreg. (Trip not finished in fiscal year 1908.) (May 3–June 30, 1908.)	Instruction of supervisors in handling timber sales on National Forests. Study of forest conditions on private lands to determine practicability of applied forestry in cooperation with owner.	203.06	Do.
Weir, T. B	Clerk	Helena, Mont. (Nov. 24–28, 1907)	Change of official headquarters	80.45	Administration of Forest Reserves.
Weiss, H. F	Forest assistant	Bogalusa, New Orleans, La.; Scranton, Gulfport, Miss.; and return. (Nov. 7–Dec. 10, 1907.)	To carry on experiments in testing yellow pine timber in cooperation with the Great Southern Lumber Co. Examination of treating plants in New Orleans, Gulfport, and Scranton.	165.09	General expenses, Forest Service, 1908.
Do	....do	New Haven, Conn., and return. (Feb. 21–28, 1908.)	To supervise experiments in treating timber at the Yale laboratory.	32.65	Do.
Do	....do	Ann Arbor, Mich.; Chicago, Ill.; Columbus, Ind.; Milwaukee, Wis.; Louisville, Ky.; and return. (May 12–21, 1908.)	To consult concerning wood preservation work, to work up plans for an experimental laboratory in wood preservation in cooperation with the Power and Mining Machinery Co., and to arrange terms of cooperation with the Indianapolis, Columbus and Southern Traction Co.	95.52	Do.
Wells, P. P	Expert and law officer...	New Haven, Conn.; Atlantic City, N. J.	Investigated qualifications of experts proposed for employment by Forest Service; attended and addressed annual meeting of American Institute of Electrical Engineers at Atlantic City.	23.25	Do.
Wheaton, W. R.	Engineer in timber tests.	Worcester, Mass.; Denver, Colo.; Ogden, Utah; Deadwood, S. Dak.; Butte, Mont.; St. Anthony, Idaho; and return. (Mar. 18–May 26, 1908.)	To deliver lecture at Worcester Polytechnic Institute. To locate and arrange cooperation for treating plants on the National Forests.	551.50	Do.
Do	....do	Denver, Glenwood Springs, and Colorado Springs, Colo. (June 5–30, 1908.). (Trip not completed in fiscal year 1908.)	To locate and arrange cooperation for treating plants on the National Forests.	138.50	Do.
Wheeler, B. L.	Expert miner	Helena and Butte, Mont. (June 14–30, 1908.) (Trip not completed in fiscal year.)	Examination of mining claims on Helena National Forest and Hell Gate (E) National Forest.	128.20	Do.

Statement showing the names of officers or employees (other than special agents, inspectors, or employees who in the discharge of their regular duties are required to constantly travel) who traveled on official business from Washington to points outside of the District of Columbia during the fiscal year 1908, etc.—Continued.

FOREST SERVICE—continued.

Do.....	.....do.....	Chicago, Princeville, and Peoria, Ill., and return. (Sept. 9-15, 1907.)	.....do.....	61.00	Do.
Do.....	.....do.....	Gainsville, Ga.; Murphy, N. C.; Atlanta, Ga.; Chattanooga, Tenn., and return. (Oct. 26-Nov. 22, 1907.)	.....do.....	133.64	Do.
Woodward, K. W.	.....do.....	Chicago, Ill., to St. Paul, Minn., to Miles City, Logan, Helena, Missoula, Forsythe, Mont. (Full assignment.) (Apr. 4-30, 1908.)	Study of timber supply on National Forests and on private holdings in Montana.	166.83	Cooperative work, forest investigations, 1908, $87.43. General expenses, Forest Service, 1908, $79.40.
Yarbrough, J. D.	Packer.....	Ogden, Utah. (Apr. 16-21, 1908)	Change of official headquarters on account of transfer of supply depot.	83.45	General expenses, Forest Service, 1908.
Zon, Raphael...	Chief of silvics.....	Monterey, Tenn., and return. (Aug. 5-12, 1907.)	Instruction of field parties engaged in silvical work.	56.20	Do.
Do.....	.....do.....	New York, N. Y., and return. (Sept. 3-5, 1907.)	Address before the American Society of Civil Engineers.	20.75	Do.
Do.....	.....do.....	Sheridan, Wyo.; Helena, Mont.; Butte, Mont.; Walcott, Wyo.; Grand Island, Nebr. (Oct. 10-Nov. 1, 1907.)	Study of results of technical methods in forestry on National Forests. Instruction of field parties engaged in silvical work.	232.05	Do.
Do.....	.....do.....	Lincoln, Nebr.; Delta, Pueblo, Montevista, Colorado Springs, Denver, Colo.; Deadwood, S. Dak.; Ann Arbor, Mich. (Feb. 10-Mar. 14, 1908.)	Instruction of supervisors and rangers in the application of forestry on the National Forests. Educational addresses at University of Michigan.	264.16	Do.
Do.....	.....do.....	New York, N. Y., and return. (June 2-5, 1908.)	Conference with state forester of Connecticut and others to arrange for cooperative experiments in forestry practice.	25.10	Do.

Mr. CARTER. Mr. President, passing from the lecture field I come now to the practical work being performed by the forestry rangers in the timber. Here I wish to bear witness to the general excellency of the force; but the reckless extravagance which seems to accompany this service as a shadow that never will down, enters the forest and pursues the forester. Instead of going through the forests during the season when fire is likely to break out and require control, with a tent and camping outfit, the money appropriated by Congress has been employed to build cottages. I will say to the Senator from Maine [Mr. HALE] that some of these cottages would not look out of place at Bar Harbor. [Laughter.] Where poles are numerous and fences can be readily made of wood, woven wire is shipped in from Chicago or elsewhere to build beautiful fences around these forest cottages of the Queen Anne style.

Mr. HALE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Maine?

Mr. CARTER. Just a moment, if the Senator will permit me. In order that the forester or the ranger may not be inconvenienced he has a patent gate, with a little spring, to enable him to lift the gate gently, so that he may ride up without "lighting," as they say down South. [Laughter.]

Mr. HALE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Maine?

Mr. CARTER. I do.

Mr. HALE. Does the Senator mean to say that it is a general feature of this remarkable performance that, instead of tents and temporary structures and such covering as all of us know accompany life in the forest of the lumberman, the prospector, where the luxury which the Senator has indicated is as far away as it is in the Sahara—does the Senator mean to say that that is a general feature of this remarkable performance these luxurious cottages have been built for the accommodation of employees of the Government and that hundreds of thousands of dollars have been spent on that feature? This is a surprise, Mr. President. The country apparently has the view that this is simply a scheme necessary for the preservation and conservation—that is the term—of the forests, and that it is being done in a simple way, and done at the least possible expenditure of the government funds, and that it is not to build up comfortable and luxurious places for the employees of the Government. Does the Senator from Montana mean to say that that is a general feature of this performance?

Mr. CARTER. Mr. President, I only speak of it as a feature in the reservation with which I am familiar.

Mr. DOLLIVER. Mr. President——

Mr. CARTER. There is an effort being made to secure larger appropriations from year to year, I am informed, to build these permanent places. I have not visited any of them, but they certainly would house and carefully shelter from the weather any of the luxuries of life with which most of us happen to be acquainted.

Mr. DOLLIVER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Iowa?

Mr. CARTER. I do.

Mr. DOLLIVER. Is not the Senator from Montana aware that these are all log houses, costing, each of them, less than $500?

Mr. CARTER. Mr. President, some of the most expensive——

Mr. DOLLIVER. And that they have to be occupied in winter as well as in summer?

Mr. CARTER. Mr. President, there is this peculiarity connected with the matter: The forest is in no danger from fire in the winter season.

Mr. DOLLIVER. It is in danger from the thieves, however, who are trying to steal the timber, I presume.

Mr. CARTER. Mr. President, the thieves, if any, must go in from the settlements over well-known highways.

Mr. DOLLIVER. I understood the Senator to say that the object of the forestry system, when he was fathering it, was to protect against thieves and fire, and that the fires occur only in the summer time, possibly. I presume that the thieves hang around there all the time.

Mr. CARTER. Mr. President, in the Yellowstone National Park the beaver and other fur-bearing animals are found. The poachers come from all over the continent to poach on those fur-bearing animals, and in order to prevent their depredations the Government employs scouts to guard the animal life. Those scouts travel on snowshoes, carrying their food with them through that part of the country during the winter time, and thus they are in truth and in fact an effective protection. The man who desires to steal timber will not be much deterred if he knows where the guard is located—in a good, warm, and comfortable place—and they put the flag up so that no man need make any mistake as to where the guard is located in the winter time.

Mr. DOLLIVER. But the fact is that timber is not stolen, and the fact is that fires do not destroy it. The fact is that if fire had occurred in these government forest reservations in the same ratio that it occurred last year on private forest property there would have been a loss of $35,000,000 to the Government of the United States and to the people.

Another thing I think I ought to say. I share the enthusiasm of the honorable Senator from Maine [Mr. HALE] for economy; but I call his attention to the fact that we are dealing with real-estate property of nearly 200,000,000 acres, and that all the appropriations, even at the highest limit that has been suggested, for their protection and for their administration as a property do not amount to 2 cents an acre; and I believe it belittles the Senate to have such a controversy as we have here.

Mr. CARTER. Situated as these mighty forests are on the mountains, they are guarded by the people to no inconsiderable extent, for the forests are the heritage of the children of those residing near their borders. Forest fires are put out more frequently by the citizens, according to my information, than by the rangers. I remember in one forest reservation, between the town of Helena, where I reside, and the city of Butte, there was a fire for a month and a half last summer, burning night and day, rendering the sky lurid at night and covering the valley with smoke by day. There was no effort, apparently, made to put that fire out, and the neglect was a matter of common remark by people passing up and down the railroad in full view of this conflagration. If there had been no forester there—it was remote from the farms—the sheriff of the county or some officer would have been detailed to get some men to extinguish the fire.

As efficient forest-fire guards the rangers have much to learn, but they will learn from experience, and their numbers should be increased.

My complaint is that there is too much expense connected with red tape in Washington, too many lectures being delivered over the country, too many experts, too many high-priced men who do not perform the service Congress had in contemplation. If one-half the sum appropriated here were used to guard the forests from fire, we would have a better service. But too much of it is used in a clerical way, too much is paid for typewriters. Fourteen thousand dollars in one solid lump in these items of the bill are for typewriters, to do what? To extinguish forest fires, I presume, and to keep people from stealing timber. [Laughter.]

Mr. SMOOT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Utah?

Mr. CARTER. I yield to the Senator from Utah.

Mr. SMOOT. The facts in connection with this matter will not justify any of the conclusions at which the Senator from Montana [Mr. CARTER] has arrived. Our total loss from fire last year on all the forest reserves of the United States was $1,181,000, while the losses outside of the forest reserves were between $130,000,000 and $140,000,000. In Wisconsin alone there was a loss by fire of $9,194,000, there was a loss in West Virginia of $5,097,000, and in the State of Michigan last year the loss was nearly $20,000,000. Taking all the forests of this country by unit of acres, we lost only 3 per cent of what the timber landowners outside of the national forest reserves lost.

Mr. CARTER. I desire to ask the Senator who made the figures.

Mr. SMOOT. Mr. President, every fire that occurred in a forest reserve was reported at the time of the fire to the Forestry Bureau. If the Senator wants to find out, we can tell him just exactly where the fire was, the day that it occurred, the cause of the fire, the cost of putting it out, whether it was done by hired help outside of the forest reservation or by the rangers themselves. I resent the imputation that the forest rangers in the employ of the Government lounge around in luxurious homes in the forests. The Senator, being a western man, must know that these forest homes are built for not to exceed the sum of $500 each and that they are built of logs. They have tried to finish them off so that they will be warm, because the rangers have to live in those homes all the year around.

Mr. CARTER. Mr. President, the forest——

Mr. FLINT. I should like to ask the Senator from Utah a question if the Senator from Montana will permit me.

Mr. CARTER. I should like to get through with one at a time.

Mr. FLINT. I should like to ask the Senator from Utah one question. I think the Senator from Montana can also answer it at the same time.

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from California?

Mr. CARTER. I yield to the Senator from California.

Mr. FLINT. I merely want to askthe Senator from Utah how many rooms these luxurious "Bar Harbor" cottages contain?

Mr. SMOOT. They contain two rooms, and the men have their families living with them. You can not get men who can pass the examination required for rangers and supervisors and have them live in the forest limits from one year's end to another unless they have their families with them, and I want to say to you that it is a very poor living.

Mr. CARTER. Mr. President, confessedly the Forest Service made the figures as to the destruction within the forest reserves, and obviously they likewise made the figures with reference to the destruction outside of the forest reserves.

Mr. SMOOT. So far as the figures outside of the forest reserves go——

Mr. CARTER. They witnessed the devastation at one point direct, and they guessed at it as to the outside, so as to make a comparison entirely satisfactory to the Forest Service.

I do not pretend to say that these forest rangers have not performed good service in suppressing and extinguishing fires. I do not wish to be understood as casting any reflection whatever upon the efficiency of that body of men. What I do insist is that the great army of clerks, the army of lecturers, should put on the green uniform and go out there and protect the trees and join the forest rangers if they need more help.

Mr. President, there are excellent men in connection with that service, and I believe they undertake to establish and maintain good discipline. The Senator from Pennsylvania told me they were as fine a set of young fellows as he ever met. One of them he met coming down a trail up in the Lewis and Clark Reservation north of Clearwater. He said the gentleman had a small rifle in one hand and a French poodle dog in the other. [Laughter.] He went out in quest of fires to extinguish. [Laughter.]

I would not have it understood that it is my purpose to deal in a spirit of levity with this force. I should like to see it increased to the highest standard of efficiency; but let the government money be devoted to the purposes Congress had in view in creating this service—the preservation of the forests from plunder and from fire.

We have departed far from that. I think anyone who will look over this statement of expenses will agree with me that instead of $4,486,000 being necessary for this lump sum $2,000,000 will be ample to sustain the existing force provided for in the field and to supplement it by a normal increase during the year.

Mr. President, I now make the motion that the amendment proposed by the committee, striking out "three million nine" and inserting "four million four," be disagreed to, and that in lieu of the matter stricken out "two million" be inserted. On that motion I ask for a vote.

The VICE-PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. On page 25, line 14, the committee amendment proposed to strike out "three million nine" and insert "four million four." It is now proposed to amend the amendment by inserting "two million" in lieu of "four million four."

The VICE-PRESIDENT. The question is on agreeing to the amendment to the amendment.

Mr. NELSON. Mr. President, ever since we have inaugurated the Forestry Service it has been subject to raids similar to this. At every session of Congress it has been attacked. Sometimes it has been seriously attacked and belittled, and sometimes attempts have been made to ridicule it. We are here, Mr. President, looking after the welfare of the entire country, and the conservation of the forests of the American people is too serious a problem to be ridiculed and laughed out of court because here and there a member of the Forestry Service has gone out and delivered a lecture. I can only say for myself that I wish to God the Forestry Service had sent agents to many of the big mining companies in the West who have been devastating the forests to lecture them a little, and teach them to conserve the property of the United States.

Some years ago I went through the State of the Senator from Montana. From Helena to Butte on the mountain sides I could see where the forests had been entirely stripped, and they looked almost as barren and waste as a desert. I inquired of the people in the cars how it came that those hillsides had been stripped and denuded of timber. They told me the big mining companies had taken that lumber.

Now, what are the conditions? Take the country west of the one hundredth or the ninety-fifth meridian to the Pacific coast. That is a region of different climate, different conditions, and different resources from other portions of the United States. That country in the main, except certain sections on Puget Sound, is a country that depends for its vitality upon the conservation of two natural resources, namely, the water supply and the timber.

Mr. BORAH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Minnesota yield to the Senator from Idaho?

Mr. NELSON. I do.

Mr. BORAH. I presume the Senator does not mean to say that the mining companies cut this timber contrary to law?

Mr. NELSON. Certainly I do; and I want to tell the Senator that a prominent gentleman out in Montana, formerly a Member of this body, cut millions of feet of timber from the mountain sides, and suits were instituted against him that he finally got rid of, I think, by the statute of limitation, or in some such way.

Mr. BORAH. The Senator is in error. The Senator referred to got rid of the suits by the Supreme Court of the United States holding that he had a right to cut the timber. The courts have decided time and time again that mining companies have a right to cut timber in a mining region for the purpose of using it for mining purposes. That has been settled by our courts for the last twenty years.

Mr. NELSON. But they have not the right, Mr. President, to go in there, strip the country of timber, make it a barren waste, and leave it subject to fires.

Mr. TELLER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Minnesota yield to the Senator from Colorado?

Mr. NELSON. I should prefer that Senators would allow me to go on, and then, when I am through, I will answer questions.

Mr. TELLER. If the Senator will make no statement but what he can support by the record, I shall not interfere with him.

Mr. NELSON. I will make statements that I can substantiate by my own observation. I have been through that country. What I was about to say, Mr. President, was that when you get west of the Mississippi River across the one hundredth meridian, you approach a region entirely different from other portions of the country—a region that depends for its vitality and prosperity on two natural resources, namely, the water supply and the timber supply.

We have helped that country in the matter of water supply by passing the reclamation law and giving the proceeds from the sale of reclaimed land, amounting to millions and millions of dollars, for the conservation of the water supply to enable those people to irrigate their arid plains.

The statement of the Senator from Montana [Mr. CARTER] that the timber supply in the semiarid and arid States is confined to the mountain ridges is true. As a rule, those elevated bluffs and ridges are not calculated for agricultural purposes. The timber is to some extent scattering. The mining companies, the big cattle companies, and the big lumbermen had their own sweet will in those forests until we inaugurated the Forestry Service. It was time we had done something about it.

It had been the fortune of Mr. Pinchot, as it has been the fortune of all reformers, to meet with obstruction and criticism from first to last. There never was a man in the public service, Mr. President, who went so honestly and sincerely to work in the great task that was put upon him. He was a pioneer. He had to build the service from the ground up. At the threshold he met with opposition from the cattlemen, the big mining companies, and all their friends and allies in the West.

This is a matter, Mr. President, which concerns more than mining companies, more than cattle companies, and more than a few rich and wealthy men. It is a matter which concerns the welfare of the entire country, and if we hope to get the arid and semiarid country settled up—and I think we will—and as thickly populated as the Mississippi Valley, there is only one way to do it, and that is by conserving our water supply, as we are doing, by conserving our forests.

I have watched in my own State how our forests have been depleted. I wish to God that forty years ago we had had a Forestry Service. When I came to Minnesota in 1871 we had the finest body of white pine timber in the whole country, and to-day there is only a limited supply, which will scarcely last ten years more. The big lumbermen went in there and got that land, some of it with agricultural college scrip, that did not cost them over 50 to 60 cents an acre, some with Chippewa half-breed scrip, some with Sioux half-breed scrip. Then they stripped the land, cut everything high and low, and left the rubbish there, and the fires have had their own sweet will. If we had had a Forestry Service as we have now, Minnesota would have a good supply of timber to-day.

A few years ago the Forestry Service established a small reservation in a part of what had once been an Indian reservation in Minnesota, and I know from my own experience what opposition the Forestry Service met in that little effort. In the pine woods they reserved a few thousand acres. They reserved it on the plan of cutting off the timber, leaving 5 per cent of the growing trees for seeding purposes, keeping the fires out; and you ought to have seen the warfare that the people around there made against that little effort of reforestation.

Now, another thing. The forest rangers, against whom so much criticism has been directed, not only have to look after our forests with respect to forest fires; they not only have to look after the forests in the matter of protecting them against depredations in the winter, when men go in there and cut and steal the timber; but in order to have peace with these great cattle companies, the Forestry Service has had to give them grazing privileges. If you take into account what the Forestry Service has acquired from selling matured timber, what it has acquired in the way of rent for the use of the reserves for the pasture of cattle, you will find that the Forestry Service is pretty nearly, and will in the very near future be, self-sustaining. Not only have they protected the forests in respect to fires, but they have protected them in respect to their pasturage by cattle and sheep. Anyone who is at all conversant with such matters knows that if you allow an unlimited number of sheep or cattle to go into a forest they will kill the timber as quickly almost as a fire.

If I have a piece of land—and I have it on my farm in Minnesota, brush land—and I fence it off and put a body of sheep in there, in two years' time they will have the land clear.

So our forest rangers have to look after the forests for the purpose of seeing that they are not overpastured; that whatever right to pasture is given there is used to a proper extent, and that the Government gets some revenue from it. History will show that the cattlemen, in the first instance, objected to the idea of the Government collecting anything for pasturing cattle in forest reserves. They had had their own sweet will in the past. But now, under the careful and prudent administration of the Forestry Service, the cattlemen have become reconciled to it and believe it is a good plan. There is a good deal of opposition, from time to time, in every Congress, as I have said, from certain quarters, but bye and bye the people in the West—the people who come there, the middlemen, the farmers who come there to make their homes, not the big mining companies—will be very glad that "Uncle Sam" has taken the course he has through the Forestry Service. In what our Forest Service is doing now—and we are late in the day—they have been doing for years in Europe, and we have as honest and faithful and energetic a man at the head of that Forestry Service as it is possible to get.

Now, what is it gentlemen ridicule? The Forestry Service has not only had to protect our timber against fire and to protect the reserve against free pasturage by sheep and cattle, but it has had to protect them against a set of human vampires who wanted to use the land at their own sweet will, without any reference to what the future necessities of the country might be. The Forestry Service, in other words, my friends—and we might as well acknowledge it—has had to educate the people

out West to the necessity of the Forestry Service. I plead guilty to the fact that at first I felt a good deal as some other Senators do, but I have watched it and seen its good effect, and I have felt the educating influence of the Forestry Service. What if once in a while they send one of their forest rangers or one of their clerks to deliver a lecture among the people out there on the necessity and importance of conserving our forests? Why should they be criticised for that? It is a useful and necessary work, and nothing makes that clearer than the spirit manifested here.

Then Senators ridicule them because they build a little two-room cottage in the woods. The forest rangers have to live there with their families. They are, as you may say, isolated. They have no neighbors. They build little cottages there, two-room cottages, of logs covered with clapboards, and perhaps for the purpose of keeping out mosquitoes and flies in the summer they do get a few wire screens, and that is one of the grievances of the Senator from Montana.

Gentlemen, while I am unwilling to take up the time of the Senate by going into an extended discussion, I can not help saying to Senators that this is one of the most important matters to the welfare of the American people. It is not a matter that concerns merely Montana or Idaho or the rocky cliffs around Pend d'Oreille Lake, to which the Senator has referred. It is a matter we are all interested in, and we hope to have that western country as thickly populated and as prosperous as the country in the Mississippi Valley, and you can do it only by conserving the forests there and not yielding to the demands of these great interests.

As I have traveled out in the western country among the cattlemen and the big lumber companies, I have noticed one thing. I may be wrong, but I have noticed the lack of what you may call a good middle class, such as we have on the farms in the Mississippi Valley. On one side you see the great capitalists—the cattle companies, the mining companies, the rich nabobs; and then below them are mostly poor men—laboring men or men with little means. That comes from climatic conditions and the natural resources of the country. But by building up that country by conserving the water supply and conserving the forests, they will have a prosperous, thrifty class of small farmers out in that country, as we have in the Mississippi Valley.

My friends, it will not do to ridicule and try to laugh out of court a matter of this kind which concerns the vital interests of our country. It is not a problem that concerns Minnesota or Iowa or the States in New England. It is a question that we are all interested in. Our country is to-day growing at an immense rate, and in a few years our population will be as dense as it is in some of the countries in the Old World, and we want the people who come there to settle on the arid land not only to find the water conserved, with plenty of water for irrigation, but we want them to find plenty of timber there for fuel and domestic purposes, so that they can have there happy homes such as are found in the Mississippi Valley.

Mr. President, to my mind it is the greatest folly in the world to ridicule this service. What does it ask for? For less than $5,000,000, or $5,000,000. Most of that, if not all of it, will be derived as income from the conservation of the reserves, from pastures and the sale of timber. It is almost self-supporting, but even if it is not, the whole service does not begin to cost what a second-class battle ship would cost. I was a little surprised to hear my good friend the Senator from Maine [Mr. HALE], in solemn manner get up here and encourage the Senator from Montana, as though this was a very serious matter.

After he had induced us by his legislative skill and perseverance to vote for two big battle ships, the idea that the Senator from Maine could find something absolutely abhorrent in the fact that a few lectures had been delivered to women's clubs seemed to me queer, indeed, and I could not help have the wish in my mind that Mr. Pinchot had sent one of those women to lecture the Senator from Maine. [Laughter.]

Mr. HALE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Minnesota yield to the Senator from Maine?

Mr. NELSON. Certainly; but I want to say to the Senator before he has anything to say that what I said to him was intended in the utmost Christian spirit. [Laughter.]

Mr. HALE. I have no doubt of it. The Senator is a converting man. There is no doubt about it. He is a Christian man. If I were inclined to be solemn, I could not be solemn when the Senator turns upon me and says I have been supporting all this monstrous programme for big battle ships. That is a thing I have been opposing for years; and the Senator has been with me. We tried the other day the best we could to cut down the appropriations, and we had a chance to save $5,000,000 in one appropriation on the battle ships. I tried to get the Senate to stand by and save that money, and the Senator voted with me.

But it is absurd for him now to say that I am in any way responsible for what I look upon not only as an extravagant and absurd, but a wicked programme in committing this country, which has no probability or possibility of war, to a scheme for monster ships, leviathans of the deep, that no other country has thought of building. We will stand before the world in the absurd position of inviting other nations, European nations, that are watching each other, and likely to be at each other's throats any day, to a similar programme. We will be in the position of which all thoughtful men and humanitarians and peace-loving men will see the absurdity—of being first and foremost in enlarging our programme and inviting other nations to build enormous ships, such as no nation has ever thought of building before. I tried to stop it. I tried the other day in my feeble way to get down to the scale we are going on now, which is enormous. I am glad to say that I had the help of the Senator from Minnesota, but I do not want him, under his appeal to my solemn visage, to try to put me in the wrong. He and I worked together on that, and I am glad to say here that he has always been consistent in that.

Now, we are trying to save somewhere else, and the saving would be small compared with what we put into the military branches of the Government. The country is mad, is wild, on its military furore, and will not listen to reason. The Senate will not listen to reason. But the Senator from Minnesota shall not put me with the men who have in any way sanctioned what I call the wicked programme of the undue expansion of the army and navy.

Mr. NELSON. Mr. President, to all of that I can say amen, as though I were sitting in the amen corner, but while the Senator from Maine and I have a common feeling in that matter and while we are agreed that there is not the remotest danger from abroad which ought to lead us to increase our fleet, the Senator from Maine if he had been here on the floor would readily have seen that there is another danger which threatens us—an attack upon our Forestry Service. I agree with him that we do not need to increase our navy against any foreign enemy, but we do need to increase our strength and resources and to protect ourselves against this enemy from within that is aiming to destroy and ridicule our Forestry Service and make it of little or no account.

I am ready to cooperate with the Senator from Maine in a sane and safe policy with respect to our naval programme and our military defenses. I think he is quite right, for in these piping times of peace there is no occasion to go to such extremes in our military and naval preparations as we have in recent years. But I do think we have more important problems here at home that demand our concern, and one of the most important problems is the conservation of our national forests.

Our forests are disappearing year by year, and at the rate we are going, unless an effort is made to stay it, unless we take care of our forests and conserve them as the Forestry Bureau is attempting to do, we will soon be in the condition that some of the countries of the Old World are in, which centuries ago had an abundant supply of timber and to-day are nothing but barren wastes.

I trust that Senators will not be led astray by ridicule of the fact that certain men have gone here and there to deliver a few lectures or that they have made journeys out there or that they have typewriters. Go down to the Forestry Bureau. I have been in its office, at the Atlantic Building. Gentlemen, go down there and see it. The employees are doing good, honest work. All of the forest reserves in the country are in their charge. I do not know any bureau or department of the Government where the clerks and employees are more active or efficient or intelligent than those in that bureau. There are no idle men there. What if in the summer the Forestry Service occasionally sends out from the headquarters here a few skilled men, experts, to instruct the local rangers in the different localities? What is there wrong in that? The men here in the office, who are acquainted with the whole Forestry Service and who are educated in it, who are experts by practice and training, can go out there and do good service in educating and improving the forest rangers and instructing them in their tasks, and because a little money is expended in railroad fare and traveling expenses why should that be held up to ridicule?

I remember at the last session of Congress one of the grievances of the Senator from Idaho against the forest rangers was that they were dressed in pea green and had green feathers in

their hats. His criticism then was of a piece with the criticism we have heard here to-day, to ridicule and laugh out of existence the Forestry Service.

My friends, I want to say to you—and I say it to you as a man who has spent his life on the frontier in two of our growing States—if you have the welfare of our country at heart, if you believe in conserving our timber supply, stand by the Forestry Service, fortify it, and do not make it a matter of ridicule and attack at every session of Congress.

Mr. HALE. Let me ask the Senator in charge of the bill whether he counts upon remaining here much longer to-night in the consideration of the bill? There are several matters that ought to be placed before the Senate. I do not want to interfere with the Senator at all.

Mr. WARREN. I was about to explain the situation when the Senator rose. The Senator from Colorado has a small matter which he wishes to bring up, and I understand there are numerous matters on the desk which the President will present, and then I will ask to have the bill go over until to-morrow.

Mr. HALE. That is entirely satisfactory. The Presiding Officer called my attention to the fact that there are matters on his desk which should be laid before the Senate.

Mr. WARREN. Has the Senator from Minnesota concluded?

Mr. NELSON. I have concluded for the present, unless another assault is made upon the Forestry Service, when the spirit might again move me.

Mr. WARREN. I mean for the present.

Mr. CARTER. I desire the Senator in charge of the bill kindly to inform us of the amount of income from all sources from the Forestry Service.

Mr. WARREN. I will be able, perhaps, to give the figures more closely in the morning. But the present yearly rate of income, as I remember it, would amount to between two million and two and a half million dollars. The statement was made to the committee that the income would be greatly increased if more attention—and there would be under larger appropriations—were devoted to the selling of ripe lumber, because I understood the forester to state that, under the direction of the Secretary of Agriculture, when there was a shortage of funds, and he asked which he should devote himself the more to, the preservation of the forests or the disposal of ripe lumber, he was told to take up preservation first and to provide fully for that, and then to dispose of so much of the lumber as he could attend to in the measuring up and delivering of it, and so forth.

Mr. CARTER. I will be glad to have the exact figures as to the income. I do not have them available at present.

Mr. HEYBURN. I can refer the Senator to them as they are given in the estimate—$1,842,281.87.

Mr. WARREN. I think there are some additions to those figures, and in the morning I will be able to give the figures to the Senator, to which he is entitled, of course.

Mr. CARTER. I should be very glad if the Senator in charge of the bill would be able to inform us in the morning the amount of the appropriation paid to rangers and forest supervisors actually engaged in the work of protecting the forests from fire and plunder, and the amount of it that is devoted to the payment of clerks, experts, lecturers, and employees in other avenues.

Mr. DOLLIVER. If the Senator from Minnesota will permit me, I think it might be well to have go in in connection with his remarks the statement that these enlarged fields of operation of the Forestry Service, to which the Senator from Montana has recurred so often, are only a part of the business of the Forestry Service, as determined by the original act creating that service.

The Senator from Montana has said that the business confided to the Forest Service was to defend the forests against fire and the loss of timber through unscrupulous persons on the outside, but the fact is that the original act creating this service, an act that has been applied in every appropriation act since, provided that——

Mr. CARTER. Is the Senator reading from the act of 1897?

Mr. DOLLIVER. From the act of 1903, which is the same as the original act:

> To enable the Secretary of Agriculture to experiment and to make and continue investigations and report on forestry, forest reserves, forest fires, and lumbering; to advise the owners of woodlands as to the proper care of the same; to investigate and test American timber and timber trees.

My friend from Montana ridicules some agent of the department for going to Arizona and making tests of timber and timber trees in that Territory, leaving the impression with the Senate that it was entirely outside of the business of the conduct of the Forestry Service.

Mr. CARTER. The Senator will find the text of the act of 1897 entirely different from that he is reading.

Mr. DOLLIVER. I am now reading the language found, as I am informed, in the original act.

Mr. TELLER. That is not the language of the original act.

Mr. HEYBURN. I have the original act here.

Mr. DOLLIVER. At any rate, this has been going on for nearly ten years. It is the act of 1903.

Mr. TELLER. It is not the original act.

Mr. DOLLIVER. I want to say another thing while I am on my feet. It is no strained situation in our appropriations that a good many dollars should be spent before the people are actually put in a position to put out fires. A good many dollars are spent in the departments of the War and the Navy before a soldier is paid a dollar for services in any regiment and before a ship is put upon any sea. I undertake to say that the proportion of this money applied directly to the protection of the forests and the preservation of public rights there is more than the money in any other of these appropriation bills applied to the direct object which the appropriation has in view.

Mr. WARREN. Mr. President, I wish to give notice that I shall ask the Senate to take up this bill in the morning immediately on the conclusion of the morning business; or, in fact, if the morning business is a little slow, as it sometimes is, I shall probably move to take up the bill immediately after assembling.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had passed the bill (S. 1617) to quiet title to certain land in Dona Ana County, N. Mex., with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 28193. An act to authorize the city of Shreveport to construct a bridge across Red River; and

H. R. 28305. An act to attach Dawson County, in the State of Texas, to the Abilene division of the northern judicial district of said State, and to detach it from the Fort Worth division of said court.

HOUSE BILLS REFERRED.

H. R. 28193. An act to authorize the city of Shreveport to construct a bridge across Red River was read twice by its title and referred to the Committee on Commerce.

H. R. 28305. An act to attach Dawson County, in the State of Texas, to the Abilene division of the northern judicial district of said State, and to detach it from the Fort Worth division of said court, was read twice by its title and referred to the Committee on the Judiciary.

JUDGES FOR HAWAII, ALASKA, ETC.

Mr. CLARK of Wyoming submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 21896) to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 5, and 18.

That the House recede from its disagreement to the amendments of the Senate numbered 3, 4, 6, 7, 8, 9, 11, 12, 13, 14, 15, 16, 17, 19, 20, 21, 22, 23, 24, 25, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: Line 2, strike out "seven thousand five hundred" and insert "six thousand;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: Line 7, strike out the word "Roscoe" and insert "Roswell;" and the Senate agree to the same.

C. D. CLARK,
KNUTE NELSON,
LEE S. OVERMAN,
Managers on the part of the Senate.

JOHN J. JENKINS,
DE ALVA S. ALEXANDER,
HENRY D. CLAYTON,
Managers on the part of the House.

The report was agreed to.

COMMISSION ON NAVAL ORGANIZATION.

The VICE-PRESIDENT laid before the Senate the following message (S. Doc. No. 740) from the President of the United States, which was read and, on motion of Mr. HALE, referred to the Committee on Naval Affairs and ordered to be printed:

To the Senate and House of Representatives:

On January 27, 1909, I addressed the following letter to Hon. William H. Moody; Hon. Alston G. Dayton; Hon. Paul Morton; Rear-Admiral S. B. Luce, U. S. Navy, retired; Rear-Admiral A. T. Mahan, U. S. Navy, retired; Rear-Admiral Robley D. Evans, U. S. Navy, retired; Rear-Admiral William M. Folger, U. S. Navy, retired; Rear-Admiral William S. Cowles, U. S. Navy, retired:

MY DEAR SIR: I have appointed you as a member of a commission to consider certains needs of the navy. The organization of the department is now not such as to bring the best results, and there is a failure to coordinate the work of the bureaus and to make the department serve the one end for which it was created; that is, the development and handling of a first-class fighting fleet. With this proposition in view I will ask you to consider:

1. All defects in the law under which the Navy Department is now organized, including especially the defects by which the authority of chiefs of bureaus is made in certain respects practically equal to that of the Secretary or the President.

2. The division of responsibility and consequent lack of coordination in the preparations for war and conduct of war.

3. The functions of certain bureaus, so as to see whether it is not possible to consolidate them.

4. The necessity of providing the Secretary of the Navy with military advisers, who are responsible to him for coordinating the work of the bureaus and for preparation for war.

5. The necessity for economical allotment and disbursement of appropriations and for a system which will secure strict acocuntability.

6. Finally, I want your views as to how best to recognize and emphasize the strictly military character of the navy, so that preparations for war shall be controlled under the Secretary by the military branch of the navy, which bears the responsibility for the successful conduct of war operations.

I wish to have the above subjects considered under two general heads:

First. As to the fundamental principles of an organization that will insure an efficient preparation for war in time of peace, a separate report under this head to be submitted at the earliest practicable date.

Second. Specific recommendations as to the changes in the present organization that will accomplish this result, the report under this head to be submitted later.

In addition to the above reports, I desire your recommendation as to the number, location, and general facilities of the navy-yards which are required by strategic considerations in time of war and for maintaining the fleet in constant readiness for war in time of peace.

Sincerely, yours,

THEODORE ROOSEVELT.

This commission has just submitted to me the two following preliminary reports, the first dealing with the general principles governing naval organization, and the second suggesting the creation of a joint commission for the purposes therein set forth.

WASHINGTON, D. C., *February 20, 1909.*

GENERAL PRINCIPLES GOVERNING NAVAL ORGANIZATION.

1. The office of the Secretary of the Navy being executive in character, nothing should be admitted into an organization of the department which would qualify his authority or diminish his ultimate responsibility. He has been in the past, and in the future should be, a civilian. He is the representative of the President, the constitutional Commander in Chief of the Army and Navy, under whose direction his authority is exercised.

2. The duties in charge of the Secretary divide under two principal heads, closely related but generically distinct—civil and military.

The civil duties embrace the provision or preparation of all the material of war. This is the function of the present bureaus.

The military duties concern the use of that material, whether in war or in such exercises as conduce to fitness for operations of war. For the direction of these military duties, no subordinate provision corresponding to the bureaus on the civil side exists in the present organization established by statute.

3. The discharge of both these classes of duty involves a multitude of activities, quite beyond the immediate personal knowledge and supervision of a single man. This necessitates a subdivision of the duties by which means the supervision of the Secretary is exerted through the medium of responsible subordinates. In this subdivision the principle of undivided responsibility, within the appointed field of subordinate supervision, should obtain, as it does in the superior office of the Secretary.

The bureau system, as now established by law for the civil activities of the department, insures for each bureau this undivided responsibility, qualified only by the authority of the Secretary, which, if exerted, does not divide the responsibility, but transfers it to the Secretary himself. Independent authority, with undivided responsibility, though in principle proper, suffers historically from intrinsic inability to cooperate where a number of such independent units are present. The marshals of the first Napoleon—especially in Spain—in the absence of the Emperor, offer a familiar illustration. The bureau system, as at present constituted by law, contains no remedy for this inherent defect.

4. The coordinating power is in the Secretary's authority; but, owing to the shortness of tenure in office, and to the inevitable unfamiliarity with naval conditions with which an incumbent begins, authority, though adequate in principle, is not so in effect. This inadequacy consists in lack of personal familiarity with the subjects before him, not merely severally, but in their collective relations; in short, lack of specific knowledge and experience. The organization should provide him with such knowledge and experience, digested formally, so as to facilitate his personal acquirement. In short, an advisory body, equipped not with advice merely, but with reasons. In order to avoid the interruption of continuity attending each new administration, entailing the recurrent temporary unfamiliarity of each new Secretary, it is expedient that this advisory body be composed of several persons; but while this provision would insure the continuity which inheres in a corporate body (in this case continuity of knowledge and of progress), the principle of undivided responsibility would dictate that one only of them should be responsible for the advice given to the common superior—the Secretary.

5. As regards the composition of the advisory body, the principles to be regarded are two: (*a*) The end dictates the means; (*b*) responsibility must be individual, in advice as well as in executive action.

(*a*) The end is efficiency for war. The agents in war are the military naval officers. Their profession qualifies them best to pronounce upon the character of the preparations for war of every kind, including not only schemes of campaign and tactical systems, but the classes, sizes, and armaments of ships of war.

What the Secretary needs, specifically and above all, is a clear understanding and firm grasp of leading military considerations. Possessed of these, he may, without great difficulty, weigh the recommendations of his technical assistants, decide for himself, and depend upon them for technical execution of that which he approves.

However constituted in detail, the advisory body should be taken entirely from the class to which belongs the conduct of war, and upon whom will fall in war the responsibility for the use of the instruments and for the results of the measures which they recommend.

(*b*) As regards individual responsibility for advice, it is suggested that the Secretary of the Navy nominate to the President the officer whom he deems best fitted to command the great fleet in case of war arising; and that this officer, irrespective of his seniority, should be head of the advisory body. He alone should be the responsible adviser of the Secretary.

The provision of a responsible adviser does not compel the Secretary to accept his advice, nor prevent his consulting whomsoever else he will. The provision suggested does not limit the authority of the Secretary; but it does provide him with the weightiest and most instructed counsel, and it lays upon the prospective commander in chief the solemn charge that in all he recommends he is sowing for a future which he himself may have to reap.

An essential feature in the constitution of such an advisory body is that the majority of the members should be on the active list and should go afloat at not infrequent intervals; and, specifically, the head of the body, the prospective commander in chief, should, during the summer months, take command of the concentrated battle-ship force, for maneuvers, target firing, and practice of every kind. This will insure also his sustained familiarity with administrative routine of the fleet and other practical matters.

6. In the two principal classes into which the duties of the Secretary of the Navy divide, civil and military, as enunciated in section 2 above, the word "civil" corresponds largely to the activities known as technical; and there is no reason apparent why the same principle of undivided immediate responsibility should not be realized in the Navy Department in two chief subordinates, responsible, the one for military supervision, the other for technical supervision, and for all information and advice given to the Secretary under these two heads. It is, of course, apparent that a perfectly suitable Secretary may come to his office with as little previous knowledge of the kind called technical as he has of military; nay, he may be perfectly efficient, and yet not acquire in his four years of office either the technical or military knowledge presumable in men whose lives have been given to the two professions. Under the most favorable conditions every superior must take decisions largely on advice, which means not accepting another's opinion blindly, but accepting statements of facts and weighing reasons.

The principle of the Secretary's ultimate individual responsibility dictates that he be at liberty to consult as many advisers as he thinks necessary; but the principle of the individual responsibility of two chief advisers, for the advice given, tends to insure the most exhaustive consideration on the part of men selected for their special competency. Careful consideration, with special competency, give the best guaranties for advice; and a Secretary overruling it would do so under the weightiest sense of personal responsibility.

As a matter of detail, but yet so broad in bearing as to amount to a principle, it may be noted that, while the adjective "military" is somewhat narrow in application, "technical" is extensive in scope. Naval construction, ordnance, and steam engineering are all technical professions. The selection of a chief technical assistant to the Secretary might, therefore, be made from the recognized technical experts of the navy, under any of the three heads named, or a competent civilian engineer and naval architect may be appointed as Second Assistant Secretary of the Navy, under whom the four technical bureaus may be coordinated.

7. In conclusion, it should be distinctly laid down as a cardinal principle that no scheme of naval organization can possibly be effective which does not recognize that the requirement of war is the true standard of efficiency in an administrative military system; that success in war and victory in battle can be assured only by that constant preparedness and that superior fighting efficiency which logically result from placing the control and responsibility in time of peace upon the same individuals and the same agencies that must control in time of war. There should be no shock or change of method in expanding from a state of peace to a state of war. This is not militarism; it is a simple business principle based upon the fact that success in war is the only return the people and the Nation can get from the investment of many millions in the building and maintenance of a great navy.

WASHINGTON, D. C., *February 18, 1909.*

The PRESIDENT:

The Commission on Naval Organization appointed by executive communication dated January 27, 1909, begs leave to submit the following preliminary report on the "needs of the navy," etc.:

The last clause of your letter of instructions reads as follows:

"In addition to the above reports, I desire your recommendation as to the number, location, and general facilities of the navy-yards which are required by strategic consideration in time of war, and for maintaining the fleet in constant readiness for war in time of peace."

The two subjects when taken together—the dispensing with unnecessary navy-yards, and the provision for navy-yards which are required "by strategic considerations in time of war, and for maintaining the fleet in constant readiness for war in time of peace"—are questions of such gravity and demand so much careful study that it would be impracticable for the commission to bring in even a preliminary report of any value in the limited time available.

The determination of the location of navy-yards and naval bases being a question involving military and strategic considerations of the highest national importance, we venture to recommend that at the earliest practicable date this subject be referred to a joint commission of senior naval officers and officers of the United States Army, which will be instructed to report formally to the President.

In accordance with the last report of the Commission on Naval Organization, I have appointed a joint commission of army and navy officers to report on the subjects named therein, the commission consisting of the following men:

Rear-Admiral A. T. Mahan, U. S. Navy, retired, chairman.
Rear-Admiral Charles S. Sperry, U. S. Navy.
Rear-Admiral Richard Wainwright, U. S. Navy.
Capt. C. McR. Winslow, U. S. Navy.
Maj. Gen. J. Franklin Bell, U. S. Army, Chief of Staff.
Brig. Gen. W. W. Wotherspoon, U. S. Army, General Staff, president Army War College
Brig. Gen. W. L. Marshall, U. S. Army, Chief of Engineers.

The appointment of this commission is peculiarly appropriate in view of action already taken by the Joint Board of the Army and Navy, a board the existence of which has been of marked benefit to the two services. This board, after discussing questions relating to the mutual relations of the army and navy in defending harbors which were liable to be used by the navy for the establishment of navy-yards and naval stations, reached the conclusion that thereafter whenever the army was engaged in the preparation of plans for the defense of a harbor which would be used by the navy, the project for defending the harbor should be submitted to the representatives of the navy on the Joint Board before final adoption, with the view to having the project accord with the necessities of the navy. On the other hand, whenever the navy was planning to locate a navy-yard or naval station, which it would be the duty of the army in case of war to assist in defending either by seacoast fortifications or land operations of the army, that the matter of the location of the navy-yard or naval station should be submitted to the representatives of the army on the Joint Board before final adoption, with the view to having the army opinion as to the necessities in relation to the defenses to be established.

I ask your very earnest consideration of the "general principles" laid down by the commission in the report herewith embodied. In their essence these principles amount to a declaration that the navy should be treated not with a view to any special or local interest, but from the standpoint of the interest of the whole country, and that all other considerations should be subordinated to keeping it in the highest condition of military efficiency, for it must be prepared for war, or else it is useless, and it can not be prepared for war unless always in the highest state of military efficiency. The whole object of the organization of the Navy Department is to create machinery which will in time of peace prepare for war, and such, no less, is the whole object of the War Department. All the administration machinery of the two departments should be considered from this standpoint. The two Secretaries should be supreme; but they should have the best and most responsible military advice. It would be impossible to overestimate the good that has come from the creation of such bodies as the General Staff of the Army, the General Board of the Navy, the Joint Board, the war colleges of the two services, and the like. Without these bodies it would have been utterly impossible to bring either service to anywhere near its present standard of efficiency. Great good has come from the development of the system of maneuvers alike in the navy and the army; the efficiency shown by the expeditionary force of the army which went to Cuba, the efficiency shown by the great battle fleet which has just returned from its extraordinary voyage around the world, are both matters upon which this Nation should heartily congratulate itself. Very much was done in securing a good organization of the army under the plan formulated by Secretary Root. The administrative organization of the navy needs an entire remodeling along the plan indicated in the document headed "General principles," embodied in this report, for this plan contains the principles of naval administration which have been observed by every great power which has ever made, or is now making, a success of naval administration.

If the commission is able to submit to me its final plan before the adjournment of Congress, I shall at once lay it before you. This plan will supplement and define the general principles laid down in the preliminary plan.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 25, 1909.*

LAND IN DONA ANA COUNTY, N. MEX.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 1617) to quiet title to certain land in Dona Ana County, N. Mex.

Mr. FULTON. I move that the Senate disagree to the amendment, and ask for a conference on the disagreeing votes of the two Houses, and that the President of the Senate appoint the conferees on the part of the Senate.

The motion was agreed to; and the Vice-President appointed Mr. FULTON, Mr. FLINT, and Mr. BANKHEAD conferees on the part of the Senate.

MONTANA, WYOMING AND SOUTHERN RAILWAY COMPANY.

The VICE-PRESIDENT laid before the Senate the bill (H. R. 24149) granting to the Montana, Wyoming and Southern Railway Company a right of way across the Fort Keogh Military Reservation, Mont., returned from the House of Representatives in compliance with the request of the Senate.

Mr. WARREN. I move to reconsider the votes by which the bill was ordered to a third reading and passed, with a view to having the Senate amendment disagreed to.

The motion to reconsider was agreed to.

Mr. WARREN. I move to reconsider the votes by which the Senate concurred in its amendment.

The motion to reconsider was agreed to.

Mr. WARREN. I now ask that the amendment be nonconcurred in.

The amendment was nonconcurred in.

The bill was ordered to a third reading, read the third time, and passed.

LEGISLATIVE, ETC., APPROPRIATION BILL.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives agreeing to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 23464) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1910, and for other purposes, and requesting a conference with the Senate on the amendments still in disagreement.

Mr. WARREN. I move that the Senate further insist on the amendments in disagreement, that the request of the House for a further conference be granted, and that the conferees on the part of the Senate may be appointed by the Chair.

The motion was agreed to.

Mr. WARREN. I suggest that the same conferees be appointed who have managed the bill heretofore.

The VICE-PRESIDENT appointed Mr. WARREN, Mr. HEMENWAY, and Mr. TELLER the conferees on the part of the Senate at the further conference.

LANDS AT COLORADO SPRINGS, COLO.

Mr. TELLER. It is quite important that the Senate should pass the bill (S. 9375) to grant certain lands to the city of Colorado Springs, Colo., so that it may pass the House. The object of the bill is to permit the city of Colorado Springs to buy some land for water purposes. The bill has the approval of the Committee on Public Lands and the approval of the Interior Department. I ask that it be put on its passage.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It provides that the following described lands, situate in the counties of El Paso and Teller, in the State of Colorado, namely, the south half of the south half of section 7, the south half of the southwest quarter of section 8, all of sections 17, 18, 19, and 20, the northwest quarter and the south half of section 21, and all of sections 28, 29, 30, 31, 32, and 33 in township 13 south, of range 68 west of the sixth principal meridian; the south half of section 10, all of sections 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, and 27 in township 13 south, of range 69 west of the sixth principal meridian; all of sections 4, 5, 6, 9, and 10 in township 14 south, of range 68 west of the sixth principal meridian; and all of sections 1, 2, and 12, in township 14 south, of range 69 west of the sixth principal meridian, containing 19,600 acres, more or less, shall be granted and conveyed to the city of Colorado Springs, in the county of El Paso and State of Colorado, upon the payment of $1.25 per acre by that city to the United States, to have and to hold said lands to its use and behoof forever for purposes of water storage and supply of its waterworks; and for said purposes said city shall forever have the right, in its discretion, to control and use any and all parts of the premises herein conveyed, and in the construction of reservoirs, laying such pipes and mains, and in making such improvements as may be necessary to utilize the water contained in any natural or constructed reservoirs upon said premises: *Provided, however*, That the grant hereby made is, and the patent issued hereunder shall be, subject to all legal rights heretofore acquired by any person or persons in or to the above-described premises or any part thereof and now existing under and by virtue of the laws of the United States.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RESTRICTIONS ON INDIAN LANDS.

Mr. CURTIS submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 16743) for the removal of the restrictions on alienation of lands of allottees of the Quapaw Agency, Okla., and the sale of all tribal lands, school, agency, or other buildings on any of the reservations within the jurisdiction of such agency, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment, as follows:

Strike out all after the enacting clause and insert the following:

SECTION 1. That the Secretary of the Interior be, and he is hereby, authorized, upon application of any adult member of either of the tribes of Indians belonging to the Quapaw Indian Agency in the State of Oklahoma, to remove the restrictions on any part of or all of the lands allotted to such application and permit a sale under such terms and conditions as he may deem for the best interests of the applicant, excepting a tract of not less than forty acres, which shall be designated and held as a homestead: *Provided*, That this section does not apply to the Modocs.

SEC. 2. That the Secretary of the Interior be, and he is hereby, authorized to sell all or any of the tribal lands within the jurisdiction of the Quapaw Agency, and all agency, school, or other government buildings on any reservation within the jurisdiction of said agency, at public auction or by sealed bids, under such regulations as he may prescribe; and he is hereby authorized to convey all lands so sold to the purchaser thereof by patents in fee. And all lands within such agency which have heretofore been reserved for agency, school, or other purposes shall, on approval of this act, revert to the tribe within whose reservation the lands are located and be sold as tribal lands as herein provided.

SEC. 3. That after the sale of all such lands as provided herein, the net proceeds of such sale, together with all funds belonging to such tribes from whatever source derived, shall be apportioned and paid pro rata, under direction of the Secretary of the Interior, to the members of each of the respective tribes in such manner as he shall prescribe.

SEC. 4. That the Secretary of the Interior is hereby authorized and directed to issue patents in fee to all religious societies and organizations, severally, for the lands occupied by them within any of such reservations and heretofore reserved to such societies, as shown on approved schedules of allotments.

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment as follows:

"SEC. 5. That the Secretary of the Interior be, and he is hereby, authorized and directed to restore to the rolls of the Klamath Agency, in Oregon, those Modoc Indians now enrolled at the Quapaw Agency, in Oklahoma, formerly Indian Territory, together with their descendants living at the date of the passage of this act, and that upon the removal of any of said Indians to the Klamath Reservation, in Oregon, they shall be allotted as other Indians on said reservation, and that upon the passage of this act they be accorded all the rights and privileges of other Indians enrolled at the Klamath Agency: *Provided*, That for the purposes of such removal the Secretary of the Interior be, and he is hereby, upon application of any allottee, authorized to sell, under such rules and regulations as he may prescribe, all lands inherited and otherwise heretofore allotted to the members of said tribe in Oklahoma, and he is authorized to issue a patent in fee simple to the purchaser or purchasers of said lands, and all restrictions as to the sale, incumbrance, and taxation of said land shall thereupon be removed."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment as follows:

"*Provided further*, That if any member of the Modoc tribe of Indians prefers not to have his or her land sold, such allottee may lease his or her land in Oklahoma for a period of not to exceed five years, the parent or next of kin having the care and custody of any minor executing the lease for such minor."

And the Senate agree to the same.

MOSES E. CLAPP,
CHARLES CURTIS,
T. H. PAYNTER,
Managers on the part of the Senate.

J. S. SHERMAN,
THOMAS F. MARSHALL,
JOHN H. STEPHENS,
Managers on the part of the House.

The report was agreed to.

Mr. KEAN. I move that the Senate adjourn.

The motion was agreed to, and (at 6 o'clock and 8 minutes p. m.) the Senate adjourned until to-morrow, Friday, February 26, 1909, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

THURSDAY, *February 25, 1909.*

[*Continuation of legislative day of Tuesday, February 23, 1909.*]

The recess having expired, the House at 10 o'clock a. m. was called to order by Mr. MANN as Speaker pro tempore.

BRIDGE ACROSS MISSOURI RIVER AT COUNCIL BLUFFS, IOWA.

Mr. SMITH of Iowa. Mr. Speaker, I ask unanimous consent for the present consideration of the bill I send to the Clerk's desk.

The Clerk read as follows:

A bill (H. R. 28104) to amend an act to authorize a bridge across the Missouri River at or near Council Bluffs, Iowa, approved February 1, 1908.

Be it enacted, etc., That the act to authorize a bridge across the Missouri River at or near Council Bluffs, Iowa, approved February 1, 1908, is hereby amended so as to give to the Central Railroad and Bridge Company, of Council Bluffs, Iowa, all the authority and rights granted under said act if the actual construction of the bridge authorized by said act is commenced within one year and completed within three years from the passage of this act.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be engrossed for a third reading; and being engrossed, it was accordingly read the third time and passed.

PARLIAMENT OF TURKEY.

The SPEAKER pro tempore laid before the House the following message from the President of the United States (S. Doc. No. 738), which was read, referred to the Committee on Foreign Affairs, and ordered to be printed.

To the House of Representatives:

I transmit herewith a report by the Secretary of State communicating the reply of the Ottoman Chamber of Deputies to the congratulations and good wishes extended to the Parliament of Turkey by the House of Representatives in its resolution of December 17, 1908.

THEODORE ROOSEVELT.

THE WHITE HOUSE,
Washington, February 24, 1909.

PENSIONS.

The SPEAKER pro tempore laid before the House the bill (S. 8899) granting pensions and increase of pensions to soldiers and sailors of wars other than the civil war and to certain widows and dependent relatives of said soldiers and sailors, with amendments of the House disagreed to by the Senate.

Mr. LOUDENSLAGER. Mr. Speaker, I move that the House further insist on its amendments and agree to the conference requested by the Senate.

The motion was agreed to.

The SPEAKER pro tempore. The Chair announces the following conferees: Mr. LOUDENSLAGER, Mr. DRAPER, and Mr. RICHARDSON.

CONDEMNED BRASS AND BRONZE CANNON.

Mr. HULL of Iowa. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill granting condemned cannon to various States and localities.

The SPEAKER. The gentleman from Iowa asks unanimous consent for the present consideration of the following bill.

The Clerk read as follows:

A bill (H. R. 28304) granting certain obsolete ordnance for ornamental purposes.

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized to deliver to the mayor of the city of Aiken, S. C., if the

same can be done without detriment to the public service, two condemned brass or bronze cannon, to be used for park decoration at Aiken, S. C.: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 2. That the Secretary of War be, and he is hereby, authorized and directed to furnish to the joint committee for monument for Arsenal Park, at Pittsburg, Pa., one condemned cannon: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 3. That the Secretary of War be, and he is hereby, authorized and directed to furnish to the city of Enid, Okla., one bronze or brass condemned cannon, with carriage and with a suitable outfit of cannon balls, not needed for present service, the same to be mounted and used on the public building grounds of said city, and to be subject at all times to the orders of the Secretary of War: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 4. That the Secretary of War be, and he is hereby, authorized and directed to furnish to the State of South Carolina two condemned brass or bronze "Napoleon" guns, with carriages and with a suitable outfit of cannon balls, which may not be needed in the service, to be placed on statehouse grounds: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 5. That the Secretary of War be, and he is hereby, authorized to donate to the city of Brazil, Ind., two brass or bronze cannon, to be placed in the court-house park in that city: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 6. That the Secretary of War be, and he is hereby, authorized and directed to furnish to the city of Boscobel, in the State of Wisconsin, one condemned brass or bronze gun, with carriage and with a suitable outfit of cannon balls, which may not be needed in the service, to be placed in front of the soldiers' memorial hall in said city: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 7. That the Secretary of War be, and he is hereby, authorized and directed to donate to the county of Orange, State of New York, two condemned bronze fieldpieces, with carriages, with suitable outfits of cannon balls, which may not be needed in the service, the same to be placed beside the monuments erected by the townships of Cornwall and Montgomery, in said county, in honor of the soldiers and sailors from said townships who served in the war for the Union: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 8. That the Secretary of War be, and he is hereby, authorized and directed to furnish to the city of Huntington, in the State of West Virginia, two brass or bronze guns, with carriage and with a suitable outfit of cannon balls, which may not be needed in the service, one to be placed in the United States Government building yard and one in the county court-house yard at Huntington, W. Va., and to be subject at all times to the order of the Secretary of War: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 9. That the Secretary of War is hereby authorized and directed to donate to General O. O. Howard Post, No. 110, Grand Army of the Republic, of Basin, Wyo., the carriages, caissons, and equipments of the two 3-inch guns heretofore donated to the said post: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 10. That the Secretary of War be, and he is hereby, authorized and directed to donate to the city of Port Jervis, State of New York, one condemned bronze fieldpiece, with carriage, with a suitable outfit of cannon balls, which will not be needed in the service, the same to be placed in said city beside the monument erected in honor of the soldiers and sailors who served in the war for the Union: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 11. That the Secretary of War be, and he is hereby, authorized and directed to donate to the city of Middletown, State of New York, one condemned bronze fieldpiece, with carriage, with a suitable outfit of cannon balls, which may not be needed in the service, the same to be placed in said city beside the monument erected in honor of the soldiers and sailors who served in the war for the Union: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 12. That the Secretary of War be, and he is hereby, authorized and directed to furnish to J. S. Chandler Post, No. 102, Grand Army of the Republic, Salem, Ill., one bronze or brass condemned cannon or fieldpiece, with its carriage and with suitable outfit of cannon balls, not needed for present service, the same to be mounted and used on the public building grounds at said city, and to be subject at all times to the orders of the Secretary of War: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 13. That the Secretary of War be, and he is hereby, authorized and directed to donate to the city of Stillwater, State of Minnesota, one condemned bronze or brass fieldpiece, with carriage, with a suitable outfit of cannon balls, which may not be needed in the service, the same to be placed in a public park or place in said city: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 14. That the Secretary of War be, and he is hereby, authorized and directed to donate to the city of Beloit, State of Wisconsin, one condemned bronze fieldpiece, with carriage, with a suitable outfit of cannon balls, which may not be needed in the service, the same to be placed in said city or in a cemetery near to the said city, in honor of the soldiers and sailors who served in the war for the Union: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 15. That the Secretary of War be, and he is hereby, authorized and directed to donate to the county of Sullivan, State of New York, one condemned bronze fieldpiece, with carriage, with a suitable outfit of cannon balls, which may not be needed in the service, the same to be placed on the court-house lawn in Monticello, the seat of said county, beside the monument erected in honor of the soldiers and sailors who served in the war for the Union: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 16. That the Secretary of War be, and he is hereby, authorized and directed to donate to the county of Warrick, in the State of Indiana, four condemned bronze fieldpieces, with their carriages, which may be available and may not be needed in the service, the same to be placed in the park surrounding the county court-house in the city of Boonville, Ind.: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

SEC. 17. That the Secretary of War be, and he is hereby, authorized and directed to donate to the State of Florida two condemned bronze fieldpieces, with their carriages, which may be available and may not be needed in the service, the same to be placed on the state capitol grounds in the city of Tallahassee: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

SEC. 18. That the Secretary of War be, and he is hereby, authorized and directed to furnish to the State of Colorado two condemned brass or bronze field guns, with carriages, and with a suitable outfit of cannon balls, which may not be needed in the service, to be placed in the statehouse grounds: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 19. That the Secretary of War be, and he is hereby, authorized and directed to donate to the State of Delaware a condemned bronze fieldpiece, with its carriage, which may be available and may not be needed in the service, the same to be placed in the park facing the state capitol at Dover, Del.: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

SEC. 20. That the Secretary of War be, and he is hereby, authorized and directed to donate to the city of Wheeling, in the State of West Virginia, two condemned bronze fieldpieces, with their carriages, which may be available and may not be needed in the service: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

SEC. 21. That the Secretary of War be, and he is hereby, authorized and directed to donate to the city of Fort Madison, Iowa, two brass or bronze "Napoleon" guns, with carriages and with a suitable outfit of cannon balls, to be placed on the site of old Fort Madison: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 22. That the Secretary of War be, and he is hereby, authorized and directed to furnish to the State of Utah two condemned brass or bronze field guns, with carriages, and with a suitable outfit of cannon balls, which may not be needed in the service: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 23. That the Secretary of War be, and is hereby, authorized and directed to donate to the city of Leavenworth, State of Kansas, two condemned bronze or brass fieldpieces, with carriages, with suitable outfit of cannon balls, which may not be needed in the service, the same to be placed in a public park or place in said city: *Provided*, That no expense shall be incurred by the United States in delivery of same.

SEC. 24. That the Secretary of War be, and he is hereby, authorized and directed to donate to the State of Rhode Island two condemned bronze fieldpieces, with their carriages, and a suitable outfit of cannon balls, which may be available and may not be needed in the service, the same to be placed on the state capitol grounds in the city of Providence: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

SEC. 25. That the Secretary of War is hereby authorized and directed to deliver to the mayor of Somerville, Mass., two condemned bronze or brass cannon, to be placed at a soldiers' monument in that city: *Provided*, That the Government shall be at no expense in connection with this gift.

SEC. 26. That the Secretary of War be, and he is hereby, authorized and directed to donate to the county court of Mercer County, W. Va., two condemned bronze fieldpieces, with their carriages, which may be available and may not be needed in the service, the same to be used in the park surrounding the court-house, in the town of Princeton, W. Va.: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

SEC. 27. That the Secretary of War be, and he is hereby, authorized and directed to furnish to the Grand Army Post at Lewistown, Pa., two condemned brass or bronze "Napoleon" guns, with their carriages and with a suitable outfit of cannon balls, which may not be needed in the service, the same to be placed at the monument erected to the memory of the soldiers and sailors of the late civil war in the public square in Lewistown, Pa.: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

SEC. 28. That the Secretary of War be, and he is hereby, authorized and directed to donate to the city of Danville, in the State of Virginia, two condemned bronze fieldpieces, with their carriages and a suitable supply of cannon balls, which may be available and may not be needed in the service, to be placed on the soldiers' plat in the city cemetery in said city: *Provided*, That no expense shall be incurred by the United States in connection with the donation of the above-mentioned articles of ordnance property.

SEC. 29. That the various cannon and other articles of ordnance property furnished under the foregoing provisions of this act shall not be required to be accounted for to the Chief of Ordnance.

SEC. 30. That the Chief of Ordnance is hereby authorized to sell, without advertisement, for public parks, public buildings, and soldiers' monuments purposes surplus obsolete brass or bronze cannon, carriages, and cannon balls at such prices as he may deem reasonable and just: *Provided*, That hereafter obsolete brass or bronze cannon shall not be disposed of except as provided for in this act.

The SPEAKER. The gentleman from Iowa asks unanimous consent to consider this bill. Is there objection?

Mr. CLARK of Missouri. What is it this bill does? Reserving the right to object.

Mr. HULL of Iowa. This bill groups together all the bills the House and Senate have not acted upon donating these condenmed cannon.

Mr. CLARK of Missouri. I am glad of it.

The SPEAKER. The Chair hears no objection.

Mr. HULL of Iowa. I offer the following amendment, to be section 29.

The Clerk read as follows:

SEC. 29. That the Secretary of War be, and is hereby, authorized and directed to donate to Danville Branch of the National Home for Volunteer soldiers, four brass or bronze cannon, with their carriages and a suitable outfit of cannon balls, to be placed on the Soldiers' Home grounds at Danville, Ill.: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

The question was taken, and the amendment was agreed to.

Mr. EDWARDS of Georgia. Mr. Speaker, I offer the following amendment, to come in as section 30.

The Clerk read as follows:

SEC. 30. That the Secretary of War be, and he is hereby, authorized and directed to donate to the city of Waynesboro, Ga., two brass or bronze cannon and a suitable outfit of cannon balls to be placed on the public square of the court-house in said city: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

The question was taken, and the motion was agreed to.

Mr. LOUDENSLAGER. Mr. Speaker, I offer the following amendment, to come in as section 31.

The Clerk read as follows:

SEC. 31. The Secretary of War is hereby authorized and directed to donate two pieces of condemned bronze field artillery to place around the soldiers' monument at the city of Camden, in the State of New Jersey: *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

The question was taken, and the motion was agreed to.

Mr. COX of Indiana. Mr. Speaker, I offer the following amendment, to come in as section 32.

The Clerk read as follows:

SEC. 32. That the Secretary of War be, and is hereby, authorized to donate to the town of Jasper, Ind., two condemned brass or bronze cannon for the Soldiers' Monument of Jasper, Ind.; *Provided*, That no expense shall be incurred by the United States in the delivery of the same.

The question was taken, and the amendment was agreed to.

Mr. CARLIN. Mr. Speaker, I offer another amendment, to come in as section 33.

The Clerk read as follows:

Add a new section, to stand as section 33:

"That the Secretary of War is hereby authorized and directed to donate to the city of Alexandria, Va., nine cannon carriages, provided the said carriages may be on hand and not needed for other purposes in the service, and provided no expense shall be attached to the United States in delivery of the same.

Mr. HULL of Iowa. Mr. Speaker, I understand that they have the cannon there—the Daughters of the Confederacy.

Mr. CARLIN. The Daughters of the American Revolution.

Mr. HULL of Iowa. The Daughters of the American Revolution have the cannon, and the Secretary of War has reported to the gentleman that they have the old condemned carriages that they are willing to give.

Mr. CARLIN. That is my understanding of it.

Mr. TAWNEY. Will there be any left after you get all you want? [Laughter.]

The amendment was agreed to.

The amendments were agreed to.

The bill as amended was ordered to be read a third time, was read a third time, and passed.

Mr. HULL of Iowa. Mr. Speaker, I ask that the sections be renumbered, as these new ones which have been adopted all come in before the last two sections.

The SPEAKER. If there be no objection, the sections will be renumbered.

There was no objection.

POST-OFFICE APPROPRIATION BILL.

Mr. OVERSTREET. Mr. Speaker, I call up from the Speaker's table the conference report on the disagreement of the House with the Senate on the amendments to the post-office appropriation bill (H. R. 26305), and ask that the statement be read in lieu of the report.

The SPEAKER. The gentleman calls up the conference report on the post-office appropriation bill and asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26305) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 14, 17, 18, 20, 21, 23, 25, and 27.

That the House recede from its disagreement to the amendments of the Senate numbered 1 2, 13, 15, 16, 19, 22, 24, 26, 28, and 29.

And agree to the same.

JESSE OVERSTREET,
JOHN J. GARDNER,
JOHN A. MOON,
Managers on the part of the House.
BOIES PENROSE,
J. P. DOLLIVER,
A. S. CLAY,
Managers on the part of the Senate.

The Clerk read the statement as follows:

STATEMENT.

The managers on the part of the House of the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26305) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1910, submit the following written statement in explanation of the effect of the action agreed upon in the accompanying conference report on each of the Senate amendments, namely:

The Senate made 29 amendments to the bill, involving a decrease of $27,000.

By the action of the conferees, submitted in the accompanying report, the House recedes upon amendments involving an increase of $348,000.

The Senate receded upon amendments involving an increase of $65,000.

The bill as passed by the House carried $234,436,370.

As agreed to by the conferees, the bill carries $234,692,370.

Amendments Nos. 1 and 2: These amendments restore these items to their proper places in the bill.

Amendments Nos. 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12: These amendments restore to the bill the items as passed by the House.

Amendment No. 13: This amendment provides for an increased rental in the city of New York, N. Y., for post-office purposes.

Amendment No. 14: This amendment restores the item as passed by the House.

Amendment No. 15: This amendment provides for the promotion of 50 per cent of the carriers in second-class post-offices from $1,000 to $1,100 per annum.

Amendment No. 16: This amendment provides payment for the promotions authorized in amendment No. 15.

Amendment No. 17: This amendment restores the item as passed by the House.

Amendment No. 18: This amendment restores the item as passed by the House.

Amendment No. 19: This amendment strikes out authority for pneumatic tubes in several cities now covered by law.

Amendment No. 20: This amendment restores the item as passed by the House.

Amendment No. 21: This amendment restores the item as passed by the House.

Amendment No. 22: This amendment provides for the payment of actual and necessary expenses of division superintendents, assistants division superintendents, and chief clerks, Railway Mail Service, and railway postal clerks while actually traveling on business of the Post-Office Department and away from their several designated headquarters.

Amendment No. 23: This amendment restores the amount as passed by the House.

Amendment No. 24: This amendment provides for an increase which was considered necessary by the Postmaster-General for blank books, books, etc., for the registry service.

Amendment No. 25: This amendment provides for reimbursement of temporary clerks employed in the tabulations of the six months' weighing of the mails, such clerks having served less than one year, and during that time receiving promotions amounting to from $100 to $360 each.

Amendment No. 26: This amendment provides that postmasters at money-order offices shall give but one bond.

Amendment No. 27: This amendment provides for officers or enlisted men of the Navy and Marine Corps to act as money-order clerks.

Amendments Nos. 28 and 29: These amendments are duplicates of amendments 1 and 2.

JESSE OVERSTREET,
JOHN J. GARDNER,
JOHN A. MOON,
Managers on the part of the House.

The conference report was agreed to.

NAVAL APPROPRIATION BILL.

Mr. FOSS. Mr. Speaker, I call up the conference report on the naval appropriation bill (H. R. 26394) and ask that the statement be read in lieu of the report.

The SPEAKER. The gentleman from Illinois calls up the conference report on the naval appropriation bill and asks unanimous consent that the statement of the House conferees be read in lieu of the report. Is there objection?

There was no objection.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 6, 8, 44, and 45.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 4, 5, 9, 10, 12, 13, 14, 15, 16, 17, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 38, 40, 41, 42, 43, 46, 47, 48, 49, 50, 52, 53, 54, 56, and 57, and agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: In the last line of the amendment strike out the word "pending," and after the word "controversy," in the same line, insert the words "now pending;" and the Senate agree to the same.

Amendment numbered 37: That the House recede from its disagreement to the amendment of the Senate numbered 37, and agree to the same with an amendment as follows: In line 3 of the amendment strike out the word "stores" and insert in lieu thereof the word "storehouse;" and the Senate agree to the same.

Amendment numbered 51: That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment as follows: In lieu of the matter stricken out insert the following: "*And provided further*, That hereafter it shall be the duty of the Secretary of the Navy to report to Congress at the beginning of each regular session thereof, in addition to the report directed to be made in the act of March 2, 1907, making appropriations for the naval service for the fiscal year ending June 30, 1908, and for other purposes, a detailed statement showing the amount expended from each of the appropriations for the repair of every ship where such repairs exceed for any one ship the sum of two hundred thousand dollars in any one fiscal year;" and the Senate agree to the same.

On the amendments of the Senate numbered 1, 7, 11, 18, 39, 55, 58, and 59 the committee of conference have been unable to agree.

GEORGE EDMUND FOSS,
H. C. LOUDENSLAGER,
L. P. PADGETT,
Managers on the part of the House.

EUGENE HALE,
GEO. C. PERKINS,
B. R. TILLMAN,
Managers on the part of the Senate.

The Clerk read the statement, as follows:

STATEMENT.

The managers on the part of the House, at the conference on the disagreeing votes of the two Houses on the bill (H. R. 26394) making appropriations for the naval service for the fiscal year ending June 30, 1910, and for other purposes, submit the following written statement in explanation of the effect of the action agreed upon and submitted in the accompanying conference report on the amendments of the Senate, namely:

Amendment No. 2 provides that the accounting officers of the Treasury are authorized and directed to allow in the settlement of accounts of disbursing offices involved payments made to officers of the navy while on temporary leave of absence since March 3, 1899, not involving detachment from duty and not in excess of leaves of absence allowed by law to officers of the army without reduction in pay; and the House recedes.

Amendment No. 3 provides that the pay and allowances of the secretary to the Admiral of the Navy shall be the same as those of a lieutenant on the active list having an equal length of service; and the Senate recedes.

Amendments Nos. 4 and 5 provide that the Secretary of the Navy shall send to Congress at the beginning of its next regular session a complete schedule or list showing the amount in money of all pay under the provisions of this act, and for all allowances for each grade of officers in the navy, including retired officers and for all officers included in this act, and for all enlisted men so included; also, that the estimates under the head of "Pay of the Navy" shall show the sums allowed for pay of officers belonging to the line, staff, and retired list; the amount allowed for pay proper, the increases due to longevity and foreign service, the pay at sea rates to officers employed on shore; with the total number of warrant and petty officers and seamen of the several grades and designations, including as to each class the amount allowed for pay proper and for longevity or service increases; also, a list giving the rates of pay for all petty officers and other enlisted men of the navy; and the House recedes.

Amendment No. 6 excepts the regular force in the Navy Department at navy-yards and stations which is now under civil-service rules and regulations in the lump-sum appropriation providing for the clerical, drafting, inspection, and messenger service; and the Senate recedes.

Amendment No. 8 strikes out the House provision for giving preference to employees in the clerical, drafting, and inspection force discharged for lack of work or insufficiency of funds; and the Senate recedes.

Amendment No. 9 provides for the repeal of section 1556 of the Revised Statutes, which fixes the pay of clerks to commandants at navy-yards and naval stations; and the House recedes.

Amendment No. 10 authorizes the Secretary of the Navy to furnish naval prisoners upon discharge with suitable civilian clothing; and the House recedes.

Amendment No. 12 reduces the total for the Naval War College, Rhode Island, from $19,100 to $14,700; and the House recedes.

Amendments Nos. 13 and 14 have the effect of placing the appropriation for badges and ribbons under the Bureau of Navigation instead of under the Bureau of Ordnance; and the House recedes.

Amendment No. 15 provides that from the total appropriation of "Ordnance and ordnance stores" not less than $250,000 shall be expended for the enlargement of the government powder factory; and the House recedes.

Amendments Nos. 16 and 17 make the limitation upon the purchase of powder from any trust or combination in restraint of trade apply to all appropriations for the purchase of powder in the act; and the House recedes.

Amendment No. 19 provides that no part of this amount shall be expended for the purchase of torpedoes, or appliances or rights pertaining thereto, where the rights to such torpedoes or appliances are the subject of pending legal controversy, and the House recedes, with the amendment in the last line, to strike out the word "pending," and after the word "controversy" add the words "now pending," so that the last line shall read as follows: "of legal controversy now pending."

Amendment No. 20 increases the cost of the foundry building in the navy-yard, Portsmouth, N. H., from $200,000 to $250,000, but does not increase the appropriation this year; and the House recedes.

Amendment No. 21 increases the appropriation toward the improvement of water-front facilities in navy-yard, New York, from $50,000 to $76,330; and the House recedes.

Amendment No. 22 increases the total for the navy-yard, New York, by the amount stated in amendment No. 21; and the House recedes.

Amendments Nos. 23 and 24 allow for an appropriation of $50,000 for paving around piers, navy-yard, Philadelphia; and the House recedes.

Amendment No. 25 strikes out the sewer system for the navy-yard, Charleston, S. C.; and the House recedes.

Amendment No. 26 increases the appropriation for paving and grading from $10,000 to $20,000, Charleston Navy-Yard; and the House recedes.

Amendment No. 27 decreases the appropriation for the underground conduit system from $10,000 to $5,00; and the House recedes.

Amendment No. 28 increases the appropriation for the intercepting drain, Charleston Navy-Yard, from $10,000 to $30,500; and the House recedes.

Amendment No. 29 decreases the appropriation for the pneumatic system, Charleston Navy-Yard, from $10,000 to $5,000; and the House recedes.

Amendment No. 30 provides an appropriation of $50,000 for increasing and improving torpedo-boat slips, Charleston Navy-Yard; and the House recedes.

Amendment No. 31 strikes out an appropriation of $25,000 for crane track extension, Charleston Navy-Yard; and the House recedes.

Amendment No. 32 increases the total for Charleston Navy-Yard from $95,000 to $135,500; and the House recedes.

Amendments Nos. 33 and 34 provide for an appropriation of $5,000 for the repair of the rifle range and wharf at the navy-yard, Pensacola; and the House recedes.

Amendments Nos. 35 and 36 provide for the completion of the marine railway at naval station, Key West, $15,000; and the House recedes.

Amendment No. 37 provides the following appropriations for the navy-yard, Mare Island, Cal.: "To continue improvement of channel, $100,000; ordnance stores, $100,000; improvements to building No. 69, $4,000; railroad system extension, $20,000;" increasing the appropriation for that yard from $348,500 to $572,000; and the House recedes, with the amendment: In line 3 of the amendment strike out the word "stores" and insert in lieu thereof the word "storehouse."

Amendment No. 38 changes the total for the Mare Island Navy-Yard, in accordance with amendment No. 37.

Amendment No. 40 provides for the following appropriations for the navy-yard, Puget Sound: "General storehouse (to cost $260,000), $100,000; pier No. 8, $75,000; pattern shop, $40,000; two officers' quarters, $18,000; warrant officers' quarters, $4,000;" and the House recedes.

Amendment No. 41 increases the total for the navy-yard, Puget Sound, from $418,000 to $655,000; and the House recedes.

Amendment No. 42 provides for an appropriation of $45,000 for levee improvements and grading at the naval station, New Orleans; and the House recedes.

Amendment No. 43 increases the total for public works, navy-yards and stations, from $4,202,000 to $4,844,830; and the House recedes.

Amendment No. 44 provides as follows: "Toward the preparation of plans and the construction of two concrete piers at the Naval Academy, Annapolis, Md., and including the pay of the necessary draftsmen and inspectors (to cost not more than $250,000), $100,000; in all, $100,000;" and the Senate recedes.

Amendment No. 45 increases the total public works under Secretary's office from $89,000 to $189,000; and the Senate recedes.

Amendment No. 46 apportions the clerk hire under the various appropriations for the naval training station, Rhode Island, but the total amount is not increased; and the House recedes.

Amendment No. 47 provides for the purchase of land adjoining the navy-yard, Charleston, S. C., as a reservation for the Marine Corps, and appropriates $6,500 for the same; and the House recedes.

Amendment No. 48 provides as follows: "To complete the marine garrison, navy-yard, Bremerton, Wash., one marine barracks, $150,000, and for officers' quarters, $60,000; in all, $210,000;" and the House recedes.

Amendment No. 49 increases the total for public works, Marine Corps, from $360,000 to $576,500; and the House recedes.

Amendment No. 50 increases the appropriation for provisions, navy, from $6,801,523.51 to $7,110,284.31, by reason of the marines serving on board ship, as heretofore; and the House recedes.

Amendment No. 51 strikes out the House provision; and the House recedes, with the following amendment: In lieu of the matter stricken out insert the following:

"*And provided further*, That hereafter it shall be the duty of the Secretary of the Navy to report to Congress at the beginning of each regular session thereof, in addition to the report directed to be made in the act of March 2, 1907, making appropriations for the naval service for the fiscal year ending June 30, 1908, and for other purposes, a detailed statement showing the amount expended from each of the appropriations for the repair of every ship where such repairs exceed for any one ship the sum of $200,000 in any one fiscal year."

Amendment No. 52 provides for an increase for the engineering experiment station, Naval Academy, Annapolis, Md., from $11,968 to $17,488; and the House recedes.

Amendment No. 53 provides for the title of "warrant machinist" to be changed to "machinist," and is as follows:

"The title of 'warrant machinist' is hereby changed to 'machinist;' and all machinists shall, after six years from date of warrant, be commissioned chief machinists to rank with, but after, ensign, and shall on promotion have the same pay and allowances as are allowed chief boatswains, chief gunners, chief carpenters, and chief sailmakers, and no machinist shall be promoted until he shall have passed such examination before a board as the Secretary of the Navy may prescribe; and no warrant officer heretofore or hereafter promoted six years from date of warrant shall suffer a reduction in pay which, but for such promotion, would have been received by him: *Provided*, That chief boatswains, chief gunners, and chief machinists shall be eligible for appointment to the grade of ensign under the restrictions imposed by law upon the appointment of boatswains, gunners, and warrant machinists to that grade."

And the House recedes.

Amendment No. 54 provides as follows:

"The crypt and window spaces of the United States Naval Academy chapel are to be used only for memorials to United States naval officers who have successfully commanded a fleet or squadron in battle, or who have received or may receive the thanks of the Congress of the United States for conspicuously distinguished services in time of war, and no memorial shall be accepted for or installed in said crypt or window spaces until at least five years after the death of the officer in question: *Provided*, That nothing in this provision shall be considered as invalidating any agreement made by the present or any former Superintendent of the Naval Academy authorizing a memorial window in the old Naval Academy chapel to be transferred to the new Naval Academy chapel."

And the House recedes.

Amendment No. 56 provides that of the two first-class battle ships provided for in this act, not more than one shall be built by one contracting party; and the House recedes.

Amendment No. 57 is as follows:

"The Secretary of the Navy is hereby authorized, in his discretion, to contract for or purchase one destroyer whose vitals are located below the normal load water line, such vessel to cost not to exceed $400,000 and to have a speed not less than 22 knots; also two small vessels of similar construction having a speed of not less than 16 knots and to cost not to exceed $22,500 each: *Provided*, That before any vessel provided for in this paragraph shall be purchased or contracted for a vessel of similar construction shall have been constructed complete and of full size for naval warfare and submitted to the Navy Department for such trial and tests as the Secretary of the Navy may, in his discretion, prescribe, and as the result of such tests be demonstrated to have fulfilled all the reasonable requirements of naval warfare for such a vessel."

And the House recedes.

The committee of conference has been unable to agree on the following amendments:

Amendment No. 1: "The provisions of the act approved June 29, 1906, entitled 'An act making appropriations for the naval service for the fiscal year ending June 30, 1907, and for other purposes,' providing for the retirement in the next higher grade of officers of the navy who served during the civil war, shall not operate to deprive any officer of the navy who has been, or may be, retired, since the passage of that act, of the right to increased rank and pay to which, but for the passage of said act, he would have been entitled."

Amendment No. 7: "and that all employees of the navy-yards, gun factories, and naval stations, in addition to the fifteen days' leave of absence now provided for by existing law, may hereafter, in exceptional and meritorious cases, where such employees are ill, be granted sick leaves of absence with pay, in the discretion of the Secretary of the Navy, not to exceed fifteen days in any one year."

Amendment No. 11 strikes out the following in the House bill: "unless a certificate of birth or a verified written statement by the parents, or either of them, or in case of their death a verified written statement by the legal guardian, be first furnished to the recruiting officer, showing applicant to be of age required by naval regulations, which shall be presented with the application for enlistment," and adds the following: "unless a certificate of birth or written evidence other than his own statement or statement of another based thereon, satisfactory to the recruiting officer, showing the applicant to be of age required by naval regulations, shall be presented with the application for enlistment."

Amendment No. 18 relates to the purchase of powder and strikes out the words "an emergency," and inserts the word "war," thereby limiting the purchase of powder from any trust or combination in restraint of trade to the event of war only.

Amendment No. 39: "The Secretary of the Navy is directed, by suitable board, to investigate and report to Congress the advisability and necessity of establishing a naval base, including a navy-yard and repair station, on the coast of the State of California, south of San Francisco; and if the establishment of such naval base is deemed necessary and advisable at what place on said coast said naval base should be located, and an estimate of the cost of same."

Amendment No. 55: "*Provided*, That no part of the appropriations herein made for the Marine Corps shall be expended for the purposes for which said appropriations are made, unless officers and enlisted men shall serve, as heretofore, on board all battle ships and armored cruisers, and also upon such other vessels of the navy as the President may direct, in detachments of not less than 8 per cent of the strength of the enlisted men of the navy on said vessels."

Amendment No. 58 strikes out the following from the House bill: "*Provided*, That no part of the above appropriation shall be used for the payment of the construction of any collier the total cost of which shall exceed $900,000."

Amendment No. 59: "That there shall be kept, in the discretion of the President, as far as practicable, one-half of the navy of the United States on the Pacific at all times."

The increases in the naval appropriation bill for this year by Senate amendments agreed to in conference are as follows: Public works, navy-yards and stations, $642,830; public works, Marine Corps, $216,500; provisions, navy, $308,760.80; experiment station, Naval Academy, $5,520. The Senate made a reduction in the House bill of $4,400, and the conferees reduced the bill as it passed the Senate by $100,000.

GEORGE EDMUND FOSS,
H. C. LOUDENSLAGER,
L. P. PADGETT,
Managers on the part of the House.

Mr. FOSS. Mr. Speaker, I wish to state that this leaves in disagreement on the naval appropriation bill about half a dozen items.

The amount of the bill as it passed the House was $135,766,771. As it stands now, the bill amounts to $136,935,199.

I call for the adoption of the report.

Mr. UNDERWOOD. Before the gentleman asks for a vote I should like to put to him some questions about the matter.

Mr. FOSS. I yield to the gentleman.

Mr. UNDERWOOD. I see that the conference committee have agreed to Senate amendments for public works and naval stations to the extent of $642,830 in this conference report.

Mr. FOSS. Yes.

Mr. UNDERWOOD. In view of the present condition of the Treasury, the deficit that is facing the country, I should like to ask the gentleman where the necessity arose for the increase of these public buildings.

Mr. FOSS. These amendments which were put in by the Senate were all in the estimates as they were sent to our committee originally, and they were requested by the Navy Department. Most of them, I think, went out on points of order in the House. Then they were put in again over in the Senate.

Mr. UNDERWOOD. If they came as estimates to your committee, the committee did not think it necessary to put them in at the time the bill passed the House. Now I should like to have the gentleman state wherein the necessity arose for this increase of $642,000 for public works, and $308,000 for an experiment station at the Naval Academy, when it seems that under the present necessities of the country for economy we could at least forego the building of additional public buildings unless there is some extreme necessity shown for the same.

Mr. FOSS. Undoubtedly between the time when the bill passed the House and the time when it was taken up in the Senate the Navy Department appealed to the Senate committee for these provisions.

Mr. UNDERWOOD. I have no doubt of that.

Mr. FOSS. But I am not familiar enough with the situation to know that fact. When these matters came up in conference, the Senate conferees said that the Navy Department desired them, and consequently they were put on as Senate amendments.

Mr. UNDERWOOD. I have no doubt that the Navy Department asked for the buildings. I am not questioning the fact that they may have been useful, but, under the present conditions of the country and of the Treasury, I do not think the gentleman ought to bring a conference report or a bill to this House increasing the appropriations over what they were in the bill when they left the House—nearly a million dollars—without he can show to the House an absolute necessity on the part of the Government for the increase he has agreed to.

Mr. FOSS. I will say to the gentleman that this is a very small increase compared with the increases that have been made in previous years. The increases on public works were twice that.

Mr. UNDERWOOD. I know we were very extravagant, but we had money to be extravagant on; but we have now reached the time when we have not got the money, and the gentleman brings in a bill increasing the expenditures before the House, and he should be able to justify absolutely every increase that the bill contains.

Mr. FOSS. Mr. Speaker, I call for the adoption of the conference report.

The conference report was agreed to.

Mr. FOSS. Now, Mr. Speaker, I move that the House disagree to amendments numbered 1, 7, 11, 18, 39, 55, 58, and 59, and agree to the conference already asked for by the Senate.

The SPEAKER. The gentleman from Illinois moves that the House further insist on its disagreement to the amendments indicated and agree to the conference asked for by the Senate. Without objection——

Mr. MANN. I object, Mr. Speaker; I would like to have a vote on the question.

Mr. FOSS. Does the gentleman desire a separate vote?

Mr. MANN. No; I am willing to have a vote on all the amendments at once.

The question was taken, and on a division (demanded by Mr. MANN) there were 100 ayes and 3 noes.

So the motion of Mr. Foss was agreed to.

The SPEAKER appointed as conferees on the part of the House Mr. FOSS, Mr. LOUDENSLAGER, and Mr. PADGETT.

RIGHT OF WAY ACROSS FORT KEOGH MILITARY RESERVATION, MONT.

The SPEAKER laid before the House the following Senate resolution.

The Clerk read as follows:

Resolved, That the Secretary be directed to request the House of Representatives to return to the Senate H. R. 34149, granting to the Montana, Wyoming and Southern Railroad Company a right of way across Fort Keogh Military Reservation, Mont.

The SPEAKER. Without objection, the request will be granted.

There was no objection.

CONTESTED-ELECTION CASE—OCTAVIANO A. LARRAZOLA V. WILLIAM H. ANDREWS.

Mr. OLMSTED. Mr. Speaker, by direction of Committee on Elections No. 2, I present a report (H. Rept. No. 2246) and accompanying resolutions in the case of Octaviano A. Larrazola against William H. Andrews, involving the right to a seat in the House of Representatives of the United States in the Sixtieth Congress as a Delegate from the Territory of New Mexico. Accompanying it is a statement by two Members, not dissenting at all, but commenting on the laws of New Mexico. I do not ask for the reading of the report, but of the resolutions.

The Clerk read the resolutions, as follows:

House resolution 591.

Resolved, That Octaviano A. Larrazola was not elected and is not entitled to a seat in the Sixtieth Congress as a Delegate from the Territory of New Mexico.

Resolved, That William H. Andrews was elected and is entitled to a seat in the Sixtieth Congress as a Delegate from the Territory of New Mexico.

The resolutions were agreed to.

BRIDGE ACROSS RED RIVER.

Mr. WATKINS. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 28193) to authorize the city of Shreveport to construct a bridge across Red River.

The Clerk read the bill, as follows:

Be it enacted, etc., That the city of Shreveport, a corporation organized under the laws of the State of Louisiana, its successors and assigns, be, and they are hereby, authorized to construct, maintain, and operate a traffic bridge and approaches thereto across the Red River at Shreveport, in the State of Louisiana, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

TITLE TO CERTAIN LAND IN NEW MEXICO.

Mr. DIEKEMA. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 1617) to quiet title to certain land in Dona Ana County, N. Mex.

The Clerk read the bill, as follows:

Be it enacted, etc., That in all cases where persons have made a claim or claims to land in Dona Ana County, N. Mex., by virtue or under color or bona fide claim of right or title derived from the Mexican land grant, known as the Refugio Colony grant, in said county, and which grant was confirmed by the final decree of the Court of Private Land Claims, rendered in 1902, and where such person or persons in good faith and for a valuable consideration have purchased such lands and occupied and improved the same prior to the rendition of said decree, in the bona fide belief that said lands were embraced in and a part of said grant and which lands were excluded therefrom by the final survey of said grant ordered by said court, and where said persons, their assigns, and successors in interest have used, improved, and continued in the actual possession of the same as according to the lines of the original purchase, and where no valid adverse right or title (except of the United States) exists, such occupants, claimants, or purchasers may purchase and the Commissioner of the General Land Office shall cause patents to issue for the same, after having such lands surveyed under existing laws, at the minimum price established by law, upon first making proof of the facts as required in this section, under regulations to be provided by the Commissioner of the General Land Office, joint entries being admissible by coterminous proprietors to such an extent as will enable them to adjust their respective boundaries: *Provided*, That the

right to purchase herein given shall not extend to lands containing mines of gold, silver, copper, or other valuable minerals: *And provided*, That whenever it shall be made to appear by petition from the occupants of such land that injury to permanent improvements would result from running the lines of the public survey through such permanent improvements, the Commissioner of the General Land Office may recognize existing lines of subdivisions.

The Clerk also read the following committee amendments:

On page 2, line 3, strike out the word "purchase" and insert in lieu thereof the words "make entry."

On page 2, line 6, strike out the words "at the minimum price established by law" and insert in lieu thereof the words "on payment of the fees and commissions required on original homestead entries."

On page 2, line 12, strike out the word "purchase" and insert in lieu thereof the words "make entry."

Add one new section thereto, to stand as section 2, and to read as follows:

"SEC. 2. That the Commissioner of the General Land Office is hereby authorized to render to the claimants under this act such assistance as he may deem necessary in the matter of the preparation and submission of proofs hereunder, and all actual expenses incurred by clerks of the General Land Office or others detailed by the commissioner in rendering the necessary assistance to such claimants, including per diem allowance in lieu of subsistence, may be paid from the appropriation for expenses of inspectors, General Land Office."

The SPEAKER. Is there objection?

Mr. UNDERWOOD. Reserving the right to object, I would like to ask the gentleman how large a tract does this cover?

Mr. DIEKEMA. Eight thousand five hundred acres.

Mr. UNDERWOOD. How much is the ownership of any one man?

Mr. DIEKEMA. There are a little over 1,000 families.

Mr. UNDERWOOD. Yes; but how much land does one man own?

Mr. DIEKEMA. Not much. There are only 8,500 acres, and there are 1,000 families interested in it.

Mr. UNDERWOOD. Is the limitation made within the terms of the homestead act—that is, does it exceed 160 acres?

Mr. DIEKEMA. The homestead act would make no difference about this, because each man would get the lands that he had originally purchased from the colony and to which he had received title under that purchase, no matter how small the tract or how large the tract; but there is no very large tract in it.

Mr. UNDERWOOD. What I want to get at is this—as to whether this is an attempt to grant the persons who had no legal rights, as shown by this report, a large tract of land, or whether it is simply confirming the title to people who could have taken up that much public land under homestead entry?

Mr. DIEKEMA. No; it is confirming the title to people who actually did take possession, who made improvements, and who are now in possession, and who did so under the survey made in 1878 by Mr. Elkins, relying that that survey would be confirmed by the Government.

Mr. STEPHENS of Texas. Will the gentleman inform us where this land is situated?

Mr. DIEKEMA. In Dona Ana County, N. Mex.

Mr. STEPHENS of Texas. Is it on the Rio Grande River? What I want to get at is, is it irrigable land?

Mr. MANN. It is Refugio Colony grant lands.

Mr. DIEKEMA. It was originally, in 1851, a Mexican grant to the Refugio Colony; and in the treaty we made with Mexico when we purchased this land, we agreed to confirm this land grant.

Mr. STEPHENS of Texas. Has it ever been confirmed by the United States Government?

Mr. DIEKEMA. Yes; but from this land grant, according to the latest survey, were excluded about 8,500 acres, which were bought in good faith by actual settlers, who made improvements.

Mr. STEPHENS of Texas. Then, this land that was excluded in the survey would be public domain?

Mr. DIEKEMA. Would be public domain unless the grant was made to the parties who actually purchased the same.

Mr. STEPHENS of Texas. And you propose to let these people have the land they intended to get off the public domain?

Mr. DIEKEMA. And for which they actually paid the Refugio Colony.

Mr. STEPHENS of Texas. I think there should be no objection to that.

Mr. SULZER. Where is this land located?

Mr. DIEKEMA. In Dona Ana County, N. Mex.

Mr. SULZER. How many acres?

Mr. DIEKEMA. Eight thousand five hundred acres.

Mr. SULZER. What is it worth to-day?

Mr. DIEKEMA. Nobody can tell.

Mr. MANN. It is not valuable land?

Mr. DIEKEMA. It is not valuable land at all.

Mr. NELSON. Not mining property?

Mr. MANN. No.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The question is on agreeing to the amendments.

The question was taken, and the amendments were agreed to.

The bill as amended was ordered to be read a third time, read the third time, and passed.

CLARENCE FREDERICK CHAPMAN, U. S. NAVY.

Mr. BUTLER. Mr. Speaker, I call up the conference report on the bill (H. R. 12499) for the relief of Clarence Frederick Chapman, U. S. Navy, and ask unanimous consent that the statement be read in lieu of a report.

The SPEAKER. The gentleman calls up a conference report and asks unanimous consent that the statement be read in lieu of the report. Is there objection? [After a pause.] The Chair hears none, and the Clerk will read.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill H. R. 12499, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment.

THOMAS S. BUTLER,
ERNEST W. ROBERTS,
A. W. GREGG,
Managers on the part of the House.

CHARLES DICK,
THOMAS S. MARTIN,
JOHN WALTER SMITH,
Managers on the part of the Senate.

The Clerk read the statement, as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill (H. R. 12499) "for the relief of Clarence Frederick Chapman, United States Navy," submit the following written statement in explanation of the effect of the action agreed upon and submitted in the accompanying conference report on the amendment of the Senate:

The Senate in receding from its amendment leaves the bill as it passed the House of Representatives.

THOMAS S. BUTLER,
ERNEST W. ROBERTS,
A. W. GREGG,
Managers on the part of the House.

Mr. BUTLER. Mr. Speaker, I move the adoption of the report.

The SPEAKER. The question is on the motion of the gentleman from Pennsylvania to adopt the report.

The question was taken, and the report was adopted.

TRANSFERRING DAWSON COUNTY, TEX., TO NORTHERN JUDICIAL DISTRICT.

Mr. HENRY of Texas. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 28305) to attach Dawson County, in the State of Texas, to the Abilene division of the northern judicial district of said State and to detach it from the Fort Worth division of said court, which I send to the desk and ask to have read.

The Clerk read as follows:

Be it enacted, etc., That Dawson County, in the State of Texas, be, and the same is hereby, attached to and made a part of the Abilene division of the northern judicial district of the State of Texas and detached from the Fort Worth division of said judicial district.

SEC. 2. That all process against persons resident in said county of Dawson and cognizable before the court in said judicial district shall be issued out of and made returnable to said court at Abilene, and that all prosecutions against persons for offenses committed in said county shall be tried in said court at Abilene: *Provided*, That no civil or criminal cause begun and pending prior to the passage of this act shall be in any way affected by it.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. HENRY of Texas, a motion to reconsider the last vote was laid on the table.

SELLING SURPLUS INDIAN LANDS, KAW AND OSAGE TRIBES.

Mr. SHERMAN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 8554) authorizing the Secretary of the Interior to sell part or all of the surplus lands of members of the Kaw or Kansas and Osage tribes of Indians

of Oklahoma, and for other purposes, which I send to the desk and ask to have read.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he hereby is, authorized and empowered, upon application, to sell, under such rules and regulations as he may prescribe, part or all of the surplus lands of any member of the Kaw or Kansas and Osage tribes of Indians in Oklahoma: *Provided*, That the sales of the Osage lands shall be subject to the reserved rights of the tribe in oil, gas, and other minerals.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, I would like to have some information about the matter.

Mr. SHERMAN. Mr. Speaker, the lands of the Kaw tribe have been allotted to them, 160 acres for a homestead, and the balance is called "surplus land." That balance is about 200 acres to each Indian. To the Osage tribe the land was allotted in the same way—160 acres to each Indian—and a surplus remains, very nearly 500 acres to each. This simply means that each Indian has more land than he can properly work, and this bill authorizes the Secretary to permit the sale of a portion or all of the surplus land upon the application of each individual Indian where he considers it for the benefit of the Indian to make such sale, and, of course, it reserves the right in the oil and minerals to the tribe.

Mr. MANN. Of course that means that very soon all of this land will be taken out of the hands of the Indians and put into the hands of the white people down there.

Mr. SHERMAN. The surplus lands; that is the intention, certainly.

Mr. MANN. Why was not that done in the original act if it was considered desirable to do so?

Mr. SHERMAN. It was restricted for a limited time; it was restricted for ten years for the Kaws, and the ten years will expire in about three years. It is asked that the ten years be cut down to the present time.

Mr. MANN. Does not the gentleman think it will rob the Indians of their land and that it is perfectly safe to wait until the end of the ten years, instead of waiving that limitation now?

Mr. SHERMAN. The gentleman is entirely in error. There is no purpose of robbing the Indians, and I will not, as long as I live and have any power to do so, permit the passage of any act robbing the Indians of their lands or money; and I want to call the gentleman's attention to the fact that I have striven as best I could to protect the rights of the Indians rather than the rights of the white people.

Mr. MANN. The gentleman really does not need to say that, because everybody on the Committee on Indian Affairs and off of it——

Mr. SHERMAN. I understood the gentleman to intimate so.

Mr. MANN (continuing). Knows that the gentleman has stood as a bulwark between robbery and the Indians, but the gentleman will soon be off the Committee on Indian Affairs——

Mr. CLARK of Missouri. Off the reservation.

Mr. MANN (continuing). And here is a proposition to permit the white people to commence at once to endeavor to get this land away from the Indians, and the white people are pretty cute.

Mr. SHERMAN. There is no doubt about that; the gentleman's presence here proves that.

Mr. MANN. And there will not be any land left in the possession of the Indians and mighty little money left in their hands in three years if this bill goes through.

Mr. SHERMAN. The gentleman should understand that this does not apply to the homestead; that each Indian will have 160 acres, but that 660 acres is rather a substantial—that is not the exact term—is rather more than the Indian is supposed to be able to till for himself and his family, and each Indian has that.

Mr. MANN. We had the assurance of the gentleman from Oklahoma the other day that the Indians did not till probably 40 acres of what they had, but the lands were leased. Now, if the title remains in the Indians and permits the leasing of lands then we know they will have something to live on, but if the title passes out of the Indians there is no way of keeping the money in the hands of the Indians, and it will be only a short time before they will be bereft of lands and bereft of money, and the Government will have to take care of them, and I think three years longer to wait would not hurt anybody.

Mr. MACON. May I ask the gentleman why the Indian should not work as well as anybody else?

Mr. SHERMAN. The Indian should work, and we have legislated as far as possible to make it absolutely necessary that they should work. For instance, in regard to the Sioux Indians, some years ago we provided that the administrative officer of the Government should have the privilege of withholding their rations except where they work for their rations, and so far as it has been possible this House and both bodies of Congress has put it in the power of the administrative officers to compel the Indians to do what we do—earn their bread by the sweat of their face.

Mr. MACON. I stand with the gentleman from New York absolutely on that ground. I think they ought to be made to work just as we do.

Mr. SHERMAN. That is just what we are trying to do all along the line. Now, there is more land held by each Indian than he could cultivate if he were as industrious as the gentleman from Illinois, and I can not say anything more extravagant along that line, more pressing in the line of industry. [Applause.] I think the Indian should be made to till and care for his land.

They do not try to do it, but even if they did try they could not do it where the amount of the individual holding is so great, and this proposition is that under regulations prescribed by the Secretary permission be given them to sell whatever of their surplus lands they do not need and use the money under the direction of the Secretary of the Treasury in improving land that they still have.

Mr. MANN. I do not see what authority the Secretary of the Treasury would have over the purchase price of this land after it is received. It can not be paid into the Treasury of the United States.

Mr. SHERMAN. The Indians do not have this money paid to them until the Congress says so.

Mr. STEPHENS of Texas. It is for the use and benefit of the Indians and placed to their credit.

Mr. SHERMAN. They get the interest, certainly, per capita annually, but they do not get the principal under the terms of the original act until the Congress says so.

Mr. MANN. Where they sell their own land?

Mr. SHERMAN. Under the terms of the agreement this money goes into the Treasury, the interest thereon to be used by them, or to be paid to them, rather, annually per capita.

Mr. MANN. Here the other day we had a proposition offered by the gentleman from Oklahoma in its original form, objected to by the gentleman from New York, although he finally agreed to a modified form, to take part of the principal—possibly not of these Indians, but other Indians in Oklahoma—on the original proposition to pay their debts, their grocery bills, and so forth, for the ensuing year.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, I object for the present.

COMPENSATION OF COMMISSIONS, ETC.

Mr. TAWNEY. Mr. Speaker, I ask unanimous consent that the following may be considered in the Committee of the Whole in order as an amendment and separate section to the sundry civil appropriation bill (H. R. 28245).

The SPEAKER. The gentleman from Minnesota asks unanimous consent that the following order, which the Clerk will report, may be agreed to.

The Clerk read as follows:

SEC. —. That hereafter no part of the public moneys, or of any appropriation heretofore or hereafter made by Congress, shall be used for the payment of compensation or expenses of any commission, council, board, or other similar body, or any members thereof, or for expenses in connection with any work or the results of any work or action of any commission, council, board, or other similar body, unless the creation of the same shall have been authorized by Congress; nor shall there be employed, by detail, hereafter or heretofore made, or otherwise, personal services from any executive department or other government establishment in connection with any such commission, council, board, or other similar body.

The SPEAKER. Is there objection?

Mr. UNDERWOOD. Reserving the right to object, I would like the gentleman from Minnesota to explain the entire purport of this resolution. It is the first time I have heard it.

The SPEAKER. The request is that this order shall be agreed to, and that it shall be in order to move the amendment upon the sundry civil appropriation bill.

Mr. TAWNEY. That is all it is. I first want to perfect the text. After the word "been," next to the last line of typewriting, insert the words "in specific terms."

The Clerk read as follows:

Insert after the word "been" the words "in specific terms."

The SPEAKER. Is there objection?

Mr. PERKINS, Mr. TOWNSEND, and Mr. GAINES of Tennessee rose.

The SPEAKER. To whom does the gentleman from Minnesota [Mr. TAWNEY] yield?

Mr. TAWNEY. I yield to the gentleman from New York [Mr. PERKINS].

Mr. PERKINS. I would like to ask the object of this resolution in one respect. There was, as the gentleman from Minnesota will perhaps remember, in the agricultural appropriation

bill a provision which was carefully debated in the House, and a motion was made to strike out the provision having in view the action of a certain board of review or advisory committee—a referee board—which had acted in connection with certain matters in the Agricultural Department. A majority of the House, after full debate, retained the provision that was contained in the agricultural bill and defeated the amendment that was offered to strike it out.

Now, if the object of the amendment now offered by the gentleman from Minnesota [Mr. TAWNEY] is to overrule and defeat that action of the House, I must feel bound to object.

Mr. TAWNEY. I would say, Mr. Speaker, that I did not have in mind the referee board of the Agricultural Department or the action of the House in respect thereto on the agricultural appropriation bill.

I think the referee board, as it was then claimed, was appointed under authority of law. This provision, if it be made law, would have no application whatever to that board. What is intended especially by this is to meet this condition. It did appear, as I have been informed, on the hearings on the agricultural appropriation bill, and other members of the committee have information to that effect, that a great number of commissions that are now in existence have been working under authority from the executive department alone, and are employing a great many people in the various departments here in the work of securing data and information and in tabulating and classifying the results of the work of these commissions. I am informed that only recently a carload of the answers to interrogatories submitted by the "Uplift commission of the people of the United States" have been dumped in the Census Bureau of the Department of Congress and Labor for the purpose of tabulation.

I am also informed that clerks have been detailed to work in preparation of what is commonly known as the "Homes Commission report," a report which, in my judgment, ought never to have been printed; and this is all being done without authority of law. Now, this is simply to meet a condition of that kind.

Mr. PERKINS. I ask that the last amendment offered by the gentleman be again reported.

The SPEAKER. The Clerk will again report the proposed order.

The proposed order was again read.

Mr. TAWNEY. Mr. Speaker, at the suggestion of some gentlemen around me, I would ask to withdraw the words "in specific terms."

The SPEAKER. The gentleman modifies his request as indicated. The Chair wants to understand the request. The gentleman now asks that it shall be in order under this order to move this as an amendment upon the sundry civil appropriation bill.

Mr. TAWNEY. In Committee of the Whole.

The SPEAKER. In Committee of the Whole.

Mr. HEPBURN. I would like to ask the gentleman from Minnesota why he uses the words "be authorized by Congress?" What does he mean by that?

Mr. TAWNEY. "Authorized by law" is what I mean.

Mr. HEPBURN. There is a great difference between the two. One might mean a statute and the other a resolution of the two Houses of Congress.

Mr. TAWNEY. I modify it so that it shall read "authorized by law."

The SPEAKER. The gentleman moves to strike out the word "Congress" and insert "authorized by law."

Mr. GAINES of Tennessee. Does this proposition deprive a Member of the right to object to this matter if it is offered in Committee of the Whole on the sundry civil bill?

Mr. TAWNEY. This makes it in order to be considered as an amendment to the sundry civil bill. The merits of the proposition will be considered at the time it is offered to the sundry civil bill.

Mr. GAINES of Tennessee. I think it strikes at an evil; but I want to ask my friend, Can not a similar provision be also reported to the House to regulate this express matter that we had under discussion yesterday?

Mr. TAWNEY. A similar proposition could be offered, but whether it would be agreed to is another matter.

Mr. GAINES of Tennessee. I will ask if he will not offer a similar provision?

Mr. TAWNEY. Is there objection, Mr. Speaker?

Mr. GAINES of Tennessee. I withdraw whatever objection I might have, because I am for the resolution.

Mr. PARSONS. I object.

Mr. TAWNEY. Mr. Speaker, I move to suspend the rules and adopt the resolution which I have just sent to the Clerk's desk.

Mr. UNDERWOOD. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. UNDERWOOD. I am not opposed to this resolution of the gentleman from Minnesota. I am for it, but I would like to inquire of the Chair under what authority the gentleman from Minnesota is allowed to move to suspend the rules?

The SPEAKER. This is one of the last six days.

The Clerk will report the resolution as presented.

The Clerk read as follows:

House resolution 593.

Resolved, That it shall be in order to offer as an amendment to the sundry civil appropriation bill in Committee of the Whole House on the state of the Union, the following:

SEC. —. That hereafter no part of the public moneys, or of any appropriation heretofore or hereafter made by Congress, shall be used for the payment of compensation or expenses of any commission, council, board, or other similar body, or any members thereof, or for expenses in connection with any work or the results of any work or action of any commission, council, board, or other similar body, unless the creation of the same shall be or shall have been authorized by law; nor shall there be employed by detail, hereafter or heretofore made, or otherwise personal services from any executive department or other government establishment in connection with any such commission, council, board, or other similar body.

The SPEAKER. Is a second demanded?

Mr. PARSONS. I demand a second.

Mr. TAWNEY. I ask unanimous consent that a second may be considered as ordered.

Mr. DOUGLAS. Is next Thursday a legislative day in the Sixtieth Congress or not?

The SPEAKER. The last legislative day is the 3d of March, and the last calendar day is the 3d.

Mr. DOUGLAS. Another parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. DOUGLAS. If this motion to suspend the rules and pass this order be carried, will that prevent a suggestion in the committee that this is out of order?

The SPEAKER. Absolutely. While the Chair has not been informed, the Chair presumes that the purpose is to make this in order to be considered by way of motion and amendment on the sundry civil bill. The gentleman from Minnesota [Mr. TAWNEY] asks unanimous consent that a second be considered as ordered. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Minnesota is entitled to twenty minutes and the gentleman from New York [Mr. PARSONS] to twenty minutes.

Mr. TAWNEY. Mr. Speaker, the only purpose of this is to make in order what I have sent to the desk as an amendment to the sundry civil appropriation bill, so that it may be considered in Committee of the Whole, when the merits of the proposition can be considered. I think the matter is of sufficient importance to deserve careful consideration on the part of the House. In order that it may be considered, I have offered this rule, which will make it in order, and have moved the suspension of the rules for that purpose.

Mr. SMITH of California. Mr. Speaker, will the gentleman yield to a question?

Mr. TAWNEY. Yes.

Mr. SMITH of California. Does the gentleman intend to press this in Committee of the Whole to-day, or will it go over until to-morrow, in order that we may have the resolution before us and know the exact scope of it?

Mr. TAWNEY. It will be offered as a separate section to the sundry civil appropriation bill and will come up at the end of the bill. If we conclude consideration of the bill before we adjourn to-day, it will be considered to-day. If not, it will have to go over until later.

Mr. SMITH of California. You do not intend to call it up immediately to-day?

Mr. TAWNEY. No; it will be considered in its regular order. I reserve the balance of my time.

The SPEAKER. The gentleman from New York [Mr. PARSONS] is recognized for twenty minutes.

Mr. PARSONS. Mr. Speaker, the object of this rule is to make it possible on the sundry civil bill to legislate so that we will not have the advantage of any voluntary commission, such as the council of fine arts which the President recently created, a voluntary commission composed of a lot of men interested in architecture, and art experts, who were willing to give the Government free the advantage of their services. The other day a limitation was put on this bill which might seem to accomplish that purpose, but the limitation is not worth the paper it is written on after the 4th of March, because it is limited to the executive order of President Roosevelt; and if the President-elect wishes to issue a different order accomplishing in another way the same purpose, the limitation in the act would not prevent. Therefore this provision, or some such pro-

vision as is contemplated by this resolution, is necessary to effectually carry out a similar purpose to the one involved in that limitation.

I think that of the many splendid things the President has done the establishment of this voluntary council of fine arts is one of the best; and I think when we can have the advantage of the free service of these men, we at least ought to be willing to accept it. I would not object to a provision that unless specially authorized by Congress these people should not be paid, but I do object to the provisions in this resolution whereby we can not have the advice of experts on any subject even if they are willing to give it free.

Mr. TAWNEY. Will the gentleman permit an interruption?

Mr. PARSONS. Certainly.

Mr. TAWNEY. Is the gentleman aware that the law to-day prohibits in express terms the acceptance of voluntary service on behalf of the Government by any officer of the Government?

Mr. PARSONS. Why, then, is your amendment necessary?

Mr. TAWNEY. This amendment becomes necessary because of the fact that this work is required of the employees in the various departments of the Government.

The voluntary commissions gather a lot of general data all over the United States which is absolutely valueless in the form in which it is obtained, and then it is dumped into the department, and the time of the employees is used for the purpose of working out in detail and tabulating and classifying the information and data that is thus obtained, and imposes upon the department and upon the clerks an extra burden. It is true that some of the clerks in the department have done this work out of hours; but by what right can we require, or should we require, these people to perform these services in their own time?

Mr. DOUGLAS. Will the gentleman from Minnesota yield for a question?

Mr. PARSONS. The gentleman from Minnesota has not the floor.

Mr. TAWNEY. Mr. Speaker, I have nothing further I care to say on the resolution.

Mr. PARSONS. Mr. Speaker, I will yield three minutes to the gentleman from New Jersey.

Mr. PARKER. Mr. Speaker, I have a great objection to putting provisions upon an appropriation bill which are not understood and may go a great deal farther than they are expected to go. It is beyond all question that every now and then, in every department, things do not always go right, and the President or the head of the department appoints a so-called "committee" or "commission," whatever it may be—sometimes volunteers outside, of experts, and sometimes of clerks within—to investigate and report. If it be a matter that is germane to the work of that particular department, whether it be the War or the Navy or the fortifications or of the Interior, it is right; and any provision put upon this bill that will prevent a complete, honest investigation and the uses of the forces of the Government, clerical or otherwise, to tabulate their results is wrong, and I object to its being taken up on an appropriation bill. It is a kind of provision that ought to be considered by a committee reporting specifically, with a special report by the committee adopted in this House as a bill, and with the power of amendment, and not stuck in under the five-minute rule to hamper the Executive in the management of this Government. That is why I object to it. [Applause.]

Mr. TAWNEY. Mr. Speaker, I want to emphasize this fact. The adoption of this order will not in any way interfere with a full and free discussion and consideration of this provision on its merits when it is proposed and offered to the sundry civil bill in the Committee of the Whole House. It will be subject to amendment, and full opportunity afforded for discussion and consideration.

Mr. PARSONS. Will the gentleman yield? Would not this prevent such work being performed as is performed by the natural conservation commission?

Mr. TAWNEY. I will answer the gentleman when we come to consider the proposition on its merits.

Mr. PARSONS. The gentleman asked me a question, and why will he not answer mine?

Mr. TAWNEY. I would first have to inquire as to authority under the law for the conservation commission to dump any work on the department. If it is created by authority of law, then this would not interfere with it.

Mr. PARSONS. But if it is not created by authority of law?

Mr. MANN. Then it has no business to exist.

Mr. TAWNEY. What right has it, if not created by authority of law, to demand of the executive department the time and service and money of the Government?

Mr. PARSONS. It does not demand it, but it gets information for the department, as individuals can.

The SPEAKER. The question is on agreeing to the motion.

The question was taken; and on a division (demanded by Mr. PARSONS) there were—140 ayes and 60 noes.

Mr. PARSONS. Mr. Speaker, I demand the yeas and nays.

The SPEAKER. The gentleman from New York demands the yeas and nays. All those in favor of taking the yeas and nays will rise. [After counting.] Sixteen gentlemen have arisen, not a sufficient number. The yeas and nays are refused. Two-thirds having voted in favor thereof, the motion is agreed to.

FEARON, DANIEL & CO.

By unanimous consent the reference of the joint resolution (S. R. 83) for the relief of the firm of Fearon, Daniel & Co., of New York and Shanghai, was changed from the Committee on Claims to the Committee on Foreign Affairs.

WITHDRAWAL OF PAPERS.

Mr. FULLER, by unanimous consent, was given leave to withdraw from the files of the House, without leaving copies, the papers in the case of Matilda B. Aldrich (H. R. 15355), no adverse report having been made thereon.

Also, to withdraw from the files of the House, without leaving copies, the papers in the case of Forest M. Lentz (H. R. 23906), no adverse report having been made thereon.

Also, to withdraw from the files of the House, without leaving copies, the papers in the case of David A. Funk (H. R. 27564), no adverse report having been made thereon.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. TAWNEY. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the sundry civil appropriation bill (H. R. 28245).

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. WATSON in the chair.

Mr. TAWNEY. Mr. Chairman, I withdraw the point of order which I made last night to the amendment offered by the gentleman from Illinois.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois, and, without objection, the amendment will be again reported.

There was no objection, and the clerk read as follows:

To follow line 9, page 75, insert:

"Authority is hereby given the accounting officers of the Treasury Department to allow and credit in the accounts of Commander L. C. Heilner, U. S. Navy, inspector of the thirteenth light-house district, for the fiscal year ended June 30, 1906, the sum of $625 paid by him from the appropriation 'Supplies of light-houses, 1906,' for raising the light-house tender Manzanita."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

For any special surveys that may be required by the Light-House Board or other proper authority, and contingent expenses incident thereto, including expenses of surveys in aid of the shellfish commission of the State of Maryland, which expenses, including cost of plats and charts, shall not exceed $15,000 in any one year, to be immediately available, $20,000.

Mr. COX of Indiana. Mr. Chairman, I reserve the point of order on that paragraph for the purpose of getting some information. I would like to ask the gentleman in charge of the bill what is meant by the language, "included expenses of surveys in aid of the shellfish commission of the State of Maryland?"

Mr. TAWNEY. Mr. Chairman, three or four years ago Congress passed a law authorizing the Coast and Geodetic Survey to make certain surveys of the oyster beds in the State of Maryland, and we have been expending about $15,000 a year for that purpose.

Mr. COX of Indiana. Ever since Congress passed its first act?

Mr. TAWNEY. Ever since Congress passed the first act, and this is the provision I have on several occasions referred to as illustrating the fact that in this day of ours the States are even willing to surrender sovereignty over their own territory in order to get an appropriation out of the Federal Government.

Mr. COX of Indiana. Do I understand the gentleman to say that the State of Maryland is working in connection with the Federal Government in this particular instance?

Mr. TAWNEY. The work is being done, as I understand it, jointly by the State and the Federal Government; but the Federal Government, under that law as I now recall it, has complete control and supervision over the work. The triangu-

lation is all done by the officers and scientific men of the Coast and Geodetic Survey.

Mr. COX of Indiana. Does the Government appropriate all the money for this purpose, or is a part of the money appropriated in the State of Maryland?

Mr. TAWNEY. I do not know whether the State of Maryland appropriates or how much it appropriates. This appropriation is expended in the payment of compensation to government officials or employees engaged in that work.

Mr. COX of Indiana. Then, as I understand the gentleman, there is an organic statute or law authorizing the appropriation for this work.

Mr. TAWNEY. Oh, yes; Congress passed the law, or this appropriation would not be made.

Mr. GILL. I would state to the gentleman from Indiana that the State of Maryland does contribute toward the work.

Mr. COX of Indiana. How much does the State of Maryland pay in connection with the Government each year?

Mr. GILL. The State pays about $20,000 a year.

Mr. COX of Indiana. Since this work first began?

Mr. GILL. Yes; since the work first began—more than the Government pays.

Mr. COX of Indiana. I withdraw the point of order.

The Clerk read as follows:

The Secretary of Commerce and Labor, at his discretion, may grant to officers of the field force of the Coast and Geodetic Survey on duty in the Philippine Islands, at one time the whole or any portion of the annual leave hereafter accrued and unused during a period of three years.

Mr. GARRETT. Mr. Chairman, I reserve the point of order on the paragraph just read.

Mr. TAWNEY. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

On page 78, line 19, after the word "may," insert the word "hereafter," and in line 21 strike out the word "hereafter."

Mr. GARRETT. Mr. Chairman, how much time do they have now?

Mr. TAWNEY. Mr. Chairman, their leave, if serving in the United States, is thirty days annually. In the Philippine Islands, owing to the fact that the weather is such that they can work all the time over there, in the three years that they are detailed for service they get practically no leave whatever. Now, they do not get additional compensation, as the officers of the army and navy do who are serving in the Philippines.

They get the same compensation that the officers of the Coast and Geodetic Survey get if they were serving in the field in the United States, but service there for a period of three years that these men are detailed for necessarily has an injurious effect upon the men, and then they have lost their leave and they have no time to their credit when they get home in which they can recuperate, and they have to take whatever they do at their own expense. It applies only to a few people who are detailed from the Coast and Geodetic Survey to service in the Philippine Islands.

Mr. GARRETT. It enables them to have all of their leave at once where they have not used it?

Mr. TAWNEY. Yes; they can accumulate only for three years.

Mr. GARRETT. To secure a much-needed rest. I withdraw the point of order.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

That no part of the money herein appropriated for the Coast and Geodetic Survey shall be available for allowance to civilian or other officers for subsistence while on duty at Washington (except as hereinbefore provided for officers of the field force ordered to Washington for short periods for consultation with the superintendent), except as now provided by law.

Mr. TAWNEY. Mr. Chairman, I ask now to return to the bottom of page 63, to the paragraph beginning at the bottom of page 63.

The CHAIRMAN. The gentleman from Minnesota moves to return to the paragraph at the bottom of page 63.

Mr. TAWNEY. I ask that that paragraph be again read; it was read last evening.

The CHAIRMAN. Without objection the paragraph will be again read.

There was no objection.

The Clerk read as follows:

No part of any money appropriated by this act shall be used in payment of compensation or expenses of any person detailed or transferred from the Secret Service Division of the Treasury Department, or who may at any time during the fiscal year 1910 have been employed by or under said Secret Service Division.

Mr. BENNET of New York. Mr. Chairman, I make the point of order against the provision that it is contrary to existing law and therefore not in order under Rule XXI, and I desire to be heard briefly on the point. I say frankly to the Chair that the question as to whether this is subject to the point of order is not free from doubt even in my own mind. Last year the provision was held to be in order, but at that time the attention of the Chair was not called to section 166 of the Revised Statutes of the United States, which authorizes the head of any department to transfer clerks within the department as he sees fit. That is the substance of the statute. This provision will prohibit the Secretary of the Treasury from utilizing in any way the operatives of the Secret Service Division or the clerical force, and there seems to be some slight distinction——

The CHAIRMAN. To what section is the gentleman referring?

Mr. BENNET of New York. To section 166 of the Revised Statutes.

Mr. TAWNEY. It may perhaps aid the Chair and perhaps the gentleman from New York if I call his attention to the fact that the services of no clerks are paid out of this appropriation, and these employees or operatives or per diem employees in the Treasury Department are not clerks.

Mr. BENNET of New York. In connection with that I will call the attention of the Chair to the unbroken line of decisions that anything inserted in an appropriation bill which is contrary to the construction of a statute which has been adopted by the head of a department comes under the inhibition. Now, the Secretary of the Treasury has construed the operatives in the Treasury Department to be clerks, and therefore under these rulings, which are an unbroken line, the point made by the gentleman from Minnesota is of no effect.

Mr. SHERLEY. Mr. Chairman, I desire to call the attention of the Chair to the fact that this limitation does not say that the transfer shall not be made; it simply limits the money. It is in the power of the Congress to refuse to appropriate any money, and it is clearly in the power of the Congress to say that that money shall not be paid under certain conditions.

The CHAIRMAN. The Chair is very clear on the proposition. The Chair thinks it is not subject to the point of order. It does not seek to change existing law. Congress has the right to appropriate or not to appropriate even for a lawful purpose, and it is not necessary to decide whether the transfer is lawful or unlawful. This is simply a withholding of money from certain persons under certain conditions as Congress has the right to do, without discussing the legality of the transfer of clerks. The Chair thinks it is not subject to the point of order and therefore overrules the point of order.

Mr. BENNET of New York. Mr. Chairman, as I said in the beginning, I thought it my duty to submit to the Chair the statute which last year had not been brought to the attention of the Chair at the time of the ruling. I now move, Mr. Chairman, to strike out the entire provision, and I should like to ask unanimous consent, in view of the rather general interest in the subject, to proceed strictly upon the motion and upon the subject-matter of the limitation for forty minutes.

The CHAIRMAN. The gentleman from New York asks unanimous consent to speak for forty minutes. Is there objection?

Mr. FITZGERALD. Mr. Chairman, I suggest that instead of making that request the gentleman from New York make a request that some time be fixed for the discussion of this paragraph, and to divide it between those who favor his motion and those opposed to his motion.

Mr. BENNET of New York. I will say very frankly to my colleague that this is not a question of there being sides, as far as I know.

Mr. TAWNEY. Some are for and some against.

Mr. FITZGERALD. The gentleman moves to strike out this paragraph. I am opposed to that motion, and that constitutes sides at once. I make that suggestion in an effort to facilitate the consideration of the matter. If the gentleman is to take forty minutes, I have no objection to him occupying all the time he pleases.

Mr. BENNET of New York. My only objection to that would be that I have not consulted at all with gentlemen on this side.

Mr. NORRIS. Will the gentleman permit a suggestion?

Mr. BENNET of New York. Certainly.

Mr. NORRIS. I will suggest that, because he has not consulted, it might be well to bear in mind the suggestion made by the gentleman from New York. I presume there are quite a number of Members who think as the gentleman who makes the motion thinks, namely, that this paragraph ought to be stricken out, and would like to take part in the discussion. Now, if the gentleman consumes forty minutes, the probabilities are that unless agreement is made he will be the only one who will be

allowed to speak on this side of the question, because if forty minutes are taken on the other side it will be quite a lengthy discussion. I do not know that I care to speak.

I would not object to the gentleman taking the time, because I know he has given it study and it will be interesting, but I anticipate there are quite a number of Members who want to be heard on that side of the question.

Mr. GAINES of Tennessee. Mr. Chairman, I want to say to the gentleman that I do not know whether I agree to the limitation without further limitation, and that I shall propose to discuss the matter some, too. So I do not want him to consume all the forty minutes of time, and so far as that request is concerned I now object. I am willing that the gentleman shall go ahead fifteen or twenty minutes.

Mr. TAWNEY. Mr. Chairman, I submit that in lieu of the request of the gentleman from New York we allow two hours and a half for the discussion of this motion to strike out this provision, one-half of that time to be under control of the gentleman from New York [Mr. BENNET] and one-half under the control of myself.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that the debate on this amendment shall close in two hours and thirty minutes, one-half of the time to be controlled by the gentleman from New York [Mr. BENNET] and one-half by the gentleman from Minnesota [Mr. TAWNEY]. Is there objection?

Mr. HEPBURN. Why would it not be well to let the debate go on under the five-minute rule for a time?

Mr. TAWNEY. I will say to the gentleman from Iowa that I would be perfectly willing to do that if it were not for the fact that the House should, if possible, conclude the consideration of this bill at this sitting, in order that the Senate may have some time for the consideration of its various provisions and amendments thereto. It is my desire and the desire of the Senate that it shall have the bill as soon as possible. I am afraid if the debate runs along in that way we will consume perhaps all day. I am perfectly willing to allow liberal time for discussion, and I think that two hours and thirty minutes is very liberal time for that; but I do not want to sacrifice the opportunity of getting, if possible, this bill through the House to-day by taking up all the time for consideration of this provision.

The CHAIRMAN. Is there objection?

Mr. COCKRAN. What is the proposition, Mr. Chairman?

The CHAIRMAN. The proposition of the gentleman from Minnesota [Mr. TAWNEY] is that the debate on the pending paragraph shall be limited to two hours and a half.

Mr. TAWNEY. Paragraph and amendments.

The CHAIRMAN. Paragraph and amendments thereto; to be equally divided between the two gentlemen, the time to be controlled by the gentleman from New York [Mr. BENNET] on the one side and the gentleman from Minnesota [Mr. TAWNEY] on the other. Is there objection? [After a pause.] The Chair hears none.

The gentleman from New York [Mr. BENNET] is entitled to seventy-five minutes.

Mr. BENNET of New York. Mr. Chairman, because of the limitation which has been placed upon the debate, and which I recognize to be necessary at this late hour in the session, I shall do what I have never done in my service before in the House—that is, to refuse interruptions, except that as I proceed I desire any member of the Committee on Appropriations to feel at perfect liberty to interrupt me at any time for the correction of a statement of fact.

Mr. Chairman, the history of the secret-service provision is not without interest. That service is now in its forty-fourth year. Not for one single moment has it been authorized by express statute. Each year as it has been carried in the appropriation bill it has been subject to the point of order, and if anyone last evening had desired to end the Secret Service as at present constituted, so far as detection of counterfeiting is concerned and the other objects mentioned on page 63, a simple point of order would have accomplished that for the time being at least. Therefore, during each of these forty-three years, if the service has been in any way abused, it has been within the power not only of a majority of Congress but of any one Member, without even disclosing the reason, to end that particular branch of the public service by his individual negative. That that has not been done furnishes pretty fair evidence, I think, that the service has been, on the whole, satisfactory.

The accomplishments of the service are summed up in the President's message of January 4, which I shall read:

SECRET SERVICE.

Last year an amendment was incorporated in the measure providing for the Secret Service, which provided that there should be no detail from the Secret Service and no transfer therefrom. It is not too much to say that this amendment has been of benefit only, and could be of benefit only, to the criminal classes. If deliberately introduced for the purpose of diminishing the effectiveness of war against crime it could not have been better devised to this end. It forbade the practices that had been followed to a greater or less extent by the executive heads of various departments for twenty years. To these practices we owe the securing of the evidence which enabled us to drive great lotteries out of business and secure a quarter of a million of dollars in fines from their promoters. These practices have enabled us to discover some of the most outrageous frauds in connection with the theft of government land and government timber by great corporations and by individuals. These practices have enabled us to get some of the evidence indispensable in order to secure the conviction of the wealthiest and most formidable criminals with whom the Government has to deal, both those operating in violation of the antitrust law and others. The amendment in question was of benefit to no one excepting to these criminals, and it seriously hampers the Government in the detection of crime and the securing of justice. Moreover, it not only affects departments outside of the Treasury, but it tends to hamper the Secretary of the Treasury himself in the effort to utilize the employees of his department so as to best meet the requirements of the public service. It forbids him from preventing frauds upon the customs service, from investigating irregularities in branch mints and assay offices, and has seriously crippled him. It prevents the promotion of employees in the Secret Service, and this further discourages good effort. In its present form the restriction operates only to the advantage of the criminal, of the wrongdoer.

Leaving out of the question for the moment the conclusions drawn by the President, there is none among us who will contend that the service, as detailed here by the President, is one as to which there is any dispute as to the past.

Mr. WALDO. Will the gentleman allow a question?

Mr. BENNET of New York. Before the gentleman came in I declined to yield to anyone.

Mr. WALDO. I would like to rise to a parliamentary inquiry.

The CHAIRMAN (Mr. CAPRON). The gentleman from New York declines to yield.

Mr. WALDO. I desire to make a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WALDO. I desire to submit whether it is within the parliamentary privilege of the gentleman to read here matter that has been declared to be a breach of the privilege of the House, that has been laid upon the table, and which this House has refused to receive.

The CHAIRMAN. The Chair has no hesitation in saying that so far as the gentleman has read the Chair sees no reason why he should not include that statement as a part of his remarks.

Mr. BENNET of New York. Mr. Chairman, this limitation which I now move to strike out was the first limitation in the history of the Secret Service that has been placed upon the men. In 1882, accepting the date supplied by the gentleman from Iowa, a limitation was placed upon the appropriation up to a certain extent; but never in the whole forty-four years had theretofore any attempt been made to limit any department of the Government in the use of these per diem operatives. If they were needed, and if the department desired to use them, if it had the appropriation, it had the right to send to the Secret Service and obtain these men. Therefore it seems to me that the settled practice of forty-four years ought not to have been lightly overturned. Last night the gentleman from Kentucky [Mr. SHERLEY] stated in this House, and he stated correctly, that, in his judgment, the Committee on Appropriations was overworked and did not have time to give to all the subjects of legislation which, as he put it, were put upon it by the inaction of other committees. No better example of the truth of that remark could have been found than the action of the Committee on Appropriations in relation to this particular limitation.

Mr. FITZGERALD. Mr. Chairman——

Mr. BENNET of New York. Under my statement, I yield to the gentleman.

Mr. FITZGERALD. To keep the gentleman's facts straight, I desire to say I dissent from the statement of the gentleman from Kentucky. I am not overworked on the Committee on Appropriations.

Mr. BENNET of New York. Well, I am sorry to see a division in the committee, and for the moment I agree with the gentleman from Kentucky rather than with my friend from New York. Now, my friend from New York was overworked in relation to this particular matter. He is usually an accurate man, and I will just show what he did:

Mr. FITZGERALD. The Secret Service Division has an eligible list of 304.

That is an exact statement which the House had a right to assume the gentleman knew. As a matter of fact, the eligible list at that time was nearly 3,000; and now I will tell my colleague where he got that figure, as he can not tell me. He will find it in the hearings on the sundry civil bill last year in the testimony of Mr. Moran, and that is what those figures are that my friend gave to the House as the number of men on the waiting list. Each man that applies for a position in the Secret Service has to file a written application. That form is numbered,

and the number of that form is 304, and the gentleman from New York had the facts so little in mind that in giving the House that important fact he gave as the number on the eligible list the printed number of the blank form of application. [Laughter.] I think that is very fair evidence that he has been overworked. [Laughter.]

Mr. FITZGERALD. The gentleman's statement is so misleading that he ought to allow me to correct it.

Mr. BENNET of New York. My friend has the RECORD, which he may read.

Mr. FITZGERALD. It is true that there are over 3,000 applications filed and, as I recollect, and as I think the RECORD will show, the number stated by me was the number of those examined and approved by the secret-service men and put on a select list to be selected on occasions when additional men were required. Not only that, but that information is further strengthened by a statement made to me by one of the Secretaries of the Treasury when I applied on behalf of men who wanted to be appointed in the service.

Mr. BENNET of New York. That is a pretty light reply to a question relating to the condition on the 1st of May, 1908, and if my colleague desires me, I will print in the RECORD and give the page where the information is on which he based his statement.

Mr. FITZGERALD. I think the gentleman had better permit me to state the page from which I got the information on which I made my statements.

Mr. GAINES of Tennessee. Before the gentleman proceeds——

Mr. BENNET of New York. I am not yielding to anyone.

Mr. GAINES of Tennessee. Just a moment.

Mr. BENNET of New York. No; I decline to yield to anyone.

The CHAIRMAN. The gentleman declines to yield.

Mr. BENNET of New York. I desire to take up, because it seems to be important, the various reasons assigned by the several members of the committee both last year and this, for this limitation, both in the hearings and on the floor. And as I have made one statement in relation to my colleague, I will read another:

> Numerous instances have come to the observation of many Members of the House where this secret-service force has been employed upon service upon which they should not have been employed.

This is not a matter hidden in a corner. There has been broad general interest. Hearings have been held, in which both my colleague and his colleagues upon the committee have taken a great interest. Not one single Member of the House, either before the committee or on the floor or in the public print has related one single alleged improper use, with one exception, to which I shall refer in connection with the gentleman from Kentucky, during all this time; and I say to my colleague that the Members of this House, being here under the responsibility of their oaths, their names being evidently in his possession, some of the "numerous Members," let some man on either side of this Chamber (because this is the same Congress and practically the same membership) rise in his place in these two hours and a half and state one single instance which justifies the statement of my colleague. If he does that, it will be some proof that the action of this committee was warranted.

Now, the gentleman from Kentucky [Mr. SHERLEY] made the statement last year (and if I do not give the substance of his statement correctly I will ask him to correct it)—he stated in substance that members of this force had been used to look into the personal conduct of Members of Congress. I assume from his lack of dissent that I am stating the substance of his remark.

Mr. SHERLEY. The gentleman is making an assumption which is not warranted by my silence. I do not desire to interrupt the gentleman. What I said is of record, has been twice given to this House, and speaks for itself. If the gentleman desires to be absolutely accurate, and I presume he does, he will not attempt to give the substance of my statement, but will read it. [Applause.]

Mr. BENNET of New York. I shall do so if the gentleman desires:

> Mr. SHERLEY. The gentleman may be aware of the fact that this Secret Service at one time was used for the purpose of looking into the personal conduct of a Member of Congress, notwithstanding the gentleman seems to think they are answerable to no one.

There can be no doubt as to the accuracy of that, and it is substantially what I have just stated. I denied last year to the gentleman that any such use had ever been made of the Secret Service. The President of the United States has since denied it; the Chief of the Secret Service has explicitly denied it in the hearings.

Mr. DOUGLAS. So has the Attorney-General.

Mr. BENNET of New York. I am informed that the Attorney-General has denied it, although I do not know how it could be within his knowledge; and I say to the gentleman from Kentucky that until this time there has been no proof whatever of a fact which was evidently not within his personal knowledge.

Mr. SHERLEY. If the gentleman will permit, I some months ago called attention to the specific case, citing the Senate document, the volume and the page, and I still insist that the reading of that document substantiates the statement made by me. That is a matter again of record which can be verified.

Mr. BENNET of New York. This was the case to which I referred in my remarks in relation to my colleague, a case which happened in the early seventies, as I recall. There was an investigation of an error in enrolling, directed at the request of the then chairman of the Committee on Appropriations. The contention of the gentleman from Kentucky is as to this matter, thirty-odd years old, that before the chairman of the Committee on Appropriations directed it an independent investigation had been commenced by the Secret Service without the direction of anyone.

Now, I desire to say as to that that if the gentleman from Kentucky will put into the record anywhere, any time, proof of that particular, it will be proof that that particular instance cited by him is correct. But assuming it to be correct, that was not the contention of the gentleman from Kentucky. Here was a crime charged. The "personal conduct" of Members, I assume from knowledge of my colleagues, does not embrace the idea of crime. It embraces the "shadowing" of us in coming and going, and particularly if it should happen, as I hope it does not, that any of us should be where we did not desire to be seen; the following of us to such places. That was my understanding of the remarks of the gentleman from Kentucky, and I think it was the understanding of the House.

Of course, if the gentleman means to include the obtaining of evidence against Members of either branch of Congress accused of a crime, then his statement also was correct in relation to the Senator and Member who, after accusations of crime, were indicted and convicted upon evidence supplied largely through the efforts of the Secret Service.

Now, the gentleman from Iowa [Mr. SMITH] made quite a point on the 8th of January of the fact that 30 indictments had been found in Colorado——

Mr. SMITH of Iowa. I did not mention such a subject on the 8th of January.

Mr. BENNET of New York. But the gentleman——

Mr. SMITH of Iowa. Read the RECORD of the 8th of January, which will show the gentleman's accuracy.

Mr. BENNET of New York. The gentleman mentioned on the 8th of January—the gentleman can perhaps be technical——

Mr. SMITH of Iowa. I can be accurate, and ask the gentleman from New York to be the same.

Mr. BENNET of New York (continuing). That indictments obtained on evidence secured by efforts of the Secret Service were dismissed.

Mr. SMITH of Iowa. I ask the gentleman to cite a word bearing any resemblance to that in my speech of the 8th of January.

Mr. BENNET of New York. If I can not, I will rise in my place here and publicly apologize to the gentleman from Iowa.

Mr. SMITH of Iowa. I hope the gentleman will do so.

Mr. BENNET of New York. I will do so.

Mr. COOK of Colorado. Will the gentleman yield for a question?

Mr. BENNET of New York. I decline to yield. The gentleman from Iowa—always subject to correction—stated in his remarks, which I am citing of course from memory, because the time is too short to turn to each individual one, the fact that these prosecutions in land suits were not made by men assigned to the Department of the Interior——

Mr. SMITH of Iowa. That statement was not made by me.

Mr. BENNET of New York (continuing). Under the Secretary of the Interior——

Mr. SMITH of Iowa. That statement was not made by me.

Mr. BENNET of New York. The gentleman recollects his speech?

Mr. SMITH of Iowa. The gentleman from Iowa has a distinct recollection of what his speech contains. I did state that there had been only one man assigned from the Secret Service to the Interior Department, and that is the only resemblance to anything the gentleman has just stated was in the speech.

Mr. BENNET of New York. That is sufficient for the purpose——

Mr. SMITH of Iowa. If the gentleman from New York deems that that is what he said, well and good.

Mr. BENNET of New York (continuing). That is sufficient for the present purpose and, if the other statement is incorrect, I will follow out the statement I have just made to the gentleman. That statement made by the gentleman from Iowa, standing alone, is absolutely correct. There was but one man assigned to the Department of the Interior, and his name was Burns, and he was assigned about the year 1903.

Mr. TAWNEY. Will the gentleman permit an inquiry?

Mr. BENNET of New York. Yes.

Mr. TAWNEY. Does the gentleman mean to say that he was assigned to the department? Did he not go entirely from the Secret Service, and was he not appointed originally in the Department of the Interior?

Mr. BENNET of New York. He was, first, for a short time assigned and then absolutely taken over into the Department of the Interior, and that is the basis of the statement of the President that that was done because Secretary Hitchcock did not have confidence in his own force.

Mr. SMITH of Iowa. And that they were under the control of land thieves, but have not yet been separated from the public service in the intervening year.

Mr. BENNET of New York. An agent in charge of that division, as the gentleman's hearings will disclose, was separated, and Secretary Garfield so states in his testimony. There has been so much said based on Secretary Garfield's testimony that the prosecution of land frauds was never hampered that I think the House ought to know the facts. When I was a law student I was told the story, as nearly everyone was, of the Irishman who was charged with stealing a ham. Three witnesses were called who saw him steal the ham, and he asked an adjournment so that he could bring 20 witnesses who had not seen him steal the ham. The Committee on Appropriations have called the witnesses who did not see the ham stolen. Secretary Garfield did not initiate these prosecutions. It is quite true that the prosecutions were not carried on under the Department of the Interior; but the whole fact ought to be laid before Congress—that there were land prosecutions and that they did cost money and that they were carried on under the Department of Justice. In the hearings the name of the special attorney who prosecuted is mentioned, a Mr. Rush. I sent to Mr. Rush and obtained his statement as to the effect of this legislation, and I will ask the Clerk to read the letter from Mr. Rush in my time.

The Clerk read as follows:

DEPARTMENT OF JUSTICE,
Omaha, January 7, 1909.

Hon. WILLIAM S. BENNETT,
House of Representatives, Washington, D. C.

DEAR SIR: I am in receipt of your letter dated January 1, 1909, addressed to me at Washington, and which was forwarded to me from there, in which you request information relative to prosecutions in land-fraud cases, wherein secret-service agents have been employed, and in reply I have the honor to report that since May, 1905, I have been employed by the Government as a special assistant attorney in the prosecution of land-fraud cases, and I herewith append a brief summary of the cases, civil and criminal, disposed of in which I have cooperated with United States attorneys in the several districts. The evidence in all of this litigation was procured by agents of the secret service, cooperating with special agents of the Interior Department.

In reply to your inquiry as to the kind of work performed by secret-service agents, you are advised that their work consisted mainly in locating the whereabouts of the several entrymen and procuring the statements of such entrymen, giving the circumstances under which they made entries of the public lands; interviewing and taking statements of other persons who had knowledge of the fraudulent character of such entries; locating fence lines unlawfully inclosing public lands and assisting in making a survey thereof and investigating the fraudulent character of the several entries within such inclosures; and generally procuring the several links of testimony required in such prosecutions.

In answer to your second inquiry as to how the secret-service agents compared with the agents of the General Land Office, permit me to say that until within the past few years the agents employed by the General Land Office were mostly old men whose work had been theretofore largely confined to hearings before the various land offices and other official routine work. They were not, therefore, familiar with the character of testimony necessary to be produced in the actual trial of land-fraud cases. The agents of the Secret Service were more active and energetic and entirely familiar with the procuring of evidence in the trial of cases, for under their employment their duties had consisted chiefly of this class of work. The appropriations and the small number of men employed by the Interior Department rendered it very difficult to secure the assistance from that office adequate to a proper investigation of these land frauds. I found, however, in my contact with these special agents of the Interior Department that there were some able and effective agents in securing evidence, yet that force had been organized largely through the efforts of the Secretary of the Interior, separate and apart from the General Land Office, and were designated as special inspectors to the Secretary of the Interior; but at the same session of Congress limiting the assignment of secret-service men (pt. 1, p. 328, Stat. L., 1907–8) a limitation was placed upon this force of men, reducing the number of inspectors to two, "whose employment shall be limited to the inspection of offices and the work in the several offices under the control of the Department of the Interior" (pt. 2, p. 223, Stat. L., 1907–8).

In view of these agents, skilled in the detection of fraud and crime with respect to the public lands, being confined in their operations to the routine but harmless occupation of inspecting land offices, together with the Government being denied the use of the secret-service agents in these prosecutions, it is apparent to anyone that the result of this action must necessarily impair the Government in the prosecution of cases pending, as well as in the detection of other crimes, and therefore could only be of benefit to the criminal classes.

Much has been stated in the public press about the improper action of the agents of the Secret Service in their work, and in this connection I herewith call attention to an interview by one of the attorneys for Charles T. Stewart, published in the Omaha Daily News under date of January 5, 1909, as follows:

"HARL'S STATEMENT.

"'The method used by the Roosevelt secret-service men in their attempts to manufacture evidence will be shown up in the trial of the Stewart case,' said C. M. Harl, of Harl & Tinley, counsel for Charles T. Stewart in the alleged land-fraud cases.

"'Two old soldiers in Council Bluffs were threatened with prosecution unless they signed affidavits prepared by the detectives, and which the men said were absolutely false.

"'The detectives went to the homes of the men in their absence and told their wives that unless their husbands signed these false affidavits they would be sent to the penitentiary for ten or fifteen years.

"'One of the intimidated men—John Hill, 70 years old—collapsed under the nervous strain, after refusing to sign the prepared affidavit, and died.'"

The utter groundlessness of such statements is apparent when we know the facts. This entryman, John E. Hill, on the 5th day of January, 1906, came to the office of the secret-service agent in Omaha and there made his voluntary statement. On October 16, 1906, he appeared before the United States grand jury in this district, at Lincoln, Nebr., and under oath reaffirmed the truth of the statements made in his affidavit before the secret-service agent, on which evidence an indictment was returned. It is hardly necessary to suggest that he did not fall dead at that time, nor was he apparently suffering from nervous prostration.

In all the large number of cases that I have tried where secret-service agents have been instrumental in securing the evidence, not one instance has yet come to my knowledge, in court or out, where these agents have used improper methods or have tried to induce any person in any manner to testify to anything but the truth.

Trusting that this answers your inquiry sufficiently, I remain,

Very respectfully,

S. P. RUSH,
Special Assistant to Attorney-General.

Mr. BENNET of New York. Mr. Chairman, that letter, which I am sorry is necessarily so lengthy, outlines the method in which these land prosecutions were carried on, naturally carried on, under the Attorney-General, and successfully carried on, as the schedule annexed to that letter shows. The gentleman from Iowa [Mr. SMITH] states that it was not he who alluded to the dismissal of the indictments. It was stated by some member of the Committee on Appropriations, but neglected to be stated, although it was made a ground of criticism, that those indictments dismissed by the judge in Colorado have been reinstated by a reversal by the Supreme Court of the United States.

Mr. FITZGERALD. Mr. Chairman, I made that statement.

Mr. SMITH of Iowa. Ah! Now, does not the gentleman from New York think he better make his apology, in view of the situation?

Mr. BENNET of New York. The gentleman will make it in his own time.

Mr. SMITH of Iowa. Never willing to make it when he ought to make it.

Mr. BENNET of New York. The gentleman will make his apology when it was promised.

Mr. SMITH of Iowa. Certainly he will make it, but not when it is due.

Mr. BENNET of New York. When it is promised is when it is due.

Mr. SMITH of Iowa. Oh, no; not among gentlemen.

Mr. FITZGERALD. I made that statement wholly on the information of the Secretary of the Interior. I had no information then, nor had I until the gentleman just stated it, that those fraud indictments had been reinstated by a reversal of the courts.

Mr. BENNET of New York. Which simply accentuates the point made by the gentleman from Kentucky last night, that the Committee on Appropriations is so overworked that it did not secure the proper kind of information.

Mr. FITZGERALD. Let me say this to the gentleman: The Secretary of the Interior did not state that these indictments were dismissed because of any decision. His statement was that their testimony was so worthless that the indictments could not be brought to trial and were dismissed.

Mr. BENNET of New York. I am not alluding and have not alluded to that particular branch.

Mr. FITZGERALD. But that is the statement I made, and it was not because of a decision of a court that these indictments were dismissed——

Mr. BENNET of New York. And I have not criticised my colleague as yet for making the statement.

Mr. FITZGERALD. I just want to have stated the exact facts.

Mr. BENNET of New York. Therefore he is taking up time that others desire—not myself.

Mr. COOK of Colorado. Will the gentleman from New York yield to a question?

Mr. BENNET of New York. No; I have refused to yield to anyone except the members of the Committee on Appropriations. And I will accept the suggestion of the gentleman from Iowa [Mr. SMITH], and publicly apologize, on the statement of my colleague that it was he and not the gentleman from Iowa who made the statement.

Mr. FITZGERALD. I did not say that the gentleman from Iowa did not say it. I say that I did.

Mr. BENNET of New York. Well, the gentleman from Iowa did, and I will take his word. It is immaterial. It was made by a member of the Committee on Appropriations for the guidance of the House, and it was my recollection that the gentleman from Iowa made it.

Now, another gentleman called as a witness before the sundry civil subcommittee, and whose testimony is printed in the RECORD, is Mr. Trowbridge.

I have a letter here from the Commissioner of Internal Revenue, which I will not ask to have read in full, saying that Mr. Trowbridge was in a minor and subordinate position and that he had no authority to speak for the commissioner and that the commissioner does value the secret-service agents. I will ask that the letter be printed in the RECORD——

Mr. SHERLEY. Mr. Chairman, I ask that the letter be read. I object to its being printed without being read.

Mr. TAWNEY. Mr. Chairman, at that point I want to ask the gentleman if it is not true that Mr. Trowbridge was the man selected by Mr. Capers to represent him before the Committee on Appropriations in support of the estimates which he had submitted, and if Mr. Capers himself, although invited, has not repeatedly refused to come before the committee because he has less knowledge regarding the details of his office than the man he selected to represent him.

Mr. BENNET of New York. The latter part of the statement I know nothing about; the first part is quite accurate. Mr. Capers was ill, and Mr. Trowbridge went to talk about the estimates and not about the Secret Service.

Mr. TAWNEY. The statement he sent to the Committee on Appropriations was that he was out of the city, and it was not only at this session of Congress, but previous sessions of Congress that Mr. Capers sent a man who, in his judgment, was more competent to testify on the subject of the estimates than he was.

Mr. BENNET of New York. With that statement I have nothing to do; touching the details of the expenditures, yes. His statement here is that he knows the secret-service agents have been of value. Then, from the Treasury Department came my genial friend, the Assistant Secretary, Mr. Reynolds, who has charge of customs under the Treasury Department. That is not a department under which very much of the Secret Service is used. The chairman of the Committee on Appropriations has received a letter, under date of January 26, 1909, from the Secretary of the Treasury protesting against the continuation of this limitation on the ground that the Secret Service is valuable to the department.

Mr. TAWNEY. Will the gentleman permit an interruption there?

Mr. BENNET of New York. Yes.

Mr. TAWNEY. Will the gentleman explain to the Committee of the Whole House, if that is so, why the Secretary of the Treasury, in submitting the deficiency estimate of $20,000, recommends the continuation of that limitation during the remainder of this fiscal year?

Mr. BENNET of New York. The gentleman has received the letter of which I spoke?

Mr. TAWNEY. Yes; and I have also received the official estimates from the department in which they recommend the continuation of this limitation.

Mr. BENNET of New York. That is a matter—nothing of that kind appears in the hearings on this bill. I know nothing of the subsequent reasons, except I assume the Secretary of the Treasury, not desiring to limit his successor, has assumed that a condition may exist after the bill passes. I know what the Secretary recommends, and the gentleman from Minnesota, I assume——

Mr. TAWNEY. Will the gentleman consent to inserting in the RECORD, in connection with the Secretary's letter, the estimates where he recommends for the continuation of this limitation?

Mr. BENNET of New York. I ask unanimous consent that both be inserted in the RECORD.

Mr. SHERLEY. Mr. Chairman, I shall object to the insertion of anything in the RECORD that is not submitted on the floor of the House.

Mr. BENNET of New York. The only reason I do not state it on the floor is the lack of time——

Mr. SHERLEY. I can not help that; I object——

Mr. BENNET of New York. I have stated——

Mr. SHERLEY. I must object to any extension of remarks.

Mr. BENNET of New York. Now, a great deal of this feeling about the Secret Service comes from what might be called "corridor" talk. I have alluded to the remarks of my friend and colleague of New York about many Members who knew of instances, and to the lack of any Members coming forward to substantiate it. I have alluded to the remark of the gentleman from Kentucky. Now, Mr. Chairman, how much time have I consumed?

The CHAIRMAN. Forty-two minutes.

Mr. BENNET of New York. Then, without reading and under correction of the gentleman from Minnesota, I will state the error into which he fell in relation to the Secret Service. It will be seen in the hearings on this sundry civil bill, in which he stated that he knew of an instance where secret-service men had been employed in his district in a store in connection with the detection of counterfeiting——

Mr. TAWNEY. Mr. Chairman, I prefer to have the gentleman read what was said; it was a conversation between Mr. Wilkie and myself at the time of the hearing.

Mr. BENNET of New York. I will do that if the gentleman insists. Mr. Chairman, I can not find it at the moment, but I will state the substance.

The gentleman from Minnesota [Mr. TAWNEY] stated that he knew of an instance where a secret-service man had been employed in his district for the purpose of detecting counterfeiting. I now have it. On page 250 of the hearings on the sundry civil appropriation bill it says:

The CHAIRMAN. When you detail a man on a case of that kind—say to detect a person passing counterfeit notes—when that man goes into the employ of the concern in which the man who is suspected of passing counterfeit money is employed, does he make any account to you of the compensation he receives from the firm he is working for?

Mr. WILKIE. We have never had such a case. We have never had a man at work in any firm to get information in that way.

The CHAIRMAN. I happen to know of a case.

Mr. WILKIE. Pardon me; you do not know of any case of our men, because no such case ever existed.

The CHAIRMAN. This was a man who claimed to be one of your men.

Mr. TAWNEY. Claimed to be one of his men. I did not say secret-service men.

Mr. BENNET of New York. I admit the gentleman modified it subsequently.

Mr. TAWNEY. He did not modify it.

Mr. BENNET of New York. I will read further:

Mr. WILKIE. If all the men who claim to be in our service were in our service, your appropriation would have to be $1,350,000.

Now, the facts are, in relation to that man, that a man was employed in a store in Winona, Minn.; that he was an employee of the Thiel Detective Agency, but he never was a secret-service man; that he was employed for an entirely different purpose, and employed for a very short time, and the only way the Secret Service ever found out about it was after the chairman supplied privately to Mr. Wilkie the name of the man. They investigated him and found out that he was not a secret-service man and never had been.

I instance these things to show the inaccuracy and lack of knowledge of members of the committee. Now, this limitation takes from every department the right to use men that have been trained in the Secret Service. It has resulted in the building of a new force in the Department of Justice, which has increased the detective force of this country to the extent of 18 men, at an annual expense, counting $2,000 a man, of $36,000 a year, and, as the Attorney-General says, with a present decrease in efficiency.

Mr. SHERLEY. Will the gentleman yield right there? Is it not a fact that the Attorney-General and the Secretary of the Interior testified that the arrangement made between them, whereby a force would be created in the Department of Justice, was entered into prior to the action of Congress touching the secret-service force in the Treasury Department?

Mr. BENNET of New York. Mr. Chairman, there are three different sets of testimony about that. The Attorney-General states one thing, the Secretary of the Treasury another, and the Chief of the Secret Service another, and the House can take its choice. But the fact remains that the force in the Department of Justice has been increased from 13 to 40, an increase of 27, and the force in the Secret Service decreased but 9, which leaves a difference of 18 of increase. Besides that,

this limitation pressing upon the Secretary of the Treasury deprives him of the right to use his own men for the detection of crimes involving the billion and a half of actual money under his control.

Mr. SMITH of Iowa. Will the gentleman allow me to make a statement right there? Did not Chief Wilkie state that he had more work, as to counterfeiting, than ever before, and therefore he could have released a large number of additional men to take these places in the Department of Justice but for the fact, as he claimed, that the panic had brought about an increase of counterfeiting? Is not that true?

Mr. BENNET of New York. That is not quite the statement, but if the gentleman desires I will allow him in his own time to read it in the RECORD. It is a fact that we have hampered every department, and especially the Treasury Department; that there can not one single reason be given for this limitation. It costs more money. There is no criticism of the work of the Secret Service, and, beyond all, the gentleman from Minnesota [Mr. TAWNEY] made a great point last year that this allowed per diem men to be taken from department to department, possibly without taking additional oaths. The Department of Justice has organized exactly the same sort of a detective service as the Secret Service has, from which the same sort of details shall be made, so that that reason, if it was a reason, fails.

To conclude, Mr. Chairman, not one single reason has been advanced. The public service has been hampered. The statements made justifying the criticisms of the Secret Service are unfounded in fact, and there is no reason that can be advanced why this limitation this year ought to be adopted.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman has twenty-five minutes remaining.

Mr. TAWNEY. Mr. Chairman, I yield to the gentleman from Iowa [Mr. SMITH] as much time as he may need.

Mr. SMITH of Iowa. Mr. Chairman, I hoped that on the 8th of January I said all that I would ever care to say upon the question of the Secret Service to this House. But the statements made here this morning seem to me to require that I should make some additional statement. It must be borne in mind that the Treasury Department has not a single secret service, but more than one. It has a secret service for discovering frauds upon the customs; a secret service engaged in discovering frauds upon the internal revenue. Each of these forces is of a higher and nobler type than the so-called "Secret Service." It is a matter of common knowledge among all men that one of the requisites of the common detective is that he shall be a common liar. [Laughter.] There is not a man who has tried lawsuits in the courts of this land that does not know that he can always win any case if the face of a loathesome detective is shown to the jury as a witness on the other side. They may furnish and do furnish some information to others; but their character is not so high or so noble that they should be the subject of admiration among the people.

What is the fact? These men work, many of them, at $3 a day; and it is claimed that they are indispensable to this Government in hunting down land frauds. I apprehend that there is no considerable number of them that know a legal from an illegal entry. The post-office inspector goes out, not to hunt down crime, but to audit, and in connection with the auditing he discovers crimes if they exist—infinitely more capable of doing so by reason of his knowledge of the postal laws than the cheap $3-a-day man of the Secret Service Department of the Treasury. So in the Interior Department they have a force of special agents, trained in the land laws, knowing what it takes to make a legal entry, knowing what constitutes compliance with the law, and they go not only to find frauds and illegality, but to help the law-abiding citizen and, at the same time, because they know the law, they discover its violators. Respectable men will take places as post-office inspectors and as special agents of the Interior Department, even though occasionally they have to do some detective work.

The idea that some $3 or $4 a day man, who is willing to be a common detective, will familiarize himself with all the laws, and therefore become more useful than a specialist, is simply absurd. The best illustration of the fact of it is the fact that prior to a year ago this spring part of the land business was in the hands of the Department of Justice and part in the hands of the Interior Department. The Department of Justice was doing its part of the work with the services of men from the Secret Service. The Land Office was doing it with special agents. Before this law was passed an agreement was made between the Attorney-General and the Secretary of the Interior that this work should all be taken over by the Interior Department and put in the hands of the special agents in connection with their department, and these secret-service men were turned away. The gentleman says that Mr. Wilkie testifies one way and Mr. Bonaparte testifies another, and that Mr. Garfield testifies another; and you can take whatever one you please. There is no substantial difference between the testimony of Mr. Bonaparte and the testimony of Mr. Garfield; and I have no hesitation in accepting their testimony as against that of Mr. Wilkie, the chief of the detective force of the Treasury Department. [Applause.] Now, so far as the land laws are concerned, they had a horde of these worthless detectives that worked under the Department of Justice, attempting to enforce the land laws, and they got rid of them, and within twelve months, the Secretary of the Interior tells us, he has unearthed frauds involving lands worth hundreds of millions of dollars, that these worthless men of the Secret Service had not been able to discover in all the years they had been on the job.

Mr. BENNET of New York. Will the gentleman yield for a question.

Mr. SMITH of Iowa. Oh, certainly.

Mr. BENNET of New York. Before Secretary Hitchcock commenced his investigation in 1903, and the Department of Justice started in with the Secret Service, what had been done, if anything, in relation to the enforcement of the land laws?

Mr. SMITH of Iowa. There have been prosecutions all along the line——

Mr. BENNET of New York. Where is the record of them?

Mr. SMITH of Iowa (continuing). For many years. The gentleman is laboring under the delusion derivable from the surroundings in which he lives, if he thinks there was no enforcement of the land laws until the prosecutions reported on by Mr. Rush.

Mr. BENNET of New York. The gentleman is intimate with Mr. Rush——

Mr. SMITH of Iowa. I have a slight acquaintance with Mr. Rush; a speaking acquaintance, but not an intimate acquaintance.

But Mr. Rush does not say, by a gunshot, that there never were any fraud prosecutions until Mr. Hitchcock started them. The fact of the matter is that there is not a single officer of the Government who knows anything about it except Wilkie, who claimed that there has been a material interference with the administration of any of the laws by the enactment of this limitation. Of course it is easy enough to try to discredit Mr. Trowbridge, the witness sent up here on the subject by the department, but let us see what kind of statement he has to make about this "invaluable service."

Mr. TAWNEY. We did not invite him.

Mr. SMITH of Iowa. We did not ask him up here. He was sent up to testify on this subject.

Mr. GAINES of West Virginia. By whom?

Mr. SMITH of Iowa. By the Treasury Department, by the Commissioner of Internal Revenue, when he refused to come himself.

Mr. SHERLEY. Are any of the men employed by these revenue agents that are paid out of this appropriation upon detail from the Secret Service, or are they carried regularly on the rolls under this appropriation?

Mr. TROWBRIDGE. In my ten years' experience with oleomargarine violations, when they began to get so rank the collector at Baltimore concluded that he could not cope with them, and he recommended to the Commissioner of Internal Revenue that he (the commissioner) assign a couple of secret-service men with me. He did so, and sent all my men out of Baltimore into West Virginia, Maryland, and Delaware. I gave them the inside track and told them the conditions, and assisted in every way I could. I turned those fellows loose in Baltimore for two months, and they did not show up one penny's worth of violations. That has been my experience.

And he further added that within a month after he took possession he discovered the frauds he was looking for. Now, Mr. Trowbridge is the Chief of the Internal-Revenue Secret Service. I will read a little further from this:

Mr. SHERLEY. Would you consider it essential, for the efficiency of the force, to obtain your men from the Secret Service Division of the Treasury Department?

Mr. TROWBRIDGE. No; I would not. They are a failure so far as our bureau is concerned. I have tried them. I gave them a fair test, two bright fellows, at $10 per day each and expenses for two months, and they did not meet with any success.

And that is the tenor of the testimony about this much-eulogized Secret Service.

Mr. STANLEY. How much time did the Commissioner of Internal Revenue have to show the incorrectness of the testimony given before your committee, if it was wrong, instead of doing it by letter?

Mr. SMITH of Iowa. Well, it was down there a good while; I do not know how long.

Mr. STANLEY. How long did he have notice of that statement that he says is false?

Mr. SMITH of Iowa. I do not know just how long. The gentleman from New York [Mr. BENNET] has seen fit to come in and read to this House a portion of a message which the House by an overwhelming vote declared was an invasion of the privileges of this House and should lie upon the table. I shall not call in question the propriety of the gentleman's conduct in that respect; but I have this to say: That when it is asserted here that this review of the past achievements of the Secret Service is not in dispute, I say it is in dispute that this service ever rendered the valuable aid to this Government that is pretended. [Applause.]

Mr. DOUGLAS. In connection with Mr. Trowbridge's testimony will the gentleman yield for a question?

Mr. SMITH of Iowa. Oh, certainly.

Mr. DOUGLAS. When the gentleman read that statement of Mr. Trowbridge, he stopped just short of the further statement that except those two men in Baltimore, three or four years ago, they never had had any detail from that service in connection with that work.

Mr. SMITH of Iowa. I gladly give the gentleman an opportunity to add this contribution.

Mr. DOUGLAS. I beg pardon. Does the gentleman think that is a fair test of Mr. Trowbridge's knowledge, or anybody's else?

Mr. SMITH of Iowa. I would think it was a fair test; so satisfactory that they never allowed them around any more. That is my judgment. [Laughter.] They were in the Land Department, and after they got them out, they found a hundred million dollars of fraud within twelve months after they got them out. I find them in this department, and no good——

Mr. DOUGLAS. Where does the gentleman——

Mr. SMITH of Iowa. And nowhere, except in the vainglorious boastings of Wilkie, and the testimony of men who do not know anything about it, do I find anything of the value of this service, except perhaps in the watching of jurors and the like, that would be done just as effectively and well by the secret service now created and existing in the Department of Justice.

Now, why should the counterfeiting section do the surveillance work of jurors; why more than the customs section; why more than the internal-revenue section? If we are going to have detectives to hound jurors to and from their homes, as seems to be the custom in these days, why not detectives in the Department of Justice and not detectives in the counterfeiting section of the Treasury Department?

My friend says that as the effect of this legislation we have increased the detective force. We have not increased it very much. What have we done? They told us that they had 47 men needed for the counterfeiting service and were carrying 67. It turns out that they were only carrying 65 the day the law went into effect, and suddenly Mr. Wilkie discovered that counterfeiting was spreading everywhere and he could not reduce the force below 56.

Mr. BENNET of New York. Will the gentleman yield?

Mr. SMITH of Iowa. Certainly.

Mr. BENNET of New York. Is it not a fact, in connection with that statement, that Mr. Moran testified before your committee last year that counterfeiting was on the increase?

Mr. SMITH of Iowa. I think that perhaps it was—a slight increase. I will answer that question more fully. They have been having for many years $125,000. It appeared that they had used $106,000 the previous year; and he did not think that it ought to be cut $19,000, because counterfeiting was increasing again up to the normal. There was no pretense of a necessity for an increase.

Mr. BENNET of New York. I will refresh the gentleman's recollection. Did not Mr. Moran state in that testimony—I do not know whether he used the word "normal" or not—that it was the universal experience of their division that in hard times counterfeiting increased?

Mr. SMITH of Iowa. Substantially that.

Mr. BENNET of New York. And that they would have to have an increased force?

Mr. SMITH of Iowa. It depends upon what the gentleman means by "increased force." He did not ask for anything above the $125,000.

Mr. BENNET of New York. Because they had the $19,000.

Mr. SMITH of Iowa. He did not ask for an increase above the usual appropriation.

Mr. BENNET of New York. Which was caring for 47 men, and that was to take the full $125,000.

Mr. SMITH of Iowa. But he immediately kept 56 men.

Mr. BENNET of New York. That is 9 more.

Mr. SMITH of Iowa. Yes; 9 more. Quite a good percentage of increase.

Mr. GAINES of Tennessee. Will the gentleman from Iowa yield for a question?

Mr. SMITH of Iowa. Certainly.

Mr. GAINES of Tennessee. Does the gentleman from Iowa mean to argue that the investigations of the "millions of land frauds" which Secretary Garfield says he wants the money to investigate were not begun some time ago?

Mr. SMITH of Iowa. Nothing was discovered by the Secret Service; it was discovered when they got rid of them.

Mr. GAINES of Tennessee. Where is the record?

Mr. SMITH of Iowa. It was discovered only after the secret-service men had been eliminated. The Land Department asked for $250,000 additional to maintain the work in the Interior Department, and as soon as they got their own men back they began to uncover innumerable frauds.

Mr. GAINES of Tennessee. Does the gentleman mean to say that these millions of land frauds have been discovered since the 1st of last July?

Mr. SMITH of Iowa. Since the 1st of last February, when the secret-service men were discharged.

Mr. GAINES of Tennessee. And none of these "millions" of frauds were discovered previously?

Mr. SMITH of Iowa. Oh, I can not say that there was not an acre, but substantially all of them were discovered after they got rid of the secret-service men.

Mr. TAWNEY. If my colleague will permit me, I will refer the gentleman from Tennessee to House document No. 1323, Sixtieth Congress, signed by the Secretary of the Interior, which contains all the information as to the number of frauds, the aggregate value of the land, and when the fraud was discovered.

Mr. GAINES of Tennessee. One question now, and I am done.

Mr. SMITH of Iowa. The gentleman must hurry, because my time is short.

Mr. GAINES of Tennessee. Does the gentleman mean to argue that the secret-service agents did not produce before last February discoveries which elicited the testimony which has brought about the discovery of these land frauds?

Mr. SMITH of Iowa. Mr. Chairman, I do mean to charge exactly that, and that they are worthless in land-fraud cases, and it is so testified by Secretary Garfield—that they do not know what is a legal and what is an illegal entry. They have no knowledge of land laws and they can not tell when an entryman is complying with the law and when he is not. Would you expect a $3 a day detective on all branches of human effort to be a specialist in the land laws, a specialist in the postal laws, a specialist in all the laws covering all the ramifications and branches of this Government?

Mr. GAINES of Tennessee. I would answer my friend by saying I think there are hundreds of intelligent men working for less than that in this country to-day.

Mr. SMITH of Iowa. And who know that much? Well, I do not. [Laughter.]

Mr. GAINES of Tennessee. I have seen white people who could not read or write who could tell a rascal and some of his tracks whenever they came across either.

Mr. SMITH of Iowa. Oh, Mr. Chairman, I can not devote any time to a discussion of that sort.

Mr. Chairman, there is practically one more feature, and that is all. We say that there ought to be in the Post-Office Department post-office inspectors who know the postal laws and who will study them and at the same time run down violators of them. We say there ought to be in the customs service a force of specialists in the customs law. We say there ought to be in the Internal-Revenue Service a force of specialists in the internal-revenue laws. We say there ought to be in the Interior Department a force of specialists in the land laws, all endeavoring to enforce all the laws of the United States that come within their respective spheres, and then when that work is done and these cases are handed over for prosecution to the Department of Justice, it ought to have, first, the right to call in these men who have prepared the cases to furnish any additional testimony that may be needed that has been overlooked for lack of knowledge of just what the Department of Justice would think necessary, and that department ought also to have a small detective force to look up the history of jurors and their previous affiliations and the like, and then if some special thing exists, where it is necessary to call in some of these men in one of those branches or departments which has not a special distinctive inspection service, the Department of Justice charged with the enforcement of all the laws should furnish the men, and they should not be furnished from the counterfeiting section in the Treasury Department. [Applause.]

Mr. STANLEY. Will the gentleman yield for a question?

Mr. SMITH of Iowa. Yes.

Mr. STANLEY. There is one serious defect about the proposition that the gentleman has announced—a very serious one. To have men trained and regularly employed with definite service, with one particular thing to do, would rob this service of its mystery, of its sensationalism, of its attractiveness to the general public. [Laughter.]

Mr. SMITH of Iowa. The gentleman is right.

Mr. DOUGLAS. Will the gentleman yield for a question?

Mr. SMITH of Iowa. Yes.

Mr. DOUGLAS. The gentleman has in his concluding remarks, as I understand them, substantially agreed with the Attorney-General's office as to this matter.

Mr. SMITH of Iowa. If the gentleman means to transfer the Secret Service in the Treasury Department to the Department of Justice, no.

Mr. PARSONS. Why not?

Mr. SMITH of Iowa. Because it was created by Congress to hunt down counterfeiting, and it better do what it has been told to do.

Mr. DOUGLAS. I simply want to call the attention of the House and the gentleman to these few lines in Mr. Bonaparte's testimony, and I do not think I disagree substantially with the gentleman. He says:

I think that is the logical end to which we ought to tend—a force in each department, discharging substantially the duties of the examiners in the Department of Justice, who look into the official conduct of all subordinates in that department or public officers over which it has a certain measure of supervision—a corps something like that in each department for administrative matters, and then a central office which I would place in the Department of Justice to attend to all detective work that goes beyond that line where it becomes clearly——

Mr. SMITH of Iowa. The Attorney-General and I do not draw the line quite at the same place. Generally speaking, we are in harmony, but we do not draw the line quite at the same place.

Mr. DOUGLAS. Then is the gentleman in harmony with this further statement of the Attorney-General in that connection:

I think that any restriction which limits the scope of the employment of a force of this character would tend to the advantage of lawbreakers.

Mr. SMITH of Iowa. I will not agree that any restriction would. I say that this law ought to provide that this force could be used to investigate crimes against the United States and frauds upon the Government, and anybody who chose to use it for any purpose beyond that should go to the penitentiary. That is what I think.

Mr. DOUGLAS. One other question. Since this force is already established and in working order in the Treasury Department, and has been for nearly fifty years——

Mr. SMITH of Iowa. No.

Mr. DOUGLAS. Excuse me; let me finish the sentence—what is the objection to practically leaving it there, instead of transferring it to the Department of Justice?

Mr. SMITH of Iowa. The gentleman is mistaken. There never was such general force in the Treasury Department, but a counterfeiting force was there, and in very recent years only has this force been transferred to general use other than in the sphere of counterfeiting, and only recently have there been many of them. Now, we have organized in the Department of Justice a general detective force. Let that force do what it was created for. The men who raid counterfeiting dens are not, ordinarily, the same type of men who could take charge of land cases and postal frauds. Let them stay in the places for which they were organized and do this work, and let the Attorney-General with his force do his work. I want to add right there that when this change took place last June this Chief of the Secret Service sent the names of 20 men in a list to the Attorney-General from whom he might select 9, and the Attorney-General selected 9 of the best he could get out of the 20, and he has been compelled for the good of the service to separate 3 from the 9 in the intervening period. [Applause.]

Mr. DOUGLAS. I have read what he said about that. I do not care——

Mr. BENNET of New York. Did the Attorney-General say he transferred them for the good of the service?

Mr. SMITH of Iowa. He said they were not satisfactory, and he let them go.

Mr. BENNET of New York. He said they were practically working under his management, and the question was asked him if the change in management might not have something to do with it, and the Attorney-General said it might have had, if my recollection is right.

Mr. SMITH of Iowa. I do not recall that; but I remember distinctly he said that their services were not satisfactory, and 33 per cent of those he did take have since been separated from the service, and he only took 9 out of 20.

Mr. PRINCE. Mr. Chairman, may I ask the gentleman a question?

Mr. SMITH of Iowa. I do not desire to take up all the time.

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. PRINCE. Mr. Chairman, I rise for the purpose of asking the gentleman a question.

The CHAIRMAN. Does the gentleman yield?

Mr. SMITH of Iowa. Oh, certainly.

Mr. PRINCE. I wish the gentleman would state to the committee whether he, as a member of the Committee on Appropriations, and the committee which he represents have made ample appropriation for a force like the one he has described, which will in no sense hamper the administration of justice?

Mr. SMITH of Iowa. Certainly they did. There has not been a single reduction, except last year we reduced the appropriation for the Secret Service in the Treasury $10,000 on the showing they had $19,000 surplus from the year before, but all the other appropriations for this purpose have been increased or kept at what they were before.

Mr. CAMPBELL. Have you increased the appropriations for investigating violations of the land laws?

Mr. SMITH of Iowa. Double last year and quadruple this year what they were two years ago.

Mr. PARSONS. Will the gentleman yield for a question?

Mr. SMITH of Iowa. I will.

Mr. PARSONS. I understood the gentleman to say that he would not agree with the Attorney-General that the personnel of the Secret-Service Division should be transferred to the Department of Justice because they were not fit.

Mr. SMITH of Iowa. That is my judgment.

Mr. PARSONS. I wish to ask him, Does the gentleman contend that the Secret Service Division, which has the protection of the person of the President, three of whom have been assassinated, is not a proper force to be transferred to the Department of Justice if we are going to have some central bureau——

Mr. SMITH of Iowa. I say, since the gentleman sees fit to raise this sad subject, that the only President assassinated since the Secret Service was assigned to guard the President of the United States was William McKinley, with a secret-service man standing by his side who could not detect the bundled-up hand of the assassin when he came and shot William McKinley down. [Applause.]

Mr. PARSONS. And had been appointed, I believe, at the express request of President McKinley.

Mr. SMITH of Iowa. That is all that the testimony shows of the value of the Secret Service in defending the President.

Mr. DOUGLAS. Mr. Foster, who stood by the President, was in no true sense a secret-service man; except, I admit, he drew his pay from that service. [Laughter.]

Mr. SMITH of Iowa. And was on the roll as a regular secret-service man. And when this man allowed the American President to be shot down, and could not discover this great bandage on the approaching man's hand, and could not even capture the murderer, it took a man with a black skin to take the murderer prisoner.

Mr. POLLARD. Can I ask the gentleman from Iowa [Mr. SMITH] a question?

Mr. SMITH of Iowa. I think it is an outrage for me to consume all the time on this side. However, I will answer the gentleman's question.

Mr. POLLARD. I understood the gentleman to say that the committee had provided a secret service in the Department of Justice, which would be used in the prosecution by the Attorney-General of crimes against the Government, without respect to the department in which the crime was committed. Is that true?

Mr. SMITH of Iowa. I say that that force can be used for the enforcement of the laws of the United States anywhere; yes, sir.

Mr. POLLARD. Under the direction of the Department of Justice?

Mr. SMITH of Iowa. Under the direction of the Attorney-General. I want to say in that connection to the gentleman from Nebraska that not only has the Department of Justice a right to use this force in seeking violations of the laws of the United States, but if it is deemed advisable to pay out of the Treasury of the United States men to follow Congressmen or Members of the Senate, whether suspected of crime or not, this force can be used now for that purpose without any legal impediment whatever; that there is absolutely no restraint whatever upon the following of Senators and Members of the House by the secret-service force in the Department of Justice; and the fact that there is no restraint absolutely negatives the idea that any Member of the House had any thought in mind of pro-

tecting himself or his colleagues by adding this amendment to the provision for the Secret Service in the Treasury Department.

Mr. POLLARD. I trust the gentleman will understand that I had no such idea in mind in asking the question. I was simply speaking of the Nation. I would like to inquire whether, since the committee has made this change in the Secret Service, they have also increased the appropriation for the Department of Justice, so that they have ample funds now to prosecute these cases?

Mr. SMITH of Iowa. I will answer, first, that they have had all that is necessary for that purpose, and I will tell you why. When these men were formerly assigned to the Department of Justice they were paid out of the Department of Justice money and not out of the Treasury Department money, so that the money that they paid these men they could pay to these new men; but we have, in fact, increased their appropriation, so that they could employ even more men for this purpose.

Mr. POLLARD. How much?

Mr. SMITH of Iowa. I can not give the gentleman the exact figures now. I am told, $20,000.

Mr. TAWNEY. I think it is $50,000, in the miscellaneous expenditures in the Department of Justice in the courts of the United States.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. WASHBURN having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate has agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26916) making appropriations for the current and contingent expenses of the Indian Department, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1910.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 27419. An act to repeal the act of June 29, 1906, granting a pension to Jackson Adkins;

H. R. 27363. An act to provide for improving the navigable capacity of the Sabine and Neches rivers and the canal connecting the Sabine and Neches rivers with the mouth of Taylors Bayou;

H. R. 8734. An act for the relief of Niels P. Larsen; and

H. R. 28104. An act to amend an act to authorize a bridge across the Missouri River at or near Council Bluffs, Iowa, approved February 1, 1908.

The message also announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 27061. An act to provide for the appointment of an additional district judge in and for the western district of Washington.

The message also announced that the Senate had agreed to the amendment of the House of Representatives to the bill (S. 9017) for the establishment of a subport of entry at Ranier, Minn.

The message also announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 23717. An act to extend the time for construction and beginning construction of the Alaska Short Line Railroad in Alaska.

The message also announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 9454. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war, and to certain widows and helpless and dependent relatives of such soldiers and sailors.

SUNDRY CIVIL APPROPRIATION BILL.

The committee resumed its session.

The CHAIRMAN. Does the gentleman from Minnesota [Mr. TAWNEY] reserve the balance of his time?

Mr. TAWNEY. I reserve the balance of my time.

Mr. BENNET of New York. Mr. Chairman, I yield to my colleague from New York [Mr. DRISCOLL] for nine minutes.

Mr. DRISCOLL. Mr. Chairman, it is not my intention to indulge in hair-splitting criticisms of what was said on this question the 1st day of last May when this particular paragraph as a limitation was incorporated onto this appropriation, nor what was said by the gentleman on the floor of this House on the 8th day of January on this question while considering the President's message. I assume that we are all here for the purpose of legislating for the best interests of the Government and the public service. I assume that we are not here in a hostile spirit toward any department, or any bureau or division of any department, but to get the worth of our money if we can for the several sums appropriated.

I may say in passing that the criticism just offered by the gentleman from Iowa [Mr. SMITH] in what he said, and especially in the manner in which he said it, with respect to the secret-service force, was not, in my judgment, entirely appropriate. He speaks of them as cheap men, $3 a day, or $4 a day men, who must lie in their business; and his language on that point was very sarcastic and bitter.

Mr. Chairman, I admit that a man who is a detective, whose profession is to discover crime and hunt down criminals, can not be a man of high moral ideals; that he can not be a strictly truthful man at all times and under all circumstances, and be eminently successful in his profession. I admit that every good detective, from Sherlock Holmes down, or from Sherlock Holmes up, must be a liar; that is, he must be willing when necessary to change his name, represent himself as a different man from what he is and in a different business from what he is, in order that he may insinuate himself into the confidence of the person or persons suspected of crime, to the end that he may develop the facts and bring them to justice. All good detectives have employed those methods when necessary in the investigation and suppression of crime and the conviction of criminals. I do not mean to say that they would or do lie on the witness stand when criminals are being tried, but of necessity they must and do live lives of deception in order to unearth and discover the facts which do exist in the commission of crimes. In other words, a man can not always be truthful, sincere, and honest when he is striving to worm himself into the confidence of accomplished criminals. There is an old saying, which is as true to-day as it was when it originated, that "It takes a thief to catch a thief." [Laughter and applause.]

Mr. BEDE. You are making it worse. [Laughter.]

Mr. DRISCOLL. In my view of the question I am not making it worse. [Renewed laughter.] I mean just what I say—that a strictly honest, ingenuous man can not, in the very nature of things, be a successful detective of crime, nor can he run down and bring to justice accomplished thieves. [Laughter.]

My contention is that these men in the Secret Service are able, skilled, and trained detectives, according to my description of detectives. They are fit men for the work they undertake and for the service for which they are paid; and if they are bad men—that is, unfit for the work of discovering crime and bringing criminals to justice, why are they retained in the service, and why has this appropriation of $125,000 for their support, maintenance, and compensation been made from year to year?

Mr. Chairman, my point is this: One hundred and twenty-five thousand dollars are appropriated for the pay and maintenance of those men, and they are limited by this paragraph to two classes of work only, one, the suppression of counterfeiting, and the other, protecting the President from assault. It is my contention that they should be permitted and required to do other kinds of detective service when necessary in the Government, and for the protection of the public from fraud and wrong, especially in the Treasury Department. There are other bureaus or divisions in the Treasury Department in which crimes have been committed, and will probably be committed in the future, in the detection and punishment of which these trained men have been and will be of valuable service to the Nation. There are the mints and assay offices——

Mr. YOUNG. Will the gentleman yield?

Mr. DRISCOLL. I would be only too glad to do so if I had time.

Mr. YOUNG. I simply suggest to the gentleman that Mr. Wilkie, chief of this force, has sworn within the last three days that they were all employed in their legitimate work.

Mr. DRISCOLL. I was about to say when interrupted that there are mints and assay offices, the Bureau of Engraving and Printing, and other fields of public service under the Treasury Department in which crimes have been committed in the past, and will be committed in the future; and it is known that these crimes have demanded the services of skilled, able, trained, professional detectives to detect such crimes and punish such wrongdoers, and that an honest fellow off the farm [laughter] is not the kind of agent to accomplish the best results.

Mr. CUSHMAN. Is the gentleman looking at me?

Mr. DRISCOLL. I was looking at the gentleman from Washington, and it occurred to my mind that I would never think of

selecting that honest, unsophisticated gentleman to ferret out such crimes or to send after that class of lawbreakers. Every man to his calling. These men in the Secret Service are trained. It is their profession to detect crime [laughter], and they are good men and necessary in the service of the Government.

We ask here that those men be not confined alone to the duties of protecting the Executive and suppressing counterfeiting. [Laughter.] This is not a question of hilarity [laughter] or for amusement. If crimes are committed in other bureaus of the Treasury Department the Secretary of the Treasury should be permitted to detail one or more of those secret-service men to investigate such crimes, discover the perpetrators if possible, and bring them to justice.

On the 1st day of last May, when this particular paragraph was under consideration, as far as I now recollect, the statement was not made before the Committee of the Whole House that the President was very anxious that this limitation be not placed upon this appropriation. I do not think it was stated that the Secretary of the Treasury was very strongly opposed to this limitation. It is my judgment that if those statements had been made on the floor of the House this limitation would not have been adopted at that time.

We now are aware that the President is very strongly opposed to this limitation and is anxious that it be stricken from the bill. The Secretary of the Treasury is also very desirous that this limitation be removed as far as his department is concerned. He has the right and the power under the law to transfer other clerks and employees in his department from one bureau to another in his discretion and for the good of the service; but he is not permitted under this limitation to detail any of those men to apprehend criminals and detect crimes committed in the mints or assay offices, in the Bureau of Engraving and Printing, or any other bureau or division in his department, because they are confined by this limitation, and the construction put upon it by the Committee on Appropriations, and also by the Secretary of the Treasury, to do just those two kinds of work. It is my notion that there should not be a secret-service division or force in each department, but that there should be a general detective or secret-service division in the Government, where all facts discovered with reference to the persons and matters may be gathered together for future reference and for assistance when crimes are committed; and when it appears that felonies are committed in any department, or in any bureau, those skilled, trained, and professional detectives should be detailed to investigate those cases to discover the perpetrators of such crimes, and, if possible, bring them to punishment. By that means all the members of the secret-service force would be employed, at all events when services of that kind were necessary anywhere in the Government, and this practice would tend toward economy and the effective suppression of offenses against the Government.

The CHAIRMAN. The time of the gentleman has expired.

Mr. DRISCOLL. I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. SHERLEY. I object.

Mr. BENNET of New York. Will the gentleman from Minnesota consume some of his time?

Mr. TAWNEY. I will yield five minutes to the gentleman from Kentucky [Mr. SHERLEY] or the gentleman from New York [Mr. FITZGERALD].

Mr. SHERLEY. At present I do not desire to take time. There has been no argument so far for the repeal of this limitation that I consider needs an answer.

Mr. TAWNEY. Then I yield five minutes to the gentleman from Colorado, who wants to speak.

Mr. DRISCOLL. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The request was put to the House and objection was made.

Mr. DRISCOLL. I again ask it.

The CHAIRMAN. And the gentleman repeats his request.

Mr. SHERLEY. And I again object.

Mr. COOK of Colorado. Mr. Chairman, as a Member of the United States Congress and a coequal in power with the executive department under the provisions of the Constitution, I claim and assert the right to defend my citizen constituents and myself from the encroachments and abuse of the executive power of the present national administration.

In the President's message of January 4, 1909, he uses the following language:

> In Colorado one of the secret-service men was assassinated.

This is positively an incorrect statement and not warranted by the facts. The truth is, Mr. Mason, superintendent, and Joseph Vanderweide, foreman, of the Porter Fuel Company, whose mines are situate 14 miles west of Durango, at Hesperus, advised James R. Walker, special agent of the Government, and three other government detectives, if they desired to examine the coal property a competent guide and safety lamps would be furnished; but instead of this Mr. Walker took three men and went to the property, armed, and entered an abandoned coal shaft belonging to the Porter Fuel Company and lowered the three men with a block and tackle a distance of 70 feet into the mine, using naked lights, a foolish and criminal act which might have caused an explosion, killing 60 miners employed therein.

When Special Agent Walker saw Mason approaching he fired one shot at Mason, and attempted to fire a second time, when Joseph Vanderweide, armed with a shotgun, fired, killing Walker.

Both Mason and Vanderweide were tried in the district courts of Colorado, at Durango, and acquitted.

Special Agent Walker and his three associates had no warrant of law, or authority from the owners or officers of the Porter Fuel Company to enter therein, but were trespassers.

Mason and Vanderweide, after being acquitted in the state court at Durango, were taken before Judge Lewis, of the United States district court at Denver, and were acquitted of the charge of murder. One of the three men let down into the mine by the block and tackle was a notorious horse thief, and employed by the Secret Service of the Government.

The date of the killing was November 3, 1907.

In the President's message of January 4, 1909, in his defense of the Secret Service, reference was made to the Colorado cases still pending in the United States court.

On January 10, 1908, I addressed an open letter to the President of the United States, the Vice-President, Speaker Cannon, the honorable members of the Supreme Court, the members of the Cabinet, and all of the Members of the Sixtieth Congress.

And I read from portions of that letter as follows:

> I most earnestly protest against the continued high-handed, pernicious political persecution made by certain of the department bureaus of the Government in this city, branding many of our most honorable, upright, and law-abiding business men of Colorado as criminals.
>
> Their only information and authority for such malicious statements are reports made to them by nonresident special agents and "prosecutors" sent to Colorado, whose accusations against innocent men are for the sole purpose of securing personal promotion in Washington and the opportunity for the governmental bureaus here to disseminate among the press throughout the country misrepresentations as to timber-land and coal thieves that do not exist in Colorado.

Judge Robert E. Lewis, of the United States district court, Denver, on December 24, 26, and 30, 1907, quashed all of the indictments against some 30 of our most worthy and reputable citizens, some of whom had been engaged in business in Colorado for thirty years, on the ground that the Government had failed to find any evidence against these men, a most stinging and severe rebuke by Judge Lewis, of the United States district court, an appointee of the present administration.

Mr. BENNET of New York. Will the gentleman yield for a question?

Mr. COOK of Colorado. I certainly will. The gentleman declined to yield to me, but I will grant him that courtesy.

Mr. BENNET of New York. Our situations were somewhat different. I will ask the gentleman if he does not know that that decision of Judge Lewis has since been reversed by the Supreme Court of the United States?

Mr. COOK of Colorado. I desire to say for the information of the gentleman that he never made a more inaccurate statement in his life. On January 4 of this year Mr. Justice White, of the Supreme Court, all the justices concurring, sustained Judge Lewis's decision in every particular.

Mr. BENNET of New York. The Attorney-General states just the opposite.

Mr. COOK of Colorado. My dear sir, you are mistaken. Now, if the gentleman will let me proceed——

Mr. BENNET of New York. What case is the gentleman talking about?

Mr. COOK of Colorado. I am talking about all the land cases. There were some 75 or 80 of our citizens indicted by nonresident special agents and so-called "detectives," who were sent to my State.

Mr. BENNET of New York. Those cases were reversed by the Supreme Court.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. TAWNEY. I yield to the gentleman five minutes more.

Mr. COOK of Colorado. Active preparations were made by certain high officials in Washington for the prosecution of these

cases, and who condemned honorable men of unquestioned integrity before being found guilty of any violation of the law, or even given an opportunity of defense.

Judge Lewis's decision gives universal satisfaction to all of our people in Colorado regardless of their political affiliations, and is indorsed by a united press; in fact, every newspaper in the State most heartily commends Judge Lewis's action. Thus the truth has been vindicated.

Mr. BENNET of New York. Will the gentleman yield for the statement that those indictments filed June 10, 1907, were reversed and dismissed by Judge Lewis, and that the decision dismissing them was reversed by the Supreme Court in the case of the United States *v.* Kittle et al., October 10, 1908, No. 286?

Mr. COOK of Colorado. I will say that I will substantiate the remarks I have made here by bringing before the Members of this honorable House the decision of the Supreme Court of the United States made on January 4, 1909.

In this connection I beg to call attention to editorial below from the Denver Republican of December 26, 1907; also editorial of December 25, 1907, written by ex-Senator T. M. Patterson, owner and editor of the Rocky Mountain News, Denver:

[From the Denver Republican, Thursday, December 26, 1907.]

A RETURN TO SANITY IN LAND AFFAIRS.

By his decision quashing indictments against a number of local lumberman, Judge Lewis, in the United States court, struck a blow for justice and sanity where it has been needed for some time. His action was a rebuke to the idea that seems to prevail in some quarters at Washington that special agents are alone able to ferret out, punish, and prevent violations of the land laws. Incidentally it comes as a defense of the westerner from the imputation of departmental Washington that everyone who seeks to avail himself of the laws regulating the disposal of government lands is inherently and by practice a criminal.

No doubt Uncle Sam of himself is just as generously disposed in the matter of giving his western lands to men who would use them as he was when his laws were drawn to regulate their disposal; but of late there has grown in the minds of some officials in Washington the idea that every man who ever filed a claim did so with malicious intent to rob the Government and thwart the department in its duty. As a part of that suspicion comes the thought that every western man is in the conspiracy, and that therefore the regular agents of the Government are not to be trusted in such matters. This leads to sending west to unearth gigantic frauds special agents, who, having their spurs to win, proceed to find what they are sent after.

In many cases, the special agent is one whose knowledge of practical affairs is confined to holding a job in Washington. Coming West and discovering that certain individuals have made money by availing themselves of the Government's liberality in land affairs, such a man leaps promptly to the conclusion that there was fraud in acquiring the lands. His philosophy can not cover the fact that the Westerner in taking advantage of the land laws as they exist may make money and still be honest—that the laws are drawn to give him that very opportunity. To him the fact of having taken up lands and made money becomes ground enough for charging fraud, and he rushes to the courts and begins action.

When the suits brought by Judge Lewis were brought against some of the most reputable business men of Colorado, most people understood that they were the outgrowth of this excess of zeal on the part of such special agents. Men of the highest character were forced for a time to stand under the imputation of conspiracy to defraud the Government. They courted the fullest investigation, but the cases brought were found to have so flimsy a base that the judge refused to let them be tried. In so deciding he took pains to point out to the land officials that they had failed to show wherein a single law had been violated, and reminded them that it is beyond their power to determine how the Government ought to dispose of its lands and then charge the commission of crime on that theory.

The existing land laws have stood the test of time, and have been a large factor in making the West. None too liberal, they are yet calculated, and rightly so, to benefit the man who avails himself of them. Men prosper from seizing the opportunities presented, just as the framers of the laws intended they should. The attitude of the Government toward settlers has not changed; the laws passed by Congress stand to-day as they have stood for years. This idea of calling a man a thief because he has made his money out of land given him to use exactly for that purpose comes not from the Government, not from Congress, or the administration, but from the overzealous special agent sent to find that a fraud was committed or write himself unequal to the task. Usually the men he is set to accuse have been suspected in Washington departments before the agent has begun even to collect evidence for the courts, and he dare not fail to make good.

The decision of Judge Lewis will go a long way toward putting a stop to such practices and bring about a return to sanity in land affairs.

[From the Daily News, Denver, December 25, 1907.]

GOOD MEN CLEARED.

One of the things that added to the Christmas joy of this office was the action of Judge Lewis, of the federal court, in quashing indictments against 11 citizens of Colorado. These men were charged with the conspiracy to defraud the Government, and Judge Lewis, assuredly a man not blind to his obligations to his country, has dismissed the charges in a decision which clears the indicted men of anything that could be called an offense.

It is mightily satisfactory, for among these eleven were men like Charles D. McPhee and John McGinnity and Alexander T. Sullenberger. All of them are men past middle life, and their lives have been spent in upbuilding the communities which have been lucky enough to own them. All of them are men against whom no suspicion of dishonesty ever breathed. All of them have doubtless suffered more from this charge than a real criminal would have suffered from conviction and imprisonment. But at least they have the satisfaction of a vindication as complete as the law can make it. And the News frankly rejoices. Up till last winter the Government had no right of appeal in cases like the present. Last winter a bill was passed conferring on the Government the right of appeal in criminal cases where indictments were quashed by a judge, not where the facts were passed on by a jury. But this does not mean that the indicted men will have to again stand trial. The law in question was passed simply for the purpose of getting an even, standardized construction of the law from the highest court in the land. Hitherto one judge has declared the law to be this and another one has declared with equal force that the law was that, and the Government agents have been greatly puzzled by the conflicting interpretations. The Government's new right of criminal appeal insures that the law will be uniformly construed. But even if the Supreme Court should reverse Judge Lewis on this case, it will mean only a final statement of the meaning of the points of law involved. The old provision of the Constitution that no man shall twice be placed in jeopardy of life or limb for one offense still stands, and must stand forever.

Our only regret is that the good and necessary work of running down the land frauds seems so likely to cause trouble and expense to honorable and worthy men. Perhaps this is one of those faults that can not be helped, and must even be endured with what grace one may summon. Anyway, we are glad that in this case the wrong went no further, and that the decision of Judge Lewis was as sweeping as it is final.

And I want to say now for the information of the gentleman from New York, admirers of the President, and Members of this House that our citizens are willing and ready to meet the issue raised by the impulsive administration; but as to the purpose on the part of the latter I can not comprehend, unless to continue in the "lime light," and therefore the country will be saved—from the bureaucrat's point of view.

The article in the Washington Star of December 31, 1907, quotes the Commissioner of the Land Office as saying:

> They will call 60 to 80 violations of the land laws in Colorado to the attention of the grand jury, and some of these may involve a number of the very persons whom Judge Lewis has discharged.

This is subterfuge bordering on the farcical and is disseminated to the press of the country for the purpose of misleading the public as to so-called "land frauds" that do not and have not existed in Colorado.

Our citizens have submissively and with patience undergone these persecutions for alleged offenses, and every fair-minded citizen should join in commendation that we have in our country true judges, who have the courage of their convictions and believe in justice to every citizen and a real "square deal, emphasized."

The President called a special meeting of the Cabinet on December 31, 1907, to take action as to Judge Lewis's decision in the Colorado cases.

The President criticised the judiciary, and authorized the Attorney-General to say:

> The Government will use every means in its power to bring about in the higher courts disapproval of the decision of Judge Lewis.

The unprecedented and dictatorial encroachment of the Executive against the legislative and judicial departments of the Government is almost a daily threat to the peace and prosperity of the Republic, and should be knocked on the head by the constitutional decision of the Supreme Court.

As I prophesied in my general letter hereinbefore referred to, I quote the gist of the decision delivered by Justice White, of the Supreme Court of the United States, on January 4, 1909, all of the associate justices concurring as to the Colorado cases. He said:

> This also serves to demonstrate that no error was committed by the court below in holding that under section 5440 acts charged in the indictment could not possibly have constituted a defrauding of the United States in any manner or for any purpose within the intendment of the section.

Strange and miraculous to say, that same day, January 4, 1909, as to the Colorado cases, the decision by the Supreme Court of the United States knocked the administration legally on the head, as I had predicted in my open letter of January 10, 1908.

By the dictation of the President, the Attorney-General at Washington appealed these Colorado cases, with a great flourish, to the Supreme Court of the United States, and that grand body of just judges affirmed by unanimous decision—substantiated the United States district court of Colorado in dismissal of the cases.

It is unfortunate not only for President Roosevelt, but for the citizens of the Republic, that he has not a legal mind and no equipoise of executive reason, riding through and around the arena of political action on his broncho of arrogant, egotistical impulse, pretending to throw his lariat of execution at the heels and broad horns of capital, for the delectation of voting labor, and ending the scene with the cunning catch of a prairie wolf or a gopher.

In all of this fuss and feathers of the whole administration, he and his pliant Attorney-General have not sent a single "plutocrat" to the penitentiary.

Such a keen political speculator, and political and financial strenuosity has never been seen before in this Republic, and let us fervently hope that his like shall never be seen again.

Look at the paragraphs of his rattled messages and you will be startled to see and read the insinuations and abusive phrases against the legislative and judicial departments of the Government.

The liberty of the people is gradually and secretly stolen by sneaking executive encroachments, and even judicial decisions where the freedom of speech and of the press are denied, are a most outrageous injustice to the toiling multitude.

The voice of the people is over and above all constitutions, courts, and Congress.

President Roosevelt seems to think that he alone is the Government and that his ipse dixit must rule everybody, including the poor and friendless black soldiers of Brownsville, who were insulted, dismissed, and degraded without proof or trial by executive order and without any warrant of reason or law.

President Roosevelt runs the Government on the same principle that the beef trust runs its sausage factory, from a personal standpoint, using legislative and judicial pork as the crude material of his fantastic administration.

Mr. TAWNEY. Will the gentleman from Colorado——

The CHAIRMAN. Will the gentleman from Colorado suspend a moment?

Mr. TAWNEY. I yielded to the gentleman for the purpose of discussing the amendment offered or the motion made by the gentleman from New York [Mr. BENNET], not for the purpose of indulging in any personal abuse.

Mr. COOK of Colorado. All the remarks I have made relate solely to the subject-matter before the House at this time.

While imitating Rienzi and Cromwell in fooling the people, he is practicing the hypocrisy and dictatorship of Cleon and Dionysius and has built up a Roosevelt ring in the army, navy, and civil service, all for his personal and political glory, supreme in his impudence, vanity, arrogance, and imperial egotism.

His veto messages are made from the impulsive and ignorant information of his Cabinet clerks, and the vacillating Attorney-General is a weak legal reed of the Rough Rider's dependence, who even recently gave a false statement to the President upon the joint resolution passed by Congress determining the question of the boundary line between the States of Colorado and Oklahoma and the Territory of New Mexico.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. BENNET of New York. Mr. Chairman——

The CHAIRMAN. The Chair appeals to the gentleman to suspend. The time of the gentleman has again expired.

Mr. COOK of Colorado. The President, in his veto message, stated December 19, 1908——

The CHAIRMAN. The gentleman's time has expired.

Mr. STANLEY. I ask unanimous consent that the gentleman be allowed to conclude his remarks.

Mr. TAWNEY. I demand the regular order.

Mr. BENNET of New York. Mr. Chairman, I yield five minutes——

Mr. COOK of Colorado. Mr. Chairman, I ask for five minutes more.

Mr. TAWNEY. I have no more time to yield the gentleman.

Mr. COOK of Colorado. Then, Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

Mr. HOWLAND. I object.

Mr. TAWNEY. I demand the regular order.

The CHAIRMAN. The gentleman from Minnesota demands the regular order.

Mr. BENNET of New York. I yield five minutes to the gentleman from Tennessee [Mr. GAINES].

Mr. GAINES of Tennessee. Mr. Chairman, I stand now, and I have always stood, for the necessary appropriation for a well-regulated secret-service system, and whether it should be all in the Treasury Department or divided up between the other departments I do not know. That is a matter of detail. When the matter was up on May 1, 1908, I was in the Chamber, and the gentleman from New York [Mr. BENNET] in part said:

> You make utterly useless the efforts that have been made through the Secret Service for the last three or four years in these antitrust prosecutions in New York City.

I then asked him this question:

> The gentleman means, in state prosecutions or federal prosecutions?
> Mr. BENNET of New York. I mean federal prosecutions.

Now, then, a little later on, same day and debate, I asked the gentleman from Minnesota [Mr. TAWNEY] this—

> Has the Government used the secret-service agents in getting up testimony in these lawsuits——
>
> [Cries of "Vote!" "Vote!"]
>
> Mr. TAWNEY. I move that all debate on this paragraph and amendments be now closed.
>
> Mr. GAINES of Tennessee. Will the gentleman answer my question whether or not the Government uses the secret-service agents to get evidence in these lawsuits? (CONG. RECORD, p. 5560, May 1, 1908.)

I voted then and there against this limitation and think I did right, and now I am afraid to-day that you are again "cutting the dog's tail off just behind his ears." I hope this amendment will prevail and the proposition knocked out. That is the position I take now and took May 1, 1908, when this matter was up.

Now, then, Mr. Chairman, I find on investigation of this matter that Attorney-General Bonaparte, in his report to Congress for 1907, asked for a secret-service force to carry out the duties of the Department of Justice. He says that his department very much needed a "detective force." If I have only a few minutes and unless I can get my time extended, I will have to ask unanimous consent to put this recommendation in the RECORD as a part of my remarks.

The CHAIRMAN. Without objection, the gentleman from Tennessee may extend his remarks in the RECORD.

Mr. SHERLEY. I object.

Mr. GAINES of Tennessee. I hope the gentleman from Kentucky will not object.

Mr. SHERLEY. I have to make my objection general.

Mr. GAINES of Tennessee. Has the gentleman read the report?

Mr. SHERLEY. I have.

Mr. GAINES of Tennessee. Has the gentleman read the part of the report to which I refer?

Mr. SHERLEY. I have not only read that part of the report, but I have cross-examined the gentleman in relation to it.

Mr. GAINES of Tennessee. Here is the Attorney-General's report of 1908. Here is what the Attorney-General says in his last report of 1908:

> In my last annual report I called attention to the fact that this department was obliged to call upon the Treasury Department for detective service and had, in fact, no permanent detective force directly under its orders. Through the prohibition of its further use of the secret-service force, contained in the sundry civil appropriation act, approved May 27, 1908, it became necessary for the department to organize a small force of special agents of its own. Although such action was involuntary on the part of this department, the consequences of the innovation have been on the whole moderately satisfactory. The special agents, placed as they are under the direct orders of the chief examiner, who receives from them daily reports and summarizes these for submission each day to the Attorney-General, knows or ought to know at all times what they are doing and at what cost. Under these circumstances he may be justly held responsible for the efficiency and economy of the service rendered. The experience of the past six months has shown clearly that such a force is, under modern conditions, absolutely indispensable to the proper discharge of the duties of this department, and it is hoped that its merits will be augmented and its attendant expense reduced by further experience.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. GAINES of Tennessee. Mr. Chairman, I hope that we will not crush the enforcement of the law against land frauds and against conspiracy for the violation of interstate and foreign commerce law contrary to the Sherman antitrust law. That is where I stand and the way I will vote. [Applause.]

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. DENBY having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 21896) to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes.

SUNDRY CIVIL APPROPRIATION BILL.

The committee resumed its session.

Mr. TAWNEY. I now yield five minutes to the gentleman from New York [Mr. WALDO].

Mr. WALDO. Mr. Chairman, it seems to me that the most of this discussion has had little to do with the question as to whether the limitation should continue in the bill. There is no question raised, as I understand, by anyone that the $32,000,000 appropriated last year for the investigation and prevention of fraud and crime is not sufficient. It is my understanding that no substantial reduction is intended in the appropriation for this year. The only question here before the House is whether we believe in a central secret-service bureau, such as there is in Russia to-day, or whether we believe the separate departments should investigate the violations of law in those departments by a trained force of their own. That is all there is to this question. I believe that it would be a great blow to freedom and to free institutions if there should arise in this country any such great central secret-service bureau as there is in Russia. We do not need it here in this country, and there ought not to be any such bureau. Crimes are amply prosecuted. They are much better investigated and detected by the several departments of the Government, which have trained

men who understand the business of their different departments. Therefore I trust that the motion of the gentleman from New York will not prevail. [Applause.]

Mr. GAINES of Tennessee. Mr. Chairman, I ask unanimous consent to have read from the desk part of the Attorney-General's report of 1907 that I wanted to read a few minutes ago, but did not have time. It is right on the point, and we ought to have it read.

Mr. TAWNEY. Mr. Chairman, the time has been fixed for closing this debate and I must object.

Mr. GAINES of Tennessee. Will the gentleman give me the time to read it?

Mr. TAWNEY. In objecting, I wish to say to the gentleman from Tennessee that the document is a public document and everybody can get it who wants it. It has been printed in the hearings both this year and last year.

Mr. GAINES of Tennessee. It has not been read in this House at all. Does the gentleman object?

Mr. TAWNEY. I object, unless it comes out of the time of somebody else.

Mr. GAINES of Tennessee. I will ask the gentleman from New York to give me time to have this read.

Mr. BENNET of New York. I can not do it.

The CHAIRMAN. The gentleman from Minnesota has twenty-eight minutes remaining and the gentleman from New York eleven minutes.

Mr. BENNET of New York. Mr. Chairman, I yield five minutes to the gentleman from Wisconsin [Mr. COOPER].

Mr. COOPER of Wisconsin. Mr. Chairman, I think that there has been a confusion of the issue here. We have listened to abuse of the secret-service men and to diatribes more or less violent, not to say virulent, against one of the greatest of our Presidents, and all this has met with the applause and the laughter of Members of the House of Representatives. But the President is not the issue here. I was reminded, while listening to the gentleman from Colorado [Mr. COOK], of a similar utterance, about which I have read, made in Congress during the war by a "copperhead"—one of the men who, in the dark days of 1861 to 1865, when our soldiers were at the front, stayed at home and did his best to cripple their efforts to save the Nation.

That copperhead denounced the "emperor at the other end of the Avenue." Who was that "emperor?" He was the man to whose memory the civilized world has just paid homage, the apostle of liberty, Abraham Lincoln. [Applause.] Not long after that utterance a "copperhead" in my own State, in an editorial called upon somebody to kill Abraham Lincoln. I simply cite this, Mr. Chairman, to show that sometimes, in the heat of partisan discussion, men may speak of another whom, for some reason, they dislike, in a manner which subsequently they will regret. I prophesy that some day the gentleman from Colorado [Mr. COOK] will regret that, in the presence of the American people—yes, in the presence of the whole world—he thus characterized the President, to whom we owe the stopping of the awful war between Russia and Japan, to whom we owe the Panama Canal, to whom we owe the great remedial legislation of the last six years, the rate law, the pure-food law, the meat-inspection law, and the inauguration of the noble movement, destined to be world-wide in extent, for the conservation of the natural resources of the earth.

Whether or not he live to regret it, the man whom he has denounced will live with fame untarnished, in the galaxy of America's immortals.

Mr. Chairman, what is the issue here? Gentlemen have said with a great deal of earnestness, and they stated the truth, that there have been liberal appropriations for the work of men in the Interior Department to suppress crime; in the Treasury Department, in some other department, to suppress crime. That is very true, but the only question here involved is, Shall the law prevent the transfer of a skilled operative from one department to another—shall it prevent the transfer of a man who as a result of long service has demonstrated his skill? This paragraph if enacted into law will prevent such transfer. On this question let me call attention to an authority, well informed, respected by the people, and conservative, Hon. George B. Cortelyou, Secretary of the Treasury. Here is what he said in a letter to Senator Allison last spring after the House of Representatives had passed this bill and sent it to the Senate——

The CHAIRMAN. The time of the gentleman has expired.

Mr. BENNET of New York. I yield one minute to the gentleman from Georgia [Mr. EDWARDS] after first stating that I now hold in my hand the decision of the Supreme Court in the case to which the gentleman from Colorado [Mr. COOK] referred, and that it says distinctly, "reversed and remanded for further proceedings in conformity to this opinion."

Mr. EDWARDS of Georgia. Mr. Chairman, I am in favor of the amendment as offered by the gentleman from New York, to strike out this paragraph, because I believe that it will materially and directly hamper and hinder the use of the secret-service men in the detection of crime if this limitation is left in the bill. I believe the limitation should be stricken out in order that the secret-service men may be used by any branch of the Government so that they may be free to investigate crime, corruption, and graft wherever it may exist, from the lowest to the highest, from constable to and including the President himself.

There is no doubt but that the secret-service men have rendered good service to the Government, and there is no doubt but that they are necessary and should be provided for in a proper manner, and they should be free from the restrictions placed by this paragraph limiting their investigations to the work of any particular branch or service of the Government, which, if permitted to remain in the bill can not have, in my opinion, but one effect, and that is seriously to hinder the Government in the detection and prosecution of criminals in other branches and services of the Government.

Honest men ought not to dread an investigation; they ought rather to invite it; and dishonest men, no matter where they are found, ought to be investigated, exposed, and prosecuted for violations of the law, no matter what their standing in a social way, no matter what their positions in a political way. Crime should be run down and punished whenever and wherever it exists, and the Government should be free with all its agencies to accomplish this end. I hope, therefore, that the amendment to strike out the limitation will prevail.

Mr. BENNET of New York. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BENNET of New York. Has the gentleman from Minnesota or myself the right to close? I made the motion.

The CHAIRMAN. The Chair thinks the gentleman from New York has the right to close.

Mr. BENNET of New York. Then I will ask the gentleman from Minnesota to use up his time, with the statement that there is to be but one more speech on this side.

Mr. TAWNEY. Mr. Chairman, I——

Mr. HEPBURN. Mr. Chairman, before the gentleman begins, will he allow me to make an inquiry?

Mr. TAWNEY. Certainly.

Mr. HEPBURN. If this paragraph, beginning on line 25, page 63, should remain in the bill, will it be possible to use any part of the appropriation under this bill for the payment of secret-service men?

Mr. TAWNEY. What secret-service men does the gentleman from Iowa refer to now?

Mr. HEPBURN. I mean the men in the Secret Service Division in the Treasury Department.

Mr. TAWNEY. Do you mean the men appropriated for by the preceding item for the investigation and detection of counterfeiting?

Mr. HEPBURN. Well, I mean those men who may be detailed or transferred from the Secret Service Division, or those men who may at any time during the fiscal year 1910 have been employed by or under said Secret Service Division.

Mr. TAWNEY. I will say to the gentleman from Iowa this paragraph is identical, word for word, with the current law with respect to the use or employment of secret-service men in the Treasury Department.

Mr. HEPBURN. Now, was it the intention or not to prohibit the use of any money appropriated in this bill to the payment of compensation or expenses of any person who may at any time during the fiscal year 1910 have been employed by or under said secret-service division?

Mr. TAWNEY. That was the intention.

Mr. HEPBURN. It was the intention to do that?

Mr. TAWNEY. That has been the practice.

Mr. HEPBURN. To prevent the payment of these men.

Mr. TAWNEY. I did not understand the gentleman's question, if my colleague on the committee [Mr. FITZGERALD] is correct.

Mr. FITZGERALD. If the gentleman will permit me, the intention was to prevent the payment of any men in the Secret Service Division of the Treasury Department who are used in some other department of the Government. That is all.

Mr. HEPBURN. There are two classes of persons affected, as I understand it, under this paragraph.

Mr. TAWNEY. In a word, Mr. Chairman, in answer to the gentleman from Iowa, the purpose of this limitation was to prevent the practice of detailing men in the Secret Service Division. I will say further to the gentleman from Iowa that the department has construed the law as the committee intended when the provision was inserted in the bill.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. TAWNEY. I decline to yield for a moment. Mr. Chairman, I do not intend to occupy a great deal of time in discussing generally the use of the Secret Service in the various departments of our Government. That branch of the question has been fully covered by the gentleman from Iowa [Mr. SMITH]. This provision has provoked a great deal of discussion here and elsewhere. There has been more or less excitement with regard to this provision; there have been a great many misstatements made here and elsewhere with regard to the effect of this provision. It has been said that this provision has restricted the activities of the various departments of the Government in the investigation of fraud and in the detection of crime. When the Committee on Appropriations commenced the investigation of the estimates for sundry civil expenditures those estimates covered every branch of the public service except the Post-Office Department. We took occasion to inquire of the heads of departments who appeared before the committee as to the effect of this provision with regard to their activities with respect to the investigation of fraud and in the detection of crime.

And where the head of a department did not appear before the committee we interrogated those who were sent to represent the department in respect to their estimates for this service. And I will say here and now that you can search the testimony published in the hearings before the Committee on Appropriations and you will not find a single officer of the Government that appeared before that committee, except the Chief of the Secret Service, who complained in regard of this limitation, many of them commending this provision in the interest of better administration and great economy in the performance of the public service. This provision, therefore, is again recommended by the Committee on Appropriations to the House of Representatives with the implied or expressed approval of the head of every department that appeared before the Committee on Appropriations in the consideration of the estimates for these departments.

The heads of all the departments did not appear before us, but their representatives that were sent there for the purpose of representing the departments and giving testimony regarding their estimates were all interrogated, and without a single exception, outside of the Chief of the Secret Service, not one of them complained about this provision having hampered them in the least in regard to the enforcement of the laws and the prevention of depredations upon the public domain, or the detection of crime in the administration of the law over which these departments have exclusive jurisdiction.

Mr. PARSONS. Mr. Chairman, will the gentleman yield for a question?

Mr. TAWNEY. I will yield for a question.

Mr. PARSONS. Were they asked whether they approved of the limitation?

Mr. TAWNEY. I do not know that they were asked the specific question in every case, but they were all asked if this provision in any way whatever hampered them in the administration of the laws, detection of fraud, and the detection of crime in their departments, and the answer in every case was in the negative. And the Attorney-General, the chief prosecuting officer of the Nation, the man who stands at the head of the department charged with the responsibility of enforcing the laws of the United States, of bringing criminals to justice and punishment, told the committee in substance that under this provision, or that under the existing conditions, he was administering this branch of the service more satisfactorily than theretofore. And why? He has established a secret service in his department, known as "special agents." Now, the Attorney-General explained why his present organization was more effective and satisfactory than the organization detailed from the Treasury Department to the Department of Justice, and the reason was this:

Under the practice that obtained before this limitation was enacted to whom did the secret-service men in the Treasury Department report? To the Attorney-General? No. They were being paid out of appropriations made by Congress for the Department of Justice, but the amount of their compensation was fixed by the Secretary of the Treasury at the instance of the Chief of the Secret Service, and they reported to the Chief of the Secret Service and not to the head of the Department of Justice. The Attorney-General, as you will see from his testimony taken before the Committee on Appropriations, testified that he never knew what these men were doing that were detailed from the Secret Service of the Treasury Department to his department.

Mr. BENNET of New York. Now will the gentleman yield for a question?

Mr. TAWNEY. One moment. He said that they never reported to him, that they reported to Mr. Wilkie, and occasionally reported to the local district attorney under whose immediate supervision they were.

Now I yield to the gentleman.

Mr. BENNET of New York. Now, I will ask the gentleman, first, if the Attorney-General did not say not occasionally, but that the secret-service men reported to the Assistant Attorneys-General under whom they were, and if that does not appear in this hearing?

Mr. TAWNEY. He did; and he also said they made daily reports to the heads of the Secret Service, a fact which the Chief of the Secret Service was not willing to admit when before either the select committee or the Committee on Appropriations.

Mr. BENNET of New York. Now, I will ask the gentleman a second question, if Mr. Bonaparte did not say this, referring to his own force—

> I do not think its members are generally as experienced as the members of the secret-service force. I think they are fairly efficient men, and, on the whole, the work is done as well as I think it could reasonably be expected, under the circumstances. The principal weak point about it is the necessity of occasionally employing men for short periods, and as to those we have to sometimes take chances.

Mr. TAWNEY. That was the testimony of the Attorney-General; but I want to impress this fact upon the membership of this committee, that there was not a single criticism uttered by the head of any department or by any man the representative of any department who appeared before the Committee on Appropriations in these hearings respecting this limitation, except the Chief of the Secret Service himself. I said those who appeared before the committee. Mr. Cortelyou wrote a letter in regard to it, but to offset that letter I have the——

Mr. PARSONS. Will the gentleman yield?

Mr. TAWNEY. I decline to yield. I want to call attention to this important fact, that here is a deficiency estimate, under the head of "Detecting counterfeiting and other crimes," amounting to $20,000, and accompanying that estimate the Secretary of the Treasury submits, without criticism, but for continuation during the remainder of this fiscal year, as to this $20,000, or whatever amount Congress may appropriate, the very limitation that is now under consideration.

Mr. PARSONS. Will the gentleman yield now to a question?

Mr. TAWNEY. Yes. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has seven minutes remaining.

Mr. PARSONS. Will the gentleman point out where in that letter there is anything which shows that he requests that limitation? Is it not simply inserted as a part of the present law, and does not his recommendation simply mean that he forwards an estimate of appropriations to complete the service for the fiscal year?

Mr. TAWNEY. Mr. Chairman, I will leave the Members of the House to draw their conclusion as to what the Secretary of the Treasury means when he submits an estimate for an appropriation and in connection with that estimate submits the limitation now existing in law, which would be a limitation on the appropriation, on the very money the Secretary of the Treasury is asking for.

Mr. PARSONS. Is it not to complete the service? And would he not also naturally submit the limitation?

Mr. TAWNEY. Not at all. If the appropriation made for the current law is insufficient, and the limitation on the appropriation is objectionable, and he wants an additional appropriation for the service to the end of the fiscal year and does not approve of that limitation, why does he ask that with the limitation to apply to the additional appropriation?

Mr. PARSONS. He does not ask it.

Mr. TAWNEY. He submits it together with his estimate, On the contrary, the uniform rule is that when a department wants to strike out or does not approve of a recommendation, they omit that part of the law which they do not approve in submitting their estimates.

Now, Mr. Chairman, in conclusion, let me call attention to the fact that all of this agitation, all of this discussion, all of this excitement which has been created and carried on here for

the past two months in respect to this limitation and its effect upon the activities of the departments in respect to the investigation of fraud and the detection of crime, in my judgment, does not have its origin in this limitation, except only in so far as the activities of the Chief of the Secret Service of the Treasury Department has been affected by that limitation. He is the man who started this campaign; he is the man who has carried on this campaign against the Congress of the United States for restricting his activities. To the several men, the nine men, who were transferred from the Treasury Department to the Department of Justice last June Mr. Wilkie wrote each one of them a letter. One of these letters I hold in my hand, written on the official stationery of the Secret Service Bureau and signed by John E. Wilkie. In order to show his contempt for the Congress of the United States because of its having assumed to interfere with his activities in building up a large and powerful Secret Service Bureau in all the departments of the Government, I will read this letter:

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
SECRET SERVICE DIVISION,
Washington, June 27, 1908.

SIR: In order to meet certain demands of the Department of Justice for the investigation of crimes, and to conform strictly with the provisions of the sundry civil act for the fiscal year 1909, the Attorney-General will appoint as special agents in the Department of Justice a number of agents recommended by this division. For the purpose of completing the record of the Treasury Department in all cases in which the Attorney-General contemplates an appointment, you will please sign the inclosed resignation and return it promptly to this office; and you will provide yourself with one of the blank oaths relating to Department of Justice appointments, and upon the 1st day of July execute that oath and forward it to the appointment clerk, Department of Justice, Washington, D. C.

Prior to this time these men employed in the Department of Justice who were detailed from the Secret Service Division never took the oath of office in the Department of Justice. They were still on the roll and served under the oath taken as members of the Secret Service Division of the Treasury Department. Therefore there is no doubt of the violation of the law, the detail of these men, or about the fact that they were detailed and not loaned.

On the last day of the present fiscal year you will surrender to your immediate superior your official badge, commission book, service revolver, handcuffs, press-copy book, and all other official property belonging to the Secret Service Division, taking his receipt for property so delivered.

The opinion is expressed that the technical interference with the practice which has prevailed in the past with reference to supplying experienced agents for special investigations will disappear at the close of the next fiscal year; in other words, that at the coming session of Congress there will be such legislation as will satisfactorily readjust matters.

This letter is dated June 27, 1908, and marks the beginning of the campaign for the readjustment by legislation at this session of Congress of the matters referred to by Mr. Wilkie in this paragraph of his letter. This limitation was regarded by him then as it is regarded by him now—"a technical interference" with his activities.

Your forthcoming appointment in the Department of Justice, therefore, is considered temporary in its nature, and the agents so appointed will be eligible for reappointment in this division at any time during the fiscal year 1909; and such reappointment, whether during the fiscal year or at its close, will depend wholly upon the character of the work performed by the agent of the department in which he is thus appointed. It is assumed, as a matter of course, that persons to whom these appointments are given will render to the Department of Justice the same loyal and efficient service which has characterized the performance of their duties in the Treasury Department; and only a clean and satisfactory record in the Department of Justice will insure a return to this division when the opportunity for reappointment occurs.

You have doubtless observed that the appropriation for suppressing counterfeiting was reduced at the last session of Congress, and this in itself would necessitate the curtailment of the field force in the division during the coming fiscal year. The contemplated appointment in the Department of Justice offers a fortunate solution of what might otherwise be a hardship to agents whose services could not be retained in this division beyond the close of the present fiscal year.

A formal letter of instructions and information as to compensation and headquarters, I am advised, will be supplied to you in ample time by the Department of Justice.

In severing the official relations which have existed between us, I desire that you should understand that your work for this division has been appreciated and that it is my hope that the opportunity for reappointment may not be long delayed. I hope, too, that you will always feel at liberty to consult me in any official matters in which you think I may be of assistance to you, and you have my assurance that your work in the new field will be watched with great personal interest.

Respectfully, yours,

JOHN E. WILKIE.

Special operative.

Please execute your oath as "special agent," but do not forward it until after the receipt of your formal letter of appointment.

Mr. Chairman, this letter is proof that last June, if not before, the Chief of the Secret Service conceived the idea that he could secure a modification or a repeal of this limitation, the law which has restricted his activities in the matter of building up a large central secret-service bureau under no limitations, under no restrictions, and responsible to nobody but himself. [Applause.]

The CHAIRMAN. The gentleman from New York [Mr. BENNET] is recognized to close the debate in four minutes.

Mr. BENNET of New York. I yield all my time to the gentleman from Nebraska [Mr. NORRIS].

Mr. NORRIS. Mr. Chairman, within the four minutes' time allotted to me I can not review as I would like to the argument that has been made against the motion of the gentleman from New York. I desire, however, briefly to call the attention of Members to what I believe to be the fact, and that is that practically all of the argument that has been made against the motion is absolutely immaterial and made upon immaterial propositions.

The motion of the gentleman from New York is to strike out the paragraph commencing at the bottom of page 63. That paragraph simply limits the use of the detective service in the Treasury Department and prevents its transfer, so that the only question before us is whether it shall be lawful to transfer from one department to another the secret-service men in the employ of the Secret Service Bureau in the Treasury Department.

I submit, Mr. Chairman, that it is no argument to retain this in the bill to make an attack upon any of the departments of the Government, as has been made, to show that the secret-service men are incompetent; because, as a matter of fact, they will be transferred only upon application, and if they are as vile and as worthless as some gentlemen would have us believe no one would apply for their services in any other department.

The chairman of the committee [Mr. TAWNEY] has made an argument from which he would have us imply that if it were not for this limitation the Secret Service Bureau, for instance, in the Department of Justice, could not have been built up. Why, I admit, and everybody admits, I presume——

Mr. TAWNEY. If the gentleman will pardon me——

Mr. NORRIS. Now, I hope the gentleman will not take my time.

Mr. TAWNEY. I did not intend to imply anything of that kind, and I do not think I did, because the authority for the creation of the organization in the Department of Justice existed before, as it does now.

Mr. NORRIS. That is what I was about to say, that the authority to create what was created in the Department of Justice existed before this limitation was ever put on the statute books, and the Attorney-General had the authority then, as he has had since, to organize——

Mr. TAWNEY. But he did not know it.

Mr. NORRIS. I know he did not. That does not have anything to do with this limitation. It strikes me, Mr. Chairman, that as a business proposition we ought to permit secret-service men, or the special agents, if you want to call them that, in one department to be transferred upon request of another department. I believe each one ought to have, as they do have and as they will have if this paragraph is stricken out, the right to organize and maintain a secret-service bureau of their own. That is all right. But it may be there will come times when one department may not be using all of its secret-service men, when there may be a particular demand in another department for additional secret-service men; and a law that would permit them to be transferred from one department to another would not only be in the interest of justice and economy, but in the interest of efficient service. I know that it is true that men who are particularly trained in land laws can do better service as special agents there than they can in some other department. No one has ever denied that. The striking out of this provision in the bill will not prevent that from being done as it is now and as it always has been done. It will simply give to the different departments the right to ask from the Secret Service Division the transfer of men if they desire to have those men.

The CHAIRMAN. The time of the gentleman has expired. All time is exhausted. The question is on the amendment offered by the gentleman from New York [Mr. BENNET] to strike out the paragraph.

The question was taken; and on a division (demanded by Mr. BENNET of New York) there were 41 ayes and 153 noes.

So the amendment was lost.

Mr. GAINES of Tennessee. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Insert, at the end of line 5, page 64:

"*Provided further*, That this limitation shall not apply to the enforcement of the law entitled 'An act to protect commerce and trade against unlawful restraint and monopoly, approved July 2, 1890, commonly known as the Sherman antitrust law.'"

The CHAIRMAN. All debate is exhausted, and the question is on the amendment offered by the gentleman from Tennessee.

The question was taken; and on a division (demanded by Mr. GAINES of Tennessee) there were 27 ayes and 103 noes.

Mr. GAINES of Tennessee. I demand tellers.

The question of ordering tellers was taken; and but 14 gentleman having arisen, tellers were refused.

Mr. DRISCOLL. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

On page 64, line 5, after the word "division," insert:
"*Provided*, That the Secretary of the Treasury may, in his discretion, employ the secret-service force in the investigation and suppression of crimes committed in his department."

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

Mr. GAINES of Tennessee. Mr. Chairman, let us have the amendment again reported; we did not hear it on this side.

The CHAIRMAN. Without objection, the amendment will be again reported.

The Clerk again read the proposed amendment.

The question was taken; and on a division (demanded by Mr. DRISCOLL) there were 36 ayes and 74 noes.

Mr. DRISCOLL. I demand tellers.

The question of ordering tellers was taken; and but six Members having arisen, tellers were refused.

So the amendment was lost.

Mr. NORRIS. Mr. Chairman, I offer the following amendment.

On page 64, in line 3, after the word "department," strike out the balance of the paragraph.

The Clerk read as follows:

Page 64, line 3, after the word "department," strike out the following: "Or who may at any time during the fiscal year 1910 have been employed by or under said Secret Service Division."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Nebraska.

The question was taken, and the amendment was lost.

The Clerk read as follows:

Division of fish culture—Office: Assistant in charge, $2,700; superintendent of car and messenger service, $1,600; 1 clerk of class 3; 2 clerks of class 2; 2 clerks of class 1; 1 clerk, $720; in all, $11,820.

Mr. GAINES of Tennessee. Mr. Chairman, I move to strike out the last word. I would like to ask the gentleman in charge of the bill where we get that fish car? I see that we have a superintendent of the car and messenger service. Is it owned by the Government or the railroad?

Mr. TAWNEY. It is owned by the Government. We have three of them. There is a crew provided for in this bill for each car.

The Clerk read as follows:

St. Johnsbury (Vt.) Station: Superintendent, $1,500; fish culturist, $900; skilled laborer, $720; 2 laborers, at $600 each; in all, $4,320.

Mr. GAINES of Tennessee. Mr. Chairman, I move to strike out the last word. Will the gentleman from Minnesota inform the committee how much it costs to haul that "fish" car around over the country?

Mr. TAWNEY. I do not know how much it costs; the gentleman can get the information by addressing the Commissioner of Fisheries. I have no information outside of the personnel attached to the cars.

Mr. GAINES of Tennessee. I am not speaking about that. I am talking about hauling the cars over the country.

Mr. TAWNEY. I presume it is the same mileage that the railroad company would charge the gentleman or anybody else that employs the railroad company for hauling a private car.

Mr. GAINES of Tennessee. Regularly, all the time?

Mr. TAWNEY. Certainly; the railroad company can not discriminate in favor of the Government.

Mr. GAINES of Tennessee. Do we appropriate for it specifically?

Mr. TAWNEY. It comes out of the general appropriation for the Bureau of Fisheries.

Mr. GAINES of Tennessee. Then, we are appropriating for hauling these cars without knowing how much we pay.

Mr. TAWNEY. We are paying the schedule rate, whatever it is.

Mr. GAINES of Tennessee. I really would like to know, and I further would like to know whether or not, since the Hepburn railroad law was passed, they are charging more for hauling these cars than they did before that law.

Mr. TAWNEY. The gentleman from Tennessee would be consuming his own time and not the time of others if he would go to the telephone and call up the Commissioner of Fisheries.

Mr. GAINES of Tennessee. I will call up the gentleman, but I think the chairman of the Committee on Appropriations who reported this bill ought to know something about it.

Mr. TAWNEY. I would say to the gentleman from Tennessee——

Mr. GAINES of Tennessee. Mr. Chairman, I have called up a good many officers by telephone. I called up the Indianhead powder officer, and found they needed and wanted $250,000 to enlarge the government powder plant to relieve the Government from the powder trust. The committee had not brought in that evidence here, and I could not get it from anybody on the committee or in the House; but I got up early the next morning and telephoned to the "ground floor," and Lieutenant Jackson, in charge, as the "Jacksons" always do, told me the truth about it, and as a result of that we got $250,000 into the bill, and it will be made law. Now, I do not want to telephone to all the "Jacksons" in the country, nor do I intend to do so, because, unfortunately for the country, the "Jacksons" are not running the country now.

Mr. TAWNEY. The gentleman from Tennessee knows that we have a general law——

Mr. GAINES of Tennessee. I know that.

Mr. TAWNEY. We are paying the commercial rate, whatever it is.

Mr. GAINES of Tennessee. Does the gentleman officially know that we are paying the commercial rate?

Mr. TAWNEY. Except on land-grant railroads.

Mr. MANN. The Government is not obliged under the Hepburn Act to pay the current freight rates, and probably does not pay them.

Mr. GAINES of Tennessee. Tell us why that is not the law.

Mr. MANN. Because there is an express exception in the interstate-commerce law of the federal and state governments and even of local municipalities from the provisions of the law as to the rates on freight, and most of the municipalities where they have freight have been getting lower freight rates than the current schedule rates.

Mr. GAINES of Tennessee. Does the gentleman know what we pay for hauling these fish cars?

Mr. MANN. I do not.

Mr. GAINES of Tennessee. I regret that I have to take up the time of the committee to get this information, and yet we are without it.

Mr. MANN. Of course there would be no schedule for hauling cars like these fish cars.

Mr. GAINES of Tennessee. I think they ought to charge less, because we are constantly hauling the fish.

Mr. MANN. Probably they do. Probably there is some special arrangement made.

The Clerk read as follows:

Biological Station, Fairport, Iowa: Director, at the rate of $1,800 per annum; superintendent of fish culture, at the rate of $1,500 per annum; scientific assistant, at the rate of $1,400 per annum; scientific assistant, at the rate of $1,200 per annum; foreman, at the rate of $1,200 per annum; shell expert, at the rate of $1,200 per annum; engineer, at the rate of $1,000 per annum; two firemen, at the rate of $600 per annum each; two laborers, at the rate of $600 per annum each; in all, $7,800 or so much thereof as may be necessary.

Mr. MANN. Mr. Chairman, I reserve the point of order on the paragraph.

The CHAIRMAN. The gentleman from Illinois reserves the point of order.

Mr. MANN. Mr. Chairman, I withdraw the point of order and move to strike out the last word.

Mr. COX of Indiana. Mr. Chairman, I renew the point of order.

Mr. MANN. Then that can be settled before I make my motion.

Mr. TAWNEY. I make the point of order that the point of order comes too late. The gentleman from Illinois had made the motion to strike out the last word.

Mr. COX of Indiana. I will state to the Chair that before the gentleman had made his motion to strike out the last word I had renewed the point of order.

The CHAIRMAN. The Chair thinks the point of order is not too late.

Mr. TAWNEY. Is it the paragraph beginning on page 91, line 7?

Mr. COX of Indiana. Yes. I would like to ask the chairman of the committee for some information. Has any law passed Congress authorizing the establishment of this biological station?

Mr. TAWNEY. Yes.

Mr. COX of Indiana. When did it pass?

Mr. TAWNEY. Two years ago.

Mr. MANN. Last year.

Mr. TAWNEY. I thought it was about two years ago—May 27, 1908.

Mr. COX of Indiana. Does the gentleman say that the bill authorizing this station passed Congress?

Mr. MANN. Oh, here is the law.

Mr. TAWNEY. Yes.

Mr. COX of Indiana. Is not this the truth about this biological station now under consideration, that the bill was introduced in Congress, referred to the Committee on the Merchant Marine and Fisheries, passed out of the committee, and finally reached the calendar; and, indeed, did not pass Congress, but it was simply put into the appropriation bill?

Mr. TAWNEY. I do not know what the history of the bill is. The provision in the sundry civil bill authorizing this biological station was inserted in the sundry civil bill as an amendment in the Senate and concurred in by the House.

Mr. COX of Indiana. Then there is no law authorizing the establishment of this biological station except the current appropriation bill, as passed at the last Congress. Is that correct?

Mr. TAWNEY. So far as I know that is a correct statement of the facts. That is sufficient for the rules of the House. That is the law establishing and authorizing the establishment of this station, and under that law and the appropriation heretofore made the station has been located and is now in course of construction and will be completed for service about the first of November, 1909.

Mr. COX of Indiana. Mr. Chairman, as I recall the history of this legislation, it is about as follows: A bill was introduced for the purpose of establishing, first, a fish-cultural station somewhere in the upper Mississippi Valley. That bill was referred to the Committee on the Merchant Marine and Fisheries. Later on it was amended so as to establish a biological station somewhere in the upper Mississippi Valley.

Mr. DAWSON. If the gentleman will permit me to correct a slight inaccuracy, the original bill provided for a biological and fish-cultural station.

Mr. COX of Indiana. Probably that is correct, and a fish-cultural station was eliminated from the bill. That bill passed our committee and was put upon the calendar. I never heard anything more about the bill until last year, when the sundry civil appropriation bill passed, and I realized for the first time that an appropriation had been made for the establishment of that biological station in the upper Mississippi Valley.

Mr. MANN. Will the gentleman permit me in part to help educate him?

Mr. COX of Indiana. I need it, whether I will permit it or not.

Mr. MANN. The distinguished gentleman who introduced the bill was the gentleman from Iowa [Mr. DAWSON].

Mr. COX of Indiana. I am satisfied of that.

Mr. MANN. The bill that was introduced into the House has nothing to do with the legislation; that bill is still on the calendar, if it has not been stricken off by unanimous consent. It never was passed, but the distinguished Senator from Iowa, who has now passed on, was in a position in the Senate where he was able to do a good turn, very likely, for the people, certainly for the fresh-water mussels, and certainly for the gentleman from Iowa, and he put that item in the bill in the Senate and the House agreed to it, although the attention of the House was called to it.

Mr. COX of Indiana. I think that is correct, and I want further to call the attention of the committee and the——

Mr. MANN. It only shows how easy it is once in a while to do a thing——

Mr. COX of Indiana. Indirectly where you can not do it directly; I learned that. I want to call the attention of the committee to this one further fact. The underlying principle for this biological station, I think, is absolutely wrong. I do not think the principle is right. The whole theory upon which this legislation was asked was solely for the purpose of enabling the manufacturers of pearl buttons in the United States to get the Government to go into the industry of determining or devising from a scientific standpoint the best way and manner of perpetuating certain mussels, and I wonder, Mr. Chairman, whether or not the Government of the United States should go into that line of business and investigate for the sole purpose of furnishing the manufacturers of this country free raw material.

I recall looking up the duty there was upon pearl buttons in this country, and while I am unable at this time to state the exact amount of duty there is imposed upon the pearl button under the Dingley law, I will say that it is an enormous duty, so under a law of this kind the Government of the United States is undertaking to develop a theory to furnish free raw material for the manufacturers of this country and at the same time imposing an immense tariff duty upon the manufactured product, and I believe that theory of legislation is radically wrong.

Mr. DAWSON. Will the gentleman yield for a question?

Mr. COX of Indiana. Yes.

Mr. DAWSON. The gentleman, as I recall it, is a member of the Committee on Merchant Marine and Fisheries, and I would like to ask the gentleman if he signed a minority report against a bill similar to this which I understand has been reported at this session of Congress?

Mr. COX of Indiana. I understand the minority report is being prepared, but I will say to the gentleman in reply, that on principle I am opposed to all legislation of this kind, because I think it to be radical, erroneous in theory as well as in practice.

Mr. DAWSON. Mr. Chairman, will the gentleman yield for one more question?

Mr. COX of Indiana. Yes.

Mr. DAWSON. Does not the gentleman know that it is an absolute fact that since the tariff was laid that pearl buttons are now sold cheaper to the consumers in the United States than they were before, when we were sending our money to Austria?

Mr. COX of Indiana. I did not know that, but I do not think that enters into this argument for the purpose of maintaining the gentleman's position in the least.

Mr. DAWSON. I will say to the gentleman that is the fact.

Mr. COX of Indiana. I insist, Mr. Chairman, upon the point of order.

Mr. DAWSON. Mr. Chairman, I would like to be heard briefly on the point of order.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. DAWSON. Mr. Chairman, it does not seem to me the point of order can possibly lie against this paragraph in the bill. The act approved May 27, 1908, provided for the establishment of a biological station on the upper Mississippi Valley, and appropriated $25,000 for that purpose. Under the authorization of the act the Commissioner of Fisheries has gone forward and established this station at Fairport, Iowa. The paragraph in this bill, against which the gentleman now seeks to raise the point of order, simply provides for the personnel of that station. If the point of order is sustained, Mr. Chairman, we will be in the position of Congress by law establishing this biological station and yet being prevented from appropriating or providing the officials necessary to conduct that station. By law we have provided for the station and appropriated the money for its construction. It seems to me it would be perfectly ridiculous and absurd to think that the point of order would lie against an appropriation simply to provide the employees for that station. If the point of order is good, then we would simply have a station located out there on the Mississippi River, with no one to conduct it. Certainly that provision of law creating the station carries with it the authority to provide the necessary personnel for the management and conduct of that station. It seems to me, Mr. Chairman, there can be no question but that the point of order does not lie against the paragraph. With regard to the merits of the proposition, I shall be glad to have an opportunity to discuss that briefly after the point of order is disposed of.

Mr. TAWNEY. Mr. Chairman, in addition to the fact that this biological station is authorized by law, the station has been established, the work of completing it or preparing it for the uses for which it was established is now going on—a public work in progress, originally authorized by law.

The CHAIRMAN. The law providing for the establishment of this station, as the Chair understands it, reads as follows:

Biological station, Mississippi River Valley: To enable the Secretary of Commerce and Labor to establish a biological station for the propagation of fresh-water mussels in the upper Mississippi Valley, at some suitable point to be selected by the Secretary of Commerce and Labor, including the purchase of site, construction of buildings and ponds, and equipment, $25,000.

Mr. DAWSON. If the Chair will permit, that is almost, practically, the exact language that has been employed in the establishment of every fish hatchery in the United States.

The CHAIRMAN. The section which the Chair has read is the section under which the biological station in question was established.

Mr. TAWNEY. That is the law under which the station was established and will be completed, and the paragraph authorized the employment of the necessary employees.

Mr. DAWSON. That law is identical with the laws that established all these other stations the personnel of which is provided for in this bill.

The CHAIRMAN. The Chair thinks the section is subject to the point of order and is clearly obnoxious to the rule. It has been held, for instance, that a specific appropriation for designated officials of an exposition at stated salaries, there being no prior legislation creating those places and fixing those salaries, is subject to the point of order, although a general appropriation for the exposition was authorized by law. There is no question, in the opinion of the Chair, but that a lump-sum appropriation might be made to continue this particular establishment, but that does not authorize creating the posts and fixing various salaries. The Chair thinks it is clearly obnoxious to the rule and sustains the point of order.

Mr. TAWNEY. Before the Chair rules on the point of order, do I understand the ruling would go to the extent of holding that the Congress of the United States, after having authorized the establishment of a biological station and erection of buildings, then would have to have a new authorization in order to employ people necessary to operate that station?

The CHAIRMAN. Not necessarily so.

Mr. TAWNEY. It seems to me that would be the logic of the Chair's decision.

The CHAIRMAN. The statement of the gentleman from Minnesota [Mr. TAWNEY] is entirely too sweeping. It is simply legislation coming from the Appropriations Committee for the purpose of creating certain positions, which is not in order on this bill under the rule.

Mr. TAWNEY. Do I understand that we can appropriate in a lump sum?

The CHAIRMAN. The Chair thinks so, unquestionably.

Mr. TAWNEY. And give the Commissioner of Fisheries the discretion of paying salaries, instead of our fixing them ourselves?

The CHAIRMAN. The Chair thinks that under the precedents you can appropriate a lump sum for the purpose of carrying on and continuing that work as a work in progress.

Mr. MANN. Will the Chair hear me a moment?

The CHAIRMAN. The Chair will hear the gentleman from Illinois.

Mr. MANN. The decision of the Chair is quite important, because for years it has been the established custom of the Committee on Merchant Marine and Fisheries to report bills for fish-hatchery stations in a particular form. It makes no difference how a Member may introduce a bill for a fish hatchery; it comes out of the committee, if it comes out at all, in a specified form adopted by the committee, and hence it is important to have the ruling determine whether that form is of any value or not. There are on the calendar now some 30 or 40 bills reported from the Committee on Merchant Marine and Fisheries for the establishment of fish-hatchery stations, every one of which would leave in the end an item for the maintenance of the station subject to the point of order, so that if those bills should be passed it would either be impossible to man them or else the Committee on Appropriations must reform its method of appropriating. While I do not undertake to say that the Chair is in error at this time, I think it is very important for us to be sure that the Chair is right in making the ruling, because it is going to overturn the established custom of the House in regard to the matter if the Chair rules that it is subject to a point of order.

Now, the question is whether, when we authorize the establishment and equipment of a fish hatchery, we thereby confer upon the Committee on Appropriations authority in an appropriation bill to recommend or to present in the bill a proposition to pay the operatives at that fish hatchery by station, or whether we require them to appropriate a lump sum without any control over the question of salary, or leave it without any equipment to operate. It certainly is not the intention of Congress to pass a law providing that a fish hatchery shall be constructed and equipped and leave it without being operated. It must be assumed, therefore, that there is some way in the law and under the rules of the House to provide for the persons who shall operate the fish hatchery. Now, the Chair states that that shall be done by a lump-sum appropriation; and that is the reason why I am addressing the Chair now, because under the ruling of the Chair the House will have no control over the amount which the Commissioner of Fisheries may pay for superintendents and fishery experts or for other persons connected with the fish-hatchery stations.

Of course if that be the rule we will have, that will have to be the form adopted by the Committee on Appropriations, which in the end will lead to untold extravagance. We now appropriate more money under the present system for the superintendents of fish-hatchery stations than ought to be, because the commissioner insists on paying them such high prices; and if we can only appropriate a lump sum, without any control over the salaries, it will cost a great deal of money.

Now, it seems to me that where Congress authorizes the establishment of a fish hatchery it thereby confers upon itself the right, in an appropriation bill, the first time the matter comes up, to provide for the persons who shall do the work at the fish hatchery. Doubtless thereafter a change of the salaries would be subject to a point of order, but unless such a construction is had it is a paralyzer to economy.

The CHAIRMAN. The Chair thinks that there is a distinction between a case of this class and where a department is established by act of Congress, because in the latter case the positions are named by legislation. The officers are created and the salaries are fixed by legislation.

Mr. MANN. I had the honor to report in a bill to this House creating the only new department which has been created in the memory of most gentlemen in the House. That does not provide, and intentionally did not provide, for the specific places or the salary, the theory being that when Congress provided for a department of the Government, providing no force, it believed that it ought to remain with the House to determine what places there should be and what salaries there should be. The only instance that I recall that violates that principle is the Department of Labor, where a specific number of officials were created, and for years, because of that fact, and because they had no work for that specified number of individuals to perform, Congress was asked constantly to add new work of investigation to that bureau; and for that very reason when we created the Department of Commerce and Labor we did not provide for officials except the chiefs of the bureaus, the Assistant Secretary, and Secretary, but left them to be provided for by Congresses in the future. Of course there was this distinction, which I freely state, there was authority given to provide clerks.

The CHAIRMAN. If the gentleman introduced a bill creating a department in the manner in which he stated, it is entirely different from the laws creating the departments previously created. The Chair has here the Revised Statutes creating the different departments, and the entire theory is that the offices shall be fixed by legislation and the salaries fixed by legislation. The Chair has it here.

Mr. MANN. They were not created in the statutes. The theory was that Congress should fix the places and the salaries.

The CHAIRMAN. The offices are created in the statutes in the other departments. The Chair will state, with the permission of the gentleman from Illinois, that otherwise the creation of offices in the future in all the departments, in all lines of public service, would be left absolutely in the hands of the Committee on Appropriations, which could create any office they saw fit if Congress did not watch the appropriations.

Mr. TAWNEY. As I understand the——

Mr. MANN. I venture to say to the Chair, very frankly, that I think in all the laws creating the departments of the Government Congress does not create the places by name.

The CHAIRMAN. And the gentleman from Illinois well knows that a great many of the places heretofore brought in on appropriation bills have been subject to points of order, and has seen them go out from time to time on the very theory that they had not been provided for by prior legislation. The gentleman understands that.

Mr. MANN. Many of them have been. I remember once when the bill was very badly injured on that very point.

The CHAIRMAN. Now, here is a decision——

Mr. TAWNEY. If the Chair will pardon me for a moment, if I understand the idea of the Chair, it is that there would be a limitation upon the Appropriations Committee as to the number of places that they might authorize and appropriate for; but, notwithstanding that fact, if they saw fit to report a lump-sum appropriation for salaries and everything, in any amount, it would not be subject to the point of order.

The CHAIRMAN. The Chair has not said that they might appropriate for salaries or any other specific purpose; but they might appropriate a lump sum, if the majority of the House saw fit to do so, for the purpose of proceeding with and continuing the object of the original establishment of the enterprise, whatever its character was.

Mr. TAWNEY. That would mean the same thing.

The CHAIRMAN. According to law——

Mr. TAWNEY. That would mean the same thing. The paragraph in question is a restriction upon the amount appropriated for the continuation of that service.

The CHAIRMAN. That is probably true, but it is a restriction which the gentleman's committee has seen fit to make.

Mr. TAWNEY. No; it is for the House to make. The committee has recommended it. It is for the House and not the committee to make.

The CHAIRMAN. But the Chair thinks it can not be done on an appropriation bill. Here is a decision on all fours pre-

cisely, and the Chair will read it. The gentleman from New York [Mr. PAYNE] rendered this decision:

The Chair thinks the act of 1897 is a sufficient foundation for an appropriation, but not for legislation. The Chair is unable to see wherein it authorizes the offices of Commissioner-General, or Assistant Commissioner, from the reading of the law by the gentleman from Illinois—

Who has just read to the Chair.

The rule in regard to continuation of public works simply authorizes an appropriation in continuance of public works, and does not authorize the creation of offices.

There is a case precisely in point. The Chair thinks that under this precedent the paragraph is subject to the point of order, and therefore the Chair sustains the point of order.

Mr. TAWNEY. I offer the following amendment, Mr. Chairman.

The CHAIRMAN. The gentleman offers an amendment, which the Clerk will report.

The Clerk read as follows:

After line 6, page 91, insert:
"Biological station, Fairport, Iowa: For the necessary personal services for conducting and continuing the biological station at Fairport, Iowa, authorized and established under a provision in the sundry civil appropriation act for the fiscal year 1909, $7,800, or so much thereof as may be necessary.

Mr. COX of Indiana. I make a point of order on that amendment, and the Chair can rule on it.

The CHAIRMAN. The Chair overrules the point of order. The question is on the amendment offered by the gentleman from Minnesota.

Mr. MANN. Mr. Chairman, I want to be heard on that amendment. I want a little information in reference to this celebrated biological station. Then I would like to know how they get their figures. I notice that the bill provides for a total of $7,800 in this place. In the other stations it runs along $3,000, $8,000, and various sums. The total of this item, as originally in the bill, was $7,800, but I wish those gentlemen in the room who are familiar with the figures to follow me for a moment. Here is a director at $1,800 a year; a superintendent of fish culture at $1,500; a scientific assistant at $1,400; a scientific assistant at $1,200; a foreman at $1,200; a shell expert at $1,200—we are already over $7,800—two foremen——

Mr. TAWNEY. And we are appropriating from the 1st of September for the remainder of the fiscal year.

Mr. MANN. Is that what it is?

Mr. TAWNEY. That is what it is; "or so much thereof as may be necessary." The appropriation is not for the full fiscal year, but we are fixing the annual salaries for the year.

Mr. MANN. Of course that was an afterthought, but it comes in very handy.

Mr. TAWNEY. It was not an afterthought. That is the language.

Mr. MANN. Then I want to know why it is necessary to have a director at $1,800 and a superintendent of fish culture at $1,500. At every other place there is a superintendent at $1,500. At this place there is a director, a superintendent, a scientific assistant, another scientific assistant, and a lot of other officers, making a total of $11,700, against the ordinary appropriations of three, four, or five thousand dollars.

Mr. TAWNEY. This biological station differs from the ordinary station; this is for the cultivation of fresh-water mussels. The Commissioner of Fisheries pointed out to the committee in his testimony the necessity of having a higher-priced man, a more competent man, in charge of this station than was required at the ordinary fish-culture station.

Mr. MANN. What point is there in having a director and a superintendent of the same station? When you have a superintendent, is he in control of the director, or is the director in control of the superintendent? Since when, in establishing little stations, did we begin to provide both directors and superintendents?

Mr. DAWSON. Mr. Chairman, the superintendent referred to is the superintendent of fish culture. In the work of this station, which is of a scientific nature, the details of which, I am sure, would interest the House, the culture of fish necessarily enters into the propagation of the mussels, and therefore it is necessary not only to have a director but also a superintendent of fish culture. This is not an ordinary fish hatchery, but is a biological station, created to conduct scientific study and research and for the propagation of fresh-water mussels.

Now, Mr. Chairman, I would like to be heard in favor of the amendment for a few minutes, because this has more merit than the ordinary proposition brought into the House.

Mr. Chairman, I want to say that the establishment of this station is one of the first important steps in the conservation of the natural resources of the United States. These fresh-water mussels, which for years were considered worthless, became of value when it was found that they could be manufactured into buttons. An important industry grew up, a poor man's industry, if you please, 3,000 men being engaged alone in gathering these shells from the fresh waters of the country.

The remarkable growth of this industry brought the country face to face with the fact that there was danger of exhausting the supply of such material. We have a fish commission here whose business it is to study into the marine life of the waters of the United States, and it seemed to me that it was a perfectly proper subject for the United States Fish Commission to investigate—the question of increasing and perpetuating the supply of these mussels, made valuable by the upgrowth of this industry.

Two years ago I submitted the matter to the Fish Commission, pointing out that unless something was done the supply of these mussels was threatened with exhaustion. The commission, under its general appropriation for the inquiry of the commercial fisheries, set on foot a scientific inquiry in regard to these fresh-water mussels. Strange as it may seem, there was an almost total lack of knowledge among the scientists of the country regarding these mussels—how they propagated, spawning seasons, etc. That commission, headed by Prof. Paul Bartsch, of Burlington, Iowa, began their inquiries along the rivers of the United States, in the Mississippi Valley, down on the White River in Arkansas, up the Wabash in Indiana, and other important rivers of the country to ascertain something about these fresh-water mussels which had become an important item in the commerce of the country.

I ought to say that these scientists who were engaged in that matter, two of whom are from the University of Missouri, Professor Curtis and Professor Lefevre, their services were given to the Government without charge. They simply asked for their expenses. The result of that investigation brought out the practical knowledge that determines for the first time how these mussels propagate. I am sure this House will be interested in this scientific fact.

They found that the fresh-water mussels, differing from any sea-water mussel or shellfish, propagated in this fashion: After the eggs have been laid in the water they drop to the bottom of the stream. In order for the embryo or the egg to develop into a clam it is necessary for it to attach itself to the fins or gills of a fish as a parasite. They live on the fish thirty or sixty days, during which time it develops the necessary organism for its future growth. At the end of that time they drop to the bottom of the stream and are then able to sustain themselves. Without coming in contact with the live fish the egg of the fresh-water mussel perishes. Having ascertained these facts, this commission assembled in the tanks at La Crosse 25,000 fishes and introduced into the tank ripe mussels. That demonstrated the further fact that an ordinary fish would carry 600 or 800 parasites without any injury to the fish. These 25,000 fishes that had been so inoculated were liberated after a period of a few weeks and placed in the west channel of the Mississippi River opposite La Crosse, Wis. That was a year or more ago.

This year this same commission of scientists, these gentlemen from the University of Missouri, found on investigation that literally millions of fresh-water mussels were thriving on the bottom of the stream where they had released the fish that had been inoculated with them the year before.

I am sure the report of Professors Curtis and Lefevre, made a year ago and setting forth the life history of the fresh-water mussel, will be found most interesting, and I will insert it in the RECORD. It is as follows:

The fresh-water clams or mussels of the United States and similar forms from other parts of the world exhibit a mode of development which differs from what occurs in any of their marine relatives. This difference lies in the fact that the embryo lives for a time as a parasite upon the gills or fins of fresh-water fishes, and can only develop in this parasitic condition, the life history being, briefly, as follows: The eggs of the female clam are fertilized by the sperm of the male, which enters the body of the female in the water current that brings the clam its food. These eggs begin development within the female, where they are contained in sacs formed by the animal's gill. Development proceeds as far as a stage known as the glochidium (pl. ia.), which has the two halves of a minature shell and looks much like a gaping clam shell, but which has none of the internal organs necessary for the life which the adult clam leads in the mud of the bottom.

The glochidia are shed out of the parent as they become ripe, and they fall to the bottom, where, having no power of locomotion, they remain motionless unless washed about by the currents. Experiments prove that they will die before many days when left in this condition. If, however, the glochidium chances to come in contact with the fins or gills of a fish which brushes against the silt of the bottom, it fastens itself, and within twenty-four hours has caused the skin of the fish to grow over it, so that the young mussel is completely embedded within the living tissue of the fish. In this condition it rests securely, receiving its food from the blood of its host, and leading a truly parasitic existence for some months. During this period the glochidium changes until all the organs of the adult are developed, though it has not increased in size. At the end of its parasitic existence, when the

NORTHWEST MISSOURI STATE
UNIVERSITY LIBRARY
MARYVILLE, MISSOURI 64468

organs are fully formed, the young clam affects the tissue of the fish in such a way that the skin opens and the young clam drops to the bottom, where it begins the life which it will lead throughout the remainder of its existence.

The attachment to a fish is entirely a matter of chance, but where mussels and fish are abundant it must often occur under natural conditions, as is seen from the examination of fish taken in nature. Still, the fishes thus infected will almost never be found carrying as many of the parasites as they can without serious injury. If the fish are taken and placed in a tub or bucket of water containing large numbers of glochidia, which have been obtained by removing them from the ripe mussel, it is possible to cause the attachment of hundreds of the parasites for every one that would be found there by the chance of nature. A fish under 6 inches in length may thus be made to carry several hundred glochidia, and thus a thousand fish artificially infected may do the work of several hundred thousand in a state of nature.

Experiments with small numbers of fish under observation in the laboratory indicate that their infection on a large scale is entirely possible, and the experiment now in progress at La Crosse, in which over 25,000 young fish have thus been infected, gives every indication that such work may be begun even with the scanty knowledge we now possess.

While there is ample reason to believe in the eventual success of such work in keeping up the supply of mussels, and while the steady decline of the beds demands some such remedial measures, if the supply is to be maintained for more than a very few years, we are not yet in a position to proceed safely with this work, because we are still ignorant of many fundamental scientific facts. For example, we do not know the exact breeding seasons of any one of the button mussels. We do not know what fish are best adapted to carrying the glochidia of each species nor what are the best methods for work on a large scale. These facts can be ascertained if proper facilities for work are provided, and they must be ascertained before the process of artificial propagation can be established on a sound basis. But since many of them can only be learned by the actual experience of attempting artificial propagation on a large scale, the investigation and propagation must go hand in hand. To carry on such work properly, there is necessary a station properly equipped with boats and a steamer for the wholesale collecting and transporting of fish and mussels alive to the tanks and ponds of the station where the infection could be performed.

Nature is prodigal with the supply of glochidia, but so great is the chance against any ever fastening themselves upon the fish and against any ever dropping from the fish to a place on the bottom where they can succeed in the struggle for life that, with the added destruction of hundreds of millions of shells each year for commercial purposes, we may easily exterminate before many years the forms upon which the button industry depends. If we can discover the places in the life history where the waste is greatest and aid the species at those critical stages, there is every reason to hope that the supply of mussels can be made to equal if not surpass the numbers existing when the first button was cut.

In conclusion, we may say that the parasitism on the fish makes the propagation of mussels go hand in hand with the propagation of our fresh-water fishes, since the fish is in no wise injured by the presence of the parasites. When we liberate a hundred fish, each loaded with its hundreds of glochidia, we not only sow the clams broadcast on the bottom, but we are also distributing fish which, when their work for the clams is done, are just as useful as though they had never known such an experience. Wholesale infection gives every promise of success, but the means must be provided at once for work on a large scale, and unless something radical is soon accomplished the making of buttons from our fresh-water shells is doomed.

The next logical step was the establishment of a station where this work could be continued, where additional information could be obtained, and so Congress at the last session provided for this station at Fairport. I want to say to the House that ultimately, in my judgment, at all of the fish hatcheries in the United States, where fishes are being hatched and distributed free in the rivers of the country, those fishes will be inoculated with the fresh-water mussels, and in that way will literally sow these fresh-water mussels in all of the rivers of the United States.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. I ask unanimous consent that the gentleman may continue for five minutes longer.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. DAWSON. Mr. Chairman, some allusion has been made upon this floor to the character of this industry for the manufacture of pearl buttons. It is an infant industry. It is a poor man's industry. It is centered very largely in the upper Mississippi Valley. A great portion of it, I am proud to say, is in the congressional district which I have the honor to represent on this floor. At the outset there were scattered up and down that river little shops, some of them in wood sheds, some of them in barns, where men erected a few lathes for the cutting of the blanks from which these pearl buttons are made. Then the industry grew, fostered by a protective duty, and more shops and factories were built, until to-day more than 10,000 people are engaged in button making and clamming. I happen to have in my desk here some of these shells, showing the nature and the character of the raw material of this industry. Here are some of the shells. That is the raw material of the pearl-button industry, whose product now amounts to $10,000,000 a year.

Mr. GARRETT. How old does a mussel have to become before it is of commercial value?

Mr. DAWSON. It becomes of commercial value at about 5 years of age.

Mr. COCKRAN. Is that a 5-year-old one?

Mr. DAWSON. No. That is one of the species known as the "washboard mussel." There are more than a hundred different varieties, and a half dozen of them are most valuable for the manufacture of pearl buttons.

Mr. FITZGERALD. What is the age of that one which the gentleman has?

Mr. DAWSON. I have no knowledge as to the age of this particular shell.

Mr. EDWARDS of Georgia. Are they good for food also?

Mr. DAWSON. No. I want to say to the House that this is a growing industry. There are 3,000 men in the United States who are engaged in the occupation of taking these shells from the rivers. During the past year a large portion of the shells for this industry have come from the State of Indiana, and I am a little surprised to find the gentleman from Indiana [Mr. Cox] standing in his place on this floor in opposition to this proposition to conserve these natural resources which are not on the prairies and in the forests, but which are in the beds of the rivers from one end of the country to the other.

It was only a few years ago when all of the money that the people of the United States expended for pearl buttons was being sent to the underpaid and overworked labor of Austria. To-day that money is being kept in the United States, and it is going to these workingmen, these men who are taking the shells out of the rivers, and to the men and women who are engaged in the manufacture of the buttons. I want to add right here that the price of these buttons to the consumers of the United States has been reduced since the protective duty was enacted. Last year the average price of the pearl buttons manufactured in the United States to the manufacturer was about 19 or 20 cents a gross, little less than 2 cents a dozen.

It seems to me that it is a matter of wisdom, that it is a matter of common sense, that we should undertake to conserve this supply of the natural resources of the United States, especially since it has been determined by the Supreme Court of the United States that the States do not have jurisdiction over the beds of streams in which these mussels are found. So that if steps in this direction are not taken by the Federal Government it would require concurrent action by all of the state legislatures, and, as everyone knows, that is practically impossible.

It seems to me, Mr. Chairman, that this proposition instead of being one which can be criticised is one which ought to meet the hearty approval of every man in this House, especially every man who has at heart the conservation of the natural resources of his country. [Applause.]

Mr. EDWARDS of Georgia. Will the gentleman yield for a question?

Mr. DAWSON. Certainly, if my time has not expired.

Mr. EDWARDS of Georgia. I want to ask the gentleman what is the value of those shells which are sold in the rough?

Mr. DAWSON. The present value of them is from $15 to $18 a ton.

Mr. EDWARDS of Georgia. Does the size of the shell determine the value of it to any extent?

Mr. DAWSON. Not entirely. There are different varieties. Some of them have more value than others. The mucket, the pocketbook, the yellowback, the washboard, and the niggerhead are the most valuable for button making.

Mr. EDWARDS of Georgia. What variety is this the gentleman has shown?

Mr. DAWSON. That is the washboard.

Mr. EDWARDS of Georgia. I want to say that I am in favor of this proposition. I want a mussel industry in my State.

Mr. COX of Indiana. Mr. Chairman——

Mr. TAWNEY. Mr. Chairman, I understood the Chair to hold that debate had been exhausted on this amendment.

Mr. COX of Indiana. I did not so understand.

Mr. TAWNEY. Mr. Chairman, I want to say to members of the committee that I would like to get along as rapidly as possible. I do not want to cut off Members of the House from free debate on propositions, but we will have to remain in continuous session until this bill is completed. We are two days later now than we were two years ago in passing the sundry civil bill, and I trust that Members will——

Mr. COX of Indiana. Mr. Chairman, I will say to the gentleman that I have not consumed much time during the consideration of this bill.

Mr. TAWNEY. I do not complain of Members at all, Mr. Chairman.

Mr. COX of Indiana. But I did want a few minutes' time to answer the gentleman from Iowa.

Mr. TAWNEY. Mr. Chairman, I move that all debate on the paragraph and amendments thereto be closed in five minutes.

The CHAIRMAN. The gentleman from Minnesota moves that all debate on the paragraph and pending amendments be closed in five minutes.

The motion was agreed to.

Mr. CLARK of Missouri. Mr. Chairman, I would like to ask the gentleman from Minnesota a question before the gentleman begins. Is there any danger of these sections being knocked out?

Mr. TAWNEY. What is the gentleman's statement?

Mr. CLARK of Missouri. I say, do you think there is any danger of these sections being knocked out of this bill?

Mr. TAWNEY. What sections?

Mr. CLARK of Missouri. This fresh-water-mussel proposition.

Mr. TAWNEY. We hope not.

Mr. CLARK of Missouri. If there is, I would like to have two or three minutes to help keep them in. [Applause.]

Mr. COX of Indiana. Mr. Chairman, as I said a moment ago, I seriously object to this way of legislating, making laws upon the appropriation bills so as to prevent Members of this House from hearing the question discussed as it ought to be discussed. I have no objection to the button factories or button industries in the United States, and I only wish that there were 10,000 button factories running at full time and that in every one of those factories were working a thousand men. But, Mr. Chairman, the objection that I urge against this is to the Government of the United States going into the business of investigating for the purpose of furnishing the manufacturers this free raw material for fear that the raw material is going to be exhausted. I contend that if it is desirable at all it should be investigated by the manufacturers themselves. Certainly all the scientific men who know anything about the shell industry in the United States are not in the employ of the Government of the United States. If they are, surely the Government would lend some of the men to the manufacturers along this line for the purpose of investigating the best way and manner of propagating fresh-water mussels in this country.

Mr. DAWSON. If the gentleman will permit me, will not the gentleman agree with me that the perpetuation of the supply in this country of mussels is of equal or perhaps greater value to the men engaged in the industry and the workmen——

Mr. COX of Indiana. It was shown to the Committee on the Merchant Marine and Fisheries that in the Ohio River, the Wabash River in the States of Illinois and Indiana, and the White River in the State of Indiana there are countless tons of these fresh-water mussel shells suitable for the purpose of manufacturing, and they are now being used by manufacturers of pearl buttons in this country.

Mr. FOSTER of Illinois. If the gentleman will permit, I will state that in a letter from the Department of Commerce and Labor it is stated that at the rate they are now being taken out of the Wabash River they are now almost exhausted.

Mr. COX of Indiana. Mr. Chairman, it has been stated here time and time again upon the floor of this House, last session and this session, that whenever a department gets hold of a little power it never lets that power go, and it is crying all the time for more money, so it might have more power in its jurisdiction.

Now, the gentleman has stated that some of these mussel shells were coming from my own district. I will say to him there are to-day countless thousands of them, yes, I will say hundreds of tons of them being taken out of the Ohio River, the White River, the Wabash River, with nothing to show that they are shortly to become exhausted. And where is this work going to end? If the Government of the United States is going to appropriate money for the purpose of giving scientific investigations for the purpose of developing raw material, where is it going to end? Later on, will Congress be asked to make an appropriation to scientifically develop some other proposition for fear that some other raw material is going to become exhausted? That is the objection I have to this provision of the law.

Mr. MANN. Will the gentleman yield for a question?

Mr. COX of Indiana. Yes. It is just as fair for the Government to develop, from a scientific view point, a process whereby any other manufacturers engaged in any other line of business may be furnished, at the expense of the Government, a plan to furnish themselves with free raw materials. Let the manufacturers do it themselves, and not forever continue to run after the Government for aid along this line. It is paternalism pure and simple.

Mr. MANN. The gentleman and I are very apt to think alike on many things. These fresh-water mussels grow in the mud bottoms of mud rivers. Could a private manufacturer or any private person propagate them in the Ohio River, or the White River, or the Wabash River, or the Mississippi River?

Mr. COX of Indiana. Probably no private individual could propagate them within the rivers, but I take it for granted that any private individual could study this from a scientific view point at some other place than a point or place where the jurisdiction of the United States is sovereign and complete.

Mr. MANN. Could they make use of their information?

The CHAIRMAN. The time of the gentleman has expired. All time has expired. The question is on the amendment offered by the gentleman from Minnesota [Mr. TAWNEY].

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Schooner *Grampus:* Master, $1,500; first mate, $1,080; second mate, $840; cook, $600; three seamen, at $540 each; one cabin boy, $420; in all, $6,060.

Mr. SMITH of Iowa. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 93, line 17, after the word "dollars," insert "engineer, eight hundred and forty," and, in line 20, strike out "sixty" and insert "nine hundred."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

For the establishment of a fish-cultural station in the upper Mississippi River Valley for the collection and propagation of fishes indigenous to that region and as a necessary auxiliary to the biological station at Fairport, Iowa, including purchase of site, construction of buildings and ponds, and equipment, at some suitable place to be selected by the Secretary of Commerce and Labor, $25,000.

Mr. SMITH of Iowa. Mr. Chairman, I wish to offer an amendment.

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 96, after line 25, insert:

"For establishing fish-cultural stations on Puget Sound or its tributaries in the State of Washington for the propagation of salmon and other food fishes, and for each and every purpose necessary in connection therewith, as authorized in the act approved January 29, 1909, $50,000."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

Mr. EDWARDS of Georgia. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 96, after the word "dollars," in line 25, insert:

"And also for the establishment of a fish-cultural station in the First Congressional District of Georgia for the collection and propagation of fish indigenous to that region, including the purchase of site, construction of buildings, ponds, and equipment, and maintenance at some suitable place, to be selected by the Secretary of Commerce and Labor, $25,000."

Mr. SMITH of Iowa. Mr. Chairman, I make a point of order against this amendment. It is not authorized by existing law and changes existing law.

Mr. EDWARDS of Georgia. Mr. Chairman, I would like to state to the gentleman that the bill proposing this biological station or fish-cultural station has been reported favorably by the committee. I think, strictly speaking, if the gentleman insists on his point of order, that the amendment is subject to the same, but I hope that the gentleman will not press it. We are very badly in need of this fish-cultural station down there. The food fishes are decreasing. We need some way to go into that cause there.

Mr. SMITH of Iowa. There are 30 or 40 of these bills in just the same situation, and I could not refuse to let any of these go on if I let this one go on. Therefore I insist on the point of order.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

Expenses of regulating immigration: For all expenses of the enforcement of the laws regulating the immigration of aliens into the United States, including the contract-labor laws; for the costs of the reports of decisions of the federal courts, and digests thereof, for the use of the Commissioner-General of Immigration; for salaries and expenses of all officers, clerks, and employees appointed to enforce said laws; for the enforcement of the provisions of the act of February 20, 1907, entitled "An act to regulate the immigration of aliens into the United States" (34 Stats., 898); for expenses of necessary supplies, alterations, and repairs, and for all other expenses authorized by said act; also for preventing the unlawful entry of Chinese into the United States, by the appointment of suitable officers to enforce the laws in relation thereto, and the expenses of returning to China all Chinese persons found to be unlawfully in the United States, including

the cost of imprisonment and actual expense of conveyance of Chinese persons to the frontier or seaboard for deportation, and for the refunding of head tax upon presentation of evidence showing conclusively that collection was erroneously made; all to be expended under the direction of the Secretary of Commerce and Labor, $2,400,000: *Provided*, That the expenditures for the enforcement of the Chinese-exclusion act shall not exceed $500,000: *Provided further*, That on and after July 1, 1909, all head tax collected pursuant to the provisions of section 1 of the said act of February 20, 1907, together with all fines, rentals collected, and moneys received from other sources under the laws regulating the immigration of aliens into the United States, shall be covered into the Treasury to the credit of miscellaneous receipts.

Mr. GARRETT. Mr. Chairman, I reserve the point of order on that paragraph. I do not understand exactly what this is for.

Mr. SMITH of Iowa. The fact is that heretofore the expenses of regulating immigration have been paid out of the head tax. That head tax has been wholly at the disposition of the Bureau of Immigration and Naturalization, practically without restraint, tending to very great extravagance. From our standpoint the bureau ought to be required to come to Congress once a year for what money it needs. The reason it is desirable from the standpoint of the Immigration Service is that they no longer have money enough, so that both sides of this controversy have, as I understand it, now reached an agreement. The Immigration Service want annual appropriations in place of the permanent appropriation of the head tax because they are short of money; and we want annual appropriations so that when the immigration again swells, as it has in prior years, they will not be able to spend all the money. So it seems to be a very happy way, to my mind, on which we ought to agree on that subject.

Mr. GARRETT. The second section is made necessary by the first?

Mr. SMITH of Iowa. Certainly.

Mr. GARRETT. It is just merely a matter of administration?

Mr. SMITH of Iowa. It is a matter of administration, and we think will tend to economy in times of large immigration and will provide for their necessities in times of slack immigration.

Mr. GARRETT. All right.

Mr. BENNET of New York. Mr. Chairman, I desire to offer an amendment to this section.

Mr. GARRETT. The point of order is not withdrawn.

Mr. SMITH of Iowa. Does the gentleman from Missouri desire to make an inquiry?

The CHAIRMAN. Does the gentleman from Tennessee desire to be heard on the point of order?

Mr. GARRETT. I withdraw the point of order.

Mr. BENNET of New York and Mr. KELIHER rose.

Mr. BENNET of New York. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New York is recognized.

The Clerk read as follows:

Page 98, line 19, before the word "provided," insert:
"*Provided*, That not to exceed $50,000 of said sum may be expended as provided under section 24 of the act of February 20, 1907, entitled 'An act to regulate the immigration of aliens into the United States.'"

Mr. UNDERWOOD. I would like to reserve the point of order on that until I understand what the proposition is.

Mr. BENNET of New York. Mr. Chairman, section 24 of the immigration law provides that in order to enforce the contract-labor law the Secretary of Commerce and Labor can expend up to $50,000 a year without filing vouchers, if he certifies that it is not for the best interest of the public that the vouchers should be filed. The Committee on Immigration came to the conclusion when the bill was in the Fifty-ninth Congress that if you are to enforce the contract-labor law—and it ought to be enforced; it is on the statute books—the only way you can do it is to allow the Secretary to go outside of the civil-service law and hire men, not only here but abroad, to detect contract labor, at its inception, if necessary, and follow the laborers into the large factories and places of business here where they go under the inducements of the employers.

Mr. MADDEN. Will the gentleman allow me to ask him a question?

Mr. BENNET of New York. Certainly.

Mr. MADDEN. Does the gentleman wish the House to understand that a better class of employees can be secured outside of the civil service than inside?

Mr. BENNET of New York. Not necessarily; but men can be obtained who are not known to every intending violator of the law, also who are not within the rigid limitation of the first three of any list. The committee honestly and earnestly desire to enforce the law. It deems this provision necessary. I do not know that the amendment is absolutely necessary to continue the privilege of the Secretary; but in order to keep faith, perfect faith, with the laboring men at whose instance this provision was put in the statute, first in 1885, and continued and amplified since, we ought not to take any chances.

Mr. GAINES of Tennessee. Does the gentleman want this special fund to execute this law?

Mr. BENNET of New York. There is a special fund.

Mr. GAINES of Tennessee. Then, what do you want with more?

Mr. BENNET of New York. We do not want anything more.

Mr. GAINES of Tennessee. Then, what do you want?

Mr. BENNET of New York. If the gentleman had heard my explanation, he would understand.

Mr. GAINES of Tennessee. I have been at work at a very important matter here, and I think I am about to be engaged in another.

Mr. BENNET of New York. This amendment ought to be agreed to, and I hope that the point of order will be withdrawn.

Mr. UNDERWOOD. Mr. Chairman, I would like to have the gentleman explain more fully the purpose of the amendment.

Mr. SMITH of Iowa. The section referred to in the immigration law set apart $50,000 out of the head tax to be expended without vouchers; and it is in the nature of another secret service—and, as I am always in favor of legitimate secret service, I am in favor of this.

Mr. UNDERWOOD. You say this is to be spent without any vouchers. Why should this appropriation be made out of the Treasury as you propose to do on other matters?

Mr. SMITH of Iowa. It is paid out of the Treasury, and it is simply a provision that $50,000 of the appropriation made may be used as already authorized by existing law.

Mr. SABATH. Will the gentleman yield? Is it not a fact that the Secretary of Commerce and Labor has power now and is using that fund for that purpose?

Mr. SMITH of Iowa. He has got power out of the head tax, but this section provides that the head tax shall be turned over to the Treasury.

Mr. BENNET of New York. This specifies that he has the right; it is simply in the nature of a further assurance.

Mr. SABATH. It is no limitation?

Mr. BENNET of New York. It does just the contrary; it makes it certain that he will have this fund.

Mr. GARDNER of Massachusetts. Mr. Chairman——

The CHAIRMAN. Does the gentleman yield to the gentleman from Massachusetts?

Mr. BENNET of New York. If I have the floor I do.

Mr. GARDNER of Massachusetts. Mr. Chairman, I think I can satisfy the gentleman from Alabama about this matter. Have I the attention of the gentleman from Alabama? The gentleman from Alabama and I have substantially the same ideas on the question of immigration. This provision exists in law to-day. This bill proposes to take out of the hands of the Secretary of Commerce and Labor and put into the hands of Congress the expenditure of the "immigrant fund." The gentleman from New York and I were somewhat fearful that this provision for the enforcement of the contract-labor law might possibly by some Comptroller of the Treasury be held to require vouchers. We especially wished to avoid that, and to retain this provision for the enforcement of the contract-labor law.

I do not think any point of order lies against the provision offered by the gentleman from New York; but if I had not supposed that his amendment certainly would be put in the bill, I should have raised the point of order on the paragraphs just passed.

Mr. UNDERWOOD. Would the effect of the amendment offered by the gentleman from New York be toward the restriction of immigration?

Mr. GARDNER of Massachusetts. That is the purpose of it, for the better enforcement of the contract-labor law.

Mr. UNDERWOOD. I withdraw my point of order.

Mr. EDWARDS of Georgia. I renew it.

Mr. BENNET of New York. The effect of the amendment will be to keep out undesirable aliens.

The CHAIRMAN. Does the gentleman desire to be heard on the point of order?

Mr. EDWARDS of Georgia. No. I wish to ask the gentleman from New York a question.

Mr. BENNET of New York. Certainly.

The CHAIRMAN. The Chair understands the gentleman from Georgia to have made the point of order.

Mr. EDWARDS of Georgia. No; I reserved it.

Mr. SMITH of Iowa. I think the point ought to be made or not made. If it is made, I wish to be heard on it.

The CHAIRMAN. Does the gentleman from Georgia desire to be heard on the point of order?

Mr. EDWARDS of Georgia. I want to ask the gentleman from New York a question, and if he gives me the information I am seeking, I shall be done. Is it the purpose of the amendment to expend this sum of money without vouchers?

Mr. BENNET of New York. It is the purpose of the amendment to make clear that that portion of the law which now authorizes the Secretary of Commerce and Labor to expend this money without vouchers shall not be repealed.

Mr. EDWARDS of Georgia. Then I insist on the point of order.

Mr. SMITH of Iowa. It is not subject to a point of order.

The CHAIRMAN. The Chair overrules the point of order. This proposition is clearly in order.

Mr. GAINES of Tennessee. I move to strike out the last word.

Mr. BURNETT. I ask for the reading of the amendment.

Mr. GAINES of Tennessee. Let us have the amendment read again.

The CHAIRMAN. If there be no objection, the amendment will be again reported.

The amendment was again read.

Mr. SMITH of Iowa. Mr. Chairman——

Mr. GAINES of Tennessee. Now, I should like to ask the gentleman in charge of the bill, or rather the gentleman from New York——

The CHAIRMAN. The gentleman from Iowa [Mr. SMITH] is recognized.

Mr. SMITH of Iowa. I move that all debate on the paragraph——

Mr. GAINES of Tennessee. I have the floor. I was on the floor addressing the Chair, and asked that the amendment be read so that I could understand what it was.

Mr. SMITH of Iowa. It is my desire to humor the gentleman. I move that at the end of five minutes all debate on the paragraph and pending amendment be closed.

Mr. GAINES of Tennessee. Then, Mr. Chairman, I hope that it will be voted down, because the gentleman says this $50,000 is to be expended without vouchers, and we are voting on something that we do not know anything about.

The question being taken on the motion of Mr. SMITH of Iowa, on a division (demanded by Mr. GAINES of Tennessee and Mr. HITCHCOCK) there were—ayes 88, noes 41.

Mr. GAINES of Tennessee. Tellers!

Tellers were ordered, and the Chairman appointed Mr. SMITH of Iowa and Mr. GAINES of Tennessee.

The committee again divided, and the tellers reported—ayes 94, noes 34.

Accordingly, the motion of Mr. SMITH of Iowa was agreed to.

Mr. GAINES of Tennessee. Now, Mr. Chairman, I yield one minute to the gentleman from Georgia [Mr. EDWARDS].

Mr. EDWARDS of Georgia. Mr. Chairman, I understand this amendment proposes to expend $50,000, and that there is to be no record kept of it, and that no vouchers are to be kept of the expenditures. I think it is one of the most ridiculous propositions that have ever come up before the House. The idea of going into the Treasury of the United States and taking out $50,000 of the people's money and placing it to be expended without leaving any vouchers for it! It opens up avenues for graft, it opens up avenues to wrong dealing. Expending the people's money in such a manner as this is a reflection on Congress. I think vouchers should be kept for the smallest expenditures from the Public Treasury, and that no money should be expended from the Public Treasury, no matter how small the sum, unless vouchers are had for it by which we may keep track of the expenditure, and by which we know how our money is being expended. The people have a right to know.

Mr. GAINES of Tennessee. Mr. Chairman, I sought some information about the need for this so-called reform. I have yet to find a particle of intelligence to show the reason why this $50,000 should be spent by a secret-service system which has been so roundly denounced by the gentleman from Iowa [Mr. SMITH] as a class of men wholly unreliable. He said a moment ago that we should take $50,000 of the people's money to put in that class of men without requiring a voucher. That is the substance of what the gentleman said.

Mr. GARDNER of Massachusetts. Will the gentleman from Tennessee let me say one word in his time?

Mr. GAINES of Tennessee. Yes.

Mr. GARDNER of Massachusetts. This has been in the law exactly as it is now for two or three years. It was found absolutely impossible to enforce the contract-labor law when they had to employ people whom everybody knew about. This provision was put into the law for the purpose so that, if necessary, they could employ foreigners and citizens of all classes.

Mr. HARRISON. What does the gentleman mean—spies?

Mr. GARDNER of Massachusetts. I fancy so. It is unfortunate that we must at times employ spies. To be frank with the gentleman, I think we have men in the steerage of the trans-Atlantic steamers, and we had to employ that method in order to enforce the contract-labor law. As I say, this has been in the law for two or more years, and it has worked exceedingly well. All that we desire is that it should remain in the law without being construed out of the law.

Mr. GAINES of Tennessee. Does the gentleman mean to say that we have a statute that allows $50,000 of the people's money to be turned over to a class of men whom the chairman of the Committee on Appropriations and the gentleman from Iowa have characterized as wholly unreliable?

Mr. NORRIS. And, if the gentleman will allow me, I would like to suggest that he ask the gentleman from Iowa whether he is in favor of a provision in the law that will prohibit the transfer of these secret-service men to other departments?

Mr. SMITH of Iowa. I will cheerfully answer that: If a system grew up of the transfer of these men to other branches of the Government, I would certainly be in favor of a law to prohibit it.

Mr. GAINES of Tennessee. The gentleman from Iowa has just assisted in passing a provision that the Secretary of the Treasury shall not use these men for any other service except down there in the Treasury, and right after that, the words had hardly left his mouth, before the gentleman from the State of Iowa had finished his wonderful condemnation of the secret-service system as wholly unreliable and despicable—I think he used the word "liars"—he turns around, this great economist, this great watchdog of the Secret Service, aliunde the Treasury Department, and wants to give them $50,000 and take no receipt or vouchers.

Mr. SMITH of Iowa. Will the gentleman allow a suggestion?

Mr. GAINES of Tennessee. Yes.

Mr. SMITH of Iowa. The head tax is $4 per capita, and runs from two and a half million to four million dollars a year, and in order to avoid a point of order against the $4,000,000 repeal, I was willing that this should stay in this one year.

Mr. GAINES of Tennessee. The gentleman seems to me to be playing heads and tails on this proposition. He was against the Secret Service, and now he comes up and wants to turn over $50,000 of his constituents' money, $50,000 of my constituents' money, $50,000 of the people's money, to these same class of men to execute the law.

The CHAIRMAN. Debate is exhausted. The question is on the amendment offered by the gentleman from New York.

The question was taken, and on a division (demanded by Mr. SMITH of Iowa) there were 75 ayes and 20 noes.

So the amendment was agreed to.

Mr. KELIHER. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk.

The Clerk read as follows:

After line 4, page 99, add as a new paragraph:

"Toward the purchase of ground and complete erection and furnishing of a new fireproof immigration station at the port of Boston, in accordance with the provision of an act entitled 'An act to provide for the purchase of a site and erection of a new immigration station thereon at the city of Boston, Mass.,' approved February 23, 1909, $100,000."

Mr. HULL of Iowa. To that I make a point of order.

Mr. SMITH of Iowa. Mr. Chairman, that bill was passed too late to have an appropriation included in our appropriation bill, and in my judgment this amendment ought to be adopted.

Mr. HULL of Iowa. I will withdraw the point of order.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Hereafter there shall be submitted, following the estimates under the foregoing appropriation for expenses of regulating immigration, statements showing the amount required for each object of expenditure mentioned in said estimates.

Mr. HAYES. Mr. Chairman, I move to strike out the last word. I desire briefly to call the attention of the House to the condition of the Chinese-exclusion service. Congress has certainly done its part in enforcing the Chinese-exclusion act. Ever since I have been a Member of Congress there has been an annual appropriation of $500,000 for this purpose. One would think that was enough to exclude every Chinaman that sought to come here or to deport those who by chance eluded the vigilance of the immigration officials and illegally got into this country. Yet I am bound to say that unless there is a change in the method of executing this law, the Chinese-exclusion law in the near future will come to be a dead letter. By

the report of the Commissioner-General of Immigration for the last year there has been an increase in Chinamen admitted into this country of over 38 per cent.

Those of us who know anything about this subject I think will agree that every one of these additional entries is fraudulent, and more than 90 per cent of all the Chinamen who are admitted through the immigration office are admitted fraudulently and are not entitled to be in this country at all. Even this would not be so alarming if it were not for the fact that wholesale smuggling is going on all along the Mexican and Canadian borders and in many places along the Pacific coast. There has lately been some effort to stop this smuggling and to punish the smugglers.

Mr. COX of Indiana. Mr. Chairman, how does the gentleman account for the fact that so many of these entries have been fraudulent? I think he makes the estimate of 90 per cent. What is it due to?

Mr. HAYES. It is due to the fact that the Chinaman has usually no regard at all for the sanctity of an oath, and it takes a most expert and persistent effort on the part of the officials to discover the frauds.

Mr. COX of Indiana. Has it been due in any way to lack of Congress appropriating sufficient money?

Mr. HAYES. It has not. I stated in the beginning that Congress has done its part; but there is just at this time, and has been for two or three years past, a great laxity and lack of spirit in the enforcement of this law.

Mr. COX of Indiana. The fault must lie with some one.

Mr. HAYES. It lies with those who are charged with the administration of the law, without any question. Now, the principal trouble, I take it, is not so much with those who are immediately charged with the admission of the Chinese, but it is due to the fact that the Department of Commerce and Labor has chosen not to arrest those who have gained admission to the country surreptitiously and fraudulently, especially if they get a little away from the border.

In his report for 1908 the Commissioner-General of Immigration admits that these surreptitious entries of Chinese are very large and on the increase. I read from his report for 1908, page 148:

> In the early months of the calendar year 1905 the bureau undertook the conduct of a quiet canvass with the object of securing a record of the Chinese in each district, and of the papers, if any, held by them as evidence of their right to reside in the United States. In some districts this canvass or census was complete, but in others it was only fairly begun when so strong a protest arose on all sides that instructions were issued for its discontinuance. It had been carried far enough, however, to indicate that there were then about as many Chinese in the United States whose entry had been unlawful and who held either no papers showing a right of residence or else had in their possession papers of a forged, fraudulent, or irregular character as there were of the lawfully resident class. Is it any cause for wonder, therefore, that the "companies," the "steerers," the "promoters," and the "smugglers" interested in the immigration and residence here of coolies should have registered an emphatic objection to the Government's pursuing a course calculated to expose the extensiveness of their operations? Simultaneously with the discontinuance of the census the general policy with regard to the making of arrests in the interior of the country was so changed as to contemplate arrests being made only in flagrant cases of unlawful residence coming to the attention of the Chinese inspectors incidentally during the conduct of investigations regarding domiciled Chinese, which policy has been practically continued to the present time. In other words, while the excluding provisions of the law have been vigorously enforced at the ports of entry, the provisions contemplating expulsion have not been emphasized elsewhere than along the Canadian and Mexican borders and in districts immediately connected therewith. Table 3 A (p. 154) shows that during the year 912 Chinese persons have been arrested and 477 finally deported. But the vast majority of these arrests, viz, 816, were made in districts immediately on or closely connected by lines of travel with the land boundaries. During the fiscal year 1907, 503 arrests were made, only 50 of which occurred in the interior. (Annual Report, 1907, p. 99.) What has been the result? Chinese have come to believe that once they reach the large cities of the interior they are practically safe, and that it is much easier and not very much more expensive to gain entry by some of the surreptitious routes than through a regular port; hence the conditions described in subtitle 4 hereof regarding the Canadian and Mexican borders. If the exclusion law is to remain on the statute books as now drawn, it is obvious that its reasonable enforcement demands a change in this policy. Money that was formerly spent in the defense of Chinese arrested in the interior can now be used to pay the expenses of smuggling coolies and conveying them to the interior, and as long as this can be done at a profit the smuggling will continue.

Remarkable words these to come from the department whose duty it is to enforce the law. Not only has there been of late great laxity and indifference on the part of the Department of Commerce and Labor in the deportation of Chinese unlawfully in this country, but the same spirit has pervaded the whole administration of the law. This, in effect, is serving notice on the Chinaman that if he can avoid the vigilance of the officials and get to some city in the country he will not be disturbed, and as a result this wholesale smuggling is not only continuing, but is vastly increasing from month to month and year to year, and must continue to increase unless the policy of the Department of Commerce and Labor is changed in this respect. A gentleman connected with the Chinese service, and well up in the service, too, told me not long ago, and I have no doubt that he is correct, that he believes that 500 Chinamen are here in the city of Washington in violation of the law, and yet he says:

> I am not allowed to make any move to discover these men, nor to arrest or deport them.

In 1906 President Roosevelt appointed a commission, composed of J. W. Jenks, R. M. Easley, and J. B. Reynolds, to consider the Chinese boycott and the smuggling of Chinese into the United States. That commission reported to Secretary Straus in 1908, and the concluding paragraphs of that report are as follows:

> Our commission, therefore, has reached the conclusion that the demoralization of the bureau in its Chinese service is widespread, and unless radically reformed serious complications, both political and commercial, are threatened. Our commission did not consider that its duty was to make definite, formal charges against particular officials, except as incidental results of investigation, but to present to you as full a statement as possible of the bureau's relation to the causes of the boycott, leaving it to you to determine what action should be taken.
>
> In no point does the demoralization of the bureau appear more striking than in its failure to prevent the smuggling of coolies. We found no evidence of systematic efficient effort to check such widespread violations of the law. The recommendations of Greenhalge to the Commissioner-General that the Government should attempt to catch the leading white smugglers, upon whom the smuggling system depends, seemed to your commission the most practicable method of securing substantial results. This suggestion appears to have been unheeded. From my present knowledge of the situation I am confident that with intelligent and energetic handling the extensive smuggling which exists to-day might be practically wiped out.
>
> It is therefore the earnest hope of your commission that the relations between the Chinese in this country and the American Government, through the Bureau of Immigration, may be essentially improved; that more determined effort and persistent effort may be made for the suppression of blackmail and the smuggling of Chinese coolies, and that a higher standard in the selection of immigration officials may be enforced.

These conditions were brought to the attention of the proper department long ago. In August and September, 1907, Professor Jenks, of the Immigration Commission, with Mr. Atkinson, secretary of that commission, visited the Canadian and Mexican borders, investigating and reporting conditions to the Secretary of Commerce and Labor. On his return from that trip, he gave to Secretary Straus evidence of complicity on the part of a number of inspectors in the wholesale smuggling of Chinese on both borders; and I ought to say that I do not get this information from Professor Jenks. The only thing that seems to have been done about it was that the honest inspector who gave Jenks his information was shorn of his credentials and transferred, and the dishonest employee retained, just as Doctor Solomon was transferred from Ellis Island in the fall of 1906 for giving J. B. Reynolds information.

It is true that last fall, or early in the winter, Assistant Secretary William R. Wheeler, of the Department of Commerce and Labor, stirred up things down on the southern California border near San Diego, and as a result there were several removals of inspectors, and smuggling at that point was somewhat interfered with, but the evidence upon which the removals were made was not secured in the first instance by the Department of Commerce and Labor, but by a detective employed for that purpose by the Immigration Commission. The conditions in the Chinese-exclusion service may in the last few months be somewhat improved, but not enough to reduce to any considerable extent the number of Chinese coming into this country.

And so far as excluding Japanese is concerned, there seems to be no attempt to execute the law. The immigration act of 1907 provides in substance that when in the opinion of the President of the United States alien laborers from our island possessions or from contiguous foreign territory are entering the United States to the disturbance of labor conditions therein, he may by proclamation forbid the entry into this country of such laborers. In accordance with this law the President of the United States immediately after its passage issued his proclamation forbidding the entry of such laborers from Hawaii, Mexico, or Canada. The effect of all this was, as it was intended to be, to make the entry of Japanese laborers from Hawaii, Mexico, and Canada illegal, and being here contrary to the law such Japanese are subject at any time to arrest and deportation. The issuance of the proclamation seems to be about all that has been done. It may be that when Japanese present themselves to the immigration officials these officials turn them back and forbid them to enter the United States, but there is apparently no attempt to exclude them other than this.

On the Mexican border the Rio Grande can, most of the year, be easily forded and can be crossed on rowboats at any time. Hundreds of Japanese have been crossing to the United States nearly every day, and there seems to be scarcely a pretense of preventing them and no arrests and deportation of those who thus surreptitiously and unlawfully enter the coun-

try. I do not know, Mr. Chairman, that we can do anything in this matter by talking about it, but it seems to me that something ought to be done either to enforce the law in its letter and spirit or else cease to make appropriations for a service that is rapidly coming to be a byword and a jest.

Mr. Chairman, I do not desire to further take up the time of the House. I wished only to call the attention of the House to the matter, and I ask unanimous consent to print in the RECORD a letter which I have received from a business man, an American citizen residing just over the border in Mexico. He was formerly a newspaper proprietor in my section of California, and no one who knows him would question his veracity.

The CHAIRMAN. The gentleman asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The letter is as follows:

CUATRO CIENEGAS,
Coahuila, Mexico, February 2, 1909.

Congressman HAYES,
Fifth California District, Washington, D. C.

DEAR SIR: It was with a great deal of interest that I read in a recent issue of the San Francisco Chronicle an interview with you on the subject of Japanese immigration. It is a pleasure to me and to other Americans in this country to know that there is one Congressman who seems to have a clear idea of the situation, especially with regard to the immigration of Japanese by way of Mexico. I am in a position to give you a few facts which will, I feel, be of interest to you and those who take the same position as you.

During the last half of 1906, all of 1907, and up till September 1, 1908, I was in the enjoyment of unusual facilities for observing the steady movement of Japanese toward the Rio Grande River from the interior of Mexico by one of three lines of travel leading in that direction. These are by way of El Paso, by Eagle Pass, and by Laredo, the routes, respectively, of the Mexican Central, the Internacional Mexicano, and the Mexican National railroads. What I have to say has to do with the Internacional route by way of Ciudad Porfirio Diaz and Eagle Pass.

During the greater portion of the period to which I refer I was so employed as to be in a position where it was impossible for aliens of any kind going north to escape my observation. In the case of the Japanese, a great throng, numbering into the thousands, at one time and another passed north along the railroad right of way on foot. At a point about 60 miles south of the Rio Grande is another river, the Sabinas, over which there is but one bridge, and across which structure foot travelers must pass, as the stream is not fordable. During the daytime I was stationed in an office building about 100 feet from the southern entrance to the bridge, and in consequence it was absolutely impossible for anyone to cross without being seen by me. At night we had two watchmen under instructions to permit no one to pass. Beginning with October of 1906, groups of Japanese began passing over this bridge, sometimes to the number of 100 or 200 a day. They were almost without exception clad in portions of soldier uniforms. They seemed to have abundance of money, both Mexican and Japanese, and there was always one man who acted the part of an officer and gave orders to the others, which were implicitly obeyed. Why men so well supplied with money should choose to walk instead of taking the train was a mystery, although at the same time that these were walking the one train daily to the north usually carried a good complement of their fellow-countrymen. Of course those on the train on landing at Ciudad Porfirio Diaz found themselves at once confronted with the United States immigration inspectors while those on foot could leave the railroad track just before entering town and make their way to some appointed spot for crossing the Rio Grande undetected.

For many months this stream of Japanese northward bound continued, and finally, from motives of patriotism and thinking that the facts with regard thereto might be of use to the immigration officials of the border, I communicated with the person in charge, located at San Antonio, and after stating the facts, offered to furnish information with regard to this remarkable hegira. My offer met with such a cold reception that I did not pursue it further.

There were several thousand of these men, practically all ex-soldiers, who were brought to this country ostensibly to work in the coal mines of Coahuila. At one time some 2,000 were landed at a group of mines close together, and within two weeks not one was left. All had gone north toward the river. In one case guards were put around the mine property, but the Japanese left in the night, although they were shot at by these guards.

In the employ of the company for which I was acting as paymaster was a Mexican foreman, and native labor being scarce, he finally persuaded a number of Japanese to take temporary employment under him. This Mexican was friendly to me, as I had done him some favors, and one day he asked me if the Americans thought the Japanese were friendly to them; I told him a good many Americans thought so, but that I was from California and knew better. He then told me that I was quite right. He said that the Japanese thought the Mexicans did not like the Americans (which is largely true) and that in consequence they were not afraid to talk to them.

The Japs, he said, boasted among the Mexicans that they were all soldiers; that they had their expenses paid to come to this country, and that they were all making their way over into the United States as fast as they could. When enough of them had reached the United States, then there was going to be a war, and the Americans would all be killed off. I told the Mexican foreman to find out all he could from others, and he reported to me that they all talked alike; that they hated the Americans and were going to kill them just as they did the Russians.

In Ciudad Porfirio Diaz I often saw one who was manifestly a high officer, wearing, as he did, an officer's undress uniform. A reputable business man told me that he was an army officer, and that he was getting maps and pictures of the frontier. He told me that the Japanese had a room full of blueprints and photographs. There was also a very bright Japanese, speaking English fluently, and said to be a Prihee, who purchased cameras and photographic material by wholesale, as I accidentally learned.

The immigration authorities on the bridge at Eagle Pass do their work thoroughly and intelligently, but I am quite sure that not one-tenth part of the Japanese whom I have seen during the past two years headed for the Rio Grande ever tried to cross the bridge. Both above and below Eagle Pass is a vast territory almost unsettled, on either side, and the river can easily be crossed with boats, while I am told that there are many places where it can be forded at low water.

There is a little town about 5 miles south of Diaz, where there are a number of Japanese and Chinese employed at a coal mine. I became pretty well acquainted here, and finally had my attention attracted by some suspicious movements. The Chinaman who was the "boss" at the village was a pretty good friend of mine, and one day after I had seen and heard some things that were suspicious I taxed him in private with knowing something about smuggling Chinese and Japanese across the river. He acknowledged that I was right, and when I asked him how much it cost, he said the rate was $400 Mexican. I asked him how they got across and he said by a boat; but he would not tell me where the crossing was made. I reported to the immigration inspectors on the bridge at Eagle Pass that there was "something doing" in the way of smuggling at the rate of $400 a head, but as the Chinaman whom I bluffed out of the information had done several friendly services for me I did not feel warranted in giving him away.

The bulk of the immigration that I have noted occurred during the last three months of 1906 and all of 1907. There had been some during 1908, down to the time I was transferred from the main line of the railroad to this place, but since September 1 I have no knowledge.

It would be of interest to know just how many Japanese immigrants were reported crossing the Diaz-Eagle Pass bridge during 1907–8. That thousands got across the river in some way is well known to many Americans in Mexico, who had an opportunity to see something of it for themselves. And it is not at all unlikely that the experience of this particular line of travel was repeated both by the Laredo and the El Paso routes.

If I can be of any service in furnishing further information in this direction, I shall be glad to do so.

If you will ask Congressman KNOWLAND, of the Third District (whose name, I am proud to say, was first mentioned as a candidate for Congress in my newspaper), he will, I am sure, testify to my reliability.

I must ask as a favor, however, that my name be not publicly mentioned in this connection, nor that of the company with which I am connected.

Wishing you the utmost success in the fight you are waging on behalf not only of California, but the entire country, a fight which I am assured time will show you to have been on the right side, I am,

Yours, truly,

Apartado 11, Cuatro Cienegas, Coahuila, Mexico.

Mr. HEPBURN. Mr. Chairman, while the gentleman from California [Mr. HAYES] was discussing this subject the query came to my mind as to whether or not the people of the Pacific coast were not very largely responsible for this increase in the number of Chinese immigrants in the United States. It is now more than twenty-five years since the exclusion act was passed. At that time it is claimed that there were something less than 100,000 Chinamen in the United States. They were nearly all of them adults, probably the great majority of them were past middle age; there were no children; there were few women, and there were very few youths. With the natural decrease from death and also from the habit of these people as soon as they acquire a little competency to leave the country, the probabilities are that if there had been no increase from abroad the entire Chinese population that we then had would have disappeared. But instead of that I do not doubt that there is a larger number in the United States to-day than there was twenty-five years ago, and that there is a larger number in California than twenty-five years ago.

The truth is, Mr. Chairman, that the great mass of the population of California has never sympathized, in my judgment, with the exclusion act, nor have the people of the United States. Instead of that, in my belief, there is a feeling favorable to a limited Chinese immigration. I do not hesitate to say that 500,000 could be absorbed in the labor field of the United States to-day and not displace a single American. They are the best domestic servants to be found anywhere. They are the choice of all of the domestic servants of the gentleman's own State, I am informed, and while there has been much said here about their untruthfulness and their want of integrity, there is a place for all of these accomplished servants at high wages in the State of California, and a much larger number, I have no doubt, could be accommodated.

There is not a village in the United States where the question of how to run the household, the question of domestic service, is not an all-absorbing one. There is not a village in the United States where the housewives are not more troubled over this question than any other domestic one. [Applause.] How to get good service, how to obtain competent service; and we are excluding thousands, tens of thousands, who would be glad to come and fill this great want if it were not for the cowardly submission to a supposed demand of some parts of organized labor.

There is the trouble. If this matter could be submitted to the housekeepers of the United States, it would be decided against the foolish policy that we have adopted in obedience to the demands of Dennis Kearney and other sandlotters, agitators, and disturbers of the peace on the Pacific coast. Mr. Chairman, if I had my way, I would so modify the exclusion laws that all immigrants from China of the proper age who

came here for the purpose of serving as domestic servants should be welcomed and permitted to stay as long as they followed that occupation. If that was the law of the land, it would bring quiet and peace and contentment to many a household in the United States.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. HAYES. Mr. Chairman——

The CHAIRMAN. The Chair recognizes the gentleman from South Carolina [Mr. LEVER].

Mr. LEVER. Mr. Chairman, I yield to the gentleman from California.

The CHAIRMAN. The gentleman can not yield in the Committee of the Whole House.

Mr. HAYES. Mr. Chairman, I move to strike out the last word. I am somewhat astonished by the words of the gentleman from Iowa, and in behalf of the people of California I want to say that he is entirely in error as to the sentiment of the people of that State. More than twenty years ago a vote was taken by direction of the state government on the question as to whether the State was in favor of the exclusion of Chinese, and over 200,000 votes were recorded by the voters of that State in favor of exclusion and only between 600 and 700 against exclusion, and I have no doubt if the vote were taken to-day the measure would carry by nearly as large a majority.

More than that, Mr. Chairman, if the people of the State of California could settle this matter, they would not only exclude the Chinaman from the soil of this country, but they would exclude the Japanese and every other Asiatic. [Applause.] The people of California understand this question better than the gentleman from Iowa, and nobody who has not come in contact with it does understand it; and they know that unless these laws are enforced in their letter and spirit that we are creating from year to year a race problem that will be more difficult of solution and that will bring greater disaster to the people of the Pacific coast and to that beautiful section than the race question has brought and possibly may in the future bring to the good people in the South. [Applause.] For that reason I know that I speak for 95 per cent of the people of all classes of the State of California when I say we are praying, we are asking from year to year—we have not come yet to demanding, we have no right to demand, though we would if we could—that the Congress of the United States protect us from that great menace, oriental immigration.

The gentleman is mistaken when he says that if 500,000 Chinese were imported they would not take a day's labor away from a white man or an American citizen. I say, Mr. Chairman, that at this moment there are 22,000 idle white men in the city of San Francisco alone, and every charitable institution there is maintaining, and has been for months, a system of supplying the necessities of these people who are out of work, and yet in my district there are probably 10,000 Japanese, I do not know how many Chinamen, nearly all of whom are employed. Now, Mr. Chairman, I say to you that the people of California, except the few who profit by their labor, which is generally given cheaper than white labor, are in favor of what they conceive to be the patriotic thing to do, and that is to preserve the land of the Pacific coast for the Caucasian race [applause], for those who are either citizens of the United States or may become such. Not a single Chinaman or Japanese can become a citizen of the United States, and yet they are going into the counties of California and buying or renting the land, and in some places they now own great tracts of land in that fair State. I say to you that I believe it is an immediate, pressing necessity that something should be done to stop the influx of Orientals who have been coming to the Pacific coast and who, unless prevented, will absorb not only the entire labor there, but will buy up the land and come to possess and rule and control that fair country as they do or will soon do in Hawaii.

Mr. HEPBURN. I simply wanted to ask the gentleman, Mr. Chairman, whether these thousands that were out of employment were now or would be engaged in domestic labor?

Mr. HAYES. Many of them, undoubtedly, as many of them are waiters and cooks, because that is where the pressure comes largest, from the Japanese especially, and not only that, but there are many girls and women who need the work that is given to these orientals.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAYES. Mr. Chairman, I ask unanimous consent that I may have two minutes more.

Mr. SMITH of Iowa. Pending that, I want to say that unless this debate is closed in the next few minutes I must ask that it be closed.

Mr. HAYES. I only wish to say, Mr. Chairman that——

Mr. SMITH of Iowa. Mr. Chairman, I do not understand that time has been extended to the gentleman yet. I want to move that debate end in eighteen minutes.

Mr. CLARK of Missouri. Will the gentleman give me five minutes of that?

Mr. SMITH of Iowa. I will agree to that. I will yield five minutes to the gentleman from Iowa [Mr. HEPBURN], five minutes to the gentleman from Missouri [Mr. CLARK], five minutes to the gentleman from California [Mr. HAYES], and five minutes to the gentleman from New York [Mr. HARRISON], making it twenty minutes in all. I move, Mr. Chairman, that all debate close in that time.

The CHAIRMAN. The Chair will state that it is not in order in Committee of the Whole, except by unanimous consent, to parcel out the time. The gentleman from Iowa [Mr. SMITH] asks unanimous consent that all debate be closed in twenty minutes, to be occupied as he has indicated. Is there objection? [After a pause.] The Chair hears none. The gentleman from California [Mr. HAYES] is recognized for five minutes.

Mr. HAYES. Mr. Chairman, I only desire to say that what is true of San Francisco is true in a less degree of all sections of the State of California. The labor market is greatly overcrowded there, and unless there can be some stop to the influx of the Oriental the time is not far distant when the common laborer of California and, doubtless, in time, the skilled labor, also, will be wholly monopolized by Orientals, because no white man and no white woman can compete with them.

Now, Mr. Chairman, it is not entirely a labor question in the State of California. The gentleman from Iowa [Mr. HEPBURN] is entirely mistaken. These agitations do not come wholly from labor agitators and disturbers of industrial peace, as he states. They come also from men who are employers of labor, and from all classes of society. Mr. Chairman, I claim not to belong to the class of labor agitators. I am myself a large employer of labor, and I would as soon cut off my right hand as to do what the gentleman says, namely, to put in my house as domestics Chinamen or other Orientals to take the place of the white girls that are now employed there.

And why? Because I see that unless the American people set their faces hard against this the contest that is going on on the Pacific coast will result, as it has always resulted, when there comes a contest between the horde from Asia and the Caucasians; and what arms have done in the past peaceful and commercial conquest will do on the Pacific coast in the near future. And, for one, I hope never to live to see the time when that coast will be in the hands of the Orientals as the islands of Hawaii are to-day.

Gentlemen also think that all this is prompted by race prejudice; that it has no foundation in fact. I thank God there is some race prejudice against the Orientals on the Pacific coast, because without prejudice amalgamation would come, and God forbid that anything of that kind should take place on the Pacific coast. [Applause on the Democratic side.] It is true that as yet this race prejudice has not come to the point of such animosity as to lead to bloodshed and mob violence, though it may come to this if the immigration continues, because men that are hungry, and whose wives and children are hungry will not forever, and can not be expected, forever to restrain themselves.

They have been restrained by the promise, the expectation, and hope that the Government of the United States would finally protect them from this peril. Once this hope is dissipated, once it comes to be a settled conviction in the minds of the people of the Pacific coast that the Government of the United States is indifferent to their interests and to their destiny, they may be forced to do what the people of Humboldt County did some twenty years ago—organize themselves, take possession by force of the property and persons of the Orientals within their confines, hire a ship, send them back to China, and warn them never to set their foot on the soil of that county again.

I do not advocate anything of this kind. I should feel very much chagrined to see anything of this kind come; but I do hope that the people of the United States, as represented in this House, will see to it that before it is too late the people of the Pacific coast and that fair section are protected by ample exclusion laws, which shall exclude not only the Chinese, but the Japanese, Hindoos, Lascars, Koreans, and every other Asiatic, and that those laws shall be enforced in letter and spirit.

Mr. WILLIAMS. I would like to ask the gentleman a question. While he is excluding Orientals and Asiatics, why not also exclude Africans?

Mr. HAYES. I would exclude everything but the Caucasian race, if I had my way.

Mr. WILLIAMS. Africans from Africa and the West Indies.

Mr. CLARK of Missouri. Mr. Chairman, I fully agree with the gentleman from California [Mr. HAYES] in his desire to exclude the Chinese; I will go with him in excluding the Japanese; I congratulate him on believing in a white man's government; but I can not understand the peculiar delicacy of certain people who object to their children going to school with Japanese and are still willing for their children to go to school with Africans, a race inferior to the Japanese.

The gentleman from Iowa, Colonel HEPBURN, made a very remarkable speech. I always listen to what he has to say with a great deal of interest. On this occasion I heard him with amazement. He puts the opposition to Chinese immigration into the United States on the wrong principle. As I understand him, his view of it is that nobody but a lot of cowards and demagogues are opposed to it. I do not believe that I am a coward; I hope that I am not a demagogue. He says that opposition to Chinese immigration is at the behest of the labor organizations. The labor organizations are against that immigration, and the labor organizations are dead right in being against that immigration. [Applause.]

But it is not only organized labor that is against that immigration. It is every laborer in the United States who understands his rights and values his own interests. [Applause.] I have been a laboring man all my life. In my youth I worked as a hired hand on a farm [applause], and there is no harder work that I know of among men. I am as proud of that as of having been elected to Congress eight times. [Loud applause.] It is just as essential a fact in my history that men may understand my conduct here and elsewhere.

The gentleman from Iowa says that he does not believe that one-tenth of the people in California are really at heart opposed to Chinese immigration, and he does not believe that one-tenth of the people of the United States are opposed to it. Now, it happened that I served six years on the Committee on Foreign Affairs of this House, and we had hearings on the last Chinese-exclusion bill that we passed. They were remarkable hearings. All classes of people, from the man who is going to be President for the next four years down to common laborers and scrub women, testified.

The Caucasian race from the dawn of history has been the dominant race of the world; it is yet, and always will be as long as any of us are left. [Applause.] We have furnished the world with its greatest soldiers, its most renowned statesmen, its foremost men in literature, art, finance, commerce, and business. We claim to be superior to everybody in everything. There is one mistake in that proposition. There is one thing that by reason of centuries of training and by disposition we are unable to do. We can not compete with the Chinese in the matter of starvation. [Loud applause.] If you let them in here ad libitum or even in large numbers, they will starve our laborers out. The gentleman from Iowa, Colonel HEPBURN, says that 500,000 Chinese laborers can be absorbed into the labor of the United States at this time. It is currently reported that there are millions of Americans out of employment in this country to-day. The gentleman from California [Mr. HAYES] says that 22,000 stand in bread lines in San Francisco alone. I would rather see 500,000 men and women of my own blood absorbed in the labor of this country. [Loud applause.]

I want to state just this one fact; I wish I had time to state a good many more: The first time I ever saw Judge Taft was during those hearings on the Chinese bill. He was then governor-general of the Philippines. One of the questions considered by the committee in regard to that bill was whether we should shut them out of the Philippines. Judge Taft appeared, and that was the first time I ever saw him, and I have had the highest opinion of him ever since. Among other things we asked him was whether they should be shut out of the Philippines, and he said "Yes." We asked him why, and he said: "Put a white man down in one shop, a Filipino in another, and in between them a Chinese in a shop, and in twelve months the Chinaman would starve them both out of business." [Applause.] We told him it had been stated before the committee, what we considered almost incredible, that a Chinaman could live on 2 cents a day.

We asked him about that, and he said:

If you will set him down to the same table at which you sit he will eat as much as you—perhaps more—but if the Chinaman had to live on 2 cents a day he could do so.

We asked him what he would live on. He said:

Rice and a little dried fish.

Mr. Chairman, we can not do that. In such a contest we would go to the wall. Therefore I am in favor of shutting out this whole horde of Asiatics and Africans. Shut out all immigrants except people of the white race. There is no sense in creating racial troubles.

The CHAIRMAN. The gentleman from New York is recognized for five minutes.

Mr. HARRISON. Mr. Chairman, I heard with amazement the remarks of the gentleman from Iowa on the subject of Chinese exclusion. It is evident that he has never come into contact with the Chinese and other Asiatics in the United States. He lives out there in Iowa, where I dare say they do not see a Chinaman once within a moon's age. But I have lived in California for months at a time, and from my personal observation of the people of the Pacific coast and from my personal observation of this question out there I want to corroborate what the gentleman from California [Mr. HAYES] has just said. I want to tell the gentleman from Iowa that, in my opinion, he has entirely missed the crux of this matter. I think that he will find that the people of the United States are a unit in demanding that this bar shall not be taken down and that our labor markets shall not be flooded with the hungry millions of the Orient.

But there is another question involved in this matter, and I refer not only to the Chinese, but to the Japanese as well. The question of the white civilization is at stake. If the gentleman from Iowa and his family and the families of his neighbors were surrounded by colonies of Orientals, differing from our race in every essential which forms a line of cleavage between the white and yellow races, if he were surrounded by bands of people who were lowering the standards of living and were depriving the American people of the opportunity to make a living, who were driving home hideous ideas to which our people are strangers and for which they will not stand, then, I say, he would understand, as some of the rest of us understand, the real meaning of the Chinese and Japanese questions.

Mr. Chairman, in its sum it is nothing more or less than our assertion of our rights to preserve the white civilization. [Applause.] I have served for two years on the Committee on Foreign Affairs. I do not know whether I shall be on that committee in the next Congress or not. In this Congress there was no question before us of Japanese exclusion; but I want to say to this House that if I am a member of that committee in the next Congress, and a question of Japanese exclusion comes before our committee, I, for one, will vote for it, in the interest of the preservation of our institutions and our white civilization. [Applause.]

Mr. HEPBURN. Mr. Chairman, I am sorry gentlemen have become so agitated over this matter that they can not even state properly the suggestions that I have made. I have not suggested to anybody the idea of allowing California to become overrun by oriental hordes. I have not suggested a thought that looked like making the Oriental dominant over the Caucasian. My suggestion was that 500,000 Orientals engaged in domestic service would displace no Americans. I affirm it. I say that all over this land there are women compelled to do their own domestic drudgery because they can not secure domestic servants; and I submit to the gentleman that I, too, have heard Californians—not politicians, not gentlemen catering to organized labor—discuss this subject in their homes, extolling the virtue of the Chinaman in their kitchen, declaring their unwillingness to allow him to depart, and insisting that there were still in California thousands of vacant homes ready to welcome his advent.

My proposition is that these vacant places in American homes should be filled by the competent Chinaman, content to do domestic service, and that he should be permitted to come and to remain so long as he is willing to fill that want. That is my proposition, gentlemen. Please do not distort it. Do not conjure up in your affrighted fancy ghosts that I have never suggested.

The gentleman tells us that the Caucasian race has always been dominant. Ah, that depends upon the theater in which you find the Caucasian race. Has the Caucasian race ever been dominant over the 400,000,000 of Chinamen, over the 200,000,000 of India, over the 50,000,000 of Japan, over the millions, I do not know how many, of the seas? Oh, no. When you make that statement you must confine yourself to Europe, to a little portion of Asia, and to our own continent.

Mr. CLARK of Missouri. Will the gentleman allow me to ask him one question?

Mr. HEPBURN. I am not sure now that I could answer it.

Mr. CLARK of Missouri. Do you not know that 70,000 Englishmen hold in subjection this very day 300,000,000 East Indians?

Mr. HEPBURN. I know that apparently the British Empire is dominant to-day over the East Indians. But I know that every newspaper we read tells us of the mutterings of discontent. Every prophecy that we read points to a future when

these people shall emancipate themselves and assert their rights; and I have no doubt but that the great question of statesmanship now confronting the British ministry for solution is how they shall keep the peace, how they shall be able to assert still longer their dominion over India.

Mr. Chairman, I am as much intent upon the supremacy of the Caucasian race as is anyone. I want no amalgamation; I want no pollution of our blood; I do not want even pollution of our citizenship. I have been one of those who, during all the years, have fought here for greater barriers, for greater protection, against the horde of immigrants that come here and occupy places in our labor field. I am pleading for the coming of those who do not displace anyone, for those who will fill vacant places, and not displace those that are now in place. [Applause.]

The CHAIRMAN. The time for all debate has expired, and the Clerk will read.

The Clerk read as follows:

For the expenses of the commission provided for in section 39 of the act of February 20, 1907, including the salaries of the commissioners and their clerks and other employees, $300,000.

Mr. MURDOCK. Mr. Chairman, I make a point of order to that.

The CHAIRMAN. Does the gentleman from Kansas wish to be heard on the point of order?

Mr. MURDOCK. Mr. Chairman, this commission hitherto has been paid out of a permanent indefinite fund. This is the first time it has been carried in this bill. It is legislation upon an appropriation bill, and it is clearly out of order.

Mr. SMITH of Iowa. Mr. Chairman, the law of February 20, 1907, authorized the payment of these expenses, as stated, out of the permanent appropriation of head tax. The Department of Commerce and Labor estimates the expenses of this commission for the next fiscal year at $300,000, and the permanent appropriation of the head tax being repealed by the previous language of this bill the committee deemed it its duty to bring in an item covering the $300,000 estimated for. I call attention to the following portion of the hearings referring to this subject:

Mr. FITZGERALD. Can you tell how much was drawn during the fiscal year?

Mr. SMITH. We would like to know how much this has cost from the beginning up to date.

The CHAIRMAN. Can you state the aggregate for the record?

Mr. SOLEAU. The entire sum, Mr. Chairman, advanced on warrants to the Immigration Commission, from its organization to December 31, 1908, was $304,140.02, and there is a memorandum on my desk from that commission saying that during the balance of the current fiscal year they would require $150,000, making a grand total from date of organization in the spring of 1907 to June 30, 1909, of $454,140.02. Of that sum, $303,462.88 is chargeable to the fiscal year 1909, provided they have no unexpended balance at the close of the current fiscal year.

The CHAIRMAN. The Chair desires to ask the gentleman from Iowa what is the act of February 20, 1907?

Mr. SMITH of Iowa. It is the immigration law, and in that law, as the Chair will remember, there was originally an educational clause, and a section was substituted for that providing for this investigation.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed with amendments bills of the following titles, in which the concurrence of the House of Representatives was requested:

H. R. 15681. An act for the relief of the Compañía de los Ferrocarriles de Puerto Rico.

H. R. 24834. An act for the protection of the surface rights of entrymen.

The message also announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 9373. An act to provide for the sale of isolated tracts of public land in Imperial County, Cal.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 9454. An act granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and helpless and dependent relatives of such soldiers and sailors—to the Committee on Invalid Pensions.

S. 9373. An act to provide for the sale of isolated tracts of public land in Imperial County, Cal.—to the Committee on the Public Lands.

ENROLLED BILLS SIGNED.

The SPEAKER announced his signature to enrolled bills of the following titles:

S. 9017. An act for the establishment of a subport of entry at Ranier, Minn.

S. 7378. An act to extend the time for the completion of a bridge across the Missouri River at or near Yankton, S. Dak., by the Winnipeg, Yankton and Gulf Railroad Company.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 26305. An act making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1910, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WILSON of Illinois, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 27139. An act to provide for the sittings of the United States circuit and district courts of the northern district of Ohio at the city of Youngstown, in said district;

H. R. 26068. An act providing for an additional judge for the western district of Pennsylvania, and for other purposes;

H. R. 15230. An act to amend an act approved February 28, 1901, entitled "An act relating to the Metropolitan police of the District of Columbia;

H. R. 18694. An act relating to the use, control, and ownership of lands in the Canal Zone, Isthmus of Panama;

H. R. 20111. An act to amend an act entitled "An act to establish a Code of Law for the District of Columbia," relative to gambling, bucket shops, and bucketing; and

H. R. 25155. An act to amend an act approved July 1, 1902, entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes."

HARRY KIMMELL.

Mr. HUFF. Mr. Speaker, I ask unanimous consent for the present consideration of the following joint resolution.

The Clerk read as follows:

House concurrent resolution 71.

Resolved by the House of Representatives (the Senate concurring), That the President be requested to return to the House of Representatives the bill (H. R. 17214) for the relief of Harry Kimmell, a commander on the retired list of the United States Navy.

Mr. MANN. What is the bill?

Mr. HUFF. The resolution asks the President to return a bill.

Mr. MANN. This is the third or fourth bill that we have asked to be returned. What is the matter?

Mr. HUFF. Nothing is the matter with this bill.

The SPEAKER. Is there objection to the consideration of the resolution?

There was no objection.

The resolution was agreed to.

DISTRICT JUDGE FOR WESTERN DISTRICT OF WASHINGTON.

The SPEAKER laid before the House the bill (H. R. 27061) to provide for the appointment of an additional district judge in and for the western district of Washington, with Senate amendments.

The Senate amendments were read.

Mr. JENKINS. Mr. Speaker, I move that the House disagree to the amendments of the Senate and ask for a conference.

Mr. MANN. I shall object, if there is to be a conference. The only motion should be to disagree.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent that the House disagree to the Senate amendments and ask for a conference.

Mr. MANN. I shall object.

Mr. JENKINS. Then I will ask unanimous consent that the House disagree to the Senate amendments.

Mr. MANN. Mr. Speaker, reserving the right to object, this creates an additional judge for the district of Oregon. It has not been considered by the House, and of course it is subject to the point of order of being considered in the Committee of the Whole House on the state of the Union.

Mr. JENKINS. Mr. Speaker, if the gentleman will permit, I will say that the committee has been wrestling with this matter for the last two days, and the committee is unalterably opposed to the creation of this new judgeship, and has been doing the very best to allow the bill for the additional judge in Washington to pass and at the same time defeat this.

Mr. MANN. The easiest way to defeat this is to disagree to the Senate amendments, and not to ask for a conference.

Mr. JENKINS. We are now asking that the House disagree to the Senate amendments.

Mr. MANN. The gentleman said he asked for a conference.

Mr. JENKINS. We are not asking for a conference.

Mr. MANN. The gentleman said he asked for a conference, I understand. The gentleman from Washington informed me that there would be no request for a conference, as I understood it.

The SPEAKER. The Chair understands the gentleman from Wisconsin asks that the House disagree to the Senate amendment. Is there objection?

Mr. MANN. Is that to be followed by a motion for a conference?

Mr. JENKINS. No.

Mr. MANN. I have no objection.

The SPEAKER. The Chair hears no objection.

SURFACE RIGHTS OF ENTRYMEN.

The SPEAKER laid before the House the bill (H. R. 24834) to protect the surface rights of entrymen, with Senate amendments thereto.

The Senate amendments were read.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent that the House disagree to the Senate amendments and ask for a conference.

The SPEAKER. The gentleman asks unanimous consent that the House disagree to the Senate amendments and ask for a conference. Is there objection? [After a pause.] The Chair hears none.

The Chair appointed the following conferees: Mr. MONDELL, Mr. VOLSTEAD and Mr. ROBINSON.

The SPEAKER. The committee will resume its sitting.

SUNDRY CIVIL APPROPRIATION BILL.

The CHAIRMAN. A point of order is pending. Has the gentleman from Kansas anything further to say on the point of order?

Mr. MURDOCK. Nothing further, except what I did say. The expenses for the Immigration Commission have previously come out of a permanent indefinite fund, for which there has been no accounting to any other than the auditor. There has been no appropriation in current appropriation bills for this commission. Consequently and clearly when this item in this bill carries an appropriation for those expenses, it is legislation upon an appropriation bill and out of order under the rules.

The CHAIRMAN. Does the gentleman from Minnesota desire to be heard on the question?

Mr. TAWNEY. Mr. Chairman, I have no desire to be heard further than to repeat what the gentleman from Iowa [Mr. SMITH] has already said, that this commission is authorized by law, and the amount available for expenses as authorized by the bill creating the commission is to be paid out of a permanent indefinite fund. That has been repealed, and if this changes the existing law so as to make it impossible to appropriate for it, why, there would be no appropriation for the commission, and it would go out of existence, which would not be a calamity, in my judgment, to the public.

Mr. MURDOCK. Mr. Chairman, it is not within the province of this House to determine whether this point of order puts the commission out of business or not. As I understand, the Chair's ruling will be based wholly on the point of order under the rules. I wish further to call the attention of the Chair to the fact that under the law as it now stands, if this bill should become a law as we have passed it, the head tax goes into the General Treasury.

The CHAIRMAN. The Chair would like to ask the gentleman from Minnesota why it is that this appropriation is carried in the sundry civil appropriation bill and has not been heretofore?

Mr. TAWNEY. It has not been heretofore carried, Mr. Chairman, for the reason that the law creating the commission, which I think the Chair has before it, specifically directs that the expense of the commission shall be paid out of the immigration fund, which is a permanent indefinite appropriation, and that expense is paid out upon the voucher of the chairman of the commission without audit by anybody.

Mr. MANN. Will the gentleman yield for a question?

Mr. TAWNEY. Yes.

Mr. MANN. Is it not true that under the existing law the expenses of this commission are required to be paid out of the permanent appropriation resulting from the income coming out of the head tax?

Mr. TAWNEY. That is a fact.

Mr. MANN. Is not this, then, a direct violation of that law proposing to pay this money out of the Federal Treasury out of the general fund?

Mr. MURDOCK. Surely.

Mr. TAWNEY. Well, it would be a change of existing law in my judgment.

Mr. MANN. I do not see how there can be any question but that this is subject to a point of order.

The CHAIRMAN. The Chair thinks it is subject to the point of order. In reading the act creating the commission which the present occupant of the chair held in order on the immigration bill, the Chair finds the following:

Such sums of money as may be necessary for the said inquiry, examination, and investigation are hereby appropriated and authorized to be paid out of the immigrant fund.

The mere fact that the immigration fund has disappeared does not authorize an appropriation, and it is clearly a change of existing law. The Chair therefore sustains the point of order.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. AMES having taken the chair as Speaker pro tempore, a message, in writing, from the President of the United States was communicated to the House of Representatives, by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills and joint resolutions of the following titles:

On February 24, 1909:

H. R. 2635. An act for the relief of Herman Lehmann;

H. R. 13777. An act for the relief of the estate of Samuel Beatty, deceased;

H. R. 18600. An act for the relief of John M. Hill;

H. R. 19606. An act to provide for the granting and patenting to the State of Colorado desert lands within the former Ute Indian Reservation in said State;

H. R. 22340. An act relating to injured employees on the Isthmian Canal;

H. R. 23699. An act to grant to John T. Rivett privilege to make commutation of his homestead entry;

H. R. 24373. An act to reimburse Royal L. Sweany, late deputy collector of internal revenue at Tacoma, Wash.;

H. R. 25396. An act for relief of applicants for mineral surveys;

H. R. 26516. An act authorizing Daniel W. Abbott to make homestead entry;

H. R. 26734. An act to permit change of entry in case of mistake of the description of tracts intended to be entered;

H. J. Res. 219. Joint resolution to accept the gift of Constitution Island, in the Hudson River, New York; and

H. J. Res. 241. Joint resolution to authorize the Secretary of War to furnish one condemned bronze cannon and cannon balls to the city of Robinson, Ill.

On February 25:

H. R. 3760. An act for the relief of the creditors of the Deposit Savings Association, of Mobile, Ala.;

H. R. 7029. An act for the relief of C. L. Huey;

H. R. 17276. An act for the relief of S. R. Hurley;

H. R. 23707. An act to incorporate the Imperial Palace Dramatic Order Knights of Khorassan;

H. R. 27311. An act amending chapter 591 of the United States Statutes at Large, Fifty-sixth Congress, approved May 26, 1900, entitled "An act to provide for the holding of a term of the circuit and district courts of the United States at Superior, Wis.;"

H. R. 27894. An act amending "An act to amend an act entitled 'An act to regulate commerce,' approved February 4, 1887, and all acts amendatory thereof, and to enlarge the powers of the Interstate Commerce Commission," approved June 29, 1906; and

H. R. 24833. An act to declare and enforce the forfeiture provided by section 4 of the act of Congress approved March 3, 1875, entitled "An act granting to railroads the right of way through the public lands of the United States."

SUNDRY CIVIL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

Special examiners, division of naturalization: For compensation, to be fixed by the Secretary of Commerce and Labor, of examiners, interpreters, clerks, and stenographers, for the purpose of carrying on the work of the Division of Naturalization, Bureau of Immigration and Naturalization, provided for by the act of Congress approved June 29, 1906, entitled "An act to establish a Bureau of Immigration and Naturalization and to provide for a uniform rule for the naturalization of aliens throughout the United States," and for their actual necessary traveling expenses while absent from their official stations, subject to such rules and regulations as the Secretary of Commerce and Labor may prescribe, and for the actual necessary traveling expenses of the

officers and employees of the division of naturalization in Washington while absent on official duty outside of the District of Columbia, $150,000. A detailed report of the expenditures under the appropriations for this service shall be annually submitted to Congress at the beginning of each regular session thereof.

Mr. MANN. Mr. Chairman, I reserve the point of order on that paragraph. There has been a great deal of contention as to whether this work should be done by the Department of Justice or by the Department of Commerce and Labor. I made some investigation, not very extended, in the city of Chicago in regard to the matter, and came to the conclusion that while legally the work was now being carried on under the Department of Justice it was in fact being carried on by the Department of Commerce and Labor in unquestionably the most uneconomical manner that could be imagined. While in the Department of Justice they will not allow you to purchase a library, and it is difficult to get permission to buy a law book in this branch of the service, nominally under the Department of Justice, but really under the Department of Commerce and Labor, you can buy the finest kind of thing at any old time you please, without regard to cost or need.

Mr. TAWNEY. Mr. Chairman, on that proposition the criticism of the gentleman from Illinois in respect to the extravagance of this service may be just, but I do not agree with him that the responsibility for that extravagance is chargeable to the Department of Commerce and Labor. In a certain sense it is true that the examiners heretofore employed were taken from the other branches of the public service, and to some extent they are subject to orders from the Department of Commerce and Labor; but this service at the present time and ever since the service was inaugurated two years ago has been under the direct supervision of the Department of Justice, and the appropriation for that service has been made for that department. During all that time, too, there has been a controversy carried on in the Committee on Appropriations, and sometimes on the floor of the House, as to which one of these two departments is charged with the duty of administering our naturalization laws.

Now, after two years' experience, the Department of Justice acquiesced in the desire of the Department of Commerce and Labor, and also in the desire of the Committee on Appropriations, to transfer the entire jurisdiction and control in the matter of the administration of our naturalization laws to the Department of Commerce and Labor, and for that purpose we have dropped the appropriation heretofore made for this purpose under the control of the Department of Justice and have transferred that appropriation to the Department of Commerce and Labor, and we have also dropped entirely the employment of special attorneys, or assistant United States district attorneys, for the enforcement of this law and provide only for the employment of examiners.

Mr. FINLEY. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Minnesota yield?

Mr. TAWNEY. In just a moment. The opportunity for the extravagance to which the gentleman from Illinois calls attention is in the wording of this paragraph which the Committee on Appropriations discovered, I think at the last session, was being interpreted so as to admit of almost any expenditure. When this appropriation was originally made for the enforcement of this law under the administration of the Department of Justice, we accepted the language of the paragraph as prepared by the department, which is as follows:

For the payment of assistants to the Attorney-General and of assistants to United States district attorneys employed by the Attorney-General to represent the United States in naturalization and other proceedings, and for other necessary expenses.

When that language was written in the appropriation act it was with the understanding on the part of the committee that the words "and for other necessary expenses" referred only to the incidental expenses necessarily incurred by the assistant district attorney charged with the administration of this law.

We discovered, however, in the administration of the appropriation that the Department of Justice interpreted that language to mean any old expenses that they saw fit to charge up against the appropriation in the administration of this law, and under that provision they commenced employing not only assistant district attorneys, but special examiners, which I think was absolutely unwarranted and unauthorized. Nevertheless it depends altogether upon the interpretation which you put on the language "and for other necessary expenses." So after this administration has proved unsatisfactory and extravagantly expensive under the Department of Justice the committee has concluded to try the Department of Commerce and Labor, as some one or the other of these two departments must be charged with the duty of administering this law. I now yield to the gentleman from South Carolina.

Mr. FINLEY. Mr. Chairman, I wish to ask the chairman of the Committee on Appropriations does he think there will be more efficient administration of the law under the Department of Commerce and Labor than was under the Department of Justice?

Mr. TAWNEY. I have no reason to believe, so far as the administration of the law is concerned, it was inefficient. My criticism is that it has been very expensive, necessarily expensive, and I believe it will be more economically administered under the Department of Commerce and Labor than it was under the Department of Justice.

Mr. FINLEY. Does the gentleman think it will be as efficiently administered?

Mr. TAWNEY. I do.

Mr. FINLEY. Why?

Mr. TAWNEY. I believe it will be just as efficiently administered for this reason: The same men that are now employed in the administration of the law, with the exception of the assistant attorney, will be employed under the Department of Commerce and Labor. They will simply be transferred from one department to the other, and in the administration of this law, let me say to the gentleman from South Carolina, there is really no necessity for assistant district attorneys.

The evidence submitted to the committee on the part of the judges themselves commends the services of these examiners, and these examiners are merely aids to the courts in obtaining information with respect to the applicants and the truthfulness of their answers in their applications, and also the credibility of their witnesses and the competency of the same.

Mr. FINLEY. If I correctly understand the gentleman, he states that the administration of the law under the Department of Commerce and Labor will be the very same as to its personnel as it is under the Department of Justice. Is that correct?

Mr. TAWNEY. The gentleman misunderstood me.

Mr. FINLEY. I beg pardon. I understood the gentleman to say it would be the same.

Mr. TAWNEY. So far as the examiners are concerned, yes; but so far as the district attorneys are concerned, no.

Mr. FINLEY. Now, in what respect will it differ?

Mr. TAWNEY. There will be no attorneys employed in the administration of this law. There will be no offices maintained for district attorneys.

Mr. FINLEY. Now, does the gentleman think——

Mr. TAWNEY. That service is entirely unnecessary, as shown by the experience of two years' administration.

Mr. FINLEY. Does the gentleman think a law can be administered and enforced without the necessity for attorneys?

Mr. TAWNEY. Oh, certainly. No question about it at all.

Mr. FINLEY. Will the gentleman kindly explain why?

Mr. TAWNEY. Why, because there is not anything in connection with the administration of the naturalization law that requires an attorney, except in cases where the law has been violated, when, of course, prosecutions are necessary. This does not involve prosecutions.

Mr. FINLEY. To what extent will the service be more economically administered?

Mr. TAWNEY. The salaries of all these district attorneys will be one saving, and much of the furnishings of their offices, and their typewriters, and expenses of clerical services of that kind.

Mr. FINLEY. Now, that service will be performed by whom?

Mr. TAWNEY. Nobody. They do not need it.

Mr. FINLEY. No necessity for it?

Mr. TAWNEY. No; no necessity for it.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Will the gentleman yield for a question?

Mr. TAWNEY. Yes, sir.

Mr. MANN. Does the gentleman think it is desirable to make this transfer?

Mr. TAWNEY. I do.

Mr. MANN. And make the experiment with it?

Mr. TAWNEY. I do.

Mr. MANN. Of course, this will only be for the next fiscal year?

Mr. TAWNEY. That is all.

Mr. MANN. And it is purely experimental?

Mr. TAWNEY. Yes, sir.

Mr. MANN. The item would be subject to a point of order hereafter, and there would be, in fact, no change of law?

Mr. TAWNEY. No.

Mr. MANN. So far as I am concerned, with that understanding, I will withdraw the point of order.

Mr. GAINES of Tennessee. Mr. Chairman, I want to renew the point of order. I desire to get a little information before we go along on this important matter, since it has come up.

I have listened to what has been said, and I now hold in my hand the report of the Attorney-General upon the subject, and I have asked myself this question, and I now submit it to the committee. Let us see now what we are doing, what we have done to-day, and are now about to do. First, we limited the Secret Service in the Treasury Department. That department has, I believe, the execution of the immigration law. Now, we have limited that. Last session we put this proposition into the hands of the Department of Justice, and we took away from the Department of Justice the secret-service system.

And the Department of Justice has been forced to create an inefficient service to execute the laws under the Department of Justice. In addition to that, only a few moments ago we appropriated $50,000, requiring no vouchers whatever, no receipt, no report, to be given to some other bureau, I do not know where, up in New York somewhere. As the gentleman from New York [Mr. BENNET] had charge of it, I presume it is to be located there. So we have still three divisions or three changes we have had here to-day in our force, it looks like, to get rid of the X-ray eye of that undesirable system we continue to have, to wit, the Secret Service. Now, it looks to me you are swapping horses too fast; you are inconsistent; and I submit—I do not mean to be a dyspeptic here; I do not mean to take up the time, but I say you are in a state of consternation. The secret-service system is not after us. They are welcome to be after me. I will be on hand.

Now, Mr. Chairman, I find in exhibit 18 of the Attorney-General's report of 1907 two large pages on the subject of the naturalization law. I have not time to read that, nor have I had time to read the report. Now, on page 14 I find Attorney-General Bonaparte says:

On June 29, 1906, the new naturalization law went into effect, the enforcement of which by provision on the sundry civil bill was attached to this office.

Mr. TAWNEY. Will the gentleman yield to a question?

Mr. GAINES of Tennessee. Yes.

Mr. TAWNEY. Are you aware of the fact that the Attorney-General of the United States himself consents to Congress that this transfer should be made?

Mr. GAINES of Tennessee. Well, I want to say to my friend that I do not bank very much on Mr. Bonaparte being a great lawyer.

Mr. TAWNEY. You are reading from his report.

Mr. GAINES of Tennessee. I am doing the best I can under a Republican administration. [Laughter.] I am doing the best I can under the light I have; but I knew nothing about it until the gentleman's amendment, which would show that we had three different roads provided by which to get rid of the secret-service system, clogging the wheels of the Department of Justice, and of the Treasury Department, and starting some other sort of cloggery over in New York with another system of secret service. Now, I am astonished at the gentleman from Minnesota, who is a strong man, who as a rule understands his business, should say that in the execution of the naturalization laws in the great cities of this country we do not need attorneys to prosecute and look after the cases.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GAINES of Tennessee. I want about five minutes more.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to have five minutes more. Is there objection?

Mr. COCKS of New York. I object.

Mr. GAINES of Tennessee. I move to strike out the last word. Then, Mr. Chairman——

Mr. MANN. Does the gentleman withdraw the point of order when he moves to strike out the last word?

Mr. GAINES of Tennessee. Of course I do.

The CHAIRMAN. Without objection, the Chair will recognize the gentleman.

There was no objection.

Mr. GAINES of Tennessee. Now, I find in the Attorney-General's Report for 1908, Exhibit 13, beginning at page 277 and running over to page 287, a statement showing the special assistants to United States attorneys, including assistant attorneys in naturalization cases and their compensation (as required by section 385 of the Revised Statutes). Here is a long list, gentlemen.

Mr. SABATH. In doing what?

Mr. GAINES of Tennessee. In enforcing the naturalization laws.

Mr. SABATH. In what way?

Mr. GAINES of Tennessee. I do not know; I am trying to find out. Now, right on that point, I am glad that the gentleman suggested that. Where is the Bureau of Commerce and Labor and its secret service enforcing the naturalization laws this year? It is a department of itself; it has its own secret service; the department itself has a secret service as well as the Secret Service of the Treasury, and has had one for many years.

Mr. FITZGERALD. Will the gentleman allow me to ask him a question to interrupt him?

Mr. GAINES of Tennessee. Yes; certainly.

Mr. FITZGERALD. The gentleman is entirely mistaken. Practically the entire business, so far as the exclusion of the Chinese is concerned, is taken care of by the secret agents, and not only by secret agents operating in this country, but for the purpose of carrying out the law secret agents operating in foreign countries.

Mr. GAINES of Tennessee. I am glad to know that, Mr. Chairman. Now, do you curtail this force under this bill?

Mr. FITZGERALD. No.

Mr. FLOYD. Will the gentleman allow me to ask him a question?

Mr. GAINES of Tennessee. Certainly.

Mr. FLOYD. What I want to know is this: If the administration of this law is given to the Department of Commerce and Labor, and they are not allowed attorneys to enforce it or these examiners who find out the violations of the law, how are you going to punish the violators?

Mr. GAINES of Tennessee. That is exactly it. The gentleman puts his finger right on it.

Mr. FITZGERALD. The district attorney——

Mr. GAINES of Tennessee. Oh, the district attorney does not even enforce the Sherman antitrust law. Now, here is a long list. I can not believe Attorney-General Bonaparte or any other man in charge of the Department of Justice would employ all these lawyers if they were unnecessary. Here are appropriations for assistant attorneys in naturalization cases, $8,107.59. Is that going to break the Treasury, when you have just appropriated $50,000 for a lot of people that you are so ashamed of that you will not take a receipt for the $50,000 when you give it to them? There is another appropriation for traveling expenses, $2,922. Here is an appropriation for the prosecution of crimes, $710.

So the gentleman in charge of the bill, instead of showing an enormous and oppressive expenditure on the part of the Department of Justice in this matter, could not show more than a comparatively small expense. It looks like about $18,000 to employ lawyers to go into the courts and follow up the naturalization of the people who come over here—the undesirable set—and to prevent a thing which I believe the gentleman from New York [Mr. BENNET] said he aided in doing—that is, the fraudulent naturalization of voters in the city and State of New York.

Mr. FITZGERALD. There are none in the city and State of New York.

Mr. GAINES of Tennessee. The gentleman from New York [Mr. BENNET] did not say that. I was very much surprised to hear what he did say.

Mr. FITZGERALD. I think his statement was facetious.

Mr. GAINES of Tennessee. I hope he made it facetiously. He did not look facetious when he said it, and he said it in reply to a question put to him by the gentleman from Kentucky [Mr. SHERLEY].

Now, I say we ought to have lawyers, and we ought to stop all fraudulent naturalization, whether done by Members of Congress or anybody else.

Mr. TAWNEY. I move that all debate on the second paragraph and amendments be closed in five minutes.

The motion was agreed to.

Mr. BENNET of New York. I rise for the purpose of agreeing very largely with the committee in its discretion which it has exercised this year. The naturalization law was passed in 1906, under the leadership of the gentleman from Colorado [Mr. BONYNGE]. It was the intention at that time to carry out the execution of the law in exactly the way that the Appropriations Committee now, after two years of effort on the part of some of us, has come to. However, the Attorney-General and the United States district attorney are not entirely eliminated, and will not be.

The law casts upon them a duty which they must discharge. In the large cities, like New York and Chicago and others, if that duty can not be discharged by the regular force of the United States district attorney's office they will have to hire additional assistants; but the work is now being done very largely by examiners who are hired under that part of the cur-

rent law which reads "Assistant to assistant to the district attorney." This simply puts the item right, gives them their correct title, puts the execution of the law where it ought to be; and I want to disagree with the gentleman from Minnesota to the extent of saying that in my judgment the law has been pretty well enforced; that it has stopped fraud, and that it is a good law, except for one proposition, which the next item in the bill will correct.

Mr. GAINES of Tennessee. Will the gentleman please tell us why you have had all these assistant attorneys, and why do you brush them away?

Mr. BENNET of New York. Because that was all we could get. The Committee on Appropriations gave us assistants to the assistant attorneys, and we took them.

The Clerk read as follows:

Payment to William Black: For payment of fee to William Black, informer against John Huggins, under the alien contract-labor law, being one-half of the penalty imposed and collected in Black's own case, $500.

Mr. COX of Indiana. I want to reserve a point of order against that paragraph, for the purpose of getting some information. I want to ask whether there is any general statute in force in the United States which authorizes a refund of a part of a penalty collected.

Mr. TAWNEY. The gentleman from New York [Mr. BENNET] is familiar with this provision. This grows out of the bill that has passed both Houses and is in conference now. The matter was framed up by certain members of the Committee on Appropriations and the gentleman from New York [Mr. BENNET] in my absence, and I am not familiar with the provisions.

Mr. BENNET of New York. Will the gentleman repeat his question?

Mr. COX of Indiana. I want some information on the paragraph between lines 11 and 22 on page 101. My question was whether there was any statute in force now which authorizes a refund of a part of a fine imposed under this law, particularly relating to the William Black case.

Mr. TAWNEY. I do not know whether I exactly understand the gentleman. I understood the gentleman was asking about the paragraph just read.

Mr. COX of Indiana. The one with reference to William Black.

Mr. TAWNEY. I thought it was the other paragraph.

Mr. COX of Indiana. The other relates to the same thing. What I want to know is whether there is any law in force that authorizes the payment of this appropriation?

Mr. TAWNEY. No law that authorizes the refunding of the money. This amount was erroneously collected by the agent of the Government from this steamship company.

Mr. MACON. But the gentleman from Indiana is talking about the item with reference to the William Black case.

Mr. COX of Indiana. Yes; that is the one I reserve the point of order to.

Mr. MANN. The law provides for the payment of one-half of the fine. The money has been paid into the Treasury, and there is no way of getting it out without an appropriation.

Mr. TAWNEY. This payment was made by William Black, who was an informer against one charged with having violated the alien contract-labor law.

Mr. COX of Indiana. William Black?

Mr. TAWNEY. Yes; and in consideration of the information which he gave, which information led to the conviction of the real parties guilty of the violation of the contract-labor law, one-half of his fine was remitted. That is the rule in the Department of Commerce and Labor.

Mr. COX of Indiana. If I understand the chairman of the committee correctly, this man William Black was also fined for a violation of the alien contract-labor law.

Mr. TAWNEY. He was.

Mr. COX of Indiana. Fined $1,000?

Mr. TAWNEY. Yes.

Mr. COX of Indiana. Has that money been paid?

Mr. TAWNEY. Yes; and this is to refund one-half of it.

Mr. COX of Indiana. He has paid into the Treasury $1,000?

Mr. TAWNEY. That is what I understand.

Mr. COX of Indiana. And it is proposed to pay back one-half of that fine?

Mr. TAWNEY. Yes; in consideration of his having furnished the information to this Government whereby the other man was convicted. We have a similar statute in the Treasury Department, where the item is called payment of certain moieties. It is paid out by the officer of the Treasury Department for information furnished the department by individuals in regard to smuggling, which information is essential, and without which it would be impossible for the department to proceed with the prosecution in many cases. So it is essential, especially, as I am informed, in enforcement of the alien contract-labor law.

Mr. COX of Indiana. And the same explanation applies to the next item?

Mr. TAWNEY. Yes.

Mr. SULZER. I understand these fines have been paid into the Treasury, and the only way this man can get the money due him is by this appropriation?

Mr. TAWNEY. Yes.

Mr. COX of Indiana. I withdraw the point of order.

Mr. BARTLETT of Georgia. I would like to ask the chairman a question. This provision states that it is one-half of a fine in his own case. Under the law, is the informer entitled to one-half of the fine of the person that he informs against? I take it for granted that in the other case he was entitled to one-half of the penalty in that case. Now, you propose by this to give him also one-half of the fine in his own case?

Mr. SULZER. That is the way the bill reads.

Mr. TAWNEY. That is the fact. He pleaded guilty and then turned State's evidence, which enabled the Department of Justice successfully to prosecute others who are believed to be guilty of a violation of the law, and in consideration of that fact one-half of his fine is to be remitted.

Mr. BARTLETT of Georgia. Yes; but the question I ask the gentleman is whether under the law he would be entitled to one-half of the fine as informer in these other cases?

Mr. TAWNEY. There is no law governing these cases. There is a law governing the Treasury cases. That is a different statute entirely. This is absolutely a matter of faith, a matter of carrying out the good faith of the district attorney who wanted to obtain the information and induced the party to turn States evidence, which he did, and furnished the testimony that enabled the Government to secure a conviction in the other cases.

Mr. COX of Indiana. Will the gentleman yield? I think I can call his attention to a statute on the subject.

Mr. TAWNEY. If there is a statute, then I have been misinformed.

Mr. COX of Indiana. United States Statutes at Large, volume 25, page 576:

That the act approved February 26, 1885, entitled "An act to prohibit the importation and immigration of foreigners and aliens under contract or agreement to perform labor in the United States, its territories, and the District of Columbia" be, and the same is hereby, amended so as to authorize the Secretary of the Treasury to pay to an informer who furnishes original information that the law has been violated, such a share of the penalties recovered as he may deem reasonable and just, not exceeding 50 per cent, where it appears that the recovery was had in consequence of the information thus furnished.

Mr. TAWNEY. Well, there were no penalties recovered in this case. This man paid his own fine.

Mr. BARTLETT of Georgia. In other words, he informed against people and did not convict them, and he was the only person convicted.

Mr. TAWNEY. No.

Mr. FITZGERALD. My recollection is that in the four cases a fine of $1,000 each was made and $4,000 collected.

Mr. COX of Indiana. Black informed against Huggins.

Mr. FITZGERALD. Huggins. He is the person in one of the prosecutions whose employment was in violation of law.

Mr. COX of Indiana. And the Government could not convict Huggins without Black's testimony.

Mr. FITZGERALD. And the Government collected $4,000 in fines.

Mr. SULZER. Can the gentleman tell us from what country this man came?

Mr. FITZGERALD. No.

Mr. SULZER. Well, he has been sent back, has he not?

Mr. FITZGERALD. I do not know.

Mr. SULZER. And the chances are he will never get a dollar of this money.

Mr. TAWNEY. Mr. Chairman, I will read the testimony of Mr. Soleau:

Mr. SOLEAU. We needed information in addition to what they had to secure a conviction, according to the United States attorney. This man turned states evidence, and by his doing so we secured the conviction which resulted in collecting $4,000, which is now in the Treasury.

Mr. SMITH. Was Black himself fined?

Mr. SOLEAU. He turned states evidence, but they fined him just the same.

Mr. SMITH. They fined him $1,000?

Mr. SOLEAU. Yes, sir. There were four who were fined $1,000 each, and we want to give Black half of his fine by reason of his testimony.

Mr. SMITH. The fines have been paid in full?

Mr. SOLEAU. Every dollar has been covered into the Treasury. There is a practice, based on an act of Congress, which provides that informant may be given something for informing, but we have no appropriation for that purpose.

Mr. CAMPBELL. May I ask the gentleman a question? In what State did this prosecution take place?

Mr. TAWNEY. I do not know.

Mr. CAMPBELL. Was there any information brought to the attention of the committee, if it was in a State that protects contract labor?

Mr. TAWNEY. I will recall the answer that I made just now, and say that the prosecution was in the southern district of the State of New York.

Mr. CAMPBELL. Now, if this prosecution had been in a State that permits contract labor, what would have been the attitude of the authorities of the United States?

Mr. TAWNEY. They would have had to enforce the United States law.

Mr. BONYNGE. But there is no State that admits contract labor. This is a federal statute that prohibits contract labor.

Mr. CAMPBELL. Oh, there are States that do permit contract labor.

Mr. BONYNGE. They can not enforce contract labor in the United States because a federal statute prohibits it.

Mr. CAMPBELL. I am now talking about state laws. I understand this is a federal statute. The prosecution of this case occurred——

Mr. TAWNEY. On account of the violation of the federal law.

Mr. CAMPBELL. Whether it occurred in the jurisdiction where the laborers had been imported under a state law that permitted contract labor to be brought in.

Mr. HUGHES of New Jersey. There is no such state law.

Mr. CAMPBELL. Virginia permits their being brought in.

Mr. NORRIS. That would not relieve them from the operation of the federal law.

Mr. CAMPBELL. I understand that. I was simply laying foundation to ask whether or not the question had been raised.

Mr. SULZER. The most important part in this matter is whether this man Black has been sent back to the place from which he came, and if he has gone back there, whether he will ever get a cent of this money if it is appropriated.

Mr. KEIFER. He never will get it until it is appropriated.

The CHAIRMAN. Does the gentleman withdraw the point of order?

Mr. COX of Indiana. Mr. Chairman, I withdraw the point of order.

The Clerk read as follows:

Payment to Thomas Windridge and others: To pay to Thomas Windridge, James Greenwood, William Cameron, and Robert Jones, for information furnished that led to the conviction of the Allis-Chalmers Company for importing aliens under contract from England in violation of the immigration laws, for which a fine of $4,000 was imposed and collected, $500 each, $2,000.

Mr. FINLEY. Mr. Chairman, I reserve the point of order on this paragraph. I would like to ask what is the necessity of bringing this claim here in this manner?

Mr. TAWNEY. Simply because the Department of Commerce and Labor have no appropriation out of which to pay the amount that is due under the statute for information obtained under which convictions are secured.

Mr. FINLEY. But allowances like this ought to be paid out of receipts from the immigration fund.

Mr. TAWNEY. Paid out of what fund?

Mr. FINLEY. Receipts from the immigration fund.

Mr. TAWNEY. They can not.

Mr. FINLEY. This is not an expense incurred in the administration of the law?

Mr. TAWNEY. This is an expense incurred in the administration of the alien contract-labor law.

Mr. FINLEY. And has no relation, then, to fees received from immigrants coming into this country?

Mr. TAWNEY. It is not material whether they should be paid out of that fund or not, as there is no money in that fund.

Mr. FINLEY. What has become of that fund?

Mr. TAWNEY. It is exhausted. In order to save time, I will refer the gentleman to the very voluminous statement as to the expenditures that have been made out of this fund, and I would refer him to the hearings, where he will get much more accurate and better information. I will say to the gentleman it is due to the action of Congress in authorizing expenditures for this service out of this fund, like the construction of an immigration station at a cost of a quarter of a million dollars in Philadelphia and another one somewhere else, and then the enforcement of the naturalization laws—all of that comes out of that fund; then the legislative immigration commission, that have expended in the neighborhood of $300,000, I think, until to-day the fund is not only exhausted, but we have under consideration a deficiency estimate of $500,000 to meet the expenses of the administration of the immigration laws during the remainder of this fiscal year.

Mr. FINLEY. One other question. This is an ordinary claim against the Government, is it not?

Mr. TAWNEY. No; it is not.

Mr. FINLEY. Well, in what respect does it differ from such a claim?

Mr. TAWNEY. It is a statutory obligation.

Mr. FINLEY. Are not many bills to cover claims of this character introduced here and referred to the Committee on Claims?

Mr. TAWNEY. Well, this will not be referred to the Committee on Claims, because it is an ascertained amount, and the liability of the Government is a statutory liability, and the only reason they are here is the department has no appropriation from which the obligation could be paid.

Mr. FINLEY. I understand the gentleman that heretofore there has been an appropriation out of which the department could pay such claims.

Mr. TAWNEY. No; we make specific appropriations in each case.

Mr. FINLEY. I withdraw the point of order.

The Clerk read as follows:

Bureau of Standards: Toward procuring a testing machine, to cost not exceeding $150,000, and for services in connection therewith, for the determination by the Bureau of Standards of physical constants and the properties of materials as authorized by law, $50,000, to be immediately available.

Mr. PERKINS. Mr. Chairman, I reserve the point of order so as to get information in regard to this $150,000 testing machine.

Mr. TAWNEY. Mr. Chairman, Congress at the last session directed that the so-called "Emery testing machine," which was established many years ago at the Watertown Arsenal, Mass., should be transferred from the Watertown Arsenal, in that State, to the Bureau of Standards. In making the transfer, however, it was omitted to provide for the transfer of the appropriation for the operation of the machine which had been made at Watertown.

Owing to that fact and the fact that there was no appropriation for the operation of the machine here, by agreement between the two departments the machine remained at Watertown, or was allowed to remain there until this session of Congress, but at this session of Congress information or testimony was had by the head of the Bureau of Ordnace in the War Department as to the necessity of retaining a testing machine at the Watertown Arsenal. The chief of that bureau, knowing that the law directed that this machine be removed from Watertown to the Bureau of Standards, submitted an estimate of $125,000 for a new testing machine at the Watertown Arsenal.

Mr. PERKINS. What is this testing machine—what is its exact work?

Mr. TAWNEY. If the gentleman will let me finish my statement——

Mr. PERKINS. Certainly.

Mr. TAWNEY. Which explains why this is here, and rather than go to the expense of bringing that machine down here and providing for the construction of a new machine up there we concluded the best plan would be to provide for a new machine here, and provide for a machine of a little larger capacity than the Emery machine, and also provide for a machine which would be a compression machine as well as a tension machine.

This machine at the Watertown Arsenal, as well as the machine authorized here, is a machine that tests the tensile strength of metals of all kinds.

Mr. MANN. Not only metals, but everything.

Mr. TAWNEY. Testing the tensile strength of metals and all materials of that kind. And the machine is so finely constructed that it will accurately measure the tensile strength of a horse hair, or a shaft 6 inches thick, or 10 or 20 feet long, or as long as the machine itself. This machine is not the combined machine. It merely tests the tensile strength. The machine authorized here will be a combined machine, combining the tensile test and also the testing of compression strength. The capacity will be 1,000,000 pounds tensile and 2,000,000 compression strength.

Mr. PERKINS. This machine costs $125,000?

Mr. TAWNEY. One hundred and fifty thousand dollars.

Mr. PERKINS. Is this work of testing done on material belonging to the Government, or is it done on material that is furnished by private parties?

Mr. TAWNEY. The cost of the testing heretofore done on this machine at the Watertown Arsenal, outside of the government service, was charged to the individual that had the testing done, and it is intended to do the same with the testing of material outside here at the Bureau of Standards. As the

Bureau of Standards is now doing on all outside of scientific work, it is charging the cost of that work to the person for whom the work is done.

Mr. PERKINS. And that goes into the General Treasury?

Mr. TAWNEY. That goes to the credit of the general fund in the Treasury of the United States.

Mr. AMES. I would like to ask the gentleman a question.

Mr. TAWNEY. Certainly.

Mr. AMES. Where is it proposed to reinstall this Watertown machine?

Mr. TAWNEY. At the Bureau of Standards in the city of Washington.

Mr. AMES. Has not the Bureau of Standards four machines for testing purposes and now constructing a fifth?

Mr. TAWNEY. They have a number of machines for testing, but they have no machine that meets the requirements of their service in respect to the testing of large members of various kinds of construction.

Mr. AMES. Well, does the gentleman think, or has it been claimed, that this machine of 2,000,000 pounds capacity would test a chord of a large structure?

Mr. TAWNEY. It is estimated that it will. I concede, Mr. Chairman, and will say to the gentleman from Massachusetts [Mr. AMES] that recently there has begun an agitation among the engineers of this country in favor of a 10,000,000-pound *testing* machine and also compression machine. Now, some day undoubtedly this agitation will succeed. The Government will doubtless embark upon the enterprise of authorizing the construction of a machine of that capacity.

For myself, I do not think we have reached the point yet where the Government needs a testing machine of that capacity. But this machine I do believe is necessary, for the reason that there is greater activity in scientific investigative tests all over the country, not only by the Government, but by individual manufacturing establishments. Now, in order to meet the requirements of the engineering world, we ought to have a testing machine, not only one that will test the tensile strength of structural material, but also of compression strength, of a larger strength, of a larger capacity than the one at Watertown.

Mr. AMES. I understand that the Watertown machine tests both tensile and compression strength. I have worked at it, and I know. You are also constructing at present a 10,000,000-pound machine?

Mr. TAWNEY. That is exclusively a hydraulic compression machine, which was never authorized by law.

Mr. AMES. You have one now in Washington that will test up to 600,000 pounds compression or tension. Would you think we ought to erect this 150,000-pound machine?

Mr. TAWNEY. Where is the one with 600,000 pounds?

Mr. AMES. In Washington.

Mr. TAWNEY. Under what bureau?

Mr. AMES. The Bureau of Standards. I will refer to the hearings on the sundry civil appropriation bill. Director Smith says there are four machines—one of 200, one of 600,000, one a 10,000,000-pound machine—under construction, and so forth.

Mr. TAWNEY. The gentleman is talking about the Geological Survey.

Mr. AMES. There is no 600,000-pound testing machine in Washington?

Mr. TAWNEY. That is in the Geological Survey.

Mr. AMES. I asked if the Bureau of Standards had not some. I thought they had them here.

Mr. TAWNEY. I mean they have small machines for testing instruments and that sort of thing.

Mr. AMES. The Government has a 600,000-pound machine.

Mr. MANN. At Watertown.

Mr. TAWNEY. The Government has an 800,000-pound machine at Watertown.

Mr. SLAYDEN. Mr. Chairman, I would like to ask the gentleman from Minnesota a question.

Mr. TAWNEY. Just one moment; I want to say in reference to this, that we were informed by the Chief of the Bureau of Ordnance that whether the estimate was allowed for the construction of this machine or not, it would be built out of some other appropriation. So we concluded to appropriate for it rather than have the old machine down here.

Mr. BUTLER. Is there not some other way to compel him to build it than build it out of some other appropriation?

Mr. AMES. Mr. Chairman, I want to ask the gentleman this——

The CHAIRMAN. The gentleman has yielded to the gentleman from Texas.

Mr. SLAYDEN. Mr. Chairman, I would like to ask the gentleman, as I did not have the good fortune to hear all of his statement, having been called out, whether he has anywhere stated to the committee whether the Bureau of Standards has in any way made good its original claim that if it were founded and equipped it would have earnings sufficient if not to meet all, practically all, of its expenses? I observed that they have buildings and equipments of more than $880,000, and they are calling on Congress to buy a lot more land on which I presume they are to erect additional expensive buildings. I would like to know something about that.

Mr. TAWNEY. My recollection is the earnings of the Bureau of Standards for the fiscal year 1908 were in the neighborhood of $24,000. Of course, the gentleman from Texas must bear in mind that the work of the Bureau of Standards has been progressive. That is, they started in on a very small scale, and the demand for their work is greater than they have been able to meet, because of the restrictions under which they operate.

The Bureau of Standards is the only scientific bureau of the Government that is not operating under a lump-sum appropriation. The Bureau of Standards must submit detailed personal, incidental, and other expenses in their estimates, while the other scientific bureaus have lump-sum appropriations, and, of course, are able to advance more rapidly, especially when they do their work for nothing for the public.

Mr. SLAYDEN. I would like to ask the gentleman if he really believes that these large and increasing appropriations for the Bureau of Standards are of real practical benefit or really justified?

Mr. TAWNEY. I do. I believe that the Bureau of Standards, of all the scientific bureaus of the Government, is the best; and it is no pet of mine at all, because when I first commenced work on the Committee on Appropriations I confess that I was more or less prejudiced against the bureau, but after a careful investigation and study of the work of that bureau I regard it as the most valuable of all the scientific bureaus in connection with our Government.

It was my hope at the last session of Congress, when we authorized or requested the Academy of Sciences to investigate all of this scientific work on the part of the Government and to make a report with a view to consolidating in some one bureau all that work that could be consolidated, that we would have at this session of Congress a report from that eminent scientific organization that would enable us to legislate upon the subject. I regret exceedingly the report does not give us any information or any data upon which we can formulate legislation for the consolidation of this work.

Mr. SLAYDEN. Mr. Chairman, I want to say that I have great respect for the judgment and sincerity of the chairman of the committee, and really I ordinarily accept his statement about these matters, and I do in this case; but I have not been able to comprehend the necessity of these extraordinary expenditures for the Bureau of Standards. There are other appropriations made for scientific branches of the Government that come nearer to me, the work of which and the meaning of which I comprehend, one of which my friend from Minnesota has vigorously assailed from year to year. I have seen the good influence and good effect of that work, and I hope that he will go as far in extending the work done for the examination and testing of fuels as he has in the examination and testing of the tensile strength of structural material examined in the Bureau of Standards.

Mr. AMES. I should like to ask a question.

Mr. TAWNEY. I yield to the gentleman from Massachusetts.

Mr. AMES. Is it not a fact that the Quebec bridge failed, not through any want of care or fault of design or construction, according to the standards and customs of bridge builders, but because they never had an opportunity of testing a built-up chord? Now, you have an 800,000-pound machine here. Why start in and waste $150,000 on a 2,000,000-pound machine when that is not anywhere near large enough to test a full-grown chord? Why not let this $150,000 machine go by, and let us wait until Congress can afford to build a machine large enough to test a full built-up chord, a ten or fifteen million pound machine? Having an 800,000-pound machine, you can get all the tests, practically, that you could have with a 2,000,000-pound machine by reducing the size of the prisms tested, but you could not possibly reduce the size of a built-up chord for the purpose of testing a full-grown chord.

Mr. TAWNEY. Mr. Chairman, I realize the disadvantage under which a blacksmith labors when he undertakes to answer questions propounded by a skilled and educated engineer. That is my embarrassment at the present time. I know, of course, that there is no machine in existence to-day of sufficient capacity to test the members of the bridge referred to by the gentleman, which was destroyed at Quebec, and resulted in great loss of life, as I understand; but I do not know that the time

will ever come when it will become necessary to test the members of structures of similar size to those that were used in the construction of that bridge. I believe that a 2,000,000-pound testing machine will come nearer meeting the practical demands of the engineering world to-day than we are now able to meet those demands. For that reason I think we ought not to go any further than is necessary for that purpose. It may be necessary later on to build a larger machine.

I do not say that it will not be; I may be in error, but in that case I submit that if we have a 10,000,000-pound testing machine, the cost of its operation and maintenance for tests which could be made by a 2,000,000-pound machine would be so much greater that there would be economy in having a 2,000,000-pound testing machine, even if we have the 10,000,000-pound machine also.

Mr. AMES. I understand that your 10,000,000-pound testing machine under construction would cost some $32,000.

Mr. TAWNEY. No; I am talking about the new machine, the Emery machine, which the engineering world to-day is so much interested in.

Mr. AMES. I understand this new machine you are building at a cost of $32,000, to test up to 10,000,000 pounds compression, would not have even one-quarter of the necessary capacity to have tested one of the chords of the Quebec bridge.

Mr. TAWNEY. I do not think you could test that at all.

Mr. AMES. I say, it would not be a quarter enough. So you see a 2,000,000-pound machine would not carry you any nearer than an 800,000-pound machine.

Mr. TAWNEY. Could you test the chords of the Quebec bridge at all in a compression machine?

Mr. AMES. Oh, yes; indeed.

Mr. TAWNEY. I did not know you could test the tensile strength in that way.

Mr. DOUGLAS. Will the gentleman allow me to ask him a very simple, unscientific question?

Mr. TAWNEY. Yes; but if the gentleman has any scientific question to ask, I refer him to the distinguished engineer from Massachusetts instead of "the gentleman from Minnesota."

Mr. DOUGLAS. What is the objection to bringing back to Washington the Watertown machine and putting it in the Bureau of Standards, where it was?

Mr. TAWNEY. The gentleman is mistaken.

Mr. DOUGLAS. In what respect?

Mr. TAWNEY. The testing machine at Watertown has never been here.

Mr. DOUGLAS. I thought you said a minute ago——

Mr. TAWNEY. We authorized it to be brought here, but neglected to transfer the appropriation as well as to authorize the transfer of the machine. So by agreement between the two departments the machine remained in Watertown; but under the expectation that the machine was going to be taken away the Bureau of Ordnance in the War Department estimated for a new machine. So we have concluded, instead of bringing the old machine down, to leave that there and authorize the construction of a new machine.

Mr. GAINES of Tennessee. Mr. Chairman, I move to strike out the last word.

Mr. MONDELL. One moment, Mr. Chairman. I understand the gentleman to say that the law provides for the removal of this machine from the Watervliet Arsenal.

Mr. TAWNEY. The provision for the repeal of that law has been agreed to in the legislative appropriation bill by both Houses, and that part of the agreement has been adopted by both Houses.

Mr. GAINES of Tennessee. Mr. Chairman, I see from the hearings that we have appropriated in all $887,000 for this Bureau of Standards. Now, I have rather kept track of this Bureau of Standards and tried to keep it from getting so much money and growing so fast, because I did not see any need of it.

Now, what does Doctor Stratton say about these machines on page 918 of the hearings? He says:

> The CHAIRMAN. Is the erection and operation of a testing machine, especially for mechanical testing, necessary to complete the equipment of the Bureau of Standards in order to fully carry on the functions of that bureau as now authorized by law?
>
> Mr. STRATTON. Yes, sir. The bureau purchased a 100,000-pound testing machine the first year; it was located in the new buildings. It contemplated the addition of a two or three hundred thousand pound testing machine this next year and one of about 1,000,000 pounds capacity as soon as possible. The bureau has a number of other testing machines besides those for tension and compression.

Now, there are three testing machines, one of 100,000 pounds, one of 300,000 pounds, and one of about 1,000,000 pounds. I want to ask, first, why do you want the machines at all, and second, why do you want them so rapidly, and why do you want them so much larger than was thought necessary a while ago?

Mr. TAWNEY. I should be glad to gratify the gentleman from Tennessee, but I know that he was in his seat when I went over this whole matter, and if I failed to make it clear why it was necessary to authorize the construction of these machines, I can not now add anything to it or make it any clearer.

Mr. GAINES of Tennessee. The gentleman did not cover this point—why was the hundred-thousand machine procured at first, and then one of three hundred thousand, and now he says a million-pound machine is contemplated.

Mr. TAWNEY. What is the gentleman reading from?

Mr. GAINES of Tennessee. I am reading from Doctor Stratton's testimony, on page 918 of the hearings.

Mr. MANN. Will the gentleman from Tennessee yield for a question?

Mr. GAINES of Tennessee. Yes.

Mr. MANN. I hope the gentleman will take it all in good part. The gentleman and I have disputed over the Bureau of Standards, I think, every time the sundry civil bill has come up for consideration for a number of years.

Mr. GAINES of Tennessee. How old is the Bureau of Standards?

Mr. MANN. It was transferred from the Treasury Department, where it had just been organized, into the Department of Commerce and Labor, when the bill passed five or six years ago. Every time I have asked the gentleman from Tennessee if he would not confer a favor upon himself and his country by going out and visiting the Bureau of Standards and its work. Now, I want to ask the gentleman if he has ever done so?

Mr. GAINES of Tennessee. I say frankly to the gentleman that I have not.

Mr. MANN. Then I do not think the gentleman ought to criticise the bureau.

Mr. GAINES of Tennessee. I am not criticising the bureau. I am asking why, in these things, they jump from a hundred-thousand-pound machine to a million-pound machine?

Mr. MANN. It is not difficult to inform the gentleman.

Mr. GAINES of Tennessee. Not if you answer my question.

Mr. TAWNEY. The difference between the capacity of the two machines ought to be sufficient information for the gentleman.

Mr. MANN. The Bureau of Standards is doing very important work.

Mr. GAINES of Tennessee. What?

Mr. MANN. All kinds of standardizing work.

Mr. GAINES of Tennessee. For whom?

Mr. MANN. For the Government. It makes standards, and anybody gets the standard.

Mr. GAINES of Tennessee. Is the Government in the business?

Mr. MANN. Standardizing work, such as making electrical standards.

Mr. GAINES of Tennessee. For whom?

Mr. MANN. For the world.

Mr. GAINES of Tennessee. Oh, we are running this concern for private individuals?

Mr. MANN. Not at all. The gentleman does not understand. It is not the standard of the thing itself; it is not a test of the thing itself. Occasionally they do test the actual thing for which people pay, but it is like the structural test, the coal test.

Mr. GAINES of Tennessee. I am trying to get at the right of this thing.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. GAINES of Tennessee. I ask for three minutes more.

The CHAIRMAN. The gentleman asks unanimous consent to proceed for two minutes. Is their objection?

There was no objection.

Mr. GAINES of Tennessee. Mr. Chairman, will the gentleman tell me if it has been doing any work for the United States Steel Corporation?

Mr. MANN. It does not do work for any corporation as a corporation.

Mr. GAINES of Tennessee. Has it done any at all for that corporation?

Mr. MANN. I could not answer that question.

Mr. TAWNEY. I will answer the question, and say that it has.

Mr. GAINES of Tennessee. For the United States Steel Corporation?

Mr. TAWNEY. Yes; and the United States Steel Corporation paid them for it.

Mr. GAINES of Tennessee. What is it?

Mr. TAWNEY. It is the test of instruments they are using, the standardizing of instruments.

Mr. GAINES of Tennessee. Is it possible that that great concern comes down here and keeps alive a government manufactory?

Mr. MANN. Permit me to say to the gentleman that when instruments are tested in this bureau, if they were not tested here they probably would have to be sent to Germany.

Mr. GAINES of Tennessee. I would say to my friend that I do not——

Mr. MANN. I wish the gentleman would accompany me out to the Bureau of Standards. It will teach him——

Mr. GAINES of Tennessee. I would go most anywhere with the gentleman.

Mr. MANN. It will teach him more in reference to this question than talk in the House could teach him in forty months. It is one of the most interesting developments of the Government.

The Clerk read as follows:

PUBLIC BUILDINGS.

Building for Geological Survey and other offices: Toward the construction, on square 143, in the city of Washington, belonging to the United States, of a fireproof building, of modern office type of architecture, which building, including vaults, heating and ventilating apparatus, elevators, and approaches complete, shall cost not exceeding $2,500,000, and shall be designed and constructed of sufficient area and capacity to occupy all of said square as a building site, and to afford, when completed, office accommodation for the entire organization at Washington of the office of the Geological Survey, Indian Office, office of the Reclamation Service, and General Land Office, $100,000; the said building shall be constructed under the direction of the Superintendent of the Capitol Building and Grounds, subject to the control and supervision of the Secretary of the Interior.

Mr. MANN. Mr. Chairman, on that I reserve the point of order.

Mr. TAWNEY. Mr. Chairman, the point of order, if made, undoubtedly would have to be sustained. The reason for this provision is this: The Geological Survey has been occupying rented quarters for many years, and for four years to my knowledge the attention of the Committee on Appropriations, and I think the attention of the Committee on Public Buildings and Grounds, has been brought to the necessity of providing more commodious, suitable, and safe accommodations; in fact, a safe building for the Geological Survey. The Government is also paying out a great deal of money for the rent of buildings occupied by other bureaus of the Interior Department, and it was thought, in view of the recent fire in the building occupied by the Geological Survey, which resulted in the destruction of about $18,000 worth of government property, and in view of the danger that the value of property belonging to the Government in the office of the building occupied by the Geological Survey may be destroyed, we ought to commence at least looking to securing some suitable and safer accommodations and quarters for that bureau.

Therefore we have authorized the construction of this building on a lot owned by the Government of the United States, bought and paid for a number of years ago, which is lying idle and is not utilized at all, and we have also provided for a building of a sufficient size and capacity to accommodate not only the Geological Survey, but the Land Office, the Indian Bureau, and the Reclamation Service.

Mr. MANN. Will the gentleman yield for a question?

Mr. TAWNEY. Yes.

Mr. MANN. What lot is this?

Mr. TAWNEY. This is a lot commonly known as the "Hall of Records." The lot was purchased some time ago, and is located west of the State, War, and Navy building. I think it is a couple of blocks west and a block south, if I am not mistaken.

Mr. MANN. Where is it from the Corcoran Art Gallery?

Mr. TAWNEY. North and west.

Mr. SLAYDEN. How far from the Corcoran Art Gallery?

Mr. TAWNEY. Within a block or two. I have never seen it but once, but it is in the vicinity of the Corcoran Art Gallery.

Mr. NORRIS. I think I can tell the gentleman how the lot is bounded.

Mr. MANN. That would not convey any information to me to know how it is bounded.

Mr. NORRIS. It is between Eighteenth and Nineteenth streets and E and F. That block would corner so that it would make the location on the southwest of the lot—that is, directly west of the State, War, and Navy building—the block that is directly west of that building and which is just diagonally across the street from what is known as the "White Lot."

Mr. MANN. That is, it is south of that block and one block beyond?

Mr. NORRIS. Yes. It is in the vicinity of the Octagon House. It is directly across the street, as I remember the location.

Mr. MANN. Why has not this block been used for the construction of a hall of record?

Mr. BARTHOLDT. Because we have not made an appropriation for it.

Mr. TAWNEY. Well, there is no authorization for the construction of a hall of record.

Mr. MANN. The gentleman will remember, I think, that there never has been for any public building in Washington such a campaign of education carried on as there was to secure a hall of records. Up and down, all around, it was represented to be that the Government could not continue in existence if we did not have a hall of records.

Everything was going to fall to pieces if we did not get a hall of records; statesmen, educators——

Mr. TAWNEY. And is it not a fact that agitation ceased almost immediately after we bought that block?

Mr. MANN. Yes. Now, the question with me is, whether there is any more occasion now for complying with the agitation for this department, merely because they had a fire up here and destroyed a few pieces of property, than there was for a hall of records.

Mr. TAWNEY. I think if the gentleman will take the trouble to inquire into the present crowded condition of the Geological Survey he will find we had, at the last session of Congress, to authorize the rent of another building outside in order to accommodate them.

Mr. MANN. That is to put the records in. We have got more buildings employed in Washington to put records that would be and ought to be in a hall of records——

Mr. TAWNEY. If I had had my way three years ago the Committee on Appropriations would have reported an appropriation for a hall of records, but we could not utilize that lot in that way, so I concluded in view of the urgent necessity for a building for the Geological Survey that it would be best to utilize it in this way.

Mr. MANN. Does the gentleman seriously believe, and say, if this item should go in when enacted into law it would provide for this building on this site?

Mr. TAWNEY. I do. If it does not go in on this site there will be no more money appropriated.

Mr. MANN. That is not in the power of the gentleman. The moment it stays in the bill and it goes to the Senate this item will not provide for a building on this site. It goes to conference, and the gentleman can not refuse to report the bill back to the House, and the House then becomes subject to the pressure of everybody in this city to put this building on some other site and not put it on this site.

Mr. TAWNEY. I will say to the gentleman that the people who are interested in building this building for the Geological Survey do not make any objection to the site at all.

Mr. MANN. But the architects who run the town, the newspapers who contribute toward it, are all opposed to locating this building on this site. It interferes with the plans, and I am not satisfied that it would remain on this site if appropriated for.

Mr. MONDELL. May I ask the gentleman a question?

Mr. TAWNEY. Certainly.

Mr. MONDELL. Does the gentleman consider this an appropriate site for a public building for these important bureaus of the Government which must be very frequently visited by every Member of Congress?

Mr. TAWNEY. I do; and I will tell the gentleman why. This is purely a workshop; it is intended to be an office building, not a building of ornate architecture or of artistic design necessarily, but it is to be an office building where the occupants of the building will have an opportunity to get all the light necessary.

We want to get the people where they can have a building with plenty of light, with windows in the building, so as to secure plenty of light for the work that they must do in that building. It is not intended to be an ornament or a monument, I should say, to the city of Washington, but an office building—a workshop—and for that reason it can be built for much less than it would be otherwise.

Mr. GAINES of Tennessee. How much rent are we paying now for this Geological Survey?

Mr. TAWNEY. I can not tell at the moment.

Mr. NORRIS. This will save about $51,000, by having in one building all the different bureaus which are contemplated to go in there.

Mr. HAUGEN. Sixty-seven thousand dollars, altogether.

Mr. BARTHOLDT. Mr. Chairman, I am not particularly interested as to where this building is to be located, but I am interested to locate it on government ground no matter where it be. The Government owns sufficient ground in this city to locate nearly all the new buildings that might be needed within

the next four or five years; hence I would object to the purchase of any ground for any one of those public buildings that we are to erect in the near future, and I hope the gentleman from Illinois will not insist upon his point of order. This matter is important. It has been called to the attention of the Committee on Public Buildings and Grounds, and that committee, owing to the demands from the country for public buildings, was unable to take this matter under consideration.

We waive our rights in this matter and are perfectly willing, owing to the necessities of the case, that the Committee on Appropriations should take care of this building. A fire in that building recently destroyed valuable maps and records and instruments. Such a fire in the fire trap in which it is located now might occur at any moment and any day, and millions and millions of damage might be done to the Government by Congress refusing in time to provide for a fireproof building for that important bureau.

However, there is one section in this paragraph regarding which I would like to ask the chairman of the committee a question. It provides that the Superintendent of the Capitol Building and Grounds shall prepare plans for this building.

Mr. TAWNEY. No. To be constructed under his direction.

Mr. BARTHOLDT. I might as well say it now before the point of order is taken up and decided, that my idea about these matters is that we should somewhere in some department have an official with a sufficient force to prepare the plans for all the government buildings we are constructing. I should like to consolidate all that work into one particular bureau. We have no department of public works. I think we ought to have. The Treasury Department has been the department which has taken care of these matters, and I do not see why the Supervising Architect of the Treasury Department should not be charged with the execution of these plans.

Mr. TAWNEY. I will explain to the gentleman. There was no malice aforethought or anything of that kind that prompted the committee in putting this paragraph in the bill. The Supervising Architect is the executive officer of the so-called "Fine Arts Commission." Now, we have undertaken to locate this building on government land. We have also attempted to decide the character of architecture.

I assume that the Supervising Architect would be more or less under the influence of the commission, and I also believe that with the amount of work that he has on hand now, and with the success that Mr. Woods has achieved in the architecture and construction of these two buildings here, it could be done just as well by Mr. Woods under the direction of the Secretary of the Interior. We do not want to make this building for the Interior Department. The Superintendent of the Capitol Building and Grounds is an officer under the Secretary of the Interior, and we thought it would be better to leave the whole thing to the Interior Department.

Mr. BARTHOLDT. I yield to no man in my admiration for the Superintendent of the Capitol. I think he is one of the most efficient and competent officials of the Government. But I do not like to see two drafting rooms—two forces employed by this Government that are doing exactly the same work. I should like to see all that work done in one place and under the supervision of one officer. Whether it is the Superintendent of the Capitol or the Supervising Architect, I do not care. I am sure in each case the work would be done to the satisfaction of the House and of Congress.

Mr. MANN. I have not but a word to say. The gentleman from Missouri [Mr. BARTHOLDT] does not like this item, and I have a great deal of confidence in his opinion. It does not satisfy me the way it stands. There is no fair chance——

Mr. FITZGERALD. Will the gentleman yield?

Mr. MANN (continuing). Therefore, I make the point of order.

Mr. SULZER. I suggest that the gentleman withhold his point of order for a few minutes.

Mr. MANN. We have held the point of order now for twenty-five to thirty minutes, listening about something else.

Mr. SULZER. I ask for a little time.

The CHAIRMAN. Does the Chair understand the gentleman from Illinois [Mr. MANN] reserves the point of order?

Mr. MANN. I will withhold it for five minutes for the gentleman from New York.

The CHAIRMAN. The Chair will recognize the gentleman from New York [Mr. SULZER].

Mr. SULZER. Mr. Chairman, no point of order should be made against the provision in this bill for a new, adequate, and fireproof building for the Geological Survey. This is a matter of necessity. In my opinion there is no department of the Government doing so much to-day to develop the material resources of the country as the Geological Survey. I think we all appreciate the value of the work and the importance of preserving it in a fireproof building. The work of the Geological Survey is a monumental one, and we appropriate hundreds of thousands of dollars every year to prosecute it all over the land, and after the work is done and the data collected we allow it to be stored in an old fire-trap building here in Washington, liable to catch fire at any time, and if it burns down all of these valuable records will be destroyed. If they are destroyed, the loss would be incalculable. These maps and records and data never can be duplicated without the expenditure of millions and millions of dollars by the Government. A new building for the Geological Survey is absolutely necessary. It should be a modern, up-to-date fireproof building with all conveniences for this great and important work. Very recently there was a fire in this old building occupied at present by the Geological Survey and where it has been for a number of years, and over $18,000 worth of invaluable property was destroyed before the fire was put out.

Suppose that fire had occurred in the nighttime and had not been put out quickly. All of the building, with its contents, would have been consumed and the loss would have been a national and irreparable loss to all the people.

The constant danger of fire presents the most urgent ground for consideration of this proposition. An inventory of the public records and other property exposed to this danger at the present time aggregates over four and a half million dollars, with the following items:

Manuscript maps, reports, illustrations, notes, and records in process of preparation for publication	$1,514,000
Permanent records, including stream-gauging records, mine maps, and other data not replaceable	1,250,000
Library and catalogue	520,000
Maps in process of engraving	380,000
Engraved plates	634,000
Instruments and apparatus	157,000
Engraving and printing equipment and supplies	75,000
Publications—reports and maps	196,000
Miscellaneous office equipment	114,000
	4,840,000

This estimate is conservative and can not express the actual loss that the public would suffer, inasmuch as the second item includes many records, extending through a quarter of a century, which can not be replaced.

Scientists and engineers who have occasion to use the survey library or to examine the public records have freely expressed their appreciation of the danger to this property. A recent published statement is that of the city engineer of San Francisco:

> In examining many of the buildings in Washington occupied by the various departments, buildings in which are stored data and documents of almost incalculable value, I find that they are mainly structures which would not rank higher than San Francisco's third-class buildings. It is astonishing that the Government faces such risks. Note the Geological Survey. The floors in that building are of wood, so are the doors and file cases and furniture, and in that building are data many times the value of the structure. Now, a building of that kind is not safe. I would suggest for economy that the government buildings be put in better shape to resist possible fire.

The Engineering and Mining Journal of December 26 last, in an editorial, states:

> The Geological Survey on December 16 had a fire in its headquarters in Washington, whereby many maps, photographs, and other records of value were destroyed. About three years ago the Journal forecast that this would happen sooner or later, the building rented for the Geological Survey being a dangerous fire trap. We urged then that Congress should provide the Geological Survey with suitable headquarters.

The Engineering News of December 24 calls attention to the narrow escape of the "entire building, with priceless records, from complete destruction," and the Mining and Scientific Press offers "congratulations to the Geological Survey on escape from a great disaster."

To remedy this critical situation and to provide adequate quarters for not only the Geological Survey, but also the General Land Office, the Office of Indian Affairs, and the Reclamation Service—the bureaus of the Interior Department which have to do with the public lands—it is now recommended that there be erected a fireproof building with sufficient floor space for these four bureaus.

Mr. Chairman, I know of no more important work to be done to-day for the best interests of the people, and I sincerely trust my friend from Illinois [Mr. MANN] will not insist on the point of order. If he does, it will amount to little less than a national calamity in case of a fire. [Applause.]

The CHAIRMAN. The time of the gentleman from New York has expired. The point of order is sustained.

The Clerk read as follows:

> Repairs of buildings, Interior Department: For repairs of Interior Department and Pension buildings, and of the old Post-Office Department building, occupied by the Interior Department, including preservation and repair of steam-heating and electric-lighting plants and elevators, $20,000.

Mr. GAINES of Tennessee. I move to strike out the last word. Mr. Chairman, we have just lost a paragraph in this bill that I wish to have retained in it. Now, we are paying out by actual calculation $471,000 a year for rent of private buildings in which to do the public service in the District of Columbia.

Mr. SULZER. Mr. Chairman, I am glad the gentleman from Tennessee is making that point. I intended to make it, but did not have the time.

Mr. GAINES of Tennessee. I developed that a long while ago.

Mr. TAWNEY. Mr. Chairman, there is a great deal of this bill on which we have got to act to-night, and I must insist upon the rule that requires gentlemen to speak to the paragraph under consideration.

Mr. GAINES of Tennessee. I wanted to bring that matter home to the chairman. Now, we are paying $471,000 a year for private buildings for conducting the public business.

Mr. TAWNEY. I make the point of order that the gentleman is not addressing himself to the paragraph under consideration.

The CHAIRMAN. The Chair sustains the point of order. Without objection, the pro forma amendment will be considered as withdrawn.

The Clerk read as follows:

Improving the Capitol grounds: For the care and improvement of the grounds surrounding the Capitol and House of Representatives Office Building, pay of one clerk, mechanics, gardeners, for fertilizers, repairs to pavements, walks, and roadways, $27,500.

Mr. MANN. Mr. Chairman, on line 2, page 104, I move to strike out the words "of Representatives."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On line 2, page 104, strike out the words "of Representatives."

Mr. MANN. The reason for that is, by a joint resolution that was passed by Congress at the last session we adopted the technical name "House Office Building," and it is a much shorter title.

Mr. TAWNEY. You mean "of Representatives" should be stricken out?

Mr. MANN. Yes.

Mr. TAWNEY. That is right.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Lighting the Capitol and grounds: For lighting the Capitol and grounds about the same, including the House of Representatives Office Building, Botanic Garden, Senate and House stables, and engine house, Maltby Building, and folding and storage rooms of the Senate and House of Representatives; for gas and electric lighting; pay of superintendent of meters, at the rate of $1,600 per annum, who shall inspect all gas and electric meters of the Government in the District of Columbia without additional compensation, lamplighters, gas fitters, and for materials and labor for gas and electric lighting, and for general repairs, $78,500.

Mr. MANN. Mr. Chairman, I move to strike out, in line 8, the words "of Representatives."

The Clerk read as follows:

Line 8, strike out the words "of Representatives."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Contingent expenses of land offices: For clerk hire, rent, and other incidental expenses of the district land offices, including the exchange of typewriters, $295,000: *Provided*, That this appropriation shall be available for the payment of per diem, in lieu of subsistence, not exceeding $3 per day, of clerks detailed to examine the books and management of district land offices and to assist in the operation of said offices, and in the opening of new land offices and reservations, while on such duty, and for actual necessary traveling expenses of said clerks, including necessary sleeping-car fares: *Provided further*, That no expenses chargeable to the Government shall be incurred by registers and receivers in the conduct of local land offices except upon previous specific authorization by the Commissioner of the General Land Office.

Mr. MONDELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Strike out, of lines 9 and 10, the words "two hundred and ninety-five thousand" and insert in lieu thereof the words "three hundred and forty-five thousand."

Mr. MONDELL. Mr. Chairman, I trust that the chairman will accept this amendment. It increases the appropriation for contingent expenses of land offices by $50,000. It is not my thought to increase the general appropriation of the land service; and if this amendment is adopted I would at the proper time move, or would hope and expect the chairman of the committee would move, that out of the million dollars in the next page this amount should be taken.

Mr. TAWNEY. Let me suggest to the gentleman from Wyoming that a better and more satisfactory way would be for him to insert it somewhere in the paragraph commencing in line 4, page 106, that the sum of $50,000 to be expended for the purpose of this appropriation be taken out of that million dollars.

Mr. MONDELL. Mr. Chairman, I offered the amendment here because I was of the opinion that the committee would not care to have the appropriation under this item divided.

Mr. TAWNEY. The reason I make this suggestion is this: The $500,000, together with the $250,000 we appropriated the last session over and above the amount previously appropriated, is for the purpose of bringing up the work of the General Land Office so as to make the work current. Now, in connection with and as one of the necessary incidents of bringing the work up to date will be an increased number of hearings and increased expense on account of hearings, all of which should come out of this million dollars we now propose to appropriate to clean the work up.

Mr. MONDELL. Mr. Chairman, I have no objection to the amendment proposed by the chairman of the committee.

Mr. TAWNEY. Another advantage, I will say to the gentleman, if this is done, is this: Hereafter the appropriation that is usually carried for the expense of the hearings will remain the same, whereas if we increase it $50,000, we will never be able to get it out again when this work has been brought up current. My idea is if we take this out of the total expense to bring the work up current, when we get it up current we can go back to normal conditions again.

Mr. MONDELL. I should like to ask the chairman of the committee if he would have any objection to an amendment which would make the $750,000 appropriation which is to be used to bring the work current available for the purposes provided for in this section, and also in the section on page 107, for expenses of hearings in land entries?

I desire to remind the gentleman that the Secretary of the Interior suggested in the hearings that this item under the head of "Expenses of hearings in land entries" might be provided for out of the lump appropriation.

Mr. TAWNEY. What do you estimate will be necessary for that?

Mr. MONDELL. I estimate that at the very least $50,000 will be needed for each of these purposes; they will probably need more.

Mr. TAWNEY. Will the increasing of these appropriations for that service advance or facilitate the work of cleaning up these land cases, in your judgment?

Mr. MONDELL. Mr. Chairman, it seems to me absolutely essential, if we are to clean up the land cases, that we shall grant the funds for cleaning them up. Now, the $750,000 of additional appropriation is simply for investigation. The final settlement of the land cases comes at the hearings. I do not desire to criticise the committee in regard to this matter, because the importance of it does not seem to have been impressed upon them, yet there is no increase whatever in the appropriation for hearings, and if the cases are to be closed there must be many hearings.

Mr. TAWNEY. We gave the full amount estimated. So if there is any criticism, it is not on the committee.

Mr. MONDELL. I have no desire to criticise the committee, and I do not think it is subject to criticism in the matter. The Secretary, however, seems to have overlooked the fact that while there are only a thousand hearings now set, and he estimates $35 as the average cost of a hearing, there are 2,771 coal cases where final receipts have been issued, but patents withheld until there shall have been a hearing, at least in cases in which the special agent shall report adversely to the entryman. There are 3,697 coal cases where final proof has been made and final receipt withheld, and in a large number of such cases no final decision can be had except through a hearing.

[The time of Mr. MONDELL having expired, by unanimous consent it was extended five minutes.]

Mr. TAWNEY. I will say to the gentleman from Wyoming that the committee propose to accept the gentleman's amendment; so it will not be necessary for him to take the five minutes.

Mr. MONDELL. I will take the time of the committee for just a moment further, to indicate the necessity for this provision. An investigation by a special agent will bring out certain facts with regard to entries. The investigation will clear up many cases, because, in my opinion, in a great majority of the cases the report of the special agent will be favorable to the entrymen.

Mr. TAWNEY. The department puts it at 50 per cent.

Mr. MONDELL. My opinion is that in nearer 75 or 80 per cent of the cases the report of the special agent will clear the case up; but I am of the opinion there must be at least from 1,000 to 1,500 additional cases tried this year, besides those cases already set. With that doubling of the number of cases the cost of trying them must increase in the same proportion.

Mr. FINLEY. What is the cost of trying each case?

Mr. MONDELL. The Land Office estimates that the cost of a hearing to the department—that is, the additional cost entailed by a hearing—is about $35. The cost to the entryman is very much greater.

Mr. FINLEY. About how many cases are there?

Mr. MONDELL. There are a thousand cases set, but I have called the attention of the committee to the fact that there are 2,771 cases where the entryman has been challenged, but in which he has his final receipt; that there are 3,697 cases where the entryman has been challenged and no final receipt issued, and there must be hearings in a great many of those cases. If we are to clear up the cases, a part of this appropriation should be used for cost of hearings before the registers and receivers; there must be additional clerks and there will be other expenses to be met.

Now, I understand the chairman of the committee is willing to accept an amendment whereby $100,000 of the $1,000,000 carried on the next page may be used for the purposes contemplated in the item of contingent expenses of land offices and in the item of expenses of hearings in land cases.

Mr. TAWNEY. I have the amendment prepared, and when that paragraph is reached I will insert it. I want to say that the proposition of the gentleman from Wyoming is necessarily incident to facilitating the work for which we make an appropriation of $1,000,000. If these cases must be heard they will have to have the money with which to conduct the hearings, and the more money they have the more cases they can hear.

The CHAIRMAN. Does the gentleman from Wyoming insist on his amendment at this point?

Mr. MONDELL. No; I will withdraw the amendment in view of the fact that the chairman will offer an amendment that accomplishes the purpose I had in view in the amendment I offered, and another I had intended to offer to increase the sum available for hearings before registers and receivers.

The Clerk read as follows:

Depredations on public timber, protecting public lands, and settlement of claims for swamp land and swamp-land indemnity: To meet the expenses of protecting timber on the public lands, and for the more efficient execution of the law and rules relating to the cutting thereof; of protecting public lands from illegal and fraudulent entry or appropriation, and of adjusting claims for swamp lands, and indemnity for swamp lands, $1,000,000, to be immediately available, of which sum $750,000 is for the purpose of bringing up the work of the General Land Office hereunder so as to make the same current, and not exceeding $10,000 of this appropriation may be used for the payment, in the discretion of the Secretary of the Interior, of fees of witnesses and of the actual expenses of witnesses summoned before the state grand jury to indict persons guilty of violation of the law in connection with the execution of deeds covering lands allotted in Oklahoma to the Mexican Kickapoo Indians, or before state courts at the trial of persons so indicted: *Provided*, That agents and others employed under this appropriation shall be selected by the Secretary of the Interior and allowed per diem, subject to such rules and regulations as he may prescribe, in lieu of subsistence, at a rate not exceeding $3 per day each and actual necessary expenses for transportation, including necessary sleeping-car fares, except when agents are employed in the district of Alaska, they may be allowed not exceeding $6 per day each, in lieu of subsistence.

Mr. MANN. Mr. Chairman, I make a point of order to lines 24 and 25, page 106, on the words "selected by the Secretary of the Interior and," so that it will read "shall be allowed per diem."

Mr. FITZGERALD. What is the object of the gentleman from Illinois?

The CHAIRMAN. Will the gentleman from Illinois state his point of order?

Mr. MANN. The point of order is that this is pure legislation where it provides that the agents and others employed under this appropriation shall be selected by the Secretary of the Interior.

Mr. FITZGERALD. Does the gentleman from Illinois wish to discontinue the men in the employ of the department?

Mr. MANN. It would not discontinue the service. They are in the employ of the department. It is a matter for the Executive to determine how they shall be appointed. Under this the Executive does not have any discretion about it. I do not wish to argue the question; I will argue the point of order. I did not reserve the point of order, or offer to.

Mr. FITZGERALD. Does the gentleman object to giving the information?

Mr. MANN. I make the point of order.

Mr. TAWNEY. I do not know that there is anything that can be said on the point of order. I was hoping that the gentleman from Illinois would appreciate the necessity of carrying this language. It is not the language of the committee, but it is the language of the department under which the estimate was submitted, and the character of this service is such that I do not believe that the most efficient results——

Mr. MANN. If the gentleman from Minnesota asks me to reserve the point of order, I will do it.

Mr. TAWNEY. I will ask the gentleman to withdraw his point of order in the interest of the public service. He has always been good-natured enough to do that on every occasion when this provision was considered in previous sessions of Congress, and I was really depending on his good nature to do so now.

Mr. MANN. This is by unanimous consent. I would like to know whether I am asked to reserve the point of order? I want to know whether it is the wish of the committee to waste the time of the commitee?

Mr. TAWNEY. I will ask the gentleman to reserve the point of order.

Mr. MANN. I will reserve it.

Mr. FITZGERALD. Is the gentleman from Illinois going to insist on the point of order?

Mr. MANN. I am.

Mr. TAWNEY. The current law provides for the special agents that are appointed in the classified service, with two or three exceptions.

The CHAIRMAN. Does the Chair understand that the point of order is made or reserved?

Mr. MANN. At the request of the chairman in charge of the bill I reserve the point of order.

Mr. MONDELL. I trust that the gentleman from Illinois will not insist on the point of order if the effect would be to put these employees under the civil service in such a way that the Secretary would have no discretion. Does the gentleman understand that that would be the effect?

Mr. MANN. In the first place, striking out these words does not put them under the civil service unless the President so classifies them. In the second place, if it did and the Secretary of the Interior should ask the President to take them out of the classified service and the next President followed the precedent of the existing President, he would take them out at the request of the Secretary of the Interior.

I will say to the gentleman that I am opposed to compelling the executive department to appoint people to office in violation of the standing precepts they are preaching to Congress. When we have a bill one day vetoed by the President of the United States because it does not provide for the appointment of every clerk in the Census Office through the Civil Service Commission permitting the appointment after competitive examination, and the next day having a bill at the request of the department itself insisting that Congress shall require them to make appointments in violation of the spirit of the veto message, I stand here to protect the name of the President of the United States against this unjustifiable assault. [Laughter.]

Mr. FITZGERALD. If the gentleman will permit me, I wish to say that this matter was not called to the attention of the committee in the forceful way it has been by the gentleman from Illinois [Mr. MANN], and in keeping with the spirit that seems to animate him, if he does not insist on the point of order——

Mr. MANN. Oh, I shall insist upon it.

Mr. FITZGERALD (continuing). I shall be inclined to do so myself. [Laughter.]

The CHAIRMAN. The Chair wishes the committee to understand that discussions of this kind under a reserved point of order are by unanimous consent.

Mr. MONDELL. I ask unanimous consent that I may discuss the matter for three minutes?

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Chairman, since listening to the forceful remarks of the gentleman from Illinois, I do not know whether I desire him to make the point of order or not. The present practice under the language carried in this paragraph is to hold that the special agents are under civil service. However, the department makes a few exceptions in the case of the men who have special qualifications as timber men and mining experts. Now, I think the present practice an excellent one.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. MONDELL. I will be glad to.

Mr. MADDEN. Can he tell the committee how the department ascertains the special qualifications of these men if they do not give them an examination in the classified service?

Mr. MONDELL. They do give them a special examination.

Mr. MANN. I can tell the gentleman how to ascertain the special qualifications. They see somebody—where I could see now, if I were looking down this corridor—in the other end of the Capitol. [Laughter.]

Mr. MONDELL. Mr. Chairman, these appointments, as I understand it, are made from the classified service, and after examination. I recommended several gentlemen whom I thought were well qualified, and I was told they could not be appointed because they were not on the eligible list of the classi-

fied service. If I had my way about it, none of these new special agents would be under the classified service, because I believe we would have much better service if these men were appointed by the Secretary on account of their qualifications for the work, instead of being appointed after civil-service examination.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I make the point of order.

The CHAIRMAN (Mr. OLMSTED). The Chair understands that it is conceded that under the law these men are appointed from the classified service. This language to which the point of order is made provides for a different manner of selection. It changes existing law and the point of order is therefore sustained.

Mr. GAINES of Tennessee. Mr. Chairman, I move to strike out the last word. I hold the Attorney-General's report for 1907 in my hand and am reading under the head, "Prosecutions of land-fraud cases." He says:

The essential feature common to all of them is evasion of the several provisions of law limiting the amount of public lands to be acquired by any one individual or corporation and providing safeguards against the purchase of such lands, at the prices fixed by the Government, by persons and for purposes not authorized by law. The usual expedients adopted to evade these provisions have been fictitious entries made by persons employed and furnished with funds for that purpose by a person or corporation desirous of acquiring large tracts of land, these fraudulent entrymen conveying their titles, as soon as practicable with safety, to the real purchasers. All such transactions are necessarily fraudulent and involve numerous false oaths and either gross deception practiced upon public officials or the corrupt connivance of the latter. Nevertheless, in some localities they appear to have been practiced so long and with such impunity that their essential immorality, no less than their illegality, has been very generally lost sight of.

The department has caused the institution of a considerable number of criminal prosecutions in cases of this character, and has also brought many civil suits for the recovery of the lands thus fraudulently obtained. A number of tracts have been also reconveyed to the Government by those holding illegally acquired titles.

The department has received, in connection with these cases, many requests for indulgence to the parties concerned, founded upon the alleged ignorance of the latter that they were offending against the federal laws.

In Ellis *v.* United States (206 U. S., 246), decided May 13, 1907, the Supreme Court said: "If a man intentionally adopts certain conduct in certain circumstances known to him and the conduct is forbidden by the law, under those circumstances he intentionally breaks the law in the only sense in which the law ever considers intent."

The department has consistently acted in accordance with the foregoing statement of the law, and has found the less reasons for sympathy with offenders in cases of this character because it is difficult to believe that anyone can doubt the wrongfulness of false oaths and systematic deception.

I wrote to Secretary Garfield and asked him about some land-fraud cases in New Mexico, and asked him why he did not have criminal prosecutions instituted, and so forth, and on May 4, 1908, he gave me this excuse, as he said in his letter:

After a conference with the Attorney-General concerning the nature of suits to be brought, no criminal intent, other than the intentional evasion of the law, appeared in the evidence at hand either against the territorial officials or the purchasers and timber contractors.

No criminal prosecutions were instituted because the evasion was "intentional."

Yet the Attorney-General, in his report of 1907, a year before, quoting the Supreme Court, says:

If a man intentionally adopts certain conduct in certain circumstances known to him and the conduct is forbidden by the law, under these circumstances he intentionally breaks the law in the only sense in which the law ever considers intent.

Then the Attorney-General goes on, as I have read, to say that the department has consistently acted in accordance with the foregoing statement of the law.

Now, Mr. Chairman, I am not here to trap the Secretary of the Interior. I like Mr. Garfield. Nor am I here to trap the Attorney-General, Mr. Bonaparte. But here is the Attorney-General's report of 1907, and here is Mr. Garfield's letter of 1908, after that Supreme Court decision of 1907, and after they had found all these frauds, and they went along and filed an injunction suit as to these fraudulent purchases and possessions, but they instituted no criminal prosecutions, because the evidence did not show anything else than "an intentional evasion of the law."

That is the most remarkable statement that ever was writ or read in any court or read in this House—found "an intentional evasion" of the law, and therefore there was no criminal prosecution begun. How in heaven can we stop "depredations on timber;" how can we stop the fraudulent taking of land; how can we stop these great railroad corporations setting up dummies and hiring creatures to live around and settle on the public lands and then sell out to the corporations, with such an administration of the criminal law in this country? [Applause.]

Mr. STEPHENS of Texas. Mr. Chairman, I move to strike out the last word. I desire to call the attention of the chairman of the committee to an omission, I think, in line 19, page 106, with reference to the prosecutions with reference to lands allotted to the Kickapoo Indians. It reads this way:

In the discretion of the Secretary of the Interior, of fees of witnesses and of the actual expenses of witnesses summoned before the state grand jury.

I think it should state there "court or grand jury," because there is no use of having witnesses go before the grand jury unless they go before the court.

Mr. TAWNEY. This is the language the department has submitted to the committee, and we gave no attention to the matter in the hearing, but accepted their language, and we would not like to change their phraseology.

Mr. STEPHENS of Texas. But the gentleman can see at once it is more necessary to have the witnesses appear before the courts than the grand jury.

Mr. MANN. It says so; it says here:

Or before state courts at the trial of persons so indicted.

That is in line 22.

Mr. STEPHENS of Texas. Mr. Chairman, I withdraw my amendment.

Mr. TAWNEY. Mr. Chairman, I desire to offer the amendment which I have sent to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 106, in line 23, after the word "indicted," insert:
"And not exceeding $50,000 additional for clerk hire, rent, or other incidental expenses of the district land offices, and not exceeding $50,000 additional for expenses of hearings held by order of the Commissioner of the General Land Office to determine whether alleged fraudulent entries are of that character or have been made in compliance with law."

The question was taken, and the amendment was agreed to.

Mr. MONDELL. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, this paragraph contains a most extraordinary increase of the appropriation for the protection of the public lands. In my opinion the sum provided, $1,000,000, is much more than is necessary for that purpose. In my opinion it can not be expended judiciously or in a way that will be helpful in the protection of the public lands. For years the appropriation under this item was about $200,000. It was considered sufficient. About three years ago the appropriation was increased to $250,000. Last year an additional appropriation of $250,000 was made to bring the work current. The effect of that appropriation has been not to bring the work current, but to make new cases; and while a year ago there were only something like 20,000 cases before the department, if I recollect rightly, there are said to be some 32,000 cases before the department now.

The result of the increased appropriation has been not to settle the cases, not to close the cases, but to create new cases, and the effect of this appropriation, I fear, will be not to close the cases, not to settle the cases that are now before the department, but to create new cases. Special agents oftentimes, without any particular qualifications to prepare them for investigations of this character, selected under civil-service rules, are sent into the western country to make investigations relative to the character of lands claimed by entrymen and as to whether or not entrymen have complied with the law.

In many cases these well-meaning but woefully inexperienced agents have little conception of their duties or of the character of the lands they examine. They are not geologists. They can not judge as to its coal or noncoal character. In the majority of cases they are not acquainted with timber, and they can not pass intelligently upon the question of timber or nontimber. Most of the new men are likely to have no idea of the difficulties under which entrymen labor.

Mr. FLOYD. Will the gentleman yield for a question?

Mr. MONDELL. I have only five minutes, but I will yield.

Mr. FLOYD. I would like to ask about a special case that happened to affect my district. By executive order a forest reserve was created covering a large portion of my district, embracing in the neighborhood of 801,000 acres. I am informed that the forest director who examined it under the authority of the Forest Service has suspended the entrance of nearly, if not all, of the homesteaders who had previously made entries in that territory, and they can not get hearings. They claim they have not inspectors to examine the lands and see whether or not the entries are proper, and I would like to know if this bill provides for that character of cases.

Mr. MONDELL. There is an additional appropriation of $770,000 in addition to the amount heretofore granted for investigations of the character referred to by the gentleman, and under the appropriation I join him in the hope that some of those cases will be cleared up. In all probability many of the charges against his constituents have little merit.

Mr. FLOYD. Will the gentleman yield further?

Mr. MONDELL. I am afraid I have not the time.

Mr. FLOYD. I want to state that some of these entries have been suspended for more than a year, and I do not know that any of them have been investigated or whether the homesteaders have had an opportunity for hearing upon them.

Mr. MONDELL. The gentleman's constituents are lucky. If their entries are not suspended for more than one or two or three years they are fortunate. There are many public land entries that have been suspended for two, three, and four years. I hope they will be cleared up under this appropriation, but I am not oversanguine.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. MONDELL. Mr. Chairman, I ask unanimous consent that I may continue for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MONDELL. As I was saying, in many cases the special agents appointed are not particularly well qualified for their work, and the temptation is to report new cases rather than to settle old ones. My opinion is that we can appropriate a million dollars this year, and a million and a half next year, and two millions the year after, and after having done all that we would have more cases than we have now. It is the easiest thing in the world to create a land case—an alleged fraudulent case. Let any sort of an anonymous communication, from anywhere, blow through the open doors of the Land Office, relating to a land entry, calling it in question in any way, and immediately that land entry is suspended, is put under suspicion, and it is a case for investigation.

Mr. FINLEY. Will the gentleman state that entries are suspended on the faith of anonymous communications to the Interior Department?

Mr. MONDELL. I do. Entries have been so suspended. There is no controversy on that point. The land officials hold that if they receive suggestions or communications or charges from any sources, it is their duty to assume that there is some basis for such charges, and investigate and learn whether or no there is a base for the charge.

Mr. FINLEY. To what extent does a procedure of that character cost the Government?

Mr. MONDELL. It would involve an investigation by a special agent, which might cost the Government a comparatively small sum, if the tract to be examined was in the vicinity of other tracts to be examined, or very much more if the tract was at some distance from other tracts to be examined.

Mr. FINLEY. About what would be the average cost of an investigation?

Mr. MONDELL. I have no sort of an idea.

Mr. FINLEY. As much as a hundred dollars?

Mr. MONDELL. Well, I think perhaps not. I think it does not cost a hundred dollars on the average to examine cases in the field. Perhaps $50, probably less. But that is only a guess.

Mr. FINLEY. To what extent are cases originated by anonymous communications?

Mr. MONDELL. Oh, I have no idea, Mr. Chairman. I know that cases have been so originated. Cases have come to my attention that have originated by anonymous communications. Of course, they are comparatively few compared with the great number of cases. I simply refer to that fact to show how easily a cloud can be thrown on a land claim. For instance, there are thousands of cases now where entries are challenged for this reason: In July, 1906, an executive order was issued and every tract of public land in the United States in a township within which a coal declaratory statement had ever been made was withdrawn from all forms of entry, filing, or selection; that action challenges every entryman on such lands, and the department refuses to issue patents to nonmineral entrymen until there has been a field examination and a hearing.

Mr. FINLEY. If the gentleman will permit me, who is it that has authority in such matters, the Commissioner of the General Land Office or the Secretary of the Interior?

Mr. MONDELL. Nobody has the authority; the President has the power, and he exercises it.

Now, Mr. Chairman, there are approximately 23,000 acres of land in a township, and some fellow may have come along and put a coal declaratory statement on a 40-acre lot, with a view of prospecting some cropping he may have found on it, with the hope that it may prove to be valuable for coal. Or some one may have wanted to hold a tract for a few months for a lambing ground for his sheep, may have desired to shoo off some other fellow for a short time, and so filed a declaratory statement, and wherever a coal declaratory statement had been made anywhere at any time the entire township is withdrawn from entry.

Now, every land entry of any sort or kind within a township where this condition arises is now clouded, and ultimately they will have about 20,000 cases of that character. Some of these cases have been and will be cleared by the examination of the Geological Survey or of special agents; many of them can only be cleared, however, after a hearing. And it is because of that fact that I suggested that a part of this appropriation should be used for these hearings.

Mr. Chairman, my opinion is that most of the cases now before the department could have been taken care of, could have been examined and disposed of, under the exceedingly liberal appropriation of this year. In my opinion the tendency of this constant increase of appropriation is not to dispose of the cases so much as it is to make new cases.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FINLEY. I ask unanimous consent that the gentleman have five minutes more.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the gentleman from Montana have five minutes more. Is there objection? [After a pause.] The Chair hears none.

Mr. MONDELL. Now, Mr. Chairman, I do not desire to be misunderstood in this matter. The western people must not be misunderstood. There is a strong, healthy sentiment in the West for the enforcement of the land laws. It is that strong, healthy sentiment that is the best protection of the public lands. The right to contest is a right that protects the public domain better than all the appropriations that Congress can make for protecting the public lands. If there are public lands of any considerable value and any entryman or locator or claimant is not complying with the law, some other entryman or locator is likely to insist on his complying with the law and contest him, and in doing so secure the preference right to enter the land.

Mr. FINLEY. Now, when a declaration is made as to coal, does that cut out all other entrymen?

Mr. MONDELL. Oh, no; any number of coal declarations may be made on the same tract. Five hundred may be made on the top of each other on the same tract.

Mr. FINLEY. But supposing one wishes to enter the land for a homestead; can he go on and do so?

Mr. MONDELL. He can go right on and homestead the land. A coal declaration does not withdraw the land from entry in any way. They simply constitute a declaration of intention.

Mr. FINLEY. Are the prosecutions for cutting timber large or small; I mean in number?

Mr. MONDELL. Some are very large, but the most of them are small. They are against small mill owners or farmers who have in some way transgressed the rules and regulations.

Mr. FINLEY. To what extent are the prosecutions for fraudulent entries?

Mr. MONDELL. The general public considers all these cases fraudulent. The department does not so designate them; but, unfortunately, whenever a statement of the number of cases before the Land Office goes out to the world, it goes out as a statement of fraudulent cases.

Now I want to call attention to a document which I understand was to a certain degree responsible for this increased appropriation.

Mr. FINLEY. What document is that?

Mr. MONDELL. It contains a letter signed by the chief of the Special Service Division of the General Land Office. It is the most highly colored, extravagant, exaggerated statement, in my opinion, ever issued from a public office.

Mr. MANN. Tell us what that is. We want to see it.

Mr. MONDELL. It was published widely. Here is a copy of it.

Mr. MANN. Nobody would know it without the gentleman's advertisement. I have never heard of it.

Mr. MONDELL. It is the most inflammatory document of the kind I have ever seen. In that document the claim is made that this appropriation is necessary for the purpose of reclaiming $100,000,000 worth of property, or restoring it to the Government.

Mr. FITZGERALD. I think the gentleman is mistaken.

Mr. MONDELL. No; I am not mistaken.

Mr. FITZGERALD. Let me state what it is.

Mr. MANN. He is mistaken. It is $110,000,000.

Mr. FITZGERALD. That they have discovered fraudulent entries or operations which will result in the return of $110,000,000 worth of public lands to the public domain; and

having done that with $500,000, they want this additional appropriation to see how much more they can get.

I think the gentleman ought to state that the reason the committee gave this additional money, making a million dollars available, is this, that the Secretary stated that if it were not given at this time the statute of limitations of six years would run against most of these cases and the Government would be unable to recoup.

Mr. MONDELL. I am not objecting to the appropriation simply because there are not votes enough here to reduce it. That is the only reason why I am not objecting to it.

Mr. FITZGERALD. I would vote with the gentleman.

Mr. MONDELL. But I started to say that that was the most exaggerated, highly colored, inflammatory statement—I might almost say the most unjustifiable statement—that I had ever read issued from a government bureau. It places a value of hundreds of dollars an acre upon lands that, if the particular claimant now claiming them should be proven not to hold them in accordance with law, would be transferred to another claimant, and that other claimant would acquire them at all the way from $1.25 to $5 an acre.

If they were not homesteaded. Yet this document refers to them as lands worth $300 an acre and more, which the Government is proposing to reclaim and restore to whom? Why, to some other claimant or entryman. For instance, there are some mineral lands, estimated as of the value of $25,000,000. Nobody knows just what they are worth, but if they are all good coal lands, and the present claimants lose their cases before the department, other claimants can acquire them for from $10 an acre upward; and if not coal lands, can be homesteaded or acquired for much less.

The CHAIRMAN. The time of the gentleman from Wyoming has again expired.

Mr. FINLEY. This is very interesting. I request that the gentleman have five minutes more.

Mr. SMITH of Iowa. I do not want to object to that, but I do want that this shall end. I suggest that after five minutes more we proceed with the reading of the bill.

Mr. MONDELL. I do not want to take up the time of the committee, but I should like five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FINLEY. What is the comparative cost of reclaiming an acre of land, or a dollar's worth of land, under the system carried on by the department?

Mr. MONDELL. It is very difficult to answer that. We are appropriating a million dollars, and the probability is that the Treasury will not receive anything like a million dollars for lands which, through this appropriation, may be taken from one claimant and transferred to another; or, having been taken from one claimant, another claimant may assert his right and claim to. So, as a matter of fact, this appropriation will not in the majority of cases return anything to the Treasury of the United States. If it be a case of a coal entry, the coal entryman has already paid the price; and in the majority of cases, if he loses his entry, the money will be returned to him and another coal entryman will then purchase the land at the same price, or possibly, in some cases, at a slightly increased price, but at no such increase as that suggested in this report.

Mr. MADDEN. The gentleman's contention, then, is that if the present occupant of the land is found to be illegally in possession, some other person who has filed a claim would have the right of entry?

Mr. MONDELL. If it is land subject to homestead entry, and the present homesteader is unlawfully in possession, another homesteader could take it. If it is mineral land and the Government recovers it, some other entryman could take it. If it is coal land, and the present coal claimant shall lose the tract, another coal claimant has an opportunity to purchase.

Mr. MADDEN. What price would he have to pay?

Mr. MONDELL. Well, we are now classifying the coal lands. In some cases they would pay $10 or more more than the original purchaser.

Mr. MADDEN. What is the average price fixed for coal lands?

Mr. MONDELL. The law fixes it at $10 and $20 as a minimum. The department has gradually increased the price until the highest price is $75 an acre. In some few cases there would be an increase.

Mr. MADDEN. Then there would be a vast amount of revenue come into the Treasury of the United States if the Government receives $10, $20, or $75 per acre.

Mr. MONDELL. But if the actual entryman had already paid the coal-land price, and it shall be taken by the Government, it would have to be paid back by the Government again, unless fraud were proven.

Mr. MADDEN. But it is only fair to assume that they would not sell it at the same price.

Mr. MONDELL. Oh, in some cases there would be an increase. If it was mineral land, the price is $2 to $5 an acre. And homesteads are free, so that there is no income to the Government from the recovery of these lands.

Mr. MANN. Will the gentleman yield for a question?

Mr. MONDELL. I will yield, although my five minutes are fast going.

Mr. MANN. Yes; but the gentleman has had twenty minutes, The gentleman has furnished a valuable report here in which one case is stated where 300 acres of mineral land of the value of $15,000,000 is involved. Does the gentleman state under existing law if the Government should prevail in that suit against the Central Pacific Railroad Company and deprive the railway company of these 300 acres of land, valued at $15,000,000, that Jim Smith and John Jones could take title to it on the payment of these small amounts?

Mr. MONDELL. If it is metalliferous mineral land, there are only two laws——

Mr. MANN. It is an easy question to answer. Is it a fact——

Mr. MONDELL. I propose to answer it in my own way.

Mr. MANN. I want the gentleman to answer it so that I can understand; the gentleman has consumed twenty minutes and I have not understood him yet.

Mr. MONDELL. I am not responsible for the gentleman's lack of understanding.

Mr. MANN. But the gentleman is responsible for the lack of explicitness in statement.

Mr. MONDELL. Now, Mr. Chairman, there are two laws under which lands known to contain metalliferous mineral are acquired. One is the lode law and the other is the placer law. The placer locator pays $2.50 an acre and the lode locator pays $5 an acre. I hope that is clear.

Mr. MANN. It is not clear at all. Here are 300 acres of land which this report says are valued at $15,000,000, and does the gentleman state that under existing law that 300 acres of land can be taken by anybody at a total cost of $1,500?

Mr. MONDELL. If it is mineral land; yes.

Mr. MANN. Then, the gentleman's committee had better get busy and change the law. I think it is subject to severe criticism. If there is a law on the statute book under which we can take title from a railway company of land valued at $15,000,000, which John Jones can get for $1,500, the committee of which the gentleman is chairman ought to report a bill to change it.

Mr. MONDELL. The mineral-land laws have been in force for many years and have been upheld by public sentiment everywhere. If the land the gentleman refers to is coal land—and I do not know whether it is coal land or not or whether it is metalliferous mineral land—if it is, it is subject to entry at $2.50 to $5 per acre and would bring from $750 to $1,500. If it is coal land, the law allows the Secretary of the Interior to increase the price at his discretion. He could sell that coal land for more than it sold for originally, but to talk about that land having a value of $300 an acre is ridiculous.

Mr. MANN. Fifteen million dollars for 300 acres.

Mr. MONDELL. You can buy better coal land than any in that region in Virginia, Tennessee, or Kentucky, or anywhere, where they have coal lands for $25 or $30 an acre, but, as I said, if this is mineral and not coal land that they refer to Uncle Sam will sell it for $2.50 or $5 per acre.

Mr. WILSON of Pennsylvania. Mr. Chairman, is it not a fact that not only the quality of the coal has to be taken into consideration in determining the price, but the availability of the markets?

Mr. MONDELL. Yes; and the market is very limited there, as the gentleman knows. We mined 6,000,000 tons in my State last year. We could just as well mine 200,000,000 tons per annum if we had a market.

Mr. WILSON of Pennsylvania. And the Secretary of the department would have the right to take those things into consideration in fixing the price?

Mr. MONDELL. He does take them into consideration in fixing the price.

Mr. WILSON of Pennsylvania. And if a claimant on these lands settling upon them is required to vacate, would he not also have the right to enter, just as any other one would have the right to enter, those as coal lands?

Mr. MONDELL. Yes.

Mr. WILSON of Pennsylvania. And purchase the same.

Mr. MONDELL. Mr. Chairman, I hope this appropriation will prove valuable and effective in closing the many cases now before the department. We of the West hope and trust that the department will use this appropriation, not for the creation of new cases, but for the settlement of old cases.

Mr. MADDEN. The gentleman would not object to having new cases opened if there were cases to be discovered.

Mr. MONDELL. Certainly not; but we do object to having new cases where the facts do not warrant.

The CHAIRMAN. The gentleman's time has again expired.

The Clerk read as follows:

Reproducing plats of surveys: To enable the Commissioner of the General Land Office to continue to reproduce worn and defaced official plats of surveys on file, and other plats constituting a part of the records of said office, and to furnish local land offices with the same, $3,500.

Mr. FINLEY. Mr. Chairman, I move to strike out the last word. I would like to inquire of some gentleman on the committee, or the gentleman from Wyoming [Mr. MONDELL], about what is the cost for furnishing an official plat of surveys where they have been defaced? My information is that the cost is sometimes quite large.

Mr. SMITH of Iowa. This appropriation is simply a loan, and this money, when the plats are sold, is refunded to the Treasury.

Mr. FINLEY. I understand that; but what are the charges? Are not the charges exorbitant in many cases?

Mr. MONDELL. I understand a transcript of the township plats costs from $2.50 to $4.

Mr. FINLEY. That is for each township?

Mr. MONDELL. Yes.

Mr. FINLEY. Would that cover every plat of land in that township?

Mr. MONDELL. That would cover all the subdivisions of the township, but the department is now preparing photolithographic maps of the townships, which are sold for 25 cents each, and they prepare those plats from an appropriation carried somewhere in this bill of those townships where there is any considerable demand for plats.

Mr. FINLEY. I withdraw the pro forma amendment.

The Clerk read as follows:

Examinations of desert lands: To enable the Secretary of the Interior to examine, under such regulations and at such compensation as he may prescribe, the desert lands selected by the States under the provisions of section 4 of the act of Congress approved August 18, 1894, $1,000: *Provided*, That if such examinations be made by detailed clerks or employees of the department, they shall be entitled to actual necessary expenses for transportation, including necessary sleeping-car fares and not exceeding $3 per day in lieu of subsistence.

Mr. FINLEY. I reserve the point of order on that proviso. I would like to ask the chairman of the committee if that is a change in existing law.

Mr. SMITH of Iowa. It is not a change.

Mr. FINLEY. Is it new law?

Mr. MANN. It is in the present law.

Mr. FINLEY. Has the gentleman any information as to what the annual expenditure is?

Mr. MANN. It says not to exceed $3 per day.

Mr. FINLEY. What is the total of the amount?

Mr. MANN. It is limited to $1,000 for the year.

Mr. SMITH of Iowa. The whole appropriation is limited to $1,000 for the year.

Mr. FINLEY. I withdraw the point of order.

The Clerk read as follows:

Transcripts of records and plats, General Land Office: For furnishing transcripts of records and plats, to be expended under the direction of the Secretary of the Interior, $18,720: *Provided*, That persons employed under this appropriation shall be selected by the Secretary of the Interior, at a compensation of $60 per month each, and shall be entitled to the same leave of absence or leave for sickness with pay as is allowed by law to other employees of the executive departments: *Provided further*, That not more than one-twelfth of this appropriation shall be expended in any one month of the year for which it is available.

Mr. MANN. Mr. Chairman, I make the point of order on the first proviso. I believe I gave notice last year that I would.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard?

Mr. SMITH of Iowa. These are people that are not in the classified service down there, but maintained as a temporary force, but maintained through several years.

Mr. MANN. I may say to the gentleman that I think it was the second year I was in the House, and I have been here now for twelve years, I had that struck out on a point of order. It has been a permanent force for that length of time, to my certain knowledge, now made permanent by the second provision.

Mr. SMITH of Iowa. The gentleman means the proviso?

Mr. MANN. "That not more than one-twelfth of this appropriation shall be expended in any one month of the year for which it is available."

Mr. SMITH of Iowa. That was in it last year?

Mr. MANN. Yes.

Mr. SMITH of Iowa. Mr. Chairman, it is subject to the point of order if the point of order is made.

Mr. MANN. Mr. Chairman, I make the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. MANN. And I also move to strike out the word "further" in the second proviso.

The CHAIRMAN. Without objection, that amendment will be agreed to.

There was no objection.

The Clerk read as follows:

Opening Indian reservations (reimbursable): The appropriation of $25,000, act of Congress approved May 31, 1906, to meet the expenses of opening to entry and settlement during the fiscal years 1906, 1907, 1908, and 1909 the ceded lands within Indian reservations, is hereby continued and made available to meet the expenses pertaining to the opening to entry and settlement of such Indian reservation lands as may be opened during the fiscal year 1910: *Provided*, That the expenses pertaining to the opening of each of said reservations and paid for out of said appropriation shall be reimbursed to the United States from the money received from the sale of the lands embraced in said reservations, respectively.

Mr. HACKNEY. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend by striking out all of lines 23, 24, and 25, on page 108; also lines 1, 2, 3, 4, 5, 6, and all of line 7 except the word "provided" on page 109, and insert in lieu thereof the following: "to meet the expense of opening to entry and settlement ceded lands within Indian reservations, $25,000, or so much thereof as may be necessary."

Mr. HACKNEY. Mr. Chairman, the purpose of that amendment is to make this appropriation effective. By an oversight, it seems to me, in the language of the appropriation as made it is practically nugatory. It comes in a very peculiar way. In 1906 an urgent deficiency appropriation of $25,000 was made to pay the cost of entry and settlement of certain Indian reservations—the Flathead, the Crow, the Yakima, and Shoshone, Then next year, they not having consumed all of this appropriation, Congress provided it might be expended to cover Indian reservations that would be opened up next year, and so on from year to year they have kept it in force.

I find from the hearings that of that $25,000 they expended something like $18,000 on the Crow Reservation and over $6,000 on the Rosebud Reservation, so that there is practically none of the original appropriation left. Now, then, a number of reservations will be opened up during the next fiscal year, and there ought to be an appropriation available to meet the expenses of opening the land to entry and settlement. In order to make it effective, I have offered the amendment making the appropriation in better form. I see from the Book of Estimates the Secretary recommended that this appropriation be made a continuing appropriation. The amendment will simply put it in proper form.

Mr. SMITH of Iowa. Mr. Chairman, I see no objection to the amendment.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

For engraving and printing the geological maps, $100,000.

Mr. COOPER of Pennsylvania. Mr. Chairman, I want to call the attention of the chairman of the committee that I propose to offer an amendment after line 4, page 116, and as there are some items of dispute on the Geological Survey, that will come in a different place. I ask that this item be passed without prejudice.

Mr. MANN. Which item?

Mr. COOPER of Pennsylvania. I want to offer an amendment, after line 4, page 116, to provide for fuel tests.

Mr. NORRIS. Is that the place for fuel tests?

Mr. SMITH of Iowa. I think it ought to be offered at the end of line 9, but in order to perfect the text before it is passed, I desire to offer the following amendment, and then let the next paragraph be read.

Mr. COOPER of Pennsylvania. Then, I will offer my amendment at line 9.

The CHAIRMAN. The Chair would ask the gentleman from Iowa whether in line 3 there is a word missing, as there seems to be a space.

Mr. SMITH of Iowa. There is nothing the matter there.

The Clerk read as follows:

For the continuation of the investigation of the structural materials belonging to and for the use of the United States, such as stone, clays, cement, etc., under the supervision of the Director of the United States Geological Survey, to be immediately available, $70,000.

Mr. SMITH of Iowa. Now, I offer the amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 116, line 6, insert, after the word "materials," the word "both."

The question was taken, and the amendment was agreed to.

The CHAIRMAN. Now, the gentleman from Pennsylvania offers an amendment.

Mr. COOPER of Pennsylvania. Just before that, Mr. Chairman, please, I think, I want to offer an amendment there to change the word "seventy" to "one hundred," before that is passed.

Mr. NORRIS. I was going to offer that amendment myself.

Mr. COOPER of Pennsylvania. And consider it as pending?

Mr. SMITH of Iowa. Let the gentleman from Nebraska offer his amendment and let it be pending.

The CHAIRMAN. The gentleman from Nebraska offers an amendment, which the Clerk will report.

Mr. NORRIS. Mr. Chairman, I offer the following amendment: In line 9, page 116, strike out the word "seventy" and insert the words "one hundred and twenty-five."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 116, line 9, strike out "seventy" and insert "one hundred and twenty-five," so that it will read "$125,000."

The CHAIRMAN. Now the Chair understands the gentleman from Pennsylvania to ask unanimous consent that the paragraph with that amendment pending may be passed without *prejudice*. Is that correct?

Mr. CAMPBELL. Mr. Chairman, reserving the right to object to unanimous consent, I should like to ask the purpose of passing this over.

Mr. SMITH of Iowa. The purpose of passing this over is manifold. We are anxious to get the reading of this bill completed as rapidly as possible, and the second reason is that Mr. DALZELL, whom I had in mind, is absent, who desires to be heard, and there are others in that situation.

Mr. NORRIS. Quite a number have gone away with that understanding.

Mr. CAMPBELL. If any Member interested is unavoidably absent I have no objection to passing the matter over.

Mr. MACON. With that understanding, I object. If gentlemen can not stay here and attend to their business I object to matters going over to wait for them.

Mr. SMITH of Iowa. Mr. Chairman, I move that the item be passed without prejudice.

Mr. MACON. Mr. Chairman, I make a point of order against the motion.

The CHAIRMAN. It requires unanimous consent.

Mr. NORRIS. Will the gentleman from Arkansas [Mr. MACON] withhold his objection?

Mr. MACON. No, sir; under no circumstances will I do it on the ground that Members are away from their post of duty.

Mr. NORRIS. It is not on that ground.

Mr. MACON. Mr. Chairman, that is what the gentleman stated.

Mr. NORRIS. Will the gentleman withhold it until I can explain what I know about it?

Mr. MACON. No, sir; I will not, unless it can be shown that Members who are away from the House and want this matter carried over for their accommodation can furnish a good reason for their absence.

Mr. STANLEY. I think my good friend from Arkansas misapprehends. The gentleman is sick and necessarily absent. The gentleman from Pennsylvania [Mr. DALZELL] is usually most faithful in his attendance.

Mr. MACON. I have been advised that the gentleman is attending a dinner party.

Mr. COOPER of Pennsylvania. I want to call the attention of the gentleman from Arkansas to the fact that the chairman of the committee was requested to consent that these items be passed over without prejudice, and it was with his consent——

Mr. MACON. While I have a very high regard for any consent that the chairman of the committee may have given the gentleman, still, there are other Members in this House who are entitled to some consideration along that line themselves, and one consent does not carry the consent of the House, by any manner of means.

Mr. COOPER of Pennsylvania. I agree with the gentleman that that is true, but I do not feel that it is necessary for any Member to take upon himself the responsibility for legislation.

Mr. MACON. I do not think any Member is doing that.

Mr. MADDEN. There is no reason why the men who are not here should not be here as much as we are.

Mr. MACON. I want to ask the gentleman from Pennsylvania [Mr. COOPER] what he means when he says that "he does not feel that it is necessary for any Member to take the responsibility for legislation?"

Mr. COOPER of Pennsylvania. Every Member has an equal right to be here when he can. And the gentleman from Pennsylvania [Mr. DALZELL] is not well.

Mr. MACON. I do not want the gentleman to insinuate that because I object to passing this matter I am endeavoring to take the responsibility for legislation upon myself. I am simply exercising the right that I have under the law and the rules of this House, and the gentleman has no right to question my action.

Mr. KEIFER. I make no reflection on the gentleman.

Mr. COOPER of Pennsylvania. I make no reflection, so far as that is concerned.

Mr. KEIFER. Allow me to make this suggestion. The gentleman from Pennsylvania [Mr. DALZELL] was quite ill.

Mr. MACON. I have understood so, and is attending a dinner somewhere now.

Mr. KEIFER. No; he was hardly able to be here. He stayed as long as he could, and then said he was obliged to go home and go to bed, and then he talked to the chairman of the committee——

Mr. MACON. The chairman of the committee has not said to the Committee of the Whole that the gentleman from Pennsylvania [Mr. DALZELL] came to him and told him he was sick and had to go home and go to bed.

Mr. KEIFER. If he was here, he would tell the gentleman. The chairman is temporarily out of the hall. I think the gentleman from Iowa [Mr. SMITH] knows about that arrangement.

Mr. COOPER of Pennsylvania. This has been a long session. It began at 10 o'clock this morning——

Mr. MACON. And I have been right here since 10 o'clock this morning.

The CHAIRMAN. Is there objection?

Mr. MACON. I object.

Mr. SMITH of Iowa. Mr. Chairman, I think perhaps there is one matter that has not been called to the gentleman's attention, and I am satisfied that he does not want to interfere with the carrying on of the business of the House. Now, if this matter is brought up again, it is doubtful whether there is a quorum of the committee here. It is doubtful if he can proceed to-night without unanimous consent. A week from this noon this Congress adjourns. It is of the utmost importance to the public welfare that this bill should be passed, go to the Senate, and get into conference if it is to become a law before next Thursday noon.

It seems to me that if the gentleman will reflect upon this he will see that his duty to the country requires, whatever personal feeling he may have, he should surrender that feeling in order to expedite this business and let these disputed items go over until to-morrow.

Mr. MACON. I desire to state to the gentleman that I have been here all day long, and I have not disturbed the deliberations of the committee one time during its session.

Mr. SMITH of Iowa. That is right.

Mr. MACON. Out of deference to the fact that we are close to the end of the session and all of us want to get through with this bill, and hence I have not taken up a single moment of the time of the committee. So when Members tell me we ought to delay the progress of this bill for the purpose of awaiting the return of some one who has deliberately absented himself from the House and is not here to discharge his duties as a Representative, I say that it is unreasonable, and that is why I object.

Mr. TAWNEY. Let me interrupt the gentleman from Arkansas. It was not Mr. DALZELL's purpose to leave the House deliberately. Mr. DALZELL has not left the House because of any social engagement or anything of that kind, but because of his physical condition, which made it impossible for him to *remain*. He was in hopes, if the items were postponed until the end of the bill, that he would be able to be here and assist in the consideration. His constituents are deeply interested in these three items, and it was out of respect for that gentleman that I said if I could, in so far as I was able, I would have the consideration of the items postponed.

Mr. MACON. Does the chairman of the committee state that Mr. DALZELL was sick, and is not here because of that fact?

Mr. TAWNEY. Mr. DALZELL said: "I am physically unable to remain."

Mr. MACON. That he was sick, and is not here for that reason?

Mr. TAWNEY. That is the reason he is not here.

Mr. MACON. And that is the only reason?

Mr. TAWNEY. And that is the only reason he gave; and it is in the hope that he may be here in the consideration of the items that we ask that they be postponed.

Mr. MACON. That puts a different phase on the matter. If he had deliberately absented himself from the discharge of his duties, under no circumstances, Mr. Chairman, would I have withdrawn the objection; but his being sick makes it entirely different. I appreciate that fact thoroughly, and will very gladly withdraw my objection.

The CHAIRMAN. The objection is withdrawn. The paragraph is passed without prejudice.

Mr. COOPER of Pennsylvania. Mr. Chairman, how far will this agreement go? How far will it carry over this bill?

The CHAIRMAN. Nothing further has been read. There is no agreement as to any other paragraph.

Mr. SMITH of Iowa. Let the agreement go as to the paragraph including fuel tests, which will be offered immediately following the paragraph which we have just been discussing.

Mr. DOUGLAS. Let it go to the item at the bottom of the page.

Mr. COOPER of Pennsylvania. Let it also cover the item for mine disasters. Let us pass that, and make an agreement.

The CHAIRMAN. When a paragraph is passed without prejudice, there is no hindrance to offering as many amendments as gentlemen desire to.

The Clerk read as follows:

For continuing the investigations as to the causes of mine explosions with a view to increasing safety in mining, to be immediately available, $100,000.

Mr. DOUGLAS. Mr. Chairman, I move to amend by striking out the words "one hundred" and inserting the words "one hundred and fifty," so that it will read "one hundred and fifty thousand."

Mr. TAWNEY. Pending that amendment, I ask that this paragraph be passed without prejudice.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that this paragraph and pending amendments be passed without prejudice.

Mr. MACON. I would like to know the reason for this paragraph being passed.

The CHAIRMAN. Is there objection?

Mr. OLLIE M. JAMES. Reserving the right to object, I would like to ask what is the necessity for passing it?

Mr. SMITH of Iowa. That has already been detailed to the House. The gentleman from Pennsylvania [Mr. DALZELL] and a number of other gentlemen who are interested in these three items desire that they be passed.

Mr. MACON. Mr. Chairman, I want to say to the gentleman from Iowa we do not want him to enlarge too much upon the reason for the passing of the paragraph to-night.

Mr. SMITH of Iowa. I do not want to enlarge it. These three items all stand on the same footing.

Mr. MACON. I am willing to withhold objection, because Mr. DALZELL is sick; but if it is to be passed for some one else that is away and not sick, I will object.

Mr. OLLIE M. JAMES. Of course, if any gentleman is unavoidably absent, and it is passed over for the purpose of enabling him to be here later, I shall not object.

Mr. GARRETT. I will ask the gentleman from Iowa if it is expected to finish this bill to-night?

Mr. SMITH of Iowa. Not these items, but we want to go as far as possible, and get through with the undisputed matters to-night if we can.

The Clerk read as follows:

In all, for the United States Geological Survey, $1,162,390.

Mr. SMITH of Iowa. Mr. Chairman, that being a total, I ask that it be passed with the other items to which it belongs.

The CHAIRMAN. Is there objection to the request?

There was no objection.

The Clerk read as follows.

MISCELLANEOUS OBJECTS, DEPARTMENT OF THE INTERIOR.

Supreme Court reports: To pay the publishers of the decisions of the Supreme Court for 270 copies of volumes 214 to 218, inclusive, official edition, at $2 per volume, $2,700.

Mr. STANLEY. I should like to ask the gentleman in charge of the bill what these 270 volumes are, and for whom they are?

Mr. SMITH of Iowa. They are for the judges and other parties entitled to copies of the decisions of the Supreme Court, in accordance with express statutes.

A MEMBER. What Supreme Court?

Mr. SMITH of Iowa. There is but one Supreme Court that is recognized in connection with the Government of the United States.

The Clerk read as follows:

Care and custody of the insane of Alaska: For the care and custody of persons legally adjudged insane in the district of Alaska, including transportation and other expenses, $50,000.

Mr. GAINES of Tennessee. What provision is made for the insane in Alaska?

Mr. SMITH of Iowa. They are brought to the United States and cared for by contract.

Mr. GAINES of Tennessee. Has the Government made no provision whatever for taking care of the insane in Alaska?

Mr. SMITH of Iowa. No; except to bring them home to continental United States.

Mr. MANN. And taking care of them.

Mr. GAINES of Tennessee. I am surprised that no insane asylum has been erected in Alaska.

Mr. SMITH of Iowa. There is no place where an asylum could be built up there where they would be comfortable through the long darkness and cold of winter.

Mr. MANN. I will suggest to the gentleman that they could not very well build a big enough asylum, for it would have to include the entire population. No one goes there who is sane. [Laughter.]

Mr. GAINES of Tennessee. The President-elect is going there next summer. Now, as to the climate, I understand there are places in Alaska where flowers and vegetables grow——

Mr. GARRETT. And onions.

Mr. GAINES of Tennessee. Yes; everything that is good.

Mr. MANN. They grow luxuriantly—in the government reports.

Mr. SMITH of Iowa. I will say to the gentleman that we have a contract to take care of the Alaska insane here in the United States.

Mr. GAINES of Tennessee. There are a great many of our own people in Alaska. We have owned that country ever since Andrew Johnson was President, and yet we have never built an insane asylum up there. We have built railroads and towns, and sent deer up there—reindeer—and the real dear goes there, and made appropriations to take care of the Indians and other people otherwise, and yet we have no insane asylum there. We bring those unfortunate people away off down here at great expense. It seems to me in that country of trees and sawmills and railroads and diamonds——

Mr. ROBINSON. And Eskimos.

Mr. GAINES of Tennessee. And Eskimos. We ought to build at least a temporary insane asylum. I hope it will be done. It ought to be done.

Mr. MACON. Does not the gentleman think it would be cruelty to keep helpless people up in that cold climate through the long winters?

Mr. GAINES of Tennessee. Well, I do not know about that.

The Clerk read as follows:

Protection of game in Alaska: For carrying out the provisions of an act approved May 11, 1908, entitled "An act for the protection of game in Alaska, and for other purposes," including salaries, traveling expenses of game wardens, and all other necessary expenses, $5,000, to be expended under the direction of the governor of Alaska.

Mr. HUMPHREY of Washington. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The Clerk read as follows:

On page 119, line 10, strike out "five" and insert "ten," so that it will read "$10,000."

Mr. HUMPHREY of Washington. Mr. Chairman, I do not desire to take up the time of the committee very long.

Mr. MANN. I had intended to make a point of order against that provision, but I will not.

Mr. SMITH of Iowa. I will say that the committee acquiesces in this amendment and recommends its adoption.

Mr. MACON. Mr. Chairman, I was on my feet for the purpose of reserving a point of order.

The CHAIRMAN. The Chair did not observe the gentleman from Arkansas.

Mr. MACON. I understand that, but I was trying to attract the attention of the Chair, nevertheless.

The CHAIRMAN. If the gentleman says he was on his feet, endeavoring to secure recognition——

Mr. MACON. Yes; as soon as the amendment was read.

The CHAIRMAN. Oh, to the amendment.

Mr. MACON. Yes.

The CHAIRMAN. But it was not the gentleman's purpose to make a point of order to the paragraph in the bill?

Mr. MACON. Yes; to the paragraph in the bill as well as the amendment.

The CHAIRMAN. Does the gentleman desire to discuss the point of order?

Mr. MACON. I want to reserve the point of order to ascertain the reason for the paragraph. I do not care to make a point of order captiously.

Mr. GAINES of Tennessee. Mr. Chairman——

The CHAIRMAN. The Chair will state that the gentleman from Arkansas has the floor. Does the gentleman from Arkansas yield?

Mr. MACON. I will yield to the chairman of the committee to state the reason for this appropriation.

The CHAIRMAN. The first question is on the point of order.

Mr. MACON. Then I will ask the gentleman from Iowa to state the reason for this provision.

Mr. SMITH of Iowa. There is a statute providing for the protection of game in Alaska, and this is in pursuance of that statute, which provides for issuing licenses, the fixing of a closed season except for the natives for actual consumption; and this is a provision to carry out the law.

Mr. HUMPHREY of Washington. I have the law here, and it says "the amount necessary for the enforcement of this act shall be estimated for annually by the Agricultural Department and appropriated for, including the employment and salary to be paid to the game wardens herein authorized.

Mr. MACON. And this appropriation is made under that law for the protection of game?

Mr. HUMPHREY of Washington. Yes.

Mr. MACON. Then this is authorized by existing law?

Mr. HUMPHREY of Washington. Yes.

Mr. MANN. How did it come in this bill, if it is to be estimated for by the Agricultural Department?

Mr. SMITH of Iowa. Because it is expended by express statute by the governor of Alaska and not by the Secretary of Agriculture.

The CHAIRMAN. Does the gentleman from Arkansas withdraw the point of order?

Mr. MACON. I do.

Mr. GAINES of Tennessee. I renew the point of order.

Mr. SMITH of Iowa. It is not subject to a point of order.

The CHAIRMAN. Does the gentleman from Tennessee desire to discuss the point of order?

Mr. GAINES of Tennessee. I reserved it.

Mr. SMITH of Iowa. I want the point of order made.

Mr. GAINES of Tennessee. Very well; I will make the point of order.

The CHAIRMAN. The Chair is ready to rule, and the Chair overrules the point of order.

Mr. GAINES of Tennessee. Now, Mr. Chairman, I want to be heard on the amendment.

The CHAIRMAN. The Chair will hear, first, the gentleman from Washington.

Mr. HUMPHREY of Washington. Mr. Chairman, as I started to say, I do not desire to take but a very few moments, because when the matter was called to the attention of the committee they agreed with me that an appropriation of $5,000 to cover this vast territory, that contains over 586,000 square miles, was simply absurd. I have asked them to make this slight increase so that we could put 1 warden at Fairbanks, where they are killing a great many caribou. I have had letters saying that they are killing unlawfully a large number and that one man had killed over 300. Then, there ought to be 2, at least, on the Kenai Peninsula, 1 on the east side and 1 on the west side. This is the chief game portion of Alaska, where the great moose are. Then, there ought to be 1 on Kadiak Island, where there are many bear, and 1 out on the Alaskan Peninsula, where there are a good many caribou and bear and where a great many hunters go.

This would still leave unprotected southeast Alaska, where there is a great deal of game, but for $10,000 we can only make a start. If you enforce the law, it will be economy. Unless the law is enforced hunters will discover that it is cheaper to evade the law than to pay a license. If the law is enforced, it will pay all expenses necessary for this purpose.

Mr. MANN. To whom is the license paid?

Mr. HUMPHREY of Washington. It is paid into the National Treasury. That is the reason why this provision was inserted.

Mr. MANN. That is certainly a very proper thing to do.

Mr. HUMPHREY of Washington. I will say that after talking with the chairman of the Appropriation Committee I consented that that change might be made in the bill that became a law.

Mr. COX of Indiana. Will the gentleman yield for a question?

Mr. HUMPHREY of Washington. Yes.

Mr. COX of Indiana. If I remember correctly, the law on which this appropriation is sought to be based was introduced by the gentleman from Washington himself?

Mr. HUMPHREY of Washington. Yes.

Mr. COX of Indiana. The appropriation bill carries $5,000 for the support and maintenance of the law?

Mr. SULZER. That is correct.

Mr. HUMPHREY of Washington. That is for the enforcement of that law; yes.

Mr. COX of Indiana. How much do these game inspectors cost?

Mr. HUMPHREY of Washington. We have not had any yet.

Mr. SULZER. The governor of Alaska has not appointed any yet.

Mr. COX of Indiana. Can the gentleman give some idea of about how much they cost?

Mr. MANN. They will cost $10,000 if the gentleman's amendment prevails; and if it does not, they will cost $5,000.

Mr. COX of Indiana. I want to know how much is paid to each individual inspector per year.

Mr. HUMPHREY of Washington. The department estimates it will cost about $2,000 to pay for an inspector, and probably $300 a year for traveling expenses. I have a letter from the Department of Agriculture in which they say for $5,000 they can procure two.

Mr. COX of Indiana. Then this $10,000, if it obtains, will employ five inspectors?

Mr. SULZER. At least that.

Mr. HUMPHREY of Washington. At least that; and that would cover the main points that ought to be protected.

Mr. COX of Indiana. All to protect some moose out there?

Mr. OLLIE M. JAMES. That will be two more than the gentleman wants. I understand him to say he just wants three.

Mr. HUMPHREY of Washington. The gentleman did not understand me correctly.

Mr. MADDEN. How much do they pay them?

Mr. HUMPHREY of Washington. They have not appointed any yet.

Mr. MANN. The gentleman may be sure there will be no money covered into the Treasury.

Mr. HUMPHREY of Washington. Well, why should there be?

Mr. MANN. I do not think there ought to be.

Mr. HUMPHREY of Washington. Why take money belonging to Alaska to pay the general expenses of the Government?

Let me make a comparison between Alaska and a few of the States in regard to game protection: Wyoming has 97,800 square miles. It employs 28 game wardens and expends about $50,000 annually in the enforcement of its game law. Michigan has 58,000 square miles and 41 game wardens. Montana employs 14 game wardens. Alaska with its thousands of miles of shore line and 586,400 square miles of territory, the last great game preserve this Nation possesses, is given the pitiful sum of $5,000 to enforce its game law. The people of Alaska have a right to feel that they are not justly treated in this matter. The appropriation should have been $50,000. I trust, however, that if the increase is given that, with this $10,000, a sufficient sum may hereafter be collected to properly enforce this law. The enforcement of this law means not only the preservation of the game, but it will tend to prevent the extermination by starvation of the natives of that Territory. I insert in the RECORD a statement upon this question that I have received from Doctor Merriam, Chief of the Biological Survey, Department of Agriculture:

MEMORANDUM REGARDING GAME-WARDEN SERVICE IN ALASKA.

Alaska has an area of 586,400 square miles and a population of nearly 100,000. It is obviously impossible to enforce game laws adequately over such an immense expanse of territory with its people so widely scattered and at points so difficult of access. All that can be done is to protect the game in certain exposed localities and to regulate shipment of game from the Territory.

(1) One warden should be stationed throughout the year on the Kenai Peninsula, which, owing to its accessibility and the variety of its game, is the favorite hunting ground of visitors to Alaska. In addition there should be one warden for each of the three divisions into which the judicial district of Alaska is divided. Competent men must be paid a salary of at least $1,500 and probably $2,000 each. The traveling expenses will be at least $1,000 per year per warden, as each warden will have a large territory to cover and as transportation is difficult and expensive. An appropriation of $5,000 will provide for but two wardens, and if one of these is stationed on the Kenai Peninsula, there will be practically but one warden available for the rest of the Territory. An appropriation of $10,000 will provide a warden for the Kenai Peninsula and three additional officers who can each have a definite part to watch and a special district to patrol.

(2) Five thousand dollars is less than the sum appropriated by most of the States which maintain a warden service. Following are the amounts provided for warden service in a few of the States which have big game:

Michigan, with an area of 58,915 square miles and a population of about 2,600,000, provides 1 game, fish, and forestry warden, at $3,000

and expenses; 1 chief deputy, at $1,500 and expenses; and 1 general deputy, at $1,200 and expenses. In 1908 it employed (on a per diem basis) 41 deputy wardens, at a total cost of $21,000, and paid for their expenses, approximately, $14,000. The total cost of the warden service in Michigan for the past year was, approximately, $46,000.

Montana, with an area of 146,000 square miles and population of about 305,000, provides 1 game and fish warden at a salary of $2,400 and $2,000 for expenses. It also provides for 12 special deputies at $1,500 each and $300 each for expenses.

Wyoming, with an area of 97,890 square miles and a population of about 105,000, provides 1 state warden at a salary of $1,500 and an allowance of $200 for traveling expenses; 3 assistant wardens, at $900 each; and 1 or more special wardens for each of the 13 counties; in all, at least 17 wardens. In 1908 the number of special wardens employed was 24, making a total warden force of 28 officers.

(3) Attention is called to the fact that the present bill carries an appropriation of $12,000 for maintenance of the domesticated reindeer in Alaska, but only $5,000 for the protection of the enormous herds of wild reindeer or caribou, moose, sheep, deer, and goats, all of which are immensely valuable as a permanent food supply for the natives and settlers in Alaska. Alaska is the only region in the United States where big game is absolutely necessary for food and clothing. It has, therefore, more urgent necessity than any other for preserving its big game. Laws must be enforced to be effective, and enforcement is impossible without adequate warden service.

Mr. GAINES of Tennessee. Mr. Chairman, the gentleman has not taken occasion to state that a single one of these murderers of the caribou has been indicted. [Laughter.]

Mr. SULZER. These are not cari-bow; they are cari-boo.

Mr. GAINES of Tennessee. Well, cari-boo, then. [Laughter.] Does the gentleman go on the idea that if we will get some men up there to look around after the caribou, these people up there will cease to disobey the law? Now, I want to say to him that I helped to make the jury laws of that Territory and its code; that I have voted to give you three or four district judges up there to enforce the laws, and I have always helped Alaska in every way I could with propriety, although the Delegate is not here to ask for this.

Mr. CAMPBELL. His representative is here.

Mr. GAINES of Tennessee. And yet, Mr. Chairman, we do not find that a single one of the violators of the law of Alaska has been indicted for invading the very severe criminal laws of that Territory. They simply want more salary, they want more political gifts, more loaves and fishes to deal out to somebody to go up there and sit around and let the law go to sleep on the statute books, and permit the same depredations, perhaps, that are now being committed. Where are the district judges, that they have not charged the grand jury to enforce the law? Are we to go along here and buy people not to disobey the law, or shall we see it faithfully enforced? [Applause.]

Mr. HUMPHREY of Washington. That is what I want to get the inspectors for—so that we can enforce the law.

Mr. GAINES of Tennessee. Why didn't you see that the district courts and the grand juries and the district attorneys have done their duty instead of coming here and begging us, with a deficit in the Treasury, for $5,000? [Applause.] You do not practice what you preach, gentlemen. [Applause.] I want to say to you gentlemen that that sort of child's play does not deter me from pointing out to you your delinquencies and your sins—not the least. Mr. Chairman, I say that this appropriation ought not to be allowed. They have not showed a single reason for it. All they are killing up there is this immense animal, the caribou; and yet the Delegate himself has not asked for it; Secretary Wilson has not asked for it; the President has not asked for it; the Attorney-General nor the judges nor anybody has asked for it except the gentleman who lives in Washington [Mr. HUMPHREY].

Mr. HUMPHREY of Washington. You are mistaken about that.

Mr. GAINES of Tennessee. You did not state they did.

Mr. HUMPHREY of Washington. I could not state everything in five minutes, especially when you were taking up part of my time.

Mr. GAINES of Tennessee. I did not take up any of your time. I always give you all the time and all the rope you want, and in this case you have hung yourself, and you have given no reason—— [Laughter and applause.]

Mr. HUMPHREY of Washington. Mr. Chairman——

Mr. GAINES of Tennessee. Mr. Chairman, I decline to be interrupted by anybody who purposely treats me discourteously.

Mr. HUMPHREY of Washington. I want to apologize——

Mr. GAINES of Tennessee. I decline to accept your apology. It was willful, sir—as many times as I have been courteous to you throughout your congressional career.

Mr. MANN. Mr. Chairman, I call both gentlemen to order.

The CHAIRMAN. The gentleman from Tennessee must not address Members of the House in the first person directly. The time of the gentleman has expired.

Mr. CHANEY. Mr. Chairman, I desire to ask the gentleman from Washington a question. I see that the appropriation last year was $9,000.

Mr. HUMPHREY of Washington. No; there has not been an appropriation before; this is the first appropriation.

Mr. CHANEY. I see in the hearings they ask an appropriation of $3,000 less than it was last time.

Mr. HUMPHREY of Washington. I do not know what it was; there has not been an appropriation. The gentleman must be thinking of reindeer in Alaska. You are on the wrong paragraph.

The CHAIRMAN. The question is on the amendment proposed by the gentleman from Washington.

The question was taken, and the Chair announced the ayes seemed to have it.

Mr. GARRETT and Mr. OLLIE M. JAMES. Mr. Chairman, a division.

The committee divided, and there were—ayes 74, noes 32.

Mr. OLLIE M. JAMES. Mr. Chairman, tellers.

Mr. GAINES of Tennessee. Mr. Chairman, I make the point of no quorum.

The CHAIRMAN. One hundred and six Members have voted. The gentleman from Kentucky demands tellers.

Tellers were ordered.

The committee again divided, and the tellers (Mr. SMITH of Iowa and Mr. OLLIE M. JAMES) reported—ayes 85, noes 34.

So the amendment was agreed to.

The Clerk read as follows:

Yellowstone National Park: For the administration and protection of the Yellowstone National Park, $5,500.

For procuring feed for buffalo, salaries of buffalo keepers, $2,500.

Mr. OLLIE M. JAMES. Mr. Chairman, I should like to ask the chairman of the committee what is the necessity for the appropriation here of $2,500 for feed of buffalo and salary of buffalo keepers? I would like to know what the salary of a buffalo keeper is and what the feed costs, to see whether or not the Government is getting "buffaloed" in this matter.

Mr. SMITH of Iowa. The salary of the buffalo keeper is $1,200 a year and that of the assistant keeper is $720.

Mr. OLLIE M. JAMES. What is the necessity?

Mr. SMITH of Iowa. I do not know how the gentleman can expect them to take care of the buffalo and protect them from destruction in that great park, which is one of the great places where we still have a number of buffalo preserved.

Mr. OLLIE M. JAMES. And $1,200 is the salary of the keeper?

Mr. SMITH of Iowa. For the chief keeper, and $720 for the assistant.

Mr. OLLIE M. JAMES. And there are two men up there?

Mr. SMITH of Iowa. Two men there in charge.

Mr. GARRETT. What do the buffalo get?

Mr. MANN. They get taken care of.

Mr. SMITH of Iowa. They get care and food.

Mr. OLLIE M. JAMES. How many buffalo have we there?

Mr. SMITH of Iowa. I can not give the exact number; but a year ago the number increased so that it was considered to be too large to keep in one portion of the park and they had to divide the herd, so there must be quite a number.

Mr. OLLIE M. JAMES. Mr. Chairman, I move to strike out lines 15 and 16, providing "for procuring feed for buffalo, salaries of buffalo keepers, $2,500."

Mr. SMITH of Iowa. Well, vote on that.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 119, strike out lines 15 and 16.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Government Hospital for the Insane: For current expenses of the Government Hospital for the Insane: For support, clothing, and treatment in the Government Hospital for the Insane of the insane from the Army and Navy, Marine Corps, Revenue-Cutter Service, inmates of the National Home for Disabled Volunteer Soldiers, persons charged with or convicted of crimes against the United States who are insane, all persons who have become insane since their entry into the military and naval service of the United States who have been admitted to the hospital and who are indigent, including purchase, maintenance, and driving of necessary horses and vehicles and of horses and vehicle for official use of the superintendent, $322,300; and not exceeding $1,500 of this sum may be expended in defraying the expense of the removal of patients to their friends; not exceeding $1,000 may be expended in the purchase of such books, periodicals, and papers as may be required for the purposes of the hospital, and not exceeding $1,500 for actual and necessary expenses incurred in the apprehension and return to the hospital of escaped patients.

Mr. GARRETT. Mr. Chairman, I move to strike out the last word. Now, in the utmost seriousness, this item carries an increase of $96,500 over last year's appropriation.

Mr. SMITH of Iowa. Mr. Chairman, I do not understand to what the gentleman refers as carrying an increase of $96,000.

Mr. GARRETT. Ninety-six thousand five hundred dollars.

Mr. SMITH of Iowa. For what?

Mr. GARRETT. The increase of appropriations over last year.

Mr. SMITH of Iowa. For what?

Mr. GARRETT. For the Government Hospital for the Insane.

Mr. SMITH of Iowa. The item now under consideration is increased from $305,800 to $322,000.

Mr. GARRETT. The statement in the report is it is increased $96,500.

Mr. MANN. It must be a mistake, because the appropriation for last year was only $305,000.

Mr. SMITH of Iowa. The gentleman is taking improvements and everything else under consideration.

Mr. GARRETT. I am taking the report of the gentleman's committee.

Mr. SMITH of Iowa. I know, but the gentleman ought to analyze that report. The figures he takes are the figures including the improvements.

Mr. GARRETT. The report does not say anything about the improvements.

Mr. SMITH of Iowa. The bill shows what the improvements are, and that part will be reached in a few minutes.

Mr. GARRETT. We have reached it now, have we not?

Mr. SMITH of Iowa. We have reached now the ordinary support fund, which is increased exactly in the ratio of the growth of the population in the hospital, neither more nor less.

Mr. GARRETT. What does it cost per patient out there?

Mr. SMITH of Iowa. Two hundred and twenty dollars.

Mr. GARRETT. Per annum?

Mr. SMITH of Iowa. Per annum; yes.

Mr. GARRETT. How is it as compared with the cost in the various States?

Mr. SMITH of Iowa. It is below some and higher than some.

Mr. GARRETT. How about the State of Iowa?

Mr. SMITH of Iowa. It is about the same.

Mr. GARRETT. They have not many in Iowa.

Mr. SMITH of Iowa. We have not a great many in the State of Iowa. The gentleman is correct.

Mr. GARRETT. They never send any of them here if they have them. And this increase, then, does include improvements?

Mr. SMITH of Iowa. Oh, yes; there is only about $17,000 of an increase, and that is based entirely upon the percentage of growth of population in the hospital.

Mr. GARRETT. There is no increase per patient?

Mr. SMITH of Iowa. None whatever.

The Clerk read as follows:

For centralizing the power, heating, and lighting plant, remodeling the electric lay out, and substituting electrically-driven for steam-driven machinery, and for certain other purposes, $100,000, which sum shall be paid from money in the Treasury arising from arrears of pension and pension money retained from pensioners in the hospital under the act approved August 7, 1882.

Mr. SMITH of Iowa. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 122, strike out after the word "treasury," in line 3, down to and including line 6, and insert in lieu thereof the following:

Which has accrued to the hospital from pensions, under the act of February 20, 1905.

Mr. SMITH of Iowa. That is put in to perfect the text and correct a clerical error.

Mr. COX of Indiana. I wish to reserve a point of order.

Mr. MANN. It is too late for that.

Mr. SMITH of Iowa. Let this amendment to perfect the text be adopted first.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. SMITH].

The question was taken, and the amendment was agreed to.

Mr. COX of Indiana. Mr. Chairman, I move to strike out the last word. Can the gentleman inform the committee how many soldiers there are in this hospital?

Mr. SMITH of Iowa. I can not.

Mr. COX of Indiana. Can the gentleman inform the committee about how much money belonging to the soldiers is now in the Treasury of the United States?

Mr. SMITH of Iowa. A larger amount than the amount necessary for this improvement.

Mr. COX of Indiana. Can the gentleman tell about how much larger it is?

Mr. SMITH of Iowa. I can not recall.

Mr. COX of Indiana. Approximately, how much?

Mr. SMITH of Iowa. I can not tell at all accurately, but it is about $160,000, and more than enough to make this improvement.

Mr. COX of Indiana. Now, does the statute in force governing this institution authorize or give power to retain or withhold a part of the soldiers' pensions for this purpose?

Mr. SMITH of Iowa. This fund is composed of pension money left to the credit of deceased inmates.

Mr. COX of Indiana. Is it not a fact that this hospital retains part of the pensions of the soldiers and sailors that are now in the hospital?

Mr. SMITH of Iowa. Not for hospital use.

Mr. COX of Indiana. Then, do I understand the gentleman to say that the whole of this fund that it is proposed to appropriate from the soldiers and sailors' pensions is derived from deceased soldiers?

Mr. SMITH of Iowa. As I understand it.

Mr. COX of Indiana. No part of this fund appropriated here comes from soldiers and sailors in the institution and now drawing pensions?

Mr. SMITH of Iowa. I think not.

Mr. OLLIE M. JAMES. After detailing for what the money is to be used, these indefinite words are used: "And for certain other purposes." What does that include?

Mr. SMITH of Iowa. It is meant to include similar purposes, namely, the perfecting of the heating and power system. This institution is one that has been built at different times, with old buildings on one side of the road and new buildings upon the other side of the highway. The newer part has been built on the cottage plan, and has required a vast amount of construction of steam pipes, that are carried under the earth in conduits.

Mr. OLLIE M. JAMES. I know, but the section provides specifically for heating and lighting purposes, and then it uses the language——

Mr. SMITH of Iowa. It is for automatic stokers, and everything of that kind.

Mr. OLLIE M. JAMES. After specifying that this is for heating and lighting purposes, it says, "for certain other purposes." That does not include heating and lighting, because you have already specified that.

Mr. SMITH of Iowa. The language reads:

For centralizing the power, heating, and lighting plant, remodeling the electric lay out, and substituting electrically driven for steam-driven machinery, and for certain purposes——

Mr. OLLIE M. JAMES. "For certain other purposes;" not for "certain purposes."

Mr. SMITH of Iowa. They are supposed to be merely auxiliary to the same purpose.

Mr. OLLIE M. JAMES. You have already specified for heating and light, and then you have "certain other purposes" not for such purposes. For what purpose does this mean? You might use all this appropriation for the other purposes and leave out the heating and lighting entirely.

Mr. SMITH of Iowa. I think it is plain under the ordinary rules of construction.

Mr. OLLIE M. JAMES. You might use an infinitesimally small part of it for the heating and lighting and the remainder of it for "certain other purposes."

Mr. SMITH of Iowa. We could not use it except for some kindred purpose.

Mr. OLLIE M. JAMES. Then, I think that the gentleman ought to give to the House some other information except the broad specification for "certain other purposes."

Mr. SMITH of Iowa. I do not think so, or I would give it.

Mr. OLLIE M. JAMES. I know the gentleman would; but I was just trying to find out if you knew anything about it.

Mr. SMITH of Iowa. This involves the power, heating, and lighting plant; and of course there are a great many incidentals to that which can not be specified; but it all refers to similar work.

Mr. CLAYTON. May I ask the gentleman a question in that connection?

Mr. SMITH of Iowa. I will yield to the gentleman from South Carolina, who rose first.

Mr. JOHNSON of South Carolina. I want to ask the gentleman if it was intended for the purpose of covering another appropriation for buying land at $2,000 an acre that the superintendent thinks can be used for this purpose?

Mr. SMITH of Iowa. It certainly was not.

Mr. OLLIE M. JAMES. I would like to know if the gentleman does not think an amendment, after the word "purposes," in line 2, "incident thereto," would improve it?

Mr. SMITH of Iowa. I do not think so.

Mr. CLAYTON. I suggest this, which would perhaps clear it up: Instead of saying for "certain other purposes," let it read for "like purposes."

Mr. SMITH of Iowa. I am sure that that is what it means now.

Mr. CLAYTON. That would make it more easily understood.

Mr. SMITH of Iowa. I think by legal construction that is what it means now.

Mr. CLAYTON. That would make it certain.

Mr. SMITH of Iowa. I do not think that it would be more certain than it is now.

Mr. OLLIE M. JAMES. Mr. Chairman, I offer an amendment. After the word "purposes," in line 2, page 122, insert the words "incident thereto."

The Clerk read as follows:

Line 2, page 122, after the word "purposes," insert the words "incident thereto."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Kentucky.

The question was taken, and the amendment was agreed to.

Mr. KEIFER. Mr. Chairman, I offer for adoption the following amendment as a continuation of the paragraph just read.

The Clerk read as follows:

At the end of line 6, on page 122 of the bill, add the following:

"And to enable the Secretary of the Interior to pay the National Automatic Fire Alarm Company, of Washington, D. C., for the maintenance of the automatic fire-alarm system now in certain buildings of the Government Hospital for the Insane, placed there by said company under act of Congress March 3, 1903, and a contract between said company and the said Secretary of the Interior, acting for the United States, dated September 17, 1903, there is hereby appropriated out of said sum of $100,000 the sum of $4,634.50, the bills for the same to be rendered by said company and paid monthly: *Provided*, That such changes are made in the installation of said system as have been recommended to the Secretary of the Interior in the report of date of August 18, 1908, of the committee on inspection heretofore appointed by him under said contract, the same to be made before July 13, 1909, to the satisfaction of said committee: *And provided*, That said system is maintained by said company as provided in said contract."

Mr. MANN. Mr. Chairman, I make the point of order on the paragraph. It is not germane to the paragraph to which it is offered as an amendment; it is not an appropriation authorized by law, and it is a change of existing law.

The CHAIRMAN. The gentleman from Illinois makes the point of order.

Mr. KEIFER. Well, Mr. Chairman, if the gentleman will reserve the point of order——

Mr. MANN. I reserve the point of order.

Mr. KEIFER. Although I do not consider that the point of order is well taken.

Mr. MANN. Then let us dispose of the point of order first.

Mr. KEIFER. We have had a little freedom——

Mr. MANN. I will do whatever the gentleman desires to do.

The CHAIRMAN. Does the gentleman from Ohio desire to discuss the point of order?

Mr. KEIFER. I desire to discuss both.

Mr. MANN. I reserve the point of order.

Mr. KEIFER. But I will have a word or two to say as to its being in order. The amendment indicates, if attention were given to it, that there was a contract made, I believe in the year 1903, between the National Automatic Fire Alarm Company and the Government, through the Secretary of the Interior, for the installation in the insane asylum of an automatic fire-alarm system. There was a contract made, and quite a careful one, under which the National Fire Alarm Company installed in this hospital the fire-alarm system now there at a cost of something over $30,000. I have the contract here, and it provides that "after it was installed"—and, Mr. Chairman, on the point of order, as well as stating the history of the matter—"after it was installed it must be maintained by the installing company for a year."

Now, it is conceded that this time would expire on the 13th of July next, after the fiscal year commences. There was to be paid after that time $4,800 annually as a rental for this fire-alarm system. It was a system that was established exactly in accordance with one established in the Treasury building, for which we appropriate in this very bill for its maintenance and care. We have passed the paragraph without objection making an appropriation of $2,625 to maintain the automatic fire-alarm system in the Treasury and Winder buildings in this city.

This same was installed in the hospital for the insane. Some controversy arose about its improper installation, and the Secretary of the Interior conditionally accepted it, but appointed a committee to investigate and see whether or not it was installed in accordance with the contract.

Mr. DAWSON. Will the gentleman yield for a question?

Mr. KEIFER. Let me go a little further along. I want it understood that the Secretary of the Interior made his acceptance under this contract, and made it in pursuance of existing law. He made his acceptance after he had a report from a committee appointed by him to investigate and see whether the fire-alarm system was duly installed.

Mr. DAWSON. I wanted to ask what was the period of this original contract.

Mr. KEIFER. Nineteen hundred and three, as I recollect; but the installation was not completed until some years later.

Mr. DAWSON. What was the length of time it was to run?

Mr. KEIFER. I can not tell how long it is to run, but it has never yet run against the Government. This automatic fire-alarm company has been put to all the expense in establishing it and, so far, in maintaining it. The hospital is now protected by that fire-alarm system without any expense to the Government. The Government has never incurred any expense up to the present time, and it is not to incur any until this contract becomes effective, and after a year's maintenance at the expense of the company, which will not be until the 13th day of July next, and after the next fiscal year has begun.

Mr. MANN. Will the gentleman yield for a question?

Mr. KEIFER. Oh, yes.

Mr. MANN. Does the gentleman claim that the bill for this work has been audited?

Mr. KEIFER. It is not audited, because it has not accrued. The Government's liability will not commence until after the 13th day of July, 1909, and then under a written contract, by which there was to be paid $4,800 a year after the system was established and maintained one year.

Mr. DAWSON. For how many years?

Mr. KEIFER. I was going to say that there is some provision about that, but I can not for the moment answer it. Perhaps some member of the committee can. But that explains why this appropriation does not call for $4,800. A full year's rent will not accrue in the next fiscal year.

Mr. FINLEY. Has the gentleman from Ohio any information as to whether or not this is an efficient system?

Mr. KEIFER. Undoubtedly it is. I am coming to that. The system is efficient. It is used in nearly all the principal cities in this country. It is now in full operation in the Treasury Department in this city, and entirely satisfactory. But there was some claim that this fire-alarm system was not carefully installed in this hospital building, and the Secretary of the Interior appointed a committee consisting of A. B. James, of Baltimore; J. B. Hench, of the Signal Service, and M. R. Woodward, electrical engineer, of the Navy Department, accomplished engineers, and they made a report which is dated August 18, 1908.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. KEIFER. I should like to have five minutes more in which to explain this.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. KEIFER. I wanted to read the latter paragraph of that report to the Secretary of the Interior. It says:

In conclusion, your committee report that the installation performs the required functions, and respectfully recommend that after compliance with the foregoing recommendations it be accepted.

This shows the efficiency of the system.

Now, Mr. Chairman, if you have the amendment before you, you will see that it shows that the Secretary did accept it only subject to complying with certain provisions recommended in this report made to him by a commission of his own; and it also provided in the amendment that the rental is not to be paid until the fire-alarm system is perfected, and that must be done, as the amendment recites, before the 13th day of July, 1909, and in accordance with that report. That is carefully provided for in this amendment.

In other words, the rental is not, as the amendment provides, to be payable unless this installation is made to the satisfaction of the Secretary of the Interior.

Mr. FINLEY. I wish to ask the gentleman from Ohio if he remembers the statement of Doctor White, on page 534 of the hearings, where he says:

So far as I know, nobody has accepted it; and whether it has been accepted or not, it is not of any use to us at all.

Mr. KEIFER. We understand that perfectly.

Mr. BUTLER. Who is Doctor White?

Mr. KEIFER. Doctor White is the man who has got into some trouble with one of these parties, and he made the statement, as the gentleman says. But let me read from a communication to the National Automatic Fire Alarm Company a single paragraph. This is from the Secretary of the Interior, James R. Garfield, a communication dated November 25, 1908.

After speaking of various things, he says:

I have therefore to advise you that the plant will be accepted as of July 13, 1908, subject to the year's maintenance provided by contract, during which time the company will be required as a condition of such

acceptance to complete, with the recommendation of the committee, that portion of the wiring in the tunnel which is now weatherproof in wooden molds and junction boxes throughout the system by replacing by more substantial installation.

There is the written acceptance of the Secretary of the Interior, and this amendment has in view that this was accepted as of July 13, 1908. Under the contract, however, the National Automatic Fire Alarm Company was to have no pay for the first year after the system was installed. The company is to maintain it for nothing, and now this amendment is to give them up to the expiration of the year referred to in the acceptance, which is July 13, 1909, and the proposition is to pay the rental which would accrue from that date to the end of the fiscal year.

The CHAIRMAN. Does the gentleman from Ohio think that this is in order on the sundry civil bill?

Mr. KEIFER. I do. Perhaps the clause to which this is proposed to be attached would not be in order, but no objection was made to that, and therefore it becomes in order to amend it. It belongs here, because it is a proper provision to carry out the existing law and the existing contract made in pursuance thereof; and it would be exceedingly unjust to this company, after it has expended of its own money over $30,000 in installing this system, after it has protected these people in this asylum up to the present time, and will up to the 13th of July, at no expense to the Government—I say it would be unjust not to make this provision. It is proposed to simply pay, provided that the Secretary of the Interior is satisfied and his conditional acceptance is complied with; the amendment puts it upon the Secretary of the Interior to see that it is complied with in the perfecting of the installation, but the money is not payable until that time. So I claim on all grounds it is in order.

Mr. MANN. I make the point of order, Mr. Chairman.

The CHAIRMAN. The Chair is prepared to rule.

Mr. MANN. I would like to call to the attention of the Chair that the amendment is not germane to the paragraph. The paragraph provides for the centralizing of the power, heating, and lighting plant, and so forth, and has no relation whatever to a fire-alarm system.

Mr. KEIFER. This paragraph does relate to the remodeling the electric lay out, and it is fairly in order in pursuance of law.

Mr. MANN. This is no part of the electric lay out of the hospital; and in addition to that fact, the amendment is not only for a claim which has never been allowed under a contract where there has been no acceptance of the work, but it contains a number of legislative provisions in reference to that claim.

Mr. KEIFER. Mr. Chairman, I can not allow that statement to go unchallenged, because the Secretary of the Interior, in a written letter already mentioned, has accepted the installation of this system, and now, after having a full report by the board of his own appointment, he recommends that it should be accepted, and it has been done, and the time has not come to present a claim. There is no claim.

Mr. MANN. If there is a contract and it has been approved and accepted, then if it is anything it is a deficiency appropriation and has nothing to do with the sundry civil appropriation bill.

Mr. KEIFER. It can not possibly be a deficiency, because there is not a dollar of it due, and will not be due until after the expiration of the present fiscal year.

The CHAIRMAN (Mr. WATSON). The Chair is entirely satisfied on this proposition. The Chair does not believe the amendment proposed by the gentleman from Ohio is in order. It is in the nature of a claim that has not been allowed.

Mr. MADDEN. Mr. Chairman, I rise for the purpose of making a motion to reconsider the vote by which the paragraph on page 119, from line 5 to line 11, was adopted with an amendment making an appropriation of $10,000 for the payment of game wardens in Alaska. The purpose I have——

Mr. SMITH of Iowa. Mr. Chairman, I want to make a point of order against that motion before the gentleman states his purpose.

Mr. MADDEN. I will ask the gentleman to withhold his point of order.

Mr. SMITH of Iowa. I reserve the point of order.

Mr. MADDEN. My purpose, Mr. Chairman, in making the motion for reconsideration of this vote is this: When the discussion of the question was up before the committee I suggested it might be proper to postpone its consideration because of the absence of the Delegate from Alaska.

The suggestion was not concurred in by the committee. The Delegate from Alaska is here now; and because of the fact that he can not make a motion to reconsider and does wish to state the facts as he understands them to the committee, I ask the committee to give the Delegate from Alaska an opportunity now to do so. I ask unanimous consent that the Delegate from Alaska be given an opportunity to state his side of this case for ten minutes.

Mr. TAWNEY. Oh, make it five.

Mr. MADDEN. The committee was very solicitous to postpone the consideration of other matters in this bill because of the absence of other members of the House, and there is no reason why the Delegate from Alaska should not be given similar consideration.

Mr. SMITH of Iowa. Mr. Chairman, everybody agrees to ten minutes provided we do not go back to that portion of the bill.

Mr. MADDEN. But we have a right to make a motion to reconsider.

The CHAIRMAN. The Chair will state to the gentleman from Illinois that it is not in order to move to reconsider in Committee of the Whole House on the state of the Union, proceeding on the theory stated in Jefferson's Manual, that this will not be the last opportunity to amend, because, after we get back in the House, if there is anything in the bill that ought not to be there, it can be stricken out in the House.

Mr. MADDEN. I ask unanimous consent that the Delegate may proceed for ten minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the Delegate from Alaska may address the committee for ten minutes. Is there objection? [After a pause.] The Chair hears none. The Delegate from Alaska is recognized. [Applause.]

Mr. CALE. Mr. Chairman, I expected to be present at the time this question came up, but I happened to be away, and for that reason I was not here, of course. [Laughter.]

Mr. BONYNGE. The gentleman had a long distance to come—from Alaska.

Mr. CALE. Yes; but here is the idea: There is a game law enacted especially for Alaska. It is a law that never ought to have disgraced the statute books of the United States. It is a foolish law to begin with, but still we have that law. Now, the question is this: Can we by $5,000 enforce that law? I say no, you can not; nor can you enforce that law with $10,000 nor with $50,000. Increasing the amount from $5,000 to $10,000 simply means that we are squandering $10,000 instead of $5,000. [Applause.] We have a coast line there of over 2,000 miles to police in order to enforce that game law, and it is because of that, by increasing the appropriation from $5,000 to $10,000, that I assert that it is simply squandering $10,000 instead of $5,000. It ought not to be so. You are placing in the hands of the governor of Alaska this $10,000, and he can appoint one single, solitary individual and give him $10,000 a year.

Mr. HUMPHREY of Washington. Will the gentleman yield?

Mr. CALE. Yes.

Mr. HUMPHREY of Washington. I would like to ask the gentleman if the discovery of the fact in the law that the governor had the power to appoint these game wardens is not what caused the gentleman to oppose this amendment?

Mr. CALE. Largely that is true; yes, that is true.

Mr. HUMPHREY of Washington. I want to ask the gentleman another question. I will ask the gentleman if he did not talk to me, not later than to-day, and at that time state that he was in favor of the amendment, and if he did not say to me that he would speak in favor of it?

Mr. CALE. Oh, no; I beg the gentleman's pardon. I told him to-day that I was opposed to the amendment as long as the governor had the expending of this $10,000.

Mr. HUMPHREY of Washington. The gentleman's opposition to the bill is not because he does not think the money ought to be appropriated, but because he does not think the governor will use it properly?

Mr. CALE. Both ways. Let me say to the gentleman from Washington, whom the people in Alaska have always regarded as one of our best friends—and I say that with all sincerity—that the reason why I oppose the increase in the appropriation is because, whether it is $5,000 or $10,000, it is money squandered and wasted.

Mr. HUMPHREY of Washington. May I ask the gentleman another question? I desire to ask the gentleman if he does not think that the amount of $10,000 could get a game warden at Fairbanks, Seward, Seldovia——

Mr. CALE. The gentleman knows, under the provision here, there is no limitation as to how many game wardens you are going to appoint.

Mr. HUMPHREY of Washington. But will the gentleman let me finish my question?

Mr. CALE. If the gentleman will hurry up, I will.

Mr. HUMPHREY of Washington. I want to ask whether or not the gentleman does think with $10,000 you could appoint

a game warden, so as to give one to Fairbanks, one to Seward, one to Seldovia, one to Kodiak, and one at Sand Point, so as to cover the main points where people come in and out?

Mr. CALE. What assurance has the gentleman that they will be appointed at those places?

Mr. HUMPHREY of Washington. I mean if the money be properly used.

Mr. CALE. But there comes the question. I understand that the governor of the Territory went before the Committee on Appropriations and made the statement that $5,000 was sufficient to enforce the law.

Mr. TAWNEY. I will say the governor of Alaska was never before the Committee on Appropriations——

Mr. CALE. Then, I beg pardon. I was misinformed.

Mr. TAWNEY. The estimate was for $10,000, as I now recall, and the Committee on Appropriations reduced it to $5,000 without any information at all.

Mr. CALE. I understood the governor went before the committee. I was misinformed and beg pardon.

Mr. KIMBALL. I would like to ask the Delegate from Alaska if it is not a fact the governor of Alaska spends practically all of his time in Washington when Congress is in session?

Mr. CALE. I wish to say to the gentleman—I do not remember what State he is from——

Several MEMBERS. Kentucky.

Mr. CALE. I wish to say to the gentleman from Kentucky if the governor of Alaska stayed in the Territory and attended to the executive duties of his office instead of coming down here and being a lobbyist and fighting and opposing every measure that the Delegate proposes, whom the people of Alaska elected to come down here and speak for them, he would be thought a great deal more of and not be held in such disrepute in the Territory as he is. [Applause.] He has come down here and simply settled down as a sort of third-grade lobbyist. [Laughter and applause.] Now, the reason why I oppose this increase in the appropriation is from the fact that instead of placing $5,000 in the hands of a man who has always misrepresented and who has maligned the people of Alaska Territory, you are placing $10,000 in his hands, and I am opposed to it.

Mr. ROBINSON. Will the gentleman yield for a question?

Mr. CALE. Yes.

Mr. ROBINSON. I would like to ask the Delegate from Alaska, in his opinion what amount would be necessary to enforce this game law?

Mr. CALE. Upon my word, to be honest and sincere and candid with the gentleman, it would take $100,000 to do it. You have a coast of over 2,000 miles to protect and enforce the game law. You might as well talk about how much it would take to protect the coast from Florida to the State of Maine.

Mr. ROBINSON. And even the appropriation of $10,000 is totally inadequate, in the gentleman's opinion, to accomplish any good purpose?

Mr. CALE. It certainly is.

A MEMBER. Doubly useless.

Mr. GAINES of Tennessee. Was this law enforced better when Secretary Wilson enforced it than since the governor took charge of it?

Mr. SULZER. It was not enforced before, and it is not enforced now. If the law is to be enforced, this appropriation of course is entirely inadequate.

Mr. GAINES of Tennessee. Wait a minute; I have heard enough from people here who did not know anything about this. [Laughter.] I want to hear those who really know.

Mr. SULZER. Of course it is impossible to give the gentleman from Tennessee any information.

Mr. GAINES of Tennessee. The Secretary of Agriculture had it in charge for sometime, and then we changed the law and gave it to the governor.

Mr. CALE. I beg your pardon; this law was enacted only a year ago.

Mr. GAINES of Tennessee. About a couple of years, I think; all right, a year ago. Now, can you compare the two administrations?

Mr. CALE. Yes.

Mr. GAINES of Tennessee. Which is the better?

Mr. CALE. The one prior to this late law.

Mr. GAINES of Tennessee. Of course old man "Honest Jim" Wilson enforced it all right.

Mr. SHERLEY. Will the gentleman yield for a question?

Mr. CALE. I certainly will.

Mr. SHERLEY. I have understood that some of the natives have been arrested and imprisoned—or at least fined, if not imprisoned—for shooting game, where they depended upon it for their means of sustenance?

Mr. CALE. That is true.

Mr. SHERLEY. It seems to me a very cruel policy for the National Government to imprison or fine natives, situated as they are, for getting food to live on by killing wild game.

Mr. CALE. The gentleman is entirely correct. Let me state further, for the information of the gentleman and the committee, that, under the law, a person can go out prospecting on the hills and when in need of meat he can kill a moose.

He can take a slice or two off of it, but he can not take the balance of it down in order to sell it in the market. The result is that after slaughtering the moose all he can get is one or two meals out of it, when if he were permitted, which he is not, to take the carcass down, he could get $500 or $600 for it. But under the law he is prohibited from doing that. If a prospector who is in the hills was permitted to take it down, he could get $500 or $600 out of it, which he could put in an outfit which would enable him to pursue his prospecting——

The CHAIRMAN. The time of the gentleman has expired.

Mr. GAINES of Tennessee. I ask that the gentleman be allowed ten minutes in which to finish his speech.

Mr. CALE (continuing). But he lets it lie there and rot.

The CHAIRMAN. The time of the gentleman from Alaska has expired.

Mr. MACON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Tennessee [Mr. GAINES] has asked unanimous consent that the gentleman from Alaska be permitted to proceed for ten minutes. Is there objection?

Mr. TAWNEY. The gentleman from Alaska himself does not ask for it. So I object.

Mr. MACON. I move to strike out the last word.

Mr. OLLIE M. JAMES. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. OLLIE M. JAMES. I understood that unanimous consent had been requested, and the Chair was to put that question to the House, to return to this section, in order to perfect it, and in order that we might pass upon that question in the light of the information we now have.

The CHAIRMAN. The Chair will state to the gentleman from Kentucky [Mr. OLLIE M. JAMES] that it is not in order to move to reconsider in the Committee of the Whole House on the state of the Union.

Mr. OLLIE M. JAMES. The point of inquiry I made was whether or not it was in order to ask unanimous consent.

The CHAIRMAN. It is in order to ask unanimous consent.

Mr. OLLIE M. JAMES. Then I ask unanimous consent that we return to that section to which the amendment was adopted, in order that the committee, in the light of the information it now has from the Delegate from Alaska, may pass upon that question intelligently. [Applause.]

The CHAIRMAN. The Chair will state to the gentleman from Kentucky that at the outset the gentleman from Iowa [Mr. SMITH] objected to returning to the proposition in question. The Chair will again state, however, the proposition to the committee.

Mr. GRAHAM. It was objected to.

Mr. HUMPHREY of Washington. I objected, too.

The CHAIRMAN. The gentleman from Washington objects. Does the gentleman from Iowa [Mr. SMITH] object now to the gentleman's motion?

Mr. HUMPHREY of Washington. I object.

Mr. CALE. I hope the gentleman from Washington will not object.

Mr. HUMPHREY of Washington. I have already objected.

The CHAIRMAN. The gentleman from Washington objects, and the Clerk will read.

Mr. MACON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The last word of what?

Mr. MACON. Of the last paragraph read.

Mr. Chairman, the increase of this appropriation from $5,000 to $10,000 is another evidence of the disposition of the membership of this House to raid the Treasury of the United States without proper information as to what they are raiding it for.

The other day when we were considering bills upon the Private Calendar, with a right to object, some of us saw fit to object to some of those bills, and some of the Members of this House criticised us because we did it. They even criticised us because we tried to find out the merits of the measures then under consideration. During that very day, when we were criticised for our action in trying to find out the particular merits of each bill as it was presented here, we passed a bill appropriating more than $4,000 for payment for cotton that was taken from a citizen of my own State just after the war.

It was a Senate bill, and it was permitted to pass without proper investigation as to the facts in connection with the case; and after the bill was passed and sent to the President it was disclosed that the owner of the cotton received pay for his loss more than forty years ago.

I only refer to this, Mr. Chairman, to show that we ought to be very careful about exploiting the revenues of the Government when they are so low without proper investigation. We ought to be very careful in our investigations and not hastily make or enlarge appropriations; not hastily make them simply because this or that gentleman thinks they ought to be made. I have no interest in the matter except in common with you all. I am only one of the 392 Members of this House. I call your attention to this, because it is a clear act of having increased an appropriation without proper information. The Delegate from the district that we are making the appropriation for says that it is absolutely unnecessary and a squandering of just that much money. I desire to emphasize the point as much as I can, that we ought to be careful about what we are doing when legislating for the good of the whole country.

Mr. CARTER. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment.

The Clerk read as follows:

Page 122, line 6, insert after "improvement of Platt National Park," "payable out of the funds in the hands of the Secretary of the Interior to the credit of the park, $16,000, to be expended as follows: For repairs of roads and bridges, $500; for a stone culvert at Sulphur Run, near Pavillion Springs, $500; for construction of a sanitary sewer with laterals to connect with others, connecting with the sewer system of the city of Sulphur, $15,000; provided the municipality of Sulphur expend in the construction of said sewer system through the park an equal amount."

Mr. CARTER. I will state that this does not carry any additional appropriation. It simply sets forth the amount of money which shall be spent, now in the hands of the Secretary of the Interior. The funds of this park have not been handled just the same as other park funds. No appropriation has ever been made for this park, but it has been sustained by the proceeds of the sale of certain improvements located on the land when the park was purchased; consequently, it has not been necessary to submit the expenses to the Committee on Appropriations. This amendment will exhaust the $25,000 now in the hands of the Secretary of the Interior to the credit of that park during the next fiscal year, which will include salaries of about $9,000, as I understand it. It necessitates no new appropriation, but simply puts the park on the same basis as other national parks. I hope there will be no objection to the amendment.

The CHAIRMAN. The question is on the amendment proposed by the gentleman from Oklahoma.

Mr. TAWNEY. Where is this amendment offered? As I understand, it is not offered at the proper place.

Mr. CARTER. After line 6, page 122.

Mr. TAWNEY. We have not reached the parks.

Mr. CARTER. We have reached the parks under the Department of the Interior, and I presume this would come under the Interior Department. If the chairman of the committee would like to have me wait until items for "Improvements of parks" under the War Department is reached, I should be very glad to follow his suggestion.

Mr. TAWNEY. You will have to put it in on page 120.

Mr. MANN. This would come into the insane asylum, and that would be a crazy thing to do.

Mr. TAWNEY. It should be in line 21, page 120.

Mr. CARTER. I ask unanimous consent to withdraw the proposed amendment at this point and insert the same language after line 21, page 120, and as a new paragraph.

The CHAIRMAN. The gentleman asks unanimous consent that the amendment be considered as coming after line 21, page 120. Is there objection? [After a pause.] The Chair hears none.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Howard University: For maintenance of the Howard University, to be used in payment of part of the salaries of the officers, professors, teachers, and other regular employees of the university, the balance of which shall be paid from donations and other sources, of which sum not less than $1,500 shall be used for normal instruction, $49,000.

Mr. BARTLETT of Georgia. I desire to reserve a point of order on this paragraph, to make an inquiry in reference to it. I notice that the estimates for this institution are only $45,000. I notice also that we have appropriated $49,000, and also that on the next page we appropriate $90,000 for a building. Now, I should like to inquire of the gentleman from Minnesota [Mr. TAWNEY], chairman of the committee, what is the authority of law for the appropriation of $49,000, or of $90,000 carried in this bill for the new building?

Mr. TAWNEY. I will say to the gentleman that I do not know that there is any authority of law for the appropriations that have been made by Congress for a great many years for the maintenance of this institution.

Mr. BARTLETT of Georgia. About fifteen years, I think.

Mr. TAWNEY. The institution was founded in 1867.

Mr. BARTLETT of Georgia. Not by the Government.

Mr. TAWNEY. Under the Freedmen's Bureau. The original farm, together with the buildings of Howard University, are now valued at a million dollars. This institution was founded by Gen. O. O. Howard, after whom it was named. It is sustained and supported almost entirely from the Federal Treasury and private donations made by philanthropic people throughout the country. It is the only institution in the United States where the people of the colored race have an opportunity of acquiring a medical education. They are not admitted to any medical school either in the North or in the South, and it has been the general policy of Congress for many years, or ever since the institution was founded, to contribute from year to year from the General Treasury to the maintenance of this institution.

Mr. BARTLETT of Georgia. I should like to ask the gentleman whether or not there is an institution of like kind in this city for the education of white people for which we appropriate money?

Mr. TAWNEY. This is not for the education of the colored people of the District of Columbia, but the colored people of the United States. People are admitted to this school from all over the United States. They here obtain their education in medicine and surgery; and, as I said before, it is the only institution of the kind in the United States where the colored people have an opportunity of acquiring this education.

Mr. BARTLETT of Georgia. I reserved the point of order to get the information that I have obtained from the gentleman from Minnesota. Having gotten it, I want to say that I realize that this is a mere gratuity, beginning in small amounts, and I am not disposed to make the point of order against a part of the appropriation.

Mr. TAWNEY. I want to say to the gentleman from Georgia further that the institution was incorporated by act of Congress and is nominally under the control of the Secretary of the Interior.

The institution reports annually to the Secretary of the Interior, and the estimates for appropriations are submitted by the Secretary of the Interior.

Mr. BARTLETT of Georgia. But the gentleman will observe that the committee have appropriated more than was asked for. On page 535 of the hearings the estimate was made for $45,000, and you have appropriated $49,000. There is something plaintive in the appeal that the chairman of the committee made to the witness before the committee, on page 537 of these hearings, in which he says:

This committee is embarrassed very much on account of the present condition of the Treasury. In order to meet this appropriation, if it is allowed, the Government will probably have to borrow the money. The Government unquestionably will have to borrow money, we hope not before the end of this fiscal year, but by that time, to meet the ordinary expenses; and I want to ask whether, under those circumstances, it would be possible for your institution to get along without serious detriment during the next fiscal year and to postpone this science hall for one year?

Now, there is a suggestion of economy in the air, economy everywhere, but this institution, it appears, gets nearly $5,000 more than the estimates; and in addition——

Mr. TAWNEY. The total estimate is $165,800.

Mr. BARTLETT of Georgia. I am speaking about this item.

Mr. TAWNEY. That includes the estimates for Science Hall. The total amount recommended in this bill is $162,200. The gentleman will therefore see that we recommend less than the actual estimates.

Mr. BARTLETT of Georgia. But the gentleman will realize that this is nearly $100,000 more than this item in the appropriation bill of last year. I am not going to make a point of order on this provision, but I am going to make it against the $90,000 building.

Mr. EDWARDS of Georgia. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Strike out the paragraph beginning on line 15 down to and including line 21.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia.

Mr. GARDNER of Michigan. Mr. Chairman, I hope the Members in this House will not indorse that proposition. This is the only institution of its grade for a people numbering 10,000,000 souls. This institution has grown from 500 to now

almost 1,200 pupils. We can not afford to deprive the colored man of this opportunity to develop leaders for his race. We have one leader of that race of whom it was said the other night in New York by the man who will be officially the first citizen of the Republic a week from to-day, "If it took one hundred years to educate one Booker Washington, it would pay to educate the colored race." [Applause.] That man is a leader.

Howard University is the one institution receiving support from the Government that is designed to educate men who will lead out and encourage and inspire these unfortunate people to a higher and better future.

During the last forty years the graduates of the colored institutions of collegiate grade in this country have numbered, on an average, but 75, giving 7 or 8 graduates of that race to a million of people.

We can not pay the debt in dollars and cents that the negro race has put us under obligation for in the centuries of the past in this country.

Let us not deprive these people of this institution when we are doing three times as much for the education of the Indian, per capita, as we are giving for the education of the colored man. These people are among us, they are of us, we can not eliminate them. They are a part of our civilization; they are a part of our society; they are a part of our Government; they are a part of our politics; they are a part of our religion. They come into our homes as nurses for our children, as cooks in our families, and as servants generally; they mingle with us in various relations in life. Let us lift them up and do what we can for them. I hope the amendment will not prevail. [Applause.]

Mr. MADDEN. Mr. Chairman, the Howard University, the institution against which this amendment is directed, is one of the greatest educational institutions in America. Many of the men who are graduates of this institution live in the State from which I hail. They are among the most brilliant men in the professions; they are a credit to their race. They do credit to their American citizenship. They are liberty loving and patriotic. A vote to eliminate this appropriation would be a vote against giving an opportunity for the education of a people which it should be our highest duty to assist. We should give them every possible opportunity for advancement, help them in every way we can to meet their responsibilities as citizens and enable them to compete with their fellow-citizens in the struggle for existence. Every lover of liberty will agree that this country should do what it can to elevate to the highest plane of citizenship every man, woman, and child under the protection of our flag, no matter what the color of their skin may be. I sincerely hope that no vote will be cast to-night for the adoption of this amendment. [Applause.]

Mr. FITZGERALD. Mr. Chairman, I hope this amendment will not be adopted. It is important that the House should understand the relation that this institution bears to the Freedmen's Hospital, and also its importance not only to the colored people of the country, but also to the white people of the country. The testimony before the committee is to the effect that tuberculosis is making terrible ravages among the colored race of this country. Not only is it important to the people of that race that everything possible be done to check the ravages of this disease, but it is of the utmost importance to the people of the white race, wherever the colored people reside, that the colored people shall have this disease checked for the protection of the whites.

The Howard University was started in 1867. It has an endowment, invested, of $173,000. The graduates of the medical school receive their further training and instruction in the Freedmen's Hospital, which is entirely under the control of the Secretary of the Interior. The training that these colored physicians receive there is of immense benefit to the people of both races. I believe that it would be a great misfortune to the people of the country, regardless of race, if anything were done to prevent either the hospital or the university carrying out the work that can be carried out to the fullest extent possible.

Mr. BARNHART. Will the gentleman yield for a question?

Mr. FITZGERALD. I will.

Mr. BARNHART. Mr. Chairman, It seems to me by way of introduction to my question that the air can easily be cleared in this matter if some member of the committee would answer the question which has been asked repeatedly, as to why the amount of this appropriation is raised from what was originally asked, $45,000, to $49,000.

Mr. FITZGERALD. Mr. Chairman, I think that is an error in connection with the two appropriations. The next item carries $90,000 for a new hall of science. During the past few years the colored students have been driven out gradually from the medical schools and the preparatory schools throughout the country. Within the past two years the number of students has increased from 212 to 469. This hall of science, with its equipment, it is expected will cost, not $90,000, but from $120,000 to $130,000, and those who are actively occupied with the work of the institution expect that if Congress appropriates the $90,000 it will be possible, by the donations made by private individuals, to make up the additional sum required. Mr. Chairman, this is not the only institution in the District of Columbia not under government control where the Government contributes to maintenance and support. The Garfield Hospital and Providence Hospital both have been beneficiaries of the Government's generosity.

Mr. BARNHART. Mr. Chairman——

The CHAIRMAN. Does the gentleman yield?

Mr. FITZGERALD. I do.

Mr. BARNHART. Mr. Chairman, I insist that my question has not been answered. I hope to make myself clear when I say that I want the question answered for my own information as well as for many about me. We want to know why it is that the appropriation originally asked for, $45,000, has been raised to $49,000?

Mr. WEBB. Mr. Chairman, I think I can answer the gentleman's question, if the gentleman from New York will yield. That is because the college wants three new professors to do increased work, as shown by the hearings, and these three new professors will cost $1,500 each.

Mr. TAWNEY. I would say to the gentleman from Indiana [Mr. BARNHART] that the estimate was $49,200, and the amount recommended is $49,000.

Mr. FITZGERALD. Mr. Chairman, an error was made in stating that the appropriation is larger than the estimate. The appropriation for the current year is $45,000. The estimate for the next fiscal year is $49,200, and the committee recommended an appropriation of $49,000, less, not more, than the estimate.

Mr. BARNHART. Mr. Chairman, that is a satisfactory explanation.

Mr. FITZGERALD. The detailed statement submitted to the committee shows that additional instructors are required in order to carry on properly the work of the institution. In this connection the explanation that was made convinced me of the necessity for the increase. I have no prejudice against or bias in favor of the institution. The explanation convinced me that the work was one that should be carried on in the interests of the people of both races. It is an unfortunate thing that gradually the members of the colored race are being excluded from all institutions, which prevents their being educated either as physicians or pharmacists. They are required throughout the country, and I think it would be ill advised to do anything that would prevent the education of them along these lines.

Mr. CAMPBELL. The Chairman——

The CHAIRMAN. The gentleman from Kansas.

Mr. EDWARDS of Georgia. Mr. Chairman——

The CHAIRMAN. The Chair has recognized the gentleman from Kansas.

Mr. TAWNEY. Mr. Chairman, I understand the gentleman from Georgia withdraws his amendment.

Mr. EDWARDS of Georgia. Mr. Chairman, I have gotten the information I desired and I withdraw the amendment.

Mr. SIMS. Mr. Chairman, I renew it simply to make a statement.

Mr. CAMPBELL. But I have the floor.

Mr. SIMS. This is a new motion.

The CHAIRMAN. Regardless of whether it is a new motion or not, the Chair has recognized the gentleman from Kansas.

Mr. WILLIAMS. What question is before the House?

The CHAIRMAN. There is no question before the House.

Mr. WILLIAMS. Then the Chair can not recognize the gentleman from Kansas.

Mr. CAMPBELL. Mr. Chairman, I yielded to the gentleman from Georgia for the purpose of withdrawing his motion to strike out the amendment.

The CHAIRMAN. And the gentleman withdrew his amendment.

Mr. WILLIAMS. There is now no question before the House, as I understand.

Mr. CAMPBELL. I am glad the gentleman has seen fit to withdraw his motion.

Mr. SIMS. Mr. Chairman, I move to strike out the last word simply to make a statement in this connection. I was very sorry, until the gentleman from Georgia explained himself, that he made the motion. This motion gives gentlemen who want to do so an opportunity to make impassioned speeches, so that it will appear to the colored people in the North that their

defenders are all on the other side, and that those who attack them are all on this side.

I am very glad the gentleman from New York rose to straighten out the matter. The facts are, as we all know who have investigated the matter, that one-half of all the public-school charges in the District of Columbia are paid out of the National Treasury. One-half of all colored public school expenses are paid by the general taxpayers of the United States—the North, South, and all alike—and we are making no complaint about it. Down South 75, 80, or, perhaps, 90 per cent of all the taxes to educate the negro race are paid by the white people. They do it cheerfully, they make no complaint about it, they are making no kick and certainly get no political capital out of it. I say such a motion coming from this side is always unfortunate; it is taken advantage of by some gentlemen on the other side, when, in fact, there would not have been a half dozen votes in favor of it if the gentleman himself had not withdrawn the motion as soon as he understood the matter.

Mr. MANN. I think we all would have voted for it. [Laughter.]

Mr. SIMS. Now, let me read a letter to the committee while gentlemen are talking about discrimination against the colored man. I want to read you a letter I received a few days ago, and I suppose you all received a similar one, and as it is a public letter I am giving out no secret:

[Maj. Gen. J. Franklin Bell, U. S. Army, grand marshal; Brig. Gen. John A. Johnston, chief of staff; and Maj. Samuel D. Sturgis, General Staff, U. S. Army, adjutant-general. Committee on civic organizations: Thomas P. Morgan, chairman, marshal civic division; William T. Galliher, first vice-chairman; Walter H. Klopfer, second vice-chairman; and Alan O. Clephane, secretary, Adams Building, 1335 F street NW.]

INAUGURAL PARADE, MARCH 4, 1909.
HEADQUARTERS OF THE GRAND MARSHAL,
ROOM No. 221, WAR DEPARTMENT,
Washington, D. C., January 26, 1909.

Hon. THETUS W. SIMS,
House of Representatives, Washington, D. C.

DEAR SIR: Referring to this committee, permit me to tender to you the privilege of nominating a suitable (white) person for the position of mounted aid to be assigned to the civic division of the inaugural parade, with the understanding that the horse equipment used will conform to that required by the regulation, which will be issued by the grand marshal.

Mr. MANN. Did the horse have to be white, too?

Mr. SIMS. No; but it limits the rider to a "white person."

Mr. MANN. Then, that means a red horse.

Mr. SIMS. No; there is not a word about the color of the horse.

It will also be a part of the regulation that each aid furnish his own mount without expense to the inaugural committee.

Kindly inform us at your earliest convenience whether or not it is your desire to present a name for such appointment.

Very truly, yours,

THOS. P. MORGAN, *Chairman.*

Mr. BUTLER. I want to ask the gentleman a question——

Mr. SIMS. In a moment. This is an invitation by the inaugural parade committee to inaugurate a Republican President from Ohio, from the State of Salmon P. Chase, William McKinley, and last, but not least, of William H. Taft, in which it does not want and will not permit a Member of this House to designate a colored man to ride in that procession. [Applause on the Democratic side.]

Mr. CAMPBELL. Does the gentleman from Tennessee want to name one from his district?

Mr. SIMS. I do not.

Mr. CAMPBELL. Then, why does the gentleman complain?

Mr. SIMS. I suppose they meant this to apply to all gentlemen to whom it was sent. I know they did not intend it for me specially. [Applause.]

Mr. CAMPBELL. The "gentleman from Kansas" does not remember having received that letter.

Mr. SIMS. Here it is, and I had supposed that all Members got one exactly like it.

Mr. Chairman, I am not intending any criticism of the inaugural parade committee. I commend it for the boldness shown and good taste manifested.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. SIMS. Mr. Chairman, I will ask for five minutes to answer questions that have been asked me.

Mr. TAWNEY. Mr. Chairman, I demand the regular order.

Mr. MANN. If the gentleman has finished his speech——

Mr. SIMS. I have.

The CHAIRMAN. The gentleman from Minnesota demands the regular order, which is the reading of the bill.

The Clerk read as follows:

For scientific building and equipment, in addition to donations therefor, $90,000.

Mr. BARTLETT of Georgia. Mr. Chairman, I make the point of order upon the paragraph contained in lines 3 and 4, page 123.

The CHAIRMAN. The gentleman from Georgia makes the point of order. The gentleman will state his point.

Mr. BARTLETT of Georgia. That there is no authorization for any such construction of the building.

Mr. TAWNEY. Mr. Chairman, I do not intend to make any argument against the point of order; the Chair will have to decide the question.

Mr. BARTLETT of Georgia. I will reserve the point of order if the gentleman wishes it.

Mr. TAWNEY. This building is a part of this institution which the Government of the United States is maintaining or has contributed to its maintenance for a number of years. The necessity for it has been stated by the gentleman from New York, and if that is not sufficient to satisfy the gentleman from Georgia, I can not add anything to it that will convince him that this appropriation ought to be made.

Mr. FITZGERALD. This university ceded to the Government 11 acres of ground upon which is erected a freedman's hospital. Both institutions are conducted together and are essential to each other.

Mr. BARTLETT of Georgia. I desire to say that I have the hearings in reference to that, and that does not appear, as I now recall it, in the hearings.

Mr. FITZGERALD. I will read from the report of the university.

Mr. KEIFER. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Ohio [Mr. KEIFER] desire to be heard on the point of order?

Mr. BARTLETT of Georgia. I make the point of order.

The CHAIRMAN. Does the gentleman from Ohio want to be heard on the point of order?

Mr. KEIFER. I do. As I understand, the point of order is made on the claim that this is new legislation.

Mr. BARTLETT of Georgia. Not authorized by law.

Mr. KEIFER. That this provision is not authorized by law. It is one paragraph of a number of paragraphs in the bill that are all connected together. If it is in order in part of it, and a point of order is made against any other portion, this is in order; but it is in order on another ground, namely, that this Howard University was established and put in operation more than forty years ago. What is proposed by this appropriation of $90,000 for a science hall is to add something to what we have already commenced, to wit, the establishment of Howard University. Originally this university was conducted in smaller buildings, and from year to year it has been improved and enlarged. Originally there were but a few students. While at first it had less than three hundred, now it has about twelve hundred, and we are simply providing for the institution everything that was authorized by law in the beginning.

We are increasing, it is true, the expenditures. The university desires and needs additional room, and that is the object of the appropriation of $90,000. It is in a sense a work we have already commenced, and we are simply adding to it. The apparatus that is there, the various provisions for equipment, are not sufficient for the twelve hundred students now in that institution, and now we are going to say that we will strangle the university by refusing to carry out the enterprise of building up a great university for medical students and others. We have furnished now to that great institution of the South, that one established and built up by Booker T. Washington, about all of his teachers. They come principally from Howard University. We have established there a president and professors, and they have gathered, as authorized, a large number of students, and now we say that we can not improve the institution by enlarging it to meet its requirements at all, for the reason that we did not provide by law forty years ago that at this time we could enlarge the institution. It is a work that we commenced long ago, and we are now only supporting and simply building it up. We have as much right to increase the size of the buildings, to improve the halls, and all that, as we had to start it, and we are simply carrying out the object of the institution.

Mr. OLLIE M. JAMES. Will the gentleman yield for a question?

Mr. KEIFER. Certainly.

Mr. OLLIE M. JAMES. Do I understand the gentleman from Ohio to take the position that because Congress authorizes the building of a house worth, say, $3,000, that therefore you might empty the Treasury to make additions to it and it would not be subject to a point of order?

Mr. KEIFER. I never made any such suggestion. I say that we authorized the president and the faculty to gather students together to the number now of almost twelve hundred. We have over 400 medical students there. We have gathered them together, and now the proposition is to take care of them after we have them. It is as essential that the institution should have a good science hall and other buildings as it is that it should have professors in their faculty.

Mr. OLLIE M. JAMES. I do not dispute that. Why do you not proceed in a parliamentary fashion to do that?

Mr. KEIFER. We are doing that. Under the rules we have a right to appropriate to carry on the institution we have established to the extent that we have built it up by our previous legislation.

The CHAIRMAN. The Chair is ready to rule on the proposition. If the present occupant of the chair could strain a point and declare this section or paragraph in order, he would do so. But the rule is so clear that it is not possible to do it and maintain the rules of this House. There are many precedents and decisions upon which the decision now about to be made by the Chair is based.

On the 23d of February, 1908, the army appropriation bill was under consideration in the Committee of the Whole House on the state of the Union, and this paragraph had been read:

For the construction and completion of a building for the post headquarters, engineer school, engineer library, and engineer museum, $350,000.

The point of order having been made, Mr. SHERMAN, of New York, being Chairman of the Committee of the Whole House on the state of the Union, held that it was obnoxious to the rule, because it was a new building, and was not a continuation of a work in progress within the meaning of the rule, and therefore sustained the point of order.

On the 23d of April, 1908, the naval appropriation bill was under consideration in the Committee of the Whole House on the state of the Union, and Mr. SPARKMAN, of Florida, offered an amendment providing for the construction of one or more buildings. This was for a navy-yard and, of course, authorized previously or in the beginning by law; but yet it has been held, as it was held in that case, that a new building is not a continuation of a public work in progress, and Mr. MANN, of Illinois, Chairman of the Committee of the Whole House on the state of the Union, sustained the point of order with respect to the buildings under those circumstances. The Chair thinks it is clearly obnoxious to the rule, and reluctantly sustains the point of order.

The Clerk read as follows:

For scientific building and equipment, in addition to donations therefor, $90,000.

Mr. BUTLER. I move to strike out the last word. I have no desire to interrupt this orderly meeting, but this is the first chance I have had, having been shut out by the demand of the chairman for the regular order. I want to make an inquiry of my friend from Tennessee. Whose name was attached to that letter?

Mr. SIMS. I have given the letter in, and the letter is the best evidence.

Mr. BUTLER. I could not hear the name.

Mr. SIMS. He is the chairman of the committee, and signed it, as the chairman of the committee, as the action of the committee.

Mr. BUTLER. I could not hear the name.

Mr. FITZGERALD. I demand the regular order.

Mr. BUTLER. Will the gentleman answer what was the name? [Cries of "Morgan!"]

Mr. FITZGERALD. I demand the regular order.

The CHAIRMAN. The committee must be in order.

Mr. BUTLER. Mr. Chairman, I think my friend will answer the question.

Mr. FITZGERALD. I demand the regular order.

The CHAIRMAN. The Chair must ask gentlemen to be seated. The Chair must insist upon the rules of the House being observed. The gentleman from New York has demanded the regular order.

Mr. BUTLER. Does the Chair rule that I am out of order?

The CHAIRMAN. The Chair believes the gentleman is not discussing the motion to strike out the last word.

Mr. BUTLER. I ask unanimous consent that I may ask the gentleman from Tennessee the name of the gentleman who signed the letter.

Mr. FITZGERALD. I demand the regular order.

Mr. BUTLER. I would like to know the politics of the gentleman who signed that letter.

The CHAIRMAN. The gentleman asks unanimous consent——

Mr. FITZGERALD. I rise to a question of order. I called for the regular order, and I object to any unanimous consent.

The CHAIRMAN. The Chair was endeavoring to state the question. All gentlemen will be seated. All gentlemen occupying the floor are out of order. The Chair will state the request of the gentleman from Pennsylvania.

Mr. BUTLER. I ask unanimous consent that I may be permitted, if I have time enough, to ask the gentleman from Tennessee a question.

The CHAIRMAN. Is there objection?

Mr. FITZGERALD. I object.

The CHAIRMAN. The gentleman from New York objects. The Clerk will read.

The Clerk read as follows:

For improvement of grounds and repairs of buildings, $3,000.

Mr. FITZGERALD. I offer an amendment, Mr. Chairman.

The Clerk read as follows:

Line 5, page 123, strike out the words "repairs of" and insert in place thereof "for," and, after the word "buildings," insert the word "ninety," so that the paragraph shall read:
"For improvement of grounds and buildings, $93,000."

Mr. BARTLETT of Georgia. I make the point of order against the amendment.

The CHAIRMAN. The gentleman from Georgia makes the point of order against the amendment. Does the gentleman from New York desire to be heard upon the point of order?

Mr. FITZGERALD. What is the point of order?

Mr. BARTLETT of Georgia. That it is for buildings not authorized by law.

The CHAIRMAN. Does the gentleman from New York desire to discuss the point of order?

Mr. FITZGERALD. I have not been able to get the particular point of the point of order.

Mr. BARTLETT of Georgia. May I have the amendment read again?

The amendment was again reported.

Mr. FITZGERALD. What is the point of order, Mr. Chairman?

The CHAIRMAN. Will the gentleman from Georgia state his point of order?

Mr. BARTLETT of Georgia. I make the point of order against the amendment that it is not authorized by existing law.

Mr. FITZGERALD. I desire to be heard on that. The paragraph itself is not authorized by existing law, but this is a germane amendment. No point of order having been reserved against the paragraph, this amendment is in order. That is all I desire to say.

Mr. BARTLETT of Georgia. I do not desire to discuss it any further, Mr. Chairman.

The CHAIRMAN. On what ground does the gentleman from New York claim that the paragraph itself is not in order?

Mr. FITZGERALD. It is not authorized by existing law. This is a private institution, not a government institution. The appropriation for the purpose stated in the paragraph is not authorized. The paragraph having been read and no point of order having been reserved, an amendment that is germane can be offered and is not subject to a point of order.

The CHAIRMAN. Does the gentleman claim that because there was not a statute originally authorizing this institution, but it having been appropriated for during all of these years, that it is not a public work?

Mr. FITZGERALD. It is not. It is a private institution. I can cite the charter.

Mr. MANN. I wish also to make the point of order that the amendment that the gentleman offers is not germane to the paragraph, in that the paragraph provides for the repairing of buildings, while the gentleman's amendment in effect provides for the construction of buildings; and that a paragraph for the repairing of a building can not be amended by a proposition to build a new building.

Mr. FITZGERALD. I do not propose to build a new building. I say nothing about the construction of a building. This paragraph affects grounds and buildings, and there is nothing in the language of the amendment to justify the inference, outside of what may be in the gentleman's mind, that this is for the construction of a building.

Mr. MANN. The mere fact that the amendment itself contains nothing does not make any difference, because there are rulings to the effect that striking out a portion of a paragraph is subject to a point of order, because when stricken out it would authorize an expenditure not provided for by law.

Mr. FITZGERALD. It has been repeatedly held that a point of order can not be made against the striking out of words on the ground that the amendment is not germane.

The CHAIRMAN. That it is not germane—that is quite true.

Mr. FITZGERALD. It can not be on the ground that it changes existing law, for there is no existing law.

The CHAIRMAN. But suppose the contention of the gentleman be true, that the original paragraph was not in order. Does the gentleman contend that because the original paragraph was not in order he can introduce a new substantive paragraph not in order, simply because it may be germane?

Mr. FITZGERALD. Certainly, if it be germane. There is no question about it.

The CHAIRMAN. But, after all, it is an entirely new substantive proposition.

Mr. FITZGERALD. No; it is not a new subject, I submit to the Chair. It simply changes the wording, and this money can all be used for the purpose mentioned in the original paragraph, for repairs and anything else that may be germane. The entire appropriation can be used for the improvement of the grounds.

Mr. KEIFER. Mr. Chairman, I think the amendment was understood as simply increasing the amount of the appropriation.

The CHAIRMAN. If there be no objection, the amendment will be again reported.

Mr. MANN. It had better be read for the information of the gentleman from Ohio. He has not heard it.

Mr. KEIFER. I have heard it, and the gentleman from Illinois is the only man here who does not understand it. [Laughter.] The amendment is for the improvement of grounds and repairs of buildings, and the proposition is to make it $93,000 instead of $3,000 for the improvement and repair of buildings; but the gentleman from Illinois seems to think it is an absolutely different proposition, whereas it is the same thing, only the amount is increased.

Mr. MANN. The gentleman, as usual, is wrong. [Laughter.]

Mr. KEIFER. Let it be read for the benefit of the gentleman from Illinois.

Mr. MANN. It does not need to be read for the benefit of the gentleman from Illinois.

Mr. BUTLER. Regular order!

The CHAIRMAN. If there be no objection, the amendment will be reported for the third time.

The amendment was again read, as follows:

Line 5, page 123, strike out the words "repair of" and insert in place thereof "for;" and after the word "buildings" insert "ninety," so that the paragraph shall read "for improvement of grounds and for buildings, $93,000."

The CHAIRMAN. The Chair is awaiting the pleasure of the gentleman from New York, if he desires to continue.

Mr. FITZGERALD. I supposed that perhaps the Chair was getting information from a more authoritative source.

The CHAIRMAN. The Chair is well satisfied in his own mind, and is only waiting on the gentleman from New York for further light.

Mr. FITZGERALD. If the Chair has been completely satisfied from the other source, there is no need to spend the time of the committee.

The CHAIRMAN. The Chair is well satisfied, in accordance with the proposition that the Chair stated in the beginning, that even though the original paragraph were out of order, yet it could not be amended by a new substantive proposition. In other words, here is the rule:

In an appropriation bill a paragraph embodying legislation may be perfected by a germane amendment, but this does not permit an amendment which adds additional legislation.

And the Chair submits that this adds additional legislation. The Chair thinks it is clearly subject to the point of order.

Mr. FITZGERALD. I move to insert the word "ninety" after the word "building."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 123, line 5, after the word "building," insert the word "ninety" and a hyphen, so that it will read "$93,000."

Mr. MANN. Mr. Chairman, it seems to me a ridiculous proposition, and it will do no good to try and inject partisanship into a little matter of this kind, thinking you will get the best of it by proposing to increase this item of $3,000 for the improvement of grounds to $93,000. It is absolute ridiculousness run mad. They could not expend the money for a new building. What is the use when we have the Treasury in this condition? Of course the other side of the House would like to see us appropriate a hundred million dollars more than we can ever pay or raise.

A MEMBER. That is what you are doing.

Mr. MANN. Yes; and we are getting assistance for every extravagant proposition from the gentleman who made the remark. [Laughter.]

Mr. MACON. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. MACON. I want the gentleman to except one Member on this side of the House. [Laughter.]

Mr. MANN. I was only referring to the gentleman who made the remark.

Mr. MACON. I do not want to be included in the gentleman's remark.

Mr. MANN. As a rule, I say frankly and fairly that the gentleman from New York does not come within it; he is one of the best Members of the House. I would not be understood as making any reflection upon him because he was misled long enough to offer such an amendment as this. Ninety-three thousands dollars for improvement of grounds! We might be led into voting for it. [Laughter.]

Mr. FITZGERALD. I hope the gentleman will vote for it.

Mr. MANN. The gentleman from New York may vote for it, but the gentleman from Illinois will not.

Mr. FITZGERALD. Mr. Chairman, this is not a ridiculous amendment. If I did not hope that before the bill was enacted into law the $90,000 would be made available for the science hall that is so much needed by this institution, I would not have offered the amendment. It is all very well to characterize such an amendment as "ridiculous," and talk about the diminished surplus, but this is the wrong place to economize when we are squandering millions for many purposes under this administration. It might have been well to have taken this small pittance of $100,000 or $90,000 from the appropriation for the army or navy, where it is not needed, and give the facilities for the education of these men which are so much needed for the colored and the white races.

I have not made this motion from any standpoint of partisanship nor to play cheap politics. I do it because I believe that this is imperative and should be done now. [Applause.] I will resort to any parliamentary expedient to get this appropriation if it can be had, and I hope this side of the House will do what I believe they will do, vote for this amendment, so that these colored men who are coming to Washington to complete their education may do so, and thus be of benefit to the people of their race and the people of the white race. They can not do so unless they have the facilities that everyone who has investigated this question knows are required.

I do not advocate appropriations which I believe are unnecessary, extravagant, or improper; but I think this is essential. It should be made now and had better be done now than to defer it until next year, when there will be no money.

Mr. TAWNEY. Will the gentleman yield?

Mr. FITZGERALD. Yes.

Mr. TAWNEY. I trust that before the gentleman takes his seat he will call attention to the fact that had it not been for a gentleman on that side of the House the provision as reported by the committee would be carried in the open.

Mr. FITZGERALD. It might and might not. I do not find fault with a man on either side of the House exercising his rights under the rule. It is immaterial to me from which side it comes. I desire to have the appropriation made. I hope there will be votes on both sides sufficient to adopt the amendment.

Mr. GAINES of Tennessee. Can not that side of the House make a rule to put in the proposed item, and thereby prevent it being subject to a point of order, and have they done so?

Mr. TAWNEY. Nobody on this side of the House took it out of the bill.

Mr. GAINES of Tennessee. The gentleman points to this side of the House.

Mr. FITZGERALD. One moment, please. I do not want the gentleman to make his speech in my time. I have repeated several times, and I hope the House will agree with me, that this is an important item. The appropriation should be made now. It is not intended that the $90,000 should be expended for repairs and improvements. The $90,000 is needed for the new science hall for this colored university, in order that the colored medical students may have the necessary facilities for their education. I hope the House will give it.

Mr. FINLEY. Mr. Chairman, I will ask the gentleman why did not the Committee on Appropriations report the amount of $93,000?

Mr. FITZGERALD. It did report the $90,000 in a separate item which was eliminated from the bill on a point of order.

Mr. FINLEY. Not here.

Mr. FITZGERALD. I did not say it was reported here, but on the page preceding; but I have stated that the object of this amendment is not to give $93,000 for repairs and improvements,

but it is offered in the hope that before the bill is finally enacted into law the $90,000 will be made available for the science hall.

Mr. FINLEY. The gentleman says that this is a private corporation.

Mr. FITZGERALD. It is.

Mr. FINLEY. Are there not hundreds and thousands of other private institutions in the country that are deserving also?

Mr. FITZGERALD. Yes; but not occupying the same relation to this Government that this institution does.

Mr. FINLEY. They could occupy the same relation if the same action was taken, could they not?

Mr. FITZGERALD. They could, but they have not. I know several that I am particularly interested in myself that I should be glad to have the Government support. I have no special interest in this institution.

Mr. GAINES of Tennessee. Will the gentleman from New York tell us whether these colored people are going to be taught how to plow and how to make machinery, like Booker Washington is doing, or are they going to teach them how to read and write and be doctors and lawyers?

Mr. FITZGERALD. This particular hall is intended and needed for the medical department of the university. They have a large number of medical students. They need additional facilities in order that these men may work among the people of the colored race. I believe that it is necessary, and they should have these physicians.

Mr. GAINES of Tennessee. Are they going to teach them how to be farmers and mechanics, and so forth, like Booker Washington is doing?

Mr. FITZGERALD. Not out of this appropriation. There is a manual department in the university. I am not discussing that now.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BARTLETT of Georgia. Mr. Chairman, it will be recalled that I called attention to the first part of this item, Howard University, and reserved a point of order on it for the purpose of ascertaining what reason there was for Congress to appropriate any money at all, and when I heard the statement of the gentleman from Minnesota [Mr. TAWNEY], which admitted that this was a mere gratuity, giving the history of the appropriation, I did not make any point of order on the first appropriation. The gentleman from Illinois [Mr. MANN], in a colloquy with me, stated that this appropriation would be $90,000 less than reported before the bill got through. I presume from that that he himself would have made the point of order.

Mr. COOPER of Pennsylvania. Will the gentleman permit a question?

Mr. BARTLETT of Georgia. Yes.

Mr. COOPER of Pennsylvania. Do I understand the gentleman to say that he now does not wish to make a point of order against lines 3 and 4?

Mr. BARTLETT of Georgia. No; I have not said so.

Mr. COOPER of Pennsylvania. I thought that was the effect of the gentleman's statement. If the gentleman would do that, I would like to offer that as an amendment following line 6.

Mr. BARTLETT of Georgia. I did not so state.

Mr. MANN. Mr. Chairman, I do not propose to shirk the responsibility for making the point of order. I will say that if the gentleman from Georgia [Mr. BARTLETT] had not made the point of order I should have made it. The Treasury is in no condition to put up new buildings for this institution. It has gotten along for years without it, and all this talk about the necessity for it is pure rot.

Mr. BARTLETT of Georgia. Mr. Chairman, I know the gentleman from Illinois [Mr. MANN] would have made the point of order, but I do not care whether anyone shares with me the responsibility or not. I am responsible for making the point of order and I do not offer any apologies to the gentleman from Minnesota or anyone else for doing so.

It was my right to make it, and the gentleman from Minnesota [Mr. TAWNEY] would have risen upon his feet in his place in the consideration of this bill if any of us on this side or on that side had offered to appropriate money to erect a public building of any sort in our districts. In fact, the gentleman from Minnesota [Mr. TAWNEY] and this committee have refused to appropriate money recommended for buildings for which there is existing law, and here we are asked to appropriate money for buildings that are not authorized by law.

I have no objection to the education of the negro. My State, and the States of the South, expend millions and millions of dollars every year in their education. There are colleges in various States. I know one in North Carolina and one in my own State, particularly aided by state appropriation, where these people are educated in the higher branches, in the professions, so that it is not necessary that the money should at this time be taken from the Treasury to complete a building which is not authorized by law.

The CHAIRMAN. The time of the gentleman has expired.

Mr. KEIFER. Mr. Chairman—— [Cries of "Vote!"]

Mr. WILLIAMS. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Ohio desire to be recognized?

Mr. KEIFER. Yes; just for a moment. This amendment is now exactly as, in the confusion that existed, I understood it to be in the first place. I want to say that we are taking pains about economy in this bill. There seems to be very little trouble about appropriations much larger for Indian schools for the Indians.

We have about 250,000 Indians, savage and all classes, and we have something like 10,000,000 colored people. I suppose there is in this bill, according to the estimates, an appropriation of $200,000 for the education of the Eskimo—is that right—way up in our northern country or territory of Alaska. We are getting very liberal in some directions but not in regard to our 10,000,000 colored people and citizens. Some gentlemen seem to think that it is time to exercise economy when these unfortunate people are involved.

Mr. GARRETT. Mr. Chairman, will the gentleman yield?

Mr. KEIFER. I will try; yes, I will yield.

Mr. GARRETT. The education of the Indians is a matter concerning which the Federal Government has taken special charge.

Mr. KEIFER. It took special charge of this institution long ago; more than forty years ago we commenced this good work, and we are now trying to carry it out according to the spirit in which we entered upon it.

Mr. GARRETT. The education of the 10,000,000 colored people is a matter in which the States have taken care and are now taking care.

Mr. KEIFER. The States have not in this instance, and we are providing the States and their institutions with teachers from Howard University.

Mr. GAINES of Tennessee. Will the gentleman permit me to make an inquiry of him? Have we not taken the Indians' lands from them and sold them and held the funds in trust and educated them with the proceeds?

Mr. KEIFER. No.

Mr. GAINES of Tennessee. Have we not at any time?

Mr. KEIFER. In some instances—I think not.

Mr. GAINES of Tennessee. I am glad to be enlightened, because my impression was that we sold their lands and held their funds in trust and sent them to schools to teach them this, that, and the other thing, among other things, how to be farmers, a thing you do not propose to do in this case. [Cries of "Vote!"]

The CHAIRMAN (Mr. OLMSTED). The question is on the amendment proposed by the gentleman from New York [Mr. FITZGERALD].

The question was taken, and the Chair announced the ayes seemed to have it.

On a division (demanded by Mr. BARTLETT of Georgia) there were—ayes 88, noes 17.

So the amendment was agreed to.

The Clerk read as follows:

Freedmen's Hospital: For salaries and compensation of the surgeon in chief, not to exceed $3,000, and for all other professional and other services that may be required and expressly approved by the Secretary of the Interior; in all, $28,500. A detailed statement of the expenditure of this sum shall be submitted to Congress.

Mr. ROBINSON. Mr. Chairman, I move to strike out the last word. I would like to ask some gentleman in charge of this bill the reason for the requirement that a detailed statement of expenditures of this sum shall be submitted to Congress when the same requirement is not made as to other expenditures in a subsequent paragraph?

Mr. TAWNEY. This is a lump-sum appropriation, Mr. Chairman, for personal services, and it is for the purpose of giving Congress information as to the compensation paid to individuals employed and paid from this appropriation, which is required of a great many of the various departments of the Government for which appropriations are carried in this bill.

Mr. ROBINSON. The statement is to be submitted, of course, after the service is performed; it could not be submitted before.

Mr. TAWNEY. The service is a continuing service, and we require a report every session of Congress.

The Clerk read as follows:

For repairs to bridge connecting Rock Island Arsenal and the city of Davenport, $60,000.

Mr. OLLIE M. JAMES. Mr. Chairman, I move to strike out the last word. I would like to ask the gentleman in charge of

this bill what part of the amount necessary to repair this bridge does the railroad pay that operates these cars across the bridge.

Mr. TAWNEY. The railroad company does not pay any part of the expenses now, under a ruling of the Comptroller of the Treasury, I think two years ago. The revenue that the company pays is paid into the Treasury of the United States to the credit of the general fund, and the Government of the United States pays——

Mr. OLLIE M. JAMES. What revenue do they pay?

Mr. TAWNEY. There is a specific contract between the railroad company and the Government.

Mr. OLLIE M. JAMES. I would like to ask the gentleman if it is not true——

Mr. TAWNEY. The gentleman is speaking about the steam railroad?

Mr. OLLIE M. JAMES. I am speaking about this bridge on which the railroad crosses.

Mr. TAWNEY. The railroad company owns half of that bridge.

Mr. OLLIE M. JAMES. How do they come into the ownership of half of that bridge?

Mr. TAWNEY. Because the Government of the United States——

Mr. HULL of Iowa. The law fixes it.

Mr. TAWNEY. The law passed by Congress fixes it.

Mr. OLLIE M. JAMES. But is it not true that the Government itself built all of that bridge except the laying of the ties and the placing of the rails upon it when it was erected?

Mr. SMITH of Iowa. That is not true.

Mr. OLLIE M. JAMES. I will call the attention of the gentleman from Iowa to the testimony of General Crozier, who says he thinks the Government built it. "My impression is that the railroad company only paid for the ties and rails" is the language of General Crozier in his testimony.

Mr. SMITH of Iowa. The trouble is that the gentleman confuses the railroad and the street railroad.

Mr. OLLIE M. JAMES. The street railroad?

Mr. TAWNEY. The street railroad the gentleman is referring to in his first question.

Mr. OLLIE M. JAMES. Does not the street railroad run across this bridge?

Mr. SMITH of Iowa. It does.

Mr. OLLIE M. JAMES. Does it not charge people to carry them across it?

Mr. SMITH of Iowa. It does.

Mr. OLLIE M. JAMES. And these repairs that are being made you are having the Government pay for? Why do you not have the street car railroad pay it?

Mr. SMITH of Iowa. The railroad paid for half the bridge.

Mr. OLLIE M. JAMES. The street railroad company?

Mr. SMITH of Iowa. The street railroad has a contract with the Government which has been variously modified both by statute and otherwise, and which we can hardly determine the justice of to-night, but which provides generally that the street railroad company shall furnish the power to turn the draw of this bridge; that it shall furnish the electric light, not only on this bridge and the other bridge at the same general location, but the lighting of the street connecting the two bridges. But, in further consideration of its crossing this bridge, it shall haul all passengers through Rock Island, from Davenport, Moline, or the city of Rock Island, for 2½ cents at certain hours of the day, in place of 5 cents.

Mr. HULL of Iowa. It applies especially to the employees of the arsenal?

Mr. SMITH of Iowa. It applies to everybody. In addition to that, the street railway company built a stub line extending up to the arsenal, and contracts to carry the arsenal employees at 1 cent below the regular rate.

Mr. OLLIE M. JAMES. I call the attention of the gentleman to the item for the maintenance and operation of the power plant of $12,500.

Mr. SMITH of Iowa. That is again a case of misapplication. The Rock Island is one of the greatest power plants in America. It has nothing whatever to do with the power that turns the draw span in the Mississippi River bridge.

Mr. OLLIE M. JAMES. If I understand the gentleman correctly then, all that the street car company does for the bridge which the Government built, according to General Crozier——

Mr. SMITH of Iowa. Half built.

Mr. OLLIE M. JAMES. I am taking his testimony.

Mr. SMITH of Iowa. His testimony is that it was half built by the Government. Do not misstate his testimony.

Mr. OLLIE M. JAMES. I have read his testimony absolutely correctly.

Mr. SMITH of Iowa. The gentleman read an extract from it that does not show what he meant at all.

Mr. OLLIE M. JAMES. The street railway company uses the bridge all the time?

Mr. SMITH of Iowa. It uses the bridge, and gives a 2½-cent fare in place of a 5-cent fare from Rock Island, Davenport, and Moline, and gives a 4-cent fare on this line, including the stub, to carry laborers up to the arsenal, lights the bridge, and lights the street connecting the two bridges, and furnishes the power to turn the span.

Mr. OLLIE M. JAMES. That is for the benefit only of those few people out there. Does not the gentleman think that, as this street railway company did nothing to build the bridge, and it is only giving the benefit of a 3-cent fare to the few people that use it out there, the street railway company ought to do something to help repair the bridge?

Mr. SMITH of Iowa. I am not going to determine to-night whether this street railway company, running back through years, was as liberal to the Government as it ought to have been. I do not see any connection between that question and the question of whether we are going to repair this bridge when the floor has rotted out.

Mr. OLLIE M. JAMES. Well, the street car company I am calling the gentleman's attention to is getting most of the benefit of it, and when it is doing that it ought to repair at least between its tracks.

Mr. SMITH of Iowa. As a matter of fact, they have got a contract partly by statute and partly with the War Department, and they are complying with it.

Mr. SHERLEY. How much of government ground do the tracks of the street railway run over?

Mr. SMITH of Iowa. I can not answer that question. They run up to the arsenal, and do so at the request of the government authorities.

Mr. SHERLEY. And also across the island, making the connection between the two cities.

Mr. SMITH of Iowa. I do not believe the street belongs to the Government.

Mr. SHERLEY. The right of way is a very valuable one, and I think they are paying very little for it.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

Mr. GARRETT. I move to strike out the last two words.

The CHAIRMAN. The gentleman moves to strike out a couple of words.

Mr. GARRETT. I think, even at this hour of the night, the gentleman from Iowa ought to be willing to give us information about that.

Mr. SMITH of Iowa. I gave you all I had.

Mr. GARRETT. It is very voluminous, so far. Now, what are the relations between the steam railway and the electric street car company and the Government in this bridge?

Mr. SMITH of Iowa. Why, as I understand the facts, when this bridge was first built, forty years ago, it was built one-half by the railway company and one-half by the Government. When it was rebuilt a few years ago the same rule applied.

Mr. GARRETT. The steam railway?

Mr. SMITH of Iowa. The Rock Island Railroad.

Mr. GARRETT. Now, where does the street car company come in?

Mr. SMITH of Iowa. Now, subsequently, the street car company wanted to cross this bridge, and they made a contract with the Government, varying at different times. At one time there was a payment of $2,500 in cash for the privilege of crossing over, and certain other things, to the Government. But, finally, the contract has been reduced—I will not state whether it is fair or not—but under the contract now the Government is to be free from the expense of turning this draw in this bridge, and this is done by the power furnished by this motor company. The government employees—and they are about 1,500 in number—shall go to and from these works at the arsenal on a fare of $30 a day, as I remember the figures.

Mr. GARRETT. The government employees on what?

Mr. SMITH of Iowa. At the Rock Island Arsenal, which is situated on the island, in the middle of the Mississippi River.

Mr. CLARK of Missouri. I think if the gentleman from Iowa will take a minute or a minute and a half and explain the geographical situation out there, he would have no further difficulty.

Mr. SMITH of Iowa. I do not know that I can explain it better than to say that this Government acquired Rock Island and has on it its most important arsenal; that it is operated by water power, the water power referred to in the next item; that these 1,500 employees going back and forth to this arsenal

come from Davenport, Moline, and the city of Rock Island; that in order to get across this bridge they carry all the people, employees and others, during certain hours of the day for 2½ cents to and from these other places.

Mr. GARRETT. That is pretty good for those people who live there, but where does it come in for the benefit of the general public?

Mr. SMITH of Iowa. There are no people living on Rock Island, practically speaking; it is principally government employees; but some people go over there sometimes. The great body is the government employees, and this is to enable them to go backward and forward to this arsenal.

Mr. CLARK of Missouri. The geographical situation is this: Rock Island is in the middle of the Mississippi River, and that is where the arsenal is, and these people that work at that arsenal live in Davenport, Iowa, Rock Island and Moline, Ill. There are three towns right around there where these employees live, and they can not get to that arsenal except they go over this bridge.

Mr. GARRETT. Was the electric road built for the benefit of these employees?

Mr. CLARK of Missouri. Why, the three towns were composed practically of government employees and the people who have to support the government employees.

Mr. DAWSON. My good friend from Missouri has an entirely inadequate conception of the importance of this great industrial center. [Laughter.]

Mr. CLARK of Missouri. There never would have been any industrial center around there if this arsenal had not been established on Rock Island.

Mr. DAWSON. I am not so sure about that.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GARRETT. I ask unanimous consent that the gentleman from Iowa may have five minutes——

Mr. TAWNEY. I move that all debate on this paragraph be now closed.

Mr. WILLIAMS. I hope the gentleman from Minnesota will allow five minutes at any rate.

The CHAIRMAN. The gentleman from Minnesota moves that all debate on this paragraph be closed.

Mr. WILLIAMS. I should like five minutes for the gentleman from Iowa to elucidate the question.

Mr. TAWNEY. There is no amendment pending.

The motion of Mr. TAWNEY was agreed to.

Mr. OLLIE M. JAMES. I offer the amendment which I send to the Clerk's desk.

The Clerk read as follows:

After the word "dollars" on line 23, page 124, insert the following: "*Provided*, That the street railway company operating and running the street cars across said bridge shall pay one-third of the expense for repairing the same."

Mr. TAWNEY. I make the point of order against the amendment.

The CHAIRMAN. The point of order is sustained.

Mr. GARRETT. I move to strike out the paragraph.

The question being taken on the motion of Mr. GARRETT, on a division (demanded by Mr. GARRETT), there were—ayes 14, noes 65.

Accordingly the amendment was rejected.

The Clerk read as follows:

Picatinny Arsenal, Dover, N. J.: For extension of filling house, $10,000.

Mr. DRISCOLL. Mr. Chairman, I do not know whether these are separate paragraphs, or that they are all a single paragraph, but I desire to reserve a point of order on each of them separately.

Mr. GARRETT. Which one?

Mr. DRISCOLL. Well, on Picatinny. If that and several others all go in one paragraph, I will reserve my point until we get them all read.

Mr. TAWNEY. They are all separate paragraphs.

Mr. DRISCOLL. Then I reserve a point of order against this.

Mr. TAWNEY. Do not reserve it. Make it. Let us see what it is.

Mr. DRISCOLL. I make the point of order that it is new construction, and is not authorized by law.

The CHAIRMAN. The Chair will state that this appears to be an extension of a filling house.

Mr. GAINES of Tennessee. That is exactly what it is.

The CHAIRMAN. And unless there is a limitation on the cost of the same it would be in order.

Mr. GAINES of Tennessee. It is a continuation of a project already in progress.

Mr. DRISCOLL. If the building is 50 feet long, and they want to make it 150 feet long, that is new construction.

The CHAIRMAN. The Chair will ask the gentleman from New York if there is any legal limitation on the cost of that filling house?

Mr. DRISCOLL. I do not think it is authorized at all.

Mr. TAWNEY. There is no limitation. This is the house in which the cartridges are filled. Therefore it is called the "filling house." This is for the purpose of enlarging it.

The CHAIRMAN. The Chair is ready to rule. The paragraph appears on its face to be for an extension of an existing house. It seems, therefore, to be a continuation of a government work in progress, and the point of order is overruled.

Mr. DRISCOLL. It is not in progress. There is no appropriation for it in the present law.

The CHAIRMAN. The point of order is overruled.

Mr. GAINES of Tennessee. I should like to inquire of the gentleman from Minnesota where he gets the estimate for $10,000? In other words, is that enough?

Mr. TAWNEY. The estimate comes from the War Department, from the bureau of which General Crozier is the head.

Mr. GAINES of Tennessee. How much powder is it proposed to make there?

Mr. TAWNEY. Oh, I do not know. Ask me something easy.

Mr. GAINES of Tennessee. I thought nothing was hard to the distinguished gentleman.

Mr. TAWNEY. It depends upon the necessities of the service. If we have a war with Japan, why, we may need a great deal more than we otherwise would.

Mr. GAINES of Tennessee. I ask the question because I know that two years ago General Crozier had some doubt as to how much money he needed. The fortifications bill carried an item of about $160,000 to put up a factory at Sandy Hook.

Mr. TAWNEY. I would say to the gentleman that we have doubled the capacity for the manufacture of powder.

Mr. GAINES of Tennessee. How much does that mean; what amount in a day or a year?

Mr. JOHNSON of South Carolina. Will the gentleman from Tennessee allow me to interrupt him?

Mr. GAINES of Tennessee. Yes, indeed.

Mr. JOHNSON of South Carolina. The present capacity is 1,000 pounds a day. This enlargement will make it 3,000 pounds a day. That is the testimony.

The Clerk read as follows:

For enlargement of the powder factory, including the necessary accessories and buildings for housing employees, $175,000.

Mr. DRISCOLL. Mr. Chairman, I make the point of order against that paragraph on the ground that it is new construction not authorized by law.

Mr. GAINES of Tennessee. It is a continuation of a work already in progress.

The CHAIRMAN. This appears to be for the enlargement of an existing building. It is therefore within the exception of the rule as being in continuation of a government work already in progress. The Chair overrules the point of order.

Mr. GAINES of Tennessee. Just a word about Indianhead. I want to ask the gentleman from Minnesota if he knows that in the estimate of the cost of making powder at Indianhead, 43 cents, they take into consideration about a thousand acres of land deteriorating at the rate of 10 per cent a year, says Mr. Waddell in the Senate hearings, 1906–7? They have 800 acres which is used as a proving ground and 200 acres as a powder-plant territory. They also charge in the expense of policing the whole premises, which, we all know, is not a legitimate charge in making up the cost of powder made by the Government down there at Indianhead. Of course that is absurd.

I am stating this from the testimony of Colonel Dieffenbach, a navy officer, in his letter in these Senate hearings. Mr. Waddell is an expert powder man at Peoria, Ill. He used to work for the powder trust and was an expert government witness in this case against the octopus—this full-stomach affair that has gobbled up money from the Government for nearly a century, but is now harnessed up in the federal court, thank the Lord—Waddell, Roosevelt, and a few others. He states that it costs 34 cents to make the powder, and everything above that is profit, and yet we are paying 64 cents for a part and 84½ cents for powder for arms of small caliber. That is what we are paying this octopus, and I am glad to see that the Government is coming to the rescue of the Treasury and turning its face against this great octopus that has been prowling around in the Treasury of the United States for more than a century [laughter] and is making this octopus behave like a law-abiding citizen, which it never has done before. [Applause.]

The Clerk read as follows:

BUILDINGS AND GROUNDS IN AND AROUND WASHINGTON.

That the application of the rules and regulations heretofore prescribed or that may be hereafter prescribed by the Chief of Engineers, United States Army, under the authority granted by section 6 of an act

of Congress approved July 1, 1898, for the government and proper care of all public grounds placed by that act under the charge and control of the said Chief of Engineers, is hereby extended to cover the sidewalks around the public grounds and the carriageways of such streets as lie between and separate the said public grounds.

Mr. MANN. Mr. Chairman, to that I reserve a point of order. Under this provision, which extends the jurisdiction of the Chief of Engineers to sidewalks and streets, I want to ask whether that will oust the jurisdiction of the police officers of the District?

Mr. TAWNEY. It does not at all; their jurisdiction is coextensive.

Mr. MANN. I think not. Do the police officers of the District have jurisdiction within the parks?

Mr. TAWNEY. Yes; inside the parks and around the parks.

Mr. MANN. The Chief of Engineers now has police jurisdiction over the parks themselves?

Mr. TAWNEY. Within the parks.

Mr. MANN. And the District officers do not have the jurisdiction?

Mr. TAWNEY. The District police officers have jurisdiction within the parks.

Mr. MANN. Concurrent jurisdiction?

Mr. TAWNEY. Yes; concurrent jurisdiction.

Mr. MANN. They have police officers for the park?

Mr. TAWNEY. Yes; the city police make arrests within the park; they have jurisdiction; but the park policemen have no jurisdiction to make arrests on the sidewalks.

Mr. MANN. The gentleman says that the District police and the park police have common jurisdiction within the parks?

Mr. TAWNEY. Yes.

Mr. MANN. I think the gentleman is wrong, although I do not wish to put my opinion against his.

Mr. TAWNEY. When the request for the extension of the jurisdiction of the park police was requested, inquiry was made as to whether or not the jurisdiction of the city police was coextensive with that of the park police, and we were informed by the Superintendent of Public Buildings and Grounds that their jurisdiction was coextensive.

Mr. MANN. And concurrent?

Mr. TAWNEY. Yes.

Mr. MANN. I withdraw the point of order.

The Clerk read as follows:

For improvement, care, and maintenance of various reservations, including purchase, maintenance, and driving of horse and vehicle for official use of the officer in charge of public buildings and grounds, and of other necessary vehicles, for official use, $26,000.

Mr. LLOYD. Mr. Chairman, I move to strike out the last word, in order to make some inquiries.

Mr. OLLIE M. JAMES. Mr. Chairman, I reserve the point of order to the section.

The CHAIRMAN. The gentleman from Kentucky reserves the point of order.

Mr. TAWNEY. Mr. Chairman, the reservation of the point of order comes too late. The gentleman from Missouri has moved to amend the paragraph.

Mr. CLARK of Missouri. Mr. Chairman, when this bill was first reported to the House all points of order were reserved, and we do not have to make points of order individually to the section.

Mr. OLLIE M. JAMES. Certainly; because the gentleman from Missouri had said he wanted to strike out the last word——

Mr. TAWNEY. He moved to strike out the last word, and commenced to talk about the paragraph.

Mr. OLLIE M. JAMES. The committee seems to resolve itself into a fierce rivalry as to who can get out the first word and as to who the Chairman hears uttering the first word. I do not think the gentleman from Minnesota ought to depart from the usual rule.

The CHAIRMAN. The Chair thinks that the gentleman from Kentucky was on his feet to reserve the point of order, and that the reservation does not come too late.

Mr. WILLIAMS. Unless there has been debate the gentleman has a right to make the point of order.

Mr. TAWNEY. The point of order does not lie to the section, anyway.

Mr. LLOYD. I refer to the section from lines 9 to 13, inclusive, on page 129. I wish to inquire how much is for vehicles and how much for horses?

Mr. TAWNEY. I do not know how much is for maintenance of the dray horses and the express wagons and horses used in the express wagons. There is none of it for carriages—that is, for the accommodation of the Superintendent of Public Buildings and Grounds.

Mr. LLOYD. Is there any carriage provided for anybody in this paragraph excepting the carriage for the Superintendent of Public Buildings and Grounds?

Mr. TAWNEY. I asked Colonel Bromwell these questions:

What other necessary vehicles do you use outside of those used by yourself?

Colonel BROMWELL. The assistant engineer has a buggy and the landscape gardener has a buggy.

The CHAIRMAN. These are all? Those are the only vehicles outside of your own that are provided for in this appropriation?

Colonel BROMWELL. Yes.

Mr. LLOYD. Then there are three buggies provided for three officers?

Mr. TAWNEY. Yes; they are used in going around and superintending the work in these different parks.

Mr. LLOYD. How many horses are used?

Mr. TAWNEY. Only three.

Mr. GARRETT. Will the gentleman permit a question? Would it not be a good idea to substitute automobiles?

Mr. TAWNEY. I do not think so, until these horses die, anyway.

Mr. LLOYD. Have they not any two-horse carriages in this connection?

Mr. TAWNEY. I have given the gentleman all the information I have. The Superintendent of Public Buildings and Grounds says that he has this horse and carriage of his own, and then the superintendent and the landscape gardener each has one.

Mr. LLOYD. Did he give the gentleman any information as to the number of vehicles necessary to be purchased during the year?

Mr. TAWNEY. No; he does not ask for any. He is going to use the old ones for another year.

Mr. GARRETT. Suppose that horse dies?

Mr. LLOYD. Then if he does not need to purchase any during the year, is not the appropriation too large?

Mr. TAWNEY. The appropriation is not for vehicles and horses alone. The principal amount of this money is expended for the improvement, care, and maintenance of the various reservations or parks in the city under the jurisdiction of the Superintendent of Public Buildings and Grounds.

Mr. LLOYD. I beg the gentleman's pardon. That is an entirely different paragraph in which that appropriation is made. This is for the improvement, use, and maintenance of certain reservations, including the purchase and maintenance and care of vehicles and horse.

Mr. TAWNEY. The paragraph to which the gentleman refers is lines 9 to 13, inclusive, on page 129.

Mr. LLOYD. Yes; and I am trying to find out how much is for the use and care and maintenance of the reservations and how much is for the vehicles and how much for horses.

Mr. TAWNEY. There is no separate amount stated by the Superintendent of Public Buildings and Grounds.

Mr. LLOYD. Then we must vote on this matter without knowing how much is necessary.

Mr. MANN. Will the gentleman yield for a question?

Mr. GARRETT. Let me ask the gentleman from Minnesota a question in all seriousness. Ought not half of this to be paid out of the revenues of the District?

Mr. TAWNEY. It is.

Mr. GARRETT. It does not say so here.

Mr. MANN. It does, on page 131.

Mr. TAWNEY. There is a general provision as to all these items.

Mr. MANN. Does not the gentleman from Missouri think there is some discrimination? This provides for the care and maintenance and purchase and driving of horses and vehicles for official use of officer in charge of public buildings and grounds, and then only provides for other necessary vehicles for official use. It does not provide for a horse at all. There may be a dozen vehicles and only one horse. Is not this rather working the horse too much? [Laughter.]

Mr. GARRETT. That depends on the horse.

Mr. MANN. Is this a horse on the officer who gets the horse or a horse on the officer who only gets a vehicle without a horse?

Mr. LLOYD. I am sorry I can not answer the question of the gentleman.

Mr. GARRETT. Mr. Chairman, I ask unanimous consent that this paragraph may go over without prejudice, as we are not able to get the information.

Mr. TAWNEY. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. OLLIE M. JAMES Mr. Chairman, I move to strike out the word "twenty," so the paragraph will read "$6,000" instead of "$26,000." I think that is enough for one horse.

The CHAIRMAN. The gentleman from Kentucky offers an amendment which the Clerk will report.

The Clerk read as follows:

In line 13, page 129, strike out the word "twenty," so that it will read "$6,000."

The question was taken; and the Chair announced the noes seemed to have it.

On a division (demanded by Mr. OLLIE M. JAMES) there were—ayes 45, noes 71.

Mr. OLLIE M. JAMES. Mr. Chairman, I demand tellers.

Tellers were ordered.

The committee again divided; and the tellers (Mr. TAWNEY and Mr. OLLIE M. JAMES) reported that there were—ayes 53, noes, 62.

So the amendment was rejected.

Mr. GAINES of Tennessee. Mr. Chairman——

Mr. COX of Indiana. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Indiana rise?

Mr. COX of Indiana. For the purpose of offering an amendment. Strike out, in line 13, the word "six" and insert the word "five," so as to make it read "$25,000."

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 129, line 13, strike out the word "six" and insert the word "five," so that the amendment will read "$25,000."

The CHAIRMAN. The question is on the amendment.

Mr. TAWNEY. Mr. Chairman, just a moment. I do not think the gentleman from Indiana will make his motion or insist upon it if he understands the facts. This appropriation has been increased to the extent of $1,000 on account of the number of new reservations that have been made and brought under the jurisdiction of the Superintendent of Public Buildings and Grounds, which must be improved and will be improved during the coming fiscal year.

That is the reason for this additional $1,000. The appropriation heretofore has been $25,000 for all the reservations under the control of the Superintendent of Public Buildings and Grounds. Next year there will be several reservations which will come under his control, and they will continue to come under his jurisdiction, which will necessitate an additional amount.

Mr. COX of Indiana. Mr. Chairman, I listened to the discussion between the gentleman from Missouri and the gentleman from Minnesota as to the reason why this appropriation was increased $1,000, and I could not gather any reason for it.

Mr. TAWNEY. The gentleman from Missouri was not asking why the appropriation was increased, but he was asking about horses and carriages.

Mr. COX of Indiana. I understood that, and I was waiting patiently for the gentleman from Minnesota to explain the reason why, and I turned back to the current appropriation bill and I found the language of the last appropriation was practically the same as it is in this bill; but the reason for the increase of $1,000 I did not know, but I do believe, Mr. Chairman, that $25,000 is enough for this work anyhow.

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was rejected.

Mr. GAINES of Tennessee. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. GAINES of Tennessee. To ask unanimous consent to go back to page 128, line 9, "for ordinary care of Lafayette Park, $2,000."

Mr. TAWNEY. What for?

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to return to page 128 for the purpose indicated.

Mr. MANN. There has been no purpose indicated.

Mr. TAWNEY. I object.

Mr. GAINES of Tennessee. I ask unanimous consent to make an inquiry.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to make an inquiry. Is there objection? [After a pause.] The Chair hears none.

Mr. GAINES of Tennessee. Mr. Chairman, I was very busy at the time.

A MEMBER. Regular order!

Mr. GAINES of Tennessee. The regular order is to get information whenever I can and where I need it. Now, Mr. Chairman, I ask the committee the reason why that park is named "Lafayette?"

Mr. TAWNEY. To what part of the bill does the gentleman refer?

Mr. GAINES of Tennessee. Line 9, on page 128. It is named "Jackson Park;" and while I would not for a moment deprive Lafayette of any homage we can pay him, I say there is no law, or I have been unable to find any, to justify calling it "Lafayette Park," and I intended to call it to the attention of the chairman of the committee when we reached it; but I was diverted at the time, and we passed over it. That is why I asked to go back. It ought to be "Jackson Park."

I have unanimous consent to proceed.

Mr. TAWNEY. The gentleman has unanimous consent to ask a question.

Mr. GAINES of Tennessee. My question is, now, What objection has the gentleman to calling it "Jackson Park?"

Mr. TAWNEY. Simply because the park is called "Lafayette Park" and was known in the appropriations for the last half century as "Lafayette Park."

Mr. GAINES of Tennessee. It was not. It was first called "Jackson Park" and it is now called "Lafayette Park," and there is no law for that that I can find.

Mr. TAWNEY. Mr. Chairman, I demand the regular order.

The CHAIRMAN. Regular order is demanded, and the Clerk will read.

The Clerk read as follows:

For laying cement and other walks in various reservations, $2,000.

Mr. ROBINSON. Mr. Chairman, I move to strike out the last word. I would like to ask what reservations are referred to there?

Mr. TAWNEY. Government reservations in the District of Columbia.

Mr. ROBINSON. In the District of Columbia exclusively?

Mr. TAWNEY. Yes, sir.

The Clerk read as follows:

And the jurisdiction over the portion of north B street required for said roadway, now under the control of the Commissioners of the District of Columbia is hereby transferred to the Chief of Engineers, United States Army.

Mr. GARRETT. Mr. Chairman, I reserve the point of order on that. Has that matter been submitted by the District Committee?

Mr. TAWNEY. No; it has not, nor has the District Committee any jurisdiction over the subject.

Mr. GARRETT. It has not any?

Mr. TAWNEY. No.

Mr. GARRETT. The Committee on the District of Columbia has no jurisdiction over B street?

Mr. TAWNEY. Over B street? Of course it has jurisdiction over B street.

Mr. MANN. That is the proposition.

Mr. TAWNEY. I thought the gentleman was referring to the park.

Mr. CAMPBELL. Referring to the paragraph beginning on line 10 and ending on line 16, on page 130.

Mr. GARRETT. That is it.

Mr. TAWNEY. Does the gentleman refer to the paragraph beginning with line 22 and ending with line 25?

Mr. GARRETT. Yes, sir.

Mr. TAWNEY. If the Government of the United States improves this street as part of the park improvement, the jurisdiction of the street will have to be transferred to the Superintendent of Public Buildings and Grounds, who is in control of all the parks and streets.

Mr. GARRETT. Now, is not that a District matter? Is not that a matter that ought to go before the District Committee?

Mr. TAWNEY. No.

Mr. MANN. This street, as I understand it, is a street that is now being improved as a part of the park system. I was up there Sunday and walked all over it. I wish the gentleman had been along. It would have added very greatly to my company.

Mr. GARRETT. The pleasure would have been mine. But after all——

Mr. MANN. It is quite essential, I should say, that if that street were to be improved as a part of the park system, the engineer should have jurisdiction over it as a part of the park or alongside of the park.

Mr. GARRETT. I am not entering into the merits of the matter. The thing I am trying to get at is whether that is not a matter that ought to be referred to the District Committee.

Mr. LLOYD. I want to ask the gentleman from Illinois [Mr. MANN] why it is that the District of Columbia has no jurisdiction, when one-half of the expense of it is to be paid by the District of Columbia?

Mr. MANN. One-half of the expense of all of these parks is paid by the District of Columbia.

Mr. LLOYD. Yet the District Committee, which controls the affairs of the District, has no jurisdiction whatever over the parks?

Mr. MANN. I did not say anything about comparative jurisdiction of the committee.

Mr. LLOYD. I beg the gentleman's pardon; he did not. It was the chairman of the committee, the gentleman from Minnesota [Mr. TAWNEY].

Mr. MANN. I apprehend that a bill for that purpose would have been referred to the Committee on the District of Columbia, but as this bill carries the appropriation for the improvement of the park and the street, I think it quite proper that the transfer of the jurisdiction should be made in connection with the appropriation for the improvements.

Mr. GARRETT. In other words, it was excusable, but can not be justified under the rule.

Mr. MANN. If it were a bill introduced, it would be subject to the point of order, and the bill introduced, I think, would go to the Committee on the District of Columbia.

Mr. GARRETT. I make the point of order on that.

The CHAIRMAN. The paragraph is plainly a change of existing law, and the point of order is sustained.

The Clerk read as follows:

For commencing the improvement of the interior portions of section 1 of Potomac Park, grading, soiling, seeding, planting, and laying out walks, $15,000.

Mr. GARRETT. I reserve or make the point of order on that paragraph.

Mr. OLLIE M. JAMES. I ask the gentleman to reserve the point of order, so that we may have an explanation of it.

Mr. TAWNEY. I insist that the gentleman make the point of order if there is to be a point of order.

The CHAIRMAN. Will the gentleman from Tennessee state his point of order?

Mr. GARRETT. There is no law for it; it is new legislation; there is no authority of law for the appropriation.

The CHAIRMAN. Does the gentleman make the point of order?

Mr. GARRETT. I have made it, but the gentleman from Kentucky asked me to reserve it. I would like to hear from the chairman as to the necessity for it. It is new legislation.

Mr. TAWNEY. It is a public work in progress; the United States controls this park.

The CHAIRMAN. It is an appropriation for commencing the improvement of the interior portions of Potomac Park, in continuation of a public work in progress, and as such excepted from the rule.

Mr. GARRETT. How can it be a continuing if it is just commencing?

The CHAIRMAN. The park is there and the improvement of the park in its exterior portions has apparently commenced, and this provision continues the improvement to the interior. The Chair overrules the point of order.

Mr. GARRETT. I understand the Chair to say that commencing is continuation?

The CHAIRMAN. The park was commenced and the improvement of the park is a continuation of the improvements already in progress.

Mr. GARRETT. Then the Committee on Appropriations is very unfortunate in the use of language. [Cries of "Regular order!"]

The CHAIRMAN. The Chair overrules the point of order.

The Clerk read as follows:

Under appropriations herein contained no contract shall be made for making or repairing concrete or asphalt pavements in Washington City at a higher price than $1.85 per square yard for a quality equal to the best laid in the District of Columbia prior to July 1, 1886, and with a base of not less than 6 inches in thickness.

Mr. GAINES of Tennessee. I move to strike out, on page 131, line 13, the word "laid," which is clearly a limitation.

The Clerk read as follows:

Page 131, line 13, strike out the word "laid."

Mr. GAINES of Tennessee. That is a limitation, because it requires for this purpose in the future that you make it of a quality equal to the best that we have already "laid" here. Now, there is a new kind of street material. It is a vita-lithic process. If this bill passes with this limitation in here, it will exclude the commissioners from adopting the vita-lithic process or any new and better process, because none of it has been "laid" in this city. And yet this is to get the very best "laid."

Mr. MANN. This is what is called the asphaltum here. It is a limitation and only applies in this case.

Mr. GAINES of Tennessee. It bars a new and better kind.

Mr. MANN. It is only a limitation.

Mr. GAINES of Tennessee. I will ask the gentleman to read it, then.

Mr. MANN. I have been reading it for the last twelve years, and we have been making appropriations every year.

Mr. GAINES of Tennessee (reading):

No contract shall be made for making or repairing concrete or asphalt pavements in Washington City at a higher price than $1.85 per square yard for a quality equal to the best laid.

Mr. MANN. That is already laid in the District, and it only applies to the making of repairs to the concrete and asphalt pavement, and is the same provision carried in the District of Columbia bill and carried in this bill every year that fixes the standard according to a pavement laid in 1888, and done in accordance with that standard.

Mr. TAWNEY. I would say to the gentleman from Tennessee that the standard for this pavement referred to the pavement that was laid in 1886 in Franklin square, and it was considered as the best pavement in the District of Columbia. This has been carried in the District appropriation bill and the sundry civil bill for a great many years. That pavement was personally supervised and superintended by General Ketchum, for many years a Member of this House. It was at his instance that this provision was put in and kept in, so as to keep the standard up to that which was laid in this particular street.

Mr. GAINES of Tennessee. Mr. Chairman, I ask for five minutes, so that I can make myself plain.

Mr. WALDO. I move that all debate——

Mr. GAINES of Tennessee. I move to strike out the last word. The gentleman from New York seems to be very much adverse to my giving information or getting information.

The CHAIRMAN. Does the gentleman withdraw his pro forma amendment?

Mr. GAINES of Tennessee. No; I do not.

The CHAIRMAN. Then the gentleman can not move to strike out the last word. There is an amendment already pending.

The question is on the amendment proposed by the gentleman from Tennessee.

The question was taken, and the amendment was rejected.

Mr. WILSON of Pennsylvania. I move to strike out, in lines 13 and 14, after the word "Columbia," in line 13, down to and including "eighty-six," in line 14.

The Clerk read as follows:

Lines 13 and 14, strike out the words "prior to July 1, 1886."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 131, lines 13 and 14, strike out "prior to July 1, 1886."

Mr. WILSON of Pennsylvania and Mr. GARRETT rose.

The CHAIRMAN. The question is on the amendment of the gentleman from Pennsylvania.

The affirmative vote was taken.

Mr. GARRETT. Mr. Chairman, I submit that the gentleman from Pennsylvania [Mr. WILSON] is on his feet, desiring to address the House.

The CHAIRMAN. The gentleman from Pennsylvania did not ask recognition. He is entitled to be heard on the amendment if he desires.

Mr. WILSON of Pennsylvania. I was on my feet seeking recognition from the Chair and had secured recognition.

The CHAIRMAN. The Chair recognized the gentleman to offer the amendment.

Mr. WILSON of Pennsylvania. This is a limitation relative to the quality of asphalt. It provides that the standard shall be the best that existed prior to 1886. I submit that the standard should be the best existing at any time, either prior to 1886 or since that time. Hence I offer my amendment. That is all I have to say.

The question being taken, on a division (demanded by Mr. GAINES of Tennessee) there were—ayes 49, noes 63.

Mr. WILSON of Pennsylvania. I demand tellers.

Tellers were ordered, and the Chairman appointed Mr. TAWNEY and Mr. WILSON of Pennsylvania.

The committee again divided; and the tellers reported—ayes 48, noes 52.

Accordingly the amendment was rejected.

Mr. GAINES of Tennessee. Mr. Chairman, I desire to offer an amendment to strike out the words "laid in the District of Columbia prior to July 1, 1886, and."

The CHAIRMAN. The gentleman from Tennessee offers an amendment, which the Clerk will report.

The Clerk read as follows:

Lines 13 and 14, page 131, strike out beginning with the word "laid" and ending with the word "and."

The question being taken, the amendment was rejected.

Mr. SABATH. Mr. Chairman, I move to amend by striking out, in line 12, the words "eighty-five" and inserting in lieu thereof "sixty-five."

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

In line 12, strike out "eighty" and insert "sixty."

Mr. SABATH. That will make it $1.65.

The question being taken, the amendment was rejected.

The Clerk read as follows:

Executive Mansion: For ordinary care, repair, and refurnishing of Executive Mansion, and for purchase, maintenance, and driving of horses and vehicles for official purposes, to be expended by contract or otherwise, as the President may determine, $35,000.

Mr. WILLIAMS. Mr. Chairman, I should like to interrogate the chairman of the committee a moment. I notice that this is for "ordinary" care, repairing and refurnishing of the Executive Mansion. May I ask the gentleman why, under an extraordinary administration like this, we provide for only "ordinary" care and repairs?

Mr. TAWNEY. Well, this appropriation is for the next administration.

Mr. GARRETT. The gentleman misunderstands. He speaks of the present administration.

Mr. WILLIAMS. Yes.

Mr. GARRETT. The present administration is extraordinary; the next administration is to be ordinary.

Mr. WILLIAMS. Both administrations are extraordinary.

Mr. GARRETT. Why?

Mr. WILLIAMS. Because I saw a solemn announcement in a New York paper to the effect that upon the 4th of March next the American people were to experience a great revolution; that under the auspices of the Republican party they would upon that day change a President who could lick his weight in wildcats for a President who could eat his weight in possums. [Laughter.] Now, I submit that both are extraordinary administrations, and I move to insert the word "extra" before "ordinary."

Mr. SMITH of Iowa. Pardon me, but the next item carries the extraordinary appropriation.

Mr. WILLIAMS. No; that is for—

re-covering walls, reupholstering, and re-covering furniture, painting, decorating—

Now, neither administration needs any decorating.

Purchase of draperies.

They do not need draperies.

Mr. GARRETT. Yes; but the gentleman has overlooked the "and so forth."

Mr. EDWARDS of Georgia. And upholsteries.

Mr. WILLIAMS. I move to insert the word "extra" immediately preceding the word "ordinary."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

In line 9, page 132, before the word "ordinary," insert the word "extra."

Mr. WILLIAMS. I offer this solemnly to the American people and the American Congress, as my homage of reverence to these two Republican administrations.

The question being taken on the amendment of Mr. WILLIAMS, on a division (demanded by Mr. GAINES of Tennessee and Mr. WILLIAMS) there were—ayes 45, noes 67.

Accordingly, the amendment was rejected.

Mr. OLLIE M. JAMES. Mr. Chairman, I move to strike out the last word. I do so for the purpose of making an inquiry about the expenditure of this $35,000. My understanding the other day was that we provided the President of the United States with an automobile, at a cost of $12,000, and it looks like from this section we have the same amount for horses and vehicles as before. I want to ask the chairman in charge of the bill if this section is necessary in view of the fact that the other day we appropriated $12,000 for automobiles. I think that was too much. I do not think you ought to appropriate anything for automobiles. I am in favor of horses as far as I am concerned, because Kentucky produces them. I have no antipathy to this section because it provides for horses, but I want to find out whether the $35,000 is necessary.

Mr. MADDEN. I understand that Kentucky horses are retrograding.

Mr. OLLIE M. JAMES. Not at all; they are progressing and not retrogressing.

Mr. BARTLETT of Georgia. Mr. Chairman, when the question of appropriating for automobiles was before the committee I asked the gentleman from Minnesota if they would not require all of this money for horses and carriages notwithstanding we appropriated the $12,000 for autombiles. I call his attention to the fact that there was appropriated last year $35,000 for this purpose, and he said only $25,000.

Mr. OLLIE M. JAMES. That is the point I was making and which I desire to ask the chairman about.

Mr. BARTLETT of Georgia. The gentleman from Minnesota stated that if they got the appropriation of $12,000 they would not require this $35,000.

Mr. OLLIE M. JAMES. It was urged on the House that it was a matter of economy to provide the President with $12,000 for an automobile, and here they come along with the same old section as before, taking $35,000 of the people's money from an almost empty Treasury to provide the vehicles and horses. [Laughter.]

Mr. TAWNEY. If the gentleman from Kentucky had his way it would be empty now.

Mr. OLLIE M. JAMES. Not at all. If the gentlemen on that side voted for economy like I do, there would be a surplus instead of an empty Treasury. [Applause on the Democratic side.] The gentleman from Illinois drew the attention of the committee to the fact that this side of the House did not care how much you appropriated; but if we were actuated by partisan motives, of course we would want you to do what you always have done—empty the Treasury when you got a chance. [Laughter.] But we are in favor of economy; we want to save the people's money. [Laughter and applause on the Democratic side.]

I call the attention of the House to the warning of the gentleman from Illinois [Mr. MANN] that you must cut down expenses. The Treasury is empty now. You should not appropriate $12,000 for automobiles and then come in here for $35,000 for horses and vehicles for the President, the amount heretofore appropriated. How many horses does it take, and how many vehicles does it take, to run the President? Mr. Chairman, I move to strike out the word "thirty-five" and insert the word "twenty-three," so that it will read "$23,000."

Mr. BEDE. Twenty-three is "skidoo." [Laughter.]

Mr. TAWNEY. Mr. Chairman, I move that all debate now close on this paragraph and amendments.

Mr. CLARK of Missouri. I want to ask the gentleman from Minnesota a question. When we had this squabble about an automobile for the President, did not I ask the gentleman from Minnesota if we would not appropriate this same $35,000, and did he not tell me that it would be an economical performance, and that the appropriation for horses and vehicles would be cut out?

Mr. TAWNEY. I did say it.

Mr. CLARK of Missouri. Then why do not you cut it out?

Mr. OLLIE M. JAMES. I have offered an amendment to cut it down.

The CHAIRMAN. The gentleman from Minnesota moves that all debate on the paragraph and amendment be now closed.

The question was taken, and on a division (demanded by Mr. GAINES of Tennessee and Mr. CLARK of Missouri) there were 75 ayes and 57 noes.

So the motion was agreed to.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Kentucky.

The question was taken, and on a division (demanded by Mr. OLLIE M. JAMES) there were 58 ayes and 77 noes.

Mr. OLLIE M. JAMES. Tellers, Mr. Chairman.

Tellers were ordered. The Chair appointed as tellers Mr. OLLIE M. JAMES and Mr. TAWNEY.

The committee again divided, and the tellers reported that there were 49 ayes and 61 noes.

So the amendment was lost.

Mr. COX of Indiana. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk and ask to have read.

The Clerk read as follows:

Insert, at the end of line 13:

"*Provided*, That not more than $13,000 of the above appropriation shall be used in the purchase of horses and vehicles.

Mr. COX of Indiana. Mr. Chairman——

Mr. TAWNEY. Mr. Chairman, debate has been closed on this paragraph and all amendments thereto.

The CHAIRMAN. Debate is closed on this paragraph and all amendments. The question is on the amendment offered by the gentleman from Indiana.

The question was taken; and on a division (demanded by Mr. Cox of Indiana) there were—ayes 49, noes 63.

So the amendment was rejected.

The Clerk read as follows:

For extraordinary repairs of the White House, for re-covering walls, reupholstering and re-covering furniture, painting, decorating, purchase of drapery, etc., to be expended by contract or otherwise, as the President may determine, $15,000.

Mr. TAWNEY. Mr. Chairman, I move to strike out the last word. I want to say, Mr. Chairman, that there are but five legislative days remaining of this session. This is the most important appropriation bill the Congress of the United States

has to enact. It is absolutely necessary, if we are to perform our duty and enact this bill, that we act upon it at this session in time for the Senate to give some consideration to the bill. I have given every reasonable opportunity for legitimate debate, and I have not complained of the levity that has been indulged in for the last two hours, but I want to call to the attention of the members of this committee the fact that unless we go on with the consideration of this bill as Representatives ought to do, and give consideration to it, we will not be able to pass this bill in time to reach the Senate so that that body can give any consideration to it whatever, and the responsibility for that will fall upon the House of Representatives. I trust that during the remainder of the session we may now go on with the consideration of the bill and such amendments only will be proposed as are proposed in good faith, and that there will be no more delay than possible.

Mr. WILLIAMS. Mr. Chairman, I have listened to the lecture of the gentleman from Minnesota [Mr. TAWNEY] with very much attention, and with a great admiration for his versatility. [Laughter on Democratic side.] It is the first time I have ever seen him playing that peculiar rôle. If there is any fault for having this bill in here at this late hour it rests upon the Republican party in this Congress. If there shall be any fault in not getting it out of the Senate, it will rest with the Republican party there. We propose to consider this bill with diligence, with industry, with attention, with vigilance, and offer all necessary amendments in order that it may be carefully and deliberately considered. We propose to see to it that the requisite amount of money necessary is provided for the running of this Government, and in that view I now propose, in line 18, on page 132, to strike out the word "fifteen" and insert the words "twenty-five" therefor.

The CHAIRMAN. The gentleman from Mississippi offers an amendment, which the Clerk will read.

The Clerk read as follows:

Line 18, page 132, strike out "fifteen" and insert "twenty-five."

Mr. WILLIAMS. Mr. Chairman, that is a provision which provides for the "cleaning up" at the White House. [Laughter on the Democratic side.] I am an economist, but when it comes to providing money enough for this administration to clean itself, if it can, I am in favor of not being parsimonious. [Laughter on the Democratic side.] Mr. Chairman, if it were not for fear that the amendment might be misunderstood, I would also move that, in line 14, on page 132, the words "white washing" be inserted between the words "for" and "recovering." The strenuous life——

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

After the word "for," in line 14, insert the words "white washing."

Mr. WILLIAMS. Hold on, Mr. Chairman. I said if it were not for fear of being misunderstood I would offer that amendment. I have not offered it. Mr. Chairman, I have always tried to be, as you all know, to the highest degree dignified and respectful in all my political conduct toward the Chief Executive and the legislators of the opposite party, whom I love so much individually, and therefore I do not want to use those words.

I am willing to stand by "re-covering and reupholstering," both of which words appear in "the cleaning up" provision of this bill. I now move, Mr. Chairman, the amendment which I have already offered; and just to show how anxious I am to hurry up the public business and not to consume the time of the House needlessly, I ask unanimous consent that there be no further debate on the paragraph and amendments thereto, and that we vote at once upon the amendment I offer.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that all debate on this paragraph and amendments be closed. Is there objection?

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

For traveling expenses of the President of the United States, to be expended in his discretion and accounted for on his certificate solely, $25,000.

Mr. COOPER of Pennsylvania. Mr. Chairman, I move to strike out this paragraph.

Mr. OLLIE M. JAMES. Mr. Chairman, I reserve the point of order.

Mr. COOPER of Pennsylvania. Mr. Chairman, if I understand it, we made provision on the legislative bill which will wipe out the necessity for this paragraph, and while it has not yet been enacted into law, I think in all probability it will be, and there will be no necessity for this paragraph.

The CHAIRMAN. The question is on the motion to strike out the paragraph.

Mr. TAWNEY. I consent, Mr. Chairman.

The question was taken, and the motion was agreed to.

The Clerk read as follows:

For lighting arc electric lights in public grounds, as follows: For 7 in grounds south of the Executive Mansion, 32 in Lafayette, Franklin, Judiciary, and Lincoln parks, 14 in grounds south of Executive Mansion and in Monument Park, and 27 in Potomac Park driveway, at not exceeding $80 per light per annum, which sum shall cover the entire cost of lighting and maintaining in good order each of said lights; in all, $6,400, one-half of which sum shall be paid from the revenues of the District of Columbia and the other half from the Treasury of the United States.

Mr. GAINES of Tennessee. Mr. Chairman, I move to strike out the word "Lafayette," in line 17, page 134, and insert in lieu thereof the word "Jackson."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Line 17, page 134, strike out the word "Lafayette" and insert the word "Jackson."

Mr. GAINES of Tennessee. Mr. Chairman, I want to say that I have spent all the time that I possibly could during the last ten days, and I have had the kind assistance of experts to aid me, in trying to find the existing laws of the United States on this subject, but I find no statute—"existing law"—authorizing the naming of this park "Lafayette Park." My information is that it was originally named "Jackson Park" many, many years ago, possibly about the time the equestrian statue of Jackson was placed in this park just opposite the front of the White House yard. We have done very little in this city to what we should have done to show we respect and honor the memory of Andrew Jackson, and I see no reason why we should brush aside his name, in an appropriation bill or in a general law, or otherwise, and substitute the name of the other patriotic man, Lafayette. About fourteen years ago an effort was defeated in Congress to place the Lafayette statue (now on the corner of this park) in front of the Jackson statue (also in this park), facing the White House door, thereby excluding, practically, the sight of the Jackson statue from the White House door, where I have seen hundreds stop and say: "That is Jackson's statue over there in the park. There he is on the horse," and then discuss Jackson. This effort was strenuously opposed by the lamented Senator William B. Bate, and the Lafayette statue remained where it was.

There is always some one trying to change the name of this park from "Jackson" or "Lafayette" to something else. There has been recently a bill introduced in this House to call this place "Independence Park." I wish to say that Jackson's mother was a heroine in the war for independence, and her grave is unknown to-day and was unknown to General Jackson himself, though he tried to find it. She died from disease contracted while attending to sick soldiers, who had been fighting for independence. One of her sons was a hero in the war for independence, and his dust rests in an unknown grave. Another son was a like hero; his ashes were buried in a soldier's grave, but the place is unknown. The father of Jackson is buried in a known graveyard, but the exact grave is unknown, while Andrew Jackson, a soldier in this great war for independence, God spared to serve and save his country. From the time he was a boy, at the beginning of his teens, he was struggling for his country, and on down until the very last hours of his life—but you are familiar with these facts.

Mr. Chairman, pardon a personal allusion. I have the profoundest love for the memory of Lafayette. I was in Paris a few years ago with my little son, and after many inquiries at the leading places, covering several days, we finally went into an old bookstore and were informed of the whereabouts of his grave. We immediately visited the spot. I shall not describe its unkempt appearance, but loving the memory of the man as I did and do, I was deeply humiliated at the appearance of the monument—a marble box, to be brief—over his grave.

I thought then and still think our Government should ask the honor of aiding in preserving this tomb in a more appropriate manner. Overcoming the most adverse circumstances, together my little son and myself finally succeeded in purchasing a very handsome bouquet of flowers, and we carried these flowers back to this tomb and placed them about it, leaving a little card, on which was inscribed only these words:

In the name of the people of the Hermitage district.

[Applause.]

Mr. WILLIAMS. Make the point of order on the word "Lafayette."

Mr. GAINES of Tennessee. But, Mr. Chairman, let us render to Lafayette the things that could be Lafayette's and unto Jackson the things that should be Jackson's. He is one of the four great Presidents. Jackson is the only American, the only man,

who ever drove the English army from American soil, and in that driving taught them, for all time, they could never come within the jurisdiction of this Republic with an armed force, and they have not.

His name is known to every citizen of the land. The fruits of his national work have never been fully gathered; they never will. Every good Democrat and every good Republican, in the course of his political life, and very often social, quotes from Andrew Jackson. He was a chivalric citizen, a great soldier, an unconquered general, one of the greatest Presidents the world ever saw, and a man who loved his wife as his own life, and his neighbor as himself. [Applause.] He stood for right and justice and cut from right to left into where right and justice dwelt and set both up—to stay. He did as much to make that flag that now adorns this Chamber as any man whoever put his foot upon American soil, and I submit that Jackson is entitled to have this park named for him. We owe it to ourselves and to our posterity to see that justice, though tardy, is done to that great hero in this particular and in others. [Applause.]

Mr. MANN. Mr. Chairman, I hope that the gentleman from Tennessee, if he does not intend to return to Congress, will move to Chicago, where we have the most beautiful park in the world, named "Jackson Park." [Applause.] You could throw a hundred Lafayette parks into it and never know they were there, either by reason of size or beauty, and it seems to me that the gentleman is making a mistake in endeavoring to name this little piece of ground up here, ill kept and unkempt, Jackson Park, when we have the magnificent park, known throughout the world, the site of the World's Fair at Chicago, as "Jackson Park." [Applause.]

Mr. WILLIAMS. Mr. Chairman, the words which we have just heard from the gentleman from Illinois [Mr. MANN] would impress us very much but for the fact that we recognize that Chicago is not the political capital of the United States, whatever else it may be. Jackson Park, in Washington, the political capital, was long since named for the old hero of the Volunteer State of Tennessee, and the name ought to be kept. I suggested to the gentleman from Tennessee a moment ago that he make the point of order upon the word "Lafayette," because it was contrary to what existing law there is in the shape of maps and plats of the city.

The House having debated the question, he is, perhaps, too late to do that. It may not be out of place now, Mr. Chairman, at this early morning hour, when everybody ought to feel patriotic, if I were to rise to give a brief history, biography, and eulogy of Andrew Jackson, of the State of Tennessee.

Mr. Chairman, there has been some doubt about where he was born. North Carolina and South Carolina have both contended for the honor of his birthplace. That great mooted question has never been settled. In the early history of the country there was a legend—a tradition—to the effect that Andrew had risen up one day when a callow youth and mere boy in the proud spirit of western North Carolina and eastern Tennessee and had refused to black a British officer's boots. I do not know whether that legend be based upon fact or not.

Mr. GAINES of Tennessee. He carried the scar to his grave that that coward put upon him.

Mr. WILLIAMS. I am informed by the gentleman from the Hermitage district that it is not only true, but that he carried a scar to his grave. Later on, at Horseshoe Bend and at various other places, Andrew Jackson showed himself a worthy successor of "Nollichucky Jack," who had aready written the name of Tennessee, the "Volunteer State," in the history of the world as one of the illustrious breeding places of heroes and brave men.

Still later, Andrew Jackson won the only great victory on land that blessed American arms in the war of 1812, when, commanding Kentuckians and Tennesseans and Mississippians, he beat back the British hosts under Packenham, although they had been veterans in fighting Soult and Napoleon and all the balance of the great marshals down in Spain and various parts of the world, whose names I have now for a moment forgotten.

I hope, Mr. Chairman, my time will be extended indefinitely so that I may give a history of the Jackson family as far as we know, ever since Jackson was born, including a slight sketch of his mother, some little description of the Hermitage, and my own opinion of the magnificent financial success of Andrew Jackson in dealing with the United States Bank. [Laughter.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. WILLIAMS. Mr. Chairman, I ask unanimous consent for five minutes more for the gentleman from Tennessee [Mr. BROWNLOW] in order to ask the gentleman from Tennessee [Mr. BROWNLOW] a few questions.

Mr. TAWNEY. I move that all debate on the paragraph and amendment thereto be now closed.

Mr. WILLIAMS. A parliamentary inquiry. Do I understand that I am forbidden to ask the gentleman from the Carter County (Tenn.) District [Mr. BROWNLOW] a few questions concerning Andrew Jackson? [Laughter.] Does the gentleman from Minnesota [Mr. TAWNEY] ask unanimous consent that all debate be now closed upon the pending paragraph?

Mr. TAWNEY. Mr. Chairman, I move that all debate be now closed upon the pending paragraph and amendment thereto.

Mr. BYRD. Mr. Chairman, I would like to ask unanimous consent for about five minutes on this question of Andrew Jackson.

The CHAIRMAN. The question is on the motion of the gentleman from Minnesota [Mr. TAWNEY]——

Mr. OLLIE M. JAMES. A parliamentary inquiry.

The CHAIRMAN (continuing). That all debate be now closed on the paragraph and amendments thereto.

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. GARRETT. Division, Mr. Chairman.

The committee divided; and there were—ayes 81, noes 62.

Mr. CLAYTON. Mr. Chairman, I demand tellers.

Tellers were ordered.

The gentleman from Minnesota [Mr. TAWNEY] and the gentleman from Alabama [Mr. CLAYTON] took their places as tellers.

The committee again divided; and the tellers reported—ayes 65, noes 38.

So the motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee [Mr. GAINES].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. GAINES of Tennessee. Division, Mr. Chairman.

The committee divided, and there were—ayes 51, noes 68.

Mr. GAINES of Tennessee. Tellers, Mr. Chairman.

Tellers were ordered.

The gentleman from Tennessee [Mr. GAINES] and the gentleman from Minnesota [Mr. TAWNEY] took their places as tellers.

The committee again divided, and the tellers reported—ayes 42, noes 60.

So the amendment was rejected.

The Clerk read as follows:

Grant memorial: For continuing work for the erection of the memorial to Gen. Ulysses S. Grant, $42,000.

Mr. BYRD. Mr. Chairman, I only desire to add a few words to the magnificent tribute to Andrew Jackson by the gentleman who has just spoken. Long have I regarded him as one of the greatest of our Presidents, as well as one of the greatest men of modern times; and if we had a Jackson now in the White House, the country would not witness the humiliating subordination of the great American people at the feet of an oriental king. [Applause.] A leader of his courage would at once declare to the world that this Republic belongs to the American people, and that they intend to rule it as they please, notwithstanding the wrathful protests of China, Japan, or any other country. One declaration of this character, coming from a leader who "said what he meant and meant what he said," would ring around the world and give the Republic more character among nations than it has enjoyed in many years. [Applause.]

In my opinion, the most humiliating shame that ever overshadowed our fair name as a nation is the obsequious senility characterizing the diplomacy of the party in power in the pending Japanese crisis. By this abortive and cowardly method of solving this dangerous problem, not only is the sacred right of local self-government being sacrificed to appease the supposed wrath of the cross-eyed Mongolian, but the contemptuous scorn and ridicule of all nations are being invoked upon this once proud and patriotic Republic. [Applause.]

But we are told to forbear and deal gently with this increasing horde scourging the Pacific coast, because they do not understand the machinery of our dual system of government; but it is their business to know. Of this fact they must take judicial knowledge. It is not for us to teach international law to the despotisms of the earth; nor should it be our policy to muzzle the conscience of a sister State and force her to tremble in the presence of racial degeneracy. [Applause.]

This is the opportune time for the exemplification of the patriotic courage of the fathers of the Republic—for that lofty conception of true Americanism that rises above party spirit, or the entangling environments of sordid wealth. A bold, conservative, but vigorous, state paper, notifying the Mongolian

that his presence is not longer desired in this Republic, and demanding the immediate passage of a Japanese-exclusion law would inspire a patriotic thrill in every true American heart. Let this be done, instead of burning up the wires making apologies to a heathen king. [Applause.]

But, Mr. Chairman, it seems that the mantle of the Elijahs of old has fallen upon timid and strange prophets—that the Monroes, Blaines, and Clevelands have all passed away—and there is no one to maintain our international prestige. These great leaders, in the face of dangers far more appalling than those now beclouding our horizon, did not swerve as fawning pigmies at the feet of any monarch or combined monarchs. They were made of "sterner stuff" than those who now clasp the helm. Can it be that American statesmanship is deteriorating into mere commercial flunkyism, or that American patriotism has been paralyzed by the machinations of wealth? [Applause.]

In the dawn of our history—while we were still weak—President Monroe defied the allied monarchs of Europe, who were banded together under the oath-bound stipulation of the Holy Alliance to restore the emasculated throne of Ferdinand of Spain, and to return by force of arms the South American Republics that had been severed from the Spanish Crown by the sword of liberty. He boldly stated to these tyrants, whose hands were still red with the blood of outraged Poland and Hungary, that they could not molest these weak and defenseless republics, and that their presence on either of the western continents would be deemed by this Nation as a just cause for war. He said:

We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the colonies or the dependencies of any European power we have not interfered, and shall not interfere. But with the governments who have declared their independence and maintain it, and whose independence we have on great considerations and on just principles acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States.

He further said:

It is impossible that the allied powers should extend their political system to any portion of either continent without endangering our peace and happiness; nor can anyone believe that our southern brethren, if left to themselves, would adopt it of their own accord. It is equally impossible, therefore, that we should behold such interposition in any form with indifference.

Later, President Monroe defied the Russian Empire to prevent European colonization in America, stating to Congress that—

The occasion has been deemed proper for asserting as a principle in which the rights and the interests of the United States are involved that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European powers.

A few years after this famous doctrine was announced, and while the European nations were still breathing threats against the American institutions, President John Quincy Adams, supported by the powerful statesmanship of Mr. Webster, forced through Congress a proposition to send commissioners to Panama to meet the representatives from the Republics of South America, for the avowed purpose of forming an alliance of all the American Republics to reinvigorate and revitalize the Monroe doctrine.

What a contrast between the bulldozing policy of the President in throttling the legislative will of Nevada and California and that pursued by Mr. Blaine in dealing with the controversy growing out of the Italian massacre at New Orleans. The former boldly announces in substance that the States have no rights that are not subservient to the will of the President, while the latter politely notified the Italian premier that the Federal Government disavowed the right to interfere in the local affairs of Louisiana, and would not assume responsibility for injuries occurring within a jurisdiction over which the Federal Government had no control.

Further, in this connection, Mr. Blaine, quoting Mr. Webster, said:

And these private individuals, * * * coming voluntarily to reside in the United States, have certainly no cause of complaint if they are protected by the same laws and the same administration of law as native-born citizens of this country.

This declaration embodies the limit of our duty to protect resident aliens; and let me ask my Republican friends, how does this language compare with the statement made on the floor of the House a few days ago by the brilliant gentleman from Alabama [Mr. HOBSON], that the Japanese aliens, under the direct instructions of a federal official, were granted in San Francisco immunities and privileges not accorded native-born citizens—that they were permitted to run "grog" shops without a license, which privilege is denied to all other dealers? Is there one who believes that such an innovation upon the rights of a State would have been attempted by any administration of the past, or that the arrogant audacity of these foreigners would have been tolerated for a moment?

But, more than this, it was left to Grover Cleveland, the Ajax of American statesmen, to "sweep the cycle" of courageous diplomacy, when he spoke the heart of the Nation and said to England, whose empire encircles the earth and whose navies float on every sea, that she could not dismember Venezuela. That famous message, giving new life to the Monroe doctrine, brought England to her knees and terrified the other nations of Europe. Let me here read his closing paragraph:

In making these recommendations I am fully alive to the responsibility incurred, and keenly realize all the consequences that may follow.

I am nevertheless firm in my conviction that while it is a grievous thing to contemplate the two great English-speaking peoples of the world as being otherwise than friendly competitors in the onward march of civilization, and strenuous and worthy rivals in all the arts of peace, there is no calamity which a great nation can invite which equals that which follows a supine submission to wrong and injustice and the consequent loss of national self-respect and honor, beneath which are shielded and defended a people's safety and greatness.

This is the language of a great statesman whose mind was broad enough to compass the exigencies of the hour and strike a blow for the honor of the Nation. His thrilling words touched every chord of the American heart and rolled back the avalanche of ungenerous calumny that was fast sweeping him into innocuous oblivion. He abated the wrath of his enemies, encouraged the hopes of his friends, and taught the kingcraft of Europe that a giant ruled in the West. Yet by the sycophantic statesmanship of this administration we are advised that no other than a policy of subserviency will suffice in the present crisis. In reply to this contention, let me say that if asserting our rights while Japan is weak, with her credit exhausted, and when Russia is ready and anxious to renew the combat by which she lost her prestige in the Orient, will bring war, how can we hope to escape a conflict by waiting to act until Japan waxes strong, with an increasing navy completed and with the vast army of her treacherous subjects now here ready and anxious to wage war for their king? We should act, and act at once. Expel the little demons now here and forbid others to come.

As surely as night follows day there will be war if we much longer permit the coming of this army of scavengers. And when the conflict does come it will blacken the pages of our history with appalling cruelties. The members of our own race who labor for food and raiment for their families will never submit for their own blood to face starvation, forced upon them by these pauperized heathens. Search all history, and nowhere will you find the Caucasian bowing his head in supine submission at the feet of any other race. Deep down in the soul of every white man that walks the continent is the lasting conviction that no race save his own shall ever dominate this Republic.

Mr. Chairman, it is in evidence before this House that hordes of these people, fresh from the army that conquered Russia, are invading the Western States from Mexico and Canada; that many of them are of the most intelligent class of the Japanese soldiers, who are now spending their time in mapping the topography of that section. For what purpose is this being done? Is it not in perfect keeping with the treacherous conduct that has always characterized this insidious race? Also, we are informed that in the city of San Francisco alone there are 22,000 white laborers idle, while the oriental laborers have employment. [Loud applause.]

A city paper of February 7, reporting the speech made at a recent banquet by a Member from California [Mr. MCKINLAY], quoting his speech, says:

The speaker told of a valley where fruit could be matured earlier than anywhere else in the State. There the Japanese had driven out the white civilization, and American customs and American businesses were obliterated. This valley included a town large enough to support two banks.

"The question," he said, "is how long are the people of California to tolerate this?"

RIGHT TO RUN SCHOOLS.

Speaking of the constitutionality of the proposed school laws, he said: "I believe the State of California has the supreme right to regulate her schools, just as have the States of Louisiana and Mississippi."

Speaking of the action bringing on a war, he asked why a war scare between Japan and England was not started when Australia put a head tax of $500 on each Asiatic settler, or when Canada taxed each of them $50.

"It is because," he said, "England has been in the habit of enacting her own laws without consulting any other country."

The speaker said that war with Japan was an impossibility. Japan had only finished her first skirmish with Russia. She wanted Korea and Manchuria, but did not want the Philippines. Should Japan now go to war with even a much inferior power than the United States, Russia would again take up her march toward the Pacific that was begun by Peter the Great.

Unless we check this horde of Orientals, they will continue to come until the whole Mississippi Valley is infested with a

plague more appalling than that visited upon sinful Egypt. They will usurp the rights of our toiling millions to earn bread and, like parasites, will leech themselves to that fertile soil that should be transmitted as a heritage to the children of our blood yet to be born. This condition shoud never be; it can not be without seething our soil in blood.

Mr. Chairman, there is no surer guaranty of peace than prompt retaliation for every encroachment on our national honor. We have not existed thus long by the grace of monarchs, but in spite of them. Our institutions are hated by every despotism of the earth, and long since would have been destroyed but for our brave and determined resistance in every crisis. When this Republic, announcing the new birth of freedom to man, rose like a flaming meteor from the shores of the Western Continent, the tyrannical kings of earth first beheld it with envious rapture, and then with malicious hate. "Liberty anywhere is a menace to despotism everywhere."

The scepter of state will soon pass to another, and may his first act be to wipe away this blemish on the nation's honor, even though the worst should come, for "Rather let the pillars of the Republic shake to their foundations, and her lofty battlements be overwhelmed bearing with them the last hope of liberty on earth, than that she should falter in the terrible hour, or swerve from the bloodiest path she may be called to tread." [Loud applause.]

Mr. CAMPBELL. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Kansas offers an amendment, which the Clerk will report.

The Clerk read as follows:

After the word "dollars," in line 20, page 135, insert:
"*Provided*, That no part of the money appropriated in this paragraph shall be available until the four bronze lions at the base of the monument are removed, and four cavalry horses with a soldier by his side, removing a cavalry saddle and putting on a plow harness, are placed in their stead."

Mr. MANN. I make the point of order against the amendment.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

Mr. CAMPBELL. I should like to be heard on the point of order.

The CHAIRMAN. Under ordinary circumstances, the Chair would be glad to hear the gentleman; but the point of order is so clear that the Chair does not need to hear any argument upon it.

Mr. CAMPBELL. It is a limitation upon the appropriation.

Mr. WILLIAMS. Mr. Chairman, in order to be able intelligently to discuss even the point of order, as the House was in such great disorder——

The CHAIRMAN. The point of order has been ruled upon.

Mr. WILLIAMS. But we desire to know—where does the amendment come in?

Mr. MANN. It does not come in at all. It is ruled out.

Mr. WILLIAMS. Mr. Chairman, in order that the House may know whether or not the amendment ought to go out, the House is entitled to know where it tried to come in. I make the point of order that the House is in such confusion that nobody knows where the Clerk is reading.

The CHAIRMAN. The Chair thinks the House is in very good order. The Clerk will read.

The Clerk read as follows:

For fuel, lights, oil, waste, packing, tools, matches, paints, brushes, brooms, lanterns, rope, nails, screws, lead, electric lights, heating apparatus, oil stoves for elevator car and upper and lower floors; repairs to engines, boilers, dynamos, elevator, and repairs of all kinds connected with the Monument and machinery; and purchase of all necessary articles for keeping the Monument, machinery, elevator, and electric plant in good order, $3,000: *Provided*, That hereafter no advertisement of any kind shall be displayed and no articles of any kind shall be sold in or around the Monument, except upon the written authority of the Secretary of War.

Mr. KEIFER. Mr. Chairman, I have a little amendment here——

Mr. BARTLETT of Georgia. I want to reserve a point of order against the proviso.

Mr. KEIFER. I have an amendment to this paragraph.

The CHAIRMAN. The gentleman from Georgia was on his feet, and he states that he desires to reserve a point of order against the proviso.

Mr. BARTLETT of Georgia. I want to reserve a point of order against the proviso and to inquire of the gentleman from Minnesota if that proviso is now existing law. I do not know that it is, and I do not think it is.

Mr. MANN. It is, except as to the written order.

Mr. TAWNEY. The proviso is not existing law.

Mr. BARTLETT of Georgia. I will say to the gentleman from Minnesota that I saw in the paper the other day a matter that struck me very forcibly, that sometimes permission had been given to certain people to sell articles down there for the benefit of the blind, and that they had been deprived of that privilege.

Mr. TAWNEY. Let me state to the gentleman from Georgia what the facts are. Prior to the passage of the current sundry civil appropriation act this was substantially the law; that is, so far as there was any law on the subject at all. The Superintendent of Public Buildings and Grounds, having control of the grounds, had authority to issue or not issue licenses, as he saw fit, and did issue a permit at one time to sell a guidebook. It seems that, for some reason or other, the pressure on the superintendent for the same privilege was very great, and at the last session of Congress he represented to the committee that he would like to have a prohibition carried in the sundry civil act that would prohibit the sale of any articles of merchandise or anything of that kind around the Washington Monument. That provision was carried in the sundry civil act, and was the law up to the passage of the urgent deficiency appropriation bill at this session, when that provision was modified so as to give the right to sell a guide of the Washington Monument.

There is only one guidebook that is published which gives all the information regarding the history of the Monument and the inscriptions on the stones on the interior of the Monument. Now, it transpires that in doing that we have deprived a certain institution for the blind here of some profits that it formerly received from the sale of postal cards there through a vending machine. That fact was never brought to the attention of the committee until this session.

Mr. BARTLETT of Georgia. The sole purpose of my inquiry is to reach that.

Mr. TAWNEY. And this is put in here for the purpose of giving the Superintendent of Public Buildings and Grounds authority to issue a permit or license.

Mr. BARTLETT of Georgia. The Secretary of War.

Mr. TAWNEY. This provides that the written authority shall be by the Secretary of War.

Mr. BARTLETT of Georgia. The thing I saw complained of was that Mr. Bingham, Superintendent of Public Buildings, revoked the license of the people who engaged in this laudable business of selling postal cards for the benefit of the blind. The gentleman says this provision is put in for the purpose of giving these people that opportunity. That is all I want to accomplish.

Mr. TAWNEY. This was put in on account of the appeal made by them and in their behalf.

Mr. BARTLETT of Georgia. Will this accomplish the purpose?

Mr. TAWNEY. It will.

Mr. BARTLETT of Georgia. Then I withdraw the point of order.

Mr. WILLIAMS. Mr. Chairman, I shall make the point of order to the words "except upon the written authority of the Secretary of War," lines 18 and 19. The point of order is that the words change existing law.

Mr. MANN. I submit that the point of order comes too late. The amendment has been discussed for five minutes.

Mr. WILLIAMS. I beg the pardon of the gentleman from Illinois; he is badly misinformed. The gentleman from Georgia had reserved the point of order, and therefore I could not make it until he withdrew it.

The CHAIRMAN. The Chair sustains the point of order.

Mr. TAWNEY. I do not think the point of order can be taken in that form. The paragraph is subject to a point of order, but the gentleman can not make a point of order to that part of the paragraph.

Mr. MANN. Oh, yes, he can.

Mr. WILLIAMS. I did make it and the Chair has sustained it. If the Chair wants to change his opinion, I would like to be heard.

Mr. MANN. The point of order was to be reserved on the proviso.

Mr. FITZGERALD. It ought all to go out if anything goes out.

Mr. WILLIAMS. I do not want to make a point of order on all of it. If the Chair is not with me, I want to be heard on the point of order. If the Chair is with me, I do not want to be heard.

The CHAIRMAN. The Chair will hear the gentleman briefly.

Mr. WILLIAMS. The language which is new in the bill is this:

Except upon the written authority of the Secretary of War.

Heretofore advertisements of any kind could be displayed and articles of any kind could be sold in and around the Monument, including a guide to the Monument. It did not

require the written authority of the Secretary of War. We have already centralized power in the Executive of this Government far enough. This is a change of existing law, a change of existing law depositing with the Secretary of War, who is busy all the time with highly important duties, supervisory power over the character of advertisements in and about the Washington Monument.

It is highly difficult to suppose that the Secretary of War, who must take care of the Philippines and Hawaii, and at odd intervals of Cuba, and then all of the balance of the world, including the army and the criminal charges against the officers in it, could or should have time in which to acquaint himself with the character of advertisements down and about the Washington Monument. I am attempting partially to save the Secretary of War.

That is not all, Mr. Chairman; a very important question suggests itself here, to which I direct the attention of the House. If the very important advertisements of the President of the United States, published in the report of the President's Home Commission, and referred to the Committee on the District of Columbia and ordered to be printed with illustrations, pages 378, at bottom, and 379 of that document, should be displayed by presidential authority in the neighborhood of the Washington Monument, I humbly submit that they would be contrary to the preservation of the public health and of the public morals, because of the encouragement of race suicide by criminal methods advertised by the President in a way which could not have gone through the ordinary mails because of obscenity.

The point of order is that the words "except upon the written authority of the Secretary of War" constitute new legislation and a change in existing law.

Mr. FITZGERALD. Will the gentleman yield for a moment?

Mr. WILLIAMS. Yes.

Mr. FITZGERALD. I wish to call the attention of the gentleman to what the situation is. As the law exists to-day, the only thing that can be sold at the Washington Monument is a certain guidebook. It seems that there has been there in the Monument a machine——

Mr. WILLIAMS. Mr. Chairman, I understand that. I do not want to lose my time, and I will reply to the gentleman now because I have understood his question before he has finished it. I am as much opposed as he is to the monopoly of that guidebook.

Mr. FITZGERALD. Mr. Chairman, I doubt if the gentleman does know what I have in mind.

Mr. WILLIAMS. But if the language I still leave in the bill were retained in the bill that monopoly would be gotten rid of, and that language would be:

Provided, Hereafter no articles shall be displayed or no articles of any kind shall be sold in or around the Monument.

The CHAIRMAN. The Chair will hear the gentleman from Illinois. The Chair does not care to hear further argument on the side of the question advocated by the gentleman from Mississippi [Mr. WILLIAMS].

Mr. MANN. Mr. Chairman, the proviso is one proposition. Now, it is quite true that ordinarily you can make a point of order on the whole paragraph subject to a point of order, or you can make a point of order on a part of a paragraph subject to a point of order, and we have an illustration here, it seems to me, of what can be done and what can not be done in that respect. The proviso is subject to a point of order. It reads:

That hereafter no advertisement of any kind shall be displayed and no articles of any kind shall be sold in or around the Monument, etc.

I take it that no one would claim that you could make a point of order on the word "no" and stop there, so that you would strike out the word "no" and make the paragraph read:

That hereafter advertisements of any kind shall be displayed, etc.

So that the question is whether you can strike out on a point of order a word or a specific clause in an entire paragraph subject to a point of order which, when stricken out, entirely changes the meaning of the paragraph.

If you could not strike out the word "no" on a point of order, then you can not strike out the exception on the point of order. The entire paragraph, being subject to a point of order, could go out, and a separate clause not related to the rest of the paragraph could go out, but this clause is not separate. It depends entirely on the paragraph, and if it should be ruled that you can strike out "except upon the written authorization of the Secretary of War," then it seems to me the point of order might have been held upon the two words "no" that appear in the proviso, and with them stricken out make the paragraph read directly contrary to what is intended. It may be said that you can correct that by amendment. Very well; then it follows that if you strike out this exception under the same conditions it could immediately be offered as a germane amendment, and, query, Can you strike out on a point of order a proposition which is immediately in order if offered identically in the same language as an amendment? It seems to me that would be the reduction of parliamentary refinement to almost an absurdity.

The CHAIRMAN. The Chair is informed that there has been a precedent covering this and is waiting in hopes that it might be found. Except for that, the Chair is ready to rule. The Chair would ask that this may go over until the precedent, if there be one, may be found.

Mr. TAWNEY. I ask unanimous consent that the paragraph may be passed without prejudice.

The CHAIRMAN. The gentleman from Minnesota asks that the paragraph be passed without prejudice. Is there objection?

There was no objection.

The Clerk read as follows:

Improvements, Wakefield, Va.: For repairs to fences and cleaning up and maintaining grounds about the monument, $100.

Mr. WILLIAMS. Mr. Chairman, I desire to ask the gentleman in charge of the bill to explain this item.

Mr. TAWNEY. Mr. Chairman, I will explain that to the gentleman from Mississippi. If he was as familiar with the birthplace of George Washington as he is with the birthplace of Andrew Jackson, he would not ask for an explanation. This is for repairs to the fences around the monument.

Mr. WILLIAMS. Then, Mr. Chairman, I understand that this Republican Congress——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. WILLIAMS. Mr. Chairman, I move to strike out the last word. I do so for the purpose of saying that I understand that this Republican party, a few days after the 22d of February, the birthday of George Washington, the Father of his Country, the great hero of the Revolutionary war, is devoting the magnificent sum of just exactly $100 per annum for repairs to the fences and cleaning up and maintaining the grounds about the monument erected to George Washington at his birthplace.

For four or five years the Republican party refused to read George Washington's Farewell Address on the 22d of February. The other day it read it in order to rebuke its own administration.

Mr. TAWNEY. Mr. Chairman, I make the point of order that the gentleman is not speaking to the amendment.

Mr. WILLIAMS. Why, I am in order; I am talking to the point. Here is an appropriation for repairs at George Washington's birthplace, and I am talking about George Washington, his importance to the country, his significance to the world, all of which is absolutely related to the amount of money that ought to be appropriated to preserve properly his birthplace.

The CHAIRMAN. The gentleman will proceed in order; the Chair thinks he is not speaking to the amendment.

Mr. WILLIAMS. I am not speaking to what?

The CHAIRMAN. To the gentleman's amendment.

Mr. WILLIAMS. I am speaking to the paragraph to which my amendment was offered, and nobody can understand the amendment without first understanding the paragraph, and the paragraph relates to Wakefield, Va., the birthplace of George Washington.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. WILLIAMS. Mr. Chairman, I suppose it would be hardly necessary for me to ask for five minutes more in order to explain why Wakefield occupies a peculiar position and ought to have more than $100.

Mr. WATSON. Mr. Chairman, I object.

Mr. RANSDELL of Louisiana. Mr. Chairman, I wish to submit some general remarks on the subject of rivers and harbors, and not desiring to inflict them upon the House at this late hour, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Louisiana asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. WILLIAMS. Mr. Chairman, I will be very glad indeed to hear the gentleman from Louisiana speak, but I am forced to object to extending remarks in the RECORD at this early hour, when we have just begun the next day.

The Clerk read as follows:

Improving Ohio River below Pittsburg, Pa.: For continuing improvement in completion of contract authorization by the construction of Dams Nos. 13 and 18, $40,000.

Mr. WILLIAMS. Mr. Chairman, I move to strike out the last word, in order to ask a question of the chairman of the

committee. Will the chairman of the committee please explain what Dams 13 and 18 are, when they were authorized, and how much money has been invested in them?

Mr. TAWNEY. They are two dams authorized on the Ohio River.

Mr. WILLIAMS. When were they authorized?

Mr. TAWNEY. I do not know.

Mr. MANN. They were authorized in 1899.

Mr. TAWNEY. The amount is the amount estimated by the War Department to be expended for the next fiscal year.

Mr. WILLIAMS. Mr. Chairman, with that explanation I am perfectly satisfied.

The Clerk read as follows:

For works authorized by the river and harbor act of 1902, as follows:

Mr. BOOHER. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. BOOHER. For the purpose of asking a question of the chairman of the committee. I move to strike out the last word. I want to ask the chairman of the committee how large a river or stream is the Arthur Kill?

Mr. TAWNEY. I do not know.

Mr. BOOHER. I never heard of it before, but I have read——

Mr. TAWNEY. The gentleman from New York can probably answer that question.

Mr. BOOHER. I have read the bill with a great deal of interest, and I have failed to find an appropriation of a single dollar in this whole bill for the improvement of the longest river in the world and the greatest river in the world.

Mr. TAWNEY. That is not the fault of the Committee on Appropriations, I would say.

Mr. BOOHER. I am afraid it is.

Mr. TAWNEY. There has been no authorization.

Mr. BOOHER. I can not help that. There is not an appropriation of a single dollar for the improvement of the Missouri River from its mouth to its source. You know it rises way up in the mountains and empties into the Gulf of Mexico.

Mr. RODENBERG. Empties into the Mississippi.

Mr. BOOHER. No; it does not; the gentleman is mistaken. People generally think the Missouri empties into the Mississippi, but the Mississippi empties into the Missouri. If you are acquainted with the Missouri River at all, you will know that from the time it strikes the Mississippi River at St. Charles it entirely changes its course and is almost too thick to run.

Mr. GARRETT. Where is the Missouri? [Laughter and applause.]

Mr. BOOHER. I want to say to the gentleman that I can not locate the Missouri River from the bill or by a bill introduced in this House that came from the River and Harbor Committee. It is absolutely impossible to find it.

Now, Mr. Chairman, I am asking this question in perfectly good faith. I have searched this bill through and through and find no provision for the protection of the people living along the Missouri River or for the protection of the harbors along that river, and there is not a single dollar for a single place along the river, yet you may find every little stream that you can jump across in the North and East provided for in this bill. [Applause.]

Mr. CALE. Will the gentleman permit an interruption?

Mr. BOOHER. Yes, sir.

Mr. CALE. I would like to say to the gentleman that while he is talking about the longest river, there is not a dollar in this appropriation for the longest navigable stream there is in North America.

Mr. BOOHER. That is the gentleman's misfortune, just as it is mine.

Mr. CALE. And that river discharges more water than the Mississippi.

Mr. WILLIAMS. Mr. Chairman, we have not yet received any information about Arthur Kill. Somebody from New York ought to know something about Arthur Kill, and ought to satisfy the curiosity of the gentleman from Missouri [Mr. BOOHER].

Mr. BURTON of Ohio. Seriously, I would state that the Arthur Kill and the Kill van Kull are connecting channels between New York Harbor and Raritan Bay. They are located between Staten Island and the State of New Jersey. There is an enormous traffic on the two, perhaps twenty-five times as great as on the Missouri River, and the total amount appropriated for it has been about one-tenth as much.

Mr. BOOHER. That does not prove anything, because the money that has been spent upon it has kept it in shape. Probably you have expended a hundred times as much on that river as on any western river.

The Clerk read as follows:

Improving Hay Lake and Neebish channels, St. Marys River, Michigan: For continuing improvement in completion of contract authorization, $395,000.

Mr. WILLIAMS. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. WILLIAMS. For the purpose of getting information, I move to strike out the last word. I would like to ask the gentleman from Minnesota [Mr. TAWNEY], in charge of the bill, or the gentleman from Iowa [Mr. SMITH], to give me some specific information about the Neebish channels, referred to on page 138, line 14, of the bill.

Mr. TAWNEY. What information does the gentleman desire?

Mr. WILLIAMS. I want the gentleman to give me any information upon Neebish Channel.

Mr. MANN. That is a channel constructed by the Government, running out of Lake Superior, which is just finished, the channel through which all of the commerce from Duluth, and so forth, on Lake Superior comes east. It is a long way from Duluth. It is on this end of Lake Superior.

Mr. WILLIAMS. The explanation is entirely satisfactory, Mr. Chairman. [Laughter.]

The Clerk read as follows:

Improving Black Warrior, Warrior, and Tombigbee rivers, Alabama: For continuing improvement by the construction of locks and dams, $1,000,000.

Mr. CLAYTON. Mr. Chairman, I move to add, after the words "one million dollars," in line 6, page 140, the following words:

For continuing the improvement of the Choctawhatchee River in Alabama and Florida, $25,000.

Mr. BURTON of Ohio. Mr. Chairman, I make a point of order on that. The authorization has not been made.

Mr. CLAYTON. That is a worthy project down there.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

After line 6, insert:
"Continuing the improvement on the Choctawhatchee River, Alabama and Florida, $25,000."

The CHAIRMAN. On that the gentleman from Ohio [Mr. BURTON] makes what point of order?

Mr. BURTON of Ohio. I take it that there is no necessity for discussing that. These amounts are merely in pursuance of authorizations made in the river and harbor act. This is an entirely independent, outside item.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

Improving Mississippi River from mouth of Ohio River to Minneapolis, Minn.: For continuing improvement of Mississippi River from the mouth of the Ohio River to and including the mouth of the Missouri River, $250,000.

Mr. RUSSELL of Missouri. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Missouri offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend by adding on page 143, after the word "dollars," in line 14, the following:
"For the improvement of the Mississippi River at Birds Point, Missouri, for protection from caving banks, $50,000."

Mr. BURTON of Ohio. Mr. Chairman, I raise the same point of order on that as on the other. It is plainly objectionable, and on the same grounds.

The Clerk read as follows:

For continuing construction of Lock and Dam No. 8, $364,000.

Mr. OLLIE M. JAMES. I move to strike out the last word for the purpose of getting some information. I would like to know if the gentleman in charge of the bill can inform me what is provided in this bill, if anything, relative to the 9-foot channel from Pittsburg to the mouth of the Ohio River?

Mr. TAWNEY. Nothing.

Mr. OLLIE M. JAMES. No provision at all?

Mr. TAWNEY. There is no provision carried in this bill for the object referred to by the gentleman from Kentucky.

The Clerk read as follows:

Improving St. Marys River, Michigan: For continuing improvement at the falls by the construction of a new lock, with a separate canal, $425,000.

Mr. BEDE. Mr. Chairman, I desire to offer an amendment, on page 146, after line 6.

The Clerk read as follows:

Page 146, between lines 6 and 7:
"Duluth-Superior Harbor: Continuing the work of dredging inside the Duluth entrance, commenced under authority of the act approved May 28, 1908, the sum of $150,000."

Mr. BURTON of Ohio. Mr. Chairman, I make the point of order on that.

Mr. BEDE. I would like a ruling on that point. I would like to make a statement. On the adoption of the bill approved May 28, 1908, an appropriation of $200,000 was made for this improvement, in accordance with the report of the engineers previously made. That plan was adopted. Now, the gentleman from Ohio, who is objecting, is really in favor of this amendment, I think, although he will, because of being on the Rivers and Harbors Committee, speak against it. We would have had a general river and harbor bill if the gentleman from Ohio had not been trying to raise the standard of the United States Senate. [Laughter.]

He had many duties to perform, so that we could not get together early enough to frame up a general river and harbor bill for this short session. Therefore this item is not included. When the representative of the dredgers came to see us a year ago he was promised that this work would be attended to this winter. Every man within the sound of my voice went on the platform last fall and told the laboring men that they would have a square deal.

The CHAIRMAN. The Chair is quite ready to rule.

Mr. BEDE. I am not quite ready, if I have five minutes.

The CHAIRMAN. The gentleman can talk upon the point of order.

Mr. BEDE. We have in the act of Congress approved May 28, 1908—section 4 of that little pony bill provides:

SEC. 4. That the Secretary of War may, in his discretion, apply the whole or any part of the unexpended balance of the amount heretofore appropriated for the improvement of the Duluth-Superior Harbor, Minnesota, to dredging inside the Duluth entrance thereto, as recommended in House Document No. 221, Sixtieth Congress, first session.

That bill, I think, adopts this plan, and therefore this amendment can properly come in under the sundry civil bill.

The CHAIRMAN. The Chair will ask if the work is under contract?

Mr. BEDE. Not the whole project, but about $200,000 was appropriated for this improvement, and we want to continue it. There was an estimate of $550,000 for dredging Duluth Harbor. That work is now in progress. The present contract will expire on the 1st of July. The whole plan was adopted by the act of last Congress.

The CHAIRMAN. The Chair would like to hear from the gentleman from Ohio as to the point of order.

Mr. BURTON of Ohio. I was surprised to hear the gentleman's remarks. This project is the same as hundreds of others for which there is no contract. I think the gentleman has got a little outside of his sphere. I feel like quoting Hamlet slightly altered:

Let your humorist say no more than he is set down for.

[Laughter.]

Mr. BEDE. Mr. Chairman, the gentleman from Ohio himself promised, when the men who represented the dredging interest appeared before our committee a year ago, that this winter this work should be done. That has nothing to do with the point of order, but it has a little to do with the point of honor. We should have had a general river and harbor act and kept faith with the American people, but as two or three members of our committee had to run for the United States Senate, the committee did not have time.

Mr. MANN. Was the gentleman one of them?

Mr. BEDE. Not at all.

You stood by the action of the committee. I know that the gentleman from Ohio [Mr. BURTON] himself would be glad to have this item go in. He can not concede it, but he would like to have it go in; and I assure you that the times are harder for the laboring men of the United States than they were a year ago. We have oftentimes said that the Republican party was the only party that could have a panic and prosperity at the same time; but it is getting to be a little hard all around.

The CHAIRMAN. The Chair is ready to rule.

Mr. WILLIAMS. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. WILLIAMS. I happened to be in the cloakroom at the time when this amendment was offered. Everything of interest to the gentleman from Minnesota [Mr. BEDE] is a question of vital interest to me. I would like to ask the gentleman to indicate to me the subject of his amendment—the character of it.

The CHAIRMAN. The Chair is ready to rule. The Chair finds, from the statement of the gentleman from Minnesota [Mr. BEDE], that this work is not under contract.

Mr. BEDE. Not wholly under contract; it is, partly.

The CHAIRMAN. The work for which this appropriation is asked is not under contract.

Mr. BEDE. No.

The CHAIRMAN. The Chair thinks, therefore, that this amendment is not in order upon the sundry civil appropriation bill, although it would be in order, of course, on a river and harbor bill.

The Chair will state that this point has been squarely ruled upon in the Fifty-second Congress.

Mr. BEDE. I hope the gentleman from Ohio will withdraw his objection and let the thing go through.

The CHAIRMAN. The Clerk will read.

Mr. CLAYTON. I move that the committee do now rise.

The CHAIRMAN. The gentleman from Alabama moves that the committee do now rise.

Mr. CLAYTON. It is now a quarter after 1 o'clock in the morning.

The question being taken on the motion of Mr. CLAYTON, on a division (demanded by Mr. CLAYTON) there were—ayes 44, noes 60.

Mr. CLAYTON. Tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. TAWNEY and Mr. CLAYTON.

The committee again divided; and the tellers reported—ayes 27, noes 61.

Accordingly the motion was rejected.

The Clerk read as follows:

Headstones for graves of soldiers: For continuing the work of furnishing headstones for unmarked graves of Union soldiers, sailors, and marines in national, post, city, town, and village cemeteries, naval cemeteries at navy-yards and stations of the United States, and other burial places, under the acts of March 3, 1873, and February 3, 1879, also for continuing the work of furnishing headstones for unmarked graves of civilians interred in post cemeteries under the acts of April 28, 1904, and June 30, 1906, $75,000, to be immediately available.

Mr. WILLIAMS. Mr. Chairman, a parliamentary inquiry. Where is the Clerk reading?

The CHAIRMAN. On page 148, and he stopped at line 15 on that page.

Mr. WILLIAMS. I thank the Chair for the information he has so courteously extended.

The Clerk read as follows:

Bringing home the remains of officers and soldiers who die abroad: To enable the Secretary of War, in his discretion, to cause to be transported to their homes, or to such national cemeteries as may be designated by proper authorities, the remains of officers and enlisted men of the army who die in line of duty, including civilian employees of the army in the employ of the War Department who die abroad (inclusive of Alaska) and officers or enlisted men or civilian employees of the army who die on army transports, $50,000.

Mr. WILLIAMS. I move to strike out the paragraph that has just been read.

Soon after the war between the States the matter was brought to the attention of Robert E. Lee, a Southerner, and one of the greatest Americans who ever lived, that a great many southern soldiers were buried upon the battlefield of Gettysburg, and the question was being agitated as to their being brought home to be buried there. Robert E. Lee replied that he knew of no better resting place for a soldier than the place where he had lost his life in behalf of his State or his country. I know of no better resting place for a soldier. I think there is a lot of Chinese superstition and maudlin sentimentality about this business. When a man dies, he is dead. If he dies as a sailor, the best place to put him is in the ocean, where he died fighting the enemy.

If he dies on land as a soldier, the best place to put him is where he dies, and let the battlefield be his monument. I have been making a good many motions to-night that were intended, I will say really and frankly, to take up time, but this particular motion is not intended for that purpose. I do think it is about time that the most enlightened nation in the world should overcome this superstition as to where it should bury the dead after the soul has departed from it and after the spirit that enlivens the body has done its best in order to illustrate his country's record and to distinguish himself as a servant of the country.

I have a boy of my own in the United States Army, and he was not appointed as a cadet by me, either. I would consider it no disgrace, if he died on Chinese or Japanese soil, to have him buried there.

Mr. TAWNEY. I do not think the gentleman understands this paragraph. If his son was in the army and in a time of peace he died in the Philippine Islands, this would enable the Government to bring his body home.

Mr. WILLIAMS. I remember one of the most pathetic things in my recollection as a Member of Congress during the Spanish-American war. Down in my district there was a brave and true man who had been a colonel in the Eighteenth Mississippi Regiment in the war between the States. He had a son, who volunteered, and served in Cuba in the United States Army.

He was killed there. Some time after this man received a letter from a Washington undertaker, saying that he would send his son's body home for so much. The man sent me a check for $250 to pay the expense. I wrote to him that Congress had passed a law providing for bringing home the remains of the United States soldiers killed on the field of battle or who died in the service, and that I thought that this Washington undertaker was attempting to cheat him. I went down to the War Department and found that that was so. I reindorsed his check to him and sent it home, and his son's body came in due time.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WILLIAMS. I ask for five minutes more.

Mr. TAWNEY. I shall have to object.

Mr. WILLIAMS. I move to strike out the last word.

The CHAIRMAN. The gentleman has an amendment pending.

Mr. WILLIAMS. I move to amend the motion which I have already made by striking out the last word of the amendment.

The CHAIRMAN. The gentleman can not take the floor to amend his own amendment in that way.

Mr. WILLIAMS. I will withdraw my amendment.

Mr. OLLIE M. JAMES. I move to strike out the last word.

Mr. MANN. The gentleman from Mississippi has a motion to strike out the paragraph.

The CHAIRMAN. The gentleman from Kentucky is in order.

Mr. OLLIE M. JAMES. I would like to hear the gentleman from Mississippi along the lines that he has been speaking.

The CHAIRMAN. The gentleman from Kentucky can not yield time to the gentleman from Mississippi in that way.

Mr. WILLIAMS. Now, Mr. Chairman, having withdrawn my amendment in order to get more time I will renew it for the consideration of the House.

The CHAIRMAN. The gentleman from Mississippi moves to amend by striking out the paragraph.

The question was taken, and on a division (demanded by Mr. WILLIAMS) there were 17 ayes and 76 noes.

Mr. WILLIAMS. I make the point that there is no quorum.

The CHAIRMAN. The gentleman from Mississippi makes the point of no quorum. The Chair will count.

Mr. MANN. While the Chair is counting I want to say to the gentleman from Mississippi that if his point of no quorum is sustained it will prevent the adoption of the paragraph for taking care of the confederate mounds in Chicago, one of the precious things to my heart.

Mr. WILLIAMS. The gentleman is mistaken; this bill is going to pass. That point is not worthy of the gentleman from Illinois.

Mr. MANN. That would be the effect of the gentleman's proposition.

The CHAIRMAN. One hundred and one gentlemen; a quorum. The Clerk will read.

The Clerk proceeded to read.

Mr. WILLIAMS. Mr. Chairman, I demand tellers.

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. WILLIAMS. I ask for tellers.

Mr. TAWNEY. Mr. Chairman, I make the point of order that the request for tellers comes too late.

Mr. GAINES of Tennessee. Mr. Chairman, the gentleman made the request as soon as he could.

Mr. OLLIE M. JAMES. And as loudly as he could. If there is a quorum present, let us proceed; and if not, let us find it out.

Mr. GAINES of Tennessee. Mr. Chairman, the gentleman from Mississippi had a right to make his speech. Let us not be discourteous.

Mr. MANN. Oh, we could not be discourteous to the gentleman from Mississippi or to the gentleman from Tennessee.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Camp Butler National Cemetery, near Riverton, Ill.: For the construction of a lodge for use of the superintendent of the Camp Butler National Cemetery, near Riverton, Ill., $7,000.

Mr. GAINES of Tennessee. Mr. Chairman, I ask unanimous consent that the gentleman from Mississippi be allowed to finish his speech.

Mr. WILLIAMS. Mr. Chairman, even if that request were granted, I should refuse to make a speech. I ask the gentleman from Tennessee to withdraw his request. I merely wanted to proceed in order, under my rights, and not by the favor of the House.

Mr. GAINES of Tennessee. I will withdraw the request.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Chalmette National Cemetery, Louisiana: The Secretary of War is hereby authorized to accept a conveyance of the lands and servitudes described in articles of agreement entered into the 31st day of July, 1905, between J. B. Bellinger, major and quartermaster, United States Army, acting for and on behalf of the United States of America, of the first part, and the New Orleans Terminal Company, a corporation existing under the laws of the State of Louisiana, of the second part, for the enlargement of the Chalmette National Cemetery, and in consideration thereof to permit the closing of the roadway to said cemetery, known as the "River road," which was constructed and maintained by the United States, upon the terms and conditions specified in said articles of agreement.

Mr. GAINES of Tennessee. Mr. Chairman, I think since the Chair counted the quorum three or four Members have gone out of the Chamber.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

MISCELLANEOUS OBJECTS, WAR DEPARTMENT.

Military posts: For the construction and enlargement at military posts of such buildings as, in the judgment of the Secretary of War, may be necessary, $800,000, including the installation therein of plumbing, and of heating and lighting apparatus; but no part of this sum shall be used for the purchase of land, for construction of buildings at coast artillery posts, nor for the establishment of any military prison: *Provided*, That no money appropriated for military posts shall be expended for the construction of quarters for officers of the army, or for barracks and quarters for the artillery, the total cost of which, including the heating and plumbing apparatus, wiring and fixtures shall exceed in the case of quarters of a general officer, the sum of $15,000, of a colonel or an officer above the rank of captain, $12,000, and of an officer of and below the rank of captain, $9,000.

Mr. WILLIAMS. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee a question. I would like to ask the gentleman to explain the origin, the necessity, and the nature of this proviso.

Mr. TAWNEY. Mr. Chairman, I will say to the gentleman from Mississippi that this proviso means exactly what it says, that no money appropriated for military posts shall be expended for the construction of quarters for officers of the army, or for barracks and quarters for the artillery, the total cost of which, including several things, shall exceed the sum of $15,000, and so forth.

Mr. JOHNSON of South Carolina. Mr. Chairman, I would like to ask the chairman of the committee a question.

The CHAIRMAN. Does the gentleman from Mississippi yield to the gentleman from South Carolina?

Mr. WILLIAMS. I yield, if the gentleman will not take up all of my time.

Mr. JOHNSON of South Carolina. Mr. Chairman, in the subsequent paragraph I notice that the bill limits the cost of these officers' quarters to the amounts named in some previous act of Congress. What I wish to know is, Is the amount named in that previous act of Congress in excess of or less than the amount named in the preceding paragraph?

Mr. TAWNEY. It is the same amount.

Mr. WILLIAMS. Now, Mr. Chairman, I believe my time has not quite expired——

Mr. SABATH. Mr. Chairman——

Mr. WILLIAMS. Mr. Chairman, I can not yield to another colloquy.

The CHAIRMAN. The time of the gentleman from Mississippi has expired. The gentleman from Illinois has the floor.

Mr. WILLIAMS. Then I move to amend my previous motion by striking out the last two words, in order that I may have an answer to my question.

The CHAIRMAN. That is not in order except by unanimous consent. The gentleman from Illinois is recognized.

Mr. SABATH. Mr. Chairman, I move to strike out the proviso, for the purpose of inquiring of the gentleman who has charge of this bill what this appropriation is for. I see this provides for an appropriation of $800,000 for the erection of some new buildings. Now, it has been stated during the session this evening by different gentlemen here that we are willing to vote for any and all appropriations. I am not, and I believe in a large item like this we should commence to investigate whether it is absolutely necessary to expend at this time nearly $1,000,000. This appropriation calls for $800,000. Now, what is it for?

Mr. JOHNSON of South Carolina. To build houses for officers of the army.

Mr. SABATH. I am sincere in this inquiry.

Mr. TAWNEY. Let the gentleman read the paragraph and it will tell him what the appropriation is for, or let him listen to the Clerk when he is reading it.

Mr. SABATH. Are these buildings really necessary?

Mr. TAWNEY. They would not be appropriated for if they were not.

Mr. FITZGERALD. Mr. Chairman, I will state to the gentleman from Illinois that these are buildings necessary in various military posts throughout the United States.

Mr. OLLIE M. JAMES. Some explanation ought to be made.

Mr. FITZGERALD. I am endeavoring to make an explanation.

Mr. SABATH. Where are these buildings to be erected—in what part of the United States?

Mr. FITZGERALD. I have not the list right at hand, but it is in a great many of the barracks in the United States. Is there any place in Chicago where we could put one?

Mr. SABATH. No; we are not asking for any at the present time.

Mr. FITZGERALD. If you do, I hope the gentleman's colleague will come to his assistance and help him to get it if he wants it.

Mr. SHERLEY. If the gentleman really is desirous to know where these various barracks are to be erected, he will find a detailed statement in the hearings. It would take too much time now to read them, but I will hand the gentleman a list of them all if he desires it.

The Clerk read as follows:

For completing the reconstruction, on land owned by the United States, of the military prison in San Francisco Harbor, $100,000. The sum hereby appropriated shall be so expended as to give the maximum amount of employment to the inmates of said institution.

Mr. WILLIAMS. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. WILLIAMS. I wish the Chairman would instruct the Clerk when a gentleman arises and respectfully addresses the Chair that the Clerk should stop the reading. I move to strike out the last word for the purpose of asking the gentleman from Minnesota, in charge of the bill, a question.

Mr. TAWNEY. Let me suggest to the gentleman that there would be less occasion to criticise the Clerk if the gentleman would wait until the Clerk concluded the reading of the paragraph before addressing the Chair.

Mr. WILLIAMS. "The gentleman" did wait until the Clerk concluded the reading of the paragraph——

Mr. TAWNEY. I beg the gentleman's pardon.

Mr. WILLIAMS (continuing). And had started off with the next, and he paid no sort of attention to the voice of the "gentleman from Mississippi," which is not a sweet one.

Mr. MANN. Not sweet to us at this time.

Mr. WILLIAMS. Now, I would like to ask the gentleman from Minnesota a few questions about lines 23, 24, and 25 on page 152, and lines 1 and 2 on page 153. Does this appropriation of $100,000 for completing the reconstruction on land owned by the United States of the military prison at San Francisco Harbor exceed the original appropriation made for that purpose?

Mr. TAWNEY. No; it does not.

Mr. WILLIAMS. I note here a proviso that the sum shall be expended so as to give the maximum amount of employment to the inmates of said institution. Will the gentleman explain to me whether or not this is intended to put convict labor in the utmost possible manner in competition with free labor?

Mr. TAWNEY. It is intended to use the labor within the prison to construct the prison just as we are doing at Atlanta, Ga., and Leavenworth, Kans.

Mr. WILLIAMS. Mr. Chairman, the explanation is entirely satisfactory.

The Clerk read as follows:

Johansen mill site, south of Mission Creek, Alaska: For the purchase from Carl M. Johansen all his right, title, and interest in and to a certain tract of land and the buildings thereon, consisting of eighteen and three hundred and four one-thousandths acres, more or less, and known as Johansen's mill site, covered by amended survey No. 350, and situated at the mouth of Mission Creek, on the left bank of the Yukon River, in the district of Alaska, lying within the limits of the military reservation of Fort Egbert, Alaska, $2,000.

Mr. JOHNSON of South Carolina. Mr. Chairman, I desire to make the point of order against that paragraph.

Mr. OLLIE M. JAMES. Mr. Chairman, I hope the gentleman will reserve it until we get some information. [Cries of "Rule!"]

The CHAIRMAN. Unless the gentleman from Minnesota or some gentleman in charge of the bill says there is authority for the purchase, the Chair will be compelled to sustain the point of order.

Mr. TAWNEY. I do not think there is——

Mr. OLLIE M. JAMES. Mr. Chairman, I hope the gentleman from South Carolina will reserve the point of order until we hear from the Delegate from Alaska.

The CHAIRMAN. The point of order is sustained, and the Clerk will read.

Mr. CALE. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The whole paragraph has been stricken out.

Mr. CALE. I move to strike out the paragraph.

The CHAIRMAN. That is already done.

Mr. CALE. I beg pardon.

The Clerk read as follows:

Water supply, Presidio of San Francisco: For the purchase of land and acquirement of water rights on Lobos Creek, California, to protect the water supply of the Presidio of San Francisco and to provide an independent water supply for military purposes in San Francisco Harbor, California, $100,000.

Mr. OLLIE M. JAMES. Mr. Chairman, I reserve the point of order upon this paragraph.

Mr. MANN. Mr. Chairman, I make the point of order against the paragraph.

Mr. OLLIE M. JAMES. I will reserve the point of order for the purpose of hearing an explanation.

The CHAIRMAN. Unless the gentleman from Minnesota or some member of the committee can show the authority for this paragraph, the Chair will be compelled to sustain the point of order.

Mr. FITZGERALD. Suppose this is on land adjoining the present reservation; what will the Chair say?

Mr. TAWNEY. The appropriation here is for the purchase of land and the acquirement of water rights on Lobos Creek, California to protect the water supply of Presidio of San Francisco and to provide an independent water supply for military purposes in San Francisco Harbor.

This is represented to the committee as being absolutely essential to the health and sanitary condition of that post. It is a part of the military establishment and is just as essential to the maintenance of the military establishment as an artesian well or any other expenditure pertaining to the sanitary conditions or to the health of those who are stationed at that post.

Mr. MANN. There is no auhority of law for this, Mr. Chairman.

Mr. TAWNEY. The present water supply is part of it from running water and part of it from artesian wells.

The CHAIRMAN. The Chair sustains the point of order.

Mr. FITZGERALD. Mr. Chairman, this land adjoins the reservation. [Cries of "Regular order!"]

With the exception that there is a stream which runs between this place and the government reservation, I think this adjoins it. It is a creek. The Government owns one side. This is to purchase the adjoining land on the other side.

The CHAIRMAN. The Chair would suggest that the paragraph contains a further provision for an independent water supply for military purposes in San Francisco Harbor. It seems that, as the point of order is made, it will have to be sustained.

Mr. FITZGERALD. The Presidio is in San Francisco Harbor. Either the Chair's geography or mine is wrong, and I think the Chair is wrong.

The Clerk read as follows:

Target range, Sparta, Wis.: The unexpended balance of the appropriation of $150,000, for the purchase of 7,600 acres of land, more or less, near Sparta, Monroe County, Wis., as a site for a target range, under the provisions of the sundry civil act, approved May 27, 1908, be, and is hereby, made available for the purchase of such additional land contiguous to the land already purchased as in the opinion of the Secretary of War may be necessary.

Mr. TAWNEY. Mr. Chairman, I desire to offer an amendment.

Mr. BEALL of Texas. I desire to reserve a point of order on that paragraph.

Mr. OLLIE M. JAMES. I reserve the point of order to that section.

The CHAIRMAN. The gentleman from Texas [Mr. BEALL] has already reserved the point of order.

Mr. MANN. I make the point of order, Mr. Chairman.

Mr. TAWNEY. This amendment is to reduce the amount of land which we have heretofore authorized to be purchased for the rifle range at Chickamauga.

The CHAIRMAN. Unless there can be shown authority for the purchase of the land, the Chair will have to sustain the point of order.

Mr. TAWNEY. Mr. Chairman, the purchase of the land was authorized two years ago. This is for the purpose of diverting the appropriation for the purchase of so much of the additional land as was included in the original authorization.

Mr. ESCH. I call the chairman's attention to the provision in the sundry civil act——

The CHAIRMAN. The Chair on turning the page finds provision for additional land contiguous to the land already purchased, and it seems from the statement of the chairman of the Committee on Appropriations that the purchase was authorized by an act heretofore passed. That being the case, this would seem to be a continuation of public work in progress, and therefore in order. The Chair overrules the point.

The Clerk will report the amendment offered by the gentleman from Minnesota [Mr. TAWNEY].

The Clerk read as follows:

On page 154, after line 3, insert:

"The appropriation of $16,500 made in the sundry civil appropriation act for the fiscal year 1909 for the purchase of 924 acres of land adjoining Catoosa tract and target range at Fort Oglethorp, Ga., is hereby made available for the purchase of 724 acres of said land."

Mr. MANN. Mr. Chairman, I reserve a point of order.

Mr. WILLIAMS. Reserving the point of order, I desire to make a parliamentary inquiry. I would like to ask the Chair whether I am correct or not in the opinion that a few minutes ago the Chair ruled that a provision in a previous sundry civil bill was an authorization of law for a project?

Mr. TAWNEY. Under the existing law.

Mr. MANN. Mr. Chairman, this paragraph is subject——

Mr. WILLIAMS. I beg the gentleman's pardon, but I have the floor.

Mr. MANN. I made the point of order, and I have the floor.

Mr. WILLIAMS. I made the point of order.

Mr. MANN. I beg the gentleman's pardon; I made the point of order. Now, Mr. Chairman, if this matter can be agreed to without further consideration, I am willing to withdraw the point of order.

Mr. WILLIAMS. I make the point of order for the entire business.

Mr. FITZGERALD. The Chair is now considering the point of order made by the gentleman from Illinois [Mr. MANN], upon which he will rule presently.

Mr. MANN. Upon the amendment that comes in subsequent to the paragraph the gentleman is talking about.

Mr. WILLIAMS. Prior to that, I made a parliamentary inquiry for the purpose of securing a ruling by the Chair.

Mr. MANN. Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. The question is on the adoption of the amendment.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Military camp, Pine Plains, N. Y.: For the purchase of about 11,000 acres of land known as "Pine Plains, N. Y.," for use as a permanent military camp of instruction and concentration, $75,000.

Mr. MACON. Mr. Chairman, I make the point of order on that paragraph.

Mr. KNAPP. I ask the gentleman to reserve his point of order. I ask the gentleman to extend me that courtesy.

Mr. MACON. I will extend the gentleman the courtesy.

Mr. KNAPP. Mr. Chairman, I desire to make a brief statement in reference to that item, and ask permission to do it.

Mr. Chairman, this item of $75,000 is for the purchase of about 11,000 acres of land, known as "Pine Plains," and situate in Jefferson County, N. Y., for the purpose of army field drills, and is favorably recommended by the War Department.

The plan of concentrating the army in different sections of the country for the purpose of field drills and maneuver purposes was instituted by Secretary Root when Secretary of War. This plan has been followed as one of the most effective in the proper discipline and field drills, not only of the Regular Army, but also of the national guard of the several States. The plan as known to most of the Members has been to concentrate the troops of the Regular Army within a certain radius or section of the country for drill purposes and in alternate years to invite the state militia located within the same radius or section of the country to join with the Regulars in these field drills.

While these concentration camps or field drills have been held for the past several years, the necessity and importance for them has been increased by reason of the recent action of Congress. By the law passed at the last session of Congress, known as the "Dick law," the militia or national guard becomes a part of the regular force of the United States, so that hereafter these two branches of the service will be in closer relationship, and these maneuvers or field drills will necessarily include both branches of the service, thus necessitating more extensive maneuver grounds and making such concentration camps and field drills more important and necessary than heretofore.

This was emphasized in the statement made by General Oliver before the Appropriations Committee, speaking relative to the purchase of Pine Plains, when he said:

It will have to be the policy. There is no other way of teaching the national guard except by bringing them in contact with regular troops and giving them the benefit of their experience and instructing them in large bodies.

Further than all of this, the plan has been approved by Congress. At the first session of the present Congress there was appropriated the sum of $1,000,000 for this purpose, and at the present session of Congress there was included in the act making appropriations for the army the sum of $400,000, so that the plan or policy has received the approval of the department and the Congress and has become permanent.

Now, with reference to this item for the purchase of Pine Plains. In carrying out this plan of field instruction, it has been the policy of the department, where there are no reservations that can be advantageously used, to select a point contiguous to several army posts, and this is made the center for concentration of troops, and it has further been the policy to select locations as inexpensive as possible, so that the sites may be purchased, if satisfactory. The controlling reason for this has been that it is very expensive to fit up these sites, running up to from $15,000 to $30,000. The department believes that it is the part of economy to select those that can be purchased at a reasonable cost rather than continue the initial cost of fixing up the encampments, so that the betterments that are put on will be the property of the United States and become permanently useful.

In New York and New England, which constitutes a radius where, in the opinion of the department, one of these camps should be located, there are no reservations which can be advantageously used without added purchase of land which would cost far more than that at Pine Plains.

Therefore, in 1904 the department, through a board of officers duly appointed, inspected various locations throughout this section of the country to see if land suitable for this purpose could be obtained at reasonable cost, and among other sites that board inspected Pine Plains and made report. Subsequently a second board of officers made a special inspection of this tract of land, and also made report. The department through these investigations and reports became convinced that this was a most suitable and desirable location and took steps to secure options on a sufficient amount of land at this point. These options, however, aggregated in value $388,000 for about 20,000 acres of land. This was by the department considered excessive. Subsequent to this the Third Brigade of the National Guard of the State of New York had its annual encampment and field drill here, which proved in every way successful, and demonstrated that the location was a desirable one for such purposes. In 1907 the war board again assembled and again went over this tract and again arranged for options, and the department arranged to have the United States troops stationed at Buffalo, Niagara, Oswego, Madison Barracks, Plattsburg, and Burlington go into camp at that point; and it also invited the organized militia of the States of New Hampshire, Vermont, Massachusetts, Connecticut, New York, New Jersey, Pennsylvania, and Maryland to unite in this encampment and field instruction.

This encampment, constituted of regular troops and state militia, was under the command of Gen. Frederick D. Grant, and the troops numbered in the aggregate about 10,000, and was held from about the middle of June to the middle of July, 1908. This encampment proved in every way successful and demonstrated to the entire satisfaction of the War Department and the officers and men encamped there that Pine Plains was in every way, so far as area, soil, water, climate, and healthfulness, a most satisfactory location for a permanent summer encampment, and reports which will be hereafter referred to were submitted to the department by General Grant, the commanding general, and also by the war board. The department again arranged for options on the lands which were necessary for such maneuver purposes. These options were filed in the department and aggregated about $70,000 for nearly 11,000 acres of land, which is, in other words, about $6.30 per acre. This the department considers most reasonable, and that it would be in the interests of both the service and economy to the Government to purchase this land for permanent annual encampments, and has so reported and recommended to Congress, on which reports and recommendations the Appropriations Committee has included this item.

Of the requisites of Pine Plains for a drill camp for the purposes indicated, I will speak but briefly, rather submitting the reports of General Grant, who commanded the camp in 1908; also the war board which reported to the War Department, and also Acting Secretary of War, General Oliver, all of which substantiate the statement that it is the most suitable location in the country for a drill camp. Pine Plains is situate, as stated, in the county of Jefferson, N. Y., about 25 miles from the city of Watertown, a city having a population of nearly 30,000, about 30 miles distant from the St. Lawrence River and 6 miles from Carthage, having a population of about 4,500.

The area upon which options have been obtained constitutes nearly 11,000 acres, and there is situated adjacent to this several thousand acres which could be obtained at practically the

same price per acre as the options now held should there be necessity for such addition.

The topography of the country is level; the soil sandy, easily absorbing the rainfall; sanitary conditions are unsurpassed; water supply bountiful and excellent; and the climate in that section excellent, most suitable for a summer camp (these camps being held at that season). In fact, the camp has been proven both by the field drills of the Third Brigade of the New York National Guard and the field drills of the Regular Army and the national guard to be an ideal one.

As to the healthfulness of the camp, it may be stated that during the field drills of 1908, during part of which time there were 10,000 men encamped there, there was not a single case of camp sickness reported, and officers and men agree in the statement that it was one of, if not the most healthy camp ever experienced in army life.

The requisite most important, the water supply, is all but unlimited, one spring alone being sufficient to supply 30,000 men. The purity of the water has been proven by numerous tests made before the camp site was selected and during the encampment of 1908, and was found in each and all cases to be of an exceptionally pure and desirable quality.

It is convenient of access for the troops which would be concentrated there, the site being reached from the eastern section of the United States by three lines of railroad running from the south and connecting at Utica, Rome, and Syracuse with the main line of the New York Central and Hudson River Railroad from all points east and west; also a direct line of railroad westerly to Oswego and Niagara Falls; and also a line of railroad running directly eastward reaching northern New England. The railway facilities for reaching the camp are reasonably satisfactory; but should the Government purchase the land, assurances are given by railway officials that the railway facilities will be materially added to and improved.

But not to continue in detail as to the requisites of Pine Plains as a camp, permit me to submit, as more conclusive than any statement that I might make, certain portions of reports of military authorities specially qualified and authorized to speak. Gen. Frederick D. Grant, who commanded the camp at Pine Plains in 1908, in his report to the War Department as to the desirability of purchasing this site, in part said:

From a "sanitary standpoint" I should say that Pine Camp is practically perfect. Thirty thousand soldiers could be camped here and their health maintained as well as it is in this camp, and by the same methods. I know of no location in the northeastern part of the United States more available and suitable for a permanent location of an instruction camp than this place, and I ask for immediate consideration, in view of the disposition of government property now installed at Pine Camp.

The war board especially commissioned by the War Department to make investigation and report as to the desirability of purchasing Pine Plains as a permanent camp reported, in part, as follows:

That climatically the site is good for a summer camp of instruction, as the nights are cool and the days not sufficiently hot to cause serious trouble during marches; that in these respects it is far superior to a more southern location; that the sandy soil absorbs the rain at once, and there is a total absence of muddy roads; that flies are absent, owing to the remoteness of habitations and the absence of fly-breeding places; it is out of the malarial and yellow fever zones; that ample water is available through driven wells, as the sands are underlaid by impervious strata, making a natural reservoir, discharging through numerous subterranean streams and springs; that the absence of camp disease leads to the conclusion that nothing need be feared in a larger camp for longer periods.

These reports are approved by Acting Secretary Oliver in the following words:

What is desired is a tract of land which can be purchased for a moderate price, large enough for the concentration for instruction of the mobile force of the United States Army stationed in the State of New York, and the Militia of the State of New York and the New England States, exclusive of those assigned to coast defenses. The number of these troops will at no time reach 30,000. The land in question is ample for such force, and its location—as regards the Regular Army—the natural concentration point for troops stationed at Forts Porter, Niagara, Madison Barracks, Ontario, Plattsburg, and Ethan Allen. The force at New York City is inconsiderable, and will probably be concentrated at a camp of instruction in Pennsylvania or Maryland.

The location in question is quite remarkable for its unlimited supply of pure water, its admirable climate, and its lack of flies and mosquitoes; and it fulfills all the requirements of the best sanitary conditions. In fact, there has been no place occupied as yet that equals this locality for these purposes.

The railroad companies are prepared to make any additions that may be necessary to handle promptly and efficiently at least 30,000 men.

From my personal knowledge, no locality that I have seen possesses equal advantages; at least no locality which Congress would be willing to purchase, by reason of enormous cost.

This property may be obtained for from $70,000 to $75,000, and additional land may be rented at a nominal rate for further maneuver purposes. A large expenditure has been made on this property for piping the same and for various other necessities, and I am thoroughly convinced that it would be advantageous to the United States to secure it.

These reports by the general in command of the camp, the board specially appointed to report upon the same, and the War Department, through the Acting Secretary, all emphatically indorse and recommend the purchase of Pine Plains, and demonstrate that such action on the part of the Government would be for the advantage of the military service.

But, further, the purchase of Pine Plains would be economy on the part of the Government. United States Army maneuvers or field drills have become a part of the regular training and discipline of the army. Last year eight of them were held in various sections of the country. They have, so to speak, come to stay. The Government, where reservations can not advantageously be used, must either purchase or rent sites, and these in either event must be fixed up for the encampment and drills of the army. This necessitates in each case where the sites are not permanent an expenditure of from $15,000 to $30,000, so that the expense connected with the renting of two temporary sites nearly aggregates the total cost of Pine Plains, where the betterments are already made and suitable for permanent use. These betterments consist of the laying of pipes and the putting in of tanks and engines to pump the water, building the incinerators and crematories for getting rid of the garbage, and building the roads, etc. It is clearly in the interest of economy to purchase this site and save to the Government what would be the cost of continuous betterments and rentals in the case of temporary sites.

This is manifest by the fact that these betterments at Pine Plains have already been made and utilized, so that the only additional expense necessary is that connected with the purchase of the site. This fact of economy was clearly established by General Oliver on hearing before the Appropriations Committee in response to questions by the chairman. He answered as follows:

The CHAIRMAN. What additional amount will have to be expended on this land if it is purchased?

Mr. OLIVER. I should imagine none at all of any consequence. It will be necessary to improve it in the way of building a few permanent roads and a few storehouses. We will not have to pull down and throw away the equipment we have there. There is no reason for any special expenditure being made over and above what we have already provided for. If we should choose another place next year, we would probably have to spend $20,000 or $30,000, and here we would not spend $5,000.

The CHAIRMAN. If this land is purchased, it does not mean that you will come to Congress later on for extensive improvements?

Mr. OLIVER. No, sir. It is not land that you could make a park of. The department wishes the land to remain as wild as it is for maneuvering purposes. There is no desire to do anything except to own the property, so that we will not throw money away on property that does not belong to the Government. I do not believe in appropriating very large sums of money for big camps of concentration. I think it is better to buy a small amount where the property is high and depend on renting the adjoining farms for maneuvering practice, but to have at least enough to camp a corps, so that any improvements you make there will remain our property.

Here, then, is a site concededly reasonable in cost, concededly possessing very desirable requisites for maneuvers and field drills, a site where the Government already has an investment for betterments which can not be used elsewhere aggregating from $20,000 to $25,000, and which would be of permanent service and value in case of purchase, but practically useless in case of no purchase. An investment which would have to be duplicated in each case of rental elsewhere, and, finally, a site the purchase of which has been earnestly recommended by the War Department after every necessary test has been made.

What more is needed to justify a government appropriation? I submit and urge that the best interests of the military service and true economy on the part of the Government not only justify, but emphasize the necessity for passing this appropriation and the purchase of Pine Plains as a permanent maneuver and drill camp for the United States Army.

Mr. GAINES of Tennessee. Where is this land located?

Mr. KNAPP. It is situated in Jefferson County, northern New York.

Mr. GAINES of Tennessee. How much money does the gentleman ask Congress to appropriate?

Mr. KNAPP. Seventy-five thousand dollars.

Mr. GAINES of Tennessee. Have you an option on this property?

Mr. KNAPP. Yes; aggregating $70,000 to $75,000 for 11,000 acres of land.

Mr. GAINES of Tennessee. I presume it is a written option, so that it is binding?

Mr. KNAPP. Yes; filed in the department.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WILLIAMS. I ask unanimous consent that the time be extended five minutes.

Mr. CHANEY. Regular order!

Mr. KNAPP. The Government already has an investment here in betterments of $24,000, which become available if the land is purchased.

The CHAIRMAN. The regular order is demanded.

Mr. SHERMAN. If I can have the attention of the gentleman, I should like to say to him——

Mr. WILLIAMS. Mr. Chairman, both sides of the question ought to be discussed, and one gentleman from New York has been heard in opposition to the point of order already. I should like to have somebody heard in favor of it.

The CHAIRMAN. The point of order has not been discussed. The gentleman from Arkansas [Mr. MACON] reserved the point of order, and the gentleman from New York [Mr. SHERMAN] is recognized.

Mr. SHERMAN. Mr. Chairman, I wish to say——

Mr. WILLIAMS. I insist that both sides have a right to be heard. One gentleman has already spoken in opposition to the point of order. Somebody now has the right to be heard in favor of it.

The CHAIRMAN. The Chair will state that there has been no argument made upon the point of order. The gentleman from Arkansas reserved it, in order that there might be an explanation of the paragraph.

Mr. WILLIAMS. If there has been no point of order made, it was the fault of the Chair, because the Chair did not insist upon it.

Mr. MACON. I have reserved the point of order, and yield to the gentleman from New York [Mr. SHERMAN].

The CHAIRMAN. The gentleman from Arkansas reserves the point of order, in order that the gentleman from New York [Mr. SHERMAN], who has been recognized, may be heard.

Mr. SHERMAN. Mr. Chairman, it is doubtful if anywhere in any of the Eastern States could there be found 11,000 acres of land suitable for this purpose that could be bought for twice, thrice, or even more times the amount of this appropriation; 11,000 acres of land, with a sandy soil, which is drained within sixty minutes after a rain; with a large navigable river running through it, railroads surrounding it on three sides, specially well adapted for the purpose. It has been tried, options have been obtained upon all of it for prices less than they ever could be obtained again. The entire community have become interested in the project, have brought to bear pressure upon all the owners of the land, have shown them that it would be to their advantage to sell at a low price, because every year it would bring a large body of men there who would buy the products of the adjoining property, and thereby make it an advantage to their people to sell at a reasonable price.

In that way the price has been obtained for this land less than any other land can be obtained in any of the Eastern States or anywhere in the country, and it does seem to me as though it would be a great mistake for us to fail to take advantage of the situation now existing and make an appropriation to purchase this land on the options already obtained. I sincerely trust the gentleman from Arkansas will withdraw his point of order.

Mr. MACON. Mr. Chairman, I oppose this proposition because I think we have enough invested in war and armament and so on, and that was why I made the point of order to the paragraph. We have appropriated a great many dollars this year for war purposes in time of peace, and I dislike very much to give my consent to adding additional amounts day by day, and I might say from hour to hour, but I do not see how I am powerful enough to resist the importunities that have been made here, and I will withdraw the point of order.

Mr. WILLIAMS. I reserve the point of order.

Mr. GAINES of Tennessee. I renew the point of order and reserve it.

The CHAIRMAN. The gentleman from Mississippi has already reserved the point of order.

Mr. WILLIAMS. Mr. Chairman, I renew it and reserve it for the purpose of making a few remarks myself. I have noticed that the Chair has not held anybody down on the point of order; all the gentlemen thus far have spoken on the merits of the proposition and not on the point of order. I shall therefore take it for granted that the Chair will permit me to speak on the merits of the proposition.

Mr. Chairman, unless the great town of Bucatunna, in Wayne County, Miss., can be substituted for Pine Plains, N. Y., I shall oppose the paragraph in the pending bill. I want to say that the gentleman could go down in the neighborhood of Bucatunna and buy land for $5 an acre, and instead of buying 11,000 acres he could buy a great many more acres, and then would have a perfectly healthy place for the United States troops to remain in—pleasant in the winter, comfortable all the time, and with a magnificent opportunity for great military camps about it.

I am informed by the gentleman from Massachusetts who stands by my side that it is too far for his Massachusetts folks to go to. The gentleman from Massachusetts must remember that it is just as far from Massachusetts to Mississippi as it is from Mississippi to Massachusetts.

Mr. ROBERTS. But your people do not come to the camp.

Mr. WILLIAMS. It is precisely the same distance. If the gentleman will give me an opportunity to offer an amendment after a while to substitute Bucatunna, Miss., for Pine Plains, I will withdraw the point of order, with the understanding that after the point of order is withdrawn I can move to substitute the great undeveloped site of Bucatunna for the hitherto unknown site of Pine Plains. Mr. Chairman, I withdraw my point of order.

Mr. WILSON of Pennsylvania. Mr. Chairman, I renew the point of order.

Mr. GAINES of Tennessee. I would like to ask the gentleman from New York a question. I was in the cloakroom when the paragraph came up, and I do not know the merits of it, and I want light on the subject.

Mr. SHERMAN. Provision has been made for the use of military camps for the purpose of combining the National Guard with United States troops. We propose to purchase a piece of land well adapted for this purpose, and options have been had, so that the purchase price is more than reasonable; it is absolutely cheap.

Mr. GAINES of Tennessee. Does the gentleman from New York think it is absolutely needed?

Mr. SHERMAN. Absolutely needed for this purpose.

Mr. GAINES of Tennessee. And it is a bargain?

Mr. SHERMAN. It is more than a bargain.

Mr. GAINES of Tennessee. I withdraw the point of order.

Mr. WILSON of Pennsylvania. Mr. Chairman, I have not withdrawn the point of order I made.

Mr. DAWSON. I would like to ask the gentleman from New York if this is the only concentration camp in this section?

Mr. SHERMAN. It is. Mr. Chairman, if the gentleman makes the point of order, I will discuss the merits of the point of order. The act of January 21, 1903, especially authorizes this sort of an appropriation. That act provides that the Secretary of War is authorized to provide for the participation by any part of the organized militia of any State or Territory on the request of the governor thereof—and such request has been made in this instance by the governor of the State of New York—for the encampment, maneuvers, and field instruction of the Regular Army with the troops at a point at or near a military reservation. Now, this point is near a military reservation at Cape Vincent, and I claim that under this act of January 21, 1903, this appropriation is not obnoxious to the rules. If the Chair would like to see the act, I have it here.

Mr. WILSON of Pennsylvania. Mr. Chairman, I have made the point of order because there is no existing law for an appropriation of this kind, and in addition to that I am one of those who are opposed to any method of increasing our military force.

I will go with you as far as any Member on the floor of this House in building up a navy, because I look upon battle ships and cruisers as being but the weapons of war, that take a long time to build up. In addition to that, I never believed in destroying the liberties of the people, and a great standing army is a thing of that kind, and this is simply tending to building up a large standing army. However, I realize that for the small army we have we need some grounds for training purposes, and for that reason I withdraw the point of order.

Mr. WILLIAMS. Mr. Chairman, I move that in line 6, on page 154, the words "Pine Plains, N. Y.," be stricken out and the words "Bucatunna, Miss.," be substituted therefor.

The CHAIRMAN. The gentleman from Mississippi offers an amendment, which the Clerk will report.

The Clerk read as follows:

Strike out "Pine Plains, N. Y.," and insert "Bucatunna, Miss."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi.

The question was taken; and on a division (demanded by Mr. WILLIAMS) there were—ayes 13, noes 79.

So the amendment was rejected.

Mr. WILLIAMS. Mr. Chairman, I make the point that there is no quorum present.

The CHAIRMAN. The gentleman from Mississippi makes the point that there is no quorum present. The Chair will count. [After counting.] One hundred and eleven gentlemen present—a quorum. The Clerk will read.

The Clerk proceeded to read.

Mr. WILLIAMS. Mr. Chairman, I do not doubt the accuracy of the Chair's count, but I call for tellers.

The CHAIRMAN. On what? The Clerk will read.

The Clerk continued to read.

Mr. WILLIAMS. Mr. Chairman, I demand tellers.

Mr. MANN. It is too late.

Mr. WILLIAMS. It is not too late. Let us not be unfair. I was yelling a demand for tellers while the Clerk was reading.

The CHAIRMAN. Tellers are not demandable on a point of no quorum.

Mr. CLAYTON. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. CLAYTON. Not for the purpose of making any dilatory motion, but for the purpose of saying that this House met yesterday morning at 10 o'clock, and it is now after 2 o'clock a. m. of the day after, and I think we can get along with the public business of the country better if the committee will now rise and the House take a recess until 10 o'clock this morning. I therefore move that the committee do now rise.

Mr. MANN. And during that time we have read about 50 pages of the bill only, owing to the delay——

Mr. CLAYTON. The gentleman will bear me witness that I have not been guilty of consuming any time.

The CHAIRMAN. The Chair will state to the gentleman from Alabama that in the midst of a paragraph his motion is *not in order*, but when it is concluded the Chair will recognize the gentleman.

Mr. CLAYTON. Very well. On the Chair's suggestion I will renew my motion at the end of the paragraph.

The Clerk read and concluded the paragraph, as follows:

Army supply depot, Fort Mason, Cal.: To continue the construction, on the military reservation at Fort Mason, Cal., of a general supply depot for the supply departments of the United States Army, and to construct thereon the necessary storehouses, offices, shops, stables, sheds, power houses, quarters, and other buildings, together with wharves for the accommodation of at least four ships of the army transport service, $400,000.

Mr. CLAYTON. Mr. Chairman, I now move that the committee rise.

The CHAIRMAN. The question is on the motion of the gentleman from Alabama, that the committee do now rise.

The question was taken; and on a division (demanded by Mr. CLAYTON) there were—ayes 23, noes 68.

Mr. CLAYTON. Mr. Chairman, I demand tellers.

Mr. CLAYTON and Mr. TAWNEY were appointed tellers.

The House again divided; and the tellers reported—ayes 24, noes 62.

Mr. CLAYTON. Mr. Chairman, I make the point of no quorum.

Mr. TAWNEY. Mr. Chairman, I make the point of order that that is dilatory. The Chair has just counted.

Mr. CLAYTON. But the Chairman's count was not accepted. This count is a correct count.

Mr. MANN. The count has nothing to do with it.

Mr. CLAYTON. Then what are we going through with this performance for?

The CHAIRMAN. The Chair will count. [After counting.] One hundred and four gentlemen present—a quorum. The noes have it, and the motion to rise is rejected.

Mr. CLAYTON. Mr. Chairman, a parliamentary inquiry. Can we have tellers on that?

The CHAIRMAN. Tellers are not demandable on a count of a quorum.

Mr. CLAYTON. I think the Chair is in error.

Mr. WILLIAMS. How can a Member verify the count of the Chair, except by tellers or the yeas and nays?

Mr. HARRISON. Mr. Chairman, I heard the Chairman order the Clerk to continue the reading, and I want to make the point of order that in reading the bill the Clerk omitted to read the paragraph on page 154, from lines 9 to 12; the Clerk skipped that in proceeding to read, and did not read that paragraph at all.

The CHAIRMAN. He had previously read that paragraph.

Mr. LANGLEY. That ought to settle it.

Mr. HARRISON. I beg the pardon of the Chair; I was listening attentively and I heard him begin reading the next paragraph.

The CHAIRMAN. The Chair heard it read, and the Clerk will read.

The Clerk read as follows:

Fort Bayard, N. Mex.: For the construction of a cold-storage and central power plant at the United States Army General Hospital, Fort Bayard, N. Mex., and the installation therein of an ice-making and refrigerating plant, and a power pumping plant for water supply, and for generating electricity to light the post, $80,000.

Mr. OLLIE M. JAMES. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman from Kentucky will state his point of order.

Mr. OLLIE M. JAMES. I make the point of order that it is new legislation and not authorized by existing law.

Mr. TAWNEY. That is not the fact, Mr. Chairman. This is a tuberculosis hospital of the United States, and the only one we have, and if the gentleman from Kentucky can derive any satisfaction from trying to strike this out of the bill he is welcome to it.

Mr. OLLIE M. JAMES. Mr. Chairman, I do not expect to derive any satisfaction by trying to strike out anything of the sort, but what you put in this bill you must do it by parliamentary law. I am as much in favor of a tuberculosis hospital as the gentleman is, but I insist that when you come to make your points of order to other meritorious propositions you do not hesitate to do it.

The CHAIRMAN. The Chair will ask the gentleman from Minnesota if there is authority for this construction?

Mr. TAWNEY. Absolutely, there is authority for the construction. The Government of the United States established this hospital there a number of years ago, and this cold-storage plant, the first item, is to take the place of one that is there now; so with the power plant. There is no limit of cost with respect to the buildings, and the establishment was authorized I do not know how many years ago.

The CHAIRMAN. On the statement of the gentleman from Minnesota, the Chair overrules the point of order.

Mr. CLAYTON. Mr. Chairman, I desire to be heard briefly before the Chair rules.

The CHAIRMAN. The Chair is satisfied, and the Clerk will read.

Mr. CLAYTON. Mr. Chairman——

The CHAIRMAN. The Chair does not desire to hear further argument upon the point of order.

The Clerk read as follows:

Fort Meade, S. Dak.: For building reservoirs on the timber reservation of Fort Meade, S. Dak., for impounding the water, and for the construction of a pipe line to bring the water down by gravity to the post mains, $100,000.

Mr. OLLIE M. JAMES. Mr. Chairman, a point of order.

Mr. BEALL of Texas. Mr. Chairman, a point of order.

Mr. OLLIE M. JAMES. Mr. Chairman, is there any way we can get the attention of the Chairman?

Mr. MANN. Mr. Chairman, I rise to a question of order. In the middle of the reading of a paragraph a half dozen gentlemen disturb the House by getting up and saying, "Mr. Chairman," "Mr. Chairman," "Mr. Chairman."

Mr. OLLIE M. JAMES. Mr. Chairman, a parliamentary inquiry. Members have to start in the midst of a paragraph to get the attention of the Chair, and then they are not successful.

Mr. MANN. Of course they are not successful when they rise in the middle of a paragraph; that is just the trouble with the gentleman.

The CHAIRMAN. The gentleman from Texas had already made the point of order.

Mr. OLLIE M. JAMES. Well, just so it is made.

The CHAIRMAN. The gentleman from Texas will state his point of order.

Mr. BEALL of Texas. Mr. Chairman, my point of order, which I would have stated if the Clerk had permitted, was that it was new legislation not authorized by existing law.

The CHAIRMAN. What is it that is new legislation?

Mr. BEALL of Texas. From lines 7 to 10, inclusive, page 155.

The CHAIRMAN. We have passed that.

Mr. BEALL of Texas. Mr. Chairman, if I am not to be permitted to make that point because of no interruption between the paragraphs in the Clerk's reading, I will make the point of order against the lines from 11 to 15, inclusive.

Mr. TAWNEY. Is that the Fort Meade paragraph?

Mr. BEALL of Texas. It is the Fort Meade paragraph.

Mr. TAWNEY. Does the gentleman know where Fort Meade is?

Mr. BEALL of Texas. In South Dakota.

Mr. TAWNEY. The gentleman gathers that from the bill, does he not?

Mr. BEALL of Texas. Yes.

Mr. TAWNEY. Well, Fort Meade was established a long time ago. The water supply at Fort Meade has heretofore been obtained from a city in the vicinity of the fort. This reservoir has been established and is there now. It is proposed to build a reservoir on government land for the purpose of supplying the fort with water, which can not be obtained from the city any longer, because the water supply of the city is not sufficient to supply both the fort and the city. It is an established part of the war institution.

The CHAIRMAN. The second paragraph of Rule XXI expressly makes an exception of appropriations in continuation of projects already in progress. This is undoubtedly for the continuation of work upon property already owned by the Government—a continuation of a public work already in progress—and therefore the Chair overrules the point of order.

The Clerk read as follows:

Presidio Military Reservation, San Francisco, Cal.: For continuing the improvement of the grounds within the Presidio Military Reservation, San Francisco, Cal., $7,500.

Mr. GAINES of Tennessee. Mr. Chairman, I make a point of order, or, rather, I reserve it.

Mr. TAWNEY. This is merely to continue the improvement previously authorized by law.

Mr. GAINES of Tennessee. When was it authorized?

Mr. TAWNEY. That is all I have got to say.

The CHAIRMAN. The point of order is overruled.

Mr. GAINES of Tennessee. I move to strike out the last word, Mr. Chairman.

The Clerk proceeded to read the next paragraph.

During the reading,

Mr. GAINES of Tennessee. Mr. Chairman——

The CHAIRMAN. The gentleman from Tennessee [Mr. GAINES] has been recognized and moves to strike out the last word.

Mr. GAINES of Tennesse. Mr. Chairman, I want to say, with the greatest respect for the Clerk, that he is not to blame.

The CHAIRMAN. The Clerk is under the direction of the Chair and is entirely in order.

Mr. GAINES of Tennessee. I want to say that the Clerk is not to blame for what he is doing. It is the confusion. I defend the Clerk from the criticism that has been made of him.

Now, will the Chairman please tell us why the Government has had to make this improvement?

Mr. TAWNEY. This is for continuing an improvement of the ground.

Mr. MANN. Does the gentleman really want information?

Mr. GAINES of Tennessee. I really do.

I yield to the gentleman from Illinois.

Mr. MANN. I understand the gentleman refers to the paragraph about water supplies. That has been stricken out an hour ago.

Mr. GAINES of Tennessee. Which paragraph was that?

Mr. MANN. The one the gentleman has referred to is on page 153, and has gone out.

Mr. GAINES of Tennessee. Well, Mr. Chairman, the paragraph I allude to.

The Clerk read as follows:

Fort Riley Military Reservation, Kans.: For the preservation of the bank line of Republican River in front of the Fort Riley Military Reservation, by revetment and such other work as may be necessary to protect the said reservation from damage by erosion, $25,000, to be immediately available.

Mr. GARRETT. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. GARRETT. It was my intention to move to strike out the last word.

The CHAIRMAN. Does the gentleman make that motion?

Mr. GARRETT. A few paragraphs ago I wanted to make the motion to strike out the last word.

Mr. OLLIE M. JAMES. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Kentucky rise?

Mr. OLLIE M. JAMES. I rise for the purpose of offering an amendment. I am perfectly willing to wait until the gentleman from Tennessee is heard.

The CHAIRMAN. The gentleman will state his amendment.

Mr. OLLIE M. JAMES. I shall do so if the Chair will be kind enough to give me an opportunity. My amendment is this: After the word "available," in line 10, page 156, insert "to prevent damage by erosion of the Mississippi River in front of Columbus, Ky., $25,000."

Mr. TAWNEY. I make the point of order on that amendment.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

Fort Monroe, Va.: Wharf, roads, and sewer: For repair and maintenance of wharf, including all necessary labor and material therefor, fuel for waiting rooms, and water for flushing urinals and closets, painting, repairs, brooms, shovels, etc., $980; repairs to apron of wharf, including all necessary labor and material therefor, $4,155; wharfinger, $900; 2 laborers, $900; in all, $6,935; for one-half of said sum, to be supplied by the United States, $3,467.50.

Mr. GARRETT. Mr. Chairman, I move to strike out the last word. Mr. Chairman, in the September number of the Taylor-Trotwood Magazine there appeared an article written by my colleague from Tennessee [Mr. BROWNLOW], with whom I have never agreed upon anything, on the life and character of Andrew Johnson. I am anxious to show my colleague a courtesy. This article is valuable from a historical standpoint. I do not mean to say that I would agree with all the conclusions that are drawn, but it is a valuable article, written from exact knowledge, based upon personal observation and experience, and I want an opportunity to insert that article in the RECORD. I want the article, together with a memorandum in addition to it, prepared by the gentleman from Tennessee, not in the original article, but which was prepared by him, printed in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The article and memorandum are as follows:

DEFENSE AND VINDICATION OF ANDREW JOHNSON.

[By W. P. BROWNLOW.]

This article, by Hon. WALTER P. BROWNLOW, the Republican Congressman who has represented for many years the same congressional district once represented by Andrew Johnson, will be read with interest by all who have read ex-Senator Stewart's sensational and untrue attacks on Mr. Johnson. Of those qualified to write, Mr. BROWNLOW'S knowledge of the facts and his intimate acquaintanceship with the "tailor who became President" have a first call on those who would know the truth.

Following is the magazine article of Hon. WALTER P. BROWNLOW, of Tennessee:

In the book recently published on the Personal Recollections of William M. Stewart, ex-United States Senator from Nevada, gross injustice is done to the character of a former President of the United States, who was a Tennessean and a citizen of the district which I have the honor to represent in Congress.

It would be difficult for the most ingenious member of the "Ananias Club" to compress in the same space as many erroneous statements as Mr. Stewart has in regard to Andrew Johnson. There are but three statements in his article which can not be successfully contradicted.

First in importance is that the assassination of President Lincoln was a great calamity to the whole country.

This nobody doubts, and so would it have been had any other man than Johnson succeeded him. The assertion that Mr. Johnson's election as Vice-President was a calamity may be true, and it may not. If we could know who would have succeeded Mr. Lincoln if Johnson had not, we could then have an intelligent opinion on that subject.

Gen. Simon Cameron, of Pennsylvania, favored the nomination of Gen. Benjamin F. Butler, and it was his opinion that Butler would have been the nominee for Vice-President if Johnson had not. Probably there is not an intelligent citizen of the whole country, except Mr. Stewart, who believes the country would have been better off with Butler in the White House than it was with Johnson.

It is true, as Mr. Stewart says, that before Mr. Johnson became President, and for a short time thereafter, he was "bitter in denunciation of the southern leaders, and the northern people supposed he was really patriotic."

While passionately exhorting his countrymen to prosecute the war for the preservation of the Union to a successful issue, Mr. Johnson did nothing inconsistent with his subsequent conduct when the Confederates laid down their arms and the responsibility devolved on him of restoring the revolted States to their normal relations to the Union.

Mr. Stewart is sorely grieved over Johnson's alleged inconsistency. Better be inconsistent and right than consistent and wrong. And yet nothing is more common in our political history than the changes that have taken place in the opinions of the greatest of our public men. Daniel Webster and John C. Calhoun went from one side to the other of the tariff question, and most of our eminent statesmen have followed their example, although few men have had an opportunity to change their minds on a question of such importance as the tariff. Not only do political leaders change, but the people change. For ten years Andrew Johnson represented the First District of Tennessee in Congress by about 1,000 majority as a free-trade Democrat. For eleven years I have represented the same district as a protectionist Republican by an average majority of 10,000.

PRESIDENT LINCOLN'S CHANGE OF MIND.

In his first inaugural address, President Lincoln declared that he had no authority as President to interfere with the institution of negro slavery in the States where it existed, and solemnly pledged himself not to do so. Within less than two years he said he had this authority, and issued his proclamation abolishing it, and he did right when he did so.

A change of mind, after due deliberation and on convincing evidence, is not evidence of vacillation and weakness, but of strong character and sound judgment. Even ex-Senator Stewart and myself have had sense enough to change our minds. I was an advocate of the free coinage of native American silver and never realized the beauty and beneficence of the gold standard until it was incorporated into the platform of the national Republican party in 1896.

After more than twenty-five years of strenuous advocacy of the free and unlimited coinage of silver, at 16 to 1 or 32 to 1, by which means he secured several elections to the United States Senate, Senator Stewart as suddenly abandoned his shibboleth of "The crime of '73," as he charges Johnson with having done in his treatment of the honestly mistaken advocates of the hapless southern confederacy.

It is doubtful if any candidate for office in this country was ever defeated on the sole ground that he had once given expression to views antagonistic to those that he afterwards professed. Instance the career of the lamented William McKinley. Before his nomination to the Presidency in 1896, on a gold-standard platform, he said in a speech in Congress: "I arraign Grover Cleveland as being unfriendly to one of America's great products—silver." The intelligent people of the country know it is more praiseworthy to be right than to be consistent. That man is a moral coward who through pride of opinion and love of consistency continues to advocate erroneous opinions when the God who made him has given him the light to see it.

JOHNSON WAS PATRIOTIC.

Mr. Stewart complains that when Andrew Johnson was nominated for Vice-President in 1864 "the northern people supposed that he was really patriotic."

In this the northern people were right. Few men gave greater evidence of love of country than did Andrew Johnson. He risked all on

the issue "Fortune, life, and sacred honor." He was the only Senator from the Southern States who was loyal to the Union when the war of 1860–61 began and the only Democratic Senator, North or South, except Stephen A. Douglas, of Illinois, who was for the unconditional maintenance of the Federal Union. The entire fortune of Mr. Johnson, all invested in Tennessee, amounting to about $60,000, the fruit of forty years of economy and honest toil, was staked on the issue, for by virtue of the laws enacted by the confederate congress it would all have been confiscated as that of an alien enemy had the seceding States succeeded in the conflict. In fact, much of it was seized early in the war and the remainder libeled for confiscation in the confederate court. Nay, more, Mr. Johnson on an hundred occasions imperiled his life in advocacy of the Union and in denunciation of its dismemberment, surrounded and threatened as he was by the armed enemies of his flag and country. He gave evidences of patriotism far more exalted than did Mr. Stewart, who denounced secession from the safe retreat of the sagebrush in Nevada or a seat in the Senate Chamber.

In his "History of the War Between the States," A. H. Stephens, vice-president of the confederate states, says it is doubtful if any speech ever delivered in the world's history had so tremendous an effect in its results as did the impassioned and able speeches of Andrew Johnson in the United States Senate at the beginning of our civil war in denunciation of secession and for the preservation of the Union of those States, and very largely as a result of these speeches Tennessee contributed to the Union Army 40,000 as brave soldiers as ever enlisted under the flag.

STEWART'S ASSERTIONS ARE FALSE.

The chief feature of Mr. Stewart's tirade against Mr. Johnson may be likened to the opening of a clogged sewer. He charges that Mr. Johnson was addicted to the excessive use of intoxicating liquors; in fact, that he was a brutish sot.

The charge is false. In proof of his assertion he gives what he alleges to be details of Mr. Johnson's conduct in this regard when he was sworn into office as President of the United States, and he calls to the aid of his poverty stricken memory an exuberant imagination.

For example, he says that the first information Mr. Johnson had that Mr. Lincoln had been shot on the night of April 14, 1865, was conveyed to Mr. Johnson by himself, after Mr. Lincoln's death at 7.22 the next morning, when in company with Senator Foote, of Vermont, and Chief Justice Chase he went to Mr. Johnson's rooms at the Kirkwood House, awakening him out of a drunken sleep, and that then Chief Justice Chase administered to him the oath of office as President.

The facts are that on the night of the assassination, ex-Governor Farwell, of Wisconsin, was among the spectators in the theater. He was domiciled in the same hotel where Johnson was; he was well acquainted with him; and as soon as the President was shot, he hastened to the Vice-President's rooms, which were within five minutes' walk of the theater. He aroused Mr. Johnson from sleep, whose habit it had always been to go to bed early and get up early. He testified that when he conveyed the awful news to Mr. Johnson, he evinced the greatest emotion and deported himself with the dignity befitting his station and the gravity of the situation.

After Governor Farwell, at the request of Johnson, had gone to the house where the President was lying and to Secretary Seward's to obtain information of their condition, they went together to see Mr. Lincoln, who was still insensible. After the wholly false statement that he, Stewart, first conveyed to Johnson news of Lincoln's assassination, he proceeds to tell how he aroused him out of a drunken sleep by kicking the door of his bedroom.

"In a few minutes," he says, "Johnson came in, putting on a very rumpled coat. He was dirty, shabby, and his hair was matted, while he blinked at us through squinting eyes. As he came down into the room we were all standing. Johnson felt for a chair and sat down. Chief Justice Chase said very solemnly:

"'The President has been assassinated. He died this morning. I have come to administer the oath of office to you.' Johnson seemed dazed at first. Then he jumped up, thrust his right arm up as far as he could reach, and said, 'I'm ready,' in a thick, gruff, hoarse voice. The Chief Justice administered the oath. Johnson—President Johnson—went back to his bedroom and we retired."

Then romancer Stewart says he went to the house of Secretary of War Stanton, and "I told him of the condition of Johnson"—that is, he told Stanton that Johnson was drunk, "and that he must be taken care of"—the man who had just taken the oath of office as President of the United States. "Stanton and I were driven back to the Kirkwood House, and, accompanied by the coachman, we went directly to Johnson's rooms. He was lying down. We aroused him, led him downstairs, and put him into Stanton's carriage.

"We took him to the White House and Stanton sent for a tailor, a barber, and a doctor. He had a dose administered, and the President was bathed and shaved, his hair cut, and a new suit of clothes was fitted to him. He did not, however, get into a presentable condition until late in the afternoon, when a few persons were admitted to see him to satisfy themselves that there was a President in the White House."

Of course, if there were a word of truth in the foregoing it would have been published before and during Johnson's trial by the Senate on the impeachment charges, when the bitter hostility of Benjamin F. Butler and others of Johnson's enemies led them to send hired detectives all over Tennessee in the hope of finding something injurious to his reputation.

Mr. Stewart represents Johnson as taking possession of the White House on the day of President Lincoln's death. As a matter of fact, he did not go to the White House until after President Lincoln had been dead six weeks and until it suited Mrs. Lincoln's convenience to return to her home in Illinois.

OTHER FALSE STATEMENTS.

As further evidence of the falsity of Stewart's statements I quote from "Men and Measures of Half a Century," written by Hon. Hugh McCulloch, of Indiana. He was Secretary of the Treasury in the Cabinet of Mr. Lincoln when he was assassinated, and later held the same position under Presidents Johnson and Arthur, and a more honorable, truthful man never served in the Cabinet of any President. Be it remembered that Stewart says that when the oath of office as President was administered to Johnson by Chief Justice Chase that the Vice-President was drunk, and that no one was present except Senator Foote and himself. Chief Justice Chase was a consistent member of the church, and it is a defamation of his character to say that he would have consented to administer to Johnson the oath had he been in the condition Stewart falsely says he was.

The following truthful account is given by Mr. McCulloch in his book referred to, published twenty years ago:

"It was at his hotel, on the morning of the 15th of April, that the oath of office as President was administered to Mr. Johnson by Chief Justice Chase, in the presence of the members of the Lincoln Cabinet (except Mr. Seward) and two or three Senators who happened to be in the city. Mr. Lincoln's body, from which life had departed but a few hours before, had just been conveyed to the White House."

Mr. Seward's absence is explained by the dangerous wound he had received from an accomplice of the assassin of Mr. Lincoln. The absurdity of Stewart's story about going with the Chief Justice to Johnson's rooms at an early hour in the morning, waking him out of a drunken sleep, etc., is apparent.

Mr. Lincoln was shot on the evening of April 14, but did not die until 7.22 the next morning. Immediately thereafter the Cabinet wrote to Mr. Johnson officially, relating the melancholy occurrence, and saying: "By the death of President Lincoln the office of President has devolved under the Constitution upon you. The emergency demands that you should immediately qualify according to the requirements of the Constitution and enter upon the duties of President of the United States. If you will please to make known your pleasure, such arrangements as you may deem proper will be made."

Mr. Johnson accordingly expressed a wish that the ceremony should take place at the Kirkwood House, at 10 a. m. There were present at that time all the members of the Cabinet except Mr. Seward, a number of Senators, and a few other gentlemen.

With all due solemnity, his hand resting upon an open Bible, at Proverbs 22:23, Mr. Johnson took the oath prescribed and was inducted into his high office.

SECRETARY M'CULLOCH'S STATEMENT.

In contrast with Stewart's Munchausen account of Mr. Johnson's conduct on being sworn into office as President, I again quote from Secretary McCulloch:

"The conduct of Mr. Johnson favorably impressed those who were present when the oath was administered to him. He was grief-stricken, like the rest, and he seemed to be oppressed by the suddenness of the call upon him to become President of the great nation which had been deprived by an assassin of its tried and honored chief; but he was, nevertheless, calm, and self-possessed."

Stewart says as soon as the oath was administered to Johnson "he went back to his bedroom."

Secretary McCulloch says, "He requested the members of the Cabinet to remain with him after the Chief Justice and the other witnesses of the ceremony had retired, and he expressed to each and all of us his desire that we should stand by him in his difficult and responsible position. This desire was expressed in the language of entreaty, and he appeared to be relieved when he was assured that while we felt it to be our duty to him to place our resignations in his hands, he should have the benefit of such services as we could render until he saw fit to dispense with them. Our conference with him was short, but when we left him, the unfavorable impression which had been made upon us by the reports of his unfortunate speech when he took the Vice-President's chair had undergone a considerable change. We all felt as we left him, not entirely relieved of apprehensions, but at least hopeful that he would prove to be a popular and judicious President. The hopes of none of us were fully realized, as time went on, and controversies arose between him and Congress; but his first year's administration was cordially supported by every member of his Cabinet."

On the subject of Mr. Johnson's bearing when he was inaugurated as Vice-President, Mr. McCulloch says:

"I was not present when Mr. Johnson took the oath of Vice-President in the Senate Chamber, but the reports of his speech on that occasion amazed me. It was so different from what had been expected of him, so incoherent, so rambling, that those who listened to it thought that he was intoxicated. He had been ill for some days before he left his home, and on his way to Washington had taken brandy as an astringent. On the day of his inauguration as Vice-President he was really ill, and was so unwise as to resort to a stimulant before he went to the Senate Chamber. His appearance and speech on that occasion made a most unfavorable impression upon the crowded assembly, and fears were excited that, at the time when wise and sober counsels were especially required, an intemperate man had been elected Vice-President. These fears were groundless, but the report of his appearance and speech made an impression upon minds suspicious of all southern men that was never entirely removed. I had no personal acquaintance with him, and I shared in the distrust which generally prevailed. Meeting Mr. Lincoln a day or two after, I said to him that the country, in view of the Vice-President's appearance on the 4th of March, had a deeper stake than ever in his life. He hesitated for a moment and then remarked with unusual seriousness: 'I have known Andy Johnson for many years; he made a bad slip the other day, but you need not be scared; Andy ain't a drunkard.'"

MR. M'CULLOCH CONTINUES.

"This remark of Mr. Lincoln's came home to me when, a few weeks afterwards, I heard Mr. Johnson take the oath as President. Mr. Lincoln was right. Mr. Johnson was especially intemperate as a speaker when defending his policy and replying to the severe criticism to which he was subjected, but not in the use of liquor. I had good opportunity for observing his habits, and my fears made me watchful. For six weeks after he became President he occupied a room adjoining mine, and communicating with it, in the Treasury Department. He was there every morning before 9 o'clock, and he rarely left it before 5. There was no liquor in his room. It was open to everybody. For nearly four years I had daily intercourse with him, frequently at night, and I never saw him when under the influence of liquor. I have no hesitation in saying that, whatever may have been his faults, intemperance was not among them. There was a marked difference between his carefully prepared papers and his offhand speeches. The former were well written and dignified; the latter were inconsiderate, retaliatory, and in a style which could only be tolerated in the heat of a political campaign; hence the opinion that they were made under the influence of liquor."

CHIEF JUSTICE CHASE AND BROWNLOW.

Similar testimony was borne by Chief Justice Chase. He inquired of William G. Brownlow, then a Republican Senator from Tennessee:

"What has been the reputation of Andrew Johnson in your State as to drinking intoxicating liquors?" Mr. Brownlow replied: "Mr. Chief Justice, we were all surprised in Tennessee to learn that Johnson was under the influence of liquor when he was sworn in as Vice-President, as I am sure he was from the statements made to me by various persons who were present."

To this Mr. Chase assented. Mr. Brownlow continued:

"As the editor of a Whig newspaper and a speaker in every political campaign we have had in Tennessee since Johnson's entrance into public life I have fought him so zealously that for twenty years we were not on speaking terms. I never failed to publicly denounce him for anything which I believed he did which I regarded as disreputable, as I certainly do the excessive use of liquor, but I never charged him with being a drunkard because I had no grounds for so doing. I do not mean to say that he was a total abstainer from the use of intoxicating drinks, as I have always been, and as I think every man should be, but I do mean that nobody in Tennessee ever regarded him as addicted to their excessive use."

Mr. Chase replied:

"I have asked you for information on this matter because I had heard that you and Johnson had never been personal or political friends." And he added, "Except when he was sworn in as Vice-President I never saw him under the influence of intoxicants. I knew him in the Senate before the war, and then I know he was not a dissipated man. While he was President I saw him very often, frequently late at night and sometimes on Sunday, but I never saw him under the influence of spirits in the slightest degree, and this is the testimony given me by members of his Cabinet and other gentlemen who were intimately associated with him while he was President. In reply to your statement, Mr. Brownlow, that Johnson was 'not a total abstainer,' I will say that I can't now recall the name of an Ohio politician I ever knew who was."

JOHNSON REALLY ILL.

I will add that Mr. Johnson had been so ill for weeks before the 4th of March, 1865, that he had determined not to go to Washington to have the oath of office as Vice-President administered to him, but to have that ceremony performed at Nashville, as it was in the case of Vice-President-elect William R. King, of Alabama, who was seriously ill at Habana, Cuba, on March 4, 1853, when the oath of office was administered to him by the United States consul-general. Having heard of Mr. Johnson's purpose in this regard, President Lincoln wrote and telegraphed him, urging him to come, if possible. He came to Washington on the 2d or 3d of March, and did not go to the Capitol until the 4th. Mr. Stewart says "he came to Washington in January or February, and was around the Capitol for some weeks previous to the inauguration of President Lincoln." Nor is it true, as Mr. Stewart says, that when sworn as Vice-President, "he was assisted to the chair by the Sergeant-at-Arms" or by anybody else.

JOHNSON'S NEATNESS OF DRESS.

To every person who ever knew Mr. Johnson, the statement of Mr. Stewart that he was slovenly in attire, filthy in person, and without dignity of bearing is known to be false. He was distinguished for exceptional neatness in person and dress, and dignity of bearing. Charles Dickens, in the English edition of his correspondence, described him as one of the most dignified, courtly men in his bearing he had ever met. In the piratical American reprint of his work the complimentary things said of Johnson are omitted out of deference to the prejudice existing in the North against him. The Hon. John Van Buren, of New York, who had met the leading statesmen of Europe as well as his own country, and himself a prince among gentlemen, said "he had personally known every President from Madison to Hayes, and that in dignity of bearing Andrew Johnson compared favorably with any of them, and was in that regard the superior of a majority of them."

I am here reminded that about thirty-five years ago a female correspondent, writing for the press from Washington descriptive of the then Members of the United States Senate, said that there were two Senators, both born in New York, Hon. Roscoe Conkling and Hon. William M. Stewart, who bore no similarity except that they were each 6 feet 2 inches tall and both red-headed, that Conkling was a man of great ability, and always elegantly dressed and of courtly bearing; that the Senator from Nevada was untidy and slouchy in dress and his manners were those of a cowboy and of the mining camp. It is evident that the question of dress and bearing is largely one of taste, about which there is a great diversity of opinion.

Ex-United States Senator William E. Chandler, of New Hampshire, and the very able Secretary of the Navy in the Cabinet of President Arthur, is a man of far more enviable distinction than Mr. Stewart. While Assistant Secretary of the Treasury under President Lincoln, Mr. Chandler became well acquainted with Mr. Johnson, and in the New England Magazine for May, 1907, he pictures Andrew Johnson "not as the drunken boor of the public fancy, but as a mild-mannered, earnest, quiet, kindly man, who did surprisingly well, in view of his antecedents and environments."

JOHNSON'S PERSONAL BRAVERY.

The culmination of the aspersions of the personal character of Mr. Johnson by Mr. Stewart is the wholly false and ridiculous one that he was a physical coward, and that he, Stewart, in 1875, in the office of the Secretary of the Interior, frightened Johnson into fleeing from him to escape a merited whipping.

Stewart says this happened "in the presence of the Secretary and four or five clerks, immediately after the return of Johnson to the United States Senate." The statement imputes to Mr. Johnson conduct so contrary to his well-established character for courage that nobody who ever knew him will believe one word of it. Mr. Stewart owes it to himself to produce the affidavit of at least one of the many persons who are alleged to have witnessed Johnson's disgraceful cowardice, to corroborate his own statement. It is extraordinary that not one of the lynx-eyed newspaper correspondents in Washington ever got hold of and published an incident so interesting and sensational as that an ex-President of the United States and a Member of the United States Senate should, in broad daylight, for most disgraceful conduct, have fled like a dastard to avoid a personal chastisement in the public office of a Cabinet minister. If Mr. Stewart should reply that his alleged witnesses are all dead, some one might be so uncharitable as to suggest that he waited thirty-three years after Johnson's death to make the charge, so that he could say that the Secretary and all the clerks about him were dead.

TRIED TO CARRY OUT LINCOLN'S IDEAS OF RECONSTRUCTION.

I will not attempt a discussion of the proposition Mr. Stewart raises that Johnson's plan of reconstruction was unconstitutional. That is a question about which the ablest lawyers have differed, and I dare not enter that field, as I know no more of the Constitution than does Stewart. Mr. McCulloch and other members of Mr. Lincoln's Cabinet who were intimately associated with the great President have testified that Johnson's plan of reconstruction was that determined upon by Mr. Lincoln. On this point Mr. McCulloch says: "The very same instrument for restoring the national authority over North Carolina and placing her where she stood before her attempted secession, which had been approved by Mr. Lincoln, was by Mr. Stanton presented at the first Cabinet meeting which was held at the Executive Mansion after Mr. Lincoln's death, and having been carefully considered at two or three meetings, was adopted as the reconstruction policy of the administration. Until a year after Mr. Johnson became President there was entire harmony between him and his Cabinet. In the work of restoring the relations between the Government and the States which had attempted to secede from the Union, which work was taken up where Mr. Lincoln had left it, and which was being prosecuted on the same lines, they were a unit. No objection was raised even to that part of the President's first message which treated of the suffrage question by any member of the Cabinet. It was, in fact, approved by all, and by none more heartily than by Mr. Stanton."

With his enormous prestige and popularity with the people and his great tact in dealing with public men, in and out of Congress, Mr. Lincoln would doubtless have succeeded in carrying to a successful issue the plan of reorganization he had outlined and which Johnson could not. But it is not just to denounce Johnson as a traitor to the Republican party, for he never was or claimed to be a member of that party. He was nominated for Vice-President largely through the influence of Mr. Lincoln, who desired a war Democrat as his running mate. Johnson was known by Mr. Lincoln, as he was by the convention which nominated him for Vice-President, to hold to the doctrine that all rights which were not clearly conferred upon the Government by the Constitution, or which were not fairly inferable from those which were expressly granted, were reserved to the States. He believed, with Andrew Jackson, that in these reserved rights the right of secession was not included, and he believed also that the Government had no authority to declare who should be citizens of the States, or what, within the States, should be the qualification of voters.

That Christian statesman, Hugh McCulloch, the friend and adviser of Lincoln, so thoroughly understood and so truthfully portrays the character of Mr. Johnson that I gladly quote further from him:

"No public man in the United States," said he, "has been so imperfectly understood as Andrew Johnson. He had many faults, but he abounded in admirable qualities. His love for the Union was a passion intensified by the dangers to which it had exposed him, and by his labors in its defense. It was his devotion to the Union which compelled him to oppose the reconstruction acts of Congress, which he thought would greatly retard, if it did not prevent, its perfect restoration. I differed from him upon some subjects, but I never had reason to doubt his patriotism, or his personal or official integrity.

"Mr. Johnson was a man of unblemished personal integrity. He was an honest man, and his administration was an honest and clean administration. In this respect it will bear comparison with any that preceded or has followed it. In appointments, money was not potent. Offices were not merchandise. The President never permitted himself to be placed under personal obligations to anyone. He received no presents. The horses and carriage which were sent to him soon after he became President were promptly returned. If he did not declare that public offices were public trusts, his actions proved that he so regarded them. In some matters I doubted the correctness of his judgment, but I never doubted his devotion to what he considered his duty to his country, and the whole country. He was a laborious, painstaking man. For him fashionable watering places had no attractions. Neither by him nor by any member of his Cabinet was recuperation sought at the seashore or in the mountains. His administration had little popular and no distinctive party support, but judged by its merits, as sooner or later it will be, it will cast no discredit on the national honor."

Mr. Stewart boasts that he voted to impeach him, and says "he would do it again."

James G. Blaine, in his great history "Twenty Years of Congress," says he voted to impeach him, but he rejoices that he was not impeached. John Sherman also voted for his impeachment, but years afterwards said he was glad it had failed. Perhaps the only Senator who voted for the removal of Johnson from office who "would do it again" is the Senator from the imperial State of Nevada.

After reciting that the ground for the impeachment of President Johnson was sought in his suspension of Mr. Stanton as Secretary of War and his extempore speeches denouncing his political opponents, Mr. McCulloch says: "Other causes for his impeachment were sought for. His bank account was examined. His private conduct in Washington was carefully scrutinized. Men were employed to investigate his public and private character in Tennessee, but nothing was found to his discredit. There were few public men whose characters and conduct would have sustained as severe scrutiny as Mr. Johnson's was subjected to in 1867. No one that knew anything of Mr. Johnson could doubt his ability, integrity, or patriotism. No one could truthfully say that he was intemperate, and yet a Methodist bishop, a few years after Johnson's death, in a speech which he made at Woodstock, Conn., on the Fourth of July, referred to him as having been a "drunken imbecile," and this expression, shameful and brutal and false as it was, was listened to by a crowd of intelligent and respectable people, without rebuke, and published in a religious newspaper without comment. Years ago a distinguished clergyman, in a historical sermon or address delivered in Washington, spoke at length of Tyler, of Fillmore, of Arthur, of all the Vice-Presidents who became Presidents by virtue of their office as Vice-President, except Johnson, whose name was not even mentioned. And yet, can you say that he served the country less faithfully than they did, or that his lifelong services were less valuable than theirs?

I am a Methodist myself, and I cordially approve of this criticism of a bishop of my church whose language was so unjust, false, and unChristian. In striking contrast to the reprehensible conduct of the bishop referred to, who personally knew nothing of Mr. Johnson, I take pleasure in quoting from another Methodist bishop, Rev. E. E. Hoss, of Nashville, Tenn., who was perfectly familiar with the character of Andrew Johnson. Bishop Hoss is an honor to his church and wholly abstains from participation in partisan politics. His sense of justice and love of truth have alone prompted the reply he has made through the Nashville Banner to Mr. Stewart's aspersions on Mr. Johnson:

BISHOP E. E. HOSS SAYS:

"The venerable ex-Senator from Nevada does not write dispassionately. On the contrary, he displays a spirit of personal malice, and of almost brutal coarseness in all his paragraphs. * * * That Andrew Johnson was born and reared in absolute poverty; that he passed the period of his youth without even the slightest educational advantages; that he contracted a sort of aversion toward those who were more fortunate in their circumstances than himself; and that to the end of his career his character bore some of the marks of his bitter

early years, all these things are to be freely admitted. * * * But that he was an ignoramus, a cheap demagogue, a time-serving politician, and a common sot is as false and slanderous as any allegation could be.

"Before he had passed his twenty-first year he had acquired a taste for the reading of books, and of such books as really count. It may surprise some persons to know that he bought and studied Plato's Republic. With the political history of the United States he made himself entirely familiar. No man kept up better with the newspapers, which all must agree are an invaluable vehicle of education. He sought from the beginning the society of intelligent men. His shop grew to be a center of debate and discussion. Naturally vigorous in intellect, and always eager for knowledge, he made the most of his opportunities and grew in strength and compass from the beginning. First and last he went upon the hustings with nearly every man of great prominence in Tennessee, and held his own with them all. With the possible exception of Thomas A. R. Nelson, who was a man of superb native gifts and of large and accurate attainments, it is doubtful if any of his antagonists ever fully measured up to him. John A. Aiken, William G. Brownlow, Nathaniel G. Taylor, Landon C. Haynes, Gustavus A. Henry, Meredith P. Gentry, and Horace Maynard, one after another, found themselves more than matched by this plain, straightforward tailor, whose power over popular audiences was due, not to the graces of oratory, but to the sledge-hammer vigor with which he drove home his points. Mr. Henry, 'the Eagle Orator,' once said of him: 'The harder you press him, the higher he is sure to rise.' Frequently chosen to the state legislature, five times elected to the lower House of Congress and twice to the United States Senate, and elevated in succession to the Vice-Presidency and Presidency of the United States, it is folly to intimate that he was lacking in intellectual force.

"The intimation that Mr. Johnson was in the habit of dressing like a tramp and behaving like a clown is pure fiction. He knew the value of good clothes, and it is doubtful whether anybody ever saw him when his garments were not of the best material and made to fit. He had also great dignity of manner. I was not brought up to admire him. My people were old-line Whigs of the straightest sect; and, as a boy, I had grave difficulty in believing that a Democrat could be the right sort of a man. But I shall never be able to forget the deep impression that Mr. Johnson made upon me. After his retirement from the Presidency I met him frequently in Greeneville, where I was then a young minister, and once I spent a pleasant afternoon in his own home. At that time, whatever may have been the case when he first came before the public, there was nothing lacking of the well-bred gentleman in his demeanor.

"It is a matter of common tradition that during his stay in the White House he bore himself with as much ease as if he had been born in the purple. Visitors from abroad never failed to carry away pleasant recollections of him. The late Doctor Wilman, editor of the best edition of Gibbon's Rome, was eulogistic in speaking of him, and Charles Dickens wrote that he had a commanding presence, a splendidly shaped head, and every sign of an extraordinary man.

"To those who knew Mr. Johnson, Senator Stewart's story about frightening him and causing him to make tracks in order to escape merited chastisement, have a Munchausenish sound. When did he ever show the white feather? His whole life was full of independence and courage. As a young man he dared to defy General Jackson, and to support Hugh Lawson White for the Presidency against Martin Van Buren. When Know-Nothingism swept over the land, he did not compromise with it for a single moment, but smote it full in the face. At the beginning of the civil war he put his life in frequent jeopardy by his devotion to the Union. I am old enough to have seen him show the most dauntless front in the face of crowds that were angry enough to have slain him. In all our history there is nothing finer than the stand he took against the reconstruction measures of the triumphant Republican party. Saying nothing at all about the wisdom of his course, it is at least certain that he did not bear himself in that great contest like a man that knew the meaning of fear.

"He has been called a demagogue, and such, in a certain sense, he was. But there is no ground for supposing that his profession of faith in the common people was insincere. He was one of them; he knew them; he sympathized with them. That he was a real patriot is true. The Union of the States was dear to him. To serve it, he was willing to break with his own party. And when the war was over, though he had indulged in unpardonable bitterness of speech toward the South, he was so solicitous to protect and preserve the Constitution that he once more risked everything, even the probability of removal from office by impeachment, rather than give in his adhesion to policies that seemed to him to be violative of the letter and spirit of that great compact between the States.

"Mr. Johnson's personal honesty was absolutely beyond question. He was simple in his way of living and thrifty in the management of his affairs, but he never soiled his fingers by handling a dirty dollar. As a public official he made it an invariable rule to receive no gifts, great or small. George Washington himself was not more scrupulous of his reputation in money matters. As his best biographer has said: 'His public policies were often challenged, but no man ever suggested aught against his personal integrity. He refused to use the patronage and prestige of his office when President to save himself from threatened impeachment. He even allowed an important member of his counsel—Judge Jere Black—to retire from the case rather than take a step which might be construed by some as favoritism. Costly gifts, when President, were returned to the donors with kind regards. The citizens of New York tendered him a handsome carriage and a splendid pair of horses, but these he politely declined.' I have written the foregoing, not because I am, or ever was, an apologist for the grave faults in Mr. Johnson's character, but because that I have felt it was not becoming in a Tennessean to sit still and see him assailed with reckless malice and without due regard for truth."

I am not an apologist for indulgence in strong drink. I have always totally abstained from the use of all intoxicating beverages, but I realize at the same time that thousands of men who do indulge are better men and better citizens than many who do not, not because of such indulgence, but in spite of it. There are men who—

Compound for sins they are inclined to,
By damning those they have no mind to.

The persistent misrepresentation of Andrew Johnson's habits in this regard ought to stop, whether indulged in by a political bishop or by a pot-house politician.

There is to-day an altogether different sentiment on the liquor question to that which prevailed generally in this country until within recent years. During the period of Mr. Johnson's public service it was not uncommon for even church members to keep a bottle and to invite their visiting friends to partake of the social glass. The habit was reprehensible, and I am rejoiced that it has been almost universally discontinued. But I resent the ignorant or malicious misrepresentations of Andrew Johnson in this matter because I believe it has its inspiration largely in partisan feeling and sectional prejudice. If Johnson had been a Republican and a northern man, the fact of his having been under the influence of a stimulant, taken medicinally, on the 4th of March, 1865, would not be regarded by his detractors as an unpardonable sin in consideration of the fact, as clearly established by the testimony of his Cabinet and all who were intimately associated with him, that while President he was absolutely temperate.

As a class the Presidents of the United States have been singularly abstemious in the use of intoxicating liquors, and in this respect compare most favorably with the rulers and statesmen of Europe.

SHOWS UP SCHURZ.

I will conclude this letter by reference to the "Reminiscences of Carl Schurz," which have recently been published in McClure's Magazine. Mr. Schurz, after telling how he drank a whole bottle of wine with Gen. Frank P. Blair, and also drank wine with the poet Longfellow, is greatly distressed in mind because he had heard that Andrew Johnson was not a teetotaler. He says he called frequently to see him at Nashville during the civil war, while he was military governor, and sometimes when he called Mr. Johnson was not in his office but was reported sick at his residence. He doesn't know that Johnson was drinking, but somebody in Nashville (name of author not given) intimated that such might be the case. He doesn't say that during the frequent times he did see him he ever saw any indication that he had been drinking. Unlike Stewart, Mr. Schurz describes him as being neatly dressed. Mr. Schurz also complains that Mr. Johnson's conversation with him evidenced a bitter, vindictive spirit toward the secession leaders and finally he speaks sneeringly of Mr. Johnson as having sprung from the "poor whites" of the South. In reference to the last-named objection to Johnson I will say that as Mr. Schurz's father was a German peasant it would have been in better taste if he had said nothing of Johnson's humble origin. The peasant of Prussia is the "poor white" of that monarchy, and is not respected by the nobility or wealthy classes a bit more than are the poor whites of the United States by our wealthy monkeys who give monkey dinners at Newport and who sell their daughters to bankrupt debauches of Europe for a title of nobility.

SCHURZ AN INGRATE.

Mr. Schurz visited Johnson, I suppose, very often, as he says, for he was "walking the floor" at the time. He does not tell why he became so much enamored of Johnson's society and the object and result of his visits because that would show what an ingrate he was, and I will supply that omission. I will also say that it would be impossible for Schurz to have felt or expressed greater contempt for Johnson than Johnson felt and expressed for Schurz after he became aware of his perfidy. I will premise by saying that Schurz, like Benjamin F. Butler and Nathaniel P. Banks, of the political generals on the Union side, was a dismal failure as a general. On the Union side the only splendid soldiers I can recall, who at the same time were politicians, were Frank P. Blair, John A. Logan, and Daniel E. Sickles. After the battles around Chattanooga Schurz was in disgrace. I do not mean that he was a coward, but that as a commander of troops he was as big a fraud as he was as a reformer.

He played on the piano and he sang, "I love Thee, oh! I love Thee," and no man ever lived who could do that who was capable of commanding an army. After the battles referred to, Schurz was relieved of command of his divison and ordered to Nashville in command of a recruiting station with three or four companies constituting his army. In a word, he was a major-general with two stars on each shoulder and having only a major's command. Schurz felt the degradation of his position. He lost no time in calling upon Military Governor Andrew Johnson. Metaphorically speaking, he got down on his marrowbones. With tears in his voice, if not in his eyes, he appealed to Johnson, whom, with reason, he believed stood high in the regard of President Lincoln. After referring to what he alleged to be the "injustice of his treatment" he told Johnson how "as a foreign-born citizen his heart had overflowed with gratitude to him since 1855 for the heroic and successful fight he had made in Tennessee against that hydra-headed monster know-nothingism or so-called Americanism, which had sought to ostracize persons of foreign birth, like himself," and he entreated Johnson to intercede with President Lincoln in his behalf. Johnson felt sorry for the fellow and probably was susceptible to Schurz's flattery, who assured him of his everlasting gratitude. Within a very short time Johnson came to Washington and made an earnest and successful appeal to President Lincoln for the restoration of Schurz to a command commensurate with his rank. After Johnson became President, Schurz called on him and after a lengthy interview the latter clearly intimated that he approved the policy of reconstruction President Johnson had outlined, and the President appointed him as a commissioner to visit the Southern States, meet the people who had been in rebellion—leaders and followers—and report to him whether they could be trusted to be loyal to the Union and whether they were fit for restoration to their civil and political rights. At the same time General Grant was also sent South on the same mission. The great soldier and warm-hearted, brave-hearted, and generous gentleman reported favorably on the spirit and temper of the southern people. To the amazement of Johnson, Schurz made a report directly the reverse of that of General Grant. The report of Grant so angered Charles Sumner that he viciously denounced it on the Senate floor as an effort to "whitewash the rebels of the South," and he cited Schurz's report in corroboration of his denunciatory characterization of Grant's report. And this man Schurz now criticizes Johnson for displaying toward the southern leaders in 1863, while war was flagrant, that spirit of hostility which he (Schurz) displayed after the war was over. Later Schurz warmly advocated Johnson's impeachment and removal from office. He was then casting a wistful look to a seat in the United States Senate from Missouri, and he knew there was no chance for that unless he out-Heroded Herod in radicalism. The party then dominant in Missouri had not only disfranchised all who had been active in rebellion against the United States but all who sympathized with them. By law it prohibited all such from practicing law or medicine, teaching school or preaching the gospel. If Schurz then disapproved of any feature of this proscription, he kept his opinions to himself.

After he secured his election to the Senate by "swimming with the tide" he flopped to the other side because he got mad at President Grant for not permitting him to control the federal appointments in Missouri, blossomed into a reformer, and opposed Grant's reelection in 1872.

There is a proverb that "A man can forgive a person who has injured him, but never one whom he has injured." Therefore Schurz's hostility to Johnson.

This "Swiss soldier," as Wendell Phillips called him, and this "D——d Hessian," as old Andy Johnson termed him, is a beautiful specimen to arraign Andrew Johnson on the charge of inconsistency. Schurz advocated McKinley's election in 1896 on the ground that free silverism "was public and private dishonesty." Because President McKinley failed to put that estimate on his importance which he had himself put on it, he earnestly advocated the election of Mr. Bryan in 1900, on the same free-silver platform.

In his "Memoirs" Schurz eulogizes General Grant, who always showed contempt for him, because, I suppose, he believed that would popularize and sell his book, and for the same reason he throws mud on Johnson, but mud thrown by such an ingrate as Carl Schurz won't stick.

There is no class of people who can change their political clothing so suddenly and so often as a professional reformer who is after an office or who has been refused that recognition in his recommendations of others for office as he deems his due.

The Clerk read as follows:

Repairs and operation of roads, pavements, streets, lights, and general police: For rakes, shovels, and brooms; repairs to roadway, pavements, macadam and asphalt block; repairs to street crossings; repairs to street drains; electric lights for streets; repairs and renewal to poles, wires, etc., $4,000; 4 laborers cleaning roads, at $480 each; in all, $5,920; for two-thirds of said sum, to be supplied by the United States, $3,813.23.

Mr. STANLEY. I move to strike out the last word. Mr. Chairman, we should remember, notwithstanding the lateness of the night or the earliness of the morning, the great necessity for deliberation. We are rushing through this bill without paying any particular attention as to whether or not points of order might be made. We are rushing through this bill without having the Clerk read in a formal way, and this bill carries millions of dollars of the people's money, and because it is a little late, because we have been up for some time, that is no reason why we should not give due attention and due deliberation to this measure. There is no reason why gentlemen should hesitate, if necessary, to make points of order or motions to strike out the last word, or move amendments, or take advantage of any of those things that are submitted in orderly debate. Here we are rushing this bill through this way without anybody feeling particular interest in or paying particular attention to it.

It may be that this bill might possibly be improved by such an amendment. I wish to suggest, Mr. Chairman, that in the face of an impending panic, in these strenuous times when we are liable to get into trouble before we know it, with a Japanese war threatened, we ought to be specially careful, especially diligent——

Mr. CHANEY. Mr. Chairman, I make the point of order that the gentleman is not speaking to the amendment.

The CHAIRMAN. The point of order is made that the gentleman is not speaking to the amendment.

Mr. STANLEY. I should like unanimous consent to speak for five minutes, in response to the criticism of the gentleman that I am not speaking to the amendment and that my remarks are not germane.

The CHAIRMAN. The gentleman from Kentucky asks unanimous consent to speak out of order for five minutes.

Mr. TAWNEY and others objected.

The CHAIRMAN. Objection is heard. The Clerk will read.

The Clerk read as follows:

Improvement of the Yellowstone National Park: For maintenance and repair of improvements, $65,000, to be expended by and under the direction of the Secretary of War; and to be immediately available.

During the reading,

Mr. WILLIAMS. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Mississippi rise?

Mr. WILLIAMS. Mr. Chairman, I move to strike out the last word, which is the word "dollars."

Mr. MANN. No; the last word is "available."

Mr. WILLIAMS. The last word is "available." I was not altogether mistaken either, Mr. Chairman, because, after all, dollars which are not available are not dollars at all. [Laughter.] I wish, therefore, to go back and speak about available dollars. This leads me, Mr. Chairman, into discussing the particular motion which I have made, and to notice the historic growth of the currency question.

I find by a particular examination of the history of those pets of the Republican party, the African tribes, that in the early history of their attempted growth toward civilization cattle were counted as money.

Mr. CHANEY. I make the point of order that the gentleman is not speaking to his amendment.

The CHAIRMAN. The point is made that the gentleman from Mississippi is not speaking to the amendment.

Mr. WILLIAMS. I am speaking about available dollars, absolutely in point, and I have made a motion to strike out the last word. I find that a little bit later on——

The CHAIRMAN. The gentleman is debating the word "available," not "available dollars."

Mr. WILLIAMS. What is the ruling of the Chair?

The CHAIRMAN. The gentleman's motion is not to strike out the word "dollars," but the word "available."

Mr. WILLIAMS. I understand, but I thought I had made plain to the Chair that dollars not available could not possibly be dollars.

Mr. CLAYTON. And in the same paragraph is the sum of $65,000.

Mr. WILLIAMS. Just above there is the word "dollars." I find that a little later on in the history of the world, Mr. Chairman, the Latins used the word "pecunia," and I am informed by the gentleman from South Carolina [Mr. JOHNSON] and by the gentleman from Arkansas [Mr. MACON] that that word also meant cattle. I find later on in the history of the world, Mr. Chairman, that Abraham bought a grave——

Mr. TAWNEY. I make the point of order that the gentleman from Mississippi is not speaking to his amendment.

The CHAIRMAN. The Chair is compelled to sustain the point of order.

Mr. STANLEY. I appeal from the decision of the Chair.

Mr. WILLIAMS. I am attempting to the best of my ability to give a history of the word "available" in connection with the word "dollars."

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Mount Rainier National Park: For completion of the wagon road into said park from the west, heretofore surveyed and commenced, under the direction of the Secretary of War, to be immediately available, $25,000.

Mr. JOHNSON of South Carolina rose.

Mr. WILLIAMS. Mr. Chairman, I move to strike out the last word, the word "dollars."

The CHAIRMAN. The gentleman from South Carolina [Mr. JOHNSON] is recognized.

Mr. JOHNSON of South Carolina. On the preceding paragraph I want to ask a question in perfect good faith. I noticed in the hearing before the committee that considerable sums were asked for the laying out of additional roads, on the ground that the roads had become dusty and uncomfortable; and I wanted to know if, in the condition of the Treasury and the growing deficit, the committee have allowed those amounts that were asked for building new roads?

Mr. TAWNEY. The gentleman is now speaking——

Mr. JOHNSON of South Carolina. I am speaking of the testimony before the committee in regard to constructing some very expensive roads, and I wanted to know if they were included in this item.

Mr. TAWNEY. No; I will say to the gentleman that the committee has not recommended a single increase estimated for by the department for any of the national parks. We have given them their current appropriations and no more.

The Clerk read as follows:

Bridge across Mississippi River at Fort Snelling, Minn.: For payment of any and all expenses to be borne by the United States in connection with the construction and completion of a bridge and approaches across the Mississippi River between the Fort Snelling Military Reservation and the city of St. Paul, Minn., $20,000.

Mr. OLLIE M. JAMES. Mr. Chairman, I move to strike out the last word for the purpose of getting some information. I want to know what condition exists here that authorizes the Government of the United States to expend $20,000 to build a bridge across the Mississippi River from Fort Snelling Reservation to St. Paul, Minn.

Mr. TAWNEY. This is not that proposition. The bridge is already built. This is to construct the approaches to a bridge on land owned by the Government of the United States.

Mr. OLLIE M. JAMES. It does not say so. It says "completion of bridges and approaches." Now, if the bridge has been completed, this is an exorbitant amount to appropriate; and in view of the statement of the chairman in charge of the bill that the bridge has been completed, and in view of the further fact that the provision provides for the completion of the bridge, I think it is entirely too large an amount to appropriate for such a purpose. Therefore I shall move to strike out the word "twenty," in line 4, after the word "Minnesota," page 158, and substitute in lieu thereof the word "five."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Line 4, page 158, strike out the word "twenty" and insert "five."

The question was taken; and on a division (demanded by Mr. OLLIE M. JAMES) there were 20 ayes and 68 noes.

So the amendment was lost.

The Clerk read as follows:

For continuing the establishment of the Chickamauga and Chattanooga National Park; for the compensation and expenses of two civilian commissioners, maps, surveys, clerical and other assistance, messenger, office expenses, and all other necessary expenses; foundations for state monuments; mowing; historical tablets, iron and bronze; iron gun carriages; for roads and their maintenance; the purchase of small tracts of lands heretofore authorized by law, including $20,000 for continuing the improvement and maintenance of the road owned by the Government from Stevens Gap by way of Davis's Cross Roads to Crawfish Springs in the park; in all, $55,000.

Mr. WILLIAMS. Mr. Chairman, I rise to make a motion to strike out the last word in order to continue the lecture which I began a few moments ago. I find from an inspection of the Epistles to St. Paul that it is solemnly announced that the love of money is the root of all evil. A man may love money and be a tolerably good fellow, but the love of money is the root of all evil.

Mr. MILLER. Mr. Chairman, I want to suggest that the gentleman is not speaking on the point of order.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

Shiloh National Military Park: For continuing the work of establishing a national military park on the battlefield of Shiloh, Tennessee; for the compensation of three civilian commissioners and the secretary, clerical and other services, labor, historical tablets, maps and surveys, roads, purchase and transportation of supplies and materials, office and other necessary expenses, $27,000.

Mr. EDWARDS of Georgia. Mr. Chairman, it is now four minutes after 3 o'clock in the morning, and I move that the committee do now rise.

Mr. MANN. I make the point of order that that motion is dilatory.

Mr. EDWARDS of Georgia. It has been some time since it was voted down.

The CHAIRMAN. The Chair thinks the motion is dilatory, and the Clerk will read.

The Clerk read as follows:

Gettysburg National Park: For continuing the work of establishing the national park at Gettysburg, Pa.; for the acquisition of lands, surveys and maps; constructing, improving, and maintaining avenues, roads, and bridges thereon; making fences and gates; marking the lines of battle with tablets and guns, each tablet bearing a brief legend giving historic facts, and compiled without censure and without praise; preserving the features of the battlefield and the monuments thereon; providing for a suitable office for the commissioners in Gettysburg; compensation of three civilian commissioners, clerical and other services; expenses and labor; the purchase and preparation of tablets and gun carriages and placing them in position, and all other expenses incidental to the foregoing, $75,000.

Mr. STANLEY. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. STANLEY. I move to strike out the last word, in order that I may avail myself of valuable information. There has been a most grievous oversight here, Mr. Chairman. Many of the gallant deeds at Gettysburg are commemorated in this bill. These tablets provided in the bill are intended, of course, to immortalize the glories of those who fell there, but there is one incident connected with Gettysburg——

Mr. TAWNEY. Mr. Chairman, I make the point of order that the gentleman is not speaking to his amendment.

Mr. STANLEY. Mr. Chairman, I am speaking directly to the bill. I want to offer an amendment.

The CHAIRMAN. The gentleman should offer his amendment.

Mr. STANLEY. I wish to have inserted that a tablet be erected at a cost of not less than $5,000 to commemorate the fact that the chairman of the committee was also born near the battlefield of Gettysburg.

Mr. MANN. Mr. Chairman, I make the point of order that the gentleman has to send his amendment in writing to the Clerk's desk.

The CHAIRMAN. The Clerk will read.

Mr. STANLEY. Mr. Chairman, I want to send my amendment up.

The CHAIRMAN. But the gentleman can not take the time of the committee for that purpose. The Clerk will read.

The Clerk read as follows:

Survey of northern and northwestern lakes: For survey of northern and northwestern lakes, including all necessary expenses for preparing, correcting, extending, printing, and issuing charts and bulletins, and of investigating lake levels, with a view to their regulation, to be immediately available, $125,000.

Mr. BEDE. Mr. Chairman, I offer an amendment at this point which I send to the desk and ask to have read.

Mr. MACON. Mr. Chairman, I make the point of order against the paragraph.

Mr. MANN. Is that for the survey of the northern and northwestern lakes?

Mr. MACON. Yes.

Mr. MANN. That has been authorized for a number of years.

Mr. MACON. How?

Mr. TAWNEY. By statutory law.

The CHAIRMAN. Does the Chair understand the gentleman from Minnesota to say that this is authorized by statute?

Mr. TAWNEY. Authorized by law, and it is work that has been in progress for many years.

Mr. MACON. I withdraw the point of order.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will read.

The Clerk read as follows:

Insert after line 17, page 160:

"Duluth-Superior Harbor: For continuing the work of dredging in the Duluth Harbor basin near the Duluth entry, commenced under the act of Congress approved May 2, 1908, $150,000."

Mr. FITZGERALD. I make the point of order against that amendment.

Mr. MANN. I make a point of order against the amendment.

Mr. GAINES of Tennessee. Mr. Chairman, it seems to be a continuation of public work, and I do not see how the point of order would lie.

Mr. MANN. I make the point of order that it is not germane to this part of the bill, and it is not authorized by law.

Mr. FITZGERALD. It is not authorized by law.

Mr. BEDE. It comes in under the dredging of the northwestern lakes.

Mr. FITZGERALD. It is not authorized by law nor is it germane to this paragraph.

The CHAIRMAN. The Chair thinks it is not germane to the paragraph and is not authorized by existing law, and the Chair sustains the point of order.

Mr. MURPHY. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. MURPHY. I move to strike out the last word. I want to get some information from the gentleman having the bill in charge. I would like to know what lakes are being surveyed, and for what purpose?

Mr. TAWNEY. These are the Great Lakes—Lakes Erie, Michigan, Superior, Huron, Ontario.

Mr. MURPHY. The description is "survey of northern and northwestern lakes."

Mr. TAWNEY. That is what they are called.

Mr. MANN. They are the big lakes. This is done by the Engineer Department of the Army.

Mr. SABATH. Is Lake Michigan included?

Mr. MANN. Yes. The Coast and Geodetic Survey do the survey of the sea.

Mr. MURPHY. How long has this work been continuing?

Mr. MANN. Oh, it has been continuing for many, many years. The gentleman gets charts sent to him continuously.

Mr. MURPHY. I understand that, but I do not understand the necessity for continuing this year after year at a cost of $125,000. I have looked into this to some extent. If the gentleman in charge of the bill can give me some idea as to when this work will be completed, I would like to know.

Mr. TAWNEY. It is impossible to tell.

Mr. MANN. The gentleman is sincere in his inquiry?

Mr. MURPHY. Yes.

Mr. MANN. For instance, let me say that recently the town of Gary, Ind., was laid out, and they have had to survey the lake on the approach to that locality, and there have been discovered, for instance, large areas at the bottom of the lake where the water was exceedingly shallow. They have had to resurvey a considerable portion of the lake in front of the city of Chicago, where there has been a change in the bottom of the lake. Now, the Hydrographic Office is doing that character of surveying on the lake and continuing the survey.

Mr. TAWNEY. Mr. Chairman, I will say that increased draft of vessels is another principal cause for the continuing of this work. There are obstructions to navigation being discovered all the time, and they have had in the last two years to begin a resurvey of the entire Lakes on account of the increased draft of vessels.

Mr. MURDOCK. And is it not true that this work will have to continue right along and it is very valuable?

Mr. TAWNEY. That is true.

Mr. FITZGERALD. I will say to the gentleman from Missouri that the surveys originally were upon the theory that a depth of 12 feet of water would be required. The increasing demands of commerce on the Great Lakes now require that the surveys be made so as to ascertain a depth of from 25 to 30 feet, and for that reason a large amount of work is being done over.

Mr. MURPHY. Does this include a survey of any of the smaller lakes? I represent a district on one of the northwestern.

Mr. FITZGERALD. I understand it is the Great Lakes; that is my recollection.

Mr. MURPHY. I do not understand these words in this paragraph, "and of investigating lake levels with a view to their regulation."

Mr. FITZGERALD. Well, it has been ascertained that there is some change in the lake levels due both to natural and artificial causes, and it was found highly important to have some record of the varying changes that are made, so as to make it possible to keep the charts accurate.

Mr. MURPHY. Does the gentleman consider this amount of $125,000 necessary for this purpose at this time when we are so crowded for money?

Mr. FITZGERALD. Last year the appropriation, if I recollect it correctly, was increased from $75,000 to $125,000, and it seems to be necessary because of the demands of the shipping interests on the Great Lakes.

Mr. MURPHY. I would ask the gentleman further if the demand for any portion of this is caused by the projected deep-waterways canal and other canals running into these lakes?

Mr. MANN. No; that has nothing to do with this work.

Mr. MURPHY. Then, if that is the case, I will move, Mr. Chairman, to strike out, in line 16, the words "one hundred and."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

In line 16 strike out the words "one hundred and;" so as to read "$25,000."

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Artificial limbs: For furnishing artificial limbs and apparatus, or commutation therefor, and necessary transportation, $132,000.

Mr. GAINES of Tennessee. Mr. Chairman, for anyone who is a cripple I feel sorry, and especially for those who have lost their limbs fighting for their country.

Mr. MANN. Has the gentleman a motion pending?

Mr. GAINES of Tennessee. Well, I move to strike out the last word.

Mr. MANN. Then the gentleman will move to strike out the appropriation for the supplying of these limbs.

Mr. GAINES of Tennessee. I will put it back. I do not mean to do that. I want to make an observation which I think is timely. I want to know how long we have had an appropriation of $132,000 for getting artificial limbs. Here it is forty-odd years since the civil war and we are still buying artificial limbs. Now, why does not the appropriation decrease as the old soldiers die?

Mr. TAWNEY. Unfortunately, artificial limbs do not last as long as the natural ones.

Mr. GAINES of Tennessee. I have never worn one and I presume the gentleman speaks from personal experience. [Laughter.] Now, Mr. Chairman, I am entirely serious in this and I want to know how long does the gentleman think we will continue to pay a hundred and thirty-odd thousand dollars in buying artificial limbs?

Mr. TAWNEY. That is nothing; we appropriated over $400,000 last year.

Mr. GAINES of Tennessee. I take it it is nearly forty-five years——

Mr. FITZGERALD. Nine years; that is my recollection.

Mr. GAINES of Tennessee. It has been here longer than that. I have been in Congress twelve years, and I ran across this when I first came, and I remember I made some inquiry about it. I assure you I am entirely serious.

Mr. CAMPBELL. We have added a large number of those who wear artificial limbs within the last twelve years. There are many Spanish-American war veterans.

Mr. GAINES of Tennessee. They did not lose their legs. They just lost their health, as a rule.

Mr. CAMPBELL. I know of many who are wearing artificial limbs.

Mr. GAINES of Tennessee. Mr. Chairman, I would like to have this matter seriously considered.

Mr. STANLEY. Will the gentleman from Tennessee yield to a question?

Mr. GAINES of Tennessee. Yes.

Mr. STANLEY. Does the gentleman know whether there has been any appropriation made by the Department of Agriculture or a department of technology to discover tubercles and other dangerous insects that destroy wooden legs? It may be, Mr. Chairman, if the gentleman will excuse me, that these wooden legs are demanded on account of these boring insects that are now destroying the trees. I have reason to believe they also attack artificial legs.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. GAINES of Tennessee. Mr. Chairman, I move to strike out something else. [Laughter.] I really do want, gentlemen, to get to the bottom of this matter. It relates to cripples, and I want them to have relief.

The CHAIRMAN. The Clerk will read.

Mr. OLLIE M. JAMES. Mr. Chairman, I wish to offer an amendment.

Mr. TAWNEY. Mr. Chairman, I move that the committee do now rise. If we can not consider a paragraph to buy artificial limbs for old soldiers of this country without filibustering, it is time for the committee to rise.

Mr. GAINES of Tennessee. Mr. Chairman, I deny that I am "filibustering."

The CHAIRMAN. The question is on the motion of the gentleman from Minnesota that the committee do now rise.

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. FINLEY. Mr. Chairman, I demand a division.

The committee divided; and there were—ayes 66, noes 20.

The committee accordingly rose; and Mr. MANN having taken the chair as Speaker pro tempore, Mr. OLMSTED, Chairman of the Committee of the Whole House on the state of the Union, reported that the committee had had under consideration the bill H. R. 28245, the sundry civil appropriation bill, and had come to no resolution thereon.

LEAVE OF ABSENCE.

Mr. FLOYD, by unanimous consent, was granted leave of absence indefinitely, on account of sickness in family.

RECESS.

Mr. TAWNEY. Mr. Chairman, I move that the House do now take a recess until 11 o'clock a. m.

The motion was agreed to.

Accordingly (at 3 o'clock and 20 minutes a. m.) the House took a recess until 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

A letter from the Secretary of the Smithsonian Institution, recommending legislation to provide room for certain models from the Patent Office (H. Doc. No. 1482)—to the Committee on Patents and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. HAMILTON of Michigan, from the Committee on the Territories, to which was referred the bill of the House (H. R. 25553) for the relief of the Alaska Pacific Railway and Terminal Company, reported the same with amendment, accompanied by a report (No. 2247), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. HULL of Iowa, from the Committee on Military Affairs, to which was referred the bill of the Senate (S. 5729) to correct the records and authorize the reenlistment of certain noncommissioned officers and enlisted men belonging to Companies B, C, and D of the Twenty-fifth U. S. Infantry, who were discharged without honor under Special Orders, No. 266, War Department, November 9, 1906, and the restoration to them of all rights of which they have been deprived on account thereof, reported the same without amendment, accompanied by a report (No. 2248), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. ALEXANDER of New York, from the Committee on the Judiciary, to which was referred the bill of the House (H. R. 26839) providing for an increase of salary for the United States marshal for the eastern district of Louisiana, reported the same with amendment, accompanied by a report (No. 2249), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. MARSHALL, from the Committee on Indian Affairs, to which was referred the bill of the Senate (S. 2963) for the survey and allotment of lands now embraced within the limits of the Crow Indian Reservation, in the State of Montana, and the sale and disposal of all surplus lands after allotment, reported the same with amendment, accompanied by a report (No. 2256), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. STERLING, from the Committee on the Judiciary, to which was referred the bill of the Senate (S. 6074) to provide for holding terms of the United States circuit and district courts at Springfield, Mass., reported the same with amendment, accompanied by a report (No. 2257), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. HAWLEY, from the Committee on Claims, to which was referred the bill of the Senate (S. 6986) for the relief of registers and former registers of the United States land offices, reported the same without amendment, accompanied by a report (No. 2259), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. HARRISON, from the Committee on Foreign Affairs, to which was referred the joint resolution of the House (H. J. Res. 261) authorizing the President of the United States to invite the International Congress of Applied Chemistry to hold its eighth meeting in the United States of America, in the year 1912, reported the same without amendment, accompanied by a report (No. 2245), which said joint resolution and report were referred to the House Calendar.

Mr. RYAN, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the House (H. R. 28137) to amend an act entitled "An act to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon," reported the same without amendment, accompanied by a report (No. 2253), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. SULLOWAY, from the Committee on Invalid Pensions, to which was referred the bill of the Senate (S. 9067) to grant pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and dependent relatives of said soldiers, reported the same without amendment, accompanied by a report (No. 2250), which said bill and report were referred to the Private Calendar.

Mr. FULLER, from the Committee on Invalid Pensions, to which was referred the bill of the Senate (S. 9242) granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to the widows and dependent and helpless relatives of such soldiers and sailors, reported the same without amendment, accompanied by a report (No. 2251), which said bill and report were referred to the Private Calendar.

Mr. BRADLEY, from the Committee on Invalid Pensions, to which was referred the bill of the Senate (S. 9422) granting pensions and increase of pensions to certain soldiers and sailors of the civil war and to certain widows and helpless and dependent relatives of such soldiers and sailors, reported the same without amendment, accompanied by a report (No. 2252), which said bill and report were referred to the Private Calendar.

Mr. PARKER, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 19123) to correct the lineal and relative rank of Granville Sevier, captain, Coast Artillery Corps, U. S. Army, reported the same with amendment, accompanied by a report (No. 2258), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. SULZER: A bill (H. R. 28337) to create in the War and Navy departments, respectively, a roll to be known as the "volunteer officers' retired list," to authorize placing thereon with pay surviving officers who served in the Volunteer Army, Navy, or Marine Corps of the United States in the civil war, and who are not now on the retired list, and for other purposes—to the Committee on Military Affairs.

By Mr. LAFEAN: A bill (H. R. 28338) to provide for standard packages, grades, and marks for apples in closed packages entering into interstate and foreign commerce, and for other purposes—to the Committee on Interstate and Foreign Commerce.

By Mr. HALE: A bill (H. R. 28339) to regulate the sale of intoxicating liquors in the District of Columbia—to the Committee on the District of Columbia.

By Mr. WOODYARD: A bill (H. R. 28340) to authorize the Parkersburg Bridge Company to construct a bridge across the Ohio River, connecting Parkersburg, W. Va., with Belpre, Ohio—to the Committee on Interstate and Foreign Commerce.

By Mr. FOSTER of Vermont: A bill (H. R. 28341) for the erection of a monument at Burlington, Vt., to the memory of Samuel de Champlain—to the Committee on the Library.

By Mr. GOULDEN: A bill (H. R. 28342) providing for the assembling, collecting, editing, and transmitting by the Secretary of War to Congress, for printing as a public document for distribution, the rolls of soldiers, sailors, and marines, and correspondence and reports relating to the war of the Revolution—to the Committee on Printing.

By Mr. BURTON of Delaware: A bill (H. R. 28343) to increase the efficiency of the Pay Department, United States Navy—to the Committee on Naval Affairs.

By Mr. HULL of Iowa: Resolution (H. Res. 592) providing for the consideration of Senate bill 5729—to the Committee on Rules.

Also, a resolution (H. Res. 594) providing for the consideration of Senate bill 5729—to the Committee on Rules.

By Mr. BURTON of Ohio: Joint resolution (H. J. Res. 262) extending the operation of an act for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls, and for other purposes—to the Committee on Rivers and Harbors.

By Mr. HUMPHREY of Washington: Concurrent resolution (H. C. Res. 72) asking the Secretary of War to cause an investigation to be made of wagon roads and trails, etc., in Alaska—to the Committee on the Territories.

By Mr. CALDER: Memorial of the legislature of Wyoming, relating to homestead laws—to the Committee on the Public Lands.

By Mr. STANLEY: Memorial of the legislature of Wyoming, relating to creation of forest reserves and homestead laws—to the Committee on the Public Lands.

By Mr. GRONNA: Memorial of the legislature of Wyoming, relative to the creation of forest reserves—to the Committee on the Public Lands.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. BEDE: A bill (H. R. 28344) for the relief of John E. Mulligan—to the Committee on Appropriations.

By Mr. CANNON: A bill (H. R. 28345) for the relief of Hector Demask—to the Committee on War Claims.

By Mr. GRONNA: A bill (H. R. 28346) to correct the military record of Rastus W. Crandall—to the Committee on Military Affairs.

By Mr. HUBBARD of West Virginia: A bill (H. R. 28347) for the relief of J. Walter Duncan—to the Committee on the Post-Office and Post-Roads.

By Mr. McHENRY: A bill (H. R. 28348) granting a pension to William H. Eonte—to the Committee on Invalid Pensions.

Also, a bill (H. R. 28349) granting a pension to Alice Milliken Byerly—to the Committee on Invalid Pensions.

By Mr. MACON: A bill (H. R. 28350) granting a pension to James H. Rodgers—to the Committee on Invalid Pensions.

By Mr. MARTIN: A bill (H. R. 28351) for the relief of Garland & Bergh—to the Committee on Claims.

By Mr. BENNET of New York: A bill (H. R. 28352) granting an increase of pension to Patrick Oates—to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER: Petition of H. E. Owens and 12 other members of the Penfield Grange, of Pennsylvania; and Hugh Gillis and 17 other citizens of the United States, praying for the enactment of legislation creating a national highways commission—to the Committee on Agriculture.

Also, memorial of the First Presbyterian Church of Dayton, Ohio, praying for legislation to make inquiry as to immigration—to the Committee on Immigration and Naturalization.

Also, memorial of Henry F. Palmer and 21 other citizens of Norwich, Conn., praying for legislation to establish a children's bureau—to the Committee on Expenditures in the Interior Department.

Also, memorial of Evan T. Brown and 60 others, of Springbrook, Pa., praying for the passage of a law providing for instruction in agriculture in the common schools—to the Committee on Agriculture.

Also, memorial of William Lancer, of Brooklyn, N. Y., and other individuals, firms, and corporations in the United States, praying for the reduction of the duty on raw and refined sugars—to the Committee on Ways and Means.

Also, memorial of Mrs. T. B. Arnold and 19 other members of the Glen Ellyn Woman's Christian Temperance Union, praying for the passage of the so-called "antiopium bill"—to the Committee on Ways and Means.

Also, memorial of the Benevolent and Protective Order of Elks of Kankakee, Kewanee, and Alton, Ill., praying for legislation to establish a reserve in the State of Wyoming for the care and preservation of the American elk—to the Committee on the Public Lands.

By Mr. ALEXANDER of New York: Petition of Charles Lamy & Sons, of Buffalo, N. Y., favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

Also, petition of Men's Club of Plymouth Methodist Episcopal Church, of Buffalo, N. Y., favoring legislation to prohibit shipment of liquor into prohibition States—to the Committee on Interstate and Foreign Commerce.

By Mr. ANTHONY: Petition of citizens of Effingham, Atchison County, Kans., against shipping intoxicants into prohibition States—to the Committee on Interstate and Foreign Commerce.

Also, petition of Topeka Lodge, No. 204, Benevolent and Protective Order of Elks, for reservation for the care of the American elk—to the Committee on the Public Lands.

By Mr. ASHBROOK: Petition of Ohio Bankers' Association against parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

By Mr. BEDE: Paper to accompany bill for relief of I. W. T. Hyde—to the Committee on Invalid Pensions.

By Mr. BENNET of New York: Paper to accompany bill for relief of G. H. Crosman—to the Committee on Invalid Pensions.

Also, petition of New York Board of Trade and Transportation, favoring a national board of public works—to the Committee on Interstate and Foreign Commerce.

By Mr. BRODHEAD: Petition of Easton Typographical Union, No. 258, against printing the census at any but Government Printing Office—to the Committee on the Census.

Also, petition of A. R. Dunn and others, of Easton, Pa., favoring repeal of duty on raw and refined sugars—to the Committee on Ways and Means.

By Mr. BROUSSARD: Paper to accompany bill for relief of heirs of Jean B. Pollingue—to the Committee on War Claims.

By Mr. BURLEIGH: Petition of John Dority Grange, of Sullivan, Me., against parcels-post and postal savings bank legislation (S. 5122 and 6844)—to the Committee on the Post-Office and Post-Roads.

By Mr. CALDER: Petition of International Brotherhood of Bookbinders, against census printing outside the Government Printing Office—to the Committee on the Census.

Also, petition of the Grand Army of the Republic of Kings County, N. Y., against erection of secession monuments on any government reservation—to the Committee on the Library.

By Mr. CHANEY: Petition of Bedford (Ind.) Lodge, No. 826, Benevolent and Protective Order of Elks, for legislation creating a reserve in the State of Wyoming for the care of the American elk—to the Committee on the Public Lands.

By Mr. COOK of Colorado: Petitions of Christ Methodist Episcopal Church, of Denver, Colo.; Twenty-third Avenue Presbyterian Church; Charles A. Campbell and others, of the Woman's Christian Temperance Union; and Eunice H. Emmons, on behalf of 3,000 women members of the Woman's Christian Temperance Union, favoring the Littlefield-Bacon bill and various other measures promotive of the cause of temperance—to the Committee on the Judiciary.

By Mr. DARRAGH: Petition of Erving Park and 36 other citizens of Grand Traverse County, Mich., against passage of Senate bill 3940—to the Committee on the District of Columbia.

Also, petition of William Holcom and 50 other citizens of Osceola County, L. J. Maxam and 15 other citizens of Antrim County, and Atwood Grange, of Antrim County, for a national highways commission and federal aid in construction of highways (H. R. 15837)—to the Committee on Agriculture.

By Mr. FORNES: Petition of Veteran Association of Fifth New York Infantry, favoring S. 1045, to protect monuments erected on the Bull Run battlefield—to the Committee on Military Affairs.

By Mr. FULLER: Petition of J. M. Bradford, of Baxter, Tenn., praying for pension recognition of the Home Guards of Tennessee—to the Committee on Invalid Pensions.

Also, petition of Columbus (Ohio) Industrial Alliance, favoring retention of duty on steel and iron—to the Committee on Ways and Means.

By Mr. HASKINS: Papers to accompany bills for relief of Newton R. Persinger, Frederick E. Wilson, George W. Curry, Susan V. French, Andrew J. McPeck, George S. Hardenbrook, William H. Foreman, Martha A. Swain, Thomas W. Kinney, Allen F. Fort, George H. Rathbun, Andrew S. Weir, and Edwin A. House—to the Committee on War Claims.

By Mr. HAYES: Petitions of S. O. Fuller and 127 others, of Bates, Ark., and vicinity; Harry Sherman and 62 others, of Columbus, Ohio; Peter Rice and 80 others, of Coatesville, Pa.; Louis B. Schaerges and 47 others, of Carthage, Ohio, and vicinity; H. G. Cramer and 58 others, of Athens, Ohio; A. D. Goodrich and 43 others, of Atkinson, N. H.; H. P. Carter and 43 others, of Memphis, Tenn.; W. C. Martin and 43 others, of New Carlisle, Ohio; H. H. Wieschan and 47 others, of Cincinnati, Ohio; Charles H. De Clark and 48 others, of New York and Brooklyn; G. S. Davis and 47 others, of Nashville, Tenn.; C. T. Hannah and 30 others, of Clover Hill, Tenn., and vicinity; Joseph P. Schoenberger, jr., and 19 others, of Cincinnati, Ohio; M. Clark and 44 others, of Aberdeen, Wash.; W. O. Patch and 93 others, of San Francisco and Oakland, Cal.; and T. Hugh and 92 others, of Seattle, Wash., favoring an effective Asiatic-exclusion law against all Asiatics excepting merchants, students, and travelers—to the Committee on Foreign Affairs.

Also, petitions of William H. Bauer and 47 others, of Pittsburg, Pa.; V. H. Cusman and 48 others, of Scranton, Pa.; William Dickinson and 20 others, of Pittston, Pa.; and Joe Semensky and 106 others, of Seattle Wash., favoring an effective Asiatic-exclusion law against all Asiatics excepting merchants, students, and travelers—to the Committee on Foreign Affairs.

Also, petition of the board of regents of the University of California, favoring removal of duty on books—to the Committee on Ways and Means.

By Mr. HOUSTON: Paper to accompany bill for relief of Burkett F. Starnes (H. R. 24539)—to the Committee on Invalid Pensions.

By Mr. HULL of Iowa: Petitions of business men of Carlisle, Spring Hill, Van Meter, Dexter, Redfield, Adel, Nevada, Linden, Dallas Center, and Story City, all in the State of Iowa, against establishment of a parcels post—to the Committee on the Post-Office and Post-Roads.

By Mr. HUMPHREY of Washington: Petition of S. A. Tomes and others, of Washington, for retention of duty on coal—to the Committee on Ways and Means.

By Mr. LORIMER: Petition of the New Orleans Progressive Union Company, against Senate joint resolution 130—to the Committee on Interstate and Foreign Commerce.

By Mr. LOUD: Petition of business men of Turner, Arenac County, Mich., asking for parcels-post and postal savings bank legislation—to the Committee on the Post-Office and Post-Roads.

By Mr. MACON: Paper to accompany bill for relief of James H. Rodgers—to the Committee on Invalid Pensions.

By Mr. MARSHALL: Petition of J. E. Johnson and others, favoring removal of tax on stills—to the Committee on Ways and Means.

By Mr. NEEDHAM: Petition of Mrs. Alice Newton, president of the Woman's Christian Temperance Union, favoring interstate liquor measure now before Congress—to the Committee on the Judiciary.

By Mr. NORRIS: Petition of residents of Arapahoe, Nebr., against parcels-post and postal savings bank laws—to the Committee on the Post-Office and Post-Roads.

By Mr. SHERMAN: Petition of Retail Druggists' Association, against the enactment of parcels-post legislation—to the Committee on the Post-Office and Post-Roads.

By Mr. SULZER: Petition of superintendent of weights and measures, favoring the Mann bill, relative to weights and measures—to the Committee on Interstate and Foreign Commerce.

Also, petition of the board of directors of the Louisiana Purchase Exposition Company, for an appropriation to erect a monument to Thomas Jefferson on exposition site of 1904—to the Committee on Appropriations.

By Mr. VREELAND: Petition of oil producers of Allegany County, N. Y., and Bolivar, N. Y., opposing any change in duty on crude oil—to the Committee on Ways and Means.

SENATE.

FRIDAY, *February 26, 1909.*

The Senate met at 11 o'clock a. m.

Prayer by the Chaplain, Rev. Edward E. Hale.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CULLOM, and by unanimous consent, the further reading was dispensed with.

The VICE-PRESIDENT. The Journal stands approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. Browning, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 21896) to amend section 86 of an act to provide a government for the Territory of Hawaii, to provide for additional judges, and for other judicial purposes.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 27061) to provide for the appointment of an additional district judge in and for the western district of Washington.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 24834) for the protection of the surface rights of entrymen, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. MONDELL, Mr. VOLSTEAD, and Mr. ROBINSON managers at the conference on the part of the House.

The message also announced that the House had passed a concurrent resolution (H. C. Res. No. 71) requesting the President to return to the House the bill (H. R. 17214) for the relief of Harry Kimmell, a commander on the retired list of the United States Navy, in which it requested the concurrence of the Senate.

The message further announced that the House had passed a bill (H. R. 28304) granting certain obsolete ordnance for ornamental purposes, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice-President:

S. 7378. An act to extend the time for the completion of a bride across the Missouri River at or near Yankton, S. Dak., by the Winnipeg, Yankton and Gulf Railroad Company;

S. 9017. An act for the establishment of a subport of entry at Ranier, Minn.;

H. R. 8734. An act for the relief of Niels P. Larsen;

H. R. 26305. An act making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1910, and for other purposes;

H. R. 27363. An act to provide for improving the navigable capacity of the Sabine and Neches rivers, and the canal connecting the Sabine and Neches rivers with the mouth of Taylors Bayou;

H. R. 27419. An act to repeal an act of June 29, 1906, granting a pension to Jackson Adkins; and

H. R. 28104. An act to amend an act to authorize a bridge across the Missouri River at or near Council Bluffs, Iowa, approved February 1, 1908.

ALASKA CENTRAL RAILWAY.

Mr. KEAN. Mr. President, the other day when the bill (H. R. 27068) to extend the time for the completion of the Alaska Central Railway, and for other purposes, was reached upon the calendar I objected to its consideration. I have since examined it. I find that it is not a paper road but an actual road that is being constructed. I therefore withdraw my objection. The bill has been read and I hope it will be passed.

The VICE-PRESIDENT. The Senator from New Jersey withdraws his objection to the consideration of a bill, which will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to extend the time for filing the map of definite location of the Alaska Central Railway, as required by the provisions of chapter 299 of the Laws of the United States, entitled "An act extending the homestead laws and providing for the right of way for railroads in the District of Alaska, and for other purposes," approved May 14, 1898, for three years from the date of the passage of this act, and to extend the time for the completion of the Alaska Central Railway for three years from the expiration of the period provided for in the act entitled "An act to extend the time for the completion of the Alaska Central Railway, and for other purposes," approved June 30, 1906. But nothing therein contained shall be held or construed to affect any lawfully accrued rights.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented a petition of the Louisiana Purchase Exposition Company, of St. Louis, Mo., praying that the Federal Government authorize the use of its proportionate amount of any surplus from the proceeds of the exposition for the erection of a monument to Thomas Jefferson upon the site occupied by the government building during the exposition of 1904, which was referred to the Select Committee on Industrial Expositions.

He also presented a memorial of the Anti-Saloon League of America, of Washington, D. C., remonstrating against the enactment of legislation to create a commission on the alcoholic liquor traffic, which was ordered to lie on the table.

He also presented petitions of sundry citizens of Hartford, Conn.; New York City, and of the Consumers League of Syracuse, in the State of New York, praying for the passage of the so-called "children's bureau" bill, which were ordered to lie on the table.

He also presented the petition of G. W. Sawyer, of Liberal, Kans., praying for the enactment of legislation relative to the rights of settlers in section 13 in that part of Oklahoma affected by the statehood bill, which was referred to the Committee on Territories.

He also presented a memorial of the National Business League of America, of Chicago, Ill., remonstrating against the adoption of any amendments to the diplomatic and consular appropriation bill relative to the establishment of a national consular school, which was referred to the Committee on Commerce.

He also presented a memorial of the Federated Trades Council of Waukesha, Wis., remonstrating against the decision of the supreme court of the District of Columbia in imposing a jail sentence on Gompers, Mitchell, and Morrison, which was referred to the Committee on the Judiciary.

He also presented a petition of the Woman's Christian Temperance Union of Georgetown, D. C., praying for the adoption of the so-called "Humphrey amendment" to the penal-code bill, which was ordered to lie on the table.

Mr. DICK presented a petition of sundry citizens of the Seventeenth Congressional District of the State of Ohio and a petition of the National Shoe Wholesalers' Association of the United States, of Boston, Mass., praying for the repeal of the duty on hides, which was referred to the Committee on Finance.

He also presented a petition of Mitchell Post, No. 45, Department of Ohio, Grand Army of the Republic, of Springfield, Ohio, praying for the enactment of legislation granting pensions of $30 per month to honorably discharged commissioned and noncommissioned officers or privates who served in the civil war and who have attained the age of 65 years, which was referred to the Committee on Pensions.

He also presented a petition of the Chamber of Commerce and the Coal Exchange, of Pittsburg, Pa., praying that an annual appropriation of $50,000 be made for the improvement of the inland waterways of the country, which was referred to the Committee on Commerce.

He also presented a petition of the Central Trades and Labor Council of Zanesville, Ohio, praying for the adoption of certain amendments to the so-called "Sherman antitrust law," which was referred to the Committee on the Judiciary.

He also presented a petition of the Chamber of Commerce of Cincinnati, Ohio, remonstrating against the enactment of legislation to prohibit the manufacture, sale, or transportation of adulterated, misbranded, or falsely graded naval stores, which was referred to the Committee on Interstate Commerce.

Mr. LODGE presented a petition of Local Lodge No. 1031, Benevolent and Protective Order of Elks, of Melrose, Mass., and a petition of Local Lodge No. 118, Benevolent and Protective Order of Elks, of Fall River, Mass., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

Mr. PERKINS presented petitions of Local Lodge No. 3, of San Francisco; of Local Lodge No. 6, of Sacramento; of Local Lodge No. 439, of Fresno; of Local Lodge No. 832, of Napa; and of Local Lodge No. 559, of Vallejo, all of the Benevolent and Protective Order of Elks, in the State of California, praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the

American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

Mr. STEPHENSON presented a joint resolution of the legislature of Wisconsin, which was referred to the Committee on Pensions and ordered to be printed in the RECORD, as follows:

Joint resolution (S. R. 12) asking the Congress of the United States to refuse to enact the measure now pending relating to United States pension agencies.

Whereas it has come to the notice of the legislature of the State of Wisconsin that a measure is pending before the Congress of the United States which aims at the removal of 17 United States pension agencies from their present locations throughout the country to the city of Washington, D. C.; and

Whereas these pension agencies were established years ago for the convenience and accommodation of then only 232,000 pensioners of the United States; and

Whereas the number of pensioners has since that time increased to nearly 1,000,000 (being 951,687 June 30, 1908), and as this number is likely to further increase owing to legislation affecting widows enacted April 19, 1908; and

Whereas this legislature is informed that all of the pensioners of the United States are vigorously protesting against this proposed centralization, consolidation, and removal to Washington, D. C., of these 17 pension agencies as inimical to their interest and convenience: It is therefore

Resolved by the senate (the assembly concurring), That the legislature of the State of Wisconsin respectfully asks the Congress of the United States to refuse to enact such a measure, being fully convinced that the system at present in use, to which all pensioners have now become accustomed, will better subserve the interests of this vast body of pensioners, who, owing to their services to the country as well as to their advanced age, are certainly entitled to consideration of their views and wishes on a measure that so vitally affects them.

Resolved, That a copy of these resolutions be transmitted by the secretary of state to the Senate of the United States and to the House of Representatives of the United States and to each of the Senators and Representatives from this State.

JOHN STRANGE,
President of the Senate.
L. H. BANCROFT,
Speaker of the Assembly.
F. E. ANDREWS,
Chief Clerk of the Senate.
C. E. SHAFFER,
Chief Clerk of the Assembly.

DEPARTMENT OF STATE.

Received February 9, 1909.

J. A. FREAR,
Secretary of State.

He also presented a petition of the Chamber of Commerce of Milwaukee, Wis., praying for the adoption of certain amendments to the present interstate-commerce law to prohibit the taking effect of advances in existing rates of railway companies and giving the shipper the right to route freight through to destination, which was referred to the Committee on Interstate Commerce.

He also presented a petition of the Chamber of Commerce of Milwaukee, Wis., praying for the appointment of a commission to investigate the grain trade relative to the first handling at terminal markets and the exportation of grain and kindred matters, which was ordered to lie on the table.

He also presented memorials of sundry citizens of Manitowoc, Berlin, and of the Retail Grocers' Association of Milwaukee, all in the State of Wisconsin, remonstrating against the passage of the so-called "rural parcels-post bill," which were referred to the Committee on Post-Offices and Post-Roads.

He also presented a petition of sundry citizens of Northland, Wis., praying for the passage of the so-called "rural parcels-post bill," which was referred to the Committee on Post-Offices and Post-Roads.

He also presented a petition of the State Horticultural Society of Wisconsin, praying for the enactment of legislation to prohibit the manufacture, sale, or transportation of adulterated or misbranded fungicides and insecticides entering into interstate commerce, which was ordered to lie on the table.

He also presented petitions of Local Lodges Nos. 46, 299, 254, 403, 750, 252, and 887, of Milwaukee, Sheboygan, Janesville, Superior, Kenosha, Racine, and Oconto, all of the Benevolent and Protective Order of Elks, in the State of Wisconsin, praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which were referred to the Committee on Forest Reservations and the Protection of Game.

He also presented a memorial of sundry citizens of Fall Creek, Wis., and a memorial of sundry citizens of Boyceville, Wis., remonstrating against the repeal of the duty on barley, wheat, or other grains, which were referred to the Committee on Finance.

He also presented a petition of sundry citizens of New Richmond, Wis., praying for the repeal of the duty on hides, which was referred to the Committee on Finance.

He also presented a petition of the Political and Social Science Club of Waukesha, Wis., praying for the enactment of legislation to prohibit the importation and sale of opium in the United States, which was referred to the Committee on Finance.

He also presented the petition of Thad C. Pound, of Chippewa Falls, Wis., praying for the enactment of legislation providing for a national income tax, to the end that the property of individuals and corporations may share the expense of maintaining and advancing the National Government, which was referred to the Committee on Finance.

Mr. CURTIS presented a memorial of sundry citizens of Johnson County, Kans., remonstrating against the passage of the so-called "rural parcels-post bill," which was referred to the Committee on Post-Offices and Post-Roads.

Mr. GALLINGER presented a petition of the Washington Section of the Council of Jewish Women, of Washington, D. C., praying for the passage of the so-called "children's bureau" bill, which was ordered to lie on the table.

He also presented a memorial of the Hillsdale Citizens' Association, of the District of Columbia, remonstrating against the enactment of legislation providing for the licensing of builders in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. PENROSE presented a petition of the Board of Trade of Philadelphia, Pa., praying for the enactment of legislation to provide a permanent residence in the city of Paris, France, for the American ambassador, which was referred to the Committee on Foreign Relations.

He also presented a petition of the Society of Friends, of Penns Grove, Pa., and a petition of the Woman's Christian Temperance Union of Apollo, Pa., praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors, which were referred to the Committee on the Judiciary.

He also presented a petition of the congregation of the First Methodist Episcopal Church, of Bellefonte, Pa., praying for the enactment of legislation to prohibit the importation and sale of opium in the United States, except for medicinal purposes, which was referred to the Committee on Finance.

He also presented a petition of the National Board of Trade, of Washington, D. C., praying for the enactment of legislation to promote the efficiency of the consular service of the United States, which was referred to the Committee on Commerce.

He also presented a petition of the National Board of Trade, of Washington, D. C., praying for the passage of the so-called "rural parcels-post bill," which was referred to the Committee on Post-Offices and Post-Roads.

He also presented a petition of the National Board of Trade, of Washington, D. C., praying for the enactment of legislation to reduce local letter postage to 1 cent per ounce, which was referred to the Committee on Post-Offices and Post-Roads.

He also presented a petition of the National Board of Trade, of Washington, D. C., praying for the passage of the so-called "postal savings banks bill," which was ordered to lie on the table.

Mr. BULKELEY presented a petition of Local Lodge No. 957, Benevolent and Protective Order of Elks, of New Britain, Conn., praying for the enactment of legislation to create a national reserve in the State of Wyoming for the care and maintenance of the American elk, which was referred to the Committee on Forest Reservations and the Protection of Game.

AGRICULTURAL APPROPRIATION BILL.

The VICE-PRESIDENT. Is there further morning business?

Mr. HALE. The Senator from Wyoming [Mr. WARREN], in charge of the agricultural appropriation bill, is on his way to the Senate. I ask that the bill be laid before the Senate and proceeded with.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910.

Mr. TALIAFERRO. I gave notice a day or two ago that at the conclusion of the routine morning business to-day I would address the Senate on a bill I introduced at the time and asked might lie on the table.

Mr. HALE. And the Senator desires now to go on?

Mr. TALIAFERRO. That is in accordance with the notice I gave.

Mr. HALE. Yes; I do not seek to interfere with the Senator. It does not interfere with the Senator that the appropriation bill is before the Senate?

Mr. TALIAFERRO. Not at all. I ask that Senate bill 9460 be laid before the Senate.

The VICE-PRESIDENT. The Chair lays the bill before the Senate. It will be read by title.

The SECRETARY. A bill (S. 9460) for preventing the manufacture, sale, or transportation of adulterated, misbranded, or falsely graded naval stores, and for other purposes.

Mr. BORAH. Mr. President, I desire to suggest the absence of a quorum.

The VICE-PRESIDENT. The Senator from Idaho suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Aldrich	Depew	Johnston	Perkins
Bacon	Dick	Kean	Piles
Bailey	Dillingham	Kittredge	Rayner
Borah	Dixon	La Follette	Richardson
Brown	Flint	Long	Simmons
Burnham	Foraker	McLaurin	Smith, Mich.
Burrows	Frye	Martin	Smoot
Carter	Fulton	Milton	Stephenson
Clapp	Gallinger	Money	Sutherland
Clark, Wyo.	Gamble	Nelson	Taliaferro
Cullom	Guggenheim	Owen	Teller
Cummins	Hale	Page	Tillman
Curtis	Hansbrough	Penrose	Warren

The VICE-PRESIDENT. Fifty-two Senators have answered to their names. A quorum of the Senate is present. The Chair will receive morning business.

REPORTS OF COMMITTEES.

Mr. FRYE, from the Committee on Commerce, to whom was referred the bill (S. 9455) to amend section 4434 of the Revised Statutes of the United States, and for other purposes, reported it without amendment and submitted a report (No. 1094) thereon.

He also, from the same committee, to whom was referred the bill (S. 9410) to amend the act entitled "An act to encourage the establishment of public marine schools," approved June 20, 1874, asked to be discharged from its further consideration, and that it be referred to the Committee on Naval Affairs, which was agreed to.

Mr. GUGGENHEIM, from the Committee on Claims, to whom was referred the bill (S. 8200) for the relief of C. M. Cox, reported it with amendments, and submitted a report (No. 1095) thereon.

Mr. PILES, from the Committee on Commerce, to whom was referred the bill (H. R. 28193) to authorize the city of Shreveport to construct a bridge across Red River, reported it without amendment.

Mr. MARTIN, from the Committee on Commerce, to whom was referred the amendment submitted by himself on the 15th instant, proposing to appropriate $40,000 to provide for a sufficient number of improved modern acetylene-gas buoys for lighting the channel across Newport News, Va., etc., intended to be proposed to the sundry civil appropriation bill, reported favorably thereon, and moved that it be referred to the Committee on Appropriations and printed, which was agreed to.

He also, from the same committee, to whom was referred the bill (S. 9405) to authorize the Chicago, Lake Shore and Eastern Railway Company to construct a bridge across the Calumet River in the State of Indiana, reported it with an amendment and submitted a report (No. 1097) thereon.

Mr. McCUMBER, from the Committee on Pensions, to whom was recommitted the bill (S. 185) increasing the pensions of nurses in certain cases, reported it with an amendment and submitted a report (No. 1096) thereon.

Mr. CLARK of Wyoming, from the Committee on the Judiciary, to whom was referred the amendment submitted by himself on the 14th ultimo, authorizing jurors and witnesses in United States courts in the Territory of Hawaii to receive the same compensation for mileage and attendance as is now provided by law for such jurors and witnesses in the Territories of New Mexico and Arizona, intended to be proposed to the sundry civil appropriation bill, reported favorably thereon, and moved that it be referred to the Committee on Appropriations and printed, which was agreed to.

Mr. SCOTT. I am directed by the Committee on Public Buildings and Grounds, to whom was referred the bill (H. R. 28167) to grant additional authority to the Secretary of the Treasury to carry out certain provisions of public buildings acts, and for other purposes, to report it with amendments, and I submit a report (No. 1099) thereon. I give notice that I shall call up the bill at the earliest opportunity.

The VICE-PRESIDENT. The bill will be placed on the calendar.

Mr. McCREARY, from the Committee on Pensions, to whom was referred the amendment submitted by Mr. BURNHAM on the 25th instant, proposing to appropriate $1,000 to pay Robert W. Farrar for indexing and extra services rendered the Committee on Pensions, intended to be proposed by him to the general deficiency appropriation bill, reported favorably thereon, and moved that it be referred to the Committee on Appropriations and printed, which was agreed to.

Mr. TAYLOR, from the Committee on Pensions, to whom was referred the bill (H. R. 1549) granting a pension to Lela L. Ellis, reported it without amendment, and submitted a report (No. 1100) thereon.

Mr. OVERMAN, from the Committee on Public Buildings and Grounds, to whom was referred the amendment submitted by himself on the 18th instant, proposing to appropriate $15,000 to increase the limit of cost for a site and public building at Salisbury, N. C., intended to be proposed to the sundry civil appropriation bill, reported it with an amendment, submitted a report (No. 1101) thereon, and moved that it be referred to the Committee on Appropriations and printed, which was agreed to.

Mr. CURTIS, from the Committee on Pensions, to whom was referred the bill (H. R. 28047) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the civil war and to widows and dependent relatives of such soldiers and sailors, reported it with amendments, and submitted a report (No. 1102) thereon.

Mr. DEPEW, from the Committee on Commerce, to whom was referred the amendment submitted by himself on this day proposing to appropriate $40,000 for the purchase of buoys and equipment for Ambrose Channel, New York, intended to be proposed to the sundry civil appropriation bill, reported favorably thereon, and moved that it be referred to the Committee on Appropriations and printed, which was agreed to.

INSPECTION OF NURSERY STOCK.

Mr. LONG. I move that the bill (H. R. 27367) to provide for the inspection of nursery stock at ports of entry of the United States, to authorize the Secretary of Agriculture to establish a quarantine against the importation and against the transportation in interstate commerce of diseased nursery stock or nursery stock infested with injurious insects, and making an appropriation to carry the same into effect, be recommitted to the Committee on Agriculture and Forestry.

The motion was agreed to.

STATISTICS OF BALED COTTON.

Mr. LONG. From the Committee on the Census I report back without amendment the joint resolution (H. J. Res. 231) authorizing the Director of the Census to collect and publish additional statistics, and I submit a report (S. Rept. No. 1092) thereon. I call the attention of the senior Senator from South Carolina [Mr. TILLMAN] to the joint resolution.

Mr. TILLMAN. I ask unanimous consent for the immediate consideration of the joint resolution.

The Secretary read the joint resolution; and there being no objection, it was considered as in Committee of the Whole. It directs the Director of the Census to collect and publish, in addition to the cotton reports now being made by him, statistics of stocks of baled cotton in the United States, to be summarized as of November 1, January 1, and March 1.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. LONG. From the same committee, to whom was referred the joint resolution (S. R. 133) authorizing the Director of the Census to collect and publish additional statistics, I submit an adverse report (No. 1093) thereon, and move that the joint resolution be postponed indefinitely.

The motion was agreed to.

Mr. LONG. I ask to have printed in the RECORD the letter from the Director of the Census, which is included in the report.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF COMMERCE AND LABOR,
BUREAU OF THE CENSUS,
Washington, February 24, 1909.

MY DEAR SENATOR: In compliance with your request over the telephone for an expression of the Census Bureau with regard to joint resolution (S. R. 133) authorizing the Director of the Census to collect and publish additional statistics, I beg to respectfully submit the following:

Reports of cotton ginned were authorized in the organic law making the Census Bureau permanent, approved March 6, 1902. Ten of these reports are now made each season, showing the number of bales of cotton ginned to September 1, September 25, October 18, November 1, November 14, December 1, December 13, January 1, January 16, and March 1. Having demonstrated the feasibility of collecting cotton-production statistics through the ginneries, there arose a demand for a complementary report distributing the annual supply of cotton in this country, showing the quantity exported, the quantity consumed, and the stocks left in the country at the close of the cotton year. This demand took expression in a joint resolution, approved February 9, 1905, authorizing the Director of the Census to collect and publish, in connection with the ginners' reports of cotton produced, these supplementary statistics relative to the distribution of the fiber, to be summarized as of September 1 each year. Four of these annual reports have been published under the title of "Supply and distribution of cot-

ton," dealing with the years ending August 31, 1905, to 1908, inclusive.

The additional reports called for by the resolution now before your committee appear to be the natural amplification of this series and would seem to be justified. As already recited, the bureau collects at the present time ten reports of cotton ginned during the season; and as under the census plan the supply of cotton is obtained almost entirely from this source, it is natural that more frequent information regarding the amount of cotton remaining in the country should be sought at frequent intervals. Hence the demand for the reports provided for in this resolution. These differ from our present annual report on the supply and distribution of cotton in that only statistics of stocks are to be collected for November 1, January 1, and March 1.

The purpose of these reports is to afford reliable information for producers, manufacturers, and others engaged in the cotton industry. The information should serve as a guide for the producer in disposing of his product, in projecting his plans for the succeeding crop, and in furnishing the manufacturer with information which should assist him in purchasing his raw material and in contracting for the manufacture and delivery of goods. It is believed that the effect of the resolution, if enacted into law, will be to reduce the element of speculation in cotton, as the statistics will tend to remove doubt as to the cotton situation and afford immediate and reliable information for all.

The cost of the field work incident to the preparation of these reports will probably amount to not more than $10,000 each.

Very respectfully,

S. N. D. NORTH, *Director.*

Hon. CHESTER I. LONG,
United States Senate, Washington, D. C.

LIGHT-HOUSE BOARD AT ASHTABULA, OHIO.

Mr. DEPEW. I report back favorably without amendment from the Committee on Commerce the bill (H. R. 15939) authorizing the Secretary of Commerce and Labor to exchange property. I ask for the present consideration of the bill. It is a bill of only about four lines.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It authorizes the Secretary of Commerce and Labor to exchange property now occupied by the Light-House Board at Ashtabula, Ohio, for other property of not less value at another location and to make a contract for such exchange.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ORDINANCE OF SECESSION OF LOUISIANA.

Mr. FOSTER. I am directed by the Committee on Military Affairs, to whom was referred Senate concurrent resolution 104, submitted by me on the 23d instant, to report it favorably with an amendment, and I ask for its present consideration.

The Senate, by unanimous consent, proceeded to consider the concurrent resolution, which was read, as follows:

Resolved by the Senate (the House of Representatives concurring), That the Secretary of War be, and is hereby, authorized to return to the State of Louisiana the original ordinance of secession that was adopted by the people of said State in convention assembled, and that is now in possession of the War Department.

The amendment was, in line 3, after the word "authorized," to insert the words "in his discretion."

The amendment was agreed to.

The concurrent resolution as amended was agreed to.

BILLS INTRODUCED.

Mr. FLINT introduced a bill (S. 9484) directing the Panama Railroad Company to establish and operate a line of steamers along the Pacific coast, and making provision therefor, which was read twice by its title and referred to the Committee on Interoceanic Canals.

Mr. PAYNTER (by request) introduced a bill (S. 9485) for the relief of Francisco Gutierrez y Repide, which was read twice by its title and referred to the Committee on Claims.

Mr. MONEY introduced a bill (S. 9486) for the relief of the heirs of Frances Pickle, which was read twice by its title and, with the accompanying paper, referred to the Committee on Claims.

Mr. ALDRICH introduced a bill (S. 9487) granting a pension to Elizabeth L. Duffy, which was read twice by its title and referred to the Committee on Pensions.

Mr. PENROSE introduced a bill (S. 9488) providing that certain mail matter relative to naturalization shall be transported free by registered mail, which was read twice by its title and, with the accompanying papers, referred to the Committee on Post-Offices and Post-Roads.

He also introduced a bill (S. 9489) granting a pension to Rachel M. Hunt, which was read twice by its title and referred to the Committee on Pensions.

Mr. CLARKE of Arkansas introduced a bill (S. 9490) for the relief of the estate or heirs of Azriah Mitchell, deceased, and others, which was read twice by its title and, with the accompanying paper, referred to the Committee on Claims.

Mr. PAYNTER (by request) introduced a bill (S. 9491) for the relief of the estate of Oliver Frazer, deceased, which was read twice by its title and, with the accompanying paper, referred to the Committee on Claims.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. CULLOM submitted an amendment authorizing the President to appoint and recommission as assistant surgeon in the Public Health and Marine-Hospital Service Dr. Egil T. Olsen, former assistant surgeon in the Public Health and Marine-Hospital Service, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. TELLER submitted an amendment proposing to appropriate $1,750,000 to procure and erect the large testing machine and its accessories and for services in connection therewith for the determination by the Bureau of Standards of physical constants, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing to appropriate $4,634.50 to pay the Natoinal Automatic Fire Alarm Company, of Washington, D. C., for the maintenance of the automatic fire-alarm system now in certain buildings of the Government Hospital for the Insane, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. LODGE submitted an amendment proposing to appropriate $98,000 to purchase the land and improvements thereon of Floretta Vining, adjacent to Fort Revere, Boston Harbor, Massachusetts, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing to appropriate $840 for salary of engineer on the schooner *Grampus*, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. DEPEW submitted an amendment proposing to appropriate $40,000 for the purchase of buoys and equipment at Ambrose Channel, New York, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. HEYBURN submitted an amendment proposing to appropriate $1,000,000 for the purchase of land for the enlargement of the Capitol grounds toward the Union Passenger Station, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. KNOX submitted an amendment proposing to appropriate $200,000 for technologic investigations of fuels and other mineral substances, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. WARNER submitted an amendment providing that all honorably discharged soldiers and sailors who have served in the Philippines, in China, or in Alaska who are now or who hereafter may be disabled shall hereafter be admitted to the National Home for Disabled Volunteer Soldiers, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. CULBERSON submitted an amendment proposing to appropriate, out of the immigration fund, the sum of $15,000, to be expended for excavating a trench across Galveston Channel, Texas, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. RAYNER submitted an amendment proposing to appropriate $6,875.61 to pay the Hazard Wharf Company, of Baltimore, Md., for refund of certain duties on coal importations, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. FLINT submitted an amendment proposing to appropriate $50,000 for the purchase of a site and continuation of the post-office building at Riverside, Cal., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. FRAZIER submitted an amendment providing for a survey of the Tennessee River from the confluence of the Holston and French Broad rivers, forming the Tennessee River, intended to be proposed by him to the river and harbor appropriation bill, which was ordered to lie on the table and be printed.

Mr. BULKELEY submitted an amendment proposing to appropriate $25,000 for a fish-cultural station in Connecticut, intended to be proposed by him to the sundry civil appropriation

bill, which was referred to the Committee on Fisheries and ordered to be printed.

Mr. HANSBROUGH submitted an amendment proposing to appropriate $500 to pay T. B. Elton for indexing and for extra services as clerk to the Committee on Agriculture and Forestry, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

OBSOLETE ORDNANCE.

Mr. FRYE submitted an amendment, intended to be proposed by him to the bill (H. R. 28304) granting certain obsolete ordnance for ornamental purposes, which was referred to the Committee on Military Affairs.

Mr. DANIEL submitted an amendment intended to be proposed by him to the bill (H. R. 28304) granting certain obsolete cannon for ornamental purposes, which was referred to the Committee on Military Affairs and ordered to be printed.

Mr. MARTIN submitted two amendments intended to be proposed by him to the bill (H. R. 28304) granting certain obsolete ordnance for ornamental purposes, which were referred to the Committee on Military Affairs and ordered to be printed.

REPORTS OF THE PRESIDENT'S HOMES COMMISSION.

Mr. TILLMAN. I ask to have the resolution which I send to the desk read and then referred to the Committee on Post-Offices and Post-Roads.

The resolution (S. Res. 302) was read and referred to the Committee on Post-Offices and Post-Roads, as follows:

Resolved, That the Committee on Post-Offices and Post-Roads be instructed to consider and report to the Senate whether the volume marked "Senate Document, No. 644, Sixtieth Congress, second session, 'Reports of the President's Homes Commission;' message from the President of the United States transmitting reports by the President's homes commission on improvement of existing houses and elimination of insanitary and alley houses, on social betterment, and on building regulations, together with resolutions and recommendations adopted by the commission" should not be excluded from the mails as obscene literature unfit for circulation.

HEARING BEFORE COMMITTEE ON CLAIMS.

Mr. FULTON submitted the following resolution (S. Res. 301), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the stenographer employed to report the hearing before a subcommittee of the Committee on Claims, February 16, 1909, be paid from the contingent fund of the Senate, and that the hearing be printed.

PRESIDENT'S MESSAGE ON CHILDREN'S CONFERENCE.

Mr. OWEN. I submit a resolution and ask for its present consideration.

The resolution (S. Res. 303) was read, as follows:

Resolved, That 50,000 copies of the special message of the President of the United States recommending certain legislation requested by the Conference on the Care of Dependent Children, and transmitting the proceedings of the conference, be printed for the use of the Senate.

The VICE-PRESIDENT. Does the resolution involve an expenditure of more than $500?

Mr. OWEN. I understand that it does not.

Mr. ALDRICH. I think it had better be referred to the Committee on Printing for an estimate.

Mr. OWEN. I make the suggestion that it might provide for printing at a cost less than $500.

The VICE-PRESIDENT. The Senator from Rhode Island moves that the resolution be referred to the Committee on Printing.

The motion was agreed to.

ACCOUNTS OF POSTMASTERS IN CONNECTICUT.

Mr. BULKELEY submitted the following resolution (S. Res. 304), which was ordered to lie on the table and be printed:

Resolved, That the Secretary of the Treasury be, and he is hereby, directed to have stated and audited in the office of the Auditor for the Post-Office Department the salary accounts of former postmasters, who served at post-offices in the State of Connecticut, in terms between July 1, 1864, and July 1, 1874, and who applied to the Postmaster-General prior to January 1, 1887, for payment of increased salary under the act of March 3, 1883, such salary accounts to be stated upon the registered returns of each postmaster for each term of service specified, and by the method and rule laid down by the Postmaster-General for the statement and payment of salary accounts of former postmasters under the act of March 3, 1883, in his public order of February 16, 1884, directing payment of salaries by commissions and box rents, less the salaries paid at the time of service; and to enable the Secretary of the Treasury the better to comply with this resolution the Postmaster-General is hereby directed to turn over to the Auditor for the Post-Office Department all the data now in his hands pertaining to each and every such claim, and the Secretary of the Treasury is hereby directed to report to the Senate such stated and audited salary accounts of former postmasters as soon as they can be made ready.

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. M. C. Latta, one of his secretaries, announced that the President had on the 25th instant approved and signed the following act:

S. 7829. An act to amend an act entitled "An act to authorize the construction of a bridge across the Mississippi River at or near Keithsburg, in the State of Illinois, and to establish it as a post-road," approved April 26, 1882.

HOUSE BILL REFERRED.

H. R. 28304. An act granting certain obsolete ordnance for ornamental purposes was read twice by its title and referred to the Committee on Military Affairs.

SURFACE RIGHTS OF ENTRYMEN.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 24834) for the protection of surface rights of entrymen, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. CLARK of Wyoming. I move that the Senate insist upon its amendments, agree to the conference asked for by the House, and that conferees on the part of the Senate be appointed by the Chair.

The motion was agreed to, and the Vice-President appointed Mr. CLARK of Wyoming, Mr. DIXON, and Mr. BANKHEAD conferees on the part of the Senate.

HARRY KIMMELL.

The VICE-PRESIDENT laid before the Senate the following concurrent resolution of the House of Representatives, which, on motion of Mr. DICK, was considered by unanimous consent, and agreed to:

House concurrent resolution 71.

Resolved by the House of Representatives (the Senate concurring), That the President be requested to return to the House of Representatives the bill (H. R. 17214) for the relief of Harry Kimmell, a commander on the retired list of the United States Navy.

COURTS IN WASHINGTON AND OREGON.

The VICE-PRESIDENT laid before the Senate a message from the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 27061) to provide for the appointment of an additional district judge in and for the western district of Washington.

Mr. DEPEW. I move that the Senate insist upon its amendments and ask for a conference with the House of Representatives, the conferees to be appointed by the Chair.

The motion was agreed to, and Mr. DEPEW, Mr. FORAKER, and Mr. OVERMAN were appointed.

NORTH AMERICAN CONSERVATION CONFERENCE.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States (S. Doc. No. 742), which was read and, on motion of Mr. KEAN, was, with the accompanying paper, referred to the Committee on Foreign Relations and ordered to be printed:

To the Senate and House of Representatives:

I transmit herewith the declaration of principles adopted February 23, 1909, by the North American Conservation Conference. This conference, held in the city of Washington between representatives of the nations which occupy the Continent of North America, will unquestionably, as the declaration recites, "result in mutual benefits, and tend to draw still closer the bonds of existing good will, confidence, and respect." "Natural resources," the declaration proceeds, "are not confined by the boundary lines that separate nations. We agree that no nation acting alone can adequately conserve them, and we recommend the adoption of concurrent measures for conserving the material foundation of the welfare of all the nations concerned, and for ascertaining their location and extent." It is with sincere gratification that I acknowledge the prompt and courteous response of the governments to which the invitations for the conference, whose conclusions I transmit, were addressed, and the broad, statesmanlike, and productive attitude and action of the conference itself. It has not only performed with marked efficiency and entire unanimity the important duties which devolved upon it, but it has suggested a still wider field of useful action. The declaration "suggests to the President of the United States of America that all nations should be invited to join together in conference on the subject of world resources and their inventory, conservation, and wise utilization." I have deemed it my duty to welcome and act upon the far-seeing suggestion of the conference, and have accordingly addressed such an invitation to the nations of the world, in the confident belief that such a

meeting will foster the interests of every nation, will injure those of none, and will confirm and strengthen in us all the belief that the good of each is likewise the common good of all.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 26, 1909.*

NAVAL STORES.

The VICE-PRESIDENT. The Chair lays before the Senate Senate bill 9460, called up by the Senator from Florida [Mr. TALIAFERRO].

Mr. TALIAFERRO. I ask that the bill be read.

The VICE-PRESIDENT. The Secretary will read the bill.

The Secretary read the bill, as follows:

A bill (S. 9460) for preventing the manufacture, sale, or transportation of adulterated, misbranded, or falsely graded naval stores, and for other purposes.

Be it enacted, etc., That it shall be unlawful within any Territory or the District of Columbia for any person to adulterate or misbrand, within the meaning of this act, any article of naval stores, and any person who shall violate any of the provisions of this section shall be guilty of a misdemeanor, and for each offense shall, upon conviction thereof, be fined not to exceed $500 or shall be sentenced to one year's imprisonment, or both such fine and imprisonment, in the discretion of the court, and for each subsequent offense and conviction thereof shall be fined not less than $1,000 or sentenced to one year's imprisonment, or both such fine and imprisonment, in the discretion of the court.

SEC. 2. That the introduction into any State or Territory or the District of Columbia from any other State or Territory or the District of Columbia, or from any foreign country, or shipment to any foreign country of any article of naval stores which is adulterated or misbranded, within the meaning of this act, is hereby prohibited; and any person who shall ship or deliver for shipment from any State or Territory or the District of Columbia to any other State or Territory or the District of Columbia, or to a foreign country, or who shall receive in any State or Territory or the District of Columbia from any other State or Territory or the District of Columbia, or foreign country, and having so received shall deliver, in original unbroken packages, for pay or otherwise, or offer to deliver to any other person, any such article so adulterated or misbranded within the meaning of this act, or any person who shall sell or offer for sale in the District of Columbia or the Territories of the United States any such adulterated or misbranded naval stores, or export or offer to export the same to any foreign country, shall be guilty of a misdemeanor, and for such offense be fined not exceeding $500, or be imprisoned not exceeding one year, or both, in the discretion of the court, for the first offense, and upon conviction for each subsequent offense not exceeding $1,000, or be imprisoned not exceeding two years, or both, in the discretion of the court.

SEC. 3. That any common carrier shall, upon request of the Secretary of Agriculture, furnish to him or his authorized representative full information of interstate traffic in any article of naval stores subject to the provisions of this act.

SEC. 4. That the Secretary of Agriculture shall make uniform rules and regulations for carrying out the provisions of this act, including the branding, the collection, and examinations of specimens or samples of naval stores manufactured or offered for sale in the District of Columbia or any Territory of the United States, which shall be offered for sale in unbroken packages in any State other than that in which they shall have been respectively manufactured or produced, or which shall be received from any foreign country, or intended for shipment to any foreign country, or which may be submitted for examination by the proper officer of any State, Territory, or the District of Columbia, or at any domestic or foreign port through which such product is offered for interstate commerce or for export or import between the United States and any foreign port or country.

SEC. 5. That the examinations of samples of naval stores shall be made in the Department of Agriculture, or under the direction and supervision of such department, for the purpose of determining from such examinations whether such articles are adulterated or misbranded within the meaning of this act; and if it shall appear from any such examination that any of such samples is adulterated or misbranded within the meaning of this act, the Secretary of Agriculture shall cause notice thereof to be given to the party from whom such sample was obtained. Any party so notified shall be given an opportunity to be heard, under such rules and regulations as may be prescribed as aforesaid, and if it appear that any of the provisions of this act have been violated by such party, then the Secretary of Agriculture shall at once certify the facts to the proper United States district attorney, with a copy of the results of the analysis or the examination of such article duly authenticated by the analyst or officer making such examination, under the oath of such officer. After judgment of the court, notice shall be given by publication in such manner as may be prescribed by the rules and regulations aforesaid.

SEC. 6. That it shall be the duty of each district attorney to whom the Secretary of Agriculture shall report any violation of this act, or to whom any proper officer or agent of any State, Territory, or the District of Columbia shall present satisfactory evidence of any such violation, to cause appropriate proceedings to be commenced and prosecuted in the proper courts of the United States, without delay, for the enforcement of the penalties as in such case herein provided.

SEC. 7. That the Secretary of Agriculture shall cause to be published in bulletin form the results of the analysis or examination of all samples found to be adulterated or misbranded within the meaning of this act, together with names and addresses of the persons from whom the samples were obtained, and also the names and addresses of the producers or original distributers of the naval stores.

SEC. 8. That the term "naval stores" as used in this act shall include all gums, oils, oleoresins, and rosins which exude from or are obtained or made from pine or fir wood of any kind by any method or in any method whatsoever. That for the purposes of this act the terms "gum spirits of turpentine," "spirits of turpentine," "gum turpentine," and "turpentine" shall be applied only to pure spirits of turpentine distilled from the natural gum, dip, or scrape which exudes from the pine tree and is unmixed and unadulterated with oil or any other foreign substance or substances whatsoever; that the term "wood spirits of turpentine" or "wood turpentine" shall be applied only to those distillates and spirits closely resembling gum spirits of turpentine in their physical and chemical properties, manufactured or prepared directly from or by distillation of the wood of pine or fir trees and which do not contain any adulterant or adulterants or other foreign substance or substances whatsoever; that the terms "barrel," "package," or "container," as used in this act, shall include any kind of package, vessel, tank, or receptacle in which spirits of turpentine, rosin, or naval stores shall be placed or kept, whether for shipment, sale, consignment, or delivery.

SEC. 9. That for the purpose of this act an article of naval stores shall be deemed to be adulterated—

First. If, when sold under or by a name recognized in the United States Pharmacopœia or National Formulary, it differs from the standard of strength, quality, or purity, as determined by the test laid down in the United States Pharmacopœia or National Formulary official at the time of investigation.

Second. If its strength or purity fall below the professed standard or quality under which it is sold.

Third. If any substance has been mixed and packed with it so as to reduce or lower or injuriously affect its quality or strength.

Fourth. If any substance has been substituted wholly or in part for the article.

Fifth. If any valuable constituent of the article has been wholly or in part abstracted.

Sixth. If it be mixed, colored, bleached, powdered, coated, or stained in a manner whereby damage or inferiority is concealed.

SEC. 10. That the term "misbranded," as used herein, shall apply to all naval stores, the package or label of which shall bear any statement, design, or device regarding such article or the ingredients or substances contained therein which shall be false or misleading in any particular, and to any article of naval stores which is falsely branded as to the State, Territory, or country in which it is manufactured or produced.

That for the purposes of this act an article of naval stores shall also be deemed to be misbranded—

First. If it be an imitation of or offered for sale under the name of another article.

Second. If the contents of the package as originally put up shall have been removed, in whole or in part, and other contents shall have been placed in such package.

Third. If when the contents of the container are stated in terms of weight or measure, they are not plainly and correctly stated on the outside of the package.

SEC. 11. That no dealer shall be prosecuted under the provisions of this act when he can establish a guaranty signed by the wholesaler, jobber, manufacturer, or other party residing in the United States, from whom he purchases such articles, to the effect that the same is not adulterated or misbranded within the meaning of this act, designating it. Said guaranty, to afford protection, shall contain the name and address of the party or parties making the sale of such articles to such dealer, and in such case said party or parties shall be amenable to the prosecutions, fines, and other penalties which would attach, in due course, to the dealer under the provisions of this act.

SEC. 12. That it shall be the duty of the Secretary of Agriculture to establish grades of naval stores, and provide and keep in his office samples of each grade known or used in commerce, and such grades shall be the standards by which all the inspections of naval stores are conducted under this act.

SEC. 13. That any article of naval stores that is adulterated or misbranded within the meaning of this act, and is being transported from one State, Territory, District, or insular possession to another for sale, or having been transported, remains unloaded, unsold, or in original unbroken packages, or if it be sold or offered for sale in the District of Columbia or the Territories or insular possessions of the United States, or if it be imported from a foreign country for sale, or if it is intended for export to a foreign country, shall be liable to be proceeded against in any district court of the United States within the district where the same is found, and seized for confiscation by a process of libel, for condemnation. And if such article is condemned as being adulterated or misbranded, within the meaning of this act, same shall be disposed of by destruction or sale, as the said court may direct, and the proceeds thereof, if sold, less the legal costs and charges, shall be paid into the Treasury of the United States, but such goods shall not be sold in any jurisdiction contrary to the provisions of this act or the laws of that jurisdiction: *Provided, however*, That upon the payment of the costs of such libel proceedings and the execution and delivery of a good and sufficient bond to the effect that such articles shall not be sold or otherwise disposed of contrary to the provisions of this act, or the laws of any State, Territory, District, or insular possession, the court may by order direct that such articles be delivered to the owner thereof. The proceedings of such libel cases shall conform as near as may be to the proceedings in admiralty, except that either party may demand trial by jury of any issue of fact joined in any such case, and all such proceedings shall be at the suit of and in the name of the United States.

SEC. 14. That the Secretary of the Treasury shall deliver to the Secretary of Agriculture, upon his request from time to time, samples of naval stores which are being imported into the United States or offered for import, giving notice thereof to the owner or consignee, who may appear before the Secretary of Agriculture and have the right to introduce testimony; and if it appear from the examination of such samples that any article of naval stores offered to be imported into the United States is adulterated or misbranded within the meaning of this act, or is of a kind forbidden entry into, or forbidden to be sold, or restricted in sale in the country in which it is made or from which it is exported, or is otherwise falsely labeled in any respect, the said article shall be refused admission, and the Secretary of the Treasury shall refuse delivery to the consignee and shall cause the destruction of any goods refused delivery which shall not be exported by the consignee within three months from the date of notice of such refusal, under such regulations as the Secretary of the Treasury may prescribe: *Provided*, That the Secretary of the Treasury may deliver to the consignee such goods pending examination and decision in the matter on execution of a penal bond for the amount of the full invoice value of such goods, together with the duty thereon, and on refusal to return such goods for any cause to the custody of the Secretary of the Treasury, when demanded for the purpose of excluding them from the country, or for any other purpose, said consignee shall forfeit the full amount of the bond: *And provided further*, That all charges for storage, cartage, and labor on goods which are refused admission or delivery shall be paid by the owner or consignee, and in default of such payment shall constitute a lien against any future importation by such owner or consignee.

SEC. 15. That the term "Territory" as used in this act includes the insular possessions of the United States. The word "person"

as used in this act shall be construed to import both the plural and singular, as the case demands, and shall include corporations, companies, societies, and associations. When construing and enforcing the provisions of this act, the act, omission, or failure of any officer, agent, or other person acting for or employed by any corporation, company, society, or association, within the scope of his employment or office, shall in every case be also deemed to be the act, omission, or failure of such corporation, company, society, or association as well as that of the person.

SEC. 16. That this act shall be in force and effect upon approval.

Mr. TALIAFERRO. Mr. President, on December 16 last I introduced in the Senate a bill for the purpose of preventing fraudulent practices in the naval-stores business—practices which have defrauded the producer and consumer, blighted an important industry, driven out competition, and created a dishonest and unscrupulous monopoly.

To understand the purposes of this legislation, it is necessary to have some little knowledge of what naval stores are, for what they are used, how produced, and how marketed.

Naval stores is the trade name for spirits of turpentine and rosin. The production and sale of these two articles comprise the naval-stores industry, in which practically all of the Southern States are more or less interested. The total investment in this industry is not less than $50,000,000, and the annual yield is more than $20,000,000. Both articles enter largely into the manufacture of various products. Turpentine is used in a small way for medicinal purposes and very largely in the preparation of paints, oils, varnishes, and other articles, and rosin extensively in the manufacture of paper and soap and in less degree in other ways. Spirits of turpentine is the refined or distilled product of the gum of the southern pine tree, and rosin is the heavier product—the residue of the distillation.

The production of naval stores is one of the simplest manufacturing processes known. Indeed, it is almost as simple as the preparation of sugar and sirup from the maple, and the two methods are not altogether unlike. The first step in "turpentining" is to hack the bark generally from two sides of the tree to a height of 4 to 5 feet in diagonal lines leading to a box cut into the base of the tree as a receptacle or container for the flowing gum. Under this process the trees were seriously wounded and the life of the forest thereby shortened, and when the trees began to die they were at once surrendered to the ax of the lumberman.

A new process, or the cup and gutter system, is rapidly coming into use. Through it no material damage is done the tree and the yield of naval stores is prolonged and increased. Those who use it save the forests and increase their revenues; those who do not are, unhappily, at a disadvantage, and, unwittingly, perhaps, factors in forest destruction.

If dishonest practices in the naval-stores industry force the producers into bankruptcy and the sale of their properties to the lumberman, it follows, logically, that honest practices will save the business, and in saving the business will save the forests. In this age of progress wise and economical methods for the conservation of our resources must displace extravagance and waste. Therefore, in asking for this legislation, we ask not only for the saving of the industry, but for the saving of the forests as well.

It is a fact, Mr. President, that for several years past this industry has been in the hands of a monopoly whose practices in the manipulation and dictation of prices by the adulteration of turpentine and the dishonest grading of rosins have made the business so unprofitable that the producers are on the verge of ruin.

In the naval-stores industry we have the producer with his farm and still in the woods, the factor in the city who makes advances to the producer for the needs of his business and acts as his agent for the sale of his product, and finally the distributer who buys from the factor for the domestic and foreign trade.

The turpentine of the still is a pure article, but is susceptible of adulteration with any oil of about equal specific gravity. It has sold as high as 79 cents a gallon, but now brings about 40 cents. Kerosene oil, costing 10 cents a gallon, has been extensively used in turpentine adulteration, and, when added in small quantities, can only be detected by careful analysis. The legitimate profit in handling turpentine is from one-half cent to a cent a gallon, or 25 to 50 cents a barrel, and on rosin about 50 cents a round package. If a dishonest dealer purchasing 10,000 barrels of spirits of turpentine at $20 per barrel adds 1 gallon of kerosene to the barrel, he makes a profit through the fraud of $3,000; if 2 gallons, $6,000; if 3 gallons, $9,000, and if 4 gallons, $12,000. He can undersell the honest dealer in every case and ruin his competitor. He can make even greater profits through fraudulent re-marking of rosins, and that he has done these things is more than shown by the facts.

Rosins are divided substantially into 12 grades, viz.: WW, WG, N, M, K, I, H, G, F, E, D, and B. WW is the highest grade and B the lowest. The intrinsic difference in the value of the grades, it appears, is from 10 to 25 cents; but in the Savannah market, the quotations of which govern the trade, prices are manipulated to show at times a spread between the grades that are most nearly alike of $1 for a standard barrel of 280 pounds or $2 for a round package. So that if a distributor acquires 10,000 round packages of I rosin at the I quotation and sells it for K, marked or "horned" as K, he makes $20,000 out of the fraud, in addition to the usual trade profit. These two rosins are so nearly alike that only an expert, through the use of trained eyesight and standard cube-shaped samples, can detect the difference. Besides, it is a rule of the trade that the inspectors who fix the grades shall be satisfactory to the distributor who buys. It is manifest, therefore, that a dishonest inspection would swindle the producer, while a false grading would swindle the consumer. The most insidious practice is to advance the grade and sell to the consumer a lower grade under the mark or brand of a higher grade. These practices are conducted by wholesale, and through them a trust has been built up against which no honest competition can live.

From the best information I can obtain, the production of naval stores by States is about as follows:

	Turpentine.		Rosin.		Total value.	Per cent.
	Barrels.	Value.	Barrels.	Value.		
Florida	250,000	$5,000,000	875,000	$6,125,000	$11,125,000	50
Georgia	125,000	2,500,000	437,500	3,062,500	5,562,500	25
Alabama	50,000	1,000,000	175,000	1,225,000	2,225,000	10
Mississippi	30,000	600,000	105,000	735,000	1,335,000	6
Louisiana	20,000	400,000	70,000	490,000	890,000	4
North Carolina	15,000	300,000	52,500	367,500	667,500	3
South Carolina	5,000	100,000	17,500	122,500	222,500	1
Texas	5,000	100,000	17,500	122,500	222,500	1
Total	500,000	10,000,000	1,750,000	12,250,000	22,250,000	100

This estimate shows that the annual production from Florida is worth over $11,000,000, or 50 per cent of the value of the total crop of the United States. It is not unreasonable, therefore, that her people, being most interested and most familiar with the iniquities in the business, should be urging this remedial legislation.

But, Mr. President, serious objections were made to the bill as originally introduced. It was said to be too drastic; that its provisions for federal inspection would be burdensome and expensive; that commerce would be diverted from its natural channels; that certain ports and cities would be discriminated against; and, finally, that it would invade the rights of the States.

It has not appeared to me that any of these objections were applicable to the bill, and I have little doubt that their origin could be traced to the distributing concerns which are profiting by the present conditions; and these concerns, I am convinced, would oppose any legislation, state or national, which would enforce honest methods in the trade. However this may be, I have submitted to the Senate an amended or substitute bill. In its present form the measure has the approval of the Department of Agriculture, and it would appear to have eliminated all of the objections which were urged against it as originally introduced.

It can not be charged now that its provisions burden anyone with the expense or obstruction of federal inspection; that commerce will be diverted from its natural channels; that there is discrimination against any city or port; or that the rights of the States are invaded. The amended bill is fashioned, so far as conditions will admit, after the pure-food law. It does not trench upon or invade state authority; there is no attempt at interference with existing methods of inspection; and the producer may ship when, where, and to whom he pleases.

The States of Florida and Georgia, producing three-fourths of the total yield of naval stores in the United States, have taken cognizance of the possibility of vast frauds in the business and have enacted drastic statutes against adulterations and false markings, which the naval-stores trust, because of the limited jurisdiction of those States, have not found it difficult to disregard or evade. They are the only Southern States, so far as I know, which have laws of this character. There are no statutes in the other States, either because the industry in those States has not yet become important or because of forest destruction has shrunk into the class of minor industries.

But in Florida and Georgia the industry is one of the first class, involving an investment of $30,000,000 or more, and producing annually perhaps $16,000,000. The statutes of Florida and Georgia apply only in those States, respectively, and are powerless when the product passes into interstate or foreign commerce. As 99 per cent or more of the output enters such commerce, the utter helplessness of either of the two States to correct the evils must be obvious.

The bill under consideration, Mr. President, does not seek to supersede the laws of either Florida or Georgia, or to interfere in any manner with the rights or authority of those States to inspect naval stores or to punish offenders against those statutes. There is a clear line of division between interstate and intrastate authority, and that line is as completely recognized in this bill as the two fields are separate and distinct.

The bill makes no requirements of the producer other than that he may not ship an impure or falsely graded article under the name of a pure article, or one of superior grade. The laws of Florida and Georgia, as I understand them, already make this requirement, so that a federal statute to the same effect, applying to the dealers and all others who handle naval stores in interstate or foreign commerce is a mere extension of that requirement into the separate province of interstate commerce over which only federal statutes may apply, and is, therefore, no hardship upon the producer. He, however, is not the transgressor against the law, and, in his consciousness of honesty, insists that the distributer of his product shall not defraud both him and the consumer and go unpunished.

The producers claim that turpentine is adulterated after leaving their hands; that their rosin is bought as of one grade and sold as a higher grade; the consumers complain of an impure product; the foreign trade journals complain that the grade marks are changed; and the laws of the two important producing States, Florida and Georgia, are evidence of the necessity for regulation.

The records of the hearings of the committee on this bill show that gross frauds have been practiced for many years. The records of the courts, in two convictions under three indictments with one untried case, show frauds in the business of a character bordering on the scandalous. The investigations of the Department of Agriculture and those of the Department of Justice during the past year bear out the truth of all these claims and make it more than manifest that where intrastate authority ends the more extensive field for fraud begins; and that at this point, or where the laws of Florida and Georgia become impotent, the Federal Government should interpose its power for the protection of the people.

Mr. President, I have told you that this business has been in the hands of an unscrupulous trust, and I do not use this language in any extravagant or careless sense. This trust, which I shall show deserves the name, has left the record of its trail through the courts. I have in my possession a certified copy of an indictment against the company which afterwards became the ringleader of the trust. It charges, in substance, that the president and certain officers of the company repeatedly violated the interstate-commerce act of the United States by shipping tank cars of turpentine with the capacity falsely stated or stenciled upon the tank. I say "repeatedly," because the indictments warrant the use of the word. We find that they committed this offense on February 12, 1898; they committed it on March 2 and 25, 1898, and again and again thereafter.

These shipments specified in the indictment were from Savannah, Ga., to Detroit, Mich., and these frauds in each case were no inconsequential matters, but amounted, in some instances, to more than 5,000 pounds to the shipment.

Let us examine the first count of the first indictment and see if the facts bear out the statements I have made. Yes; the first count charges that they made a shipment of this sort on February 12, 1898. The real contents of the tank was 47,810 pounds, but they shipped it for 42,000 pounds—an exact difference of 5,810 pounds.

When the defendant president was brought face to face with these charges of violating the law did he appear in righteous indignation and charge that a fraud had been perpetrated upon him in the false marking of his tanks? No.

Did he plead ignorance of such false marking in extenuation of the offense? No.

Did he say it was the act of others and an imputation upon him and his good name? No.

No! Mr. President, "Guilty" was his answer, and guilty "knowingly and willfully," as the indictments charged.

We know, Mr. President, that the courts are slow to move, and because of this fact we can only surmise how long this particular practice had been in vogue. Detroit was but one of their markets—a minor one, indeed—and if they had tank cars operating there about once a week, what did they not have in their shipments to other and larger cities?

This mismarked difference in the capacity of these tanks was not only a fraud upon the carrier, but a ruinous discrimination against competitors. It meant a freight rate lower by 12 per cent than any competitor could get honestly, or enough to strangle competition into utter lifelessness.

Let us follow the trail of this company back further; not through the courts this time, but in the records of the hearings on this bill. On page 92 of the subcommittee hearings there appears a letter, written by an agent of the company at Chicago, Ill., June 13, 1891, nearly eighteen years ago, from which I quote the following:

> * * * Good "E" rosin will fill all these orders, as "F" has been ordered in each case. * * * Can't you get some "M" rosin to send us? We have just received a car you shipped us May 22, containing 2-N-57 WG-41WW. One of our customers needed it immediately and we consequently did not inspect it, so we can not tell you whether the "N" and "WG" gained. We marked it all "WW" and took our chances.

Comment on that letter is wholly unnecessary. It speaks most eloquently for itself.

We find this same company which sold "E" rosin under the name of "F" and marked "N" and "WG" all to "WW" "and took our chances," and which undermarked its cars to the extent of many thousand pounds, next under indictment in the United States court for violating the antitrust laws of the United States by forming a conspiracy with other companies in restraint of trade.

The constituent parts of the trust or conspiracy in restraint of trade represented a powerful group of naval-stores distributers and exporters of Savannah, Ga., who very largely control the business. The plan of its various parts was to pretend to the public that they were competing concerns and buying for separate individual account, whereas they were buying for and on account of one parent concern, which, it appears, owned all the companies masquerading as competitors; that their agreement was to refuse to bid against each other in order to bear the market or to bid on small fictitious lots to fix the price high or low as they pleased. They had a complete system of spying upon would-be competitors to learn where and to whom they sold, and these competitors they drove from the business by underselling, by obtaining lower rates of freight, by controlling and manipulating the market, and through other outrageous practices. Here is the contract, and I believe that all who see it will agree that no more unscrupulous, no more ruthless, and no more conscienceless conspiracy was ever exposed.

Mr. President, I do not wish to trespass unduly upon the time or patience of the Senate, but the subject is of so much importance that I hope I may be indulged while the remarkable contract under which this great monopoly was formed is laid in full before the Senate. I ask, Mr. President, that the Secretary read it.

The VICE-PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read as follows:

> Memorandum of agreement made and executed on this —— day of March, A. D. 1905, between the Patterson-Downing Company, a corporation of West Virginia, of the first part, hereinafter called "Patterson;" the S. P. Shotter Company, also a corporation of West Virginia, of the second part, hereinafter called "Shotter;" the Societe Anonyme des Resineaux, a corporation of the Kingdom of Belgium, of the third part, hereinafter called "Anonyme;" Nickoll & Knight, a mercantile firm composed of Alexander Knight, of the city of London, England, of the fourth part, hereinafter called "Nickoll;" and the Globe Naval Stores Company, also a corporation of West Virginia, of the fifth part, hereinafter called "Globe."
>
> Whereas Globe is chartered and organized for the purpose of buying and selling and generally dealing in spirits of turpentine, including turpentine chemically extracted by artificial process from pine wood, and which is commonly called "wood turpentine;" and
>
> Whereas Patterson, Shotter, Anonyme, and Nickoll, as a part of their respective businesses, severally deal in such turpentine product; and
>
> Whereas, further, the said Patterson, Shotter, Anonyme, and Nickoll have each severally subscribed to the capital stock of the said Globe in the following proportions, viz, Patterson, to 34 per cent thereof, or 340 shares; Shotter, to 21½ per cent thereof, or 215 shares; Anonyme, to 26½ per cent thereof, or 265 shares; Nickoll, to 18 per cent thereof, or 180 shares; all of said shares being of the par value of $50 per share; and
>
> Whereas Globe desires to acquire from the first, second, third, and fourth parties, respectively, their several turpentine businesses, and said first, second, third, and fourth parties are willing to dispose of the same on the terms and conditions hereinafter set forth; and
>
> Whereas the said Patterson and Shotter are extensive dealers in American rosin, and one of the considerations moving them to enter into this contract is the regulation of the rosin business as between themselves and the said Anonyme and Nickoll;
>
> Now, then, this agreement witnesseth, that in consideration of the premises and of $1, by each of said parties to each of the other in

hand paid, the receipt whereof is hereby acknowledged, the parties hereto mutually covenant and agree, each with the other, as follows:

1. The said Patterson, Shotter, Anonyme, and Nickoll, severally sell, assign, and set over to Globe, their respective turpentine businesses upon the terms and subject to the limitations hereinafter mentioned.

2. The said Globe, in consideration of such sale and assignment, agrees to pay to Patterson, Shotter, Anonyme, and Nickoll, respectively, $17,000, $10,750, $13,250, and $9,000, in full-paid stock at par of the Globe Company.

3. It is understood and agreed that said Patterson, Shotter, Anonyme, and Nickoll shall severally act as the agent and representative of the said Globe in the buying and selling of turpentine products, their several turpentine businesses, however, being conducted as heretofore in their own name, but for account of Globe.

4. It is understood and agreed that James Farie, jr., of Savannah, Ga., is under contract to Nickoll, whereby his entire naval-stores business shall be carried on as heretofore; that is to say, the turpentine business of the said Farie shall be conducted by him for account of Globe, and the rosin business for the joint account of Patterson and Shotter, it being expressly understood that the said James Farie, jr., and Andrew Farie, also of Savannah, Ga., shall have no interest of any kind, either directly or indirectly, and shall not in any manner or form deal or operate in spirits of turpentine or rosin or other products of pine trees except as provided in said contract, a copy of which is attached hereto; and in consideration of the premises, Nickoll hereby assigns all his rights in and under said contract to Globe; and, on the other hand, Globe hereby takes the place of Nickoll in said contract and assumes all the burdens and obligations thereunder and shall be entitled to all benefits thereof: *Provided, however,* That Globe shall not be required by reason of said contract to pay to said James Farie, jr., a sum greater than $21,500 per annum, it being further understood that said Nickoll shall contribute the sum of $7,500 for the office expenses of said James Farie, jr., in Savannah, Ga.

5. It is understood and agreed that said Patterson, Shotter, Anonyme, and Nickoll, in conducting their several businesses as the agents and for account of Globe, as aforesaid, shall confine their operations to regular business transactions, so as to assure, as far as possible, reasonable and legitimate profits, it being expressly understood that neither of said parties shall be at liberty to do a speculative business without the consent of Globe.

6. It is understood and agreed that neither Patterson, Shotter, Anonyme, or Nickoll shall hold any interest or directly or indirectly deal in American turpentine except as for the agents and for account and benefit of Globe, it being understood that by American turpentine is meant the spirits of turpentine and wood turpentine which is concentrated at all and every of the Atlantic seaports of the United States of America, and which either of said four parties may handle and sell as being from said Atlantic seaports.

7. It is understood and agreed that this agreement comprehends and includes as part of the turpentine business herein purchased the sale of French and Spanish turpentine exported from France and Spain, but it does not include any French turpentine handled or sold in France itself.

8. It is understood and agreed that this contract does not cover any turpentine business which Patterson and Shotter may control in the Gulf ports of the United States, it being expected that the domestic consumption will absorb all receipts coming to said Gulf ports. In the event, however, the domestic consumption does not absorb all of such Gulf port receipts, then Patterson and Shotter, respectively, agree to turn over to Globe the surplus receipts: *Provided, however,* That the quantity of such surplus must be specified and declared on the 15th and last days of each month and must be charged to said Globe at the average Savannah quotations of the previous fifteen days, with the exception, however, of a surplus at New Orleans, not exceeding 20,000 barrels per annum, for which Globe hereby agrees to pay 1½ cents per gallon above the average quotations. Should the Savannah quotations during the periods affected be fictitious, the average price to be paid must be on the same basis that had been applied to the receipts of the Atlantic closed ports. Patterson and Shotter severally agree that they will make no charges for interest, storage, and fire insurance on such surplus receipts of the Gulf ports up to the day on which they declare the same. After said date the charges will be assumed and borne by said Globe: *Provided,* That the same shall not exceed the charges now in force in Savannah, Ga.

9. It is understood and agreed that Patterson and Shotter and Nickoll (the latter operating through James Farie jr., at Savannah, Ga.) shall continue to conduct their respective business in turpentine as hereinbefore defined, but for the account and benefit of Globe. As compensation for their services in the premises, said Patterson and Shotter shall be allowed a commission of 1 per cent on all sales made by them, respectively: *Provided, however,* That said Patterson and Shotter shall only receive one-half of 1 per cent on sales made to the Pratt Works in New York, Prince in Boston, and on all sales to Philadelphia. It is further understood that on sales, transfers, and divisions of receipts to and with the Standard Oil Company no commission will be charged except upon such quantities as will reduce the commitments of Patterson and Shotter under their contracts with the Standard Oil Company in the Gulf States, upon which quantities they will be allowed a commission of 1 per cent.

10. It is understood that Nickoll shall not sell more than 15,000 barrels per annum.

11. It is understood and agreed that Anonyme will conduct for the company and for its benefit any business offered for export in Spanish and French turpentine, and that said Anonyme shall be allowed a commission of 1 per cent on all Spanish turpentine and a commission of one-half of 1 per cent on maximum 15,000 barrels of French turpentine.

12. It is understood and agreed that the operations of Patterson, Shotter, Anonyme, and Nickoll for account of Globe shall be conducted and entered under a turpentine account, and shall include all transactions, whether actual delivery or contracts, where settlement is made in lieu of actual delivery; it is understood that Patterson, Shotter, Anonyme, and Nickoll, respectively, shall each operate in their own name and with their own organization, the said Globe being responsible for any losses that may be sustained through the nonfulfillment of contracts or bad debts.

The turpentine accounts shall be charged at cost with all of the turpentine bought for account of Globe, and such account shall be credited with the result of all sales made for Globe. The said account shall not be charged with any of the ordinary expenses of maintenance of the respective businesses of said Patterson, Shotter, Anonyme, and Nickoll, but only with the actual expenses of storage, handling, marine and fire insurance, cabling and telegraphing, legitimate commissions to agents and brokers for effecting sales, and interest on advances, or, in other words, only actual outlays of money other than office expenses shall be charged to turpentine account. It is understood that the first four parties, respectively, shall insure and keep insured against fire and marine risk all turpentine purchased and held by them, respectively, for account of Globe; and in event of any loss being incurred either by reason of either of first four parties neglecting to insure and keep insured any turpentine so purchased or held for account of Globe, such loss shall be borne by the party so in default: *Provided, however,* That said first four parties shall not be held responsible for the solvency of the company in which the insurance may be effected; and it is further understood and agreed that inasmuch as said Patterson and Shorter own and to a more or less extent operate in the name of the Standard Naval Stores Company, as purchasing and forwarding agent of turpentine purchased for account of Globe, the terms and provisions of this agreement as to insurance shall be applicable to said Standard Naval Stores Company, and the said Patterson and Shotter hereby make themselves responsible to Globe for any loss which it may sustain by the failure of the said Standard Naval Stores Company to insure and keep insured all turpentine held by it either directly or indirectly for account of said Globe. It is understood that interest on moneys which may be advanced by either of the first four parties is to be charged at the rate of 6 per cent per annum; and in the event differences occur in regard to interest by reason of the different modes of bookkeeping of the said first four parties, it is understood that the same shall be adjusted by the auditor of Globe at the half yearly settlement.

It is understood that Patterson, Shotter, Anonyme, and Nickoll, respectively, shall keep special books for turpentine, which books shall at all times be open to inspection of the auditor of Globe.

It is understood that all transactions made by either the said Patterson, Shotter, Anonyme or Nickoll for account of the company shall be reported daily to the principal office of the company.

It is further understood and agreed that settlements of profit and loss account between Globe and each of said first four parties shall take place every six months, in January and July in each year, as soon as the accounts for the preceding six months can be audited.

13. As part of the consideration of this contract, Anonyme hereby agrees that it will transport by its steamers *Iris* and *Clematis* for account of Globe a minimum of 100,000 barrels of turpentine and a maximum of 150,000 barrels of turpentine per annum (quantity within said limits to be at the option of Globe) to Antwerp, Rotterdam, London, Liverpool, Hull, Avomouth, and Hamburg. The steamers are to be loaded, at the discretion of Globe, either at Savannah or Brunswick, Fernandina or Jacksonville (always providing there is sufficient water at these ports), but are to load at one port only. It is agreed that the rate of freight shall be 3s. 9d. direct for 40 gallons gross gauge in barrels, and if shipped in bulk the rate shall be the same, but per 40 gallons net. This rate is without primage. If said steamers shall be called upon to load or discharge in any two of the above-named ports, Globe agrees to pay $600 additional for such loading, and $600 additional for such discharging. It is understood that Anonyme will complete the cargoes of said steamers with rosin or other goods at their convenience and for their own account and at their risk.

It is understood that Anonyme shall not transport to Europe more than 100,000 barrels of rosin per annum on the *Iris* or *Clematis*. In the event the said *Iris* or the said *Clematis* do not carry this stipulated amount, it is understood that the said Anonyme may use outside steamers or sailing vessels, but it is distinctly understood that in such event the quantity of rosin to be shipped for account of said Anonyme shall not exceed 70,000 barrels, and said Anonyme further agrees that all rosin shipped by them for their own account shall be for the port of Antwerp exclusively.

It is further understood and agreed that all rosin which Anonyme may sell in London or Hamburg shall be for the joint account of Patterson and Shotter, and in consideration thereof said Patterson and Shotter hereby agree to pay said Anonyme a net commission of 5 cents per barrel of 280 pounds and freight at the rate of 2s. 3d. for 310 pounds direct, Hamburg or London, with no primage. It is understood that the quantity which may be sold by said Anonyme in London and Hamburg for account of said Patterson and Shotter shall not be less than 15,000 nor more than 20,000 barrels, the quantity, within said limits, to be at the option of said Patterson and Shotter; and the said Patterson and Shotter reserve the right to designate either Hamburg or London. And it is further understood that said Anonyme shall not be entitled to any commission on any rosin which has been furnished by said Patterson and Shotter to complete cargoes to London, Hamburg, or any other port which may be agreed upon.

Said Patterson and Shotter hereby severally agree that they will not sell any rosin for shipment to Belgian ports, and they further agree that, at the request of said Anonyme and as required by them, they will furnish and provide rosin for the purposes and within the limitations therein specified, in fair proportions, from B to K, inclusive, free of charge for storage and fire insurance; and as compensation to the said Patterson and Shotter for providing such rosin said Anonyme agrees to pay said Patterson and Shotter a commission of 7½ cents for every barrel of 280 pounds so provided by them.

And said Anonyme further agrees to give to said Patterson and Shotter thirty days' notice in writing (notice to either being considered as notice to both) of their requirements of rosin under the provisions hereinbefore set forth, and it is further understood and agreed that the price of rosin so to be ordered and furnished shall be based upon the average price of the respective grades during the thirty days after the orders for the same have been received, which will prevent said Anonyme (acting with reasonable discretion) from giving the notice hereinbefore mentioned; then and in such case the price of the rosin so ordered and furnished shall be based upon the average price of the respective grades at Savannah during the thirty days immediately following the date of the receipt of the notice.

It is further understood and agreed that for the purpose of completing the cargoes of vessels carrying turpentine in the manner hereinbefore referred to said Patterson and Shotter shall, when and as required by said Anonyme and Nickoll, respectively, furnish for said vessels part cargoes of rosin for their own account at current market freight rates, provided that said Patterson and Shotter shall in no case be required to furnish more than 30 per cent of the carrying capacity of said vessels. As the principal consideration moving said Patterson and Shotter for making the freight arrangements herein set forth, said Anonyme and Nickoll hereby severally agree that they will not buy or sell, either directly or indirectly, American rosin, except in the manner and under the limitations of this agreement set forth.

14. It is further understood and agreed that if for any cause any or all of the first four parties shall discontinue business during the term of this agreement, then and in such event Globe shall have the right to purchase the shares of stock of the party or parties so discontinuing business at par.

15. It is understood and agreed that this agreement shall begin on the 1st day of April, 1905, and shall continue for the full term of five years.

16. It is further agreed that in the event any difference of opinion shall arise between two or more of said parties as regards the meaning of any part of this agreement, all such differences shall be settled by arbitration in New York, each side electing an arbitrator, and the arbitrator so selected, before taking knowledge of the dispute shall select an umpire, and the award of the arbitrators shall be final.

In witness whereof the corporations above named by their proper officers and the said Nickoll & Knight in the proper person have hereunto set their hands and affixed their seals, the seals of said corporations being duly attested by their respective secretaries, the day and year first above written.

Mr. TALIAFERRO. Mr. President, there also appears in this indictment a letter from the president of one of these constituent companies to his home office at Savannah, under date of New York, July 20, 1906, from which I extract the following:

There seems to be a very general demand, and it can not be for sales alone. It must be that Krauss and the Patterson Export Company have at some time in the past gone heavily short for the summer shipments. Of course we know that Krauss was for 15,000 to 18,000 barrels, and it may have been more.

I think it is safe to count on Krauss being out of the game if we can buy a good lot of spirits from him for October-November shipment. The spirits should be bought between the 1st and 5th of September.

I do not think it safe to allow spirits to be below 60 cents after September 5, when the domestic fall trade should begin. The holiday season being over, we should prepare our European friends for this.

When that letter was written, spirits were quoted at 57 cents. In the first week of September, when Krauss was to be induced to sell for October-November delivery, spirits had advanced to 61½ to 62½ cents. In October they were never below 65 cents and in November never below 65¾, going as high in the latter month as 67¾. I do not know whether this scheme to put a competitor "out of the game" and into bankruptcy failed or not. I quote the letter not that what happened to Krauss is material, but to show that the range of quotations in the Savannah market absolutely obeyed the edict of the trust.

The fate of one competitor in a business is an incident merely, but the methods employed to effect that fate are of far more serious concern. If the market can be manipulated to destroy one competitor, to what extent may it not be manipulated to enrich the manipulator and rob both producer and consumer?

The indictment charges that they had a system of spying upon competitors in order to undersell them and drive them from the business. That charge is borne out in the following extract from another letter of the trust, which is quoted in the indictment:

We note what you write about Patterson, and hope you are keeping a close watch on him, so that he does not sell a barrel of turpentine if it is at all possible to prevent it. Mr. Dill further wires making the disquieting report that he is trying to get in with the South American trade, and making offers of H rosin at $3.30 f. o. b., which we are unable to reconcile with his statement that his unsold stock consists of only a few barrels of pales, and take it that the latter must be incorrect. Anyway we have wired Mr. Dill to undersell him at any cost, and see to it that he does not receive the slightest encouragement, as it would be too bad if a disturbing element should be introduced into the South American business at this time when we have it so well in hand.

I would submit the entire indictment (it is all interesting reading), but it is a voluminous document, and I quote only parts of these two letters and the contract, which latter, the record shows, was the principal and substantial matter charged in the indictment.

Confronted with this indisputable evidence the several defendants made no defense, but simply entered the plea of guilty. I suggested all of them. I was in error as to that. One of them, an exporter, was not within the jurisdiction of the court. All of those tried were fined $5,000 each, and two of them, in a written communication to the court, humbly and contritely expressed sorrow for their sins and promised to sin no more. Here is the letter:

In the district court of the United States for the southern district of Georgia, eastern division.

Indictment found February 11, 1907.

To the Hon. Emory Speer, judge of said court:

The undersigned profoundly regret that we have, in the management of our corporations and in the conduct of our business, violated the act of Congress known as the "antitrust act," directed against monopolies and combinations in restraint of trade, for which violation we stand indicted, with other defendants, by the grand jury of the honorable court in which you preside.

We unequivocally and without reservation, and with the utmost earnestness and sincerity, promise the court and make this public pledge that any other or future violation of this legislation will for all future time be carefully avoided on our part, and that we will permit no such violation by our employees or any other person under our control. And in duty bound will ever pray.

———— ————.
———— ————.

I had preferred not to mention the names of these offenders, who have practically controlled this business by fair means or foul through many years past, because I am waging no personal warfare. I am alluding to their practices only because I am forced to do so in defense of an important industry of my State. If I could present the case fully and completely without referring to what they have done, I would not have alluded to them at all. But, Mr. President, to mention or not to mention their names is immaterial, for their records are fastened upon them, are identified with them, and are known throughout the whole turpentine industry from the still in the woods to the marts of Europe.

It can not be successfully contended that these convictions have had the effect of making the adulteration of spirits of turpentine a thing of the past. The Department of Agriculture during the past year has made an investigation into the matter and the revelations of that investigation expose the true condition of affairs. The Secretary, writing under date of February 11, 1909, says:

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D. C., February 11, 1909.

Hon. J. P. TALIAFERRO,
United States Senate, Washington, D. C.

DEAR SENATOR: In harmony with our conversation this morning, I beg to inform you that the Bureau of Chemistry has collected to date, under the pure-food law, 300 samples of spirits of turpentine, of which 62, or practically 21 per cent, give positive evidence of adulteration with mineral oils. These samples were collected from all classes of dealers in turpentine throughout the country, and those collected in the States of the turpentine belt showed nearly as large a percentage of adulterated samples as those collected elsewhere. The samples are still coming in slowly and the work is not entirely finished.

I beg to say further in this connection that the department receives from time to time complaints of the adulteration of turpentine and rosin and requests for information as to methods for detecting such adulteration. Many large consumers buy only upon stringent specifications devised to prevent the delivery of adulterated turpentine.

The chemical literature is full of articles dealing with methods for the detection of adulterants in turpentine, and the writers generally state that adulteration and substitution is prevalent.

The work on rosin is not sufficiently advanced to indicate how extensive misgrading may be. A large proportion of the consumers with whom the department has corresponded state, however, that improperly graded rosin is often delivered to them.

These facts show unmistakably that the adulteration and misgrading is quite general, and that the consumer in purchasing has no assurance that he is securing pure turpentine or correctly graded rosin.

Turpentine and rosin sold for medicinal use can and will be protected under the food and drugs act, but nearly all of these materials are employed for industrial purposes and are not controlled by any national legislation.

Respectfully, JAMES WILSON, *Secretary.*

More important still, we have the fact that, since the conviction of the trust and the punishment of its officers, we have another indictment—a true bill in the same court for the November term of 1907—from which I quote:

By controlling, manipulating, and arbitrarily bidding down and depressing the market price of spirits of turpentine and rosin, so that competitors and producers could not sell said articles of commerce except at ruinous prices; by coercing and causing naval stores receipts, which would normally and naturally flow to one port of the United States, to be diverted to another port of the United States; by purchasing thereafter at divers times a large part of its supplies at naval stores ports known as "closed ports," and willfully, and with the deliberate intent and purpose of depressing the market, refraining from purchasing any appreciable part of its supplies of naval stores on the Savannah market, where its purchases, if made, would tend to strengthen prices and the market therefor, the Savannah market being the basic or primary market in the United States for naval stores, and the said defendants taking the receipts at said closed ports of Pensacola, Tampa, Fernandina, Gulfport, and Mobile, on a basis of the market at Savannah; by coercing factors and brokers into entering into contracts with said defendants for the storage and purchase of their receipts and refusing to purchase from such factors and brokers unless such contracts were entered into; by circulating and publishing false statements as to naval stores production and stocks in the hands of producers and their immediate representatives; by issuing and causing to be circulated and hypothecated fraudulent warehouse receipts; by fraudulently grading, regrading, and raising grades of rosin and falsely gauging spirits of turpentine; by attempting to bribe employees of competitors and factors so as to obtain information as to competitor's

business and stocks; by inducing consumers, by payment of bonuses and threats of boycott, to postpone dates of delivery of contract supplies, thus enabling defendants to refrain from purchasing such supplies which purchases would tend, if made, to strengthen the market and prices; by making tentative offers of large quantities of naval stores under prevailing markets, intending then and there to accept only contracts for small quantities and to cover these sales by subsequent purchases to be made on markets thus depressed by the aforesaid fraudulent offers; by at divers times selling spirits of turpentine and rosin at prices far below the actual cost to themselves so as to compel competitors to meet said prices, which said prices would be ruinous to themselves as well as to their competitors; by willfully and arbitrarily fixing the prices of spirits of turpentine in the United States below the cost of production; each and all of the foregoing means being for the purpose of crushing competitors and driving them out of business and preventing competitors from engaging in such trade and commerce among the several States and foreign nations in the aforesaid articles of commerce, and destroying competition and restraining trade in the aforesaid articles of commerce, contrary to the form of the statute in such case made and provided and against the peace and dignity of the said United States.

That, Mr. President, shows what is charged. What the Government expects to prove is disclosed in the following letter from the Attorney-General of the United States:

DEPARTMENT OF JUSTICE,
OFFICE OF THE ATTORNEY-GENERAL,
Washington, D. C., February 2, 1909.

Hon. JAMES P. TALIAFERRO,
United States Senate.

MY DEAR SENATOR: Referring to the subject-matter of your recent call at the department—the alleged misbranding and false gauging of naval stores—I beg to say that I am in receipt of a report on the subject from the assistant United States attorney for the southern district of Georgia. It seems quite clear that, during the trial of the case of the United States against the American Naval Stores Company, a considerable amount of evidence will be presented showing fraudulent practices on an extended scale, by which the amount of turpentine in packages handled by the National Transportation and Terminal Company (which, as the department is informed, is a subsidiary corporation controlled by the American Naval Stores Company) was falsely stated by the markings on the packages showing the gauge, and that the marking on packages containing rosin was falsified so as to show a higher grade of rosin than the package actually contained. The method followed in carrying out these frauds, as disclosed by the evidence, was to have an official gauge made of the turpentine and an inspection made of the rosin; subsequently it seems to have been a frequent practice for subordinates of the National Transportation and Terminal Company to withdraw from the gauged barrels of turpentine from one-half to three-fourths of a gallon from each barrel, and also to remove the inspector's mark from the barrels of rosin and substitute therefor a mark indicating a higher grade of rosin than had been determined by the inspection.

It would not, of course, be consistent with the interests of the Government to give the names of witnesses or the exact location of the fraudulent acts to which they will testify. I may say, however, that one witness will testify to having seen about 2,000 barrels of rosin regraded. Another witness will swear that he caught an employee of the National Transportation and Terminal Company raising the gauges of spirits one-half to three-quarters of a gallon per barrel, and the result of the regauging showed that his allegations as to the raising of the figures were correct. Other witnesses will swear that they received instructions from responsible officers of a subsidiary company of the American Naval Stores Company to pack barrels of turpentine one-half gallon short; that is to say they would take a half gallon out of each barrel after they were gauged. The same witnesses will also swear that when purchasing spirits from the producer they recorded the turpentine as one-half gallon short of the true gauge, and that upon the resale an additional one-half gallon would be taken out of the same packages. There will be evidence that employees of the National Transportation and Terminal Company were seen at night at work in the yards of the company regrading rosins; and it will be in evidence that employees of the company were instructed to raise the gauges of turpentine from one-half to 1 gallon per barrel, and that the grade and weights of rosin were very materially raised in consequence of similar instructions. In one instance the profit resulting from the raising of the gauges on turpentine in a shipment of 500 barrels amounted to more than 200 gallons. A specific instance of the manipulation of one shipment of 500 barrels of rosin will be testified to, in which employees of the National Transportation and Terminal Company worked at night raising the mark denoting "B" rosin to "D" rosin. More than one former employee will testify that after spirits were gauged by the inspector the man in charge of the yard, with his crew of hands, would go through the yard taking from one-half to 1 gallon out of each barrel of turpentine.

In one or more instances the same former employees will testify that they have been required to work at nights regrading rosin, by removing the inspector's mark and substituting a higher mark. There will be testimony of consumers of naval stores, showing that the packages received by them had been tampered with and the inspection mark changed.

The foregoing is, of course, simply a summary of what the United States expects to prove, and, if the anticipations of the district attorney are carried out, it would seem that a condition of affairs bordering on the scandalous has been in effect with regard to the merchandising of naval stores. When the testimony in this case has actually been taken, I shall be glad to send a copy, if so desired, to any Senate committee which may have this subject under consideration, but it would not, of course, be advisable at the present time to give a more definite statement as to this evidence than is contained in the foregoing.

Yours, very truly, CHARLES J. BONAPARTE,
Attorney-General.

To sum up, in 1891 we find these offenders mismarking rosin and taking their chances.

In 1898 we find them violating the interstate-commerce act by undermarking the capacity of their tank cars.

In 1905 we find them organizing a monopoly or conspiracy in restraint of trade under an iron-clad contract, dividing and parceling out among themselves the naval-stores business of the world.

In 1907 we find them indicted for this offense, pleading guilty to the indictment, and solemnly promising to offend never again.

And now we find them under indictment for again conspiring in restraint of trade; that the methods employed were, in part, the misgrading of rosin and the false gauging of turpentine; discrimination against ports; bribery of employees of other concerns; manipulation of the market below the cost of production; coercion of buyers; boycott of factors; ruin of competitors; and about every other reprehensible practice devised by those who prey upon trade.

Mr. President, to some it might occur that, because the indictment mentions mismarking of rosin and false gauging of turpentine, there is some law under which these offenses may be pursued. Such is not the case. The proceedings referred to are under the antitrust law, in which there is no provision whatever under which these practices, when not a part of the fabric of a conspiracy, may be proceeded against and stopped.

This bill seeks to make these practices separate violations of the law, proceedable against wherever found, and to insure conviction needing not to be made a part of the usually ponderous proceedings for conspiracy.

And I have told you that the state laws on this subject are inoperative, because they do not apply to interstate commerce, into which 99 per cent of the naval-stores product is absorbed.

The great cornfield counselor of this body, in one of his interesting commentaries on common sense, which is, by the way, the fountain head of good law, has declared that where there is so much smoke there must be some fire. It is equally true that a man shall be presumed innocent until adjudged guilty. I do not presume the guilt of the defendants in the case to which the Attorney-General has alluded, but leave that to the jury. I do maintain, Mr. President, that the defendant companies in these cases are the allies and confederates of those concerns which have been convicted in the past, and have behind them the same men and interests of those old-time offenders; so that any presumption of innocence must be offset with the record of their reprehensible doings in the past, and thus weigh less heavily in their favor than in favor of those who have always shown clean hands.

Let it be remembered, Mr. President, that this corrupt combination, into the workings of which I have endeavored to give the Senate an insight, is rich and powerful. It is represented in practically all of the important ports of the United States and Europe. They have yards and warehouses in Brooklyn, Wilmington, Brunswick, Jacksonville, Fernandina, Tampa, Pensacola, Mobile, Gulfport, New Orleans, East St. Louis, Louisville, Cincinnati, Chicago, and Montreal, with steamships from South Atlantic and Gulf ports to the United Kingdom and ports of Europe. It will be seen, therefore, that their influence is far-reaching, not only in the producing States, but wherever rosin and turpentine are used. They are said to have a complete force of spies that pry into the affairs of competitors. They have been known to have the confidential employees of other companies in their pay. They have a concrete organization at all times ready to do their bidding, and all who have the temerity to oppose them are marked for future vengeance. It is not surprising, therefore, that legislation to check their frauds should inspire them into instant and frantic activity.

Mr. President, we find the producers, or a majority of them, representing practically $15,000,000 of a total annual production of about $20,000,000, crying for protection from the trust; we find the interests of the consumers of the country, those represented by the large soap, paint, paper, oil, and varnish manufactories, demanding protection from the fraudulent practices of the trust, but of course the trust will fight this bill. The parasites which have fastened upon this industry will be as reluctant to yield their grasp as those which ravage the oak. They have mean, little, sordid purposes to serve, and the welfare of their fellow-men will weigh lightly in the balance against their greed and selfishness.

Mr. President, I do not mean to imply that any of my colleagues sympathize with monopolies or those who defraud their fellow-men. I have great respect for them all. Their opinions and views on this, and all legislation, indeed, are based upon what I know they think is right and just. Our differences are not upon the question of the necessity for some check to be placed upon the trusts, but rather upon the exigencies of this particular case—differences due, I think, largely to the fact that they have not known to what lengths these offenders have gone and are willing to go to maintain their grasp upon this industry.

This is not a complicated bill, but is simple and direct in its provisions. Indeed, as I have said before, it is fashioned after

the pure-food law as nearly as conditions will admit, so that no new principle is offered for enactment into law. We only ask that the principle of that law, which is one of honest dealing between man and his fellow-men, shall be extended to cover the naval stores of the South.

Mr. President, as I understand the pure-food law, it is designed to protect the consuming public from dishonest practices. The naval-stores bill seeks to protect both the consumer and producer from such practices. In protecting these two it will add its weight as a factor in saving our forests, and through them our rivers, the commerce they maintain, and the power they generate.

I have offered this bill in good faith and in the interests of an important industry—one that is believed to be still in the grasp of a relentless trust; a bill that establishes no precedent or new principle, and has only for its object fair and honest dealing. I have shown you that it will protect the producer and consumer from fraud; that its provisions can hurt no State, no city, and no locality; that it will not injure any honest man or firm; that it will destroy monopoly and establish competition in a legitimate business, and I submit, Mr. President, with all due deference to the opinion which others may hold, that a measure with so good a purpose should become a law.

The VICE-PRESIDENT. What disposition does the Senator desire made of the bill?

Mr. BACON. As I understand, the bill is not called up for action, but simply to enable the Senator from Florida to deliver his speech.

Mr. WARREN. Mr. President——

Mr. BACON. I shall occupy but a minute.

Mr. WARREN. I merely desire to ask the Senator a question.

Mr. BACON. I will answer the question before I get through, if the Senator is desirous to propound a question.

Mr. WARREN. Very well.

Mr. BACON. It would be manifestly improper for me at this time to discuss the bill or to reply to the Senator from Florida. Whenever the bill is before the Senate for action, I shall endeavor to show, if I am able, good and abundant reasons why the bill should not be passed. I will content myself at the present time with saying that if the crimes have been committed, if the frauds have been perpetrated which have been narrated by the Senator from Florida in his interesting speech, I think it can be abundantly shown that there is ample law, both federal and state, for the punishment of such crimes and that no further legislation is needed to effect that purpose. I will say no more than to suggest one thing further, and that is that if the crimes have been committed and the frauds have been perpetrated, the place, the forum, the jurisdiction for an examination into the question of guilt is in the southern district of Georgia and not in the Senate of the United States.

Mr. TALIAFERRO. "The Senator from Florida" realizes that the place where the question of guilt should be determined is in the courts of the southern district of Georgia. He stated it in his remarks as fully and completely and as positively as the Senator from Georgia, with his usual emphasis and clearness in speaking on all questions, could have stated it.

That the frauds exist is abundantly proved by the records of the courts in the Senator's State and in the Senator's district, and I have dealt in my remarks this morning with such as have been disposed of, and I shall be prepared to deal with any other questions that may be raised against the bill when, as the Senator from Georgia suggests, it is before the Senate for consideration.

Mr. President, the bill is not before the Senate for consideration this morning, but it is here, as the Senator from Georgia has stated, to give "the Senator from Florida" an opportunity to submit the remarks which he has made. But I want the Senate to understand, and I want the people of Florida and Georgia to understand, that the fact that the bill is not before the Senate is due to no fault of the Senator from Florida.

Mr. BACON. I promised to answer a question of the Senator from Wyoming.

Mr. WARREN. I withdraw any intention of asking a question, because I desire to proceed with other business. I understand that the Senator from Minnesota [Mr. NELSON] desires to call up a bill which has been read and which will lead to no discussion. After the Senator from Minnesota has placed his measure before the Senate, I shall ask that other matters may be passed by until we conclude the consideration of the appropriation bill.

Mr. HEYBURN. I have a conference report which I desire to present.

BALTIMORE AND POTOMAC RAILWAY COMPANY.

Mr. CARTER. I am directed by the Committee on the District of Columbia, to whom was referred the bill (H. R. 23468) to amend sections 11 and 12 of an act entitled "An act to provide for eliminating certain grade crossings on the line of the Baltimore and Potomac Railway Company in the city of Washington, D. C., and requiring said company to depress and elevate its tracks and to enable it to relocate parts of its railroad therein, and for other purposes," approved February 12, 1901, to report it with amendments, and I submit a report (No. 1098) thereon.

The bill just reported is one of considerable importance, and inasmuch as an amendment has been made and the bill being very brief, I ask for its present consideration.

Mr. WARREN. I have been compelled to refuse not less than a score of such requests.

Mr. CARTER. I withdraw the request.

Mr. WARREN. I hope the Senator will wait a while.

The VICE-PRESIDENT. The bill will be placed on the calendar.

VALDEZ, MARSHALL PASS AND NORTHERN RAILROAD.

Mr. NELSON. I ask unanimous consent for the present consideration of the bill (H. R. 25823) to amend an act entitled "An act to extend the time for the completion of the Valdez, Marshall Pass and Northern Railroad, and for other purposes," approved February 21, 1907. It has been read, and when it was last before the Senate the Senator from New Jersey [Mr. KEAN] objected. He has since withdrawn his objection to the present consideration of the bill.

Mr. KEAN. I withdraw my objection. I have examined the bill. I find it is not a paper railroad, and I do not object to it.

By unanimous consent, the Senate, as in Committee of the Whole, resumed consideration of the bill (H. R. 25823) to amend an act entitled "An act to extend the time for the completion of the Valdez, Marshall Pass and Northern Railroad, and for other purposes," approved February 21, 1907.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

REVISION OF THE PENAL CODE.

Mr. HEYBURN. I present a conference report, and ask for its present consideration.

The VICE-PRESIDENT. The report will be read.

The conference report was read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2982) to codify, revise, and amend the penal laws of the United States, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate agree to the House amendment with amendments to sections 7, 19, 20, 37, 51, 95, 125, 126, 140, 187, 200, 226, 227, 243, 253, 254, 255, 256, 257, 262, 263, 276, 295, 300, 321, 322, 323, and 349.

That the House agree to the amendments proposed by the Senate conferees, as follows:

Section 7. On page 4, in line 21, after the words "United States," insert the words "or in any place subject to the jurisdiction thereof,"

Section 19. On page 12, in line 13, substitute a semicolon for the period, and add the following: "and shall, moreover, be thereafter ineligible to any office, or place of honor, profit, or trust created by the Constitution or laws of the United States."

Section 20. On page 12, strike out section 20.

Section 37. On page 22, in line 11, substitute a comma for the semicolon, strike out the remainder of the section, and in lieu thereof insert the following: "shall be fined not more than five thousand dollars, or imprisoned not more than five years, or both. And whoever shall knowingly purchase or receive in pledge for any obligation or indebtedness from any soldier, officer, sailor, or other person called into or employed in the military or naval service, any arms, equipments, ammunition, clothes, military stores, or other public property, whether furnished to the soldier, sailor, officer, or person under a clothing allowance or otherwise, such soldier, sailor, officer, or other person not having the lawful right to pledge or sell the same, shall be fined not more than five hundred dollars and imprisoned not more than two years."

Section 51. On page 28, at the end of the section, add the following: "And nothing in this section shall interfere with or take away any right or privilege under any existing law of the United States to cut or remove timber from any public lands."

Section 95. On page 48, at the end of line 21, add the words "prima facie."

Section 105. On page 53, in line 1, after the word "or," strike out the word "be."

Section 125. On page 63, in lines 3 to 7, amend the proviso so as to read as follows: "*Provided*, That no person shall be deemed guilty of a violation of any such rule unless prior to such alleged violation he shall have had actual knowledge thereof."

Section 126. On page 63, in line 13, strike out the word "and" and insert in lieu thereof the word "or;" and in line 14 substitute a comma for the period at the end of the section and add the words "or both."

Section 140. On page 70 strike out section 140.

Section 142. On page 71, in line 1, strike out the word "now" before the word "provided."

Section 187. On page 98, in line 17, after the word "vessel," insert the words "to the current business of the carrier."

Section 194. On page 100, in line 18, strike out the word "or" before the word "embezzling."

Section 200. On page 104, in line 14, substitute a semicolon for the comma, strike out the remainder of the section, and in lieu thereof insert the following: "and if in effecting or attempting to effect such robbery, he shall wound the person having custody of the mail, or put his life in jeopardy by the use of a dangerous weapon, or for a subsequent offense, shall be imprisoned twenty-five years."

Section 226. On page 123, in line 6, before the word "submit," insert the word "knowingly."

Section 227. On page 123, in line 22, before the word "misstate," insert the word "or;" and in line 23, before the word "conceal," insert ", for the purpose aforesaid shall knowingly and willfully."

Sections 241, 242, 243. On pages 132 and 133 strike out the word "That" at the beginning of each section and begin the first word of each section with a capital letter.

Section 243. On page 133, in line 13, after the word "shall," insert the word "knowingly."

Section 248. On page 136, in line 19, substitute for the words "and every" the words "or any."

Section 253. On page 140, in lines 9 and 10, strike out the words "being a citizen or other person resident."

Section 254. On page 140, in line 17, strike out the word "American;" and in line 18 substitute for the words "jurisdictional limits" the word "jurisdiction."

Section 255. On page 141, in line 1, strike out the word "American."

Section 256. On page 141 strike out section 256.

Section 257. On page 141, in line 12, strike out the words "State, Territory, or District" and in lieu thereof insert the words "place subject to the jurisdiction."

In line 13 strike out the words "a foreign country, state, or" and in lieu thereof insert the words "any other."

In lines 14 and 15 strike out the words "State, Territory, or District" and in lieu thereof insert the words "place subject to the jurisdiction."

Section 262. On page 143, in lines 13 and 14, strike out the words "jurisdictional limits" and in lieu thereof insert the word "jurisdiction."

Section 263. On page 143, in line 21, before the word "directly," insert the words "or under the jurisdiction thereof."

Section 270. On page 146, in line 11, strike out the word "other" before the word "foreign."

Section 276. On page 150, in line 8, strike out all after the period, and also all of lines 9 and 10.

Section 279. On page 151, in line 20, strike out the word "be" before the word "fined."

Section 295. On page 158, transpose the language of line 10 so that it will read "United States, beats, wounds, or without justifiable cause, im-"

Section 300. On page 161, in line 3, strike out the word "and" at the end of the line, and in lieu thereof insert the word "or."

Section 321. On page 169, in line 15, strike out the words "in any Territory."

Section 322. On page 169, in line 19, strike out the words "in any Territory."

Section 323. On page 169, in line 23, strike out the words "in any Territory."

Section 349. On page 198, in line 1, strike out the word "from" and in lieu thereof insert the word "on;" in line 2 strike out the word "July" and in lieu thereof insert the word "January;" also in line 2 strike out the word "nine" and in lieu thereof insert the word "ten."

W. B. HEYBURN,
GEO. SUTHERLAND,
Managers on the part of the Senate.
R. O. MOON,
HERBERT PARSONS,
SWAGAR SHERLEY,
Managers on the part of the House.

Mr. KEAN. That is a very important report. I ask to have it printed and that it go over.

Mr. BACON. Mr. President, I do not object to that; on the contrary, I think it should be done. It is a matter of such importance that I hope, when it comes again before the Senate, we may have due notice of it. It is not a matter that should be disposed of, in my opinion, in the way that conference reports ordinarily are disposed of. It relates to the entire body of criminal law, and it is in an unusual attitude before the Senate from the fact that the Senate passed a bill, after very considerable discussion, which went to the House; and the House had in the meantime been discussing the same bill and had incorporated upon it amendments of their own, I understand. What disposition was made of the amendments put upon the bill by the Senate of course it is difficult to ascertain, unless we have the two bills printed for examination.

The House, I understand, struck out all after the enacting clause of the Senate bill and substituted the bill which they had considered, with the amendments which they had adopted and amendments which were then adopted, one or more at least. So it comes back to us without our having seen the bill which has been agreed upon except in so far as it corresponds to and agrees with the bill which the Senate passed. It is, of course, a matter of large detail which we ought to have the opportunity to examine.

I recognize the fact that Senators in charge of the bill have given it very great labor and are entitled to very great consideration, but I simply wish to suggest that when a measure of this importance, covering, as it does, the entire body of the criminal law of the United States, comes up for action again we should have notice of it, which we are apt not to know about unless we do have notice, on account of the particular condition of affairs at this late stage in the session.

Mr. FORAKER. I wish to suggest to the Senator from Georgia, in view of the point he has made, that he add to the request that the conference report be printed a request that the bill as amended and as showing the amendments that have been agreed to be also printed.

Mr. BACON. I had intended to make that motion at some time, and I have no objection to making it now. My opinion is that we ought to have a print of this bill which, in juxtaposition, would show the law as it now stands on the statute books, the bill as it passed the Senate, with the amendments that the Senate put upon it, and the bill which was passed by the House, with the amendments put upon the bill there, the same bill having been introduced in each House. It is necessary for us to know to what extent the House, when they substituted their bill for the Senate bill, regarded or adhered to any of the amendments which were put upon the bill as it passed the Senate, that we may be able to compare all the amendments which the House put upon it with the amendments which the Senate put upon it, and so that we can have a threefold comparison.

Mr. SUTHERLAND. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Utah?

Mr. BACON. I do.

Mr. SUTHERLAND. As the Senator from Georgia will perhaps recollect, this bill was framed by a joint committee of the two Houses. It was reported to each House in identical terms. The Senate first considered it and made some amendments. They were comparatively few in number.

Mr. BACON. I do not know about that. There were quite a number of them, according to my recollection.

Mr. SUTHERLAND. There were not to exceed 30 or 40 amendments altogether, and most of them were mere changes of phraseology.

Mr. BACON. Very well; they were amendments, and there were quite a number of them.

Mr. SUTHERLAND. But most of the amendments were mere changes in phraseology which did not affect the substantial provisions of the bill.

During the time the Senate was considering the bill the House was also considering it, and the House had nearly completed the bill, it had gotten two-thirds through with it, at

any rate, when it passed the Senate. Instead of taking up the Senate bill as we passed it, the House concluded the consideration of its own bill, which, as I said, was in identical terms with the Senate bill.

Then in order to shorten the matter, when the consideration of the bill in the House was completed, it substituted the House bill for the Senate bill, and sent it back to us in that form. The result was that the bill as passed by the House, with comparatively few exceptions, was the same as the bill passed by the Senate.

Mr. BACON. Now, Mr. President, if the Senator will pardon me, the fact must not be overlooked that the amendments to existing law are not simply the amendments that the Senate put upon the bill or the amendment which the House put upon the bill, but they are the multitudinous amendments which the committee which framed the bill put upon existing law.

Mr. HEYBURN. Mr. President——

Mr. BACON. In this connection, if the Senator will pardon me just a moment, I wish to call the attention of the Senate to the fact—which is recollected by both the Senators who so ably represented the bill on the floor, the Senator from Idaho [Mr. HEYBURN] and the Senator from Utah [Mr. SUTHERLAND]—that the discussion of that bill, which dealt with the entire body of the criminal law of the United States, was participated in by less than half a dozen Members of this body. It was not only participated in by less than half a dozen Members of this body, but while it continued through weeks, if I recollect aright, off and on, when the body of laws with the numerous amendments proposed to the bill was under consideration, there was scarcely ever a time when there were a dozen Members of the Senate attending the session.

So we have the remarkable presentation of a fact, that here is the question of the adoption of the report of a conference committee which relates to the entire body of the criminal laws of the United States, and which, however carefully considered it was—and the bill was carefully considered—was considered by a very small fraction of the Senate; and, necessarily, to pass upon this question would require that the Senate should vote as to all this great number of issues upon the faith and confidence they have in those who did participate in the debate and who did lead to the conclusion which was reached.

Mr. HEYBURN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Idaho?

Mr. HEYBURN. I have the floor, Mr. President. I had the floor and I yielded to the Senator.

Mr. BACON. I beg the Senator's pardon; I had the floor. But I do not desire to retain it.

Mr. HEYBURN. I do not know when I lost the floor. I rose to present the report and make some suggestions. I was not aware that I had lost the floor, but I cheerfully yielded to the Senator from Georgia.

The VICE-PRESIDENT. The report was read, and then the Senator from Georgia was recognized.

Mr. HEYBURN. Of course, I yield to the decision of the Chair. I will ask leave, then, to interrupt the Senator from Georgia, with his permission.

Mr. BACON. I have yielded the floor, if the Senator desires it.

Mr. HEYBURN. Mr. President, the Senator from Georgia suggests that it will be necessary to have printed the existing law set opposite the work of the committee. That has already been done, and the Senator from Georgia has a copy of that work, which was furnished to each Senator and then refurnished to the Senators. It was printed and on each Senator's desk at the time the original bill came into the Senate. The bill was introduced in the House at the same time, approximately, and every Senator has had in his possession for more than a year a copy of the existing law printed opposite the provisions of the bill as it passed or as it was introduced in the Senate.

To undertake to open up the discussion that we went through for about three months would mean simply the defeat of this legislation. Mr. President, I can not believe that that is the intention of Senators. This work has occupied several years, and it has not been a pastime. It has been expensive in time and in money to some extent, because there has been a great deal of printing connected with it. The changes that were made by the House in the bill that was passed through the Senate were so few, many of them being merely matters of form of expression, that they can afford no excuse whatever for delay in the consideration of this measure.

Mr. WARREN. May I ask the Senator if he has made a motion to consider this report?

Mr. HEYBURN. I have.

Mr. WARREN. It is under consideration?

Mr. HEYBURN. Yes.

Mr. WARREN. Under the rule, that is to be decided without debate. I merely wish to suggest that this is a very important question. I should be glad to have the conference report adopted, but it seems to me that we ought to get some other matters into conference. I suggest that it be printed and lie over, and that we take up and dispose of the agricultural appropriation bill.

Mr. HEYBURN. It is a question as to what should be printed that I was considering, on the suggestion of the Senator from Georgia. The Senator has suggested that we should practically commence over and print the existing law in connection with this measure. We have got to determine the question of printing now, and we have a right to determine it now.

Mr. WARREN. Under the rule, I take it that a Senator has not a right to discuss it. I do not wish to interfere with any reasonable amount of discussion, but I can see the opening up of a discussion that would consume the day, and we are in a position where we must either pass the agricultural appropriation bill and get it into conference or abandon it.

Mr. HEYBURN. I was not discussing the conference report from the standpoint of the action of the two Houses, but I was discussing the proposition which was made to print. I am in favor of having the report printed at once, but I do not see the necessity of entering into a reprint of that which we have already on hand. I will undertake to furnish the Senator from Georgia with as many copies as he may need.

Mr. BACON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Georgia?

Mr. HEYBURN. I do.

Mr. BACON. I am probably less in need of a reprint than a great many other Senators, from the fact that, as the Senator will recollect, I was one of the small number to whom I have alluded who were present during the discussion of this matter. I recollect the print to which the Senator refers. There are, however, a great many Senators who were not present during those discussions, and who are not in a position to judge as readily as possibly some others of us may be as to what changes have been made and as to their materiality and desirability.

This is the suggestion which I make, and which I have made. As stated by the Senator, there is a volume printed which is thicker than these two [exhibiting] put together, if I recollect aright. I have it not before me now. It is quite a large volume, containing a great many pages, in which there is on one page a print of the existing law and on the opposite page the print of the proposed amendments.

Mr. HEYBURN. No; of the bill.

Mr. BACON. Of the bill. Well, the volume contains all the changes which are to be made. If that one document were all which was to be examined, there might not be any necessity for a reprint. But we have not only that document to examine; we have to examine the bill as it passed the Senate, with the amendments which were adopted by the Senate.

Mr. HEYBURN. We have that print.

Mr. BACON. Very well. My suggestion is that it ought to be printed in such a way that a Senator would not have to take one volume and then have to refer to another volume for a comparison. The universal custom is, when bills are before the Senate which have amendments proposed by one House or the other House, that the text of the print shall contain the existing law, or if it is an original bill, of the original bill, and also the proposed amendments in order that Senators may readily compare them.

Mr. HEYBURN. It is so printed now.

Mr. BACON. I beg the Senator's pardon; I did not so understand. If there is a reprint of the bill as it passed the Senate——

Mr. HEYBURN. With the House amendments.

Mr. BACON. The Senator did not hear me through. If there is a reprint of the Senate bill which in the same document contains the existing law and the Senate amendments which were put upon the bill before it went to the other House, and the House amendments which were put upon it when it was sent back to us, that would be sufficient. I should like to see it if there is such a print. I do not think there is.

Mr. HEYBURN. I should like to inquire if the Senator is going to insist on the printing of the existing law in connection with that which is already printed? We have the bill as it passed printed with the amendments.

Mr. BACON. Certainly; if it is amended, it ought to be printed. How else can Senators examine it?

Mr. HEYBURN. We have done that. The Senate performed that work before the bill went to the House.

Mr. BACON. The work that was done by the Senate has been cast aside.

Mr. HEYBURN. Not at all. The bills introduced in the House and the Senate were exactly the same, and the substituting of one copy for another was not the substituting of new matter.

Mr. BACON. But the amendments which were put upon it in the Senate do not correspond with the amendments put upon it in the House.

Mr. HEYBURN. We have the bill printed with the Senate amendments in it.

Mr. WARREN. Mr. President——

The VICE-PRESIDENT. The hour of 1 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated by the Secretary.

The SECRETARY. A bill (S. 6484) to establish postal savings banks for depositing savings at interest, with the security of the Government for repayment thereof, and for other purposes.

Mr. NELSON. I ask that the bill be temporarily laid aside.

The VICE-PRESIDENT. Without objection, the bill will be temporarily laid aside.

Mr. WARREN. I do not want to enter into this discussion; I should like to see it closed. But I wish to know whether I must stay here awaiting the floor or whether I may proceed to other business. Therefore I will ask the Chair to rule upon Rule XXVII and state whether this discussion is proceeding in order.

The VICE-PRESIDENT. Rule XXVII provides:

> The presentation of reports of committees of conference shall always be in order, except when the Journal is being read or a question of order or a motion to adjourn is pending, or while the Senate is dividing; and when received the question of proceeding to the consideration of the report, if raised, shall be immediately put, and shall be determined without debate.

Mr. BACON. I did not understand that that was the question raised.

Mr. HEYBURN. I made a motion that the report be received and adopted at the time I presented it. Now the Senator from Georgia is asking that it be printed, and the question under consideration is, Shall it be printed; and if so, to what extent shall it be printed?

Mr. WARREN. That refers to the question of consideration. If the debate is to proceed, I shall have to ask——

Mr. HEYBURN. I am ready to vote on it without any further consideration.

The VICE-PRESIDENT. Shall the Senate proceed to the consideration of the conference report submitted by the Senator from Idaho?

Mr. BACON. Mr. President——

Mr. KEAN. I make the point that the report having been presented, the request made that it be printed requires it to go over.

Mr. HEYBURN. Under what rule?

The VICE-PRESIDENT. The Senator from Idaho has moved that the Senate proceed to the consideration of the report?

Mr. HEYBURN. I have.

The VICE-PRESIDENT. The question is on agreeing to the motion to proceed to the consideration of the report. [Putting the question.] The noes have it, and the motion is not agreed to.

Mr. HEYBURN. I ask for the yeas and nays.

The yeas and nays were not ordered.

AGRICULTURAL APPROPRIATION BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 27053) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1910.

The VICE-PRESIDENT. The pending question is upon the amendment proposed by the Senator from Montana [Mr. CARTER] to the amendment of the committee, which will be read.

The SECRETARY. On page 25, under the head of "Forest Service," in line 15, before the word "dollars," in lieu of "four million four hundred and eighty-six thousand," proposed by the committee, insert "two million," so that the total will read "$2,000,000."

Mr. HEYBURN. Mr. President, considerable discussion was had yesterday leading up to this amendment. The agricultural appropriation bill is supposed to be a very important bill. It deals with the relations which the Government shall bear to the agricultural interests of the United States. It is important; but it is not as important as the laws of the United States that afford the machinery for the detection and punishment of crime. If we are not to have laws for that purpose, the agricultural interests of the country amount to nothing.

Mr. WARREN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Wyoming?

Mr. HEYBURN. For a question.

Mr. WARREN. I will say to the Senator I agree with him as to the importance of the bill to which he refers; I am ready to vote for it at any time; but we have to proceed under the rules and in order, and he will acknowledge that to take up the agricultural appropriation bill is to proceed under the rule and in order, and that it ought to go to conference. I presume that the conference report to which the Senator alludes, after having been printed, will be taken up and, I hope, accepted.

Mr. HEYBURN. I am speaking to the agricultural appropriation bill.

Mr. WARREN. Speaking to the agricultural bill, but about the other bill.

Mr. HEYBURN. Well, that is one of the peculiarities of the practice of this body.

Mr. WARREN. That is right. The Senator is entertaining when speaking upon that bill, as well as in what he says upon the forestry question on the appropriation bill.

Mr. HEYBURN. I am going to be very brief in what I have to say. Upon a vote as to whether we shall proceed to the consideration of the report, the majority seem to have voted against it. If the majority of the Senate do not intend to make fruitful the work of four years of a joint committee of Congress, but intend to allow it to die or to kill it by indirection, I am going to know it, if I can, very early.

I have lost two vacations because of the necessity of preparing and bringing into this body, in pursuance of the dictates or command of the body, a report in the shape of that bill. We have labored for days and weeks and months upon the question of revision, and I am not one of those who will be content to walk upon a treadmill for the amusement of others. If it is to be rejected simply for the purpose of rejecting it, the sooner we know it the better.

The amendments to this bill are of the most casual and trivial nature. The House, I think, made less than 35 amendments, many of them the mere transposition of words, to the bill as it went from the Senate. We are now to be called upon to reprint all the penal statutes of the United States, and set them here opposite to what? A bill that we considered.

Perhaps there was not a full attendance of the Senate, but every Senator had upon his desk and in his possession a copy of the bill, printed in the form suggested by the Senator from Georgia. Now, within four legislative days of the end of this session, we are called upon to have reprinted the existing law, the bill as it passed the Senate, and the bill as it passed the House, with a statement of the differences, amounting in all to less than 75 or 80.

I will not animadvert upon the suggestion made by Senators, and I will not question their motives; but I want to say now, and it may be taken as notice, that if this criminal code is not going to be allowed to be passed upon, or if the conference report is not to be passed upon now, the revision of the laws of the United States, that have proceeded almost to completion, so far as the posting and printing is concerned, will not proceed much further.

If this work is worth doing, it is worthy of the attention of the Senate when it is brought into the Senate; and if we are to be met here with a proposition that, four days before the end of the Congress, this matter is to go back and be printed on pages facing each other—the existing law on one and the bill as it passed the Senate on the other—when we had already gone through that process, then it seems to me there is but one conclusion to be drawn, and that is that it is the intention somewhere that the bill shall fail of its passage, regardless of its merits.

Mr. BACON. Will the Senator permit me a moment?

Mr. HEYBURN. Certainly.

Mr. BACON. Mr. President, I realize that the Senator from Idaho has a good right to feel very intensely in regard to this matter, because he has put a great deal of very earnest and very valuable labor and expended much time in the effort to revise the laws as a member of that important committee. I do not think, however, that the Senator should regard the failure to pass the bill as necessarily involving a bringing to nought the labor he has thus expended. If the bill does not pass, that labor is in a form where it can be utilized in the future.

I do not believe, I say very frankly to the Senator, that it is practicable, nor do I believe that it is right that the Senate of the United States should be called upon at this late stage in the session, in the midst of the engrossing occupations

which necessarily now present themselves to us, to pass upon the question whether or not the work of the committee is that which they will indorse; and, more than that, whether the amendments which have been put upon the bill by the other House should now be accepted by the Senate.

I will say to the Senator very frankly that I think a great deal of the work which has been done by his committee is of very great value. I made the suggestion to him yesterday in private conversation that I thought it should be utilized in future, that the result of that work should not be embodied in one bill, but that there should be at least two bills, if not more. One bill should contain a revision simply putting into proper shape statutes which are not properly expressed or where there is such a diversity of expression in the enactment of the law that it is important it should be harmonized. Such a bill would be a matter of mere form and could be passed without any trouble. When it comes to the question of changing existing law or the consolidation of the statutes, which is a very delicate and difficult thing to do without in some manner infringing upon the intention of the original law, that ought to be in a different bill, because that is a matter of grave importance that should only be acted upon with the utmost consideration and care. To put this all in one bill makes it necessary that a great deal of matter that is merely formal should be in the mind and consideration of the Senate, when there ought to be attention given exclusively to those things which are material and important.

Mr. HEYBURN. Mr. President, it occurs to me to inquire whether or not the Senator from Georgia would like to undertake this work of revising the laws of the United States.

Mr. BACON. I certainly would not. I am more than glad to have so able a committee as that which has acted upon the matter, and I do not desire that their work shall be lost.

Mr. HEYBURN. Mr. President, that is a very hollow compliment.

Mr. BACON. But I do not think it is practicable to finally act upon this important matter at this session.

Mr. HEYBURN. Mr. President, it will not meet my views on this matter to pay me the empty compliment of having set a Barmecide feast. This work, which represents labor extending through years on my part, can not be paid for in compliments as to my zeal or my ability. I would like some Senator who is willing to substitute his zeal and his ability to be the one to make the criticism and propose to defeat the whole measure. It will be defeated, Mr. President, and the talk about the work not being wasted is thoughtless talk, because that work will be wasted. Any other committee that takes it up must travel over those weary details and steps that have been traveled by this committee. It will be at the end of another Congress when we will be met with the same proposition, and all of the time and all of the cost of this work will be wasted.

The Senator from Georgia was faithful in his attendance in this body when the code bill was under consideration. Day after day and week after week we went over it with great care and in detail, comparing the original law, the existing law, and the proposed law, until it seemed that there were no reasonable grounds for delaying the passage of the bill, and the Senate passed it.

Your conferees have felt compelled to abide by the will of the Senate and to stand for the action of the Senate. There is no material change in this bill as it comes from the conference committee, with the exception of what is known as the "Knox amendment," which was modified to suit the views of the House and the Senate conferees. There is no change that is worthy of a moment's consideration, yet we are now met with the proposition to proceed to revise the laws of the United States upon an entirely different basis, to divide it up into different bills and different sections. I wonder how much thought the Senator from Georgia has given to that question, as to the details, as to the work involved, and whether or not it would involve commencing again at the beginning and the reprinting of all that has been printed.

I want now to put the responsibility for the loss of time and money that would be involved in failing to enact this legislation just where it belongs in this body. I was astonished when Senators, either by failure to vote or by their adverse vote, refused to take this up for consideration. I had supposed——

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Oregon?

Mr. HEYBURN. In a moment.

I had supposed when this work came into the Senate with an agreement of the conference committee of the two Houses that the committee's troubles would be over. I had supposed that a conservative, thoughtful majority in this body would have stood by the conference report and instead of voting against the consideration of it would have voted for its consideration.

I shall at the very first parliamentary opportunity give the Senate another opportunity to say whether or not they are going to throw away this work or whether they are going to make it fruitful, as it was intended to be.

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Oregon?

Mr. HEYBURN. I do.

Mr. FULTON. Mr. President, I simply wish to say to the Senator from Idaho that I very much hope he will again bring up this matter. I was, unfortunately for myself, out of the Chamber at the time the matter was submitted to the Senate, or I should have very willingly and gladly voted with the Senator from Idaho to bring it before the Senate. I think the Senate will be making a very great mistake if they do not act on and adopt this report during the present session. I know something about the work which that committee has done and that any other committee will have to do which may be charged with the duty of revising and compiling the statutes. In a very large measure we have to depend on the judgment of the committee.

Mr. TELLER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Oregon yield to the Senator from Colorado?

Mr. FULTON. In a second. It is utterly impossible for the Senate to go into a careful and analytical inquiry concerning every provision that is carried in such a measure. Now I yield to the Senator from Colorado.

Mr. TELLER. I thought the Senator was through.

Mr. FULTON. No; but I am nearly through.

Mr. TELLER. Very well, then; finish. I will wait.

Mr. FULTON. I fear very much, if this report goes over, it means practically the loss of what has been done. Another Congress will come on. The other House will have to have the matter presented to it again as a new measure, and it will have to go through the same careful inquiry, the same slow process that has witnessed its consideration up to the present time. It will come up in the Senate, probably be subjected to the same critical inquiry that it was subjected to here at the last session, go to conference, and again fail.

Heretofore I put in some months of very earnest labor on this code bill. Finally I got it in shape to report to the Senate, and spent the rest of the session in endeavoring to get consideration of the measure. I fear that is going to be the result every time. Certainly there is no more important duty before Congress than to see that the laws are codified and brought together in proper form and in proper shape.

I apologize for taking even this much time on this particular occasion, but I feel really a very great interest in this work, and I am anxious that it shall be accepted.

Mr. TELLER obtained the floor.

Mr. CLAPP. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Minnesota?

Mr. TELLER. I yield to the Senator from Minnesota.

Mr. CLAPP. I simply wish to say that I propose to make a motion to reconsider the vote by which the Senate refused to consider the report of the committee on conference, so as to bring it back here and dispose of it this morning, if we can.

Mr. CLAY. I would suggest to the Senator——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Georgia?

Mr. TELLER. I do.

Mr. CLAY. I agree, in the first place, that this is a very important matter and that we ought to act on it if we can. I understood the Senator to say that the bill as it passed the Senate went to the House and that the House added certain amendments to it.

Mr. HEYBURN. Very few.

Mr. CLAY. And the conferees then——

Mr. HEYBURN. No; the conferees have not added amendments. The House only made about 35 amendments, and most of them are merely as to the form of language.

Mr. CLAY. Then, the report of the committee of conference is on a Senate bill as amended with 30 or 40 slight amendments made by the other House. The Senator has said on the floor that this bill has been printed, so that each Senator can examine it to see what amendments the House has added to it. Would it not be better for each Senator to have until to-morrow to examine the bill, and then let the Senate take it up? I do not think the work will be lost, but we ought to be allowed to know what amendments the other House has added to the bill.

If the bill is taken up to-day, as the conference report has just been brought in, I presume there is not a single Senator who has had time to examine it. I would suggest to the Senator, in perfect good faith, that he allow the matter to go over until to-morrow, and then call it up. Probably most of us will agree to it.

Mr. HEYBURN. Mr. President, it has occurred to me that perhaps to-morrow would be absorbed with other business. I understand a number of eulogies have been appointed to be delivered to-morrow—nine of them, I believe—and it has been suggested that perhaps we might take a recess, which would include to-morrow. The legislative business is pressing. We have a great deal of business to transact between now and the end of this Congress. This zeal for investigation of this measure has come so suddenly and at so late a day that I am impelled to inquire why it might not have inspired about two years ago those who are inspired with it to-day.

Mr. CLAY. Will the Senator permit me to say a word?

Mr. HEYBURN. Yes.

Mr. CLAY. This conference report has just been brought in, as I understand, and I only want an opportunity to examine the amendments—not the entire bill, but simply the amendments—which the House has placed on the bill.

Mr. HEYBURN. That would not take very long.

Mr. BACON. I would suggest that an opportunity ought to be afforded us to ascertain not only how the House amendments affect the bill, but how they will affect the existing law.

Mr. HEYBURN subsequently said: I ask that an order be made for printing the conference report on the penal code bill (S. Doc. No. 741) which was presented to the Senate this morning.

The VICE-PRESIDENT. Without objection, it is so ordered.

Mr. TELLER. Mr. President, at this late hour of the session I feel like making something of an apology to the Senate for taking any time in speaking on a question that has been much discussed here before; but it is a subject of such great importance to the people of the western country, which I in part, at least, represent, that I feel in duty bound to make some remarks on it, especially as I have, as I think, much knowledge of the unfortunate administration of public affairs in respect thereto. I shall be as brief as possible. I am willing that any Senator shall ask me a question, but I shall object to anyone's making a speech in my time. I shall be as courteous as I think I ought to be. We have got into the habit of interrupting Senators who are proceeding to make speeches to such an extent that I can not consent to it.

Mr. President, two years ago last June we had in Colorado what was called a "public land convention." It was a convention such as I had never before known. It was convened under an act of the legislature of Colorado authorizing the governor to call such a convention. It was a delegate convention. There was a provision in the law authorizing the governor to take part in its proceedings. The convention met and the senior Senator from Montana [Mr. CARTER] was the temporary chairman. I intended to read a portion of his address on that occasion, but I am going to ask that it may be printed in the RECORD as a part of my remarks, and I will not detain the Senate by reading it.

The PRESIDING OFFICER (Mr. DICK in the chair). Without objection, permission is granted.

The matter referred to is as follows:

Senator CARTER. Mr. Chairman, governor of Colorado, and gentlemen of the convention, you have conferred a great honor upon me in the choice you have just made. I use these words in more than a conventional sense, because I believe that this gathering is destined to become historic in the annals of this great western country. The earnestness which has impelled men to come here from points thousands of miles distant, to sacrifice time and substance during the busiest season of the year, indicates a widespread interest and a settled determination to reach a wise conclusion upon pending questions. Our Government, in every important crisis in its history, has been advised, counseled, and supported by such meetings as this, composed of the citizenship of the country assembling, without price or hope of reward, but purely in response to patriotic impulse. [Applause.]

From the old town meeting in New England we draw the germ of the great American public meeting. In all parts of our country these meetings are common, and as questions grow in magnitude and importance representation extends over broader areas and excites more intense interest. As we stand here to-day, about to enter upon the work for which the convention was called together, we might, with some degree of profit, the better comprehend the significance of our meeting by banishing the care of the day and referring briefly to a few things that have been accomplished in this great western country. I say now what will be conceded here and not controverted anywhere, that within the last fifty years the most marvelous development known to this world's history has occurred in the public-land States of this Union. [Applause.] From the summit of the Allegheny Mountains to the shores of the Pacific, in every section and in every State, this remarkable development has not only been a benediction to the participants, but has become the marvel of the whole civilized world. In waste places great States have sprung up, and in places which a few years ago knew only the wigwam and the war whoop we have to-day the sun of industry and the sun of benediction arising from peaceful, happy, comfortable, and contented homes. [Applause.] Great arteries of commerce have been spread across the mountains and the rivers and the plains. Many mining industries have been developed. [Applause.] Gold and silver and copper and lead and iron have been thrown into the channels of the world's commerce as never before in the development of any new country. Broad and fertile acres are yielding their teeming harvests to-day in a country which Daniel Webster, in 1848, pronounced only the legitimate and permanent home of the cactus and the jack rabbit.

It is needless to attempt to go over the details of this wonderful development; it would carry us through the day and into the night. The story is a symposium of human achievement and endeavor unmatched in the annals of history. [Applause.] To-day, as we meet here, every artery of trade is full to repletion. The great transportation lines, whether by water or by rail, are surcharged with the products of the country proceeding to the markets of the world. The schoolhouse is supported everywhere; the churches, the academies, the colleges, and the universities bear witness to the comprehension of these people for the good influences and the noble ideals of a high civilization. This transformation of swamp and mountain and desert and plain into a matchless abiding place for men has occurred under the most beneficial and beneficent system of public-land laws ever placed upon the statute books of any nation in the world. [Applause.] These laws are familiar to you; their administration is a part of the country's history. Millions, yea, billions, of dollars' worth of property have passed from government ownership to individual ownership under the operation of these laws; and yet, strange to say, the percentage of fraud and evasion of law, in proportion to the volume of the business, is infinitesmal in connection with the history of the administration of public-land laws when brought into comparison with any other line of business. [Applause.] At the same time frauds have occurred, and frauds will occur. The utmost scrutiny and the most tireless vigilance will not be able or sufficient at any time to entirely exclude from any human operations some element of insincerity, deceit, or evil purpose; but, in the main, I reiterate the statement that the land laws under which this great magical transformation has occurred have been honestly administered, have been honestly regarded by the people, and stand to-day, in the light of the century, justified by the theory of the Scriptures, "By their fruits shall ye know them." [Applause.]

The operation has not been complex. First in all the countries came the pioneer settler, pushing out far from markets to the remote frontier. Transportation forbade the attempt to produce anything for market except that which could be transferred thereto in well-concentrated form. Consequently beef, which would go part way to the market on foot, and mutton, and the things that could be concentrated into small shipments or easily portable, constituted, as a rule, the chief source of income for the settlers out on the firing line of civilization as it pushed forward. Then came the settler, and gradually this stock interest was crowded across the Mississippi River to the plains of Iowa and Kansas and Nebraska; gradually it assisted in pushing the Indian back, blazing the trail, and paving the way for settlement, and then the settler moved a little farther west, and thus the settler has been pushing the large range man until he has to-day pushed him up against the Rocky Mountains, with his back thereto, and every wise man and every man of reasonable observation in this country has concluded that the day of the great open range, of stock interests caring not for winter's losses, is a thing substantially of the silent past. The time has arrived when the individual who seeks to keep stock on the public range in the summer must, of necessity, make provision for their care in the winter. This may not be true in all cases, but it ought to be true in all cases, because I tell you, gentlemen, that as a matter of common humanity I question any man's right to send stock out to starve to death on the public range. [Applause.]

Now, after in the neighborhood of fifty years of trial, in a season of unexampled prosperity, when the country is being rapidly settled up, when the last day of the great stock herder has about arrived, some men, honest as the day is long—not in the West to any extent, but men who have reached, by theorizing, certain conclusions—believe that we have been working on the wrong tack; that this development which has occurred would have been a better development if certain additions to the land laws had been prescribed in the beginning. But they proceed upon the theory that it is never too late to do better, and therefore there will come before this convention for consideration the question of whether the lands of the United States in the open common in the respective States shall be made a source of profit to the Federal Government by requiring the people whose stock ranges thereon to take out permits for the privilege or whether the system of leasing will be employed. From the beginning this open common has been the people's common. This convention will be called upon to determine whether, in the light of all our experience and in the presence of existing conditions, it is better to change the policy of the last half or three-quarters of a century and begin the leasing or the permit system with reference to the public grazing lands.

Another question of more than passing moment must be considered in that relation, and that involves a question of law.

Where a military reservation exists in a State, or where the Federal Government desires to erect a building for its public purposes, the State cedes jurisdiction to the United States over the military reservation or the public-building site. Only by the cession can the Federal Government obtain such jurisdiction. As to the public lands in the open common, the Federal Government, as a landowner, has just as strong a right, and no stronger, than any private individual. [Applause.] A private individual owning land out on the hills here anywhere may fence that land and rent it out, or he may rent it out to some one else to be fenced; but if that constitutes a part of the public range, and he engages in the work of driving stock off their accustomed range, he is subject to the pains and penalties of the state law, and the question is, Can he defend himself by saying he is an employee of the United States and therefore not amenable to the local jurisdiction? That is a legal question which will come up in this connection.

Now, I understand that the question has been avoided up to this time; but it is needless to establish any policy upon evasion or avoidance. [Applause.] Without venturing any opinion upon the legal question involved or, from this platform, any opinion with reference to the wisdom or unwisdom of taking permits or taking leases, it will be a matter for this convention to determine—the position to be taken by the representatives of the States here assembled upon these and other equally important questions.

We have with us representatives of the Federal Government having to do with the administration of the laws; we have with us representatives of the Federal Government who hold deep-seated and strong convictions upon these public-land questions. I for one, and I think you all, heartily greet a man of convictions, whatever his convictions may be. I like to meet him. We are here for the fullest and freest

possible expression of opinion. It is by the honest, candid, and fearless statement of a man's convictions, whatsoever they may be, that the truth is finally evolved from a discussion. It is a great pleasure for me to be able in your presence to disabuse the minds of the members of this convention, and of such of the public as may take note with interest of the suggestion made some time ago and rather widely scattered, that it was the purpose of the President of the United States to send to this convention a sufficient number of officers to herd it and control its actions, which is without any foundation in fact whatever. Some ten days ago I called upon the President and had an open, free, and plain talk with him in the presence of his distinguished Secretary of the Interior and Commissioner of the General Land Office. Then and there the President, the Secretary, and the commissioner said they held this convention in great respect, and that these officers would come here not as the proposed dictators or masters of this convention, but as the selected servants of the people, to obtain information and give such information as they have. [Applause.]

There are some of us here who will be called upon in the National Congress to deal with these questions later. Whether we represent States or districts, we will profit by what we say and by what we do on this occasion. Let every man speak freely; let him speak fearlessly. I heard this morning of a man who said he did not want to be put upon a committee because he had stock running on a forest reservation, and if he took a position adverse to that of the forestry interests his stock would be put off.

A DELEGATE. That is true.

Senator CARTER. Well, now, I know that I speak for Mr. Pinchot when I say this—that if the people of the country have any complaints to make along these lines, this is the time to present them. [Applause and cheers.] I never want to live to see the day when an American citizen is abridged in any right he possesses because he honestly expresses his views on public affairs. [Applause.] I do not believe that there is aught in that suggestion, and yet the gentlemen around me say it is true. Let me tell you how far and how it may be true. Here and there a superserviceable agent, a forest ranger, or some one trying to assist and not knowing how, will tell the delegate that "You had better go down there and be good." That forest supervisor is your servant. You pay him. It is your Government that employs him. He has no power save what he obtains through the law, and he is just as clearly amenable to the law as the humblest citizen of the country. I thought that in view of these suggestions it behooved me here and now to prick that bubble, to explode this bugaboo under which men feel that they dare not say just what they think. Let us have this a free, open experience meeting. I am sure that Mr. Pinchot will, from this platform, tell you to report the name of any man who has used any threat or means of coercion whatever, and that that man will be dismissed from the service of the United States, as he ought to be.

Mr. PINCHOT. Right you are.

Senator CARTER. Now, we have reached an understanding on that point, and I want to say to my friend, whoever he is—I have forgotten his name, and I don't know that I ever heard it, as a matter of fact—that he can go on the committee if his delegation will put him there.

Passing that, which I throw out as a guaranty of the right of free discussion here, we owe it to the convention, we owe it to the people represented here, as your worthy governor so aptly suggested, that we exclude absolutely and without any sort of equivocation or evasion, partisan politics from the deliberations of this convention. [Great applause.] The President of the United States, my personal friend and your friend, the friend of every honest man in this country [applause], has his convictions about these questions, and I wish he were here, because he would add to the interest of the convention and contribute much to the wisdom of the discourse.

I was very much gratified to observe in the Jamestown speech made by the President recently that his chief adviser on public-land laws and questions was Mr. Pinchot, and we have the good fortune to have Mr. Pinchot with us to-day, so that since we can not have the advised we have the adviser. [Laughter and great applause.] Mr. Pinchot is a man of honest, deep, and abiding convictions. He looks to the welfare of this western country, and from his view point it would prosper more and prosper faster if his views were adopted. Now, you men of experience, you men who have battled with the frosts and the winds and the floods and the trials and the troubles of this frontier for a generation, can cross-examine Mr. Pinchot concerning his views. I am sure he will enjoy it, and he will not lose his temper; and if you will put the questions fast and furious, as I know you will, we will have a mighty good time here during this convention.

Having reached a somewhat brief outline of the subjects to be considered, and the basis upon which the discussion is to be conducted, having reached an understanding as to where the Senators and Representatives in Congress here present stand in this convention—to gain information, to gain wisdom, to equip themselves the better to discharge their duties—having reached the understanding that the executive officers of the Government, with the distinguished Secretary of the Interior at their head, are here to aid and assist in this work, and that free and open discussion is the order of the hour, we reach this final conclusion—and mark well what I say: Whatsoever this convention may determine after due deliberation to be wise and patriotic and expedient will be crystallized into law, if you direct new law, and will be petrified into inaction if you direct inaction. This is a Government of the people, not in rounded phrase or platitude, but in truth and in fact. The people of the East have confidence in the men of the West. The men who cast their lot with a State and elect to live there are the proper persons to control the destiny of that State. [Applause.] When a man does not think enough of Colorado to come here and live, he has no right to a voice in the conduct of your municipal affairs. [Applause.]

But these propositions will be discussed further. I thank you most heartily for your patient and respectful consideration, and announce, as the next order of business, the selection of a temporary secretary. What is the pleasure of the convention in that regard?

Mr. TELLER. Mr. President, I also ask permission to have printed as a part of my remarks an extract from a speech made by the Senator from Wyoming [Mr. CLARK] before the same convention.

The PRESIDING OFFICER. Without objection, permission is granted.

The matter referred to is as follows:

Senator CLARK. Now, having control of what might be an immense fund, having control of a magnificent commonwealth of land, it was magnificent to make some showing as to the value of that land, as to the funds that might reasonably be expected to arise from its administration; so the honorable Forester proceeds to capitalize the proposition. And this is from the record presented by Senator FLINT, of California, who was at that time presenting in a favorable manner the needs and the wants and purposes of the Forestry Bureau. So I say I can assume, I think, and that it will not be a violent assumption, that this tabulation was made by that bureau.

The report reads:

PRESENT CAPITALIZED VALUE OF THE FOREST RESERVES (127,078,658 ACRES, NOVEMBER 27, 1906).

1. Stumpage value of 330,000,000 feet of timber, at $2 per M	$660,000,000
2. 110,000,000 acres, capable of producing commercial forest, at $1 per acre	110,000,000
3. 110,000,000 acres of range for grazing live stock, at 1½ cents per acre (capitalized at 5 per cent)	30,000,000
4. 83,000,000 acre-feet of water for irrigation purposes, at 10 cents per acre-foot (capitalized at 5 per cent)	166,000,000
5. 3,000,000 horsepower, capable of being developed from water in reserves, at $10 per horsepower (capitalized at 5 per cent)	600,000,000
6. Estimated value of occupancy and use of reserve land, products, and resources additional to the above	5,000,000
7. Permanent improvements now on the reserves (roads, trails, cabins, telephones, etc.)	5,000,000
Total	1,576,000,000
Less 10 per cent for private holdings	157,600,000
	1,418,400,000

If that first item does not mean that there is a commercial asset that could be capitalized and pay 5 per cent on the investment, what under heaven's name does it mean?

Now, in view of the statement that has been made here to-day and at other times during this convention, that there never had been a purpose to interfere with or to sell the irrigating waters from these forest reserves, I want to read to you the fourth part of this estimate:

"Fourth. Eighty-three million acre-feet of water for irrigation purposes, at 10 cents per acre-foot, capitalized at 5 per cent, $166,000,000."

What does the Forestry Service capitalize it for unless they wish to derive revenue from it? Did the Forestry Service when they presented that report to Congress have the intention they express now—to impound the irrigating waters of these sovereign States that occur upon these forest reservations?

Now, we will go a little further:

"Three billion horsepower, capable of being developed from water in reserves, at $10 per horsepower, capitalized at 5 per cent, $600,000,000."

And they are right at your doors, and mine.

Mr. TELLER. Mr. President, on yesterday the senior Senator from Minnesota [Mr. NELSON] made a statement which I tried to interrupt. He was not, however, willing to hear me, and I suggested that if the Senator would keep within the record I would not need to interrupt him. He proceeded immediately to tell the Senate that he had been in Montana, and that he had seen in that State hills which had been stripped and denuded by men who had committed crimes against the Government of the United States.

I think I have some knowledge of the law on this subject. I myself drafted the act of 1878 and procured its passage through this body. That was an act which allowed the people of the West to do what they had been doing for a great many years without any law, namely, to cut timber on the public domain for the use of the mining camps of the country. I want to say to the Senator from Minnesota—he is not here, but possibly he may hear of it in some way—that every stick of timber on the hills at Butte was cut under the provisions of that law.

There are hills in the neighborhood from which I come where the timber has been cut off and the stumps have been dug up for fuel. I speak of that now, because we are told repeatedly that we have been wasting the timber on the public lands.

I am one of the men in the Senate—there are a few others—who know what it costs to open up a new State. In 1861 I went to Colorado, and I have made it my home ever since. When I went there, I suppose there were probably not more than 25,000 white people in the Territory. It was a Territory organized by an act of Congress in February, 1861, but the territorial government was not put into operation until the fall of 1861. I found there practically nothing but a mining population, because agriculture had not begun. Most of the people had been there but two or three years, the first settlement having been made in 1858, and the first important settlement in the spring of 1859. I presume I should not exaggerate if I should say that every nation on the face of the earth was represented in that population, although the great mass were American citizens. They were without any organized government, without any national authority, but, impelled by the instincts of the Anglo-Saxon race, they had organized themselves into communities and established what they called "mining districts." The mining districts contained perhaps from two or three hundred each to two or three thousand people. They organized; they chose judges; they elected presidents of the districts; and sometimes, though rarely, a board. They enacted laws, just as the old Greeks enacted them, in a general assembly.

They put those laws in force and obeyed them with as much loyalty as the people of any part of the United States obey their national or state laws. While the laws were made in mass

meeting, they were adapted to the condition of the country at the time, and subsequently, as the Senator from Idaho [Mr. BORAH] suggests, they were adopted, or at least recognized, by act of Congress.

In the fall of 1861 the Territory of Colorado was organized. A legislature was elected and we had a governor, who was sent from Washington. The legislature adopted the laws which the people had previously made and the decisions rendered thereunder. We were there without any authority at all under statutory law. There had been no act authorizing mining on the public lands; there had been no law, up to that time, authorizing the cutting of timber on the public lands. Until 1866 Congress, knowing what we were doing, never attempted to interfere with us, but in that year provided for the acquiring of titles to mining land and for the protection of the water rights of those who had appropriated water.

We established laws which had been adopted, I presume, a thousand years before in adjoining territory. I have no doubt that many of the laws enacted by the legislature of New Mexico were the laws that the Spaniards found in existence when they went there in 1540; and I have not the slightest doubt that the laws then in existence had been in operation in that country for a thousand years, for there is plenty of evidence that a semicivilization had existed for that length of time.

It is not easy for me to hear the law-abiding people who went out there and made their homes charged with offenses against the law; charged, because they have been cutting timber and building homes and schoolhouses and churches, with being violators of the law. Not a church was built in the State of Colorado, nor a schoolhouse, that was not built with timber cut on the public land; and that, too, without government permission. We got permission in 1866 to make title to certain lands, but for several years after I went to the Territory a man could not take an acre of the public lands under any law that was in force in the Territory of Colorado, because there were no land offices where entries could be made. The people who wanted to cultivate farms took them on the public land as best they could. The legislature, when it met, passed a law which was but a reenactment of what the people had enacted in the summer of 1861—for that was the commencement of agriculture in Colorado—that a man who wanted to take a piece of land should file his claim in the recorder's office of the State, and should have a right to hold it until somebody showed a better title than his occupation.

In 1876 I came into this body. In 1878 I influenced the passage of an act that is now in force, not recognized, I know, by the department at times, disobeyed by government officials and disregarded; but, Mr. President, it is a part of the law of this land and has never been repealed. I am going to read that law. To do so will take only a moment. I want to put in the RECORD the fact that the men who swept those hills bare of timber returned to the Government of the United States many dollars more than the timber was worth, that they were not robbers of the public wealth, but were acting in accordance with the statute that authorized this to be done. This act was approved June 3, 1878. It provides:

> That all citizens of the United States and other persons, bona fide residents of the State of Colorado, or Nevada, or either of the Territories of New Mexico, Arizona, Utah, Wyoming, Dakota, Idaho, or Montana, and all other mineral districts of the United States, shall be, and are hereby, authorized and permitted to fell and remove, for building, agricultural, mining, or other domestic purposes, any timber or other trees growing or being on the public lands, said lands being mineral, and not subject to entry under existing laws of the United States, except for mineral entry, in either of said States, Territories, or districts of which such citizens or persons may be at the time bona fide residents, subject to such rules and regulations as the Secretary of the Interior may prescribe for the protection of the timber and of the undergrowth growing upon such lands, and for other purposes: *Provided*, The provisions of this act shall not extend to railroad corporations.

This extract contains all I need to read. It is the gist of the act. When I went to Colorado, I went into a mining camp. The hills were covered with green timber. It was the only camp in the State that was producing anything of real value, or, at least, it was the most important camp. The people there did denude the hills of timber; they built a town; they built several churches; and they built them with timber cut from the public land. They burned up timber in their mills in reducing the quartz; they shored their mines with the timber, for without it they could have no mines below the surface at all. As I have said, they did that for many years without interference on the part of the United States, before 1878, when the Government recognized their right to cut timber on the public lands, and it has recognized it ever since.

We hear much of the destruction of the public timber. I want to say here and now—and I can make the assertion good in any place in the world—that there has been no willful destruction of timber in the State of Colorado. The people of Colorado have been more concerned for the preservation of the timber than those outside of the State could possibly be. As I said a little while ago, so scarce became timber in my neighborhood that the very stumps were dug up and used for domestic and milling purposes.

I want to say a word or two about the people who cut off this timber. The Senator from Minnesota seemed to think that they were the lordly barons and the great mining companies. Fortunately, in the camp of which I speak there were no lordly miners. They were the common American farmer, the common American farmer's son, and the common American mechanic who had gone out there. Many of them did not at first know how to mine, but they learned, and they became the best miners in the country. The wood was cut, not by corporations, but by individuals. A man who had a team, perhaps of two horses or two mules or two yoke of oxen, would go out on the public domain and cut timber and haul it into town.

Sometimes those more provident cut timber and piled it up, because it was more valuable when it was dry than when green. I have seen these men day after day hauling their wood into town and selling it to the mining men and for domestic use in the town. They did not think, and I did not think then, and I do not think now, that they were committing a crime against the Government. I did not think they were depredators. I knew they were not. I knew that the timber they cut was for some useful purpose. Common pine wood in that camp sold as high as $12 a cord. And why should it not? We had no agriculture in the country. We had on the plains a few places where grass could be cut. That grass sold in Central City, the camp of which I am speaking, at from $50 to $200 a ton, and there was not enough grass on those hills to keep the mules and horses and cattle which were hauling in the timber, so that the men selling timber to the miners and mill men had to buy feed for their stock.

Mr. President, we have made some return for this depredation on the timber. We have built up a civilization not inferior to any other civilization on the American Continent or on the face of the earth. These hardy miners and these few scattered ranchmen, when the legislature met, sent their representatives to it and enacted suitable and proper laws for the government of the people of that country and established a school system that has never been excelled in usefulness by any school system ever established on the American Continent. When they had nothing but the personal property upon which to levy taxes, they declared for a free-school law and for the building of schoolhouses, and that act is substantially what it was in 1861. We have built schoolhouses and churches, and no man in the State of Colorado has ever paid a dime for the education of his children in the public schools except what he paid in the general way of taxes. There never has been a race bill in the State, and the schools, as I said, have been open to black men and white men and red men alike. There has never been a segregation of any class of pupils—Chinamen, Japanese, negroes, Indians, or anybody else—and to-day the wildest Indian can walk into one of our schools if he so desires and become a student, and he is not required to pay a single sou for the privilege.

That could not have been done if Mr. Pinchot's system of managing the forests had existed. That country would still be the home of the coyote and the panther and the bear. Much as the Senator from Iowa, who sits before me, may consider the value of this system, I know that it is not adapted to an American population, and it would have prevented absolutely the settlement of that country, and that it would have been a hindrance to its development for many years since. And it is now destroying the prospects of the State for settlement in the future.

Colorado is essentially a mining State. Its principal value for many years was the product of the mines—gold and silver. To-day we produce agricultural products of greater aggregate value than are all our precious metals combined. The Senator from Minnesota [Mr. NELSON] yesterday grew very earnest about the conservation of all the water rights in the country. Nobody appreciates the value of the water rights more than the people of my State, and no people have a higher sense of the value of water than they, because without it practical agriculture is impossible.

But when we organized the State we declared that the water of the State—as the Supreme Court had for a hundred times declared—belonged to the State, and we declared that the State should take control of the water and nobody should get any title to the water of the State; and to-day no man living can get any title interest in the water. He can get the right to

transport it and use it, but it belongs to the State. It is not possible that there will ever be in the State of Colorado any monopoly of water. We do not need the assistance of Congress or the assistance of our sister States to protect our interests in our water.

The Senator yesterday spoke of the great expense the National Government has gone to in the Reclamation Service. It is several years since the reclamation-service act became a law. I do not remember exactly, but it must be six or seven years, and up to this hour the General Government has never put a drop of water upon a foot of Colorado land—not one single drop. There is not to-day, with all its expenditure, a canal or a ditch or a reservoir which is fit for use, and when any shall be fit for use, there will be charged against the landowner who uses it more than the land will be worth; in the outsettlements certainly more than it is worth.

In the last five years the farmers of Colorado have put under water 500,000 acres of what had been public domain, but which has since entered into private ownership, and the community lying right north of Denver have expended in five years not less than $2,000,000 on reservoirs alone.

Mr. President, we do not need the fostering and kindly hand of the National Government. We want its hand taken off. I have said on this floor, and I want to repeat it, that the forest reserves in Colorado have been an unmitigated curse, and not a blessing. There is more timber to-day being cut than ever was cut at any other time in the State's history. There are more sawmills running in the forest reserves than there were running in the same area before they were made forest reserves. There is more timber being sold from the forest reserves than was being sold there before they were made into forest reserves. They tell you that they pick out the ripe tree. They send people out there who do not know a pine from an oak. They send people there who, I venture to say, never knew the difference between a spruce and a fir, and they come out and tell us what we ought to do.

Mr. President, there is no prejudice against a forest reservation as a reservation. Our prejudice is against the assumption on the part of the people who represent the administration here that every man who wants to make a home on a forest reserve is an intruder and an invader.

The Senator from Idaho [Mr. HEYBURN] said the other day that all the forest reserves in his State were habitable. I do not mean to say that all of the land in forest reserves in Colorado is habitable, but I do mean to say that there are thousands and tens of thousands of acres withdrawn from public occupation and public use that would make good homes for American citizens. We have a climate unsurpassed, I believe, on the American Continent. Much of our country is south of the latitude of the capital here. The little valleys in the mountains are warm and comfortable in the winter. Cattle can live on the hills and get their living without any artificial feed, and the hills are susceptible of cultivation. We can raise potatoes in the Rocky Mountains at least 10,000 feet above the sea. I have seen a small farm with potatoes on it above the town of Central, and I know that the crop paid the farmer who planted them $10,000 in one year.

Land of that kind, capable of such production, makes a good home for an American who is willing to work. Under your law now, and under the regulations of this aristocratic bureau which is aping the conditions in Europe, lands that are susceptible of cultivation and occupation are withdrawn from public use. Not only that, but they have the audacity to say that water running through a reservation belongs to the reservation and the Government of the United States has control of it; and that, too, in face of the decisions of the Supreme Court of the United States. On that point there never has been an adverse report. The water in a State belongs to the State.

Mr. DOLLIVER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Iowa?

Mr. DOLLIVER. Will the Senator permit a question?

Mr. TELLER. I will permit a question.

Mr. DOLLIVER. Is it not true that nearly 250,000 acres of agricultural lands within the forest reserves have been opened to homestead settlement within the past year, and that one of the reasons why the Forester desires more money is to multiply the number of these allotments and settlements, so that he may have within the reservation a large number of bona fide homestead settlers to form a part of the fire protection of the reserves?

Mr. TELLER. I have not looked to see how many acres there are; but if the Senator's figures are correct, they are not significant. Two hundred and fifty thousand acres are but an infinitesimal part of the great domain of the reserves. This I know, and I assert it here, and I am responsible to the people of my State and of the country for the assertion, that every effort has been made by the Department of Forestry to keep settlers off the reservations, and on every reservation you can find stuck up somewhere a notice where the settler may observe it, "This is a forest reserve; this is reserved from settlement;" and you can not to-day make a settlement in that country where you do not have to go to a forest ranger and get his permission. There have come to my own knowledge a number of cases in which a settler having gone into a forest reserve has made his application as he ought to do under the law and has been rejected because the forest people fought him in the Land Office, and they have moved him bodily off the land. I can substantiate this statement. I have complained of it to the department, and the officials there have said again and again and again that the rangers did not have the authority. I know the policy is not to permit settlement in a reservation, and few men will settle in a reservation. They can not have schools. They can not have churches. They can not have neighbors, and unless they know that other men are going there they are not going into a reservation, even if the good will on the part of the department, which I deny, wants to let them in.

Mr. DOLLIVER. But, if the Senator will permit me, the department in its estimates and in its requests before the committees of the two Houses is now begging Congress for more money——

Mr. TELLER. Oh, yes.

Mr. DOLLIVER. To enable it to double the number of homesteads over the past year.

Mr. TELLER. They do not pay any of this money for homesteads, and the Senator knows that.

Mr. DOLLIVER. On the contrary, more than 6,000 examinations were made last year.

Mr. TELLER. Oh, examinations!

Mr. DOLLIVER. Six thousand two hundred and forty-nine; and they want to multiply the number.

Mr. TELLER. I know they make the examinations, and I know that only few of the examinations are ever accepted.

Mr. DOLLIVER. Four thousand settlers actually were accepted last year.

Mr. TELLER. There would have been 25,000 if there had been the same open settlement that there was in 1885 and 1886 and 1887. What is true of my section of the country is true of others.

The pretense for this interference is a bald one; that they are encouraging settlement is untrue. Why should they encourage settlers inside of a forest reserve? Consistently, they could not do so. They make regulations, and any man who reads them must know they are intended to keep out the settler. Otherwise they would not have made them. You can not show me a line in any of their regulations that encourages settlement.

Mr. DOLLIVER. There is a line in the regulations giving homestead settlers the free use of the forests.

Mr. TELLER. Oh, Mr. President, they have said that they give the homesteader $20 worth of timber, or something like that. Heretofore the settler who went there had for his pasture all the United States land that was unoccupied and all the timber he wanted. That was the law from the very first. You settled Ohio and Indiana in that way; you settled every other portion in the United States in that way; and it is only within the last twenty years that you have denied to the American citizen the right to pasture his cattle and cut timber on the public land. You had no law to prevent the cutting of timber on public land in the State of Ohio. You had a law that prevented the shipping of timber, but it never was applied to the State of Ohio or the State of Indiana or the southern part of the State of Illinois, which was a timber country.

Mr. President, I would not be on this floor speaking now if the department had not filled the mails with misstatements of what it was doing and was willing to do—statements which the officials never could make good and did not and do not intend to make good. You have been devoting a great lot of money to making roads. It is the right of every State to make roads over the public lands, and it has been for the last fifty years. Judge McLean, of the Supreme Court of the United States, decided, in 1852, that the State had an unquestioned right to lay out its roads across the public lands. But in 1866, in the act to which I called attention, there was a distinct statement that the State might make roads on the public land.

The State of Colorado is able to make its own roads. It has asserted the right to make them, and the Forestry Service has denied to our State that right. Not long ago, perhaps a year or so, the district attorney of one of the western counties

of Colorado sent me a notice from the Forestry Department. They were building a road—not through the timber, for there was not a stick of timber that anybody knew of within several miles, but the land had been included in a forest reserve. It was a prairie. They had been notified by the forest rangers that they must give a bond that they would not disturb the forest reserve.

The commissioners gave a county bond. Then they got a letter from the department saying that that was not sufficient; that they must give an individual bond. He sent it to me, and asked, "What shall we do?" I said, "Go on and build your road; the State has a right to build it under the law." The Supreme Court of the United States had so said; Judge McCreary had so said; Judge McLean had so said; and the statutes had so declared. It was not necessary that there should be a statute of that kind. The right to make roads and highways is a part of the sovereignty of the State. They built the road without any further conflict with the Government, and it is in public use.

Here is a frequent occurrence. I see it very often. A man living near a reservation, not on it, had about 25 or 30 horses which he desired to drive to some other section of the country, and he drove them across the forest reserve without stopping them on a public highway, and the forest authorities had him arrested, because the regulations declared that he should not drive any stock across without their consent.

That man happened to be a meek soul. He did not want trouble, and perhaps wanted some favor from the forest ranger in the way of allowing his cattle to graze on the range, so he paid the $25 penalty. I do not know where the money went. I do not know whether that is a part of the fund the friends of this measure are talking about which is to make this scheme of yours profitable. I presume it is true that the Government collected $1,800,000 last year out of the forest reserves. From whom did they collect? It was a tax upon the mining industry or upon the cattle industry. In my State it was mostly derived from selling timber to miners, for they do not sell much lumber in Colorado. We buy our lumber in Washington, Oregon, and Texas, and occasionally some in Georgia; but we must have timber in the mines, and we are at the mercy of the ranger and pay whatever he says. We must where we have not a piece of timber outside of the reservation.

Mr. President, any mining man knows you must have braces in your mine; you must have what they call "lagging" to protect the miner from what may fall from above; and when they say to you that they sell only the ripe timber, I want to say I know better. I know they cut timber that is not more than 4 inches through and sell it to the miners.

I am not complaining that they sell it, because the miner could not well work without it. I am complaining that they do not tell the truth when they say they confine their cutting to ripe timber.

Mr. President, a year ago last fall Mr. Pinchot came before a committee of which I am a member, and I put to him a question: "How much of the public land that you have reserved is prairie land without timber?" He said he could not say exactly how much. I said, "Is not one-third of it, at least, without timber?" He replied that he thought probably it was, but he said he proposed to raise timber on that one-third.

Mr. President, they have been raising timber ever since this system was adopted. Yet I can find a hundred farms in Colorado that have more timber on them that the farmer has raised than has ever been planted by this service in the State of Colorado. They did start a farm up near Pikes Peak, 10,000 feet above the sea, and there they were going to have an experimental farm to raise pine and spruce. Every tree they put out died, and last year I believe they abandoned the experiment.

I addressed a letter to the head of the bureau to find out where his plantations of trees were. I have never gotten an answer to it, and I never will. They have not got them, Mr. President. People talk arout raising pine or spruce in a generation. It can not be done. It takes ages to do it. In 1859 there was burned over a section of country with which I am perfectly familiar, having lived near it for fifteen years.

The timber fell down ultimately, and was drawn into the mining camp and used. After three or four years young trees began to come up, and although it is now almost fifty years since the fire, there is not a stick in it, I suppose, big enough to make a lagging pole—a lagging pole probably about 6 inches through—from 4 to 6.

Mr. President, I know, because I went to look at this very piece of ground last year when I was at home. I know that in fifty years it has made nothing but a green shade. There is no tree, I will venture to say, 50 feet high in the whole lot. If any man going from Denver to Central City will look out, he will see on the side of the hill the trees that I have seen there since 1860. They are not taller than an ordinary man to-day.

You can raise some kind of trees in Colorado. You can raise cottonwood trees, and you can get a big tree in twenty or twenty-five years, but what is the value of it? It is not good for anything. The effort has not been made to raise cottonwood trees, but to raise pine and spruce and what we sometimes call "hemlock," but which is a species of spruce.

Mr. President, I do not care to prolong this debate unreasonably. I simply wish to close by referring to the people of the western country, and particularly of my State, composed as they are of the best element of American society. There are thousands and thousands from the State in which I was born and educated, the State of New York, and New England is well represented in Colorado. It is that class of people who have made the State great and strong. We have produced silver and gold since the State was organized to the value of more than $2,000,000,000. But what is better, Mr. President, we have built up a civilization and established a class of citizens who are as good as those in any portion of the world. I have said again and again, and I want to repeat it here before I leave the Senate, I will guarantee that in the city of Denver, with its 200,000 people, you will find more college men and college women than you can find in any eastern city of the same population. They are not wild men of the West or of the plains; they are cultivated, educated people. There are more alumni of more colleges in Denver than in any other city of the size in the United States. All the great institutions are represented by their graduates and by their professors. We have in the confines of the State two as good colleges as can be boasted of on the American Continent. They are not as old, but they are as good. We have a school of mines that can not be beaten in the world, and we have sent out graduates who have covered the earth with their efforts, and everywhere they have gone, to Africa, to Mexico, Central America, and to South America, they have been a success.

Mr. President, what I say of Colorado I will say of Idaho, younger in years; I will say of Montana, also younger in years. They have not had the same number of years in which to do the work that we have done, and yet they are doing the same identical work. I do not think the sacrifice of trees for useful purposes can be set against the advance of our civilization. I would rather have an American home, with an American family, than to have a forest as big as all out of doors. I believe that the natural wealth of this country belongs to the people who go and subdue it. I do not believe that there is either a moral or any other claim upon me to postpone the use of what nature has given me, so that the next generation or generations yet unborn may have an opportunity to get what I myself ought to get.

We have had a congress assembled to conserve the great wealth of this country. I want to say a word or two about that congress. They published the other day a statement that in a few years all the coal would be gone and that in a few years all the timber would be gone, and then they wondered what we were going to do for a living. Mr. President, there is coal enough in Colorado to supply the world for the next one hundred and fifty or two hundred years. Nobody knows how much there is there yet, but we do know there is enough for that length of time. I believe in the State of Wyoming somebody made a calculation that at the rate the coal there was being mined it would taken two thousand five hundred years to exhaust the coal of that State.

Now, sir, this forest-reserve business is so closely connected with the public land that it is very difficult to discuss one without discussing the other.

Mr. BAILEY. If the Senator will allow me, I have seen a statement that the Government of the United States is operating sawmills and selling lumber in the State of Colorado. I should like to ask the Senator from that State if he knows whether that is true.

Mr. TELLER. I think the Government operates the sawmills in this way: They give a man permission to go and cut the timber, and he turns over to them a part of the lumber, and then they sell it to any one who will buy. That, I think, the department will not deny. I am not certain that they actually run a sawmill. I know they take charge of the sawmills and direct how they shall be run, but I do not know that they own them.

Mr. WARREN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Wyoming?

Mr. TELLER. Certainly.

Mr. WARREN. I am without exact information on that point. I know of no such proceeding, and I should be glad to have the Senator state, if he knows, where we would find that information, if such exists.

Mr. TELLER. What information?

Mr. WARREN. That the Government is selling lumber; that is to say, sawed lumber?

Mr. TELLER. I do not know that they sell the lumber if the man is able to pay for it; but I know if he is not they take the lumber sometimes instead of the money for the timber.

Mr. WARREN. I understand they are continually selling stumpage.

Mr. TELLER. They are continually selling timber; round timber, poles, logs, and braces for mines—that they certainly are selling. I have been buying it of them myself.

Mr. WARREN. The Senator is not certain about the matter of running sawmills or selling timber?

Mr. TELLER. I do not know that they absolutely run sawmills.

Mr. SMOOT. I do not want to interfere with the Senator at all; but the regulations require and the department always requires that timber sold by the Government must be paid in cash in advance, and the Government never does take lumber as payment for stumpage.

Mr. BAILEY. When the Senator says the Government as now administered never does anything, he makes a very broad and a rather dangerous assertion.

Mr. SMOOT. I am perfectly willing to stand on the statement I have made in relation to the sale of timber anywhere in the United States.

Mr. BAILEY. In other words, they sell it by wholesale and not by retail. That is some abatement of the nuisance, I will grant you; but to see the Government of the United States in the business of selling anything, and still the Government of the United States trying to extend the area in which they are to produce this thing which they are constantly selling, seems to me an approach toward socialism that is not exactly satisfactory to me.

Mr. SMOOT. I do not want to interrupt the Senator from Colorado further, because he told me he would rather have his speech go along regularly without interruption.

Mr. TELLER. Mr. President, I know it is not very pleasant to complain, and yet I think it is my duty to complain. Colorado has about 66,000,000 acres of land. A good deal of it is mountain land. A good deal of it has very little value except to hold the rest of the country together, I guess. [Laughter.] But I will venture to say that a majority of the land inside of a forest reserve would be the private property of a citizen of the State of Colorado if it had not been taken for forestry purposes. Perhaps it would not now be, but in due time it would have been the property of a citizen of the State and subject to taxation. It is not worth while for them to include in forest reserves the bare tops of the mountains. I do not think they always do so. Perhaps they do, but they have 16,000,000 acres in round numbers now in various reserves in the State. That is more than one-fourth of the State withdrawn from taxation, and all possible taxation in the future.

When the State was admitted we put in a provision, because the Government demanded it, that we would not interfere with the sale of the public lands and we would not tax the public lands. What was the policy of the Government then? The Supreme Court had said, and said on several occasions, the Government of the United States held this land not as a sovereign but as a proprietor. It has repeated it over and over again, and no good lawyer will deny it. No good lawyer will claim for a moment that the Government by its sovereignty holds an acre of land. It holds it as the proprietor and with the same obligations of any other proprietor. Judge Sawyer, of the ninth circuit, and Judge Fields, then of the ninth circuit and afterwards of the Supreme Bench, declared over and over again that but for that stipulation in the California constitution they would have taxed the land of the State.

In the case of Woodruff *v.* North Bloomfield Gravel Mining Company (18 Fed. Rep., p. 772) I find the following:

> Upon the cession of California by Mexico, the sovereignty and the proprietorship of all the lands within its borders, in which no private interest had vested, passed to the United States. Upon the admission of California into the Union, upon an equal footing with the original States, the sovereignty for all internal municipal purposes, and for all purposes except such purposes and with such powers as are expressly conferred upon the National Government by the Constitution of the United States, passed to the State of California. Thenceforth, the only interest of the United States in the public lands was that of a proprietor, like that of any other proprietor, except that the State, under the express terms upon which it was admitted, could pass no laws to interfere with their primary disposal, and they were not subject to taxation. In all other respects the United States stood upon the same footing as private owners of land. They could authorize no invasion of private property, either to enable their grantees to mine the lands purchased by them of the Government, or otherwise.

Mr. President, we were entitled to suppose that that land would become the property of private individuals and pay taxes. Land that ought to be in private ownership has been taken out of the possibility of paying taxes.

What is more, the Government of the United States gave us when we became a State two sections in every township, 16 and 36, for school purposes. In the State of Colorado we practically own those sections to-day. They have been made by this forest system absolutely valueless. You could not sell one of them inside of a forest reserve for 5 cents an acre, unless it be to somebody who could take off the timber. We deny the right of a State to either control the timber or the land inside of a forest reserve.

Mr. President, that is a hardship upon the State; it is an invasion of the rights of the State; and the time will come when either they will have to pay taxes on these forest reserves or they will have to open them to the settlement laws of the country.

In 1873 we passed a law here which provided that any man who would go on land returned as coal land might take a quarter section of the land by complying with the law and paying $10 an acre, if it was a certain distance from the railroad, and $20 an acre if it was 10 miles nearer. That law has been suspended by the President of the United States. It has been set aside. You can not buy an acre of coal land in the State of Colorado for less than $25 an acre, no matter how far it is from a railroad, and some of the land is, I am told, held at $100 and $150 an acre, notwithstanding the law. What right have they to do that, Mr. President? What right has the President to reserve from the operation of law these great bodies of land that would enter into private ownership?

They tell you that all the coal lands will be appropriated. The President, in a message, declared to us that the agricultural land was largely being held by big corporations and companies, or words to that effect.

The last census shows that the farms of this country are not as big as they were in 1850. Anybody who will take the Statistical Abstract and study it will find that there has been a great deal of reduction of the acreage of farms since 1850. There have been some exceptions, but the average in the United States is very large.

Colorado has farms which, perhaps, are a little larger than those of some of the Eastern States. Idaho and Wyoming have large farms, growing out of the fact that great railroad grants were made in the western country and the grants were sold largely to people who wanted large tracts of land.

I have here a little memorandum of some things I made that I want to put in in connection with my remarks.

The VICE-PRESIDENT. Without objection, permission is granted.

Mr. TELLER. I have also the statistics relating to the production of gold and silver and the production of coal.

I saw in the remarkable statement that was sent out by the congress for the conservation of the great natural interests that a very large percentage of the coal being mined now was being lost. That simply is a fiction. Why should a man mining coal waste it? He must have a market for it. He mines it for the market and he gets a market. You might just as well say that a large amount of gold and silver is wasted.

Now, Mr. President, I want to call attention to the fact that the State of Colorado alone has produced in the last six years $151,733,600 in gold and $51,018,624 of silver at its commercial value—not its mining value, but at its commercial value. That makes an output of the precious metals of $202,752,224. This production can not be accomplished without some destruction of forests and of coal. But would you close up the mines of Colorado? This is not a question which interests alone the State of Colorado.

There are 700,000 people in the State now, and they are the greatest consumers per capita, probably, of the continent. I do not suppose there is another 700,000 of population anywhere that consumes per capita as much as the people of Colorado, simply because we have been out in that country where everything was high, and when prices fell they felt that they could indulge not in simple necessities, but in luxuries. I saw for years in that country 150 pounds of flour sold for $30 in cash. I saw 100 pounds sold for $80, not once or twice, but for months and months and years. When flour fell, when things got cheaper, they indulged in those things as they would not, perhaps, have done when they were so very high. But it is a well-known fact that a miner, and especially a precious-metal miner,

is the most extravagant person in the whole country everywhere. He spends more money than any other person, because he gets more in proportion for his labor.

We are also a coal-mining country. There are some large coal mines in Colorado, but there are thousands and thousands and tens of thousands of acres of just as good coal still lying in the ground ready to be developed whenever the Government will take its hand off and let it be sold as the law requires. No man is going to pay $50 an acre for coal land if he can avoid doing so. This new system of selling coal land in Colorado has prevented any ordinary man from buying a piece of coal land. When he could buy it at $10 an acre or $16 he would buy it. When he had to pay $25 or $50, he would not buy it because he could not.

Mr. President, I want to insert with my remarks, as an appendix to it, a statement of the lumber production. I could not make it in detail, but if anybody wants to know about the lumber business and will look at the Statistical Abstract, under the head of "Lumber production," he will see that there is a large production of lumber; and yet I challenge any man to show that there is not a piece of lumber ever made that was not accepted and used. There is no such thing as a waste of lumber in this country. Whenever the demand falls beyond the production, then the production falls to the demand.

I want to add that, so far as I am concerned, I should welcome an administration of the forest reserves that would reserve forests and allow at the same time a settlement such as the forest-reserve people declare they have been trying to do.

But I want to assert again here, Mr. President, that I know it is the determined purpose of the forest-reserve people not to have a settlement if they can avoid it, and if they have allowed 4,000 men to go in the forest reserves it was because they could not prevent their doing so.

APPENDIX A.

COAL IN THE UNITED STATES.

Production of coal in the United States from 1902 to 1906, inclusive: Tons, 1,569,879,923; value, $2,304,744,574. (Statistical Abstract, 1907, p. 152.)

GOLD AND SILVER IN THE UNITED STATES.

Production of gold and silver in United States from 1888 to 1907, inclusive: Gold, $1,197,270,899; silver $803,145,880 (commercial value). (Statistical Abstract, 1907, p. 151.)

COAL IN COLORADO.

Production of coal in Colorado from 1902 to 1906, inclusive: Anthracite, tons, 333,762 (Colorado and New Mexico); bituminous, tons, 35,863,657; total, 36,197,419. (Statistical Abstract, 1907, p. 152.)

GOLD AND SILVER IN COLORADO.

Production of gold and silver in Colorado from 1901 to 1906, inclusive: Gold, $151,733,600; silver (commercial value), $51,018,624; total, $202,752,224. (Statistical Abstract, 1907, p. 150.)

APPENDIX B.

LUMBER.

Produced in United States in 1906, 37,550,736 M feet; value, $621,151,388; value of, per M feet, $16.54. (Statistical Abstract, 1907, p. 119.)

SHINGLES.

Production, value of, $24,154,555; value, per M, $2.04. (Statistical Abstract, 1907, p. 118.)

NATIONAL FORESTS.

Area of, November 30, 1907, 159,439,979 acres. (Statistical Abstract, 1907, p. 116.)

IRRIGATION.

Area to be irrigated under approved projects, 1,910,000 acres; estimated cost of same, $70,000,000. (Statistical Abstract, 1907, p. 27.)

Mr. SMOOT. Mr. President, last evening the Senator from Montana [Mr. CARTER] asked that certain information be given him relative to the number of employees now on the national forest reserves and the amount paid to those employees.

There are 142 national forests, with 139 supervisors, 92 clerks, 194 technical men, and 1,174 rangers, or a total of 1,599 employees on the 1st day of January, 1909. The compensation for the year amounts to $1,893,395.

Mr. CARTER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Montana?

Mr. SMOOT. Certainly.

Mr. CARTER. I understand the Senator to say that 1,599 of the employees on the list are engaged in the forests as supervisors or rangers or guards?

Mr. SMOOT. In 142 forest reserves.

Mr. CARTER. Those 1,599 employees receive how much as salaries?

Mr. SMOOT. They receive $1,893,395.

Mr. CARTER. How much do they receive as expenses?

Mr. SMOOT. The Senator did not ask me for that information last evening, or I would have secured it.

Mr. CARTER. I desire to know whether any allowance is made to this class of officers for expenses?

Mr. SMOOT. No allowance whatever, Mr. President, unless they go from one reservation to another, and that is very seldom, indeed.

Mr. CARTER. I desire to ask the Senator the total number of employees and officers connected with the Forestry Service exclusive of these?

Mr. SMOOT. The total number on the 1st of January, 1909, was 2,310, distributed as follows:

In Washington, D. C., a total of 412; in the six district offices created upon that day, namely, January 1, 1909, 209; and, as I said before, 1,599 on the 142 national reserves, making a total in the service of 2,310.

Mr. CARTER. Mr. President, is the Forestry Service in the habit of employing persons temporarily who are not regarded as regular salaried persons, and therefore not included in the 2,310?

Mr. SMOOT. Mr. President, in case of fire on a forest reserve the supervisor of that particular forest would hire additional men, if necessary, for putting out the fire.

Mr. CARTER. In hastily going over the list of employees called "salaried employees" from the lump appropriation and other appropriations following I gather the impression that there are over 3,000 regular employees. That, I find from the Senator's statement, is inaccurate, because the number regularly employed is only 2,310. What number of persons other than those employed to extinguish fires are occasionally employed, or employed at a limited amount per day or month, to make investigations and diffuse knowledge among men?

Mr. SMOOT. So far as the number for diffusing knowledge and for special investigation goes, I am not in a position to say just how many would be employed for a few days during the sickness of regular employees in the office or how many men and women might be temporarily employed.

Mr. CARTER. Can the Senator advise us of the amount in salaries paid to the 412 employees in Washington?

Mr. SMOOT. I asked the Senator last night if he desired that information, and as I understood him, he said "no." It would take very little time to ascertain it; but I did not figure that amount up last evening——

Mr. CARTER. Nor the amount——

Mr. SMOOT. Nor the amount for the six district officers. Of course the Senator knows where they are. They are all located in the West.

Mr. CARTER. Would it be fair to say that the salaries of the other officers than those engaged in forest work would be the difference between the aggregate of the appropriation and $1,800,000 or thereabouts?

Mr. SMOOT. Oh, no; I would not say that, because the aggregate amount of the appropriation carries $600,000 for improvements and some $225,000 for supplies.

Mr. CARTER. Supplies amounting to three hundred and odd thousand dollars; traveling expenses, $307,000, I believe, in the aggregate; and $600,000 for improvements.

Mr. SMOOT. Mr. President, perhaps I had better now give the items to the Senator of the estimated amount of the appropriations for the fiscal year ending June 30, 1909. They are as follows:

Cost of handling timber sales and free use of timber	$394,000
Cost of handling grazing	750,000
Fire patrol	550,000
Permanent improvements	600,000
Examination of agricultural and other claims and applications for special occupancy	492,000
Federal, state, and private cooperation, investigations, and education in forestry	500,000
Supplies	225,000
General administration	385,000
Total appropriation fiscal year 1909	3,896,000

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Oregon?

Mr. SMOOT. Certainly.

Mr. FULTON. May I ask the Senator to restate that item for "handling grazing" or something of that character?

Mr. SMOOT. I should have said for the year ending June 30, 1910.

Mr. WARREN. I want to say here that the statement the Senator has made is for the coming year, and under a larger appropriation by three-quarters of a million dollars than what they had last year.

Mr. SMOOT. That is true.

Mr. WARREN. The Senator from Montana [Mr. CARTER] has been inquiring as to the men who are now employed. The men now employed up to July 1 are under the appropriation of last

year, which was very materially less than the estimates are for this year.

Mr. CARTER. Will the Senator at that point kindly state the aggregate amount of all the appropriations for this service and improvements under the appropriation for the current year?

Mr. WARREN. We can turn to it easily; but, as I recall, it is——

Mr. SMOOT. It is $3,896,000.

Mr. CARTER. What is the amount of the increase between that appropriation and the amount named by the amendment of the committee in this bill?

Mr. SMOOT. One million two hundred and fifty thousand dollars.

Mr. FULTON. Mr. President, I think I really had the floor. The Senator from Utah yielded to me.

The VICE-PRESIDENT. Does the Senator from Utah yield further to the Senator from Oregon?

Mr. SMOOT. I yield to the Senator.

Mr. FULTON. The Senator stated an item of something over $700,000 for "handling grazing"—$750,000, I think.

Mr. SMOOT. Seven hundred and fifty thousand dollars is the estimated amount of the appropriation for that purpose carried by this bill.

Mr. FULTON. I ask the Senator what is the nature of the expense in "handling grazing?" In that connection I will state that there are many forest rangers, I understand, employed all the year round. What additional expense is there in "handling grazing" that could amount to any such extraordinary sum as $750,000?

Mr. SMOOT. Mr. President, that is just exactly what the item consists of. It is for the payment of the rangers and supervisors.

Mr. FULTON. The rangers and supervisors perform other work besides looking after the stock that is grazing; and, indeed, as I understand—in fact, as I know—all stock that is put on the reserves is cared for and herded by the owners; and, as a matter of fact, it seems to me that the additional expense by reason of "handling grazing" should be practically nothing to the Government.

Mr. SMOOT. The fees for grazing amount to more than the expense of handling.

Mr. FULTON. That is true; but that does not authorize unwarranted and unjustifiable expenditures. What items enter into it that makes this amount? So far as the rangers are concerned, they are employed for other purposes.

Mr. WARREN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Wyoming?

Mr. SMOOT. Yes.

Mr. WARREN. I want to make this suggestion: Certain foresters are engaged the year round. In the winter it takes but a few to care for the forests. I am not as familiar with the figures that the Senator from Utah has in his hands as he himself is, for he has recently looked them over; but my impression is that the extra men put on in the spring to serve during the season are charged to the grazing fund. I may be wrong about that, but, whatever may be the case, there are perhaps nearly twice as many men employed during the season which includes the grazing season as are employed in the winter months.

Mr. SMOOT. Further answering the Senator——

Mr. FULTON. The Senator from Wyoming [Mr. WARREN] surely would not charge up to the handling of grazing the salaries of the rangers. The rangers are there to look after the fires.

Mr. SMOOT. This is an approximate statement. It is divided as nearly as it is possible to be divided under the different heads, and takes into consideration the amounts paid for supervisors and rangers, and also for extra work that they may do in handling and cutting timber.

Mr. FULTON. Then, as a matter of fact, it might as well be called something else, and it would then mean just as much.

Mr. SMOOT. That is not altogether true; but no one can tell for the coming year just exactly how many men will be employed in the grazing arrangement; but for this year that is as near an estimate as it is possible to arrive at.

Mr. President, the appropriation of last year amounted to $3,896,200. The bill as reported from the Committee on Agriculture for the coming year amounts to $5,146,200, or a difference, to which I call the attention of the Senator from Montana, of $1,250,000. The expense attending the administration of the national forests for the coming year demands that that amount of money be appropriated over and above the appropriation for last year to take proper care of the national forests.

A year ago there were in the national forests about 142,000,000 acres. To-day there are in those forests 168,000,000 acres; and within a very short time there will be added to that amount 27,256,000 acres more, so that we desire an appropriation for the purpose of caring for 195,000,000 acres of land.

There will be about 1,400 more rangers necessary during the coming year to take proper care of these reserves. They are absolutely necessary if we are to have the use of these forests, and it is for that purpose and for the better patrol of fire and control of the forests that we are asking that the appropriation be increased $1,250,000.

Mr. President, there was considerable said yesterday in relation to the forest reserves sending men from one end of this country to the other lecturing to different organizations.

[At this point Mr. SMOOT yielded to Mr. DIXON, who suggested the lack of a quorum, and the roll was called.]

Mr. SMOOT. Mr. President, as I was stating, an effort was made yesterday to impress this body with the great extravagance of the Forestry Service in sending some of its representatives to deliver lectures to certain associations throughout the country. I took particular pains, Mr. President, last evening to go over this statement, so as to find out just how much money had been paid for this particular part of the work of the Forestry Service, and I find that the total of all items of travel, including lectures, amounted to $5,022.80.

Mr. BORAH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Idaho?

Mr. SMOOT. I do.

Mr. BORAH. The amount which the Senator has stated is perhaps low enough if lectures are going to be delivered; but the question is, Under what law are such lectures delivered and by what authority has the General Government the right to engage in the matter of having lectures delivered over the country?

Mr. SMOOT. Mr. President, in section 520 of the Revised Statutes, the act establishing the Department of Agriculture, we find these words:

> There shall be at the seat of government a Department of Agriculture, the general design and duties of which shall be to acquire and to diffuse among the people of the United States useful information on subjects connected with agriculture, in the most general and comprehensive sense of that word, and to procure, propagate, and distribute among the people new and valuable seeds and plants.

Mr. BORAH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield further to the Senator from Idaho?

Mr. SMOOT. Certainly.

Mr. BORAH. Is that the only law under which they claim the right to deliver these lectures?

Mr. SMOOT. In every recent agricultural appropriation act we find these words:

> To enable the Secretary of Agriculture to experiment and to make and continue investigations and report on forestry, * * * to pay all expenses necessary to protect, administer, and improve the national forests, etc.

Mr. President, that has been the policy of the Government ever since the Agricultural Department was established, and to-day the expense the Government is put to in paying for the dissemination of information among the American people is, I believe, one of the very best investments the Government makes.

Mr. BORAH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield further to the Senator from Idaho?

Mr. SMOOT. I do.

Mr. BORAH. I ask the Senator if he thinks that paying the expenses of some one and also for his time to attend the annual meeting of the American Railway Engineering Association is really connected in any way with protecting the forests either from fire or from the raids of those who would take timber without compensation?

Mr. SMOOT. Mr. President, I believe that it has a direct bearing upon the forests of this country, for through the experiments made by the Department of Agriculture in the preservation of wood by means of creosote, there have been saved to this Nation millions and hundreds of millions of feet of timber, and every foot of timber that is saved and every time there is a new process discovered and information of it is given to the American people to lengthen the life of a tie or any other kind of wood, it is in fact a benefit to the great American people. Therefore, I think that item pointed out by the Senator from Idaho is justified.

Mr. BORAH. Mr. President, does the Senator think that the Government ought to enter upon that expense rather than

those who are particularly interested in the subject of ties, such as the railroad companies and others?

Mr. SMOOT. I say the Forestry Bureau has cooperated with the railway companies in this work, and that is exactly what they did when they sent representatives to the meeting referred to by the Senator from Idaho.

Mr. DIXON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Montana?

Mr. SMOOT. I do.

Mr. DIXON. In answer to the inquiry of the Senator from Idaho [Mr. BORAH] my opinion is that very few Members of the Senate know that every appropriation bill for ten or twelve years has made it mandatory on the Secretary of Agriculture to do the very thing that has been complained of on the floor of the Senate during the past two days. The present agricultural appropriation bill, and every other one for several years back, have contained the express mandatory provision that the Secretary of Agriculture shall "investigate and test American timber and timber trees, and their uses, and methods for the preservative treatment of timber." It is also made his duty—

To collate, digest, report, and illustrate the results of experiments and investigations made by the Forest Service.

Mr. BORAH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield further to the Senator from Idaho?

Mr. SMOOT. Yes; for a question.

Mr. BORAH. There are a great many people who have some ideas in regard to the forest reserves who are not opposed to the forest reserves under lines and according to the principles outlined and suggested in the original bill; but it is a little difficult for us to understand how that has anything to do with delivering lectures to a railway engineering association or to a cooperage college or to the University of Michigan or to any such institution. I am not asking the question in the way of criticism, but the thought has occurred to me that the connection is not very close, and if it were close, that it would be a little difficult to find the power in the Government to do such things.

Mr. SMOOT. Mr. President, I can only repeat that it is required of the Secretary of Agriculture to disseminate this information among the American people, and it is for that reason that the department sends these men to give this information wherever they think it will be of some use to the people of this country.

Mr. BAILEY. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Texas?

Mr. SMOOT. For a question.

Mr. BAILEY. I should like to ask the Senator from Utah how it would please him and others who favor this policy for the Government of the United States to convey to the States in which the public lands are situated all the public lands of every kind now belonging to the United States?

Mr. SMOOT. That question——

Mr. BAILEY. Then, if the State wants to pay the expenses of a lecturer—I understand there are here items of $200 or $300 for making a speech on forest reserves before the Young Men's Christian Association——

Mr. SMOOT. No.

Mr. BAILEY. I have not examined it, but I understand it is true; and while I understand it might have some relation to the railroads, I do not comprehend just what relation it has to religion. But speaking seriously to the Senator from Utah, I have always believed that the Government of the United States would relieve itself of an expenditure and relieve itself of a responsibility by conveying to the States the public lands situated in those States. I am entirely disinterested in making that suggestion, because in our State we have never had an acre of United States land. That is a solution of it. I should like very much to see the Senator from Utah or some other Senator propose that. The Government of the United States derives no revenue from this source. It costs as much to administer the system as it gets out of it; and then if Utah wanted to pursue one policy and Idaho another, they would fight it out in their legislatures instead of in Congress.

Mr. SMOOT. That question has been discussed a great many times by Senators from the West. I have heard it suggested for a number of years, but I doubt whether if such legislation were attempted by the western Senators, even if they were agreed on it, it would ever pass Congress. The Senator from Texas has no doubt heard time and again Senators on this floor state that they were as much interested in the lands in the Western States as the Senators from those States.

Mr. BAILEY. I have heard Senators say a great many things since I have been a Member of this body with which I do not agree, and I do not agree with that statement. I think those lands immediately and deeply concern the people amongst whom they are situated. The Senators from the other States are interested, so far as the lands constitute an asset of the Government, and every State is entitled to whatever benefit may accrue from it in that respect. But the reports of the Government will show that it is a bill of expense instead of an advantage in a financial way.

Mr. SMOOT. There would be one difficulty with that, to which I should like to call the Senator's attention, and that is that some of the Western States are rather small in number as to population or poor as to wealth.

Mr. BAILEY. If the Government keeps making forest reservations, they will not have any.

Mr. SMOOT. That is a question to be discussed, and I can state to the Senator here that the States in the West are receiving from school sections, through the 25 per cent they receive, more than they would get out of the same lands to-day if they were administered by the State.

Mr. BAILEY. Then the Federal Government must be paying the difference, and I object to taxing my people to provide for the Senator's constituents.

Mr. SMOOT. When the question of the sale of land is taken into consideration and all the revenues from the public land in the West are considered, I do not think this Government is paying one dollar toward the administration of a State in the West.

Mr. BAILEY. Then, if the Senator will permit me, the States are getting more under the present system than they would under some other system. Either Utah would be incapable of managing her estate, or the Federal Government must be paying the expense.

Mr. SMOOT. I am surprised that the Senator would make such a proposition. The State would have to take care of every forest reserve. It would have to enforce the required laws and regulations, and the administrative part of that would be almost as much in a State as it is in the Nation, and therefore you can not compare the Nation, which has 195,000,000 acres in forest reserve, with a State that may have only about a million acres.

Mr. BAILEY. I undertake to say there is no duty which a government can be required to perform that a State can not perform at a smaller cost than the Federal Government. The Federal Government will spend more to take care of a piece of property of any kind than a State will. The Federal Government will spend more to take care of a court-house than a State will spend to take care of a court-house twice the size in the same town.

Mr. CARTER. Mr. President——

Mr. SMOOT. I do not know that it is going to enlighten us at all if we are to be carried off into that field of discussion.

Mr. CARTER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Montana?

Mr. CARTER. I should like to make a suggestion with reference to the observation of the Senator from Texas, if permitted to do so.

Mr. SMOOT. If it does not take too long, the Senator may.

Mr. CARTER. I will endeavor to make it agreeably short. I will state to the Senator from Texas that the effort to manage the forest reserves under State control encounters a great physical difficulty. I can illustrate it more pointedly probably than I can explain. The dividing line between the State of Idaho and the State of Montana is the summit of the Bitter Root Mountain Range. The Government having jurisdiction of both sides of that range, can, of course, protect the timber from invasion by fire from either side. If Montana provided a fire guard and Idaho failed to provide a fire guard, it is very manifest, I think, that the timber in Montana could readily be burned by a fire coming in from Idaho, and Montana would have no authority to pass the summit of the mountain range, which is the state line. I have no doubt whatever that where forests are interstate in character—that is, extend across the State lines, as is the case in most instances—unity of management is essential to effective administration.

I believe that this is true, in the light of my views; that the main purpose of the forest reservation system is to preserve the growing timber from destruction by fire. The law of the country has generally, when faithfully administered, sufficed to prevent the plundering of the forests by persons who are merely bent on stealing.

Mr. BAILEY. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Texas?

Mr. SMOOT. I yield to the Senator from Texas.

Mr. BAILEY. The same argument the Senator from Montana has suggested now has been employed from the foundation of this Government to illustrate the folly of forming a republic out of original States. But inasmuch as the State of Idaho exercises authority over life, liberty, and property to the summit of the mountains where the States divide, and that Montana exercises the same jurisdiction over life, liberty, and property on the other side of the imaginary line, I think we may well assume they could do the same with respect to the forests. I think I am just as willing to trust the trees to that jurisdiction as I am to trust the lives and liberty of the people in Montana and Idaho.

Mr. WARREN. I should like to ask the Senator from Texas if he would expect the States to take care of the timber lands that belong to the United States?

Mr. BAILEY. Oh, no; I am proposing to give them to the States.

Mr. WARREN. That is another proposition, and when the Senator proposes that, I perhaps will be willing.

Mr. BAILEY. If the Senators from the Western States will prepare such a plan, I think we could pass it this afternoon.

Mr. WARREN. I may say that I thought so some years ago. I introduced a measure here. I spent two months in preparing statistics and a speech. I promptly went out of the Senate upon that speech and upon the idea that the lands should be deeded to the States. Perhaps it would be more popular now than it was then.

Mr. BAILEY. If the Senator had not made the speech, he might have passed his bill.

Mr. WARREN. Notwithstanding that, if the Senator from Texas, who of course would have much more influence, will propose such a plan, I think I will follow him.

Mr. BAILEY. I will be glad to follow the Senators from the Western States on that subject. They have most of the lands within their States. I am satisfied they can administer it; and I feel this way: If they maladminister it, they are the sufferers, and I am willing to trust them. If those Senators will prepare such a bill, I will support it very cordially, and I have no kind of doubt that we have now made progress enough to pass the Senator's bill.

Mr. WARREN. Without getting retired.

Mr. SMOOT. Mr. President, I have listened for a great many years now to bitter complaint against the Forestry Service and its administration, and every time I have had particular information and the Senator complaining named the person wronged, and I have investigated those charges, I have found them to be absolutely without merit. In rather a frolicking way yesterday reference was made to this division of the Government purchasing steam yachts for the purpose of having the supervisor and the ranger go on pleasure trips.

Mr. President, I want the Senate to know the facts in this case as they really are, and I take it there is no Senator here who will not then say that the Forester has done the proper thing.

The Forest Service has purchased for the use of forest officers on patrol duty three gasoline launches, at a total cost of $2,449. The saving effected by the purchase of these launches will in one year very nearly equal their initial cost. Their value for carrying parties of men for fire fighting with rapidity and ease and as a means of efficient patrol can not be estimated.

The following is a complete list of the launches purchased, showing their cost and the saving effected by their purchase:

On the Coeur d'Alene National Forest, in Idaho, a gasoline launch has been purchased, at a cost of $780, for use on Lake Pend Oreille, which is approximately 35 miles long and averages about 3 miles in width. The use of this launch enables the Forest Service to dispense with four men who would be required for patrol duty five months in the year, at an average salary of $75 per month, or a total saving of $1,500 per year.

Mr. BORAH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Idaho?

Mr. SMOOT. I do.

Mr. BORAH. Did the Forestry Bureau dispense with the four men?

Mr. SMOOT. They certainly did.

Mr. BORAH. Were they men who had been employed and were then discharged?

Mr. SMOOT. They are men who would have had to be employed, providing they did not have the launch to patrol the 35 miles' distance along the lake.

Mr. BORAH. But you do not mean to say that by reason of the purchase of a launch four men who were employed were discharged from the service, and therefore the pay roll was decreased?

Mr. SMOOT. I mean to say that if the launch had not been purchased four extra men would have had to be employed, and a saving of $1,500 was thereby made.

Mr. BORAH. That is a speculation; that might or might not have been true. But what I want to know is, Were these men employed and afterwards discharged by reason of the purchase of the launch?

Mr. SMOOT. There is not a particle of difference, so far as the dollars and cents of the Government are concerned. I say to the Senator now that if they had not purchased the launch they would have had to employ the four men.

The cost of operating this boat, including a generous allowance for depreciation, is $125 per month, or a total cost of $625 per season. The net saving on this forest is therefore $875 per year.

On the Priest River National Forest, Idaho, a gasoline launch has been purchased, at a cost of $794, for use on Priest Lake, which is approximately 17 miles long and averages about 2 miles in width. The use of this boat enables the Forest Service to dispense with two men who would be required for patrol duty five months in the year, at an average salary of $75 per month, or a total saving of $750 per year. The cost of operating this boat, including a generous allowance for depreciation, is $120 per month, or a total cost of $600 per season. The net saving on this forest is therefore $150 per year.

On the Washington (Chelan) National Forest, Washington, a gasoline launch has been purchased, at a cost of $875, for use on Lake Chelan, which is approximately 50 miles long and 1½ miles wide. The use of this launch enables the Forest Service to dispense with five men who would be required for patrol duty five months in the year, at an average salary of $75 per month, or a total saving of $1,875. The cost of operating this boat, including a generous allowance for depreciation, is $135 per month, or a total cost of $675 per season. The net saving on this forest is therefore $1,200 per year.

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Oregon?

Mr. SMOOT. Yes; for a question.

Mr. FULTON. I understand, then, from the statement of the Senator that there is positively no limit whatever to the number of men who may be put on the forests except the amount of money at the disposal of the Forester. Is that so?

Mr. SMOOT. I think that is a very unfair question, and I think I have, and the Senate should have, confidence enough in the Forester to know that he would not put a single, solitary man on any forest unless it was absolutely necessary.

Mr. FULTON. I have heard of confidence maintaining prices and good times, but I did not suppose it went so far that we had to leave everything to the discretion of administrative officers simply to maintain confidence. Does the Senator contend that simply because we have no reason to question the fidelity and integrity and honor of a certain individual, the money in the Treasury should be turned over to him to disburse at his discretion?

Mr. SMOOT. The Senator contends that there is not a man who is not absolutely necessary employed under this service anywhere in the United States.

Mr. FULTON. Let me ask the Senator this. I see an item here where a certain amount was expended to cover traveling expenses to deliver an address to the Carriage Builders' National Association in the city of New York. Does the Senator think that money in the Treasury of this country should be expended in paying the expenses of some man to deliver an address to the Carriage Builders' Association in New York City? If so, to what purpose?

Mr. SMOOT. The same identical purpose that they paid money in order to have a lecture delivered to the railroad engineers of this country, to instruct them——

Mr. FULTON. What possible service could it render to the Government to have the lecture delivered?

Mr. SMOOT. There never was a carriage manufacturer in the world who did not use timber in his business.

Mr. FULTON. Does the Senator believe in increasing the use to which timber may be put? I thought the idea——

Mr. SMOOT. If the Senator wants to pursue that, I do not propose to yield any more time. I do not want to take up time here in a useless discussion.

Mr. FULTON. Will the Senator yield for another suggestion?

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Oregon?

Mr. SMOOT. The Senator says he desires to make another suggestion. So he may.

Mr. FULTON. I wish to complete the suggestion I started in to make, and that was this. My understanding was that the

timber of this country, as contended by the Forester and his department, is being used too rapidly. Yet, according to the Senator, they are sending out missionaries to tell the people how they can put it to further and additional use.

Mr. WARREN. No; to better use.

Mr. SMOOT. It is not the question of restricting the use of timber. It is the question of putting the timber to a better use.

Mr. FULTON. Does the Senator think the lecturer knew better how to use timber in building carriages than the carriage makers did?

Mr. SMOOT. I rather think he did, or he would not have gone there, and the carriage makers would not have asked him to come.

Mr. FULTON. I suggest that we engage him as a carriage maker and employ him in building carriages.

Mr. SMOOT. I hope the Senator will not ask me to yield any more time for discussion along that line.

Mr. President, this great plan of the conservation of our forests is either right or wrong. If it is wrong, there should be no appropriation for it, and, if it is right, the Congress of the United States should appropriate money sufficient to properly administer it. I have no hesitation in saying it is the proper thing for the Government to protect its forests, to protect the watersheds of this country, and to save to the people the timber that is left.

I think, therefore, it is proper to speak of what has been accomplished. Complaint has been made here of an appropriation of $600,000 for improvements, and the Senator from Idaho [Mr. HEYBURN] says it is like tossing money into the air and letting anybody catch it who may.

The report shows what has been done with it in the last year, and I wish to call the attention of the Senate to the fact that there were 3,400 miles of trails built, 3,200 miles of telephone lines built, 600 miles of pasturage and drift fence, 100 miles of wagon road, 530 headquarters and barns, 250 bridges; all built with the $600,000 in the different forests in this country.

There were entered as agricultural land in the forest 6,243 claims, with an aggregate of 293,000 acres. There were 2,600 mining claims——

Mr. BORAH. Do you mean homestead claims?

Mr. SMOOT. I mean homestead claims.

Mr. BORAH. Now, in seriousness, the Senator is coming to what, in my judgment, is the great defect of this system. I wish to ask the Senator if he thinks it is proper to have the homesteader in this country placed in a position where he must not be permitted to go to the law to find out what his rights are, but must depend at last upon the judgment of an individual as to whether or not he shall have a homestead?

If the Senator will pardon me for just a moment, if the Forester or those who are interested in the preservation of the forests will organize and crystallize a system of rules, such as they believe will be beneficial for the protection of the forests, and which will at the same time admit of settlement within the forests, so that we can enact those regulations into law, the great defect of this system will be removed. No man is going to take a homestead in a forest reservation, or undertake to do so, if his efforts must depend at last upon the judgment of an individual as to whether he has gotten in the right place or not.

Mr. SMOOT. Evidently there were 6,243 who desired to take homesteads, and who did do so.

Mr. BORAH. That is all right, but, as was said by the Senator from Colorado a while ago, that number alone would have been taken in one year in the State of Idaho.

Mr. SMOOT. That is entirely speculation.

Mr. BORAH. It is not speculation. Men are ready and anxious to take homesteads, and go there for that pupose, and, as was properly said by the Senator from Colorado, they are prevented from doing so by the efforts of men who do not want them there.

Mr. DIXON. And in that connection I will say where the timber is thickest the fight for homesteads is the fiercest.

Mr. BORAH. That is a matter which is largely for the judgment of the homesteader. But there are thousands of acres of land in the State of Idaho that has not a foot of timber upon it or which is inside of forest reservations. No timber has ever grown there and, according to the judgment of men who are experienced in such matters, no timber ever will grow there. Those lands should be thrown open to settlement under some established rule of law by which the settler could go there and take his home and know when he has done certain things he would be able to claim his homestead. As it is now, he can not go upon the land until he gets the approval of an individual who may wish to put him here or there or, finally, when he has initiated his location, put him away entirely.

Mr. SMOOT. A year ago there were a great many complaints made of homesteaders within forest reserves. I had a list here of some 49 cases, and every single, solitary case was not for the purpose of homesteading, but for the purpose of securing the timber.

Mr. BORAH. I want to ask the Senator——

Mr. SMOOT. Another thing in that connection. Yesterday, in this Chamber, the senior Senator from Idaho [Mr. HEYBURN] said that every acre of land within the State of Idaho was agricultural land.

Mr. BORAH. Mr. President——

Mr. SMOOT. If the Senators disagree as to that, if one says they are all agricultural and the other says a part of the lands within forest reserves are agricultural, I think there is need of somebody to pass upon whether they are agricultural lands or not.

Mr. BORAH. In all probability the Forester would not know anything more about whether it is agricultural land than my colleague or I; but the settler, the pioneer, the man who is familiar with these things, knows where he can make a home, and you may be assured if he can not make a home he will not locate there. A man should be able to know under the law when he may prove up and have his home—after he has performed certain things.

Mr. SMOOT. There is not a case——

Mr. BORAH. Just a moment.

Mr. SMOOT. And the Senator can not point to a case where an honest homesteader has ever gone into a forest reserve and settled upon land, as suggested by him, who ever had any trouble whatever in getting the title to his land.

Mr. FULTON. Oh, Mr. President——

Mr. BORAH. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield further to the Senator from Idaho?

Mr. SMOOT. Certainly.

Mr. BORAH. I do not make this a question of veracity between the Senator from Utah and myself, but I do say in all earnestness that I can point to a number of cases where parties have undertaken to get homesteads within a reservation, and when the report is sent to Washington it is sent back for investigation to the man who has rejected him in the first place, and naturally he rejects him in the second place; and so it constitutes perpetual motion or a roundabout movement all the time, for it always gets back to the man who first rejected the settler.

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Oregon?

Mr. SMOOT. For a question.

Mr. FULTON. The Senator stated a moment ago that no case could be mentioned where a bona fide settler had been refused that privilege.

Mr. SMOOT. I want the Senator to qualify it by saying that it was land within a forest reserve, as designated by the Senator from Idaho, and there was no adverse possession by anyone else.

Mr. FULTON. Yes; land within a forest reserve and no adverse possession. I can show the Senator many cases—I have the correspondence in my room at this time—where I have tried my utmost to enable a settler to take up land within a forest reserve, which he said was agricultural, and on which no one contended there was any considerable amount of timber, and upon which he was willing to go and spend his time, his energy, and his work to make a home for himself and his family, and yet they denied him the privilege.

That has been one of my objections to the administration of the forest-reserve system. I believe in preserving the forests, in protecting the forests, and conserving the forest timber, if you please, but I prefer homes to trees; and where there is room for a home, where the land is fit for a home, I would rather see a home built there than a tree growing there.

I charge that the administration of the forest reserves does not, in good faith, carry out the spirit of the law, which said that where the land is suitable for agriculture it shall be devoted to agriculture. I can give the Senator plenty of evidence in proof of that.

Mr. SMOOT. Mr. President, that same statement has been made here many times, but every time there has been a particular case pointed to, and when it has been investigated it has always proved that there was some fault or some reason why the title had not passed to the man.

Mr. PILES. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Washington?

Mr. SMOOT. For a question.

Mr. PILES. The Senator from Utah knows that as far as I am personally concerned I have been favorable to a very large extent to the Forestry Service; but he is in error in saying that settlers have not been permitted to go on the forest reserves, except in cases where there was a contest or where they tried to take up timber lands.

I have a case at the present time under consideration by the Forestry Department where a very distinguished architect in my State, who has no interest in the land at all, but who visited the premises, wrote me a letter in behalf of a poor settler. He had been there and there was nothing on the land but a few scrubby trees, and it was, to his personal knowledge, susceptible of cultivation and would make a splendid home for a farmer. The ranger, or whoever has charge of the forest reserve, turned him out; he would not permit him to have his home in that reserve. I have the matter in the department here now, and I believe the department will admit him into the forest reserve on a proper investigation. The trouble lies in the men who are administering on the forest reserves more than it does in the department at Washington, in my judgment.

Mr. SMOOT. That is just exactly what I was going to say to the Senator. If he has a case of that kind, there is no question in my mind that if it is pointed out, and it is a just case, but what the Forestry Service here will see that the man is protected in his right.

Mr. CLARK of Wyoming. Will the Senator yield to me for a question?

Mr. SMOOT. I will yield for a question.

Mr. CLARK of Wyoming. I will ask the Senator from Utah whether it is or is not a fact that the proclamations setting aside these reservations contain a statement warning all people to refrain from making a settlement upon the reserves?

Mr. SMOOT. Mr. President, I am not able to say whether those proclamations really have that provision in or not, but I know one thing, that in the reserves and under the law a settler can go there and make a homestead entry.

Mr. CLARK of Wyoming. I am inclined to think that he can under the law, but he can not under the proclamation and the enforcement of the law as it is administered under the proclamation.

Mr. SMOOT. Under the administration of the proclamation I will say that last year there were over 6,000 of them.

Mr. FULTON. Will the Senator allow me just a moment further in regard to the same matter?

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Oregon?

Mr. SMOOT. Yes; I will yield to the Senator.

Mr. FULTON. The Senator said there was always, as I understood him, some conflicting claim or some reason other than the fact that the man wanted a home, which induced the department to reject his application, when he seeks to enter land within a forest reserve as agricultural land. I will state to the Senator, and I will undertake to bring letters from my office, as I said a moment ago, that I can show a great number of cases where they had rejected the application simply because they said it was not agricultural land, as the applicant contended it was, and was willing to risk his time and money and labor in improving it. A gentleman has handed me, and I have in my hand at this moment, a matter just called to my attention, where the forest ranger reported in favor of the land being agricultural, but when it got to the department here they entertained grave doubts as to whether it was, and they said to him:

> In order that the Forester may determine what land to recommend for listing, it is desirable that a demonstration be made as to its agricultural possibilities, and to this end I would suggest that you take out a special-use permit for 40 acres of the tract applied for and experiment upon it. You may select the 40 which appears best suited for experimental demonstration, for which a permit will be issued by this office without charge. It is believed that two years should be sufficient to demonstrate whether the land will produce farm crops of enough value to justifying its listing for agricultural entry.

In other words, they required that this man should go on there for two years and make a demonstration before his entry was entertained or considered, and risk two years of time and work and investment upon the discretion of the Forester. Does the Senator think there would be much agricultural land within the forest reserves settled under any such rules?

Mr. SMOOT. Mr. President, there are always two sides to every question. I undertake to say now that there is another side to the particular case to which the Senator points.

Mr. FULTON. I will say to the Senator, the other side, in my judgment, is like the mountain he spoke of yesterday, too steep to climb.

Mr. SMOOT. I have not a photograph of that particular mountain, but I wish I had it here. I could prove to the Senator from Oregon or the Senator from Idaho that he could not climb it in places, for the Senator said this morning there was a cliff of rock 1,500 feet high. Perhaps this case may have some semblance to the ones we have heard in this Chamber before; for, with a voice full of pathos, with arms stretched aloft, with his whole body trembling with emotion, the Senator from Montana [Mr. CARTER] day before yesterday called the attention of the Senate to the outrageous treatment that had been given to a certain honorable, honest, upright, virtuous citizen of Montana by the Forestry Division.

Mr. CARTER. The adjectives are those of the Senator from Utah.

Mr. SMOOT. I might as well read the very words of the Senator from Montana. He said:

> I have one case in mind. A man west of the town of Anaconda, in Montana, whose improvements had cost over $10,000, had a handsome meadow in front of the house. There was not a tree growing in it. The place had been occupied for twenty-odd years. It was the home of the family. Yet a forest ranger directed that man to leave in the autumn, after his crop had been harvested and the haystack stood there ready to feed his cattle through the winter. He refused to go. He said his all was at stake.
>
> Complaint was made to the district attorney upon a statement of facts—that did not finally pan out with the real facts—which caused this man to be indicted. He had naught to do but to plead guilty, because he was there upon the forest reserve without a permit. The district attorney appealed to the forest ranger, after the man had pleaded guilty, to permit him to remain until spring. But the forest ranger said:
>
> "Our authority must first be established. This man must leave this place with his family, and when he is outside of the forest reserve we will consider whether we will let him back or not."

He said further:

> This is not an isolated case. The harshness and cruelty and inhumanity of the administration are notorious through the States where these petty tyrants have exercised their brief and fleeting authority.
>
> Mr. WARREN. May I ask the Senator, before he sits down, what was the final outcome? What is the condition now respecting that settler?
>
> Mr. CARTER. The district attorney told me he had reported the facts to the Department of Justice, and hoped that the department would appeal to the department in Washington. I have not been advised of the result.
>
> Mr. WARREN. We may assume, then, that the man is still there.
>
> Mr. CARTER. If the forest-reserve agent could put him off, he was put out on the approach of winter.

And further along he said:

> That, of course, is one case. I regret to say that I could recapitulate cases not quite as bad as this one, because the amount of improvements was great here; but I could recapitulate cases that have come to my notice in the State of Montana until the hour of midnight approached. The one thing about this matter that deserves special censure is that when a complaint is made to the Chief Forester at Washington, that complaint is referred back for report to the agent complained of, and his word is accepted.

This case, no doubt, is the Fleetwood Sothcott case, in Deer Lodge National Forest. I wish to read to the Senate some letters that passed between the department here and the United States attorney at Helena, Mont.

One of October 31, 1908, addressed to Hon. J. W. Freeman, is as follows:

OCTOBER 31, 1908.

Hon. J. W. FREEMAN,
United States Attorney, Helena, Mont.

SIR: A copy of your letter of September 23 to the Attorney-General has been referred to me, with a request for a recommendation concerning the action suggested by you.

I am deeply sensible of the difficulties of the position of a district attorney, and assure you that this department would not lightly disregard any suggestion of yours. That I have not as yet concurred in your suggestion in this matter is because I fear that possibly all the facts in the case were not before you, since I fully appreciate the fact that you have given this case the most careful and earnest attention.

Chief Inspector E. A. Sherman, of the Forest Service, was requested to make a thorough investigation of the facts in the case, and his report thereon states that "The place could not be classified as 'chiefly valuable for agriculture' under the most elastic interpretation of that act. The place is chiefly valuable as a location for a saloon. This is proven by the use to which it has been put in past years. The place has been claimed for the last twenty-five years or thereabout. Parker, Sothcott's vendor, never even attempted to raise a garden, and no effort was ever made in the way of a farm until Sothcott, a year ago last summer, plowed up about 35 acres and planted it to winter rye, harvesting the first crop this summer. The rainfall in Montana this year was the heaviest ever known by white men in this State, so the results were the best Sothcott probably would ever be able to secure. Sothcott claims that he cut about 20 loads of rye hay. The forest officers and Johnson, however, claim that he only cut 5 or 6 tons. Johnson seemed to be very friendly with Sothcott, spoke well of him, seemed to wish him well, and I believe that his statement was absolutely correct. Sothcott's effort at cultivation resulted in shaking down all the soil there was and turning the rocks and gravel on top: A coarse deposit of gravel overlies a bed of heavy wash bowlder. Only a thin scant sod has ever formed.

"Johnson, the blacksmith, claims that it would be impossible for anybody to make a living there without selling whisky. He says that Sothcott's hotel does not serve an average of a meal a day. Furthermore, Sothcott appears to have run a free-and-easy place, where men and women from Anaconda could go and no questions asked."

This department has always in the past, and will continue in the future, to offer every encouragement to any person desiring to make legitimate uses of the forests, but can not countenance the conducting of either saloons or disorderly houses thereon.

This land is not agricultural, and I do not feel that I can consistently list it under the act of June 11, 1906, since it is evident that it would be used for saloon purposes as soon as patented. And while this department has always exercised the utmost leniency toward persons who have innocently or ignorantly purchased improvements and otherwise expended time, labor, or money on forest lands, in this case Mr. Sothcott purchased advisedly and with the avowed intention of operating a saloon in defiance of the law. I feel great hesitancy in recognizing that Mr. Sothcott acquired any equities by such action.

On July 22, 1907, Mr. Sothcott was informed by letter from the Washington office of the Forest Service that he might take out special use permit to validate his occupancy of the land for hotel and business purposes, but no permit could be issued for the saloon under any circumstances.

Mr. Sothcott's reply to this was the erection of a dance hall as an adjunct to the saloon. This dance hall was completed and opened for business in June, 1908. I think these things show that Mr. Sothcott fully appreciated the fact that his place was only valuable for saloon or other immoral purposes. It was, at least, a very pronounced repudiation of the idea that he had any intention of engaging in agricultural pursuits.

The chief inspector reports that Mr. Sothcott can not use the property to any profit except for the purposes for which he has used it. I am willing to allow him a reasonable time to remove his buildings.

I do not desire to urge upon you any action you deem ill-advised or unjust after a full consideration of all the facts, and I am writing you thus informally to inquire whether the above matters had been brought to your attention before you made your recommendations.

I also desire to call your attention to the fact that Sothcott is reported to have said "That while he was fined $50 for having run a saloon on the forest for eighteen months, the judge gave him his place and told him he could go home and prove up in fourteen months;" and would like to be informed whether the court, in passing sentence upon Sothcott, gave utterance to any expressions which would warrant such a statement; or whether you, in your official capacity, gave him any assurances of like nature.

Since I will not make any recommendation to the Department of Justice until I hear from you, I trust that you will reply at your earliest convenience.

Very respectfully, W. M. HAYS, *Acting Secretary.*

Mr. President, another letter of November 24, 1908.

Mr. STONE. By whom is the letter signed?

Mr. SMOOT. It was signed by the Assistant Secretary, Mr. W. M. Hays.

Mr. STONE. The Assistant Secretary of Agriculture?

Mr. SMOOT. Yes. This is also signed by the Acting Secretary of Agriculture:

NOVEMBER 24, 1908.

Hon. J. W. FREEMAN,
United States Attorney, Helena, Mont.

SIR: Your letter of November 9 is received. Mr. Sothcott has submitted a proposition to sell his improvements to the United States, and since you state no promises were made to him I feel at liberty to accept his proposition. This will, of course, render any further consideration of the case unnecessary.

I desire to again express my appreciation of the active interest you have shown in this and other cases of like nature. The only reason I objected so strongly to Mr. Sothcott's remaining on the forest reserve was on account of the disreputable reputation of the place.

The incident of the juror mentioned by you has been noted, and the Forest Service will endeavor to remedy the evil lying at the root of such prejudice. I shall always consider it a favor if you will inform me or the Forester whenever it comes to your notice that a forest officer has acted or is acting arbitrarily, harshly, or unjustly in any matter, since the improvement of the service must largely depend on the suggestions of its friends.

Very respectfully, W. M. HAYS, *Acting Secretary.*

Mr. President, that is one of the cases which was pointed to here. I do not believe, nor do I charge the Senator from Montana [Mr. CARTER] as knowing the facts in the case. I take it for granted that he made his statement upon a letter that had been sent him.

Mr. PILES. What was the case?

Mr. SMOOT. The Fleetwood-Sothcott case.

Mr. CARTER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Montana?

Mr. SMOOT. I yield for a question.

Mr. CARTER. I understand the Senator from Utah to agree with the report he has just read, that these improvements had been put upon that land for twenty years or thereabouts.

Mr. SMOOT. I do not think the letter says that all those improvements were upon the land. I say here that Mr. Parker, the man who was upon the land before Mr. Sothcott bought it, had been there for about twenty-five years.

Mr. CARTER. The value of the improvements the letter does not pretend to set forth, as I understand it.

Mr. SMOOT. Mr. President, the testimony shows that he paid Parker $2,500 for the improvements on the place, and for what rights he had in the saloon.

Mr. CARTER. My understanding from the district attorney was that it appeared to his satisfaction that the value of the improvements was about $2,500. The letter apparently bears out the statement that he had a crop of hay stacked at the time. My contention is not, nor have I any knowledge upon which to base a statement to the effect that this man was a good man or a moral man. I assume every man to be good and moral until the contrary appears. I think that is but an ordinary and Christian charitable assumption. It may be violent as to a man residing on a forest reservation.

But, Mr. President, I wish the Senator to direct his attention to my exact position in the matter regardless of the character of this man. I insist that the forest laws of the United States do not or should not commission any officer of the Federal Government to deprive him of his property without due process of law. If he violated any law of that State, he was amenable to the laws of the State. We never intended to send federal officers out there to oust the local jurisdiction.

Mr. SMOOT. Mr. President, the trouble of this whole question is that the Senators only hear of cases like this. In the great mass of the cases there is never any complaint. The thousands of cases that pass successfully under the examination of the service are never heard of.

Mr. CARTER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Montana?

Mr. SMOOT. I do.

Mr. CARTER. I desire to make a statement for the benefit of the Senator from Utah at this time, and I make it because of his desire always to adhere to the exact truth. It is stated there that the forestry reserve has never anywhere tolerated knowingly any kind of saloon or other undesirable business on a forest reservation.

Let me state to the Senator the fact, and I will to-morrow bring down large photographs to exhibit for his information. The Chicago, Milwaukee and St. Paul Railroad built a tunnel through a range which divides Idaho from Montana. On the Montana side the state law prohibited the establishment of a saloon within 5 miles of the line of road in the course of construction. The best of order prevailed on the Montana side of the line. On the Idaho side the forest reservation authorities were in charge. No such state law as ours protected the construction. A series of dead falls were established under promise from the forest reserve. It became the rendezvous for drunkenness, revelry, and crime to such an extent as to seriously interfere with the prosecution of that great tunnel work. The man in charge, Mr. Charles Kurtz, who represented the Winston Brothers there, complained to me of this infamous nuisance, and furnished me with photographs to show these dives and dead falls, with people of both sexes photographed, in order that the facts might not be made questionable, but that the photographic art might afford witnesses.

I believe in a strict adherence to the truth, and I therefore can not with patience accept the statement made in that letter, which was made in good faith by Mr. Hays, because he is a gentleman who would not willfully or deliberately, or at all, misrepresent the truth as he understood it. But the management is not consistent. The facts I have referred to were narrated to me by a gentleman who can bring a thousand men to testify to their truth.

Mr. SMOOT. Mr. President, I have no knowledge of the case referred to by the Senator from Montana [Mr. CARTER], and therefore I can not express an opinion as to whether or not the Forest Service had issued the permit. But let us go——

Mr. NELSON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Minnesota?

Mr. SMOOT. I yield.

Mr. NELSON. I think that matter is susceptible of a plain explanation. The railroad company was engaged in constructing a tunnel through there, and a large gang of all kinds of laborers were employed upon the work. Under such conditions it is difficult to maintain order. I remember when the Northern Pacific Railroad was constructed through the northern part of our State, in the county of Becker, one of our best counties, with as good a population as can be found anywhere. They had at one time in a cut at Oak Lake, the terminus of the road for the winter, a tent town that was worse than anything described by the Senator from Montana. Such things are mere incidents of railroad construction. When the work is completed, that will disappear. Why should the Forestry Service be charged with that little item because it occurred in connection with the extension of a great railroad?

Mr. SMOOT. Mr. President, the Senator must understand that I do not say that Mr. Pinchot granted the permit, but the charge was made that he did grant it; and, so far as order and peace are concerned, I think they would have had more order and more peace without the saloon, no matter who granted the permit.

Mr. DIXON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Montana?

Mr. SMOOT. I do.

Mr. DIXON. I did not quite understand the statement of my colleague. Did he say that the saloons at Taft were established on a permit from the Forestry Service?

Mr. CARTER. Not at all. The town of Taft is in Montana, and the contractors claimed that in Montana order was maintained without interruption; that their men worked with regularity, and that drunkenness and disorder there were reduced to a minimum. But just across the line, on the opposite side of the mountain in Idaho, they were rendered almost incapable of proceeding at times because of the "dead falls" conducted there under permits from the Forestry Service for the buildings erected and the business there conducted, of course in consequence of such parties being allowed to remain and erect their buildings.

Mr. NELSON. Will the Senator from Montana allow me to say a word?

The VICE-PRESIDENT. The Senator from Utah [Mr. SMOOT] has the floor. Does he yield to the Senator from Minnesota?

Mr. SMOOT. I will yield to the Senator from Minnesota.

Mr. NELSON. I want to ask the Senator from Montana if he does not think that that dereliction in Idaho ought to be charged to Senators on this floor rather than to Mr. Pinchot? [Laughter.]

Mr. DIXON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Montana?

Mr. SMOOT. Yes.

Mr. DIXON. To keep the record straight and not to get into any controversy with my colleague, I think I probably know more about the town of Taft than my colleague does. It lies between the home of the Senator from Idaho [Mr. HEYBURN] and my home. The town site of Taft was on patented land, over which the Forestry Service had no control. On the Idaho side I think there were a few saloons, but it was because the sheriff of Shoshone County would not do his duty and put them out of business. I do not think the Forestry Service had any more to do with it than the man in the moon. It is in the county of the Senator from Idaho, and I think he can tell you all about it.

Mr. HEYBURN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Idaho?

Mr. SMOOT. I should like all the information on the subject that it is possible to receive, and so I yield.

Mr. HEYBURN. Mr. President, I am not going to enter very largely into the discussion of this question. The evils complained of on the Idaho side of the line were not within the State of Idaho, strictly speaking, but they were within that portion of the United States that lies within the State of Idaho over which the State of Idaho has no jurisdiction, except at the caprice and will of the Forestry Service. Those lawless places were all within the forest reservation. We collect no taxes from anything within that section of the State, because there is nothing there to be taxed. We are supposed to maintain order and punish crime committed there, I suppose, because it is geographically within the State of Idaho; but the forest officers assume and claim absolute jurisdiction over it. They claim the right to ride you down on the trail if they meet you there, and make you get out of the road so as to give them a free right of way.

Mr. SMOOT. I heard that statement, Mr. President, a year ago. It was then said that they were compelled to do that; and the statement even went so far as to say that they shot a man.

Mr. HEYBURN. That reminds me that the statement I made a year ago in regard to that matter was—I was going to say "garbled," and I think I would be justified in saying it. The facts, as I stated them, were that Mr. Herman J. Rossi, the mayor of Wallace at that time, was riding along the road in a carriage with his family. It is the old Mullan road, built at the expense of the Government to connect Walla Walla with Fort Benton along during Franklin Pierce's administration. This forest officer, who spoke broken English, was riding along on horseback, and he met this gentleman, Mr. Herman J. Rossi, on the road between the towns of Wallace and Osburn. He insisted by his action that the mayor should get off the road with his carriage, or at least make way for him; and because the mayor drove along the ordinary track and the wheel of his carriage grazed this forestry officer's stirrup strap, or some part of his harness, he took a shot at him and his family. I do not know what he aimed at, but he took a shot at them, in any event. As a defense in the court next day, he stated that he was an officer of the Forestry Service of the United States; that he was within his own domain; and that it behooved people to get out of his way. He was convicted and fined and sentenced. He could not pay the fine; the law seized his horse, and he lost his job, because the rule requires a forester to have a horse. [Laughter.] So we got rid of him.

Mr. SMOOT. The laws of Idaho had jurisdiction over the ranger in this case, did they not?

Mr. HEYBURN. When we got him to Wallace, we had jurisdiction. Wallace was the county seat of Shoshone County. The Forestry Service does not control Wallace. He lived there.

Mr. SMOOT. The Senator has modified his statement from what it was a year ago.

Mr. HEYBURN. No; I have corrected the misstatement which was sent out, by whom I do not know, nor do I care—the misstatement that was not borne out by the RECORD, which is official in this body.

Mr. SMOOT. Ah!

Mr. HEYBURN. I have corrected it.

Mr. SMOOT. But I have the report in the RECORD the day the Senator made the statement.

Mr. HEYBURN. I stand by the RECORD. I stated it then exactly as I stated it to-day.

Mr. SMOOT. The statement a year ago was that the man was shot. The Forest Service then, as now, does not approve of any such action. That man was summarily dismissed from the service.

Mr. HEYBURN. I would not charge, Mr. President, that the Forestry Service approved of it. I stated it as an incident arising out of the unfortunate conditions. Men often start machinery in motion that they can not control and so destroy other people's rights.

Mr. SMOOT. He was a temporary guard. He had been on the forest reservation but a few days; and I can not say, nor can the Senator say, that he shot in the direction of Mr. Rossi, who ran into the guard's horse; the horse nearly threw him of; and he had a pistol and shot it in the air.

Mr. HEYBURN. Is the Senator from Utah referring to this case?

Mr. SMOOT. Mr. President, I prefer to go on now.

Mr. HEYBURN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Idaho?

Mr. SMOOT. No; I had rather go on.

The VICE-PRESIDENT. The Senator from Utah declines to yield.

Mr. HEYBURN. I thought the Senator would not yield to have that correction.

Mr. SMOOT. Mr. President, I will yield to the Senator.

Mr. HEYBURN. Mr. President——

Mr. SMOOT. I do it with a great deal better grace than the Senator has yielded to me.

Mr. HEYBURN. Mr. President, the statement, as the Senator seems to have received it, bears no more resemblance to the condition of facts that was demonstrated at the trial than they do to an account of something that never occurred—none whatever.

Mr. SMOOT. It is not worth while to spend any more time on that. Let the record speak for itself.

Mr. HEYBURN. The man defended himself and said he had a right to shoot at the mayor of the city. [Laughter.]

Mr. SMOOT. There is another case that was pointed to here. The Senator from Montana spoke of it and painted the picture so pathetically that I was almost brought to tears, and as I looked across the aisle and saw the junior Senator from Iowa, I could almost imagine that he was wiping tears from his eyes. This is what the Senator said:

> Mr. President, let me cite the case of a man who is not a timber baron nor a sheep herder. Oscar Sparta lived for twenty-odd years near the town of Haskell, in a forest reserve in Montana. Passing by that place, I saw a little oasis in the midst of a small valley which we approached. There were 20 acres fenced in. It was a beautiful fence, with the best mortising and the plank dovetailed in. It stood erect. The stone had been picked up in the middle of the little field and piled with that industry that characterizes the New England farmer. A house was in the course of construction at the upper end of the little place. The man who was driving the livery rig in which I was traveling said that used to be the home of Oscar Sparta. I had known of Oscar Sparta for many years, though I had never met him, and I have not met him since.
>
> Oscar Sparta was a mining prospector. This was his own home. He had lived there over twenty years. He lived in a small cabin outside, and was building a new log house at odd times. He had been building it for many years, and he was building a stable farther up. This man told me that Oscar Sparta paid $25 to a man to haul up fertilizer from the village, 5 or 6 miles down the mountain, to fertilize the little garden just back of the house.
>
> That was the situation when the property was put into a forest reserve. The forestry supervisor concluded that Oscar Sparta's home, that beautiful little oasis in the mountain, without a tree upon it or a merchantable bit of timber within 10 miles of it, was a good place for his forest-reserve man's headquarters. He ordered Oscar Sparta off the place, put him out on the mountain side, and told him if he complained he would have him arrested. The poor man went away, and the day I passed by the forest ranger's horses were in Oscar Sparta's field, eating the timothy hay.

I complained of that to the forest-reservation people at Washington. They sent the complaint made back to the local fellow, and what was the reply? That Oscar Sparta was a shiftless fellow, in the habit of going down to Townsend, the county seat near by, and getting drunk periodically, and he was put off in consequence, and he had no right in the premises. That man is a wanderer on the hillside to-day with the forest-reserve agent living in his home, because the Government paid for the lumber to finish Oscar Sparta's house.

Mr. President, it appears from affidavits that the fence across the north end of the Sparta claim, 1,000 feet long, does not and never did belong to Oscar Sparta. He never built an inch of it. It belongs to his neighbor, Joseph Hassel.

Again, the Senator from Montana stated that Oscar Sparta had lived on this claim over twenty years. The affidavit of Mr. Sparta's nearest neighbor is to the effect that Sparta had certainly not slept on the land for the past six years. The house of Mr. Sparta was never more than eleven logs high, nor the stable more than four and a half logs high, although these buildings were begun in 1895.

Again, the Senator said that the Forest Service informed the Senator that Oscar Sparta was put off his place because he got drunk periodically, and therefore had no right on the premises.

Under date of September 25, 1907, the facts just outlined were carefully explained in a letter to the Senator, signed by the Acting Forester, and in this letter the Senator was further informed that Mr. Sparta was not attempting to hold land as agricultural land under any law of the United States, but distinctly as a mining location, and that such location was invalid.

I want to say, to show that it was absolutely invalid, that the man never did any work upon the claim. Instead of doing $100 worth of work every year as assessment to hold the claim, on the 1st day of January he relocated the same ground in some other name, holding this so-called "little oasis" in the midst of a small valley under a mining claim, with never a dollar's worth of work done on it.

A letter was addressed to the Senator by the Acting Forester under date of August 12, 1907, relative to this case, and then on September 15, 1907, another letter was written the Senator by the Acting Forester, in which it was said:

SEPTEMBER 15, 1907.

Hon. THOMAS H. CARTER, *Helena, Mont.*

DEAR SENATOR: Reference is made to your letter dated August 5 to the Forester relative to the claim of Mr. Oscar Sparta, within the Elkhorn National Forest, and to my letter in reply dated August 12.

August 20 Supervisor R. W. Stuart, of the Elkhorn National Forest, made a further and very careful report on the claim of Mr. Sparta, as he was requested to do by me in a letter dated August 12, which inclosed for his information a copy of your letter.

The supervisor states he is sorry to report that the facts in the case must have been misrepresented to you; that without exception all parties whom he questioned informed him "Sparta is a drunken sot, and claim jumper;" that the house which Sparta started to erect in 1895 is in very bad condition, the bottom logs having all rotted away, and when the tract was withdrawn as an administrative site considerable work was spent by the ranger in fixing the fence to keep stock out; that a row of currant bushes 100 feet in length and a like quantity of gooseberries was planted several years ago by Sparta, but the apple trees, strawberry plants, raspberries, etc., in addition to potatoes, lettuce, beets, and other garden vegetables were planted by Deputy Ranger Marston, the apple and fruit trees having been presented to the Forest Service by the United States Experimental Station at Bozeman, Mont.; that he can furnish all the affidavits desired that Sparta never lived on the land, and that the cabin in which he lived (on the Queen B property) was sold to cover taxes and removed by the purchaser, J. J. Warren—

And never was mysteriously burned, as was suggested.

Accompanying the supervisor's report are affidavits from the sheriff of Broadwater County, Mont., and other persons, who state they have known Oscar Sparta in that community for from seventeen to twenty years, and they corroborate the report of Supervisor Stuart as to Sparta's character and showing that he never complied with any law of the United States in respect to his alleged claim.

The affidavit of his nearest neighbor avers that Sparta has certainly not slept on the land for the past six years, and none of the affiants have knowledge of his having done so at any time. It is averred that the house of Mr. Sparta's was never more than a rectangle of logs 16 by 24 feet, 11 logs high, and then a stable square 12 by 12 feet, 4½ logs high, which buildings were begun about 1895, and no effort was ever made to complete them. It appears, also, by affidavit that the fence across the north end of the Sparta claim, about 1,000 feet long, belongs to the Joe Hassell estate. Prior to any action by the Forest Service toward having the land covered by the claim of Mr. Sparta withdrawn for administrative use, full report was made to the Forester on his claim, which report disclosed that Mr. Sparta was not attempting to hold the land as agricultural land under any law of the United States, but distinctly as a mining location, and that such location was invalid. The report was transmitted to the Commissioner of the General Land Office, who, on August 22, directed a hearing to be had in the case by the local land officers. Of this hearing Mr. Sparta will be duly notified, and, if he responds, will have his day in court.

It is the Forester's direction that in no case must forest officers recommend any tract as an administrative site, however necessary, if the land is being occupied and used by a claimant or there is any appearance of a valid claim to it. In the case of a claim clearly abandoned or manifestly illegal, such use may be considered; but in any such case a special report to the Forester is required to accompany the recommendation made, in order that full justice may be done to the claimant before proceedings on suggestions of the Forest Service are had by the General Land Office to clear the record.

Very sincerely, yours, JAMES B. ADAMS,
Acting Forester.

Mr. President, there was another case cited here——

Mr. CARTER. Before the Senator continues——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Montana?

Mr. SMOOT. Certainly.

Mr. CARTER. I desire, with the Senator's indulgence, briefly to call the attention of the Senate to the support of every statement I made, and that support is drawn from the documents just read by the Senator. First, I said that this ground had been inclosed, improved, and held by Oscar Sparta for about twenty years; that Sparta had been dispossessed without process of law; that the Forester had taken possession of his improvements without any compensation of any kind or character, and that they justified that high-handed proceding by the statement that he was not regarded as a man of good character, and that he had a defective title. That is all I contended.

Mr. SMOOT. Mr. President, so far as I am personally concerned, I would rather take the testimony of honorable, respectable men, even if they are in the employment of the Government, than the testimony of a drunken sot like Oscar Sparta. If the Senator——

Mr. CARTER. Mr. President, Oscar Sparta is one of that peculiar and interesting class of men known as "prospectors," men to whose energy and enterprise the development of the resources of that great mountain chain is largely attributable. The fact that he has frailties and weaknesses, I insist, will never justify depriving him of his property without process of law. That is the bold, uncontradicted fact in this case.

Mr. SMOOT. Mr. President, I agree with that statement, but that is not the case at all. Mr. Oscar Sparta never even slept on the land for six years. He tried to hold the land as a mining claim, and never did a dollar's worth of work on the mining claim, but held by relocating it at the beginning of every year.

The other case referred to was that of Oscar E. Moyer, of the Lewiston land district, Idaho. *There was clearly no compliance with either the letter or the spirit of the homestead law in this case. There was only about 1 acre cultivated during the entire five years of the claimant's residence upon the land, while he cut and sold 900 cords of wood.* Is there anyone here who could attempt to justify a statement that he was there for the purpose of making a home? Not one acre of land was cultivated, and during the time he cut 900 cords of wood.

Mr. President, the forest reserves under the management of the present foresters are to be used by the people. I find that there were 1,304,000 head of cattle on the forest reserves, 76,000 head of horses, 6,960,000 head of sheep, and 126,000 head of goats. Yesterday there was made a statement that the forest reserves of Idaho could support 15,000,000 head of animals. On all the forest reserves of this country, including those where grazing permits have been charged for and those where grazing is free, the animals do not number 10,000,000 head. These exaggerated statements are made for the purpose of trying to discredit the administration of the Forest Service.

What are our fire losses? In 1904 they were less than sixty-six one-hundredths of 1 per cent of the timber in the national forests; in 1907, fourteen one-hundredths of 1 per cent; in 1908, three-tenths of 1 per cent. I called the attention of the Senate yesterday to what our losses in forest fires were last year and what the losses on private holdings were as compared with the losses on forest reserves.

Mr. FLINT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from California?

Mr. SMOOT. I do.

Mr. FLINT. I suggest that the Senator include in his remarks to-day that part of the statement that he made in the RECORD of yesterday with reference to forest fires. I consider it very important, and it illustrates just the condition that might result if the amendment were adopted. Now, a very small portion of the government property in forest reserves is burned, whereas on private property great losses occur each year, and if the attacks on the forest-reserve system are continued and we reduce the amount of this appropriation, we shall find in a few years the same conditions, so far as the government reserves are concerned, that now exist on private property, and there will be great destruction of the natural forests.

Mr. CARTER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Montana?

Mr. SMOOT. I yield for a question.

Mr. CARTER. Mr. President, the Senator will admit, I assume, that the forest-reserve fire patrol was efficient last year?

Mr. SMOOT. No; I can not admit that, for it was not what it ought to have been. We ought to increase our fire patrol. The other day when I was down on the great Biltmore estate

in North Carolina, in talking with Mr. Shank, supervisor of that estate, I asked him if he had a million dollars at his command how would he spend it upon that estate. He answered me: "Every dollar of it for a fire patrol." Asked again, what he would do if he had $5,000,000, he remarked again: Every dollar of it he would spend for fire patrol.

Mr. CARTER. How many square miles are there in the Biltmore estate?

Mr. SMOOT. Over 50 square miles.

Mr. CARTER. Then the owner of Biltmore, if he were in charge of the national forests, would spend $500,000,000 a year instead of $5,000,000.

Mr. SMOOT. Oh, Mr. President, I have not said that he has it to spend, or would spend it in one year.

At the request of the Senator from California I will state that we have lost by unit of acres 3 per cent of what the timber-land owners outside of national forests have lost. Our loss last year, 1908, was $1,181,000, while the private loss sustained the same year was between one hundred and thirty and one hundred and forty million dollars. The State of West Virginia, right at our doors, lost over $5,000,000—enough money to patrol its forests for the next fifty years.

Mr. FLINT. And more than the entire appropriation asked for in the pending bill for the forestry service throughout the entire United States.

Mr. SMOOT. Yes; and I want to say we saved over $34,000,000 by the fire patrol, even small as it was.

Mr. DIXON. It is a fact, is it not, that the appropriation now made provides for only one ranger for over 200 square miles of forests?

Mr. SMOOT. That is a fact, even if we get the $550,000 for that purpose.

Mr. CLARK of Wyoming. Mr. President——

The VICE-PRESIDENT. Does the Senator from Utah yield to the Senator from Wyoming?

Mr. SMOOT. For a question?

Mr. CLARK of Wyoming. A question for information.

Mr. SMOOT. Yes.

Mr. CLARK of Wyoming. The Senator has the figures very accurately. I understood him to say that $34,000,000 was the saving.

Mr. SMOOT. That would be the loss on the same percentage if forest fires inside of the reserves had occurred as outside of the reserves.

Mr. CLARK of Wyoming. Oh! Then the Senator is not stating, as a matter of fact, that the Forestry Service saved the country $34,000,000?

Mr. SMOOT. Only in comparison with private holdings outside of forest reserves.

Mr. CLARK of Wyoming. I want to get the information, because we are hearing an argument in behalf of this appropriation, and I desire to know whether the argument is made here that the Forestry Service last year saved this country $34,000,000, which it would have lost had it not been for the Forestry Service. I wish to know if that is the statement which is made.

Mr. SMOOT. That is exactly the statement I make.

Mr. CLARK of Wyoming. Then, I should like to know upon what facts the Senator bases his figures?

Mr. SMOOT. I stated the facts upon which I based my figures. It was a comparison with the forest-fire losses outside of the national forest reserves.

Mr. CLARK of Wyoming. That is indefinite——

Mr. SMOOT. Take it in Michigan alone. There was nearly $20,000,000 loss last year.

Mr. CLARK of Wyoming. Let me ask the Senator a question. Has the Senator any information as to whether, if there had not been a forest agent on any of these reserves, the Government of the United States would have lost $34,000,000 in burned timber?

Mr. SMOOT. We had 2,635 fires, of which all but 620 were comparatively small. The railroads caused 552; lightning caused 554; campers caused 485; incendiaries caused 99; and there were miscellaneous causes aggregating 935.

Mr. CLARK of Wyoming. But this is a matter of arithmetic. I want to know if the Senator is prepared to state that, in the absence of any protection from the Forestry Service, the Government would have suffered an actual loss of $34,000,000?

Mr. SMOOT. I have no hesitation in saying that such would have been the case.

Mr. CLARK of Wyoming. The Senator's childlike faith in figures is beautiful to behold. [Laughter.]

Mr. SMOOT. I want to say that that faith, however, is backed up by past experience.

Mr. FLINT. I will say for the benefit of the Senator from Wyoming, from a casual examination of the recorded causes of the fires which took place last year, that, in my judgment, if we had no forest rangers the damage to this country in the loss of timber and resources would have been twice $34,000,000. In southern California, if they had not had forest rangers to put out the fires last year, the loss to the people of southern California, and thus to the Nation, would have been many million dollars, in my opinion, by the destruction of the entire watershed, making it impossible for years to have water to irrigate the lands throughout the southern part of the State.

Mr. CLARK of Wyoming. Of course the Senator from California goes on the same assumption that the Forestry Service goes upon, and that is, a fire once started will never cease until it is put out by a forest ranger. For a thousand years fires have been occurring in the forests in the Rocky Mountains, and after a thousand years the trees are still there. Fires do not have to be put out by a forest ranger. Fires burn themselves out or are put out by other means, and it is reckless to say that a fire started will sweep through the whole course of a forest and destroy it.

Mr. SMOOT. I want to call the Senator's attention to the fact that the fires burned themselves out in Michigan and consumed a large part of the timber that State had.

Mr. CLARK of Wyoming. Yesterday we were confronted with the argument that the cattle barons had stolen Michigan; to-day we are confronted with the fact that fires have denuded all the hills.

Mr. SMOOT. Yes; what were not stolen.

I see the time is passing, and I have a great deal I should like to put in the RECORD without reading, because it would take too much time to present it.

Mr. CLARK of Wyoming. I have no doubt the information is perfectly accurate, but I should like to have an intimation of what it consists.

Mr. SMOOT. It consists of a summary of the expenditures and returns of the Forestry Service for the years 1905, 1906, 1907, and 1908. It also presents the question of timber sales, the cost, the amount, and how carried on. It also presents the question of forest fires and the question of the cost of grazing.

Mr. CLARK of Wyoming. There is no objection to that.

Mr. SMOOT. I should like to have it inserted in the RECORD.

The VICE-PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

Expenditures and returns.

SUMMARY.

Since it took charge of the national forests, in 1905, the total expenditures of the Forest Service for the fiscal years 1905, 1906, 1907, and 1908 have been, in round numbers, $7,250,000. By classes these expenditures have been approximately as follows:

General administration of the Forest Service	$500,000
Use, maintenance, and protection of the national forests	4,900,000
Permanent improvements on national forests	675,000
Studies	1,175,000
	7,250,000

Under "General administration of the Forest Service" is included the salaries and expenses of its administrative officers in Washington and of its general inspectors. It will be observed that the total charge for administration is less than 10 per cent of the total expenditure for the period specified. This compares very favorably with the proportion between the expenditure for general administration and operating expenses in large business enterprises comparable with the Forest Service.

Under "Use, maintenance, and protection of the national forests" is included the salaries, station, field, and traveling expenses of the executive and protective force upon the national forests; the rent of supervisors' headquarters; and the purchase of the necessary equipment and supplies.

Under "Permanent improvements on national forests" is included the construction and repair of roads, trails, telephone lines, fire lines, bridges, fences, rangers' cabins and barns, and other permanent improvements needed to safeguard the national forests from fire and to develop their fullest possible use by the people.

Under "Studies" is included investigations of forest conditions and needs upon the national forests required to promote the use and protection of these forests, and the work of the Forest Service independently and in cooperation with States and private owners, aimed at bringing about a more conservative use of forests not in federal ownership and of forest products.

I. ON NATIONAL FORESTS.

Since the Forest Service took charge of the national forests, in 1905, it has expended upon them in the fiscal years 1905, 1906, 1907, and 1908, for their protection and for the handling of current business, $4,900,000. The receipts from the national forests from all sources for the same period have been about $4,200,000. The net cost of the national forests to the Federal Government during this period has been $700,000. The amount expended in this period for the construction of roads, trails, and other permanent improvements is $675,259.

The States in which the national forests lie have since 1905 received $675,606 of the receipts from national forests for the maintenance of schools and roads.

When the Forest Service took charge of the national forests on February 1, 1905, their total area was 63,027,884 acres. Their total area is now 168,681,039 acres or over two and one-half times as much. The protective force was utterly inadequate in number and low in efficiency. Practically nothing had been done to promote the use and protection of the national forests by the construction of roads, trails, telephone lines,
